Committed to the Future of Australian Motorsports

Welcome to the 21st edition Rocket Industries Automotive Products and Accessories Catalogue. We are a genuine warehouse distributor, stocking products from over 300 leading manufacturers and suppliers. With over 60,000 different part numbers in stock we are able to ship most orders on the same day, we are serious about supplying you with the right parts. If we do not have a particular item you need, we will be happy to place a special order directly with our suppliers. We have established supply chains from overseas which enable fast and reliable service and parts sourcing without all the headaches and hidden charges. We are constantly improving customer service and investigating new products to help you keep pace with, and be competitive in the ever changing automotive market.

Each and everyone at Rocket has a genuine passion for motorsport, many staff members have their own street machine, hot rod or race vehicle or are associated with a team. This depth of knowledge and understanding of the demands placed on a car under extreme conditions reflects in the pride and winning attitude of our team at Rocket. Along with this is a dedicated warranty and support section which has the ability to offer our customers product testing and repairs on all our products with full factory support. Enjoy...

Quick Index

Air Filtration

Air Cleaner Assemblies & Accessories, Air Scoops, Intake Systems, Braethers and Adapters

1-40

Apparel & Promotional

Apparel, Memorabilia, Novelties & Gifts, Promotional

40-45

Body, Exterior & Interior Accessories

Bodies, Body Panels, Bonnets, Bumpers, Handles, Grilles, Windscreen Frames, Rubbers

45-69

Brake

Brake Hose & Fittings, Brake Kits, Callipers, Pads, Hand Brakes

69-86

Chassis, Suspension & Steering

Full Chassis, Chassis Clips, Cross Members, Engine Mounts, Trans Mounts, Air Bag Kits, Shocks, Four Bar Kits, Steering Columns, Universal Joints, Steering Wheels, Power Steering.

86-118

Cooling, Insulation & Air Conditioning

Fans, Radiators, A/C Kits And Accessories, Overflow Tanks, Sound & Heat Insulation.

118-145

Electrical, Gauges & Ignition

Gauges, Ignition, Engine Management, Lighting, Wiring Kits, Starter Motors, Alternators, Batteries, Headlights

145-231

Engine & Components

Crate Engines, Crank Shafts, Manifolds, Cylinder Heads, Blocks, Pistons, Timing Chains, Gear Drives, Stroker Kits, Cams, Valves, Pushrods, Valve Springs, Rockers, Engine Mounts, Billet Pulleys & Pulley Kits, Rocker Covers, Timing Covers, Brackets, Dipsticks

231-343

Exhaust

Mufflers, Cut-outs, Headers, Catalytic Converters, Exhaust Fabrication

343-354

Fabrication & Fasteners

Stainless Tube, Weld-Ons, Bunges, Caps, Studs, Nuts, Bolts, Fastener Kits, Dzus Fasteners

354-375

Fuel System

Carburetors, Throttle Bodies, Fuel Pumps, Mechanical Injection, Electronic Injection, Filters, Fuel Tanks, Surge Tanks, Regulators, Fuel Lines & Rails, Jugs & Funnels

375-430

Fuels, Lubricants, Paint, Chemicals & Car Care

Fuels, Fuel Additives, Oils, Chemicals, Lubricants, Fluids, Sealers, Paint, Car Care

431-440

Hose & Fittings

Hose, Hardline, Silicone Hose, Hose Ends, Fittings, Adapters, Extensions, Npt, Bsp, Orb, O-Rings, Valves, Clamps

440-466

Oil System

Oil Filters, Oil Pans, Oil Coolers, Windage Trays, Dry Sump Pumps, Vacuum Pumps, Breather Tanks, Oil Pumps & Accessories

466-494

Turbo, Superchargers & Nitrous

Turbos, Wastegates, Blow Off Valves, Intercoolers, Boost Controllers, Turbo Timers, Turbo Bags, Water-Methanol Injection, Blowers, Blower Kits, Belts, Remote Starters, Nitrous Bottle, Nozzles, Heaters

494-526

Safety Equipment

Helmets, Suits, Parachutes, Fire Systems, Gloves, Shoes, Race Seats, Belts

526-539

Tools & Shop Equipment

Engine Building Tools, Workshop Equipment, Automotive Tools

539-561

Transmission & Driveline

Transmissions, Shifters, Shift Kits, Flex Plates, Fly Wheels, Clutches, Trans Coolers, Differentials, Axles, Diff Housings, Diff Gears

561-602

Wheels & Tyres

Billet Wheels, Race Wheels, Steel Wheels, Lug Nuts, Valves, Race Tyres, Street Tyres.

602-620

Charts, Forms & Resources

Measurement Guides, Temperature Guides, Fitting Size Chart, Special Order forms

620-627

Rocket Speedway Catalogue

Complete catalogue of Sprint Car, Wingless, 600, Midget and Micro parts.

628-677

AIR CLEANER ASSEMBLIES

AIR FILTERS & ASSEMBLIES.

Stand out from the crowd with a magnificent looking Aeroflow air cleaner. These air cleaners are stamped from high quality steel. Available in many different great finishes and styles for that custom look you are after. Chrome-plated or black finish with reusable/washable or paper elements. Aeroflow's air filter assemblies work with all popular 5-1/8" (130mm) diameter carburetors. The 14" (355.60mm) air filter assemblies come with a drop base that sits 1-1/8" (28mm) below the carburetor.

NOTE: WARRANTY VOID UNLESS SERVICED WITH AEROFLOW CLEANING KIT AF2000-5050

PR66801

14" Deluxe Air Cleaner

AIR CLEANERS

These classic styled air cleaner kits are equipped with the CHEVROLET Trademark, and are supplied with genuine GM (AC) air filter elements for maximum airflow. Both the tops and the bases are chrome plated to exacting standards for long-lasting appearance, and each kit is supplied with necessary mounting hardware. The classic air cleaner kits are supplied with special die-cast Bowtie center nuts (also offered separately). The 14" air cleaner kits are supplied with 3" tall filter and other sizes are available from K&N. The bases of the 14" air cleaner kits are recessed for a low profile appearance, maximum performance and hood clearance.

Technical Note: After installing a new air cleaner kit, always lower the hood slowly to confirm sufficient clearance visually. Minimum clearance of 3-3/4" is required from the top of the carburetor gasket area to the underside of the hood.

PR141-302 14" x 3" Chrome with Bowtie Centre Nut
PR141-906 14" x 3" Chrome with Red Bowtie & Black Lettering
PR141-752 14" x 3" Black Crinkle with Red Bowtie & Lettering
PR141-307 14" x 3" Chrome Hi-Performance

PR141-790

PR141-692

PR141-693

Super-Light 14" Air Cleaners

Save critical front-end pounds. Proform offers you a choice of six race-winning combinations: air cleaner lids ranging from genuine carbon fiber to aircraft aluminium, with or without the famous Bowtie and CHEVROLET Emblems, in black or clear anodized finishes; plus a 3" tall genuine AC filter plus a color-matched, super-deep aluminium base for maximum hood clearance when using optional, extra-tall air filter elements. These weight-saving high-performance air cleaner kits blend traditional OEM appearance profiles with optimized air-flow dynamics to achieve checkered-flag results. Supplied with necessary mounting hardware and center nuts as shown.

141-692 14" x 3" Black Aluminium with Red Bowtie
141-691 14" x 3" Clear Anodized Aluminium, no logo
141-693 14" x 3" Clear Anodized Aluminium with Red Bowtie
141-790 14" x 3" Carbon Fibre with Red Bowtie
141-793 14" x 3" Hi-Tech Carbon with Red Bowtie

Ford Racing Air Cleaners

These premium 13" diameter air cleaners feature Ford Racing, Ford Mustang, or Ford Cobra emblems for the perfect customized look. They fit 2V and 4V carburetors, and are supplied with a 2-5/8" high filter element. Both the tops and bases have matching finishes, and each kit is supplied with necessary mounting hardware including special die cast Ford oval centre nuts (also offered separately). Note: Minimum clearance of 4" is required from the top of the carburetor gasket area to the underside of the hood.

MOPAR EMBLEM SLANT-EDGE AIR CLEANERS

The mighty air cleaner makes a striking first impression good or bad. Dull generic units serve their purpose, but sorely lack in the way of cool. New OMEGA-MOPAR Emblem Slant-Edge Air Cleaners end that useless standard now! The killer center nut-less design, and sleek slanted-edge lid looks great on big blocks, small blocks, and slant sixes alike. Available in five styles, only use if ultimate sleekness is your thing! Kit includes: die-cast aluminium lid with drop-base, 14" filter element, two carburetor 1/4"-20 studs (5/16"-18 adapter included) and additional PCV hardware.

RPCR2194

STEEL CADILLAC AIR CLEANER

- Based on the style and dimensions of the 1951-56 Oldsmobile and Cadillac air cleaners. This exciting new product will look at home in any street rod, hot rod, or traditionally styled period perfect car.
- Measuring a whopping 18-1/4" wide, our air cleaner is no wimpy, scaled-down version of this classic design. This new air cleaner has the same external dimensions as the original Oldsmobile oil-bath part. However, our version uses an off-the-shelf 14 inch diameter by 4 inch tall filter element. No fiberglass construction here, steel is real! Stamped from heavy gauge steel, fully spot welded together and then powder coated in a tough semi-gloss finish. The electroplated air cleaner base is also stamped steel and is designed to fit most carburetors and throttle bodies. The air cleaner is notched at the rear to provide clearance for the large diameter, GM, HEI distributors. Not content with anything normal, we designed and produced a unique wing nut to complement the air cleaner. This chrome plated, rocket shaped nut was modeled after 50s era space vehicles and measures nearly 1-1/8 inches tall. Ships as a complete, ready-to-install kit including housing, base, element and nut.

Air Cleaner Spacer

Our billet air cleaner spacer is fully polished to match the quality finish of our air cleaners and raises the air cleaner by 2-1/2 inches. Works with standard 4-barrel carbs with 5-1/8" air cleaner flange. Works with Billet Specialties Dual Quad and Triangle air cleaners only.

Flat Base for 14" Air Cleaner

Our 14" round air cleaners come standard with a 1" drop base. If you need more clearance for carb linkage try our flat base for 14" round air cleaners. Works with standard 4-barrel carbs with a 5-1/8" diameter flange.

BSRP1508 Flat Base for 14" Air Cleaners

Oval Air Cleaners Single Carb

Billet Specialties air cleaners are truly in a class by themselves. We offer more styles, CNC machined ball milled and logo designs, industry leading mirror finish and stainless mounting hardware. There is no mistaking a Billet Specialties air cleaner when you see it. All of our air cleaners feature standard size air filter elements

Pro-Flo® Chrome Air Cleaners

Top off your engine with a good looking Pro-Flo air cleaner. The Edelbrock signature and styling coordinate beautifully with Edelbrock Signature Series valve covers. These air cleaners are stamped from 18-gauge steel and triple chrome-plated for a high-quality finish and great looks.

Round Air Cleaners

Edelbrock triple chrome-plated round air cleaners work with all popular 5-1/8" diameter carburetors (Performer Series, Holley, Thermo-Quad, Quadrajet and Carter AFB). The 10" and 14" models have knock-outs in the air cleaner base and include an adapter for crank case ventilation. #1208, #1209 and #1221 fit all Edelbrock carburetors. Heights of air cleaners are in parentheses, measured from the gasket flange to the top of the supplied retaining nut. Dimensions are accurate within 1/8".

ED1207* 14" diameter with 3" element (3-5/16")
ED1221* 14" diameter with 3" element, 3/8" deeper flange (3-3/4")
ED1208* 10" diameter with 2" element (3-1/2")
ED1209* 6" diameter with 2" element, 5-1/8" base (3-5/8")
ED8092 Air Cleaner Spacer (3/4")
ED8093 Air Cleaner Spacer (1/2")

NOTE: #1207 is stock height and requires spacer #8092 with electric choke carbs or banjo fitting #8089 with manual choke carbs. #1221 fits all Edelbrock square-bore carbs and Q-jets (3/8" taller than #1207).

Oval Air Cleaners

Available for Edelbrock single and dual-quad applications, these oval air cleaners clear HEI distributors and all stock components. #1235 fits Edelbrock low profile dual-quad manifolds and others with 6-7/16" carb center-to-center. They come with high-quality K&N 2-1/2" washable, pre-oiled cotton gauze filter for excellent filtration. Overall dimension is 13-1/2" x 7".

ED1235* Oval for Dual-Quads (3-1/2")
ED1236* Oval for Single 4-Barrel Carburetor (3-1/2")

Triangular Air Cleaner

The Signature Series Triangular Air Cleaner is a new style with a shape reminiscent of the muscle car era. This hot looking chrome air cleaner has the classic Edelbrock signature. This triangular air cleaner comes with high-quality K&N 2-1/2" washable, pre-oiled cotton gauze filter for excellent filtration.

Designed for use with 5-1/8" diameter carbs (Edelbrock square-bore, Q-Jet, etc.), the Pro-Flo #1222 clears HEI distributors and electric choke housings. Air cleaner dimensions: 14-1/8" wide x 13-3/8" long.

ED1222* Pro-Flo Chrome Triangular Air Cleaner (3-1/2")

VICTOR SERIES AIR CLEANERS WITH BLACK POWDER COAT TEXTURE FINISH

Edelbrock Victor Series air cleaners feature a die-cast aluminium lid that is black powder coated with a finely textured surface for a pleasing and unique appearance. This is the same finish you'll find on our other new Victor Series accessories. These air cleaners work with all popular 5-1/8" carburetors or 4-bbl. throttle bodies and includes a knock-out in the base along with an adapter for crankcase ventilation. Number in parenthesis is overall height from base to top at the highest point.

- Round Air Cleaner, 14" diameter with 3" element (3-1/8")** ED41613
- Oval Air Cleaner, 11-7/8" x 8-1/4" with 2.4" element (3-3/4")** ED42203

Pro-Flo 1000 Reusable Air Cleaner

Pro-Flo 1000 Series reusable air filter offers superior flow capacity, low profile, good filtration, performance benefits and long-term savings. This air cleaner fits carburetors with a 5-1/8" air horn and has an overall height of 3". Inside every Edelbrock Pro-Flo 1000, you'll find our exclusive reticulated urethane foam element. Maintaining Pro-Flo's foam element is simple. Just release the spring clip, remove the element, wash in hot, soapy water, rinse, dry and reassemble. If necessary, replace with element ED1099.

- Pro-Flo Air Cleaner (overall height 3")** ED1002
- Replacement Air Cleaner Element** ED1099

CLASSIC SERIES AIR CLEANERS WITH POLISHED FINISH

This new line of air cleaners was created to perfectly match our popular classic aluminium finned valve covers. Three models for single or dual-quads give you plenty of options for that "just right" look on any nostalgia rod. Additionally, the small oval air cleaner provides adequate hood clearance in demanding applications as well as a coordinated appearance with the classic finned look. These air cleaners work with all popular 5-1/8" carburetors.

- Small Oval Cast Aluminium Air Cleaner for Single 4-barrel Carburetor** ED4115
- Round Cast Aluminium Air Cleaner for Single 4-barrel Carburetor** ED4117
- Large Oval Cast Aluminium Air Cleaner for Dual-Quads** ED4119

WITH BLACK POWDER COATED FINISH

Made of heavy-gauge sand-cast aluminium, our classic finned air cleaners are also now available with a durable black powder coated finish and polished fins and logo.

- Small Oval Cast Aluminium Air Cleaner for Single 4-barrel Carburetor** ED41153
- Round Cast Aluminium Air Cleaner for Single 4-barrel Carburetor** ED41173
- Large Oval Cast Aluminium Air Cleaner for Dual-Quads** ED41193

Replacement Elements for Edelbrock Air Cleaners

To keep your engine running clean, replace the original filter element in your Edelbrock air cleaner with a new element every 3000 miles (sooner in dusty areas). We recommend #1217, #1218 and #1219 replacement elements for any similar design air cleaner.

- ED1218** 2" tall, 10" diameter for ED1208
- ED1219** 2" tall, 6" diameter for ED1209 & ED1210
- ED1220** Oval K&N filter element for ED1235 & ED1236

ELITE II SERIES ROUND & OVAL AIR CLEANERS

Introducing the next generation of Elite Series accessories... Elite II. This new line of accessories features a design that is influenced by the original Elite Series originally released in 1985, but with a new modern take on this classic look. They're made from heavy-gauge, die-cast aluminium and are finished off with a show quality high luster polished finish. The raised fins are accented by a contrast gloss black finish between the fins for the definitive Elite Series look.

Our Elite II round air cleaners fit all popular 5-1/8" diameter carburetors and include a black anodized knurled nut. They come with a high-quality 3" pre-oiled, washable and reusable Pro-Flo Universal filter with the exclusive Pro-Charge™ clean strip for easy maintenance and excellent filtration. Our oval air cleaners are designed to fit Edelbrock single- and dual-quad applications and should clear HEI distributors and stock parts. They come with high-quality 2-1/2" washable, pre-oiled reusable filter for excellent filtration. Overall oval air cleaner dimensions are 13-5/8" x 7-3/16".

Oval Mouth Hot Rod Scoop

Frog mouth stack. Has provision for a stainless mesh screen to keep debris out of your motor. Filter sold separately. *polished* 2-5/8 2bbl neck.

- Scoop** MNJE9600

Stromberg Stainless Steel Bug Dome

Bug Domes will keep the big pieces out of your 2 barrel carburetors. Perfect for your traditional carburetors like Stromberg 97, 81 or 48 and Edelbrock / Holley 94. Since they fit within the I.D. of the carb throat, you can use them with popular slip over accessories such velocity tubes. These also fit the Chevy one barrel Rochester with a little massaging. Made in USA this "Bug Dome" is very sturdy the flange and the mesh does not bend even when heavy pressure is applied. The flange is 2 1/8" it widens out to about 2 1/4 at the lip were it sits in the carb's throat. Height comes in at 1 7/8 from bottom of flange to top of "bug" screen.

- Description** Stromberg S/S Bug Dome
- Part No.** SO3004020

Popular 14" chrome racing style assembly. Raises element 9/16" above carburettor flange. 5-1/8" flange fits all popular 4 barrel carburetors. Four element heights to fit a wide variety of applications. Will clear HEI distributors.

Neck Flange	Element Height	K&N P/N Element	Foot Note	K&N P/N Complete Assy.	Total ** Height
5-1/8"	2-1/4"	KNE-3740	-	KN60-1263	3.87"
5-1/8"	3"	KNE-1650	-	KN60-1264	4.62"
5-1/8"	4"	KNE-3750	-	KN60-1260	5.62"
5-1/8"	5"	KNE-3760	-	KN60-1270	6.62"

9" - Stainless Steel

Ideal when space is a problem. K&N filtercharger element provides superior airflow. Five flange sizes and various heights assure a wide number of applications. Can be mounted on most dual carb setups. Polished stainless steel construction for top and base plates.

Neck Flange	Element Height	K&N P/N Element	Foot Note	K&N P/N Complete Assy.	Total ** Height
3-1/16"	2-3/4"	KNE-3530*	-	KN60-1090	4.12"
5-1/8"	2"	KNE-3527	-	KN60-1110	3.37"
5-1/8"	2-3/4"	KNE-3530*	-	KN60-1120	4.12"
5-1/8"	5"	KNE-3650	-	KN60-1365	6.37"

* NOTE: Heavy Duty 9"x 2-3/4" Elements is also available Order part No. KNE-3550

7" - Chrome

Ideal for that quality show car image. Four flange sizes to fit nearly all carburetors, even 5-1/8" flange 4 barrels. Note: These assemblies might not flow enough air for performance engines.

Neck Flange	Element Height	K&N P/N Element	Foot Note	K&N P/N Complete Assy.	Total ** Height
5-1/8"	2"	KNE-3402	-	KN60-1320	2.93"
5-1/8"	3"	KNE-3403	-	KN60-1330	3.93"

Tall Velocity Stack Air Filters Open 360° free breathing filtercharger element on top of a 5" high stainless steel velocity stack base. More horsepower from channelled airflow. Downdraft direct into carburettor. Draws cooler air up and away from engine heat. More non-turbulent air. Engines equipped with the K&N Tall Velocity Stack Air Filter actually produce MORE horsepower than those with no filtration at all. All stainless steel top and base, highly polished to a mirror finish. Available with 5-1/8" flange to fit Holley, Carter or Rochester carburetors. Also available with 7-5/16" flange to fit Holley Dominator carburetors. Nine inch diameter allows side by side mounting on most dual carburetted setups. Choice of two element heights assures proper airflow for virtually any engine. Ideal for street rods.

Neck Flange	Element Height	K&N P/N Element	Foot Note	K&N P/N Complete Assy.	Total ** Height
7-5/16"	5"	KNE-3650	-	KN60-1366	6.37"

AIR FILTRATION

CUSTOM AIR FILTERS FOR WEBER CARBS

K&N Custom Air Filter kits are designed to allow the maximum performance from your carburetors, yet keep the dirt on the outside where it belongs. Show quality to fit racing vehicles with VW, Pinto or any other engine equipped with these performance carburetors. All assemblies come with custom chrome top and base plates (except IDA Triple) and the Famous K&N Hi-Flow Washable Air Filter. All assemblies are convenient to clean and service.

Custom Plenum

The plenum is designed to fit most American 4 barrel carburetors that have a 5-1/8" flange. Also will fit the Weber DGV carburettor when used with K&N adaptor 85-1061. Designed for cold air intake, plenum has a single snorkel outlet that can be fitted with a 4" I.D. hose running to a remote air filter. A K&N universal filter with a 4" flange can also be clamped directly on the snorkel as well. The outside diameter of the plenum is 9" and the snorkel sticks out 6" from the centre of the plenum. Minimum clearance required above the carburettor flange is 3-1/8". NOTE: The custom plenum is recommended for small displacement engines (less than 200 C.I.) or low revving V6-V8 engines.

KN85-1060 Custom Plenum

Weber DGV Air Cleaner Adaptor

K&N's complete selection of custom round air cleaners (5-1/8" flange) can now be adapted to the ever popular Weber DGV series carburettor.

You now have a choice of air cleaner diameters from the MINI seven incher all the way up to the BIG FOURTEENS. Select from OPEN 360° custom chrome, tall velocity stacks, or even the full size custom plenum. Even the 14" drop base air cleaner can be used.

Keep in mind that the flange must be 5-1/8" ID to work with the DGV adaptor.

K&N DGV adaptor comes complete with gaskets and mounting hardware - EXCEPT customer must provide 1/4-20 centre stud.

Ram Tube Air Filters For Fuel Injectors

Individual Round Filter

Hilborn 4, Injectors Fitted to Honda and Kawasaki Engines in T.Q. Midgets Air filters designed to fit over stock, uncut ram tubes. Filters come complete with rubber mounting adapters.

To install, fit rubber adapters around ram tube bases and fit filters over ram tubes and clamp onto adapters in desired position. Air filters come with chrome end caps.

Fits #45-K-4A and #45-H-4B Hilborn injectors.
KNRD-1004 Filters measure 3"

O.D. x 6" L & fit 1-1/2" ram tubes Set of 4

KNRD-1400 Hilborn Injector #F414A, for Turbocharged tractor, air filter clamps over 4" lip on cast ram tube. Air filter measures 7" dia., 6" long.

KNRD-1300 Hilborn Injector #524, for 80 c.i. Magnuson Blower Head. Filter fits 3" ram tube. Measures 7" dia., 6" long

Custom Racing Air Filters

Custom Clamp-on Air Filters

For Racing vehicles using VW engines

Universal air filter designed for 2-1/16" VW Solex and 2-9/16" Zenith-Holley carburetors. One piece construction with a strong rubber base and flange that clamps directly to the carburettor. Some units have 1/2" vent kits included, for easy installation of vent hoses. Choice of show quality chrome or economy rubber top. Chrome adds the touch of class - rubber for the rugged off-road use. Three shapes or styles and numerous heights available - see listings below.

K&N HIGH FLOW RACE AIR FILTER

This K&N racing air filter is made with 2 layers of cotton and does not come oiled. It was designed to provide even lower air restriction than our replacement air filters for street vehicles. K&N racing air filters are washable and reusable.

- Designed to increase horsepower and acceleration
- Designed for racing applications only
- Washable and reusable lifetime air filter
- Dual cotton layers
- NOT for road use

AIR FILTER LIDS & BASES

X-Stream Air flow Top Plates

Add 1000 CFM of air flow to your current 14" filter assembly with this revolutionary design. Having the air enter through the top plate filter assembly does not cause turbulence but actually helps draw air in from the side and gets the air headed down the carburettor or fuel injection system, right where you want it. Also available in 9" and 11".

K&N RACE SPECIFIC AIR CLEANERS LID FOR ON-ROAD RACING USE

K&N pavement only race air filter utilizes special 2-ply cotton gauze and is built in a common 14" outside diameter

As a result these are intended for racing use on paved surfaces only. Ideal for road courses, oval tracks, or the drag strip where only minimal engine protection with almost unrestricted airflow is sought after. These filters are cleanable and reusable using standard K&N air filter service products. They can be run oiled, or dry, for racing on paved surfaces only.

Custom Air Filter Plates

K&N's 14" air filter plates are available separately for replacement or special applications. Base plates fit carburetors with 5-1/8" airhorn flange. Drop base will not clear all electric choke mechanisms, it may be necessary to space up baseplate with a locally available air cleaner spacer.

KN3365	9" DOMINATOR BASE UNSTAMPED 7-5/16" NECK

KN85-3552	14" O.D. flat base Nylon reinforced plastic, 7-5/16" flange (raises filter 3/4" above carb flange)

14-inch Super-Deep Aluminum Air Cleaner Base

The popular deeply-recessed air cleaner base from the Super-Light Bowtie Emblem air cleaners is now available for any application.

This deep base will allow for nearly every carb application including electric choke carbs allowing the air cleaner to sit low enough to shut the hood!

CARBY SUBSTACKS

Carburettor Substacks

The K&N Substack reduces turbulence, improves metering accuracy. Increases the airflow by reducing restriction. Straightens and speeds up air-flow.

AIR FILTER APPLICATION:

The substack is designed to only work effectively with K&N Filtercharger™ elements and 360° custom air cleaner assemblies. If the substack is installed in an improper housing, the performance may actually drop! The minimum height above the stack needs to be at least 1-1/2" for proper operation.

Holley 2300

Fits most Holley 2300 Series carburetors. The Substack is designed to fit 2 barrel popular models within this series. Holley carburettor list numbers are stamped on the choke horn.....KN85-0210

Carb. List No.	Model No.	CFM rating
0-4412	2300	500
0-6425	2300	650
0-7448	2300	350

CARBURETTOR SUBSTACK for Edelbrock Carbs

K&N Substack for EDELBROCK Square-Bore Carburetors - Fits most Edelbrock Square-Bore carburetors. This Substack is designed to fit almost every model within this series. It straightens and speeds up airflow, reduces turbulence, improves metering accuracy and increases airflow by reducing restriction. Will also fit some Carter AFB models.

Holley Sq. Bore w/Milled Choke Horn

This substack is designed to be used on Holley 390-850cfm square bore carburetors (4150/4160), that have had the choke horn milled off, but do not use an air cleaner. Full radius design helps to increase the airflow for drag racing. Will also hold down the base plate of a cold air scoop. Will not work with K&N Custom Chrome Racing Air Cleaners.....KN85-0500

Holley 4150/4160

Fits most Holley 4150 and some 4160 Series carburetors with high and low choke horns. The 85-0200 is designed to fit 4 barrel popular models in this series. Holley carburettor list numbers are stamped on the choke horn.KN85-0200

Holley Sq. Bore w/Milled Choke Horn

This substack is designed to be used with Holley 390-850cfm square bore carburetors (4150/4160), that have had the choke horn milled off and still use an air cleaner. Will work with all K&N Custom Chrome Racing Air Cleaners, including Tall Velocity Stack Air Cleaners.....KN85-0400

Holley Dominator

This substack is designed to be used on Holley 1050 & 1150 cfm Dominator carburetors. Will not allow use of a standard air cleaner housing, but it will hold down the base plate of a cold air scoop. Straightens airflow and helps even out the flow to all four venturies. Decreases the restriction around the throttle bores.KN85-0600

Custom Chrome Assemblies

compatible with Substack 85-0200, 85-0210 ONLY!

Vent Hose Adapters

Marine Style Vent Hose Adapters

These vents mount in between the top and bottom plates of custom chrome air filter assemblies.

Swaged vent tube accommodates breather hose without drilling into filter base.

Hose size 1/2"
2-3/4" filter height
Part No: KN85-1350

RACING CONE FILTER

Racing Cone Filters

The filters fit into the air scoops and allow plenty of fresh clean air to enter the engine, but keep the small stones, tire dust and other racetrack debris from demolishing the engine. There is a hole at the small end of the filter to allow debris to exit the air scoop. The filters were designed for the vehicles listed below, but can probably be adapted to a wide variety of applications.

Application **A** **B** **C** **K&N P/N**

PANEL FILTERS

Aeroflow Panel Filters provide excellent filtration and combine durability with performance. Designed for perfect OEM fitment, these 4-layer cotton gauze filters are for the street car and are designed to increase performance. With a simple drop-in application, it is easy to replace your dirty/restrictive/worn filter with a reusable/washable filter that you will never need to change again hence saving you money and protecting the environment. Try one today and experience the Aeroflow difference!

Tapered Clamp On Filters

Chrome Top

These clamp on filters are the classic pod filter design. They are tapered with the base smaller than the top and feature attractive chrome end caps.

Universal Air Filters - Round Straight

When selecting one of K&N's universal round straight air filters, you should consider the following dimensions as they relate to the specification chart:

(F) Mounting Flange Inside Diameter — This is the most critical dimension and should be very close to the diameter of the application's inlet flange. The flange will stretch up to 1/16" for those in-between sizes. (D) Filter Diameter — This is the overall diameter of the filter. Always use the largest diameter practical to insure maximum filtration. (L) Filter Length — This dimension is the length of the filter body only, it does not include the flange length. Always use the longest filter practical for maximum filtration. (FA / FL) Flange Angle and/or Length — If no angle is listed in the specifications table, the flange is straight. Any angle listed is in degrees and can be utilized when space is a problem. Flange Type — The location of the flange in relation to the OD of the filter is sometimes offset to one edge of the filter for more clearance in an application.

(F) Mounting Flange Inside Diameter		(D) Filter Diameter		(L) Filter Length		(FL) Flange Length		(FA) Flange Style	(FO) Flange Offset	Rubber End Cap Part #	Chrome End Cap Part #	PreCharger Part #

ADD KN TO FRONT OF ALL PART NUMBERS

Footnotes: 1 - Filter has molded-in velocity stack (inside of filter flange is rounded) 2 - Metal top plate has 1/4-20 stud 3 - Optional 1/2" vent cones standard 4 - 1/2" vent standard

AIR FILTRATION

X-STREAM CLAMP ON FILTERS

These X-Stream Air Filters take performance to the next level with innovative K&N air flow technology. The X-Stream Air Filter provides awesome air flow and outstanding filtration. When racing, in any environment, racers need all the protection and airflow they can get. K&N delivers. Two styles are available: standard tapered or reverse tapered (top is larger diameter).

Universal Air Filters - Oval Straight

When selecting one of K&N's universal oval air filters, you should consider the following dimensions as they relate to the specification chart. (F) Mounting Flange Inside Diameter — This is the most critical dimension and should be very close to the diameter of the application's inlet flanges. The flanges will stretch up to 1/16" for those in-between sizes. (MA / SA) Filter Oval Dimensions — This is the length and width of the filter. Always use the largest filter practical to fit the application. (L) Filter Length — This dimension is the length of the filter body only, it does not include the flange length. Always use the longest filter practical, for maximum filtration. (FA / FL) Flange Angle and/or Length — If no angle is listed in the specifications table, the flange is straight. Any angle listed is in degrees and can be utilised when space is a problem. Flange Type — The location of the flange in relation to the outside of the filter is sometimes offset to one edge of the filter for more clearance.

Special Application Clamp-On Air Filters

Special filters to clamp directly on GM TPI throttle bodies using 1990-92 stock GM or Digital Fuel Injection Computer. Will not work on engines that use a mass-air sensor. NOTE: Not legal for use on emission controlled vehicles that operate on public streets. 21-5/16" x 43/4" oval mounting flange, 4-3/4" x 6 1/2" oval base, 3-1/4" x 4-1/2" stainless steel oval top, 55/8" filter height, 7/8" flange length RC-5000

21-5/16" x 43/4" oval mounting flange, 4-1/2" x 7" oval base, 4-1/2" x 7" chrome top oval top, 2" filter height, 3/4" flange length RC-5010
21-5/16" x 43/4" oval mounting flange, 5-1/4" x 85/8" oval base, 4" x 6-1/4" stainless steel oval top, 5-1/2" filter height, 7/8" flange length RC-5050

Special filters with metal base and flanges, to allow mounting the filter with a hose, ideal for high temperature applications.

3"OD round mounting flange, 7" filter diameter, 7" chrome top w/1" hole, 6" filter height, 1-5/8" flange length	RM-3001
3-1/2"OD round mounting flange, 4-1/2" x 7" oval base, 4 1/2" x 7" stainless steel top, 3 1/2" filter height, 5/8" flange length	RM-3501
6"OD round mounting flange, 7-1/2" base diameter, 7" chrome top w/1/4-20 stud, 10" filter height, 1" flange length	RM-6001

AIR FILTRATION

NOTE: ADD KN TO FRONT OF ALL PART NUMBERS

Universal Air Filters - Round

When selecting one of K&N's universal round tapered air filters, you should consider the following dimensions as they relate to the specification chart: (F) Mounting Flange Inside Diameter — This is the most critical dimension and should be very close to the diameter of the application's inlet flange. The flange will stretch up to 1/16" for those in-between sizes. (D) Filter Diameter — This is the outside diameter of the filter. The top size is listed first, then the base size. Always use the largest size filter that is practical for the application. (L) Filter Length — This dimension is the vertical length of the filter body only, it does not include the length of the flange, nor does it take into account the taper of the filter media. Always use the longest filter practical, for maximum filtration. (FA / FL) Flange Angle and/or Length — If no angle is listed in the specifications table, the flange is straight. Any angle listed is in degrees and can be utilized when space is a problem. Flange Type — The location of the flange in relation to the O.D. of the filter is sometimes offset to one edge of the filter for more clearance in an application.

CABIN AIR FILTERS

The K&N Washable Cabin Air Filter is the first of its kind designed to replace your vehicle's stock cabin air filter with a washable and reusable version that cleans and freshens incoming air. Watch the K&N Washable Cabin Air Filters Overview video for more information on how cabin air filters work. K&N Cabin Air Filters are designed to be cleaned and reused over and over again. Using a combination of an advanced synthetic filter media and K&N Refresher™ spray, the K&N Washable Cabin Air Filter grabs and holds dust particles.

• Helps Control Odours • Cleans & Freshens Incoming Air • Electrostatically Charged to Capture Most Mould, Mildew, Pollen, Spores, Fungus & Germs • Factory Fit, Pre-Treated & Ready to Install

Cabin Air Filter Refresher Kit

K&N cabin air filter cleaning kits come with a 12 ounce pump spray bottle of cabin filter cleaner that loosens dirt and road grime from your K&N cabin air filter and helps remove trapped mould, mildew, fungus, allergens, bacteria and other debris from it. Also included is an 8 ounce pump spray bottle of cabin air filter Refresher which increases the electrostatic properties of the cabin air filter helping it to trap contaminants. This long lasting formula helps eliminate the source of most odours and it is made from safe, biodegradable ingredients.

Part No. **KN99-6000**

FILTER WRAPS

Precharger Filter Wraps

What is a Precharger?

The K&N Precharger is a specially designed filter wrap made to extend the service interval of your K&N Filtercharger when used in very dusty conditions. They are made from a highly durable polyester material containing uniform micron openings. The Precharger will stop dirt particles as small as .005" in diameter, yet add less than 10% restriction to the airflow of the filter. The Precharger is designed to be run dry and can be cleaned with K&N Filter Cleaner. The Precharger is custom made to fit each application. Double stitched elastic openings assure that the Precharger will stay in place.

The Prechargers are available in a variety of colors, all with a silk-screened K&N Precharger logo.

DryCharger

K&N DryChargers® are manufactured from a durable polyester material and are pre-treated with a proprietary hydrophobic process designed to prevent splashes of water or mud from saturating your K&N air filter. The DryCharger will also stop small dirt particles; yet add little restriction to the airflow of the filter. Please be aware the DryCharger is water repellent, not water proof. Depending on conditions and usage the water repellent treatment is good for 1 to 2 years.

Airforce Pre-Cleaner Wraps

The K&N Airforce Pre-Cleaner is a specially designed foam filter wrap made to extend the service interval of your K&N Filtercharger when used in very dusty conditions. They are made from large, open cell foam. The Airforce Pre-Cleaner will stop 90% of the dirt, yet only add a 2% restriction to the airflow of the filter. The Airforce Pre-Cleaner is designed to be used with any foam filter oil and must be cleaned with gasoline or solvent. The Airforce Pre-Cleaner is custom made to fit each application, and there are 4 universal cut-to-fit sizes available.

AEROSKIN

The AeroSkin air filter wraps are specially designed to wrap around your air filter assembly to provide that added layer of protection against the harsh environment. It will extend the service interval of your cotton air filter during dusty conditions. When coated with a silicone based lubricate it will repel slashes of water to keep your air filter dry. They are made from durable polyester material containing a uniform weave with stitched elastic openings. The AeroSkin's provide minimal restriction to the airflow of the filter and can be cleaned with our filter cleaner.

AIR FILTER CLEANING KITS

Air Filter Cleaning Products

AeroFlow's air filter cleaning products are specifically formulated for cleaning and re-oiling all AeroFlow reusable/washable filters and all types of oil-based air filters.

AF2000-5050	AeroFlow air filter cleaning kit contains 295ml (10oz) oil pump style 295ml (10oz) cleaner pumps style
2000-0606	AeroFlow air filter cleaner 295ml (10oz) pump style
2000-0533	AeroFlow air filter oil 295ml (10oz) pump style

K&N Recharger Service Kits

Designed to recharge any K&N Air Filter, the K&N recharger kit restores air flow efficiency so your air filter performs virtually like new! Includes service decal, 355ml filter cleaner and either a 192ml aerosol or a 236ml squeeze bottle of filter oil.

Recharger Kit with Aerosol Oil
Recharger Kit with Squeeze Oil
Recharger Kit with Black Squeeze Oil
Bulk Pack of 12 x KN99-5000

Cabin Air Filter Refresher Kit

K&N cabin air filter cleaning kits come with a 12 ounce pump spray bottle of cabin filter cleaner that loosens dirt and road grime from your K&N cabin air filter and helps remove trapped mould, mildew, fungus, allergens, bacteria and other debris from it. Also included is an 8 ounce pump spray bottle of cabin air filter Refresher which increases the electrostatic properties of the cabin air filter helping it to trap contaminants. This long lasting formula helps eliminate the source of most odours and it is made from safe, biodegradable ingredients.

Part No. KN99-6000

K&N Filter Cleaner & Degreaser

K&N Air Filter Cleaner is the only cleaner recommended to clean K&N Air Filter elements. The use of any other cleaning solution can void the filter's warranty, and possibly damage the filter's cotton material. K&N Air Filter Cleaner works to dissolve dirt build up and old filter oil and can be washed away with water.

355ml Squirt Bottle KN99-0606

COLD AIR INDUCTION KITS

UNIVERSAL CLOSED COLD INTAKE SYSTEM

This universal closed cold air intake system is genuine carbon fibre it has a removable and washable 4 layer cotton element. Suitable for forced induction, naturally aspirated, 4x4, off-road, street and racing applications. It comes in two different air box lengths (152.4 mm) and 8" (203.2 mm).

AF2341-3000 Universal Intake system with 6" air box length
AF2341-3001 Universal Intake system with 8" air box length

Washable 4 layer cotton inverted pod filter located inside carbon housing.

Flexible intake tube is 77mm (3") ID and 1m long

AF2341-3001

AF2341-3000

VF LSA COLD INTAKE SYSTEM

The AeroFlow Performance cold air intake system features a large diameter free flowing intake path to ensure maximum performance from your LSA powered vehicle. This cold air intake kit is a high performance air box designed as a direct fit for all VF GEN-F LSA 6.2. Our kit contains a large aeroFlow performance pod filter to assist in minimizing the restriction of air flow and is contained in a fabricated housing which seals against the underside of the vehicles bonnet to reduce the intake of hot air from inside the engine bay. It is designed for easy installation with OEM fitment.

AF2341-1001 Fits all VF GEN-F LSA 6.2

K&N Synthetic Air Filter Cleaner

K&N 99-0624 is a 32 ounce spray bottle of K&N Synthetic Air Filter Cleaner.

The 99-0624 air filter cleaner will bring your K&N synthetic air filter to like new condition. It works to dissolve grime and dirt build up, then it can be washed away with water. It is a great cleaner for K&N Hybrid air filters, K&N Blackhawk air filters, Dryflow air filters and other synthetic air filters.

- Pump spray bottle
- Specially formulated for synthetic filters
- Dissolves dirt and grime
- High performance cleaner

946ml Squirt Bottle
KN99-0624

K&N SEALING GREASE

30ml Squeeze Tube
KN99-0703-1

K&N Sealing Grease

K&N Air Filter Sealing Grease provides an air tight fit around sealing surfaces on all types of air filter elements. It resists heat and will not melt or run off. Note: K&N Air Filter sealing grease is not to be used on clamp-on filter elements.

177ml Squeeze Tube KN99-0704

MUSTANG COLD INTAKE SYSTEM

The AeroFlow Performance cold air intake kit replaces the restrictive stock air intake on your 2015 to 2017 V8 Ford Mustang. This bolt-on kit includes a aeroFlow performance pod filter with clamp which is washable and reusable, new air box/tray with installed foam hood seal, a new intake tube which accommodates the factory mass air sensor, idle bypass hose, EVAP vent hose and crank case vent hose and all required mounting hardware. The kit utilizes all factory emissions and vacuum lines. Factory mounting locations and hardware are utilized to allow for quick and easy installation.

AF2341-1000 2015-2017 Mustang intake kit

Universal Apollo Induction Systems

The K&N Apollo Cold Intake System is also available as a universal cold air intake system incorporating a washable/reusable K&N High-Flow Air Filter. The Apollo's specially designed shape increases volumetric efficiency and provides the benefits of an open cone filter and standard air box in one unit. It comes with a standard 70mm base flange with a range of optional stepped adaptors available to allow fitment to other intake sizes.

TYPHOON INTAKE SYSTEMS™

Built for performance and show, the Typhoon Air Intake System is a free-flowing mandrel-bent aluminium tube induction system designed to fit many sport compact performance vehicles. Each kit is proven on a rear-wheel dynamometer to increase horsepower and torque. They come with an oversized High-Flow conical air filter designed to provide even more airflow at lower restriction than a standard K&N O/E replacement filter that is limited to the size of the factory air box.

ORION UNIVERSAL AIR INTAKE SYSTEM

K&N's Orion air intake system is a universal cold air intake system.

The Orion assembly is designed to increase volumetric efficiency and engine horsepower. The Orion incorporates a K&N famous cotton gauze air filter which is removable for periodic cleaning and provides the benefit of an open cone filter and standard air box in one unit. The plastic injection-moulded housing acts as a heat shield to prevent any power loss. Assembly designs were flow tested for many hours before our engineers completed the Orion's shape to provide high flow with low restriction and great filtration all in a small space. Included in the box is a template to cut your own vinyl wrap for personal customization of the housing. The assembly comes with a 76mm air filter base flange and a 100mm housing intake diameter. The filter base incorporates a 1/4 inch NPT threaded fitting to attach an optional vent adapter.

- Designed to increase horsepower and acceleration
- Includes injection-moulded filter housing
- Washable and reusable lifetime air filter, includes moulded velocity stack
- Flow tested assembly for optimal air flow and minimal pressure loss
- High air flow with excellent filtration
- Mounting hardware, vent adapters and cold air hose separately available

4" (100mm) Inlet 3" x (76mm) Outlet
Replacement Filter for KN54-5000 **KN54-5000**
KNE-3051

AirCharger® Intake Kits

A sister product to 57 Series FIPK, 63 Series Intake kits or AirCharger® Intakes are built for many different vehicles and represent a dramatic improvement over a K&N O/E replacement filter alone. The World's Best Flowing, Best Filtering, High Performance Air Intake Systems

*Guaranteed to Provide more HP and Increased Acceleration. *Engineered to Specific Vehicle Design.

*Easy to Install, Usually in 90 minutes or less!

*Lasts up to 100,000 Miles Before Service is Required (depending on driving conditions).

*Replaces OEM Filter and Air Box. *Air Filter is Washable and Reusable

*Works with Original Equipment Manufacturer Computer Systems

*Designed to use Factory Holes & Mounting Points Whenever Possible.

Apollo Cold Air Induction Systems

K&N Apollo Cold Air Induction Systems incorporate a washable/reusable K&N High-Flow Air Filter within a protective shell. They come with custom mounting hardware to fit specific vehicle applications. The Apollo's shell reduces heat build-up and feeds cool air into your engine, resulting in improved volumetric efficiency and increased power gains. Apollo Cold Air Induction Systems allow for updating your vehicle's intake system while retaining a closed environment.

Apollo Performance Air Induction Kit For Subaru Impreza

K&N has designed a new performance air induction kit (KN57A-6044) for a wide range of models in the 2007, 2008 and 2009 Subaru Impreza line with a 2.5 litre engine. The custom design of the KN57A-6044 is made using K&N's Apollo air filter enclosure along with a K&N air filter. The Apollo's protective shell provides the benefits of an open cone filter and standard air box in one unit.

The K&N performance air intake system comes with adaptors to fit the Subaru Impreza. By using a CNC mass air sensor pad, K&N keeps your Subaru running within the factory settings. The 57A-6044 also provides excellent filtration and additional power to the engine. The removable cold air feed attachment on the Apollo allows outside air to enter the unit. Zip ties are also provided to secure the hose in position. It takes about 90 minutes or less to install this kit using simple hand tools.

Part No: KN57A-6044

Apollo performance air induction kit for applications are as follows:

2009 SUBARU IMPREZA WRX STI 2.5L

2007 SUBARU IMPREZA 2.5L

Ford Mustang AirCharger Intake Kit 2015-17

The K&N 63-2589 AirCharger air intake system replaces the restrictive factory air filter and air intake housing on some Ford Mustang models. K&N air intakes are designed to dramatically reduce air intake restriction as well as smooth and straighten air flow. This allows your engine to inhale a larger amount of air than the factory air filter assembly. More air means more usable power and acceleration throughout the engine's RPM range. The 63-2589 air intake comes with a chrome topped K&N high-flow air filter and a heat shield that installs into the original air box space. The tube accommodates the factory crank case vent hose and air inlet temperature sensor as well as the blow off valve.

Ford Mustang EcoBoost 2.3L AirCharger Intake Kit 2015-17 **KN71-3535**

FUEL INJECTION PERFORMANCE KIT **FIPK** GENERATION II

Designed to promote performance in fuel injected stock engines by creating air filtration with the least resistance in air flow. The benefit of low resistance air filters can be felt directly in throttle response. These kits have uniquely designed adapters. These adapters create a radius entry which reduces restriction and allows the engine to ingest an even greater volume of air. To design such an assembly, two factors must be considered; the air filtering element and the air filter adapter. The FIPK combines a precision high flow K&N air filter element with other necessary components, depending on the specific application.

DELTA FORCE AIR INTAKE KIT

Flowmaster now delivers the next step in attaining maximum performance & efficiency for your vehicle. Introducing Flowmaster's Delta Force Cold Air Intake systems now available in dry filter or oiled filter configurations. All systems feature ultra-trick looking durable cross-linked polyethylene intake tubes with a large high-flow conical shaped 8-layer cotton gauze air filter ensuring it will trap more dirt/dust particles than a typical 6-layer filter, or a dry synthetic media filter with an included pre-filter wrap to help protect from excess dirt particles and extend the filter life. Both have Flowmaster logos molded in the intake tubes showing others you're serious about quality and performance. Other features include a custom designed black powder-coated air dam, high quality multi-layered reinforced silicone couplers, anodized aluminum fittings with stainless steel hardware.

- Cleanable 8-layer Cotton Gauze Air Filter or Dry Synthetic Media Filter with Pre-filter wrap
- Roto-molded Cross-linked Polyethylene (XLPE) High Flow Intake Tube
- Unique Custom Finned Design Intake Tube with Flowmaster Logo
- Uses Factory Mounting Holes for Easy Installation
- Multi-layer Reinforced Silicone Couplers
- No Tuning Required

Application	Part No
Chevrolet Camaro 2016-18 6.2L V8	FLO615102
Ford Mustang 2015-17 5.0L V8	FLO615131
Subaru BRZ, Scion FRS Toyota 86 2.0L 2013-17	FLO615163

CARBURETTOR SCOOPS

Powercharger Air Cleaner Assembly

Dress up your engine with this custom cast aluminium air cleaner assembly. The highly polished, low profile design will add that finishing touch to any engine. Unique low profile design (7.8" x 18.3" x 3").

Powercharger Air Cleaner Assembly	H064280
Replacement Element (2 required)	WM90633

Aluminium Hood Scoop

Hilborn-Style with inlet screen and bezel (20" long x 5" tall). Adjustable centerline on dual quad (7-3/4" to 9-1/4"). Fits carburetors with 5-1/8" neck. Polished with fins.

RPCR5235 - Single Quad
RPCR5233 - Dual carb POLISHED aluminium Hilborn style scoop.
RPCR5233BLK - Dual carb BLACK alloy Hilborn style scoop.
RPCR5223 - Hood scoop replacement mounting hardware.
RPCR5229 - Hood scoop replacement 6" air cleaner lid.

Small Aluminium Hood Scoop

Polished aluminium Hilborn style scoop with inlet screen and bezel. 13-1/2" long x 4-1/2" tall. Fits single carburettor with 5-1/8" neck. Includes 6-3/8" x 2-1/2" paper element and mounting hardware.

RPCR5245	Smooth
RPCR5246	Finned

SMALL ALUMINIUM HOOD SCOOP

"hilborn style" aluminium "mini" hood scoop (single quad)black finish(13 1/2") long (4 1/2") tall
RPCR5247 Polished

Aluminium Street Hood Scoop

Comes with three "round" inlet butterflies (20" long). Fits carburetors with 5-1/8" neck. Adjustable centerline on dual quad (7-3/4" to 9-1/4"). Includes 6-3/8" x 2-1/2" paper element & mounting hardware. Flaps reversible. Available in red or black. Adapter plates included for either dual or single applications.

RPCR5339	Plain Polished
RPCR5239	Finned Polished

Shotgun Scoop

Cast aluminium scoops. Polished with two paper filters. Can be mounted on any single or dual 4 bbl carb. Come in plain or Ribbed style.

RPCR5236	Plain smooth polished shotgun scoop
RPCR5234	Ribbed / finned polished shotgun scoop .

Air Cleaner Velocity Stack

Chrome steel with washable foam element. Fits single quad carburetors with 5-1/8" neck. 5" steel stud with wing nut included.
RPCR2104

Hilborn Style Air Scoops

Authentically styled air scoops are made from high quality aluminium castings. Available to fit single and dual carb applications using carburetors with 5-1/8" diameter necks. Dual carb scoop features an adjustable base to fit carburetors with 7-5/8" to 9-1/4" centre line spacing. Beautifully polished to a high lustre, these scoops come with a chrome plated inlet screen and bezel and are complete with all necessary mounting hardware. Use replaceable paper filter elements.

MG5232	Single Four Barrel Air Scoop
MG5233	Dual Four Barrel Air Scoop

Street Scoop Conversion Kits & Parts

Mr. Gasket now offers two conversion kits to convert the popular, award winning Street Scoops from one 4-bbl. to two 4-bbl. carburation and vice versa. Each kit includes all the necessary components (except carburetors and intake manifolds) needed to make the desired conversion. The one 4-bbl. to two 4-bbl. kit includes: air cleaner top, filter element, mounting flange, throttle linkage, miscellaneous hardware as required.

MG6652	Converts 6651 scoop to 6650 specs
The two 4-bbl. kit includes: cast aluminium mounting flange, throttle linkage rod, carburetor stud.	
MG6653	Converts 6650 scoop to 6651 specs
MG3808G	Replacement butterfly and shaft kit

Carburettor Intake Plenums

These intake plenums mount to any carburettor or throttle body with the standard Holley 5-1/8" flange. They feature 4" intake pipes to attach piping or a clamp on filter and are perfect for blow through forced induction or cold air induction systems.

Standard units are 3.5" tall and low profile units are 2.4" tall.

Standard Single Intake Plenum (polished) SPE-9849

Standard Dual Intake Plenum (polished) SPE-9859

Low Profile Single Intake Plenum (polished) SPE-98499

Low Profile Dual Intake Plenum (polished) SPE-98599

Blower Shop Dual Carb Blower Scoop

Polished aluminium dual carb blower scoop kit for standard 4150 style carburetors, inline or sideways (8-5/8" centre to centre) application. Complete with pre-oiled/washable air filters and top plates. Includes all mounting gaskets and hardware (1/4-20 & 5/16-18 studs and flange nuts) for Demon or Holley applications.

B5510 Dual carb scoop kit:

BODIES

UNITED PACIFIC COUPE BODY
1932 FORD COMPLETE 5-WINDOW BODY SHELL
Eighty years of rust and neglect has been tough on the original 5-window coupes. Starting your project with a new steel body from United Pacific Industries is the best way to make your dream hot rod a reality. We've created precision tooling that accurately produces every panel exactly as original. Throughout the process of manufacturing the new 1932 5-Window body shell, we had many decisions to make regarding tooling design, modern enhancements, and material specifications. Our philosophy from the beginning was to make it just the way it was! In fact, there are only two options:
1) Original open insert roof, or a steel filled roof.
2) With cowl vent, or without
The new body shell is stock height, and includes the hardwood inner structure, both doors with door latches, and deck lid hinged as a trunk. Firewall and dash sold separately. The body shell is black EDP coated to keep your new steel fresh and un-rusted.

BODY SHELL INCLUDES:
• Black EDP Coated to Keep Your New Steel Fresh and Un-rusted
• Stock Height
• Includes Hardwood Inner Structure
• Includes Both Doors with Door Latches
• Deck Lid Hinged as Trunk
• Firewall and Dash Sold Separately
Full range of body panels, floor panels and all interior structure components available separately. Call Rocket for more information.

1932 FORD PICK UP CAB
Starting your project with a new steel 1932 Ford truck cab body shell from United Pacific Industries is the best way to make your dream truck build a reality. We've created precision tooling that accurately reproduces every panel exactly like the original. Our philosophy from the beginning was to make it just the way it was! The new truck cab body shell is stock height and includes both doors with door latches and the rear cab hardwood inner structure. Firewall and dash sold separately. The body shell is black EDP coated to keep your new steel fresh and un-rusted. These are officially licensed Ford Restoration product, proudly assembled in Long Beach, California by skilled craftsmen.

Description 1932 Steel Ford Pick Up Cab with Cowl Vent
Part No. UPB21000-A

All Steel Model A Roadster Body
The Brookville all steel Model A is the most accurate reproduction body you can buy. As with all Brookville bodies, we use the same gauge steel as the originals and every part of the body is interchangeable with the originals.
• Smooth Cowl Cover • Smooth Flat Floors • 4" Recessed Firewall
• 32 Style Dash Installed
• Steel Front Floor for 4" Recessed Firewall • Smooth Trunk
• Smooth Deck Former • Comes in Hardwood Shipping Crate

Description 1928-29 Stock Roadster Body for Model A Frame
1930-31 Stock Roadster Body for Model A Frame
Part No. BRAF-100A
BRAE-100B

All Steel 1932 3 Window Coupe Body
Using the most sophisticated engineering and digital measuring methods we have been able to create a truly accurate yet more precise reproduction of this classic body. Our three window features the same gauge metals, the stamping details, internal bracing and wood components found in the originals. Our car does benefit from modern welding and finishing techniques and from our exclusive one piece whole body side stamping but every panel from this new body is still interchangeable with the factory originals.
• Smooth Cowl Top
• Smooth Trunk Lid
• Smooth Doors with Stock Hinges
• Smooth Face Dash Installed
• Steel Front Floor
• Flat Hotrod Style Floor in Seat Area
• Stock or Flat Firewall Sold Separately

1932 Running Board Set

Steel with vulcanised rubber with all the detail of the originals.
VIB-16450/1-V

Running Boards (Vulcanized) Fits - 1935-36 Car

These boards are authentic vulcanized rubber-to-steel, as sturdy, tough and beautiful as the originals. They're made of real rubber, not a hard vinyl or plastic composite, and have sharp, crisp detail. You'll find no rough, irregular edges or excess material. Now you can finish your car with boards that have the exact same look, feel and strength as Henry's originals.
Sold as pairs
BD48-16450-BD

1935-36 Smooth Steel Running Boards

Sleek, all steel boards that are ready for prep and paint. Leave un-covered for today's "smooth" street rod look. Sold by the pair.
OVERSIZE - Extra Shipping will Apply.
BD48-16450/1-BR

1949-54 CHEVY PASSENGER CAR SKIRT MOUNTING CLIPS

• Identical design as the original mounting clips.
• Fender skirt mounting clips.
• Set of 4.
UPC1063-1

Running Board Covers Fits - 1937-39 Standard Car

We were the first to develop and design a catch lip front edge. Each style moulded with the finest rubber. Excellent fit. Pair.
BD78-16450/1

1939 Deluxe-1940 Cars Running Board Set

Steel with vulcanised rubber with all the detail of the originals.

Hood Prop Kit

This hood drop kit eliminates resting your hood on the cowl and also is a kit to prevent from cracking expensive paint. All mounting hardware included.

- UPA6223 1928-Up Black
- UPA6248 1928-Up Stainless Steel

Adjustable-Level Self-Locking Hood and Trunk Prop

Constructed of high quality billet aluminium and stainless steel. When the hood or trunk is raised, the Hood and Trunk Prop will automatically lock itself into position. This eliminates the need for two hands when opening your hood or trunk. A quick release allows the hood to be opened to its max for easy engine access. We offer two versions of the Hood and Trunk Prop, three and six level. This will allow the hood or trunk to be set at various levels without any unsightly objects holding it up. Each level of the six-level prop increases the opening of the hood or trunk by approximately 6 inches. Each level of the three-level prop increases the opening of the hood or trunk by approximately 12 inches.

1937 Hood Ornament Handle & Base Kit BD78-8218-K

SO-CAL Cowl Spears

SO-CAL Cowl Spears—long or short: Investment cast in stainless steel, these cowl spears add that finishing touch to any vehicle that has a stock centre hood hinge, for example, '32 through '36 Fords. Because the spears are attached with automotive-grade double-sided tape, they can be adapted to many vehicles. They can also be cut to fit across a cowl vent if the short spear is not the desired look.

SO-CAL Bullnose

The SO-CAL Bullnose is investment cast in stainless steel and polished to a high luster. Shaped to fit the Brookville filled '32 grille shell, it can also be easily formed to fit your filled shell, that's very important because not all filled shells are the same profile. Remember, die cast bullnoses cannot be formed to fit your shell.
NOTE: Emblem not included with this bullnose.
S0001-60200 So-Cal Bullnose

SO-CAL Bullnose Emblem

Available to fit the bullnose are two different styles of emblem: the regular Ford script emblem, available in red, blue or black and a solid silver SO-CAL emblem. The SO-CAL emblem is available in black on silver only.

VIB-8212 Ford Script Blue

Windshield Regulator

Windshield Regulator; fits - 1935-36 Closed Car, Wagon & Pickup

BD48-701325

1932-1933 Car Window Regulator

Brand new window regulator for 1932-1933 passenger cars. This will not fit 1932-34 pickup trucks, and will not fit 1932 2 door sedan rear windows. If this is being installed in an original 1932 car, the regulator needs to be spaced out at the screw holes in between the regulator and the inside door panel because an original 1932 window regulator has a spacer built into the regulator and these new regulators are the 1933 style and mount flush with the door panel.

Passenger-Side **V118-702701**
Drivers-Side **V118-702700**

Window Regulator 1928-31

The best model A window regulator on the market today! Functions like the original did, no more skips and jumps! 3 hole mounting style used in Coupes, Tudors and Pickups. Painted black finish.

Door Check Bumpers; Fits - 1932-48 Rubber stops for your metal check arm. Pair. **BDB-46582**

DAKOTA DIGITAL SINGLE ROTOR LATCH

Description Part No. Single Rotor Trunk Latch and Pin, Left pull. **DAKBCL-1L**

MANUAL SAFETY LOCK PINS

They're constructed from aircraft quality aluminium and have stainless steel lock pins and mounting hardware for optimum performance and reliability. Slim 1" thick x 2" tall x 3-1/2" long. Built-in micro switches allow you to use a warning light (LED included). May be installed in doors or kick panel area. Great for suicide doors. **WSWCA-MSP**

POWER DOOR LOCKS

They're constructed from aircraft quality aluminium and have stainless steel lock pins and mounting hardware for optimum performance and reliability. Slim 1-3/8" thick x 2" tall x 8" long. Built-in micro switches allows you to use a warning light (LED included). May be installed in doors or kick panel area. Great for suicide doors or if you have installed bear claw latches which cannot be locked otherwise. **WSWCA-PDL**

DOOR/TRUNK ACTUATOR

The PDR-1 Door/Trunk Actuators offer up to 10 lbs of pushing or pulling force. The PDR-1 allows for a full 1" of travel and can be used for Door Latches, Trunk/Tonneau Latches, Power Door Locks and many other functions. Dimensions: 6" x 2-1/4" x 1-1/8" thick. **DAKPDR-1**

DOOR/TRUNK SOLENOID

The PDR-2 are some of the most powerful solenoids available, rated at 35 pounds of pulling force. At 3/4" of travel these brutes can open almost any door/trunk latches around. The PDR-2 come with relay and universal mounting hardware. Dimensions: 4-1/2" x 2" diameter. **DAKPDR-2**

EXTERIOR DOOR HANDLES

1937 Trunk Handle

Precision die-cast and chrome-plated with threaded shaft and 2 keys. **BD78-702352**

PEDALS & THROTTLE ASSEMBLIES

Forward Swing Dual Master Cylinder Brake Pedal

This swinging mount pedal assembly mounts two single outlet brake master cylinders in a forward position outside the firewall. It features a lightweight aluminum frame, with a high strength reinforced I-Beam style forged 7:1 ratio pedal arm. The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. The balance bar incorporates a positive detent stop every full turn to maintain adjustment position and driver awareness. A pin and clevis pushrod attachment system provides highest possible degree of misalignment angle for bind free operation through the entire range of travel. The balance bar can be locked in place with the included jam nut, or used with an optional remote cable for quick on-track adjustments. This pedal accepts any Wilwood vertical mount flange single outlet master cylinders that are ordered separately by style and bore size.

Forward Swing Dual Master Cylinder Brake Pedal 7:1 WB340-13832

Floor Mount Clutch / Brake Pedal

This floor mount pedal assembly mounts a single brake or clutch master cylinder in a forward position outside the firewall. It features a lightweight aluminium frame, with a high strength reinforced I-Beam style forged 6:1 ratio pedal arm. The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. This pedal accepts any Wilwood vertical mount flange single or tandem outlet master cylinder. Horizontal mount flange master cylinders require an adapter kit. Master cylinders are ordered separately by style and bore size.

Floor Mount Single Master Cylinder Clutch / Brake Pedal 6:1 WB340-13833

Master Cylinders Not Included

BRAKE / CLUTCH AND THROTTLE PEDAL BOX

Wilwood's new floor mount pedal assembly has a brake / clutch / throttle triple pedal design. There are three individual fabricated steel pedals with non-slip pedal pads to control brake, clutch and throttle. Pedal assembly part number WB340-12410 is for rear engine cars and does not include a throttle bell crank and linkage & WB340-12411 is for front engine cars and includes a throttle bell crank and linkage assembly. This unit features an aluminum frame with strong lightweight fabricated steel pedal arms. The frame and the pedal arms have a black e-coat finish for protection and an attractive appearance. Also included with the pedal assembly are mounting studs, clevises, and balance bar assembly that is designed to provide smooth and accurate settings of the brake pedal bias. The balance bar can be set and locked down with the jam nut, or attached to a remote cable for quick on-track adjustments. The pedal assembly provides a 5.25 to 1 nominal ratio.

Description	Part No.
Pedal Box Assembly without Throttle Bell Crank	WB340-12410
Pedal Box Assembly with Throttle Bell Crank	WB340-12411

THROTTLE LINKAGE KIT

The throttle bell crank assembly is part of pedal kit 340-12411 that is best suited for front engine vehicle applications. This kit can be used to convert a 340-12410 rear engine vehicle pedal kit for front engine use. WB340-12412

FLOOR MOUNT BRAKE PEDAL

This floor mount pedal assembly mounts two single outlet brake master cylinders in a forward position outside the firewall. It features a lightweight aluminum frame, with a high strength reinforced I-Beam style forged 6:1 ratio pedal arm.

The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. The balance bar incorporates a positive detent stop every full turn to maintain adjustment position and driver awareness.

A pin and clevis pushrod attachment system provides highest possible degree of misalignment angle for bind free operation through the entire range of travel. The balance bar can be locked in place with the included jam nut, or used with an optional remote cable for quick on-track adjustments. This pedal accepts any Wilwood vertical mount flange single outlet master cylinders.

Floor Mount Brake Pedal 6.0:1
For Dual Master Cylinders **WB340-13831**

SWING MOUNT CLUTCH / BRAKE PEDAL

This swinging mount pedal assembly mounts a single brake or clutch master cylinder in a forward position outside the firewall. It features a lightweight aluminum frame, with a high strength reinforced I-Beam style forged 7:1 ratio pedal arm. The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. This pedal accepts any Wilwood vertical mount flange single or tandem outlet master cylinder.

Swing Mount Clutch / Brake Pedal 7.0:1
for Single Master Cylinders **WB340-13834**

REVERSE SWING MOUNT BRAKE AND CLUTCH PEDAL

This swinging mount pedal assembly mounts two single outlet brake master cylinders in a reverse position inside the firewall. It features a lightweight aluminum frame, with a high strength reinforced I-Beam style forged 6.25:1 ratio pedal arm. The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. The balance bar incorporates a positive detent stop every full turn to maintain adjustment position and driver awareness. A pin and clevis pushrod attachment system provides highest possible degree of misalignment angle for bind free operation through the entire range of travel. The balance bar can be locked in place with the included jam nut, or used with an optional remote cable for quick on-track adjustments. This pedal accepts any Wilwood vertical mount flange single outlet master cylinders.

Reverse Swing Mount Pedals

This swinging mount pedal assembly mounts a single brake or clutch master cylinder in a reverse position inside the firewall. It features a lightweight aluminum frame, with a high strength reinforced I-Beam style forged 6:1 ratio pedal arm. The non-skid waffled pedal pad can be laterally adjusted for driver preference or clearance as necessary. This pedal accepts any Wilwood vertical mount flange single or tandem outlet master cylinder. Horizontal mount flange master cylinders require an adapter kit. Master cylinders are ordered separately by style and bore size.

Reverse Swing Mount Pedal
Single Master Cylinder 6:1 **WB340-13574**

Forward Swing Mount Brake & Clutch Pedal

With Balance Bar

This swinging mount pedal assembly combines the brake and clutch pedals in one unit with the master cylinders in a forward position outside the firewall. It features a lightweight aluminum frame, with high strength reinforced I-Beam style forged 6.25:1 ratio pedal arms. The non-skid waffled pedal pads can be laterally adjusted for driver preference or clearance as necessary. The balance bar incorporates a positive detent stop every full turn to maintain adjustment position and driver awareness.

A pin and clevis pushrod attachment system provides highest possible degree of misalignment angle for bind free operation through the entire range of travel. The balance bar can be locked in place with the included jam nut, or used with an optional remote cable for quick on-track adjustments. This pedal accepts any Wilwood vertical mount flange single outlet master cylinders that are ordered separately by style and bore size.

Forward swing assembly with balance bar 6.25:1
WB340-11295

Reverse Swing Mount Brake & Clutch Pedal WITH BALANCE BAR

Wilwood's new Adjustable Reverse Mount Pedal assembly combines the brake and clutch pedals together in one unit and positions the master cylinders inside the firewall, away from engine heat. It features all aluminium frame and forged aluminium pedal arms with ladder style construction. Pedal pads are of special adjustable design that allows fine-tuning of the pedal location and clearance.

Also included with the assembly: mounting studs, hardware, new clevis and pivot pin balance bar assembly to provide smooth and accurate settings of the brake pedal bias. The balance bar can be set and locked down with the jam nut, or attached to a remote cable for quick on-track adjustments. With a 6.25 to 1 pedal ratio on both clutch and brake pedals. Triple Brake & Clutch
W/Balance Bar 6.25:1 **WB340-11299**

SWING MOUNT TANDEM BRAKE AND CLUTCH PEDAL

WILWOOD'S NEW SWING MOUNT TANDEM BRAKE AND CLUTCH ASSEMBLY SIMPLIFIES INSTALLING A TANDEM OUTLET, SINGLE PUSHROD BRAKE MASTER CYLINDER IN CONJUNCTION WITH A HYDRAULIC CLUTCH MASTER CYLINDER IN A FORWARD POSITION OUTSIDE THE FIREWALL.

It features a lightweight aluminium frame, with high strength reinforced I-Beam style forged pedal arms in either 6.25:1 or 7.00:1 ratios. The non-skid waffled pedal pads can be laterally adjusted for driver preference or clearance as necessary. Will fit most tandem cylinders available with 3.25 horizontal bolt spacing. Pedal base has additional mount points for vertical mount 2.50" spacing tandem master cylinders using 5/16-18 studs (not supplied with pedal assembly). Clutch master cylinder mount is also a 2.50" vertical mount and will use most popular single outlet cylinders.

Pedal Assembly, Forward Mount, 6.25:1, Tandem **WB340-14360**
Pedal Assembly, Forward Mount, 7:1, Tandem **WB340-14361**

Single Pedal Brake Setup RPU/PEDAL

Under Dash Pedal Assemblies

Universal reverse mount 90 degree under dash brake pedal system to suit GM 7" dual diaphragm, Gemini and Datsun booster and master cylinder setups.

- Clean Floor area.
- No Exhaust worries
- Out of sight
- Comes in Dual Pedal Set Up or Single Pedal Setup.

SB3109-10PB

XL Series Billet Aluminium Throttle Assemblies

XL Series ball-milled aluminium gas pedal is designed just like our standard billet throttle assemblies, but it is EXTRA LARGE for those seeking more comfort and safety. Gas pedal pad is spring-loaded like OEM design. Removable lower arm is splined for versatility in mounting to the right or left of the mounting bracket. Lokar's exclusive upper arm is a one-piece design. Shaft and arm are one piece, requiring no pins. Matching XL Series brake pad is designed with a 1/2 x 20 thread and includes a 1/2 x 20 stud in kit. Can be mounted centred or off centre.

Eliminator Floor Mount Gas Pedals

Lokar's Eliminator Floor Mount Gas Pedal is designed with the Signature Lokar Quality you have come to expect. Pedal eliminates routing cables through firewall and comes equipped with an aluminium splined adjustable shaft and stainless steel "under-the-floor" cable mounting bracket. Mounts in multiple positions for floor and toe board angles. Designed with built-in pedal travel stops. Available in ball-milled billet aluminium pad or with rubber inserts. Requires 36" U-Cut-to-Fit Lokar Throttle Cable for most applications. Order 48" cable for LS1 Ramjet and Vortec applications.

- LK-XBAG-6153 Lakester Steel Automatic Brake - Black
- LK-BAG-6156 Lakester Steel Automatic Brake - Raw

Competitor Series Throttle Assemblies

Lokar's Competitor Series Throttle Assemblies are designed with a unique internal spanner nut ensuring perfect pedal tension. This pedal is in a class of its own; by adding this built in tensioning feature, we have eliminated the possibility of excess 'slop' in the throttle pedal. Another milestone of the Competitor Series Throttle Pedal is its incredibly sturdy mounting base. The design of this pedal has enabled us to provide over an inch and a quarter wide mounting base yet maintain a narrow and sleek appearance. If that weren't enough, the mounting base is available in either a centreed or an offset version which will raise or lower the centre of the throttle assembly an entire inch. This feature is incredibly accommodating when installing the pedal in a vehicle which already has the throttle cable installed. In our everlasting quest for perfection, we have also built the Competitor Series Throttle Assemblies with our exclusive large diameter 3/4" x 48 tooth fine-spline steel insert to provide the ultimate in strength and durability. This also allows for infinitely adjustable arms which can also be swapped for right and left adjustment of the throttle pad. All of these features coupled with a spring-loaded throttle pad, Delrin bushings, and superior design have made the Competitor Series Throttle Pedal the finest and most versatile throttle pedal available.

- Dimensions:
Oval: 1-3/4" x 3-3/4"
Rectangular: 1-1/2" x 4"

55/56/57 Brake & Clutch Pads Standard

Brake and Clutch Pads are designed to match the Throttle Pedal assemblies. With Lokar's exclusive mounting design, no drilling is needed to mount pads, which allows easy installation

Power Brake Pads

Outside measurement of 5 x 2 3/4 fits 4 3/4 x 2 3/8 original steel brake pedal

- LK-BAG-6077 Power Brake Pad - Brushed

Brake and Clutch Pads

(Outside measurement of 3 7/8 x 2 5/8 fits 4 3/4 x 2 3/8 original steel brake pedal

- LK-BAG-6078 Brake/Clutch Pad w/rubber - Brushed

55/56/57 Brake & Clutch Pads Curved

For a compact and clean look, Lokar has put a modern bend on classic brake pedal pads. Our Curved Brake/Clutch Pedal Pads add style and function to your classic car. Designed with hidden screws, these pads are curved and pocketed to match and bolt directly to the factory steel brake pedal. Each brake pedal pad has been fashioned after its corresponding factory rubber pad and is available in brushed or black finish

- LK-BAG-6137 1955-1957 Chevy Billet Aluminium Curved Power Brake Pad w/Rubber - Brushed

- LK-BAG-6138 1955-1957 Chevy Billet Aluminium Curved XL Non-Power Brake Pad w/Rubber - Brushed

Power Brake Pads

Brake Pads, Clutch Pads & Power Brake Pads Lokar '55, '56, & '57 Brake Pads and Clutch Pads are designed to match the Lokar Throttle Pedals in both ball-milled billet aluminium and with rubber inserts. With Lokar's exclusive mounting design, no drilling is needed to mount pads, which allows easy installation. They are offered in three applications.

55/56/57 Brake & Clutch Pads

Ball-milled billet aluminium Brake Pad and Clutch Pad have an outside measurement of 3 7/8" x 2 5/8" and fit the 3 1/4" x 1 5/8" original steel brake or clutch pedal.

- LK-BAG-6075 Ball milled Billet w/Rubber
- LK-BAG-6076 w/Rubber

55/56/57 Power Brake Pads

Ball-milled billet aluminium POWER brake pad has an outside measurement of 5" x 2 3/4" and fits the 4 3/4" x 2 3/8" original steel brake pedal.

- BAG-6077 Ball milled Billet w/Rubber
- BAG-6078 w/Rubber

55/56/57 XL Non-Power Brake Pads

Ball-milled billet aluminium XL size NON-POWER brake pad has an outside measurement of 6" x 2 3/4" and fits 3 1/4" x 1 5/8" original steel brake pedal.

- BAG-6079 Ball milled Billet w/Rubber
- BAG-6080 w/Rubber

1967-1969 Camaro/Firebird

Throttle Pedal Assemblies & Brake Pads

1967-1969 Camaro Billet Aluminium Throttle Pedal Assembly is designed to bolt into the stock location on the firewall, allowing you to change from rod linkage to throttle cable linkage. Throttle Pad is spring-loaded like OEM design and splined for right or left adjustment of foot pad. 1967-1969 Billet Aluminium Brake Pad Cover is machined to fit over the stock Camaro steel pad. Design is a direct fit.

Billet Aluminium Throttle Pedal Spacers

Is your throttle pedal buried in your carpet? Lokar has designed a spacer just to eliminate that dilemma. We offer a billet aluminium spacer in three styles: One for the standard billet aluminium assemblies, one for the chromed-steel assemblies, and one for our Eliminator Floor Mount Pedal. Spacer mounts directly to the centre of the pedal mounting bracket.

LK-GPS-6015 1/2" (For Chrome Pedals)

LK-GPS-6014 3/4" (For Billet Pedals)

LK-GPS-6016 1/2" (For Eliminator Floor Pedal)

Drive-By-Wire Electronic Throttle Control Pedal Assembly

Lokar has partnered with Williams Controls, the world leader in heavy duty electronic throttle pedals.

Features

- The first programmable electronic throttle pedal (Drive-By-Wire) for the automotive aftermarket
- Programmable Non-Contact (Solid State) hall effect sensor for most GM, Ford & Mopar applications
- Splined pedal arm for versatile mounting
- All metal construction; Aluminium and Stainless Steel
- 3 times better performance over standard OEM pedals
- Over 90 years of combined throttle pedal experience
- Sensor programmed on pedal to optimize electrical output for quick throttle response (No pedal lag)

DRIVE BY WIRE ACCELERATOR PEDAL

The Bosch accelerator pedal and built in module is a great solution to match the Bosch DBW electronic throttle body. When converting from the mechanical cable to a drive by wire system, a electric pedal sensor is required to relay accelerator position back to the ECU to accurately control the electronic throttle body. These are universal fitment and will require fabrication to fit into the foot well or pedal box.

- 16degree (~70mm) travel
- Firewall mounted hanging design
- Redundant dual output potentiometers suitable for use with Electronic throttle bodies
- Operating Voltage is 5 ±0.3volts
- Operating Temperature is -40 to 80 degrees C (-40°F to 176°F)

Part No	BOSCH Part No	Description

AF49-2137		Accelerator Pedal plug & pins

1955, 1956, and 1957 Throttle Pedal Assemblies

The Lokar '55, '56, & '57 Chevy ball-milled aluminium gas pedal is designed to convert original rod linkage to modern throttle cable system. It is designed to mount in original firewall location with offset bezel washers to align throttle cable through firewall. The gas pad is spring-loaded like OEM design and removable lower arm is splined for versatility in mounting to the right or left of the mounting bracket. Lokar's exclusive upper arm is a one-piece design. Shaft and arm are one piece, requiring no pins.

- Outside dimension of the gas pedal measures 2" x 5".
- LK-BAG-6074** '55/'56/'57 Chevy Billet Aluminium Gas Pedal Assembly w/Rubber
- LK-BAG-6076** '55/'56/'57 Billet Brake/Clutch Pad w/Rubber Designed to match gas pedal

Intermediate 10° to 20° Layback Seats

Our Standard Layback seat is uniquely designed to be mounted in multiple layback angles. Designed for street stocks, IMCA Modifieds, limited late models, mini Modifieds, dwarf cars, legends or any entry level division. The Standard seat is a great value for the amateur racer who demands the best in safety and comfort at this level.

- TIG welded .125" thick 5052 grade aluminium. • MIG welded inside for added strength.
- Offset aluminium extrusion around perimeter of seat adds extra strength and safety.
- Progressive rib bead adds extra strength.
- Multi-position, lap belt openings for easy mounting.
- Submarine belt opening is standard. Machined edges eliminate rubber moulding. • Upholstery is double stitched around belt openings and all stress point areas.
- Contoured high density foam bottom provides complete leg and inner thigh support. • Extra thick, high density foam on rib supports for comfort and safety.

Pro-Street Drag Seat

A professional racing seat is just as important in a drag car as it is in an oval track car or road racer. The increased feel for the car through the seat will help you with chassis set-up and give you more consistent times. You will be able to concentrate on the lights better if you are comfortable and relaxed.

- Constructed from MIG welded .100" thick 5052 grade aluminium.
- MIG welded on the inside for added strength.
- Offset aluminium extrusion around perimeter of seat for added strength and safety.
- Contoured high density foam bottom provides complete leg and inner thigh support.
- Upholstery is double stitched around belt openings and all stress points.
- Extra thick, high density foam on rib support for added comfort and safety.

65 SERIES

Road Race Containment Seat

Our new Intermediate Road Race Layback seat is designed especially for entry level road course cars. This seat is very comfortable making it ideal for endurance events.

- A true road race design with built in shoulder support.
- Machined aluminium panels for maximum durability, strength and weight reduction.
- Aluminium extrusion around perimeter for strength and safety.
- Extended front and bottom for additional comfort and support.
- Contoured high density foam bottom for maximum leg and thigh support.
- Contoured head rest is designed to cup helmet.
- The entire seat cover is fully padded for extra comfort and safety.

1935-36 Ford 3W Coupe Door Window Channel Kit

Kits that contain "cat whiskers" that go all the way around the garnish and window opening on the door
 One window channel kit services both sides of the car
V148-45983-3WB

1935-36 5 Window Coupe & Fordor Front Door Window Channel

All 1935-36 window channel kits include pre-bent "cat whiskers" with stainless steel edge bead, lower u-shaped channels, side straps division bar inner felt channel, upper felt seal and installation clips.
V148-45983-5W/4D

Window Channel Stick Stainless

Cat whisker 96" long flexible pile lining stainless bead, one sided strip generally used on interior garnish moldings or in the window channel to alleviate window glass rattles.
V1U-45983-2

Window Channel Stick black

Cat whisker 96" long flexible pile lining black bead, one sided strip generally used on interior garnish moldings or in the window channel to alleviate window glass rattles.
V1U-45983-3

Ultra-Lip Window Seal; Fits - 1928-40 Qtr, 28-36 Rear Window

The Drake Team redesigned our original style B-704220 seal for ultimate protection against body rot caused by moisture seeping under the outer seal edge. Ford's original design was adequate, but it didn't keep moisture from collecting between the rubber and body surface. That's why many early Fords now have rust holes around the quarter windows which are usually invisible but cause interior water leaks. The new seal-lip not only keeps moisture out, but also gives a very nice visual accent to the window border.
BDB-704220-B

1937-40 Ford Sedan Closed Car Windshield Seal.

latest technology combined with the highest-grade rubber, correctly molded and contoured to produce ultimate sealing qualities without rubber distortion. This means years of worry-free, wet weather driving with no water leaks. (1937-39 Closed Car & Pickup - Molded to Shape. Like the original, seal surrounds the entire windshield frame
V178-701290

Windshield Seam Clips; Fits - 1935-36

Windshield Frame Seam Clips - Stainless Steel - Ford Cabriolet, Ford Station Wagon & Ford Convertible Sedan closed car & pickup

BRAKE BIAS KITS & PROPORTIONING VALVES

Brake Proportioning Valve

Delivers precise pressure metering and strength from a compact Billet design. Presssure adjustments range from 100-1000 PSI. This adjustment allows you to fine tune the front to rear braking balance.

Part No **Colour** **Description**
AF64-3042 Polished 1/8" NPT Ports
AF64-3042BLK Black 1/8" NPT Ports

BRAKE ADJUSTABLE PROPORTIONING VALVE AND DISTRIBUTION BLOCK

This adjustable proportioning valve and distribution block from Aeroflow Performance allows you to run lines from the brake master cylinder to the block and then to the appropriate wheels. What is neat about it is that it also contains the proportioning valve and brake light switch. This dramatically reduces the number of fittings needed and potential leaks. It can be mounted vertically or horizontally directly underneath the master cylinder or as a standalone unit elsewhere on the car.

The adjustable proportioning valve regulates rear brake pressure, with an easy to turn rotary handle with directional arrows makes it simple to either increase or decrease rear brake pressure. This valve helps to regulate rear brake pressure and help maintain correct brake bias between front and rear.
 The distribution block connects to the master cylinder and distributes brake fluid to all four wheels. This block accepts 3/16" brake lines and the inlets and outlets on this unit are 3/8"-24 in-verted flare females. It has two inlets from the master cylinder, two outlets to the front brakes and one outlet to the rear brakes. A cool feature of this distribution block is the built-in brake light switch. This brake light switch allows you to activate your tail lights with hydraulic pressure from your brake system. It includes five stainless steel 3/16" fittings and wiring pigtail for rear brake light switch.
 NOTE: This is not a direct factory replacement for original blocks. Some line modifications may be necessary.
AF300-146BLK

COMBINATION BRAKE ADJUSTABLE PROPORTIONING VALVE

The Aeroflow brake combination proportioning valve simplifies the brake proportioning adjust-ments on vehicles with custom brake systems. It allows an easier mounting position right next to the brake master cylinder with the use of the bracket (AF300-149 Sold Separately) as well as less hardline plumbing. This combination block maintains full isolation between front and rear fluid cir-cuits in the tandem master cylinders. The rear circuit has a single inlet and single outlet with the adjustable proportioning valve. The front circuit has a single inlet with two outlets. It can be run as a single outlet with one outlet plugged, or used to split the plumbing on its way to the front brake calipers. Each inlet and outlet port accepts 3/16" brake lines with 3/8"-24 inverted flare females. A cool feature of this unit is the built-in brake light switch. This brake light switch allows you to acti-vate your tail lights with hydraulic pressure from your brake system.
AF300-148

COMBINATION BRAKE PROPORTIONING VALVE BRACKET

The Aeroflow combination brake proportioning valve mounting bracket are specifically designed to work with our tandem master cylinders. They will allow the proportioning valve to bolt to the right-hand side of the master cylinder. This will create a compact all in one unit. These bolt-on steel brackets are E-coated for protection.
AF300-149

Adjustable Proportioning Valve

The new generation of adjustable proportioning valves combines the latest refinements to deliver precise pressure metering and strength from a compact forged billet design. Pressure adjustments range from 100-1000 PSI and provide for a maximum decrease of 57% in line pressure, the most of any available valve. Adjuster knob with fine thread tuning provides precise pressure adjustment. This adjustment lets you fine tune the front to rear braking balance by proportionally decreasing the rear brake line pressure. Valves weigh only 5.2 ounces and have two .25" side mounting holes spaced 1.00" apart. WB260-8419 & WB260-8420 are supplied with 1/8" NPT to 3/8" IF adapter Knob Style Valve, 1/8" NPT Lever Style Valve, 1/8" NPT Knob Style Valve, 3/8" IF

WB260-8419
WB260-8420
WB260-10922

Proportioning Valves

The new generation of adjustable proportioning valves combines the latest refinements in manufacturing processes and materials to deliver precise pressure metering and unyielding strength from a compact and lightweight forged billet design. Pressure adjustments range from 100-1000 PSI and provide for a maximum decrease of 57% in line pressure, the most of any available valve. This adjustment lets you fine tune the front to rear braking balance by proportionally decreasing the rear (or in some cases the front) brake line pressure. Can also be used to adjust individual front wheel braking in dirt track applications. Valves weigh only 5.2 ounces (knob), 6.1 ounces (lever), and have two .25" side mounting holes spaced 1.00" apart. Standard in and out ports are 1/8"-27 NPT. Knob Style Proportioning Valve Lever Style Proportioning Valve

WB260-8419
WB260-8420

Combination Proportioning Valve

Mounting Bracket Kit

Wilwood finally has an elegant answer to the question, "Where do I mount my Combination Proportioning Valve?" with their new Mounting Bracket Kit.

- Specifically designed to work in conjunction with Wilwood Aluminum Tandem Master Cylinders (P/N's 260-8555, 260-8556, 260-9439, 260-12900 or 260-13375), in manual or boosted system applications. Kit includes:
- Stainless steel fluid tubes are precision bent with preinstalled stainless tube nuts for a simple bolt-on installation between the Combination Proportioning Valve and the Wilwood Tandem Master Cylinder.
- Stainless steel button head fasteners thread into the black e-coated L/H bracket for a simple installation and years of durable, rust-free performance. This complete Mounting Bracket Kit includes all the mounting hardware, plus a Combination Proportioning Valve, 260-11179.

Mounting Bracket Kit with Combination Proportioning Valve.

- L/H combination prop valve bracket kit installation for remote tandem master cylinders WB220-14247
- R/H combination prop valve bracket kit installation for diecast master cylinders WB220-15047
- R/H combination prop valve bracket kit installation for Compact tandem master cylinders WB220-15679

PROPORTIONING VALVE FOR REMOTE TANDEM MASTER CYLINDERS

Wilwood finally has an elegant answer to the question, "Where do I mount my Combination Proportioning Valve?" with their new Mounting Bracket Kit. Specifically designed to work in conjunction with Wilwood Remote Tandem Master Cylinders in manual or boosted system applications. Kit includes: Stainless steel fluid tubes are precision bent with preinstalled stainless tube nuts for a simple bolt-on installation between the Combination Proportioning Valve and the Wilwood Tandem Master Cylinder. Stainless steel button head fasteners thread into the black e-coated L/H bracket for a simple installation and years of durable, rust-free performance. This complete Mounting Bracket Kit includes all the mounting hardware, plus a Combination Proportioning Valve, 260-11179. With L/H Bracket WB260-14248

Proportioning Valve

Wilwood's new Combination Proportioning Valve substantially simplifies mounting, plumbing, wiring and brake proportioning adjustments on vehicles with custom brake systems. The combination block maintains full isolation between front and rear fluid circuits and can be used in conjunction with any tandem outlet or dual mount master cylinder assemblies. The rear circuit has a single inlet and single outlet with the adjustable proportioning valve. The front circuit has a single inlet with two outlets. It can be run as a single outlet with one outlet plugged, or used to split the plumbing on its way to the front callipers.

4 Way Proportioning Valve

WB260-11179

NON-ADJUSTABLE COMBINATION PROPORTIONING VALVE

- 63% pressure reduction (rear) after 350 PSI knee point.
- 30 PSI delay rear-to-front circuit.
- Circuit failure sender activation at 50 ± 10 PSI.
- Recommended maximum operating pressure: 2000 PSI.
- Auto-fill pressure requirement: 120 PSI max.
- -50°F to 160°F operating temperature range.

WB260-11322

Shut Off Valve

This valve can be used as a brake shut-off. When energized, the valve will block pressure from reaching downstream. The valve does not prevent fluid from returning to the master cylinder. This eliminates the possibility of trapping pressure when activating the valve. Requires a 12 Volt, 5 amp (recommended) fused power source through a toggle switch. Warning: Not a line lock assembly. Not for street use. Please read instruction sheet available at www.wilwood.com

Shut Off Valve

WB260-9921

COMBINATION PROPORTIONING VALVE BRACKET KIT

L/H combination prop valve bracket kit installation for remote tandem master cylinders

WB220-14247

Remote Brake Bias Adjuster

Wilwood's Remote Balance Bar Cable Adjuster is used with balance bars to adjust front-to-rear brake bias during changing race conditions. The highly visible bright blue knob features a special bi-directional detent control providing the driver with positive adjustment feedback. The assembly comes with two label faces for either front-to-rear or rear-to front adjustment. Standard 3/8"-24 thread fits Wilwood and most commonly used balance bars.

Remote Brake Bias Adjuster

WB340-4990

Proportioning Valve Kits

- Chrome plated proportioning valves including bracket and fittings.
- Proportioning Valve for 2020 - Disc/Drum TUF2301NA
- Proportioning Valve for 2018, 2071 - Disc/Drum TUF2302NA
- Proportioning Valve for 2018, 2071 - Disc/Disc TUF2303NA

RESIDUAL VALVES

Brake Residual Pressure Valve

Perfect for retaining line pressure in brake lines. Available in 2psi or 10psi and can be installed inline. 1/8" NPT threads.

Part No	Colour	Description
AF387-02	Blue	2 PSI Residual Valve
AF387-10	Red	10 PSI Residual Valve

Residual Pressure Valves

These in-line pressure valves retain a minimum brake line pressure to help eliminate excessive pedal travel in both disc and drum brake systems. The two pound valve is used in disc brake applications where the master cylinder is mounted below the horizontal plane of the calipers and fluid drain back occurs from gravity and vibration. With drum brakes, a ten pound valve is used to compensate for return spring tension in the drums.

2 lb Residual Valve, Blue	WB260-13706
2 lb Residual Valve w/fittings, Blue	WB260-13783
4 lb Residual Valve, Gold	WB260-15365
4 lb Residual Valve w/fittings, Gold	WB260-15366
10 lb Residual Valve, Red	WB260-13707
10 lb Residual Valve w/fittings, Red	WB260-13784

External Residual Valves

External residual valves are installed as close as possible to the master cylinder when the master cylinder is below the calipers or when drum brakes are used. The external residual valve traps fluid from the valve to the brake caliper allowing for a quicker pedal. Drum brakes must have a 10lbs. residual valve to operate properly. Some disc brake applications require a 2lb. residual valve. Each external residual valve is manufactured from billet aluminium and is tapped 1/8"-NPT into both ends.

External Pressure Valve, Male/Female 2lbs	STB3366
External Pressure Valve, Male/Female 10lbs	STB3367

BRAKE FLUID

XR RACING BRAKE FLUID

Wilwood's new XR Race-Only brake fluid is the same extreme high-temperature fluid use in Formula 1, World Rally Championship, FIA World Endurance, and Moto GP. Laboratory testing indicates XR Race-Only fluid has a dry boiling point of 645° F thanks to a proprietary blend of high-performance polymer electrolytes and borate esters. This polyglycol-ether-based brake fluid combines the lowest compressibility, lowest moisture affinity, and highest resistance to aeration of any brake fluid available. XR Race-Only Brake Fluid is formulated to deliver the absolute best, most consistent pedal feel, start to finish, even in the most adverse racing conditions. The premium metal 16.9 ounce can with airtight safety seal ensures fresh, clean fluid upon opening. Note: For track use only.

XR Racing Brake Fluid 16.9oz (473ml)
WB290-16353

WILWOOD Dot Five Brake Fluid

Wilwood FIVE is a highly refined silicone brake fluid, formulated to preserve the looks and reliability on classic vehicles and show cars. Its non-hygroscopic blend blocks moisture absorption to inhibit internal system corrosion. It is paint friendly and will not harm most custom finishes should a spill or leak occur.

WB290-11084 DOT 5 Brake Fluid
WB290-11083 Pack of 24 bottles

WILWOOD Hi-Temp® 570 Racing Brake Fluid

Wilwood's specially formulated Hi-Temp® 570 Racing Brake Fluid has a minimum 570° F dry boiling point to withstand the severe heat requirements of automotive racing. Hi-Temp® 570's low viscosity allows easy bleeding of your brake system, eliminating aeration of the brake fluid caused by foaming due to excessive pumping of the pedal. Hi-Temp® 570 comes in convenient 12 ounce containers hermetically sealed to guarantee against unwanted absorption of moisture which can drastically lower the fluids boiling point (fluid from larger containers tends to become contaminated with moisture, lowering its boiling point and making it unsuitable for racing applications).

WB290-0632 Wilwood Hi-Temp® 570 Single Bottle

EXP 600 Plus Super

High-Temp Racing Brake Fluid

EXP 600 Plus is a highly refined blend developed for extreme performance under the high heat and extreme pressure of professional motorsports. **What's in a number?** EXP 600 Plus has tested to 626 degrees F with a wet boiling point of 417 F. These numbers far exceed any DOT or SAE specifications. **What's the real test?**

It is true that racing fluids need to have high boiling points. It is also true that fluids need to have low moisture affinity to slow the natural absorption rate of water vapor. But the true test of any fluid is how well it resists aeration and compressibility after it has been heated and pressure cycled a few hundred times. The real test is at the track. EXP has proven to maintain firm pedal feel and quick response, long after others have failed.

Note: For optimum performance, EXP 600 Plus should not be diluted with any other brake fluids. Add new fluid to a clean system.

WB290-6209 Wilwood Hi-Temp® 600 Single Bottle

Anti-Roll Line Locker Kit

Brake line locks are used in Drag Racing to lock the front wheels and hold the car in the water box for the burnout, or to prevent creeping in the lights. The Moroso Anti-roll design has better holding power than any other unit currently available and will work in applications with ABS. Kit contains a heavy duty push button switch, switch bracket, coiled wire, rebuildable line-lock valve, fuse holder, and indicator light. **NOTE:** Continuous use of solenoid for more than 30 seconds will damage the coil.

Anti-Roll Line Locker Kit M044050

BRAKE PRESSURE GAUGES

STRANGE Brake Pressure Gauge

The STP2360 verifies pressure and is essential for trouble shooting brake system problems. The Strange pressure gauge makes it easier to determine appropriate changes in pedal ratio or to select the proper master cylinder bore size. Each gauge is shipped with a bleeder adapter for further convenience.

Brake Pressure Gauge STP2360

WILWOOD Brake Pressure Gauge

This easy to read two inch diameter non-hazing face allows for quick brake line pressure checks from 0-1,500 PSI with 20 PSI graduations and accuracy to 1.5%. Permits reliable brake bias setup and brake system troubleshooting. It is durable and corrosion resistant.

Brake Pressure Gauge WB260-0966

BRAKE SWITCHES

ALL STAR LEVER TYPE BRAKE LIGHT SWITCH

Switch is commonly used with under-floor mounted brake pedal assemblies when switch can contact the brake pedal arm. Spring loaded switch is designed to return to the open position and has two #10-32 tapped mounting holes, 5/8" on centers.

Designed for easy two wire connection, one "+" supply and the other to power brake lights or a brake light relay. Switch is rated at 4.5 amps and features two male bullet terminals.

RS-ALL76250

Universal Brake Light Switches

Universal brake light switches, available in 2 or 4 terminal configurations.

Brake Light Switch - 2 Terminal PW80172
Brake Light Switch - 4 Terminal PW80176

Low Pressure Brake Light Switch

Universal low pressure brake light switch. Supplied with plug in pigtail. 1/8" NPT Thread.

Low Pressure Brake Light Switch PW80174

VACUUM SWITCH

AF59-1051 Vacuum switch assembly with tee

BRAKE LIGHT SWITCH

A brake light switch is a switch fitted to your car which closes when pressure is applied to the brake pedal. It illuminates your brake lights to let other drivers know that your car is slowing down. This brake light switch comes in the brake proportioning valve AF300-146 and AF300-148. It features a 1/8" NPT male thread which can be adapted to a variety of applications.

AF300-147

ELECTRIC VACUUM PUMPS

CVR Electric Cast Body Vacuum Pump

VP555 contains same features as VP612. The pump is set to turn on when vacuum drops below 15 in. of vacuum, the pump activates and increases the brake vacuum level to 20 in. of vacuum.

Self contained unit with no need for wiring of relays and switches! Simply connect the positive/negative power and the unit will regulate the vacuum level itself.

• Economical version of VP612 • Unit can be mounted in any position • Unit draws 6 amps • Replacement Vac Switch CVRVS-19

Cast Body Vacuum Pump CVRVP555

12 VOLT ELECTRIC VACUUM PUMP

For vehicles using engine combinations that provide little or no manifold vacuum required for braking. When vacuum drops below 15 in. of vacuum the CVR Electric Vacuum Pump activates and increases the vacuum level to 20 in. of vacuum. Complete self-contained unit. Simply connect the positive/negative power and the unit will regulate the vacuum level itself.

NOTE: Unit can be mounted in any position.

• Patent Pending Design – Superior To Anything On The Market Today

- Precision machined
- Black hard anodized for extended wear and corrosion resistance
- Cast aluminium construction
- 20% less noise and vibration, similar to a performance electric fuel pump
- 50% more vacuum than diaphragm style pump
- Self-contained electronics for ease of installation
- Built-in relay with low amperage lead can be connected straight to key switch
- 12 volt, 6 amp draw
- Weight – 5.5 lbs.

Cast Aluminium CVRVP655
Black Anodized CVRVP665

Twin Piston Vacuum Pump Kit

Engines with modifications such as aggressive cam profiles commonly have little to no vacuum, the AeroFlow Vacuum pump ensures that you always have maximum vacuum available for your brakes so you can always deliver max stopping assistance, bang for buck safety is never over rated. The twin piston design is what sets AeroFlow's vacuum pump apart. It gets to vacuum much faster than single piston vacuum pumps most commonly found in the market. Vacuum pumps are even more critical when running large multi piston calipers. Pump can be mounted on any plane to suit your application.

• 50% more vacuum than a diaphragm style pump.
• 20% less noise and vibration, similar to that of a performance electric fuel pump.

Kit includes vacuum pump with 9.52mm (3/8") fittings, 900mm (2ft 11-3/8") of vacuum hose 9.52mm (3/8") I.D., wiring loom, check valve, clamps, fuse, relay and vacuum pressure sensor. Twin Piston Vacuum Pump Kit AF49-1050

REDLINE DOT 4 Brake Fluid

DOT 4 brake fluid formulated with a precise mixture of Borate Esters and Glycol Ethers, plus moisture and corrosion inhibitors Utilizing quality raw materials yields a superior fluid resistant to absorption and retention of moisture while providing the best protection against extreme temperatures

Blendable with DOT 3, DOT 4 and DOT 5.1 fluids, RL-600 increases ABS cycle times for more responsive and consistent pedal feel

For passenger vehicles, as well as racing car and motorcycles, track day project cars and other motorsport activity

RL-600 REDLINE DOT 4 Brake Fluid

LINE LOCKERS

Roll Control

Used primarily in drag racing to provide positive locking action to the front wheels of race cars, reducing the chance of "Rolling the Lights" and producing more effective "Burn Outs" for heating up the tyres. Rigorous testing has proved a 1/100,000 of a second release time and vibration tests have seen up to 30 G's applied without mechanical failure. Adaptable to most domestic and import hydraulic brake systems.

- Stainless steel valve assembly for ultimate corrosion resistance
- Fully enclosed epoxy molded electrical coil for reliability
- Attractive finned aluminium housing helps dissipate heat
- Wider lightweight base provides better mounting stability
- 150 micron screen filtered ports to prevent contamination
- Field serviceable for cleaning or rebuilding
- Extra threaded port for separate bleeder or pressure gauge
- Kit includes solenoid valve, snap-action switch, indicator light, 4-amp fuse, mounting screws and installation instructions
- 12-volt negative ground systems only.

Launch Control Kit

AeroFlow's Launch Control (also known as: Roll/Stage/Brake Control, Line Lock, Roll Stop and Anti-Roll). AeroFlow's 12 Volt 2-Port Launch Control is designed to be installed into the vehicles existing brake system and can be used on either the front or rear brakes (Not for split or diagonal brakes). They are intended primarily as brake-locking devices for Drag Racing.

Note: intended for short duration use only. **60 seconds MAX**

- AF49-4076** Launch control line lock KIT (Includes Solenoid)
- AF49-4075** Launch control line lock solenoid ONLY
- AF49-4077** Button assembly momentary button style RED button
- AF49-4078** Button assembly on/off style switch GREEN button

Roll Control Installation Kit

The Roll/Control Installation Kit is designed to be used in conjunction with most brake holding devices on vehicles with imperial fittings. This kit contains brake lines and various brass fittings, connectors, adapters, unions and plugs necessary for an easy installation.

Roll Control Installation Kit HU5671510

UP32 VACUUM PUMP

The braking system is one of the most important systems in any vehicle. To ensure that constant brake power is accessible at all times, the use of a vacuum pump is often necessary. Most vehicle brake boosters use a vacuum that is generated by the naturally aspirated engine. The UP32 universal vacuum pump by AeroFlow Performance can be triggered on demand to support the brake booster. Especially when the engine does not supply sufficient vacuum under certain operating conditions, the UP32 supplies the vacuum to ensure brake booster operation. The compact design is a direct bolt on replacement fitment for Holden Commodore VE-VF models but can also be used in any universal application.

Dimensions:

Overall Height - 185mm

Overall Width - 135mm

Overall Depth - 110mm

BRAKE BOOSTER

If you're pushing your brake to the floor while driving, or you've lost that vacuum feeling in the pedal, means you may need to replace your brake booster. AeroFlow Performance brake boosters can assist in upgrading your manual or factory brake system to help you stop your vehicle with minimal pressure to your brakes. These vacuum dual diaphragm units enhance braking ability, while offering much easier pedal operation. These GM specific brake boosters are available in 7" or 8" diameters in either a black or chrome finish.

BRAKE BOOSTER CHECK VALVE

Maintain proper braking with one

of these brake booster check

valves which is often located

on the brake booster assembly.

This is a one-way check valve

that allows the vacuum to build up

in the brake booster and prevent vacuum

from leaving the brake booster assembly.

This gives the brake booster a consistent supply of vacuum

needed to assist the driver when braking. Made from ABS plastic

and supplied with a rubber grommet.

Suits 18.75mm (0.738") hole, Check Valve push in bar is

15.50mm (0.610") and the Barb is 9.52mm (3/8")

BRAKE MASTER CYLINDER

Whether you're building a brake system from scratch, or upgrading from an older outdated worn system. The Aeroflow Performance brand new slimline brake master cylinders install easily, as most mount in the stock location. They feature dual reservoirs and shallow pockets which accommodate front disc/rear drum brakes or 4-wheel disc systems. We offer a variety of designs to provide com-patibility with manual brakes as well as power-assisted applications. Each master cylinder has a GM universal mount spacing (3-3/8") to suit a variety of universal or bolt-on applications. Available in a smooth top in chrome or black finish and in 1" or 1-1/8" bore sizes and constructed from either cast aluminium or cast iron in 1-1/8" Bore.

TANDEM BRAKE MASTER CYLINDER

Whether you're building a brake system from scratch, or upgrading from an older outdated worn system. The Aeroflow Performance brand new Tandem brake master cylinders install easily, as most mount in the stock location. A tandem master cylinder is just like having two master cylinders combined inside a single housing, sharing a common cylinder bore. This allows the cylinder assembly to control two separate hydraulic circuits. This will be able have separate circuits for both front and rear brakes. We offer a variety of designs to provide compatibility with manual brakes as well as power-assisted applications. Each master cylinder has a GM universal mount spacing (3-3/8") to suit a variety of universal or bolt-on applications. Available in a smooth top in chrome or black finish and in 1" or 1-1/8" bore sizes and constructed from cast aluminium.

COMPACT TANDEM M/C KIT WITH BRACKET AND VALVE

Wilwood has packaged the new Compact Tandem Chamber Master Cylinder with the Combination Proportioning Valve, L/H mounting bracket, fluid tubes and mounting hardware in a kit. Tandem Master Cylinder represents the latest in refinements in brake pressure actuation and fluid control in a compact package with only 6.55" from mounting flange to end. The slotted flange mounting makes it a simple bolt on for many OE mounts including the popular Chrysler, Corvette, GM, and Ford Mustang bolt patterns and is compatible with manual or power brake system applications. Master cylinders without pushrods are generally intended for power brake use and available in two bores sizes, 1.00" or 1-1/8", and two finishes, ball burnished or black E-coat. The combination proportioning valve substantially simplifies wiring and brake proportioning adjustments on vehicles with custom brake systems. The combination block maintains full isolation between front and rear fluid circuits and is specifically designed to accompany the Tandem Chamber Master Cylinder. The combo valve and left-hand side bracket are black E-coated for a performance look and long-lasting durability. Stainless steel fluid tubes are precision bent with preinstalled plated steel tube nuts for a simple bolt-on installation between the Combination Proportioning Valve and the Wilwood Tandem Master Cylinder. Stainless steel button head fasteners thread into the bracket for a simple installation and years of durable, rust-free performance. Simply connect the fluid lines, bleed the system, and you're finished

COMPACT TANDEM MASTER CYLINDER W/ PUSHROD

Wilwood's Compact Tandem Master Cylinders w/ Pushrod available 4 bore sizes from 7/8" to 1-1/8th and in 2 finishes; ball burnished and black e-coat. These master cylinders are designed primarily for manual applications and include a pushrod. They're designed for mount flanges from 3.22" to 3.40", common measurements for most domestic cars and trucks from the mid-1960s to present, and offer fluid outlet ports on both sides of the bore. The stroke is set at 1.10" with a volume ratio of 2:1 between the primary and secondary chambers. Machined from high-pressure die castings, each master cylinder weighs only 3lbs, a 75% weight savings over most cast iron OE type master cylinders. We also offer a combination proportioning valve kit, which includes brackets and stainless lines specifically for use with this master cylinder, see retrofit kits PN 260-14248 for L/H outlets, or 260-15667 for R/H outlets.

Aluminium Tandem Chamber Master Cylinder

High-pressure die casting of a premium alloy produces a high-capacity body that is lightweight, looks great, and has the durability for competition. The mounting flange is slotted to accommodate installation on bolt centres between 3.22" and 3.40". That makes it a simple bolt-on to many OE mounts including the popular Chrysler, Corvette, GM, and Ford Mustang master cylinder bolt patterns. The body also features two through-hole mounts on 6.40" centres for side mounting to frame members or other secure elements of the chassis. A total piston stroke of 1.10" is distributed at a 2:1 volume ratio between the primary and secondary chambers.

Tandem Master Cylinder

Made from durable lightweight aluminium with a large capacity plastic reservoir and dual outlet bores, this master cylinder utilizes standard O.E.M. internal components. Standard factory mounting bolt holes can be adapted to racing pedal assemblies with an optional mounting adapter bracket (including push rod and dust boot). This lightweight (2.5 pounds) reliable master cylinder is used for Drag Racing, Late Model Stock Cars, Street Rod and Off Road applications. Available as a master cylinder & reservoir only or it kit form with boot, Pushrod & retainer. Features a 1.35" stroke and 1-1/16" bore.

Replacement plastic Girling Style Master Cylinder Reservoir Cap with Dot 3 fluid markings. Baffle style with seal. Durable nylon construction with a black coloration. Works with all Wilwood master cylinder reservoirs with 'Girling' size threads. Girling & Remote Reservoir Master Cylinder Cap

WB330-15081

High Volume Aluminium Master Cylinder

Wilwood High-Volume aluminium master cylinders have the highest fluid capacity of any integral reservoir design. With a total capacity of 242ml (8.2oz), there is at least 26% more fluid than most competitive brands. More fluid volume means cooler temperatures and additional insurance for extreme conditions where high pad wear can compromise fluid levels during long events. With 1-7/16" of piston travel, there is plenty of margin when used with large four or six piston calipers.

Compact Combination Remote Master Cylinder Kit

The Compact Combination Remote master cylinder kit features a remote or direct-mounted option for either small or large reservoir, and convenient 1/8" NPT outlets. Compared to full size combination master cylinders, the ultra short 3.37" compact body provides 2.16" of additional clearance between the mounting flange and the fluid outlet. A full 1.12" of piston stroke meets or exceeds the stroke capacity of most full size cylinders and the black E-Coated aluminium body resists corrosion and maintains a durable long lasting finish.

Combination Remote Tandem Master Cylinder

This versatile, lightweight master cylinder provides single pushrod activation of two separate brake fluid circuits. The cylinder features 50/50 output from a 1.00" bore with 1.10" stroke. It is a great match for Wilwood's Bolt-On Disc Brake Kits, systems Configured from OE components, and a variety of industrial Applications. This pedal can be bolted directly to Wilwood's single mount pedals. The kit is shipped complete with the master cylinder, two 118ml (4 Oz) fluid reservoirs that can be mounted directly on the master cylinder or remotely mounted and all necessary hardware including 30 inches of hose for remote mounting.

Adjustable Fluid Control Valve

With .021", .028" & .040" Jets
Aeroflow Performance flow control valve plays a vital role in clutch tuning by adjusting the clutch to slip slightly during quick engagements, the flow control valve reduces shock loads to the driveline, lowers the chance of losing traction or the chance of damaging driveline components. Includes three orifice sizes (.021", .028" and .040") that enable clutch disengagement to be tuned. The flow control valve features -3AN male nipples

AF64-4362

COMPACT REMOTE SIDE MOUNT MASTER CYL - BANJO OUTLET

This new version of Wilwood's Compact Combination (Side Mount) Master Cylinders now features a 3/8-24 banjo outlet. Designed for limited space applications requiring the output capacity of a full-size master cylinder. The ultra-short 3.37" compact body provides 2.16" of additional clearance between the mounting boss and the fluid outlet. The new body design incorporates integral side mounting lugs with a 3.00" center to distance and no traditional mounting flange, which further enhances its ability to mount in tight spaces. A full 1.12" of piston stroke meets or exceeds the stroke capacity of most full-size cylinders. With 3/8-24 fluid outlet port located at the top radius of the cylinder bore, reduces the chances for trapped air. Enhanced fluid inlet port allows mounting of the standard reservoir included in kit and also contain 11/16-20 internal threads for custom reservoir arrangements. The black E-Coated aluminium body resists corrosion and maintains a durable long-lasting finish.

Master Cylinders

The Strange dual inline master cylinder is ideal for sportsman classes requiring four wheel braking. Assuming the rear wheels are equipped with 4-piston calipers; the 1.032" bore master cylinder should be used if 2-piston or single piston calipers are used for the front wheels. The 1.125" bore master cylinder will allow optimum volume and pressure for vehicles using 4-piston calipers for the front two wheels. Strange master cylinders are supplied with mounting hardware and hard line fittings.

Fast Fill Master Cylinder

The Strange fast fill master cylinder allows for maximum consistency and a pedal/handle feel which is unparalleled.

Designed for two wheel braking applications, the lightweight (body= .780 lb.- w/reservoir = .960 lb.) forged aluminium body features a premium grade banjo fitting for plumbing adaptability. The remote reservoir is machined from billet aluminium-not plastic. The reservoir is designed to resist heat and will not easily melt away like plastic. The remote feature enables the builder to eliminate external residual valves and its compact design grants freedom during mounting and plumbing.

STB3362R

STRANGE FUNNY CAR & PRO MOD DUAL IN-LINE MASTER CYLINDER

The B3370 Master Cylinder is for professional racers who demand the best foundation for superior four wheel braking. The fast fill design allows the rear calipers to achieve exceptional caliper pressure with minimum pedal/handle travel. The body design further ensures maximum rigidity, while minimizing weight. The B3370 is self-proportioned, which in most cases eliminates the use of an external proportioning valve.

• Dual In-line Fast Fill Master Cylinder

• 6061-T6511 billet aluminium body

• Hard anodized with PTFE coating

• 1.123" primary bore initially moves a large volume of fluid to the rear brakes

• .875" secondary bore takes over and applies high pressure to the rear brakes

• Internal pop-off valve regulates this transition

• 1.123" third bore supplies fluid only to the front brakes

• Design eliminates the need for a proportioning valve

• Brake line banjo fittings with male 3 AN ends

• 3 AN brake fluid inlet fittings

• Side mount .375" holes on 3.750" centers

MASTER CYLINDER PUSH ROD

Universal Master Cylinder Pushrod Kit

Wilwood's Universal Brake Pedal Pushrod Kit allows many common configurations for custom installation of power boosters or manual master cylinders. Adjustable length kit contains all the necessary components for pedal engagement and height adjustment for most common types of installations. Kit includes: adjustable length pushrods, unions, clevis, eyelet and retainer.

RESERVOIR KITS AND BRACKET

BILLET RESERVOIR KIT WITH BRACKET

Wilwood's new Billet Aluminum Master Cylinder Fluid Reservoir with bracket provides a stylish and durable 4-ounce capacity reservoir that is manufactured from billet aluminum. These reservoirs kits are intended to be used as remote mount reservoir utilizing both the included mounting bracket and the 3/8-24 thread -3 AN male fluid connector adapter (Part # 220-12942). Reservoir kit also assembly includes Billet aluminum cap and seal. Stainless steel flex lines in various lengths are available separately for remote mounting. If replacing the stock master cylinder, additional brake line plumbing may be required.

WB260-12697

BRAKE OR CLUTCH RESERVOIR

Aeroflow's master cylinder remote reservoirs hold 120ml / 4oz and will allow you to mount the brake/clutch fluid fill wherever you need to in your already crowded engine compartment. They are available in polished finish or Black anodised, they are supplied with a male -3AN adapter and the reservoir features a female 9/16-18 thread in the base of the reservoir giving you an option for mounting directly to master cylinder. Also available Single mounting bracket AF66-2046 or dual AF66-2246, both brackets available in polished or Black finish. Dimensions 110mm (4") tall, 63.5mm (2-1/2") diameter.

MASTER CYLINDER BLEEDER KITS

Master Cylinder Bleeding Kit

Wilwood's Master Cylinder Bench Bleeding kit contains all fittings and hoses to properly bench bleed your master cylinder, either tandem or single outlet. Bench bleeding is a necessary to assure that system is completely bled and free from trapped air.

Master Cylinder Bleeding Kit WB260-11593

BRAKE KITS, CALIPERS, DISCS

By Special Order

DBA Slotted Series

DBA slotted series rotors have the same features as our standard series with the added benefit of specially machined slots on the disc face. The directional slotted design efficiently clears dust while creating a better friction and cleaner disc service. DBA slotted rotors are designed for performance street vehicles and are also suitable for towing and offroad vehicles. To order slotted rotors, use the standard part number with the suffix "SL" for left hand and "SR" for right hand.

DBA Gold Series

DBA Gold series disc rotors offer the same braking performance advantages of our Slotted series with the striking looks required to suit open style aftermarket wheels. Don't let your ugly standard brakes ruin the appearance of your shiny new wheels. Now you can dress up your brakes and improve performance at the same time. To order Gold series rotors use the standard series part number with the suffix "X"

DBA 4000 Series

DBA 4000 series disc rotors are the best choice for tough street and modified vehicles. Available as "XS" series cross drilled and slotted rotors or "6x6 wiper slot" series which incorporate DBA's unique wiper slot design and thermal stability profiling. To order 4000 series rotors put a 4 in front of the standard series part number and use the suffix "XS" for cross drilled, "SL" for slotted left hand or "SR" for slotted right hand. Some DBA rotors are not available in 4000 series. • Patented "Kangaroo Paw" ventilation design • Direct replacement • Thermal Stability Profiling (TSP) • Minimal bedding-in of rotors • Available in DBA's unique "wiper" slot design or cross drilled • Thermo-Graphic paint markings for temperature monitoring

DBA 5000 Series

Extensively tested in motorsport applications, the DBA 5000 series 2 piece design has proven its ability to provide efficient and consistent braking performance in these most extreme conditions. Coupled with DBA's unique 'Thermal Stability Profiling', these rotors provide a first class braking solution for both motorsport and street applications. To order 5000 series rotors put a 5 in front of the standard series part number, specify colour and use the suffix "XS" for cross drilled, "SL" for left hand or "SR" for right hand. **For more information on all DBA brake rotors and help selecting the correct product for your vehicle please contact Rocket Sales on (02) 8825-1900 or visit our website www.rocketind.com**

Hot Rod Front Brake

- Die cast aluminium alloy drum covers. Casting flaws such as pin holes and voids are a thing of the past.
- The backing plate is constructed of pre-polished deep drawn stamped stainless steel. Here again, a flawless finish prevails.
- Air inlet scoops are heat treated investment cast stainless steel, again showing no casting flaws.
- The Hot Rod Brake system uses Wilwood four piston aluminium calipers and our own vented cast iron rotors.
- The entire assembly rides on a New Traditionalist™ CNC machined aluminium hub that includes the highest quality bearings and seals on the market.
- Hot Rod Brakes are available in 5 on 4½", 4¾" and 5½" bolt circles and fit '37-'41 Ford round (not square) style spindles.
- Rear drum covers are also available and designed to fit over 9" Ford rear drums.
- Hot Rod Brakes are available with plain or polished drums and scoops.

Pro Race Steel Rear Brake Kits

Strange Engineering has been the leader in drag racing brake kits since 1965 and is the only manufacturer of one piece forged steel brake rotors. The one piece design is far superior to common bolt together two piece rotors in weight reduction, strength and longevity. All Strange Pro Race rotors are slotted. Slotting was developed by Strange to minimize warpage, while maximizing weight reduction. Every kit features the sought after 4-piston directional caliper. The directional caliper accomplishes superior bridge bolt strength at only 2.70 pounds. Strange directional calipers feature 1.750" and 1.625" OD stainless steel pistons to assure optimal pad wear and exceptional pedal/handle feel. Every Strange caliper is internally ported and include .100" square o-rings to assist piston retraction. Brake kit weighs only 23.70lbs. with soft pads.

STRANGE 4 Piston Calipers

The Strange 4-piston directional caliper accomplishes superior bridge bolt strength at only 2.70 pounds. Strange directional calipers feature 1.750" and 1.625" OD stainless steel pistons to assure optimal pad wear and exceptional pedal/handle feel. Every Strange caliper is internally ported and include .100" square o-rings to assist piston retraction. The coalescing square o-rings provide excellent piston retraction as well as superior fluid retention. Kits include calipers, pads, and necessary hardware.

STRANGE 4-PISTON CALIPER KITS

Strange 4-piston directional caliper provides superior strength at only 2.70 lbs. The 1.750" and 1.625" OD stainless steel pistons assure optimal pad wear. Strange 4-piston Billet non-directional caliper further increases bridge strength providing a firmer pedal feel. All four stainless steel pistons are 1.750" and are longer which creates 7% more clamping force and provides more piston stability. Strange S-Series non-directional caliper is equipped with 1.750" OD stainless steel pistons and are designed to fit .430" thick S-Series rotor. Every Strange caliper is internally ported and include square o-rings to assist in piston retraction and fluid retention. Kits include calipers, pads, and necessary hardware.

Kit Includes • Four Piston Aluminium Directional Calipers with Stainless Steel Pistons - B5002 / B5004 • Aluminium bodies drastically reduce weight • Pistons are 1.625" & 1.750" to vary pressure on the pads decreasing pad taper • Stainless steel pistons are corrosion resistant • Anti-rattle clips reduce brake pad vibration and noise. Bolt Kit • Four 3/8"-24 x 1.125" grade 8 bolts • Four 3/8" ID .125" thick washers • Sixteen 3/8" ID .025" thick stainless steel alignment shims High Heat Metallic Brake Pads - B5022 • Provides the highest resistance to brake fade • Recommended for vehicles going over 150 MPH in the 1/4 mile • Pad residue on rotor surface dramatically reduced compared to hard metallic pads • Not for vehicles requiring starting-line cold holding capabilities (Brake hoses and lines are not included) 4-Piston Brake Kit with Metallic Pads

STB1853

STRANGE DRUM BRAKE KITS

Both 11" drum brake kits fit a brake register size of 2.780. Drums are drilled to accept 1/2" wheel studs and have 5 lug 4 1/2 & 4 3/4" bolt circles. The B1606 kit fits the Late Big Ford housing end, Strange H1137, with a brake offset of 2.50". The B1608 fits the Early Big Ford housing end, Strange H1135, with a brake offset of 2.332". Brake hoses and parking cables are not included.

Wilwood brake kits are for off-road and race applications only. All Wilwood calipers use 1/8"-27 NPT inlet fittings and most do not have dust boots which means they do not meet ADR specifications and are NOT street legal in Australia.

HP Rotors

HP rotors are close tolerance machined with smooth turned pad faces. The additional mass of the HP series extends service life on heavier competition vehicles and other severe duty applications. They are also the base model for every day use.

GT Rotors

GT rotors feature Wilwood's ultimate competition preparation with full detail machining, asymmetrical face slotting, and individual dynamic balancing. Full detail machining eliminates unnecessary weight and potential stress points. The venting and cleaning action of the asymmetrical face slot pattern helps to reduce pad glaze, minimize irregular pad build-up on the rotor faces, and interrupt engagement harmonics.

SRP Rotors

SRP Drilled Performance Rotors feature a specially engineered directional cross drill and face slot pattern that improve brake response and pad performance throughout the entire range of light to heavy braking. The venting and cleaning action of the holes and slots will reduce pad glaze and disperse gasses and heat generated during the pad to rotor interface. The holes and slots also inhibit irregular pad compound build-up on the rotor faces resulting in smoother engagement and improved pedal response in all conditions.

FORGED NARROW SUPERLITE 6R BIG BRAKE FRONT BRAKE KIT (HUB)

- Complete systems with 330mm or 355mm rotors • Big brake looks and stopping power to compliment wheel, tyre, and suspension system upgrades • Billet Superlite 6 Piston Calipers • ABS compatible

AERO6 BIG BRAKE FRONT BRAKE KIT

AERO6 calipers were designed for the specific purpose of providing big capacity braking with large diameter rotors for heavy weight and extreme duty vehicles. For cars, it's the biggest of the big providing big brake performance for show and dual-purpose street and track vehicles. For trucks and SUV's, it provides big stopping power for towing, off-road, and enhanced braking with wheel and tire upgrades. Kits listed for specific vehicles are fully compatible with OE master cylinder output and ABS function. Directional staggered vane 14.00" to 14.25" rotors provide maximum cooling for sustained high heat durability.

BILLET HUB

Forged Billet Aluminum Vented Rotor Offset Hubs are made from premium grade alloy billets are forged into shape under high heat and pressure, then CNC machined for precise fit on each spindle application. Intended for use with intermediate adapter plates with vented .81" width rotors, but can also be used with aluminum mounting hats for custom applications. This specific hub is double drilled with a 5 x 4.50" / 5 x 4.75" wheel lug pattern. Hubs include bearing races and screw-on aluminum caps.

Description

Billet Hub Suit Offset Vented Rotor with 5 x 4.50" / 5 x 4.75" Bolt Circle

ROTOR ADAPTER

Rotor adapter for Wilwood's Pro Street and Drag hubs. Adapter is supplied with a 5 x 3.88" bolt circle pattern for hub mounting and 8 x 7.00" bolt pattern for rotor mounting. Made from high strength aluminum alloy.

WB300-3099

Part No. WB270-7274

SUPERLITE 4R Rear Parking Brake Kits

- Complete Big Brake rear axle disc kits for competition and high performance applications that require a parking brake
- Internal shoe parking brake systems provide high holding power with a cleanly hidden installation
- Heavy duty stopping power with show quality style that compliments wheel, tyre and suspension system upgrades
- 12.19" Vented Iron Rotors
- Billet Superlite SL4R Radial Mount Calipers
- Not street legal or ADR approved

HOUSING FLANGE IDENTIFICATION

DYNAPRO Low-Profile Rear Parking Brake Kit
 Dynapro Low-Profile Pro-Series rear disc brake kits provide a complete solution for popular muscle car rear axles on applications that require a parking brake assembly and extra clearance for 14.00" to 15.00" rim applications. Forged billet Dynapro Low-Profile four-piston calipers 11.00" one-piece hat and rotor assemblies, and high friction pads provide optimized and balanced braking for all types of custom performance street/strip and show machines. The neatly hidden internal shoe system provides a clean installation with superior static holding power for parking. Optional caliper finishes and rotor designs enable the builder to personalize the style and optimize brake performance for every individual application.

FORGED DYNAPRO LOW-PROFILE REAR ELECTRONIC PARKING BRAKE KIT
 Forged Dynapro Low-Profile Rear Electronic Parking Brake Kits provide a complete solution for popular muscle car rear axles on applications that require a parking brake assembly and extra clearance for 14.00" to 15.00" rim applications. Forged billet Dynapro Low-Profile four-piston calipers 11.00" one-piece hat and rotor assemblies, and high friction pads provide optimized and balanced braking for all types of custom performance street/strip and show machines. The unique Electronic Parking Brake caliper provides a static high torque static holding power for parking without mechanical cabling. Supplied with control unit and harness assembly, it simplifies installation and use. Optional caliper finishes and rotor designs enable the builder to personalize the style and optimize brake performance for every individual application.

Wilwood Dynapro Low-Profile Rear Parking Brake Kit to suit STRANGE STF-5010 Street Floater kit.
 Forged Dynapro Low-Profile Pro-Series rear disc brake kits provide extra clearance for 14" to 15" rim applications. Forged billet Dynapro Low-Profile four-piston calipers 11.00" one-piece hat and rotor assemblies, and high friction pads provide optimized and balanced braking for all types of custom performance street/strip and show machines. The neatly hidden internal shoe system provides a clean installation with superior static holding power for parking. This kit is not available with dust boot callipers
 Part No. WB140-13952-D

AERO4 BIG BRAKE REAR PARKING BRAKE KIT
 AERO4 Big Brake Rear Axle Kits replace the factory disc brakes and use the OE parking brake assembly as a compliment to front big brake upgrades on late model high performance vehicles. High-capacity braking from the AERO4 radial mount callipers, High friction BP compound pads, and oversized 14.00" rotors are matched to the OE master cylinder output, ABS function, and individual vehicle bias requirements. Enhanced brake performance, increased durability, and high-tech style compliment big wheel, tire, and suspension upgrades on customized vehicles and all others with increased brake requirements.

MC4 MECHANICAL

Wilwood's MC4 Mechanical Parking Brake Caliper is a multi-use, cable operated brake caliper that combines high output performance with simplicity in design and construction, and is the perfect solution for vehicle applications requiring a separate, mechanically actuated parking brake caliper. Built to accept rotors that are .810" thick, with 11.00" - 12.88" diameter range, the MC4 combines an efficient die cast body with a forged billet anvil for superior strength under load, yet is lightweight at only 3.30 (2.95 without pads) pounds. Supplied with each caliper are our Composite Metallic (CM) high-friction, high static-hold brake pads, and are pre-fitted with noise cancelling shields.

ELECTRONIC PARKING BRAKE REAR RETROFIT BRAKE KIT

Wilwood's Electronic Parking Brake kits provides a complete parking brake solution for 0.81" and 1.10" rotor width rear brake kits. The Black or Red powder coat external electronic parking brake provides superior static holding power and a simplified installation with the included controller, harness and switch assembly. Installation would require custom bracket assemblies to fit to most applications.

Retrofit Rear Park Brake Kit	1.10"	WB140-15979-BK

Combination Parking Brake Calipers

Wilwood's Combination Parking Brake Hydra-Mechanical Caliper uses hydraulic pressure for stopping and a mechanical locking mechanism for a parking brake. This redesigned unit provides new options for drum brake conversions and disc upgrades on rear axles that are not conducive to internal shoe systems. The Combination Caliper is a single piston floating design that attaches to a fixed radial mount bracket. The floating mount allows the caliper to maintain perfect alignment when the cable actuated mechanical parking brake lock is engaged and then released. The caliper is compatible with rotor diameters from 11.00" to 13.00" and is available in two models for either .81" or 1.00" width discs.

Bore Size	Disc Width	RH Part Number	LH Part Number
1.34"	0.81"	WB120-9808	WB120-9809

Billet DYNAPRO Single Calipers

DynaPro Single calipers are fully CNC machined from premium grade alloy billet. The FEA generated body design incorporates a highly fortified transition between the piston housings and the bridges which has substantially increased its resistance to deflection and body separation under load. The DynaPro Single is loaded with other exclusive Wilwood performance enhancements. The calipers feature Quick-E-Clip pad retainers that support a 6812 type brake pad from the top for fast pad service without caliper removal. The DPS uses heavy wall stainless steel and replaceable stainless steel SRS bridge plates. SRS plates eliminate the bridge wear caused by pad gouging and eliminates pad rattle and squeal during engagement. The package is completed with internal fluid passages and four corner bleed screws that allow mounting in any front, rear, left, or right side position.

DYNALITE Single Floater

Wilwood's Dyalnite Single Floater is a single piston billet caliper designed for Open Wheel, Drag Race, Karting and Motorcycle applications. The rigid outboard anvil half's low profile design allows it to fit in tight clearance situations where opposed piston designs will not. Weighing just 1.40 pounds, the caliper uses the same .49" thick, 1.1 cubic inch Dyalnite Single quick change pads. Multiple 1/8-27 NPT inlet and bleed screw locations allow for versatile mounting positions. It comes with precision machined dry lubricated slide pins for bind-free operation. The Dyalnite Single Floater is black anodized to resist corrosion and fits rotors from .25" to .38" wide and diameters from 6.00" to 13.00".

Bore Size	Disc Width	Part Number
1.75"	0.38"	WB120-3277

Billet DYNALITE

Single Caliper

Wilwood's Billet Dyalnite Single utilizes close tolerance design and manufacturing techniques which results in the most rigid, lightweight and attractive caliper in the evolution of the Dyalnite Single Series. Starting at 1.58 pounds, the Billet Dyalnite Single is perfect for compact high performance braking as required in Open Wheel, Drag, Modified, Kart, Motorcycle and Off Road applications.

Mechanical Spot Calipers

The single piston floating Mechanical Spot Caliper is compact, lightweight and widely used in Parking Brake, Karting, Recreational and Light Industrial applications. Its two position, cam-actuated lever permits right or left, front or rear mounting, and accommodates two settings for leverage adjustment. The 1.2 pound Mechanical Spot fits rotors with diameters from 6.00" to 13.00" and is supplied with pads installed. The caliper is available black or polished.

POWERLITE Radial Mount

The Powerlite four piston radial mount caliper starts at 2.26 pounds with a sleek profile, superior strength, lightweight and durable in higher temperature situations. Easily adapted to a wide range of sports, rally, and off road driving applications.

Bore Size	Disc Width	Part Number
1"	0.5"	WB120-8724

DYNAPRO Dust-Boot Caliper

The Dynapro Dust-Boot (DP-DB) model of the Dynapro lug mount caliper was developed for applications that require or prefer a dust-booted piston. Dust-booted aluminium pistons provide added protection against road or track born dirt and debris on low to intermediate temperature range applications that may also operate in harsh environments. The pistons are clear anodized to eliminate corrosion while providing added lubricity for drag-free operation within the bores. The dust boots work in conjunction with high-temperature square faced internal seals in the caliper bores to provide optimum performance, ultimate reliability, and quick turn around at pad service intervals. Required for Street Rego.

DYNAPRO

Lug Mount

The DynaPro Lug Mount (DP) forged billet caliper represents the newest generation of calipers available as an upgrade or replacement for applications previously using the long-standing Dyalnite model series. DP calipers combine pure race technology with several new exclusive Wilwood performance enhancements. A sleek profile with superior strength and a fully detail machined finish provide the performance and looks for competition or show.

FORGED

DYNAPRO

LUG MOUNT

LOW-PROFILE

The Forged DynaPro-Low Profile Lug Mount (FDP-LP) forged billet caliper represents the newest generation of calipers available as an upgrade or replacement for applications previously using the long-standing Dyalnite model series. DP calipers combine pure race technology with several new exclusive Wilwood performance enhancements. A sleek profile with superior strength and a forged machined finish provides the performance and looks for competition or show. Especially designed for limited outboard rotor hat clearance and narrow swept area rotors.

Bore Size	Disc Width	Black Part No

FORGED DYNAPRO 6A LUG MOUNT

Wilwood's newest DynaPro DP6A Calipers combine pure-bred racing technology with contemporary design to deliver superior braking and high-tech style on a wide range of custom, show, and competition vehicles. This newest model in the DynaPro series features a reinforced triple bridge construction, with five high strength steel bridge bolts, making it the strongest and stiffest DP6 caliper ever built. Offers direct interchange with all 5.25" pattern lug mount DynaPro and Dyalnite calipers. With Forged aluminum, six piston differential bore body and stainless steel pistons with high temperature seals. DP6A calipers accommodate rotors up to 13" inch diameter and widths from .38" to 1.10". DP6A calipers are available in gloss black or red powder coat, Type III Ano, or Wilwood's Quick-Silver nickel plating.

FORGED NDL

Wilwood's new Forged Narrow Mount Dyalnite (FNDL) calipers are ideal for and widely used in many competition applications including late models, modified, sprints, off road and road racing. Computer generated design and stress analysis technology, is the latest innovation from Wilwood providing substantial improvements in strength and performance over all comparable caliper models. Forged Narrow Mount Dyalnites are the strongest calipers in the class. FNDL calipers are a direct replacement for all previous Wilwood NDL's and similar competitive brands with 3.50" centered mounting tabs. A total of five bolts provide superior bridge strength and positive retention of the top loaded 7816 or 7216 type brake pads. The full range of PolyMatrix pad compounds is available to match the brake response and heat range requirements of any competition application.

Billet NDL Caliper

Wilwood's Billet Narrow Mount Dynalite (NDL) caliper combines the lightweight, high torque performance of our Dynalite Series Calipers, but utilizes a thicker pad design and bolts directly onto standard Superlite 3.50" mounts. Standard Wilwood features include deep cup stainless steel pistons, high temperature piston seals and black anodized finish. The Billet NDL is ideal for many racing applications, including Late Models, Modifieds, Sprints, Off Road and Road Racers.

Forged Billet DYNALITE Calipers

The Forged Billet Dynalite has wide spread application over many forms over motor sports. The latest applied developments and innovations in caliper design and manufacturing processes have resulted in substantial improvements in strength and performance over all comparable models. Each caliper is equipped with Wilwood's SRS stainless steel bridge plates which eliminate the bridge wear caused by pad gouging. The spring-loading action of the SRS plates also eliminates pad rattle and squeal under braking. Other standard Wilwood features include high temperature seals, stainless steel pistons and internal fluid passages that eliminate the need for external tubes. Four corner bleed screws allow one caliper to be mounted in any front, rear, right or left position. Forged Dynalite calipers are a direct replacement for all Wilwood Dynalite and similar competitive brand calipers with 5.25" centred mounting lugs and are available with a bright black anodized or polished finish.

Billet DYNALITE Calipers

The Billet Dynalite caliper is powerful, compact and super lightweight. Advanced computer engineering keeps this caliper extremely rigid, resulting in incredible brake torque at a bare minimum in weight, starting at 2.66 pounds. Internal fluid crossover eliminates external tubes and the four position, two piece bleed screws allow for convenient mounting and easy bleeding. The Billet Dynalite uses standard quick change Dynalite pads, deep cup stainless steel pistons and high temperature seals, and has a black anodized finish. The time proven Dynalite caliper design is stronger and lighter than ever - ideal for Late Models, Modifieds, Sprints, Road Racers and Dragsters.

Forged Billet SUPERLITE Calipers

The superior strength of this innovative new caliper is combined with proven performance features from other Wilwood designs. Each caliper is equipped with Wilwood's replaceable SRS stainless steel bridge plates which eliminate the bridge wear caused by pad gouging. Other standard Wilwood features include high-temperature, square faced o-ring, stainless steel pistons and two-piece bleed screw assemblies. Forged Billet Superlite calipers are a direct replacement for all Wilwood Superlite and similar competitive brand calipers with 3.50" centred mounting tabs. FSL calipers use the same 7420 type bridge bolt brake pad used in all Superlite 6 piston calipers. The full range of PolyMatrix pad compounds is available to match brake response and heat range to any application.

DUST SEAL FORGED NARROW SUPERLITE 4 RADIAL MOUNT

The Forged Narrow Superlite 4R (FNSL4R) is our newest version for the venerable Superlite caliper series adds the versatility and convenience of radial mounting to this widely popular caliper group. Radial mounting simplifies adaptation and provides two planes of adjustment for accurate alignment over the disc. These calipers integrate "Big Brake" style with Wilwood's latest technology to generate big stopping power in extreme environments over a broad range of vehicle applications.

Forged SUPERLITE

The Superlite caliper series is the benchmark in short track, late model, modified and open wheel competition. It also enjoys prominence in a variety of road-race, off-road, rally and sport driving applications. The new FSL model series is the latest innovation to this Superlite family of calipers. It has been redesigned with internal fluid ports that eliminate the external fluid cross-over tubes, along with any potential problems that could arise from a damaged tube. The transfer tube has been replaced with two additional bleed screw assemblies which allows this group of symmetrical piston bore models to be mounted either right or left in a leading or trailing position.

Bore Size	Disc Width	Part Number

1.75"	1.25"	WB120-11136

Billet SUPERLITE SL6 Lug Mount Calipers

The billet SL6 series integrates "Big Brake" style and Wilwood's latest technology into the traditional 3.50" Centred lug mount Superlite caliper category. Each caliper is precision CNC machined from high strength billet into three specialized configurations that cover a broad range of competition and sports driving applications. A unique six-piston differential bore configuration provides balanced loading for even pad wear in sustained high heat environments. The SL6 calipers feature one-piece stainless steel pistons, SRS bridge plates which eliminate all bridge wear caused by pad gouging and extend the service life of the caliper. The spring-loaded action of the SRS plates also eliminates pad rattle and dampens the harmonic vibrations that contribute to pad squeal.

Front Mount	Bore Size	Disc Width	RH Part No.	LH Part No.
	1.25"/1.12"/1.12"	1.25"	WB120-5960-FS	WB120-5961-FS

Billet SUPERLITE SL4 Lug Mount Calipers

The billet SL4 and SL4/ST calipers incorporate Wilwood's latest technology in a conventional 3.50" centred lug mount design, with weights starting at 4.94 pounds. This caliper series has been structurally designed for high clamping efficiency and low deflection in a body width compatible with all wide 5 and 5 x 5 style hubs. It is a direct replacement for all other Superlite style calipers. The 1.88" / 1.75" piston sizes provide the largest effective piston clamping area of any model in the Superlite series. The differential bore pattern uses the pressure variance between the bore sizes to compensate for the natural temperature changes across the face of the pad and the natural tendencies for the pad to "self load" on the leading edge. The split balance of the pad loading promotes even pad wear in the higher temperature applications. SL4 models use one piece stainless steel pistons for their low heat transfer properties and their high resistance to corrosion.

GM WILWOOD BRAKE CALIPER ADAPTERS

For those Holden HQ-WB and LC-UC Torana owners who wish to upgrade your early Holden brakes while retaining the factory HQ stub axles. AeroFlow Performance has designed these front brake caliper dog bones to suit the Wilwood brake kits. They suit both the 11 inch and 12 inch Wilwood brake kits or the billet Dynalite/Dynapro lug mount calipers. New high tensile bolts and washers/shims are provided for safety and security when installing.

AF300-100 Suits 11" brake rotor

AF300-101 Suits 12" brake rotor

Brake Pads

Wilwood brake pad compounds are the results of three decades of experience and continual development to provide optimised braking and driver feel for all types of motor sport and competition applications. This selection guide is intended to provide general characteristics and applications for each compound. On track testing and driver evaluation however, will always remain the determining factor to final pad selection.

Compound Guideline:

- A - Oval Track & Road Race
- B - Sprint Cars & Drag
- E - Drag Race, Dirt Track & Rally
- Q - Street Rods (Low Dust)
- BP10 - Performance Street
- BP20 - Extreme Duty Street/Track

TEMPERATURE MEASURING INDICATORS

Wilwood's Temperature Strips provide an easy, accurate, and affordable method of recording observed on-track temperatures of brake calipers or other components on a race car. The adhesive-backed strips can be attached to any clean, smooth surface to record peak temperatures that occur during sessions. The temperatures are marked for both Fahrenheit and Celsius with the range of 250° to 536° F and 121° to 280° C. The indicator color changes to black when a new, or higher temperature level is observed. Each package includes 10 non-movable strips.

Description	Part No.
Temperature Measuring Indicators (10-Pack)	WB400-15671

HANDBRAKES & ACCESSORIES

TSM Pinion-Mounted Emergency Brake Kit

This emergency brake kit is easy to install. Mechanically activated assembly is completely independent from your main braking system. Each kit includes pinion mounted rotor assembly, mechanical Airheart 175 style caliper, girdles, handle, an adjustable length emergency brake cable and all necessary hardware.

Part No.	Rear End	Description	U-Bolt Spacing
TSM6000	9" Ford 1310	Bolt-On 5/16" U-Bolt	1 7/16" x 2 29/32"

EMERGENCY BRAKE JUNCTION BRACKET

Our Emergency brake junction bracket makes installation of brake cables easy. If you don't want to deal with your existing frame brackets or if they have been removed, our junction bracket replaces existing frame brackets and brings cables to one central location.

E-B-EZ200

E-STOPP HAND BRAKE SYSTEM

The E-Stop push button emergency brake is the perfect e-brake for custom vehicles and winner of the 2012 NSRA new safety product of the year. It not only frees up room on the chassis and in the cab but doubles as an anti-theft device when the button is hidden. It works with any kind of brake system that can accept an e-brake cable and can mount anywhere on the chassis that you have room. The kit comes with the actuator, the control box w/ switch and wire connectors all at an affordable price.

Floor Mount Emergency Hand Brake

Floor Mount Emergency Hand Brake is chromed steel and designed after the automotive industry standards. Ratchet cut gear plate and lock are heat treated for strength and safety. Special feature includes 4-point mounting capabilities for floor mount or side mounting for personal applications. Comes complete with clevis for installation with Lokar emergency brake cables. Cables are sold separately. Lever has been designed with durability in mind. Hand brake measures 10" from end to end.

Description	Part No.
Floor Mount Emergency Hand Brake	LK-EHB-7000F
Black Vinyl Boot with Polished Stainless Ring	LK-70-EHBF
Black Vinyl Boot with Billet Aluminium Ring	LK-70-BHBF
Black Floor Mount Emergency Hand Brake	LK-XEHB-7000F
Hand brake Boot Ring Only - Brushed Finish	LK-70-BHR
Black Vinyl Boot with Black Billet Aluminium Ring	LK-X70-BHBF

Transmount Emergency Hand Brake

Chromed Steel Transmount Emergency Hand Brake is designed after the automotive industry standard. Ratchet cut gear plate and lock are heat treated for strength and safety. The geometrical design of the lever allows for comfortable leverage operation. Levers are available in 11" and 16" lengths to complement Lokar's Automatic Transmission Shifter. Mounting hardware for use with Lokar Automatic Transmission Shifter is included with Transmount Cable Kits and is used with the built-in mounting bracketry included with the shifter kits.

Description	Part No.
11" Transmount Emergency Hand Brake	LK-EHB-7011
16" Transmount Emergency Hand Brake	LK-EHB-7016
Black Vinyl Boot with Polished Stainless Ring	LK-70-EHBT
Black Vinyl Boot with Billet Aluminium Ring	LK-70-BHBT

Under-Dash Foot Operated Emergency Brake

Lokar Under-Dash Foot Operated Emergency Brake gives you ease of operation along with a clean, out of the way emergency brake. There are no cables entering through the firewall. It fits in a space as small as 9" from the firewall to dash.

- Features:
- Billet Aluminium Construction
 - Adjustable 9" to 13" firewall to dash
 - Measures 10" from the pivot point to the bottom of the foot pad.
 - Dash to firewall adjustable bracketry
 - Various location mounting capability
 - Hidden gears and mechanisms for clean finish
 - Application for finished and unfinished cars • Complete with instructions and all hardware • Connector Cables sold separately
 - Rubber stop for quiet pedal return • Heat treated gears

Universal Emergency Brake Cables

Designed for use with Lokar's floor mount or trans mount hand brakes, and in conjunction with Lokar's connector cables for under-dash hand brakes. Kits come equipped with quality one-piece aluminium adjusters and aluminium ferrule to eliminate fraying of stainless housing. Outer housing is designed with specially extruded liner for extended life of the cable. Design allows rear end backing plate fittings to be removed without removing brake cables. Lokar cables also feature adjustable cable lock and clevis. Kit is complete with cable bracket and spacers and includes two 8 foot outer housings that "U-Cut-to-Fit" and are available in stainless or black housing. Application fits 8" and 9" Ford, Chevy and Chrysler drum and disc brakes.

Description	Part No.
Cables for Floor Mount Hand Brake - Black	LK-EC-80FU
Cables for Floor Mount Hand Brake - Stainless	LK-EC-80FHT
Cables for Trans Mount Hand Brake - Black	LK-EC-80TU
Cables for Trans Mount Hand Brake - Stainless	LK-EC-80THT
Cables for Jaguar	
Floor Mount Hand Brake - Stainless	LK-EC-80JAGHT

Connector Cables

Lokar Connector Cables are designed to mount directly to the Under-Dash foot operated and hand operated emergency brakes and connect up with Lokar Universal Brake Cables. Cables are "U-Cut-to-Fit" and are 6 foot in length. Available in black or stainless housing.

Description	Part No.
For Under Dash H/Brakes - Black	LK-EC-8001U
For Under Dash H/Brakes - Stainless	LK-EC-8001HT

Hand Brake Clevis Kits

Lokar Clevis Kits add Lokar Emergency Brake Cable Kits for 1984 to 1987 Corvette, 1988 and later Corvette, Jag rear with Wilwood, Wilwood Disc, Wilwood Ford Explorer style with internal hub rears, and Baer brakes.

Emergency Brake Warning

Indicator Switch Kit

Tired of driving off with your brake on? Then, it's time to check out the Lokar Emergency Brake Warning Indicator Switch Kit. The Emergency Brake Warning Switch Kit functions your dash light or buzzer to alert you when your emergency brake is engaged. Designed for use with Lokar Floor Mount Hand Brake, Part No. LK-EHB-7000F. Switch mounts to existing holes on gear plate on Floor Mount Hand Brake.

Description	Part No.
Emergency Brake Warning Indicator Switch Kit	LK-EHB-7001

HANDBRAKE LEVER ASSEMBLIES

WILWOOD Hydraulic Handbrake Lever Assemblies provide a lightweight, high-leverage component for drift cars, drag race cars, rally cars, or any application where hand-actuation of one or more brake callipers is employed. Hand brakes can be configured as stand-alone circuits with dedicated. Reservoirs and auxiliary callipers, or set up as a pass-through system to operate brake callipers that are also actuated by the foot brake master cylinder.

- Lightweight forged aluminium 11:1 ratio "H" beam lever with ergonomic full-length grip
- Choice of vertical or horizontal static lever configuration
- Accepts any vertical flange master cylinder with 2.25" mounting centres
- Use with integral or remote reservoir master cylinders for stand-alone systems
- Use with GS-style, remote-feed master cylinders for pass through systems
- Durable e-coat finish for long-lasting good looks and resistance to corrosion or oxidation

Description	Part No.
Horizontal Hand Brake Lever Assembly, 11:1 Ratio	WB340-14768
Vertical Hand Brake Lever Assembly, 11:1 Ratio	WB340-14769

BRAKE HOSE & FITTINGS

200 SERIES STAINLESS STEEL COATED BRAIDED HOSE
AeroFlow coated PTFE (Teflon) -3 hose is high quality PYFE hose with a stainless braided hose covering with PVC coating. It's available in Black and Clear and was designed to use for brake lines. It can also be used with our 200 series fittings. Its is Not ADR or DOT approved.

QUICK RELEASE BRAKE FITTINGS

Quick Release Aluminium Fittings

Aeroflow's quick release fittings are a market break through. These light weight fittings are made from billet 6061-T6 aluminium. They are anodized to safe guard your fittings against corrosion. They have been tested up to 1500psi and are a perfect choice for brake *(NOT for road use Off-road and race use only), clutch or fuel lines depending which seal you choose. They connect by hand in seconds. Perfect for anti-theft device. These fittings are designed for leak free release. Please refer application guide. Aeroflow's quick release fittings are also available with a heavy duty Titanium body.

NOTE: EPDM seals must be used in brake applications. Viton seals are recommended for oiling applications. Buna N seals are recommended for all fuels except Nitromethane.

Part No	Description
AFQR103-03	-3 EPDM Seal (Brake)

NOTE: For use in brake applications must use fittings with EPDM seal.

ENGINE & TRANSMISSION MOUNTS

1932-48 FORD

Engine Mounts

Includes rubber cushions, washers, bolt, and hardware for mounting the front of the Ford Flathead V8 to the frame. These are the biscuit style that mount under the water pumps. Two kits required.

1932-36 V8 Engine Mount **V18-6038-S**

1937-48 V8 Engine Mount **V178-6038-S**

1937-41 Transmission Mount **V178-6038-S**

1932 FORD FRONT ENGINE SUPPORTS

Original style front engine supports for your 1932 Ford V8 engine. These perfect copies will impress even the pickiest Early V8 customer. Not cast, but drop forged for added strength. With a minor modification they can be used by Hot Rodders to mount Small Block Chevy's in early Ford cars.

Application
Ford 1932 Car, Pickup & Commercial Front Support

Part No.
BD-18-6030/1

Solid Engine & Trans Mounts

These solid engine mounts prevent lateral engine movement, especially when a heavy pressure clutch is used in a manual application. An absolute must for the professional racer, it helps to eliminate excessive engine twisting. Supplied in pairs.

IMPORTANT: Must be used with a solid transmission mount.

ENGINE MOUNTS

Aeroflow Performance engine mounts are a great upgrade for your daily driver, high performance or competition car. Be sure the engine sits in the right place every time with these engine mounts that are designed as a direct bolt up for conversion cars and also OEM replacement with no extra adapters required. Due to excessive movement the factory OE engine mounts are prone to failure or just everyday wear and tear. The black polyurethane bushes and high-quality steel mounts isolates the engine from the chassis, resulting in vibration suppression and allowing the power to get to the ground where it is needed. The two-piece bolt together design of these engine mounts allow the end user to split the two halves for ease of removal or installation of the engine to the chassis.

To Suit GM LS1, LS2, LS3. Engine into:

AF1201-0001 HOLDEN COMMODORE VT-VZ, VT, VU, VX, VY, G8.
AF1201-0002 HOLDEN COMMODORE VE-VF.

To Suit GM LS1, LS2, LS3, LSA, LSX. Engine into:

AF1201-1000 HOLDEN TORANA LH, LX, UC
AF1201-1001 HOLDEN HQ-WB
AF1201-1002 HOLDEN VB to VS Commodore
AF1201-1004 HOLDEN VL (RB30 K-FRAME) TO LS ENGINE
AF1201-1003 HOLDEN VL-VS (V6 K-FRAME) TO LS ENGINE

FORD Factory Replacement Engine Mounts:

AF1202-0001 FORD FALCON BARRA BA-BF V8, Barra 4.0L (Non Turbo and Turbo), XR6.
AF1202-0002 FORD FALCON BARRA FG-FGX V8, Barra 4.0L (Non Turbo and Turbo), XR6.

CHEVROLET Small Block and Big Block Chev

AF1200-1000 One Piece Locking style.

Holden HQ, WB & Torana OEM Replacement Engine Mount

AF1201-1006 253, 304, 308 engine

HOLDEN TO GM LS CONVERSION MOUNTS

These steel conversion adapters are designed for installing a GM LS series engine into your Holden HQ, HJ, HX or HZ models. They allow the factory Holden engine mount to be used for engineering purposes where an OEM engine mount is required.

AF64-3052

GM LS CONVERSION PLATES

These billet aluminum conversion plate adapters are designed as a true bolt in adapter plate for installing a GM LS series engine into various chassis types that use a 3-bolt engine mount. They will place your LS engine in the correct position when swapping from a small or big block Chevrolet engine to a LS series engine and have four different motor mount placement positions:
1st position: places the LS engine in the stock SBC location.
2nd position: places your LS engine forward 7/16" (11mm) from the original SBC location.
3rd position: places your LS engine forward 1-3/4" (44mm) from the original SBC location.
4th position: places your LS engine forward 2-1/4" (57mm) from the original SBC location.
Includes left and right adapter plates and all necessary grade-8 hardware. These LS conversion plates will not work with low mount AC compressors.

AF64-3051

ENGINE MOUNT

ADAPTERS

Chev engine mount adapters to suit HQ-WB, LH-LX for use with Holden (GM Australia) mounts. Black powder coated steel.

AF64-3050

Transmission Mounts

Aeroflow Performance transmission mounts are a great upgrade for your daily driver, high performance or competition car. These are designed as a direct bolt up OEM replacement with no extra adapters required. The transmission mounts feature a built-in safety lock to prevent separation. Due to excessive movement the factory OE transmission mounts are prone to failure or just everyday wear and tear. The black polyurethane bushes and high-quality steel mounts isolates the transmission from the chassis, resulting in vibration suppression.

AF1210-1000 Fits most GM transmissions such as Powerglide, TH200, TH250, TH350, TH400, 700R4, and Saginaw, Borg-Warner, and Muncie transmissions. The bolt spacing for this mount will accommodate 3-3/4" to 4-1/4" bolt pattern on the transmission.

Engine Swap Motor Mounts

Trans-Dapt engine swap motor mounts allow you to bolt a 1958 and later Chev small block V8 into 1949-57 model Chevy cars. Kits include frame mounts, mount pads and mounting hardware except for TD4175 which includes the mounting plates only.

Application

Chev SB '58-on into '49-54 Chevy (Kit)
Chev SB '58-on into '55-57 Chevy (Plates Only)
Chev SB '58-on into '55-57 Chevy (Kit)

Part No.
TD4196
TD4175
TD4195

Street Rod Motor Mounts

Trans-Dapt Universal fit, Street Rod style motor mounts are the best choice for street rod builders. The design allows for maximum flexibility in design, and provides a routing path for fuel or electrical lines. Simply bolt the mounts to the engine, measure the distance between the frame rails and the engine mounting bracket, then trim the frame mount to the required dimensions. Weld the frame mount to the frame, and you are ready to go. Every set comes complete with a pair of mounting brackets, mounting hardware and durable polyurethane bushings.

Application

Chev Small Block & Big Block Engines
Chev LS1-LS6 & Vortec Engines

Part No.
TD4500
TD4501

Biscuit Style Motor Mounts

Trans-Dapt Performance Products manufactures quality, "Biscuit-style" motor mounts to fit Chev & Holden LS Series engines to cars and trucks with open frame rails. Trans-Dapt biscuit-style motor mounts are available as bolt-in or weld-in mounts. Bolt-in models will work on applications with frame rail widths between 27" to 33", and the Weld-in models work on applications with frame rail widths between 24" to 30". Simply bolt mounts to engine, measure the distance between the frame rail and the mounts, select the proper mounting hole in the bracket, and install. Includes rubber mounts and hardware. Sold in pairs.

Application

LS Series Weld-In Mounts for 24-30" Frame Rails
LS Series Bolt-In Mounts for 27-33" Frame Rails

Part No.
TD4506
TD4509

Pioneer Engine & Trans Mounts

In many cases, engine mounts are never replaced in the service life of a car or truck. Pioneer highly recommends that the mounts be replaced when an engine is removed for major service or replacement.

CHRYSLER S/B - Zinc	RPES4-504	RPES4-504

Transmission Mounts

Energy Suspension automotive transmission mounts were the first to have a built-in metal safety interlock design- for added confidence from breakage. Bushing material made of performance HYPER-FLEX polyurethane.

CHEVROLET LS Series

Motor Mount Adapter Plates

Simple and efficient way to adapt motor mounts to fit LS Series Engines

- Manufactured from 6061 T-6 Aluminium
- Black anodized finish resists corrosion
- Works with G.M. Factory 3-Bolt Mounts and Moroso Solid Motor Mounts Nos. 62500, 62510, 62515 and 62530
- Two per pack, with hardware
- Made in U.S.A.

Motor Mount Adapter Plates for LS Series To SB Mount

M062555

SOLID STEEL MOTOR MOUNTS

- Replace stock, O.E.M.-style rubber mounts to eliminate torque loss and binding linkages, a common result of excessive engine movement
- Eliminates the need for bulky torque straps and chains
- Protective zinc plated finished steel, two per pack
- Refer to Motor Mount chart and dimensional diagram for your specific application

Description	Part No.
SB & BB Chev A-2-1/8" x B-2-3/8"	M062510

Engine Mount Shim Kit

Used to make slight adjustments to engine height to compensate for minor oil pan, linkage and header interference. Standard Chevrolet bolt pattern. Includes 2 each of 1/16", 1/8" and 3/16" thickness.

Chevrolet Engine Mount Shim Kit M062535

Front Motor Plates

You can be sure that your motor will stay in place when you use a Competition Engineering Front Motor Plate. On initial acceleration, torque produced by the engine causes it to twist in the chassis. This twisting action can waste valuable power that could be used to propel the car forward. By installing a front motor plate, you provide a solid connection between the engine and the chassis, eliminating the twisting action and ensuring that the power gets to the rear wheels. For years, leading chassis builders have relied on Competition Engineering Front Motor Plates to eliminate engine movement and provide a positive method of locating the engine in the chassis. These motor plates are also beneficial when performing engine swaps or setting the motor back in the chassis for increased weight transfer.

Mid-Mount Plates

Competition Engineering Mid-Mount Plates are designed to work in conjunction with our Front Motor Plates to eliminate torsional stress within the chassis. Installation of a mid-mount plate also allows easier transmission swaps, aligns the drive train to eliminate block twisting and broken transmission cases and provides smooth clutch operation. They're available for most Chevy, Ford and Mopar applications in .090" steel, the Chevy version is also available in .188" aluminium. Mid-Mount Plates include flywheel shims (except MOC4030) to ensure accurate torque converter to front pump engagement. Once the flywheel is spaced, transmissions can be removed and replaced quickly without worrying about losing the shims.

LS Series Engine Swap Mount Kit

The LS series engine swap mount kit is designed to locate a GEN III/IV (LS-1/LS-6/LS-2/LS-7) engine into the same position as a standard small block Chevy engine using a typical 3 bolt stock isolator mount for your application. NOTE: Use only small block Chevy frame mounts. Big block mounts will not work. Isolator mounts are not included in this kit, due to the variations between vehicle applications. Worn rubber and solid isolator mounts should be replaced to ensure proper fit of the headers and other engine components that you may be installing.

CROSSMEMBERS

Universal Transmission Crossmembers

These crossmembers support most standard and automatic transmissions in open channel frames with frame rail widths between 26" to 36". Just cut the crossmember to fit the frame rail distance. The universal design allows you to position your engine and transmission exactly where you need them. They are built using sturdy .114" wall thickness tubing and are available with or without the transmission mount. Complete kits include a transmission mount for use GM transmissions, but they also allow the use of Ford style mounts for Ford transmissions.

Universal Engine Crossmembers

Trans-Dapt universal fit, crossmember style motor mount kits fit a wide variety of cars and trucks with open frame rails and straight front axles. Clearance should be double checked on 4WD pickups, trucks and passenger vehicles with independent suspension. To use this universal fit crossmember, simply measure the distance between the frame rails, cut the cross tube to fit, and bolt or weld the end caps to the cross pipe. Made with Heavy-Duty .114" thick tubing and supplied complete with rubber cushioned engine mounts.

AHRP Front Crossmember

This stamped steel front crossmember, with stock-location radiator mounts, lowers your rod 1 inch. The centre has a 7-degree rake to eliminate shackle bind and improve caster adjustment.

Suit 1928 - 32 Ford AHRP6061

2" x 3" Dropped Crossmember

Fabricating a rear frame on a Pro Street or Drag Race car is easier and more professional with Competition Engineering's Dropped Crossmember. The sturdy 2" x 3" x .083" steel Crossmember is mandrel bent on computer-controlled equipment, providing uniform wall thickness and exact profile dimensions. The 60" length and full 3.5" drop-centre-profile makes this crossmember an ideal front attachment point on virtually any chassis design. Use with Competition Engineering's Formed Rear Frame Rails No. MOC3060, MOC3062 or any other suitable frame rail kit.

2" x 3" Dropped Crossmember

MOC3061

CHASSIS RAILS

Universal Rear Clip Frame Rails

Competition Engineering Universal Frame Rails are available for both 4-Link and Ladder Bar suspensions. They're the perfect way to narrow the rear chassis to accept extra-wide racing tires. Our universal design makes them adaptable to any car - Pro Street to Drag Race. The specially engineered profile allows adequate clearance for suspension and rear axle components, while accommodating a low ride height and tall racing tires. They're mandrel bent on precise CNC equipment for a wrinkle-free finish and identical dimensions.

NOTE: Installation of this product requires that the stock rear floor pan be substantially modified or removed. The addition of a full roll cage is also required for proper installation.

COMPLETE FRONT SUSPENSION

1967-69 CAMARO Coil-Over IFS

Front suspension clip features double rail, mandrel-bent design that provides superior strength with higher durability. Engine mounts, core support, body mounts, and suspension brackets come installed. All heli-arc welded for highest quality strength and finish available. Engine mounts are designed to accept small block, big block and LS1 engines (optional brackets and Camaro oil pan required with LS1). Bolt-in multi position transmission mount is included. Urethane bushed tubular A-arms, spindles (2" drop), new manual rack and pinion gear, GM disc brake kit, black powder coated springs, anti-roll bar, and billet coil-overs and transmission mount come standard with kit. Show package features: polished stainless A-arms, chrome spindles, chrome steering arms, chrome anti-roll bar, polished billet coil-overs, and custom 11" brakes with polished billet calipers and polished backing plates.

TCI 1967 - 1969 CAMARO / Firebird Straight Line Mini Tub Performance Style 4-Link Part

The rear performance style 4-link complete assembly is engineered for: '67-'69 Camaro, '67-'69 Firebird & '68-'72 Nova. Built for: Standard Street and Straight Line Applications. The Best Proven Bolt-on Performance - You Can Buy!! Rear Performance Style 4-Link with (Mini Tub) Features:

- Lower the stance and centre of gravity
- True bolt-in with no cutting into the floor required
- All heli-arc welded for the highest quality and strength
- Un-equal length adjustable 4-Link bars helps eliminate wheel hop
- Opens up wheel well about 2 inches
- Bolt-on Rear Suspension Assembly Includes:
 - NEW 1 1/4" High Performance Bars
 - 1" adjustable panhard bar w/LH & RH rod ends
 - Adjustable 4-Link Bars
 - Steel All American coil-over shock
 - Black powder coated springs
 - Rear coil-over crossmember
 - Floor reinforcing plates
 - Adjustable panhard bar
 - Sub-frame connectors
 - Weld-on axle brackets
 - Hardware Kit
 - Detailed instruction sheet

COMPETITION REAR SUSPENSION

MAGNUM Series 4-Link

Created specifically for ultra high horsepower Pro-Mod type race cars, this Magnum Series 4-Link will withstand the punishment these cars dish out. Each kit includes 1/4" thick housing and frame brackets (most competitors kits have 3/16" brackets) with 5/8" mounting holes on a 21" radius, as well as 1-1/4" holes for additional tube gusseting. Directly-threaded links won't hold up under these conditions so we designed special threaded tube inserts that weld into Chrome Moly Tubing. We use a 1-1/4" OD. x .095" wall top tube and a 1-3/8" OD. x .095" wall bottom tube to handle the shock loads without flexing. All hardware and mounting instructions are included to ensure an effortless installation.

- Rod Ends are included. Welding required.
- Designed for ultra high horsepower cars
- 1/4" thick mounting brackets to eliminate bending
- Chrome Moly steel link tubes for added strength
- 21" mounting radius
- Computer machined threaded tube ends
- 1-1/4" holes provided in brackets for additional gusseting
- Integral Wheel-E-Bar mounts
- Does not include rod ends
- Welding required

Heavy Duty 4-Link Kit

MOC2028

MAGNUM SERIES 4-LINK BRACKETS

With Integral Shock Mounting Holes

- Designed for 3" diameter Axle Tubes
- Radiused profile simplifies welding and saves hours of fabrication time
- Rugged 1/4" thick steel construction eliminates bending in ultra-high horsepower cars
- 5/8" dia. rod end holes
- Mounting holes for Wheel-E-Bars™, Sway Bar and Shock Mounting
- Entire profile is stamped from hot rolled steel in one operation to
- eliminate distortion and to ensure exact dimensions
- One per package; four brackets required per car
- Use with two Competition Engineering Magnum Series 4-Link Brackets No. C3429

MOC3427

Without Integral Shock Mounting Holes

- Designed for use on 3" dia. Axle Tubes
- Radiused profile simplifies welding and saves hours of fabrication time
- 5/8" dia. rod end holes
- Rugged 1/4"-thick steel construction eliminates bending in ultra-high horsepower cars
- Entire profile is stamped from hot rolled steel in one operation to eliminate distortion
- and to ensure exact dimensions
- One per package; four brackets required per car
- Use with two Competition Engineering Magnum Series 4-Link Brackets No. C3427

MAGNUM Series 4-Link Bracket

- This radiused bracket replaces the universal, square-end brackets found in our Magnum Series 4-Link to mate perfectly with our 4-Link Frame Rails. The radiused profile simplifies welding and saves hours of fabrication time.
- Rugged 1/4"-thick steel construction
 - Nine mounting holes provide a wide range of chassis adjustments
 - Accepts 5/8" hole, 3/4" shank rod ends
 - One per package; four brackets required per car

Magnum Series 4-Link Bracket MOC3421

Standard 4-Link

Offers increased adjustability over a Ladder Bar suspension for increased performance. By locating the bars with the various mounting holes in the brackets, you can create an instant centre that is correct for your application. Each kit includes four 17-1/4" directly threaded 1" OD x .156" wall seamless steel tubes with permanently mounted adjusting nuts. Also included are 3/4" Grade 8 fasteners and jam nuts. Rod ends are not included (Chrome Moly Rod Ends MOC6160 and MOC6161 recommended).

- Allows increased adjustability over Ladder Bar
- 17-1/4" long, 1" dia. x .156" direct threaded links
- Adjusting nuts for quick tuning
- 3/16" thick mounting brackets stamped from cold rolled steel
- Does not include rod ends
- Includes complete hardware and instructions
- Welding required

Standard 4-Link Kit MOC2017

Competition Ladder Bar

Ladder Bars act as a solid connection between the rear axle housing and the chassis, making sure that all of the engine's power gets to the track. Without them, wheel hop would wreak havoc on the rear suspension causing extensive driveline damage. The Competition Engineering Ladder Bar is the result of years of research and development to create the finest Ladder Bar on the market. With a 33-1/2" overall length from axle housing centre to front rod end centre, this bar will fit the majority of cars used in drag racing today. By using 1" O.D. x .156" wall DOM steel tubing and directly threading the ends for 3/4" rod ends, maximum strength is assured. We use only the finest solid forged rod ends in the rear of our bars to eliminate rod end failure. Competition Engineering's Ladder Bars are legal for all sanctioning bodies and include the mandatory front rod end safety brace at no additional charge. Additional gusseting material is also included in the kit to allow the rear brackets to be boxed for added strength.

- 33-1/2" overall length • Rod end safety brackets installed
- 3/16" hot rolled steel mounting plates
- Mounting bracket gussets included
- 1" dia. x .156" wall DOM steel tube construction
- High quality spherical front rod ends
- Forged steel rear rod ends
- Black powder coat finish • Welding required

Competition Ladder Bar Kit MOC2006

Ladder Link

The dual pivoting adjustable lower link on the Ladder Link allows the racer to fine tune the suspension without removing the bar from the car. By simply loosening the jam nuts on the link and rotating it in the desired direction, both pinion angle and chassis preload can be changed. Unlike other so-called adjustable Ladder Bars, the Ladder Link does not create a binding situation when it is adjusted.

- Pivoting lower adjusters eliminate the bind found in competitor's bars
- 33-1/2" overall length
- Adjuster allows quick on-vehicle preload adjustments
- High quality spherical front rod ends • 1" dia. x .156" wall DOM steel tube construction • Black powder coat finish • Forged solid rear rod ends • Welding required

Ladder Link Kit MOC2005

Universal "MAGNUM Series" Anti-Roll Bar Kit

- Includes a formed, heavy gauge frame mounts, enabling you to install the torsion tube through the frame rails for increased strength
- Billet aluminium arms incorporate special splines to prevent arms from slipping on torsion tube. Can be adapted to fit any type of race or street application
- Makes it possible to preload the chassis, elimination body roll during hard launches
- Allows the Drag Race car to drive straighter off the starting line, helping to improve 60-foot times
- Features ball bearing pivot point, which makes for smoother functioning and the unit can be disassembled for maintenance
- Kit includes: 1-4130 Chrome Moly torsion tube, 2-Adjustable splined billet aluminium arms, 2-Mounting brackets, 2-Adjustable links, 4-Rod Ends, 4-Weld in threaded adjusters, 2-Bearings flange mounted, and hardware
- Welding required

Universal "Magnum Series" Anti-Roll Bar Kit MOC2027

STROUD AXLE/CHASSIS ATTACHMENT STRAPS

Race car axle/chassis tie down attachment straps (Pair) **SS36620**

CLEVIS BRACKETS

- Replaces Clevis Brackets found in No. C2031, C2045, C2052 & C2053 Diagonal Links
- Also allows No. C2024 Magnum Series Wishbone Locator or other locating devices to be converted to 3/4" mounting as needed
- Stamped from 3/16" mild steel
- 1/2" rod end mounting holes
- Inside dimension 1.160"
- One per package

Description
5/8" Mount Hole, 1/2" Rod, 1-3/8" Tall
3/4" Mount Hole, 1/2" Rod, 1-3/8" Tall
1/2" Mount Hole, 1/2" Rod, 1-3/8" Tall

MOC3431

Wishbone Rear Axle Housing Locators

The Competition Engineering Wishbone Rear Axle Locator is the ultimate locating device for both Pro-Street and Drag Race applications. The precision fit sliding link eliminates all bind within the rear suspension, allowing it to pivot freely without creating bind or altering the geometry. It features Chrome Moly tubing, precision machined 4130 tube inserts, 5/8" bolt mounting brackets and a centreless ground sliding link with machined wrench flats to ensure a precise fit. This kit also includes a high strength 3/4" spherical rod end for the front pivot and high misalignment rod ends for the side pivots. The sliding link is black oxide plated to eliminate corrosion and binding. The universal design offers you the ability to tailor the overall width and length for your specific application. Welding is required.

- Eliminates sway in Ladder Bar and 4-Link suspension systems
- Positively locates rear axle housing for super straight launches
- Adaptable to any application
- Welding Required

Magnum Series Wishbone Locator MOC2024

MAGNUM Series Diagonal Link

By bolting the Diagonal Link between the front mounting bracket of the Ladder Bar or 4-Link and the rear housing mounting bracket on the opposite side, you create a link that eliminates lateral movement of the rear housing within the chassis. For racing, Competition Engineering Diagonal Links are superior to the Panhard Bar in that the up-and-down chassis movement does not produce side-to-side movement. Each kit includes all the necessary brackets and hardware as well as link tubing that can be trimmed to the exact length for even the narrowest of suspensions. The Magnum Series Diagonal Link offers the strength of 1" x .065" wall chrome moly tubing with weld-in tube adapters and 5/8" hole mounting brackets that will mate it up perfectly with our Magnum Series 4-Link (MOC2028). It's tube length is 36" overall.

- Eliminates sway in Ladder Bar and 4-Link suspensions
- Left and right hand rod ends allow for on-car adjustments
- Length can be shortened to accommodate narrow chassis
- Includes all rod ends and mounting hardware
- Welding required

Magnum Series Diagonal Link MOC2031

Upper Coil-Over Shock Mount Kit

The Competition Engineering Upper Coil-Over Shock Mount Kit works in conjunction with our MOC2047 Lower Coil-Over Shock Mount Kit to provide a solid mounting point for the top of your shocks. The kit is designed to mount between the rear frame rails on any Drag Race, Pro Street or Street Rod application. Its lightweight, tubular design makes it perfect for mounting shocks when "back-halving" a vehicle. Kit includes one 40" long x 1.625" dia. mounting tube, four shock mount tabs, four shock spacers for older style coil-over shocks and all mounting hardware.

- Fits most popular coil-over shocks
- Includes .188" thick shock mounting brackets
- Includes Grade 8 hardware and spacers
- Welding required

Upper Coil-Over Shock Mount Kit MOC2046

Lower Coil-Over Shock Mount Kit

The Competition Engineering Lower Coil-Over Shock Mount Kit is designed to be used either by itself or in conjunction with our MOC2046 Upper Coil-Over Shock Mount Kit. This kit provides a solid, adjustable mounting point for racing coil-over shocks. Machined spacers are included to adapt our mount to various coil-over shocks. Each kit mounts two shocks.

- Fits housings with 3" O.D. axle tubes
- Allows 6" of height adjustment in 1/2" increments
- 1/4" thick housing brackets, 3/16" thick shock brackets
- Fits most popular coil-over shocks
- Includes Grade 8 hardware and spacers
- Welding required

Description

Slide-A-Link

A revolutionary, completely bolt-on traction device, the Slide-A-Link, designed for both street and strip use is track tested and competition proven to outperform conventional "Slapper" bars. Each kit includes replacement lower axle mount pads, 1/2" U-bolts, replacement aluminium front spring eye bushings, hardware and complete instructions.

- Offers the adjustability of a 4-link for better 60-foot times
- Makes on-car pinion angle and preload changes quick and easy
- Mounts to factory locations. No welding required
- Special duromet urethane bushing

CALVERT CALTRACS TRACTION BARS

CALTRAC

Specializing in leaf spring traction enhancement systems for over 25 years, the Calvert Racing Team knows what it takes to get your car hooking harder than ever! With unsurpassed quality and craftsmanship, all competition is eliminated. Don't settle for anything less than the original system that set the standard.

- Complete bolt-on, no cutting, welding, or modifications to OEM suspension
- Keeps axle from rotating, and helps maintain pinion angle
- Improves 60ft times
- Full preload adjustability
- Powder coated gloss black finish for durability
- Illustrated instruction guide

SPRING PEARCHES

REAR AXLE SPRING PERCHES

Aeroflow's rear housing mounts are ideal for installing a new rear-end housing or relocating rear springs. Precision stamped for easy weld-on installation. They provide a strong spring mount. Made from 3/16" (5mm) thick mild steel, they fit 3" (76mm) diameter axle tubes and are 2-1/2" (63mm) wide. **AF72-1500**

HEAVY DUTY LEAF SPRING PERCH

Available for axle tube diameters of 2.75", 3.00" and 3.25" axle tubes please specify when ordering of needed size.

- Perch extends up to centre of axle tube for improved contact surface
- Tabs space housing off perch for best welding penetration
- Integrated gussets add necessary strength

GM UPPER FRAME BUSHING KIT

This kit includes polyurethane bushings to replace worn factory rubber shackle bushings in the upper frame rail of many GM cars, including '67-'81 Camaro/Firebird, '62-'78 Nova, '71-'77 Ventura/Omega. Polyurethane bushings ensure your vehicle is free of chassis binds as well as provides a longer service life in comparison to rubber bushings. This kit does NOT include rear spring eye bushings.

GM Upper Frame Shackle Bushes for Camaro, Nova, Firebird **CTM20973**

STACKABLE LOWERING BLOCKS

Lowering blocks. These blocks are interlocking and stackable onto each other via a 1/2" or 9/16" centering pin and recess for most applications, 2-3/8" Wide U-Bolts not included.

Description **Part No.**
1/2" Thick 1/2" Pin, Stackable (Pair) **CTLB-01**
1/2" Thick 9/16" Pin, Stackable (Pair) **CTLB-02**

PINION ANGLE SHIMS

Billet aluminum pinion shims. Available in 2 or 4 degree to shim underneath spring perches to correct pinion angle.

Description **Part No.**
Pinion Angle Shims, 2 Degree Pair of Wedges **CT2-D**
Pinion Angle Shims, 4 Degree Pair of Wedges **CT4-D**

2 DEGREE WEDGE PLATES

Used to adjust pinion angle or change traction bar angle on leaf spring equipped cars and trucks

- Allows pinion angle change in 2" increments
- Made from 6063-T5 aluminum, they won't crack like cast zinc
- Interlocking ribs allow plates to be stacked without sliding and eliminate unwanted pinion angle change

Two per package **MOC7025**

SPLIT MONO LEAF SPRINGS

Calvert Racing's Split Mono-Leafs are used by drag race enthusiast across the nation that demand nothing but the best performance! Tested on the fastest stock suspension cars in the world. They have been proven to withstand over 1,500 HP and 1/4 mile ETs in the low 7s! These leaf springs were designed to control and reduce excessive body separation in the rear suspension. Yet, are very active. Helping plant the rear tire without unloading. They also offer great stability at top end. Heavy duty springs help reduce spring wrap. All springs are assembled with grade 8 hardware, and heavy duty alignment clamps unlike any other. Aluminium bushings are pressed in front spring eyes, and polyurethane bushings are in rear spring eyes.

- Direct replacement * • Various ride height options
- Heavy duty 2 leaf design • Heavy duty alignment clamps
- Aluminium bushings in front spring eyes included
- Polyurethane bushings in rear spring eyes included
- Durable gloss black finish
- Made in the USA

ANATOMY OF TRADITIONAL AXLE FRONT END

How to Measure your Axle and Spring

To measure your axle for a super slide spring:

Measure C/L of spring perch boss to C/L of spring perch boss. Take that measurement and deduct 5". This will give you the size of your spring.

To measure your perches for super slide spring:

Measure C/L of perch to C/L of perch. Take that measurement and deduct 3". This will give you the size of your spring.

Axle Comparison

FRONT SPINDLES

WILWOOD MUSTANG / PINTO PROSPINDLES

Wilwood's ProSpindle is specifically designed for use in fabricated A-arm suspensions on kit cars, street rods, drag cars and other custom or race applications configured around Pinto/Mustang II suspension geometry. A redesigned one-piece forged steel body uses common Pinto and Mustang II tie rod ends, ball joints, wheel bearings and seals. It is lightweight yet nearly three times stronger than OE or aftermarket two-piece cast iron and steel replacement spindles.

The 2" dropped spindle pin provides the desired lowered ride height without disturbing the suspension geometry. Bolt-on steering arms are strong and can be reversed to accommodate rear steer configurations. They also allow the same spindle to be used on either side of a vehicle. Bolt-on caliper brackets attach to substantially reinforced mounting bosses on the spindle body for secure, deflection-free mounting of four or six piston calipers.

Standard Height Spindles R/H & L/H
2" Drop Spindles R/H & L/H

WB8830-10832
WB8830-9807

AFX PROSPINDLES

Wilwood's AFX ProSpindle Kits contain a pair of high strength steel spindles for 1964-1972 GM A Body, 1967-1969 GM F Body, 1968-1974 GM X Body vehicles that use the original bolt on steering arms. Specifically designed for use with Wilwood's disc brake kits, with a 2.00" drop for a more aggressive stance without affecting steering geometry. With the added benefits of providing a lower center of gravity, raised front roll center and a decreased camber change also improve handling with less body roll. Installs using the OE ball joints using original or aftermarket control arms. Kit includes four steering arm bolts, two for each spindle. NOTE: These spindles will fit 1964-66 Buick, Chevy, Oldsmobile, and Pontiac A-body cars, but some models used steering arms with 7/16" mounting bolts. The bolt holes in the steering arm must be enlarged to .50" by drilling. It is recommended these modifications be performed by a qualified machinist.

2" Drop Spindles R/H & L/H, 1964-74 GM

Roadster Supply 4" Drop Forged Axles

Roadster Supply's engineering staff spent the better part of three years refining a design that takes into account the idiosyncrasies of a reproduction part that must first work with original Ford components. This new forged 1045 heat treated steel 4" dropped axle does that and more. The real test is trying to install stock spindles and having them go lock to lock. SO-CAL's axle shows a 30% improvement over the competition in turning radius alone so when it's time to install reproduction parts, there's no problem. The forged axle measures 47" through the King Pin centres, and 34" at the 2.25" thick spring perch boss. It is offered in five finishes: plain, chrome plated, plain with drilled web, plain with pre-polished drilled web (use your plater) and chrome plated with drilled web.

Roadster Supply I-BEAM AXLES

5" Drop Forged I-Beam Axles

The latest addition, and now a cornerstone of the SO-CAL family of chassis components, is our forged 5" dropped axle. SO-CAL's engineering staff spent the better part of three years refining a design that takes into account the idiosyncrasies of a reproduction part that must first work with original Ford components. This new forged 1045 heat treated steel 5" dropped axle does that and more. The real test is trying to install stock spindles and having them go lock to lock. SO-CAL's axle shows a 30% improvement over the competition in turning radius alone so when it's time to install reproduction parts, there's no problem. The forged axle measures 44 1/2" through the king pin centers, (which is perfect for fendered cars) and 34" at the 2.25" thick spring perch boss. It is offered in plain finish only. We also carry a nice selection of 4" dropped forged axles in 5 different finishes.

S0001-70506 - 5" drop 44-1/2" Centers

4" Drop Forged I-Beam Axles

New Traditionalist™ Forged Steel 4" Drop I-Beam Front Axles: The latest addition to the SO-CAL family of chassis components is our forged steel dropped axles which is now the corner stone of the product line. SO-CAL's engineers refined a design that takes into account the idiosyncrasies of a reproduction part that must first work with original Ford components (Figure F). These new 4-inch dropped axles do that and more. The real test is trying to install stock spindles and having them go lock-to-lock. SO-CAL's axle shows a 30% improvement over the competition in turning radius alone. So when it comes time to install reproduction parts, there's no problem.

S0001-70507 - 4" drop 48" Centers

Tube Axles

Our most popular tube axles are a four inch drop that are machined to accept the early Ford spindle and come in two standard widths, 46 1/2 inches and 49 inches from kingpin to kingpin. However, special order tube axles can be made in any length between 42 to 49 inches and have several choices of spindle applications and drop distances. Tube ends are cast from 65-45-12 ductile iron and our tubes have a 2 inch outside diameter. 4" Drop with Ford Spindle.

Plain Part No	Chrome Part No	King Pin Centres	Perch Centres	Perch Boss	Spring Width

SUPER BELL I-BEAM AXLE

A brand new 1932 'heavy' axle built to stock specifications. This original design would be a great piece for a bone stock restoration or any traditional hot rod, made from 65-45-12 ductile iron, our newest I-beam has the strength and durability that you have come to expect from Super Bell Axle Company. You only have to buy a quality part once. Available in 2" or 2 1/4" perch boss, measures 50 1/2" from kingpin to kingpin, and 36 1/2" perch to perch.

S/S Front Spring Perches

This spring perch design is the industry standard as it closely replicates the original Ford part manufactured between 1928 and 1934. This is what hard core builders use when creating traditional hot rods. They feature S/S construction, 3/4" I.D. bushing eyes, 5/8-18 Nyloc nuts and come fully polished.

Description

Front Lower Shock Mount

Polished Stainless steel lower shock mount fits under any 1928-1934 axle. Requires a long spring perch. Mount is keyed to the spring perch to prevent it turning during use. Should be used with our SS spring perch.

SO001-60656

GT2 Lower Front Shock Mounts

These polished stainless lower shock mounts perfectly complement our stainless spring mounts.

SO001-60643 GT2 Lower Polished Front Shock Mounts
SO001-60643N S/S Natural Lower Front Shock Mounts

SO-CAL F1-Style Upper Shock Mounts

These polished stainless F1-style mounts can be used with most styles of lower mounts and match perfectly those on the SO-CAL batwing. The upper rubber shock bushings are included as is all mounting hardware including the weld-in chassis bungs.

SO001-60600 Suit Hiboy Cars Only
SO001-60650 Suit Fendered Cars

Upper Front Shock Mounts

SO-CAL carries a number of other styles of bolt- and weld-on upper front shock mounts to fit a wide variety of applications Model A through 39 Ford.

SO001-50104 Bolt on Model 'A' & 32 Ford
SO001-50106 Bolt on 1933-34 Ford
SO001-50107 Weld on for Hiboy or Full Fendered

Upper Shock Mounts

Engineered for stability and great looks. These solid stainless mounts can be bolted to non-boxed frames or use the supplied weld-in threaded bosses for boxed frames. Easy to install, made by Drake. (For use on hiboy fenderless cars only)

Upper Shock Mounts

RHD Vega Style Steering Box

This is a brand new steering gear box that may be used for many different steering conversions including 1932 Fords, Model A's, Early Chevys, Chryslers and many custom Hot Rods. This unit provides a compact fit, while being able to perform better than the original. If you are working on a project vehicle this will be the gear box to get!

- Our Vega steering gear boxes are built to precise specifications and tolerances.
- This gear box is a direct bolt in, no welding involved!
- For cars 2800 lbs. or less.
- 3.5 lock to lock standard, but may vary depending on size of wheel.

CUSTOM U-BOLT PLATE

- Fits 1928-34 Fords
- Secures front spring into crossmember
- Chrome bolts and nuts included

SBPJ1002

Front Crossmember Spring Clamp with Bump Stop

Improved front spring clamp to incorporate a bump stop that can protect your axle. The innovative spring clamp design also makes shimmying for different numbers of leaves simpler. The bottom plate is easily removed and changing out the bolts when a short clamp is needed is much easier than modifying U-bolts. The clamp comes with an aluminum spacer block which is used for tuning the spring.

Front Spring Clamp with Bump Stop S0001-62135

GT2 Front Spring

We offer three sizes of front springs to meet your hot rod requirements. All springs have 3/4" reversed eyes and are de-arched for that low ride. They feature GT2 Nyloglide inserts, 6 leaf construction and come in three widths.

Description	Part No.
GT2 Front Spring 29 1/4" C to C, fits 46" Axles	S0001-63002
GT2 Front Spring 30" C to C, fits 47" Axles	S0001-63003
GT2 Front Spring 31 1/2" C to C, fits 48" Axles	S0001-63004

GT2 S/S Front Spring Shackle

The sculpted "dog bone" shackle design dates back to the early days of hot rodding. This beautifully polished investment cast assembly includes urethane bushings and stainless hardware.

GT2 S/S Front Spring Shackle S0001-60603

GT2 S/S Front Spring U-bolt Kit

This kit is the closest you'll find to the original Ford design and it's 100% stainless steel. The clamp plate is investment cast S/S, the u-bolts are 304 S/S as are the fasteners and come fully polished.

U-bolt Kit S/S Polished S0001-63303

Steel Front Spring U-bolt Kit

Plain steel front spring U-bolt kit. Includes spring pad, U-bolts and nuts.

SHOCKS & ACCESSORIES

SO-CAL Speedshocks

These nitrogen filled gas shocks are engineered specifically for hot rod applications and are offered in the "Standard" length of 9-1/4" closed and 14 1/4" extended or "Shorty" length of 7-7/8" closed and 11-1/4" extended. They are manufactured with or without dust covers and can be run on the front or rear of the car in either configuration. The distinctive design of the dustcover is reminiscent of the "airplane shocks" used on early hot rods during the 40's and 50's. Other features are 90 durometre replaceable 5/8" ID lower and 7/16" ID upper neoprene rubber bushings and they come finished in either high gloss SO-CAL red or show chrome.

S0001-60692

SO-CAL Rear Shock Mounting Stud

SO-CAL Shock stud that allows ample clearance between the shock (especially covered shocks), and the rear end housing. Studs come complete with hardware.

S0001-62004 Rear Shock Mounting Studs

BILLET ALUMINUM STREET SHOCKS

- High performance handling for every generation.
- Shocks offer velocity sensitive deflective disk valving which optimizes control and handling.
- Adjustable shocks provide countless tuning options giving you full control over your car's handling capabilities.
- 100% dyno-tuned for accuracy and quality.

BIG GUN X ADJUSTABLE COIL OVER SHOCKS

The Big Gun X Double Adjustable Twin Tube shocks are specifically valved for high horsepower drag radial tyre equipped applications. Drag radial competitors require a unique valving package to control the rear suspension and properly apply the radial tyre to the track. Superior traction is achieved through a high flow piston that delivers constant performance, pass after pass. If you have 1,000-1,500 horsepower and are on a drag radial tyre, this is the valving package you need to complement your race package. For quicker adjustments, mount your AFCO shocks upside down for unsprung weight savings and ease in accessing the rebound adjuster

- Double Adjustable - Broadest range of adjustment in the industry
- Big Gun X Valving - Specifically valved for high horsepower applications
- Great for BIG or SMALL tire Doorslammers
- Rebuildable and revalveable
- Body mount: 1/2 I.D. Bearing (1" Wide)
- Shaft mount: 1/2 I.D. Bearing (1" Wide)

Stroke	Compressed Length	Extended Length	Ride Height	Spring Height	Part #

7"	14"	20.92"	15.50"-18.50"	14"	AFC3870BGX

BIG GUN TWIN TUBE COIL OVER SHOCKS

Big Gun shocks are specifically valved for high horsepower rear shock applications. Recommended for applications 1,000-1,500 hp. Both small tire and big tire cars can better control the hit to the tire with this series of shocks. May be mounted shaft down for reduced unsprung weight and easier access to rebound adjuster.

Stroke	Compressed Length	Extended Length	Ride Height	Spring Height	Part #
4"	11"	14.92"	12.25"-13.25"	8"	AFC3840BG
5"	12"	16.92"	13.75"-14.75"	10"-12"	AFC3850BG

7"	14"	20.92"	15.50"-18.50"	14"	AFC3870BG

BIG GUN X "SLICKS" COIL OVER SHOCKS

- Big Gun Valving - Specifically valved for high horsepower applications.
- Large piston provides superior launch stability.
- Gas pressure eliminates cavitation and allows shock to recover faster.
- Double Adjustable - broad range of adjustment, click-by-click.

Stroke	Compressed Length	Extended Length	Ride Height	Spring Height	Part #
4"	11.20"	15.20"	13.00"-13.50"	8"	AFC3240BG
5"	12.20"	17.20"	13.50"-14.50"	10"-12"	AFC3250BG

7"	14.20"	21.20"	15.50"-18.50"	14"	AFC3270BG

BIG GUN X "RADIALS" COIL OVER SHOCKS

The Big Gun X Series Double Adjustable Monotube shocks are specifically valved for extremely high horsepower drag radial tyre equipped applications. With this valving package, chassis tuners can better control the "hit" to the tire using this series of shocks. Drag radial competitors require a unique valving package to control the rear suspension and properly apply the radial tyre to the track. Don't "drive thru" your shocks with that big power! If you have 1,500+ horsepower and are on a drag radial tyre, or are using stock suspension, this is the valving package you need to complement your race program. Choose this series of shocks for the ultimate control off the line and superior traction down track. For quicker adjustments, mount your AFCO shocks upside-down for unsprung weight savings and easier access to the rebound adjuster.

- Double Adjustable - broad range of adjustment, click-by-click.
- Big Gun X Valving - specifically valved for high horsepower radial tyre applications.
- Large piston provides superior launch and down track stability.
- Gas pressure eliminates cavitation and allows shock to recover faster

7"	14.20"	21.20"	15.50"-18.50"	14"	AFC3270BGX

AFCO ELIMINATOR TWIN TUBE ADJUSTABLE SHOCKS

AFCO ELIMINATOR Twin Tube Adjustable Shocks are built specifically for drag racing. Our onboard data acquisition systems help us know what your car is doing every 0.001 of a second. We've engineered the ELIMINATOR to control it at every point. This gives you, the racer, unsurpassed traction. AFCO DOUBLE Adjustable Shocks are the ultimate tool in the chassis tuner's arsenal. The DOUBLE adjustments of both compression and rebound damping are completely independent. Changing the setting of one has no effect on the setting of the other. By allowing full control over both compression and rebound forces, this shock gives the tuner the ability to fine tune every aspect of chassis movement to provide the ultimate in acceleration control and overall drivability.

- Widest range of adjustment on the market.
- Make a click and feel the change.
- 100% dyno tested.

AFCO Racing Bushings

Afco Shock Bumpers are not only used for dialing in your suspension but also help cushion your suspension to help prevent bottoming-out and causing extensive damage that can occur when doing so. Shock bumpers fit into a small cup that slides on the shock shaft, and there are a number of different levels of hardness to choose from. Dial your suspension in and get the edge on Afco shock bumpers.

ULTRA LIGHTWEIGHT BLACK COATED SPRINGS

- AFcoil Springs featuring all new black coating
- Get the performance you are looking for with the tightest tolerances in the industry • All AFco coils are manufactured using ultra high tensile wire • these springs are guaranteed not to lose more than 1% of free height • 2-5/8" I.D. design prevents spring lean and bow.

Coil Over Shock Adjustment Tool

This tool helps you adjust the adjustment rings on your coil over shocks easily and without damage. Tool is universal and suits most brands of coil overs with adjusting nuts up to 3-1/4" diameter.

Coil Over Shock Adjustment Tool AF98-2010

DYNATECH V-CLAMP COLLAR KITS

Dynatech V-Clamp Collar Kits are an excellent way to connect exhaust components that need to be removed from time to time. These connections are used in many turbo applications or any application that requires an excellent, leak free seal, that needs to be removable. The stainless-steel clamp allows for a strong, durable clamping device that keeps the seal tight. The mild steel rings make it easy for anyone to weld them to any exhaust component. Kit includes one sealing clamp and two sealing rings.

ULTRA SERIES MONO-TUBE DOUBLE ADJUSTABLE SHOCKS

The Strange Ultra Series mono-tube double adjustable shocks are available in common configurations (listed below) and are revalvable. Custom configurations and valving are available upon request. The Ultra Shock is a key component in the suspension system that will deliver consistency, improved launch, down track stability and ultimately allow you to better tune your vehicle for superior performance. All shocks are hand assembled by Strange in the USA.

- Mono-tube Construction
- Gas Charged Reservoir
- Wide Range of Tuning Adjustment
- Ultra-low Friction Guide and Seal
- Hollow Induction Hardened Super Finished Chrome Rod
- Hardened 48mm Piston with Teflon Coating
- Piston Based Valving System
- Locking Anodized Spring Seat

Aluminium Coil Over Rear Shocks

Each Strange shock body, eyelets, spring seats and jam nut are fully machined from high-grade aluminium. Strange fully assembles and inspects each shock. Every shock that passes our stringent testing is issued a serial number. The Strange dynamometer facility enables us to analyze shocks at all shaft speeds and continue our valve development to stay at the forefront of the performance suspension industry.

Single Adjustable Shocks

Strange aluminium single adjustable coil-over shocks are designed to take the guesswork out of tuning your suspension. Whether you are adjusting the ride of your street machine or fine-tuning a drag race vehicle, Strange shocks are a valuable tool to adapt your suspension to the changing conditions your vehicle will encounter. Shock extension is easily adjusted by turning a conveniently located external knob. The external knob offers 10 precise rebound settings and allows for a wide range of adjustment.

Extended Length	Collapsed Length*	Recom Ride Height	Stroke/Travel*	Spring Length	Part Number

* Collapsed length and stroke are stated without the bump rubber to compare with other brands.=

Double Adjustable Shocks

(Sold as singles)

Strange aluminium double adjustable shocks incorporate an additional knob for accurately adjusting compression. Every Strange double adjustable shock package includes teflon lined high mis-alignment bearings, spring seat bearings and Hypercoil Springs. Hypercoil springs are recommended to ensure optimum adjustability and alleviate additional problems that may be introduced with lesser grade springs. Strange shocks were developed to operate independently or with our optional remote air kit. The remote kit allows the shock to be set at a stiffer rebound setting at launch and then can be triggered to become softer (extension) as the car travels thru the quarter mile. Strange shocks are set to allow for a wide range of adjustments; however, Strange shocks can be re-valved to a different range of adjustments if your specific application/set-up requires.

Extended Length	Collapsed Length*	Recom Ride Height	Stroke/Travel*	Spring Part Number

Replacement Adjusting Knob

Replacement adjusting knob for Strange single and double adjustable shocks.

Replacement Adjusting Knob (each) STS5000ST

Hypercoil Springs

Strange Engineering has brought the premier CART/Indy, Formula One and NASCAR spring manufacturer to drag racing. In drag racing, the spring is an intricate component of the suspension. Hypercoils are manufactured from the lightest optimal coil diameter- without compromising the springs performance.

Strange Aluminum Struts & Coil-Over Shocks Spring Seat Bearing Kit For 2 1/2" ID springs
ST51409

STRANGE SHOCK BEARING

Replacement 1-1/2" Wide Spherical Shock Bearing
ST5500KAS

Remote Control Kit

Strange shocks were developed to operate independently or with our optional remote air kit. The remote kit allows the shock to be set at a stiffer rebound setting at launch and then can be triggered to become softer (extension) as the car travels down the quarter mile.

Strange Remote Control Kit ST55000
Timer & Circuit Board for ST55000 ST5500R

STRANGE Forged Aluminium Front Struts

Strange Forged Aluminium Strut Packages provide the basis for a lightweight front suspension. Frame construction is much simpler, suspension geometry is more easily established, and header clearance is improved over conventional A-frame suspension. Every Strange strut is rebound (extension) adjustable and all stud mount Strange Struts are externally adjustable for more convenient extension tuning. Strange aluminium struts are also available with an optional external compression adjustment- allowing for two (double) independent adjustments. Every Strange strut package features integral designed components ensuring proper fit, ease of assembly, maximum performance and an unsurpassed regard for safety.

- Forged aluminium body x-rayed to ensure quality
- Lightened 17-4 stainless steel spindles
- Revaluable Strange cartridges
- Large & fully ground strut shaft
- Eye or external adjustable stud mount
- Three brake kit packages to choose from
- Includes chrome-moly lower control arm kit

Lightweight Strut Packages

The Strange Lightweight Strut package is for drag cars using spindle mount wheels only. Packages include struts, lower control arm kit, lightweight 10" brake kit, Hypercoil springs and spring seat bearing kit but do not include wheel bearings or seals. Kits are supplied with 250lb Hypercoil springs, other spring rates are available separately.

Strange Lightweight Strut Package for Eye Mount Applications STPSS100
Strange Lightweight Strut Package for Stud Mount Applications STPSS105

Medium & Heavy Duty Strut Packages

Strange offers medium and heavy duty strut packages for five stud wheels. The only difference between the two kits are the caliper kits. Medium duty kits feature Strange billet 2 piston calipers and are recommended for vehicles under 2600lbs (1180kg). Heavy duty kits feature the Strange directional 4 piston caliper and are recommended for vehicles over 2600lbs (1180kg). Packages include adjustable struts, lower control arm kit, brake kit, Hypercoil springs and spring seat bearing kit. Kits are supplied with 250lb Hypercoil springs, other spring rates are available separately. All Strange aluminium strut packages are for drag racing only.

Medium Duty Strut Package for Eye Mount STPSS110-4.50
Medium Duty Strut Package for Stud Mount STPSS115-4.75
Heavy Duty Strut Package for Eye Mount STPSS120-4.75
Heavy Duty Strut Package for Stud Mount STPSS125-4.50
Heavy Duty Strut Package for Stud Mount STPSS125-4.75
Heavy Duty Strut Package for Stud Mount Double Adjustable STPSS125DBL-4.50
Heavy Duty Strut Package for Stud Mount Double Adjustable STPSS125DBL-4.75
Medium Duty Strut Package for Eye Mount STPSS110-4.75
Medium Duty Strut Package for Stud Mount STPSS115-4.50

REPLACEMENT STRUT PARTS

Replacement Steering Arm STS3402C
Lower Control Arm Tube Kit for Strange Aluminum Struts with 1/2" I.D Rod Ends STS3421
A-Arm Ends for Strange Aluminum Struts STS3750

STRANGE Ultra Strut Packages

The latest generation Strange cartridge is externally adjustable and the piston is located below the spindle- allowing for longer stroke, less stress and increased stability at full extension. The lighter construction of the strut allows for weight savings, while maintaining an unmatched integral strength. The double adjustable strut permits the ultimate in fine tuning the front suspension. Hypercoil springs are included with every Ultra Strut package.

Strange Ultra Strut packages include Ultra Struts, premium chrome-moly lower control arm kit, wheel bearings, wheel races, wheel seals, high misalignment tie rod ends, aluminium steering arms, spring seat bearing kit and Hypercoil springs.

- Based on Anglia style spindle
- Aluminium steering arm
- Lightweight Stainless steel base
- NAS hardware
- Superior stability
- Single Adjustable with Lightweight Steel Brake Kit STPSS200
- Single Adjustable with Carbon Brake Kit STPSS210
- Double Adjustable with Lightweight Steel Brake Kit STPSS205
- Double Adjustable with Carbon Brake Kit STPSS215

CTCF42103

CALVERT 90/10 FRONT DRAG SHOCKS

Calvert Racing's CF Series 90/10 was designed with performance in mind. This new line was engineered for cars with midrange power. Built with the softest rate on rebound on the market today, allowing the front end of your race car to come up as easy as possible! This equates to better weight transfer and more weight over your rear tires. In addition, the CF Series shock also has a dual rate compression valving. The built in high speed compression valving will keep your front end from bottoming out on hard landings. Once you're out of the hole, low speed compression is active and a softer valving allows the front end to settle at the top end. Every application was closely evaluated for best length assuring that each vehicle would have sufficient travel for maximum traction. This is an area that is missed by most manufacturers as their shocks are designed after factory length shocks.

- Non-adjustable, made to perform out of the box
- Fastest shock on rate of separation
- Dual stage compression valving. Absorbs hard hits and settles at top end
- Light weight, industrial design
- Cost effective
- Sold as Pairs
- NOT FOR HIGHWAY USE

CALVERT 9-WAY ADJUSTABLE

REAR SHOCKS

- 9-way adjustable
- Great for street/strip use
- External dial for easy adjust ability
- Dial primarily adjusts rebound, enabling driver to control excessive rear body separation
- Heavy duty industrial steel bodied design
- Cost effective
- Sold as Pairs

Adjustable Drag Shocks

Competition Engineering's 3-Way Adjustable Drag Shocks are designed to allow the racer to dial-in the race car to meet changing track conditions. Competition Engineering's Front Drag Shocks are adjustable in three ratios: 90/10, 80/20 and 60/40. These ratios reflect the percentage of force required to extend and compress the shock absorber. You can quickly change the valve setting by simply compressing the shock fully and rotating the shaft until the indexing notch mates with the desired setting on the body. Our Rear Drag Shocks are also adjustable in three ratios: 30/70, 40/60 and 50/50. These ratios also represent the percentage of force required to compress and extend the shock unit. Only this time, the first number is compression and the second extension. These shocks also adjust by compressing them fully and rotating to the desired setting on the body.

COIL-OVER SHOCK KIT

- Kit includes: 3-Way Adjustable Shocks, Upper Mounts, Adjustable Lower Mounts, Threaded Sleeve, Spring Cap, Seat and Hardware
- Universal design allows installation on a variety of chassis
- 3-Way Adjustable shocks provide controlled squat at the rear for improved weight transfer and traction
- Lower shock mounts have 6" of adjustment in one-half inch increments to suit ride height requirements
- Lower shock mounts are zinc plated and the threaded sleeve, spring cap and seat are anodized for corrosion resistance
- Fits housings with 3" O.D. axle tubes
- Springs not included
- Adjustable spring seat with locking set screw allow the spring rate to be finely tuned
- Use with Competition Engineering Rear Coil-Over Springs depending on specific rear-end weight, accepts 2.5" I.D. Spring
- Sold in pairs

MOC2765 3-Way Adjustable Coil-Over Shock Kit (Pair)

AIR SUSPENSION & COMPONENTS

- Bolt-on installation. NO welding required.
- Unequalled ride quality
- Proven patented sealing technology
- Anodized billet aluminium construction
- 16 position adjustable valving • Superior handling
- Eliminates tyre clearance problems

SHOCKWAVE Chassis Application Guide

We offer direct ShockWave fittings for most aftermarket chassis manufacturers. Some of the most popular manufacturers are listed below. NOTE: These dimensions and mountings are for the manufacturers own front suspension designs. Some coincidentally use a Mustang II spindle in their own suspension design even when using different suspension components and geometry. Be careful to not confuse the different units. When using ANY manufacturers true Mustang II front suspension, please use the ShockWaves listed for a Mustang II suspension listed below.

Rear SHOCKWAVES

The ShockWave™ 8000 and the ShockWave™ 7000 are designed especially for the rear suspension of your hotrod. The Firestone® sleeve style airspring offers more travel and a softer spring rate that is more appropriate for a solid axle rear suspension. The 16 position shock valving will allow you to dial in the exact level of ride quality and handling performance you want for your car. 7000 Series rated less than 1500lbs rear axle weight. 8000 series rates 1500-2400lbs.

NOT recommended for IFS installations... not enough load capacity

The AirBAR® from Ridetech is a 4 link rear air suspension that will directly bolt to the oem leafspring mounts of your prized musclecar... no cutting, no fabrication, the ride height of your car is typically lowered by approximately 2". The fully deflated height is typically 5-6" lower than stock. The ride quality is dramatically improved over stock... instead of a wallowing soft ride you'll experience a crisp, controlled ride quality that will inspire more confidence for performance driving.

The area of largest improvement is the handling and cornering performance. The AirBAR® eliminates the oem leafspring and replaces them with a 4 link rear suspension. The 4 link bars offer more precise positioning of the rear axle to eliminate flexing and increase stability through the corners. When combined with a ShockWave® or CoolRide™ Front Suspension Kit, your classic musclecar can now enjoy the benefits of modern handling and ride quality technology. AirBAR kits can be used with ShockWaves or Coil Overs, NOTE these are sold separately.

COOLRIDE
by Air Ride Technologies

Street Rods/Street Machines

Front Systems & Rear Systems

These are the original Air Ride Suspension that was developed several years ago and remains the most popular system today. The CoolRide™ system consists of an airspring and all of the necessary mounting bracketry and hardware. On a front system the shock is usually relocated to the outboard side of the lower control arm. A weld-on bracket mounts the top of the shock to the frame rail. On a rear system, the airspring and shock absorber will normally go in the stock locations. The CoolRide™ system has the greatest application coverage and versatility of all of our Air Ride Systems. It will raise and lower the vehicle, improving the handling and offering a terrific ride.

- Lowers vehicle ride height
- Improves handling
- Greatest application coverage and versatility
- Pre-engineered mounting hardware to maintain ground clearance, driveline angles, tyre clearance and load capacities
- Improves ride quality!

- Lowers vehicle ride height
- Improves handling
- Greatest application coverage and versatility
- Pre-engineered mounting hardware to maintain ground clearance, driveline angles, tyre clearance and load capacities
- Improves ride quality!
- Easy to install!

This is our most simple, cost effective and easiest to install air ride system. There are a great number of finished vehicles out there that use a leafspring rear suspension. The AIRoverLeaf™ system offers a great ride quality and extra load capacity without re-engineering your vehicle. Lowering is accomplished by removing 1 or 2 leafsprings. The airspring is then inflated to restore load capacity, ride height and spring rate. The AIRoverLeaf™ system is completely bolt-on and requires little or no modification to your vehicle.

What says "performance" more than a set of tubular control arms! After all of the time and effort expended on your ride, you definitely can't let your stamped oem control arms detract from all that work. Finish your suspension off with these new tubular control arm systems from Air Ride Technologies. Built with all of the care and experience you have come to expect from us, these tubular control arms are a precision engineered solution for ShockWave™ installation, ball joint binding, and frame clearance issues that can haunt some vehicles. When you combine the performance benefits with the elegant design of these arms, there is no question... GOTTA HAVE THESE!

Custom Components

Just because Air Ride may not offer a specific air ride system for your particular vehicle doesn't mean it cannot be done! They can supply the correct components to make your special project a success. Their suspension technicians can help you select the appropriate airspring components. You supply the fabrication skills and they'll supply the parts!

Yes, it's more of a challenge than their pre-fit systems.

Yes, it will require welding and fabrication skills. No, it is not rocket science

AIRPOD Systems

The AirPod is a complete self contained system to make air suspension installation less time consuming. AirPod utilizes the RidePro e2 or LevelPro Control System, and it works with all Air Ride air suspension applications. Simply mount the four level sensors at each corner of the vehicle and plug the harness into the AirPod.

- Pre-tested, pre-wired, and pre-plumbed
- Only 3 wiring connections to make
- Only 4 plumbing connections to make
- Compact size easily installs into most vehicles
- Corrosion-proof aluminium 3 or 5 gallon tank
- Easy 4 Bolt Mounting

Air System Components

Note for double convoluted airspring:

Firestone[®] double convoluted airsprings DO NOT require a bumpstop to avoid damage, however, your specific application MAY require a bumpstop to maintain a safe ground clearance when deflated.

Note for all other airsprings:

An external bumpstop and an extension stop (limiting strap or the shock absORBer) MUST be used to prevent the airspring from exceeding the compressed or extended dimensions. If these dimensions are exceeded, severe damage to the airspring, and possibly the vehicle, will result.

WHEELIE BARS

Professional Wheel-E-Bar

Designed to withstand the abuse of drag racing, the Competition Engineering Professional Wheel-E-Bar Series is the choice of more racers than any other when design, quality and premium materials count. Each bar features upper spring adjusters made from 7075-T6 aluminium to allow for ease in preload adjustment. The lower struts are made from high strength 6061-T6 aluminium, enabling them to handle the forces applied to them without fatiguing. Each kit includes all the required fasteners as well as quick release pins to allow access to the rear end housing for jacking.

RACE CAR COMPONENTS & FABRICATION

PARACHUTE RELEASE CABLE KIT

This kit streamlines installation of cable release system for a parachute. The kit includes a black 18' (5.48M) of Teflon lined Felsted cable, clip type cable with exposed .070" diameter wire on one end (may be cut to preferred length), Black anodised CNC machined lightweight aluminium lever/handle, rod end and cable mounting hardware. The unique feature in this kit is a billet cable end to eliminate cable from fraying and causing parachute bag damage.

QUICK RELEASE STEERING HUBS

STQ1000

STQ1200NB

STQ1200

Strange Quick Release Steering Hubs

Strange quick release steering hubs- are SFI certified. The billet aluminium hubs are a completely self contained mechanism. A 4130 stub shaft is furnished for ease of installation and the keyed spline design allows for easy wheel orientation. The Q-1000 is designed for butterfly steering wheels and the Q-1200 fits Grant style steering wheels.

MOROSO SFI Approved Quick Release Steering Wheel Hub and Adapter

Meets NHRA, IHRA and other sanctioning body criteria for meeting SFI requirement 42.1 concerning steering wheel attachment and release. Hub is manufactured from lightweight billet aluminium with blue anodized finish and 5/16"-18 thread bolt holes. The spring loaded quick release pin is integral with the hub and features a large diameter engagement surface for use with bulky racing gloves. Includes steering shaft adapter manufactured from 1018 steel for extra strength and ease of welding. Fits 3/4" OD steering shafts and steering wheels with a 3 hole, 1-3/4" dia. bolt pattern.

Quick Release Steering Wheel Hub and Adapter

M080160

MOROSO 5 Hole Steering Wheel Adapter

Allows racers to continue to use Moroso's Quick Release Steering Wheel Hub No. MOC80160 or similar hubs with 3 hole bolt pattern when converting to steering wheels with a 5 hole bolt pattern. Billet aluminium adapter includes all mounting hardware (steering wheel to adapter and adapter to hub).

5 Hole Steering Wheel Adapter MOC5078

Grant Quick Release Hubs

Grant offers quick release hubs for the quick removal and remount of a Grant Performance Series steering wheel. The "pinless" type features a positive lock system with a squeeze release slip ring mechanism to provide the maximum in safety and convenience to all race cars. The "pin" type features a removable pin. Grant Quick Release Hubs are manufactured from aircraft quality billet aluminium. Parts are precision CNC machined to exacting standards to provide the finest quality Quick Release Hubs available. These parts are designed for off-road use only. NOT LEGAL FOR STREET USE.

COMPETITION STEERING PARTS

Front Spindles

Steel spindles are machined to exacting standards from 4130 chrome-moly billets. After heat treating, the spindles are magnafluxed, finish ground, and bronze bushings are installed and align honed. Spindles come with heat treated and ground King Pins and steering arms. The STS3457 spindle kit includes axle bosses. Strange also offers a billet aluminium dragster spindle kit designed for lightweight applications- call ROCKET to discuss your application.

Stiletto Steel Front Spindles STS3457

Adjustable Front Spindles

Strange adjustable height spindles allow for at-the-track chassis preload adjustments by simply relocating spacers. Our billet aluminium spindle body and heat treated spindle accepts all existing Anglia style spindle mount wheels. The spindle fits our aluminium, steel or carbon front brakes, which feature our single piston caliper with square pads.

Strange Aluminium Adjustable Height Funny Car Spindle STS3423

Stiletto Polished Pro Box Rack & Pinion

The Stiletto Pro Box is the finest steering assembly available for full bodied vehicles. The magnafluxed aerospace steel pinion is precisely fitted to the high tensile chrome-moly rack with 24.50" clevis centres. The sealed rack is protected by nylon reinforced neoprene bellows. Three turns lock-to-lock provide 4.750" of rack travel resulting in a 20 to 1 steering ratio with 5" spindle arms. An adjustable mounting system adapts to a variety of chassis designs. Quality and safety should never be sacrificed. With this in mind, the Stiletto Pro Box should be your only choice.

Stiletto Polished Rack & Pinion (5.36lbs.) STS3440

 • 4140 chrome moly • Hardened
Rod Ends
 • Stainless steel • .375" spherical ball • Right hand threads
Dragster Stiletto Rack & Pinion (2.40lbs) STS3442

Worm Type Steering Box

The SPE worm type steering box is ideal for Funny Cars and other front engine cars where drag link steering is used. These boxes feature a 10:1 ratio and a serrated end on the steering shaft to provide a wide range of adjustment for the pitman arm.
SPE Worm Type Steering Box 13" STS3441S

STS3448-195

STRANGE DOOR CARS STEERING RACKS

New door car racks have been recently introduced into our expanding line of steering components. These join our popular Dragster rack, fulfilling the need for quality steering system components as availability becomes an issue from other manufacturers. These units are designed for Drag Race use only, and feature the same dedication to workmanship that racers have come to expect. Proudly designed, machined, and assembled by Strange Engineering in the USA.

- STS3448**
 • 24.5 tie rod centers
 • 4.25" total rack travel

Tie Rod Kit

An excellent compliment to the Stiletto Pro Box, Strange's tie rod kit features T-bushing adapters, which are pressed into the .438" tie rod ball joints to allow increased range of movement without binding. The tie rod kit includes 12" long chrome-moly tubing (.625" O.D. x .120" wall) and 4130 rod ends for the utmost safety and durability.

Tie Rod Kit for STS3440 Pro Box STS3447

Steering Column Mounting Kit

We created this mounting kit to work in conjunction with our MOC5074 Steering Column Kit. Its compact design allows the column to be mounting rigidly to the chassis while keeping weight to a minimum. The split clamp mounting system makes it easy for the column tube to be removed or repositioned if necessary without cutting or re-welding. This kit can be adapted to other steering column kits that use a 1-1/2" diameter column tube. Each kit includes two split clamps, complete installation instructions and two pieces of tubing to mount the column to the chassis. Welding required.

Steering Column Mounting Kit MOC5076

Steering Column Kit

This kit is designed for use in race cars with fabricated tube style chassis. Its universal design allows it to be adapted to Drag Race, Pro-Street and Street Rod chassis. Chrome moly construction makes it lightweight without sacrificing strength. The inner shaft rides in two flanged polymer bushings that mount to an aluminium column tube. Exclusive features include: grease fittings to keep the bushings lubricated and a stop collar that prevents the shaft from entering the driver's compartment in the event of impact. Each kit includes a quick release steering hub, a precision needle bearing U-joint and complete installation instructions. Use with Competition Engineering's

Steering Column Kit MOC5074

Steering Universal Joint

Pre-loaded bearing surfaces eliminate sloppy backlash to provide positive steering control. Un-splined, fits steering columns with 3/4" OD shafts. 1-1/4" OD.

Power Steering Hose Kit

Finish your Tru Trac or V-Trac installation the right way with a premium Billet Specialties hose kit. We take the guesswork out of power steering hoses to save you time and money. Each kit is supplied with enough adapters to cover most popular GM boxes and Ford type racks. Quality fittings and hose from Russell Performance are used exclusively to ensure reliability.
 Applications:
 • 1965-78 GM 800 Steering Gear Box (Metric & SAE)
 • 1974-77 Mustang II Rack & Pinion
 • CPP GM 500 Steering Gear Box
 • GM Rack & Pinion
 • Flaming River Rack & Pinion
 • Dodge Omni Rack & Pinion
Power Steering Hose Kit BS7900

2GPM Flow Control Valve

Billet specialties power steering pumps exceed recommended "flow" for Ford and some GM power steering racks. This may cause excessive heat or frothing of power steering fluid. The use of this flow control valve will correctly reduce flow to the OEM spec of 2GPM. These are recommended when using a Billet Specialties Power Steering Tru-Trac system or new GM style pump.

Flow Control Valve BSRP1300

1967-70 Mustang Power Steering

Flaming River now manufactures the power steering cylinder and control valve assembly for the Classic Mustang 1967-70. Like all Flaming River products, this is an all-new product and it is made to the original specifications. Minimum pump pressure at 465RPM is 665 psi and .88 GPM. System will not operate correctly without correct pump performance. Hoses/Pump not included.

Right Hand Drive Power Rack & Pinion

****SPECIAL ORDER ONLY****

Made of all new components, including a new valve and piston, this Power Rack and Pinion is now designed for Right Hand Drive vehicles. As custom cars have become more popular around the world, we have had increasing interest in Rack and Pinions for custom Right Hand Drive applications. The most exciting aspect of the new RHD Power program is that it is not limited by core availability, since Flaming River Rack and Pinions are all new, and never rebuilt.

- All new components - Including valve, piston, seals, bearings and bushings, and pinion and rack gears
- Stronger rack shaft - almost 1 inch diameter
- More than 6 inches of travel for full turning radius
- Sleek, attractive powdercoated design
- Universal, precision 6061 aluminium, billet mounting
- Billet finned housing provides heat reduction

Billet Power Steering Reservoir

Billet P/S tank is constructed from 6061-T6 aluminium. The double O-ring sealed breathable cap relieves negative and positive pressure. With Aeroflow's pioneering internal tube you can forget about fluid and foaming turbulence. Our high-class bracket design clamps to the reservoir with an inner lock. Includes male AN fittings on the bottom of the reservoir. O.D. 73mm (2-7/8"). Height 222mm (8-3/4"). Holds 440ml (15 oz) of fluid.

LS Series Fabricated Power Steering Tanks

Aeroflow Power Steering Reservoir tanks suits all LS engines and most V6 engines from late VT to VE, Pontiac GTO, G8. -6 ORB & -10 ORB fittings included. Designed to fit factory position.

NOTE: Barb sizes 9.52mm (3/8") and 15.8mm (5/8")

Fabricated Square Power Steering Reservoir

Aeroflow's square fabricated aluminium power steering tank with integral mounting bracket holds 810ml (27oz) of fluid. It is baffled and comes with 38.1mm (1-1/2") billet cap. Removable -10ORB and -6ORB to barb fittings are included. ORB to AN fittings available separately for custom plumbing applications. Length 85mm (3-11/32") x Width 85mm (3-11/32") x Height 120mm (4-3/4").
NOTE: Barb sizes 9.52mm (3/8") and 19mm (3/4")

Fabricated Power Steering Reservoir

Aeroflow's fabricated P/S tanks come with our Billet 50.8mm (2") cap and holds 650ml (22oz) of fluid. These professionally constructed tanks come either highly polished or in a black anodised finish. On the return side of the tanks we have incorporated a restrictor to prevent aeration. Fluid level must be above return line. Height 203mm (8"). Diameter 76mm (3"). -8 AN feed (bottom).

-6 AN return (side). M8 x 1.25mm mounting bungs 80mm centres.

Fabricated Power Steering Tank

Aeroflow's fabricated P/S tanks come with our Billet 38.1mm (1-1/2") I.D cap and holds 660ml (22.5oz) of fluid. These professionally constructed tanks are available polished or anodised black finishes. The internal construction features a smart design baffle to prevent aeration. Fabricated from 5051 aluminium and incorporate -8AN return and -10AN feed male fittings. Tank overall height is 190mm (7-1/2") and tank width is 80mm (3-1/8"). 2 x M8x1.25 female mounting bungs.

POWER STEERING FLUID

Power Steering Fluid

- Anti-wear additives protect pump & increase performance
- Special additives reduce fluid aeration during pump use
- Oil stability reduces heat in the power steering system
- Corrosion inhibitors & detergent additives minimize oxidation & development of sludge & gum

For use with all power steering applications.

Description	Part #
1 Quart	AFC36901

REDLINE POWER STEERING FLUID

- RED LINE POWER STEERING FLUID satisfies the service fill requirements of most auto manufacturers and can be used where the manufacturer calls for any automatic transmission fluid such as Dexron, Dexron II-D, II-E, or Dexron III.
- Improved wear protection, resists thermal breakdown, evaporation and foaming
 - Provides continued high pump output, suitable for most power steering units
 - Lightweight fluid avoids power losses
 - 50% greater high-temp viscosity and 1/5 of the high-temp evaporation
 - Greater heat resistance helps to prevent boil-over
 - Helps to prevent high-temp steering fade and difficult effort steering at low temps
 - Compatible with petroleum and synthetics
 - 1/4 of the oxidation of petroleum power steering fluids
 - Helps prevent leakage and squealing

Description	Part No.
Power Steering Fluid 1 Quart (946 ml) (Alternative To Most Dexron & Type F & Mercon Fluids)	RED30404

POWER STEERING COOLERS

COMPACT POWER STEERING / FUEL COOLER

his Aeroflow Performance compact fluid cooler is great for those wanting to keep your fuel or power steering fluids down in temperature under extreme conditions. These coolers feature 12.70mm (1/2") copper tubing expanded into aluminium cooling fins with extruded plastic cooling fin guards. This small 2 pass fluid cooler is great for those with minimal room and the two -6AN fittings on the end allow for universal plumbing applications. Finished in a black powder coat for long lasting durability.

AF72-6010	Length: 206mm (8-7/8") Width: 70mm (2-5/8") Thickness: 48mm (1-3/4")

LARGE POWER STEERING / FUEL COOLER

This Aeroflow Performance large fluid cooler is great for those wanting to keep your fuel or power steering fluids down in temperature under extreme conditions with high demanding applications. These coolers feature 12.70mm (1/2") copper tubing expanded into aluminium cooling fins with extruded plastic cooling fin guards. This 4 pass fluid cooler is great for those wanting optimal cooling capacity for their auxiliary fluids such as power steering. The two -6AN fittings on the end allow for universal plumbing applications. Finished in a black powder coat for long lasting durability.

Single Needle Bearing Universal Joints

BORGESON u-joints are machined on state of the art CNC equipment from solid billet steel, stainless steel or aluminium. Any of our 4 Double D (a round shaft with two flats) sizes, 14 different spline size yokes, and the '94 and later Mustang "V" style can be combined to mate components from many different manufacturers. They operate at angles up to 35°. For example, with our components, you could easily connect a GM column to a new Mustang rack and pinion or a Ford column to a Saginaw box. Similar to OEM u-joints, the stacked needle bearing caps prevent loosening and adjustment malfunction.

Double Needle Bearing Universal Joints

Angles over 35° can be negotiated by using a BORGESON double universal joint. Available in steel, stainless steel and aluminium, these doubles accommodate angles up to 70° and are available in all spline and DD configurations.

Tech Tip: Because a double joint used in combination with a single joint will function the same as a three joint system, a shaft support bearing is required to prevent the shaft from "looping" and binding.

Spline X Spline

Steel	Stainless Steel	Polished Stainless	Description

Vibration Reducer/U-Joint Combination

The vibration reducer/u-joint combination (VJ) comes with a 9/16"-26, 5/8"-36, 3/4"-30, 3/4"-36, or 3/4"-DD coupler end and any spline or DD size on the u-joint end of the VJ. The VJ is also available in stainless steel with the same coupler options as steel and any spline or DD size on the u-joint end. Polished stainless is available as an option.

BOR034952	BOR154952	BOR164952	3/4 DD x 1 DD

CAUTION: Shaft Size

BORGESON DOES NOT RECOMMEND USING LESS THAN 3/4" DIAMETER SHAFTS

All Borgeson spline and DD shafts are 3/4" diameter. We will not sell a shaft with a smaller diameter due to safety considerations. A 5/8" shaft is 42% weaker than a 3/4" shaft and can be twisted with a 14" steering wheel.

Angle of U-joint Operation

The BORGESON 16 series u-joints will operate smoothly up to 35°. The 16 series double u-joints will operate smoothly up to 70°. The u-joints must not be altered in any way. Pin and block style u-joints will operate at 30° smoothly.

U-Joint Orientation

When two joints are used on a shaft, the forks of the yokes closest to each other should be in line, or "in phase." Premature wear or binding can result if the u-joints are not phased properly. If the u-joints are at a severe angle, even if they are phased correctly, a hard spot in the steering may occur for no apparent reason. If this happens, index the u-joints two or three splines in one direction. The hard spot should disappear or be minimized.

CORRECT PHASING

INCORRECT PHASING

Popular Splines And Double D Applications

All Measurements can be ± .015". Precision measuring equipment should be used.

*The 636C is not interchangeable with 636. **Ideal application for our aluminum and polished S.S. Joints. *** Please note: Ford intermediate shafts use a single "D" and two "Double D" configurations. We currently do not offer the single "D" or the tapered "Double D."

Steering Shaft Styles

Splined & Double D Shaft

We recommend splined and double D shafting as it is a simple and safe method of attaching your steering components. Splined shaft is available if phasing needs to be slightly adjusted giving you the ability to easily index or rotate aim small increments. We offer splined shafts and 3/4" double D shafts in steel and stainless steel and aluminium splined shafts to match the u-joints you will be using.

Steel 3/4" Splined

Shafts are splined 2" on both ends. They are available in 2" increments from 2" to 36". Each end can be trimmed up to 1" for an exact fit. Steel 3/4" round shafts that are splined on one end only are available in 5", 16", and 36" lengths.

Steel Double D

Shafts are available in 18" and 36" lengths only. They are easy to trim to get an exact fit.

Stainless Steel 3/4"

Splined Shafts are available in 1/4" increments from 3" to 24" lengths, with 7/8" of spline on each end. Custom length stainless shafting is also available with 7/8" spline on each end, polished or unpolished.

Stainless Steel Double D

Shafts are available in 22" and 36" lengths. All stainless shafting is available polished or unpolished. Aluminium 3/4" Splined Shafts have 2" of spline on each end and come in 2" increments from 4" to 36". Aluminium DD shafts are not available.

N/A	BOR419422	BOR429422	3/4 DD x 22" Long

Steering Shaft Support Bearings

If more than two joints are used in a steering system, a support bearing must be used to prevent "looping" and binding. Use of a vibration reducer and two u-joints will also call for a support bearing to be used. The support must be mounted to the frame, not to a sheet metal section of the body. Sheet metal will not withstand the stresses. The shaft should fit easily through the support with no binding. A system with a double u-joint and a single u-joint has three flex points and will require a support bearing. Note: all support bearings work with round or DD shafting

Rod End Bearings

Rod end bearings with a 3/4" hole size are commonly used for supports. Rod end bearings are supplied with two jam nuts for mounting. They are available in steel, stainless steel and polished stainless steel.

Billet Support Bearings

All billet supports accommodate a 3/4" shaft. Our standard supports are 2-1/2" long with two threaded holes in the end for mounting and are available in steel, aluminium, polished aluminium, stainless steel, and polished stainless steel. The 6" steel support is also available, which can be cut at any angle for a perfect fit. The 6" steel support has no mounting holes and must be welded in.

Couplers & Adapters

A u-joint can sometimes be eliminated by using a 2" straight extension, called a coupler, to extend either the steering box, R&P shaft or the column shaft. The coupler can be welded and/or pinned to the unsplined end of a shaft. We offer shafts that are splined only on one end in 3 lengths: 5", 16" and 36". The 1"-48 and 1" DD couplers have a 1-1/4" hole that will accept either an adapter to reduce inside diameter to 3/4" smooth or another splined or 3/4" DD coupler. The coupler assembly would have to be pinned and/or welded together. Welding the coupler is acceptable because there are no moving parts to damage, and the coupler's steel is less susceptible to heat damage from welding. As an alternative, you can use a Vibration Reducer as a coupler to extend a short shaft, since the VR now comes with female ends to fit many popular applications. Couplers are available in the same spline and Double D sizes as our u-joints. Couplers and adapters are available in steel and stainless steel. Aluminium couplers and adapters are not available.

BORGESON Rubber Coupling/Rag Joints

On some factory applications, a flexible coupling was used to attach the column to the steering box when there was perfect alignment. If the original column or box is changed, the stock coupling may not work. If a conversion from a long input steering box to a short input with an aftermarket column is done, a flexible coupling needs to be added. Flexible couplings are only available in steel.

Stainless Steel Uni-Joints

Flaming River now introduces a new Stainless Steel Universal Joint series. Not all stainless steel universal joints are the same. We have carefully selected 303 Stainless Steel for its strength, superior corrosion resistance and shine. Our stainless steel universal joints have such a precision machined finish that they look pretty right out of the box. Add some polishing and they are gorgeous!

Shaft / Spline	Shaft / Spline	Part No.
3/4" DD	9/16"-26	FR2509DD

Vibration Resistors

Vibration Resistor U-Joints utilize a bushing system of thermal plastic rubber to absorb vibration or "road feel" from the steering system. This unique load absorbing material is resistant to oil, salt and weather conditions. Overall length is 4-3/4". Bushing side of u-joint is either 3/4 DD or 3/4 -36. Virtually all applications are available.

3/4" Smooth	5/8"-36	FR1904
9/16"-26	3/4"-36	FR1905

Low Profile Racing Uni-Joints

Flaming River has designed and manufactured a new chromemoly low profile, needle bearing universal joint. This universal joint has a reduced diameter for applications where clearance and weight are primary concerns. These needle bearing universal joints will outlast pin and block universal joints in racing applications and do not require lubrication. The strength rating is 300+ foot lbs.

Shaft / Spline	Shaft / Spline	Part No.

3/4" Smooth	3/4" Smooth	FR1916
3/4" Smooth	9/16"-26	FR1917

Mil-Specification Uni Joints

These universal joints are manufactured to military specifications for aircraft and have become the select choice of drag racers due to the lightweight design. Lubricant-filled silicone boot provides maintenance-free operation for extended universal joint life. This boot is designed for high temperature environments with a continuous rating of 340°C. NOTE: Total Vehicle and driver weight not to exceed 1500 kg. Not for circle track, street or highway use.

Stainless Steel Shafts

Flaming River offers a complimentary line of stainless steel shafts manufactured from high quality 303 stainless. This is one of the best alloys of stainless steel for strength, corrosion resistance and shine. Splined shafts have two inches of spline that can be easily trimmed one inch per side. DD shafts are available in three lengths which you can cut to size.

Plated Steel Shafts

Manufactured using a pre-ground alloy steel for strength and cosmetics. Splined shafts are available with electroless nickel plating for corrosion resistance. Shafts are manufactured in 2" increments and splined 2 inches on each side. This allows for up to 2" of total trim.

Length	Spline	Finish	Part No.
24"	3/4"-36	Plated Steel	FR1871-24PL
36"	3/4"-36	Plated Steel	FR1871-36PL

Shaft Support Bearings

Whenever a steering system contains either three joints, a double universal joint or vibration dampener, a support bearing is necessary. The support bearing can be used with either splined or DD shafts.

Description	Part No.
Support Bearing, 3/4" ID - Zinc Plated	FR1810
Support Bearing, 3/4" ID - Stainless	FR1811
Support Bearing, 3/4" ID - Polished Stainless	FR1811PL

Frame Mount Shaft Support Bearings

Frame Mount Support Bearing Kit features a bracket that allows for easy mounting of the support bearing. Slotted for adjustability. Angled or Straight. The support bearing can be used with either splined or DD shafts.

Description	Part No.
Support Bearing, 3/4" ID, Angled Bracket	FR1810KA
Support Bearing, 3/4" ID, Angled Bracket - Chrome	FR1810KAC
Support Bearing, 3/4" ID, Straight Bracket	FR1810KS
Support Bearing, 3/4" ID, Straight Bracket - Chrome	FR1810KSC

Steering Universal Joints

Pre-loaded bearing surfaces eliminate sloppy backlash to provide positive steering control. Un-splined, fits steering columns with 5/8" or 3/4" OD shafts. 1-1/4" OD.

Description	Part No.
3/4" Shaft to 3/4" Shaft	MO80110
5/8" Shaft to 5/8" Shaft	MO80120
5/8" Shaft to 9/16"-26 Spline	MO80130

AFCO Uni-Joints

These splined uni-joints are forged from 1045 steel and heat treated. They feature greased needle bearings with Teflon seal and a set screw with lock nut.

Spline	Description	Part No.
3/4"-36 x 3/4"-36	GM STD & Pinto P/Steer	AFC30305
1"-48 x 3/4"-36	Street Rod/OEM	AFC30312
1" DD x 3/4"-36	Street Rod	AFC30313

Splined Coupler

This splined coupler is forged from 1045 steel and heat treated. It features a set screw with lock nut.

3/4"-36 x 3/4"-36	AFC30315
GM STD & Pinto P/Steer	

Shaft Support

This self aligning steering shaft support bearing is suitable for firewall or engine plate mounting and features a .757" bore for use with 3/4" shafts.

Steering Shaft Support Bearing (.757" Bore)	AFC30321

COLUMN MOUNTS

IDIDIT Column Drops

Underdash Mounts are designed for several different applications from a '65 Ford Truck, '69 or new GM car or even your '32 Ford. For the swinger style drops the underdash nuts & bolts are included.

Each swinger drop has two screws on either side that when unscrewed will detach the lower half of the mount to slide your column through. They have been buffed so well that there is no noticeable gap between the two pieces! Each piece was manufactured in the United States by ididit.

Description	Part No.
3 1/2" Drop - Polished Aluminium 2" Hole	ID2303370040
5 1/2" Drop - Polished Aluminium 2" Hole	ID2305370040

STEERING COLUMNS

36" Straight Old School Floor Shift Steering Column

ididit's Old School straight column is our do-it-yourself column. This is the economical choice if you are looking for that special, custom fit for your hot rod. This small, sleek, uniquely designed column comes as a standard length of 36" but, you can cut it down with ease to any length desired (as short as 6"). The head and tubing are made from a mild steel or stainless steel material and can be cut with a saw or cutoff wheel. Bolt your favorite 3-bolt wheel directly onto the column, no adapter required! Available in paintable steel or polished stainless steel. Secure your column with our column drop and floor mount that are specially designed for this unique column. Need a horn? A do-it-yourself horn kit is available for your honking needs.

Paintable Steel ID1012360010

Steel or Chrome Tilt

This column has become an industry standard. While it is not the most expensive column, this column is by far the most popular. The steel tilt column offers the added comfort of tilt as well as self-cancelling turn signals, four-way flashers, and a standard dress-up kit. For extra eye appeal, you can order your steel tilt column in a chrome-plated finish. Available in LHD or RHD models.

• Tube Diameter: 2" • 8-Position Tilt • Output Shaft: 1"DD

Touch-N-Go Keyless Ignition System

Get the most advanced keyless ignition technology at the tip of your finger, with the Touch-N-Go Start keyless ignition system for your ididit steering column. This is the industry's FIRST touch sensitive start system and features a 22mm aluminum button (25mm with column mount) with multi-color interactive LED lights that always let you know what mode it's in. There are no moving components to wear out, ensuring years of outstanding performance.

You'll never have to use your keys again! This system can be used as a simple start button system or you can utilize more advance functions, such as keyless entry. Just stick your programmable key fob in your pocket or wallet and the system will sense your approach, automatically unlocking your door as you get close and locking it up as you leave (the system only responds when the key fob is in range). For added safety, this system can also be programmed to turn on your dome lights as you approach.

- Automatically starts your car with the simple touch of a button.
- Kit comes with 2 key fobs with up to 4 programmable channels.
- Comes with a control box small enough to fit just about anywhere.
- The antenna has a proximity range of 2 to 15 ft. (When selecting the antenna placement it is important to place it near the windows so the doors or sheetmetal will not interrupt the signal)
- 22mm dash mount or 25mm column mount aluminum touch button with interactive LED display is fully customizable, with multiple colors to choose from. LED lights can be dimmed.
- Made as a direct replacement for standard keyed ignitions, this unit simulates the five common GM ignition positions: off, accessory, on, crank, and run.
- First touch simulates "Accessory" (turns on your radio and other accessories)
- Second touch simulates "On" (activates ignition circuit; fuel pump or engine computer)
- Third touch, while pressing brake pedal simulates "Crank" (engages the starter and starts the vehicle)
- Three rapid touches in a row will shut off the system and engine
- For added security, this kit comes with a built-in valet switch allowing you to override the key fob system. In the event of a dead key fob battery, the switch can be turned on to allow the Touch-N-Go system to deactivate the security, allowing the user to operate the system manually.
- No moving components to wear out.
- No internal relays. Uses Mosfet Technology.
- Made in the USA

Description Available with most ididit tilt steering columns, or replace your stock in-dash ignition with the Touch-N-Go Start System.

1940 FORD Column

Flaming River has introduced steering columns for the popular 1940 Ford, plus other street rods desiring the period "retro" look. The column is based upon the classic stainless steel Flaming River roadster column. The upper end shaft uses a keyed 3/4" steering shaft to accept the original Ford steering wheel's keyway design or a splined shaft for use with aftermarket reproduction '40 Ford-style wheels. The laser-crafted column uses all-new components including wiring harness, featuring either a 1-1/2" or 1-3/4" stainless steel tube below the CNC-machined cast stainless steel bell to further enhance the retro feel of the wheel/column combination. The column uses a modern, self-cancelling turn signal stalk and a hazard-warning switch. The columns are available in either polished or mill finish (paintable) versions, and use a 3/4"-36 splined output shaft.

LIMEWORKS FORTY & BANJO STYLE STEERING COLUMN

Our early Forty Ford style columns feature a spun stainless steel top on a high quality Limeworks column. That means super smooth bearings at both ends of a unpolished 1-3/4" stainless steel tube with a smooth quality finish for miles of trouble free use. Taper and key fitment, just like a stock Forty Ford, so you can use an original Ford wheel or any appropriate reproduction. At the other end, there's a 3/4"-36 spline that'll accept any aftermarket universal joint. Wiring for horn is standard on this column. Comes in 30" or 33" overall shaft length

SPIRAL CORD BUTTON

The Bang Shift universal spiral cord button is ideal for activating a trans-brake, a line lock or launch control, nitrous system or any other accessory requiring momentary power. The spiral cord section is great to reach tricky spots in the car or provide extra slack when fitted to a steering wheel. Both a momentary button and a ON/OFF button is available depending on application. The switch is powered via 12 volts and rated for up to 10-amp duty.

- Dish depth: 4".
- This steering wheel is compatible with all 3-bolt steering wheel hub kits on the market.
- Hub adapter and horn button kit sold separately.

UP110794

What's a Billet Half Wrap Steering Wheel?

Each Billet Specialties steering wheel is 14 inches in diameter (Some designs also available in 15-1/2" diameter) and on the back side of each steering wheel are milled and polished finger notches added for comfort. The front half of each Billet Specialties Half Wrap steering wheel is covered with your choice of leather, simulated carbon fiber or simulated burl wood. Countersunk screws hold the half wrap to the wheel from the backside (a half wrap is required for use with Billet Specialties steering wheels). Because Billet Specialties' steering wheel components are sold separately, you can mix and match your choice of Steering Wheel, Half Wrap, Horn Button, and Adapter to best fit your needs. Solid billet steering wheels also feature milled and polished finger notches but do not use a half wrap. Order horn button, adapter, and leather ring separately.

Classic 4-Hole Spoke

15-inch Steering Wheels

All vinyl grip, not foam, available in black or white featuring three 4-hole spokes. These steering wheels follow the same level of quality set by the California METAL FLAKE Steering Wheels also by MOONEYES. They feature mirror like chrome plate finish on the front and back of the wheel and spokes after the metal is smooth and polished to maximize shine. Available in 15" diameter wheels. The "cone size" of the steering wheel is how far it measures from the base of the steering wheel, e.g. the adapter hub where it's mounted on the steering column. These steering wheels measure approximately 3.5 inches (9cm).

- Diameter 15"
- Dish 3-1/2"

Bowtie High Performance Electric Fans

These fans help prevent overheating in stop-and-go traffic. Designed to fit the most popular cars and trucks they increase fuel economy, improve engine performance, free the waterpump pulley for more RPM, and installs easily within minutes using simple hand tools. The 10", 12", 14", and 16" fans are reversible and ultra-thin to fit cramped locations. Reinforced glass filled polypropylene blade and plastic housing for minimized weight. Nylon tie mounting kit included. Each fan features the popular Chevy Bowtie Emblem in red.

Davies Craig Electric Fans

Davies, Craig are pioneers of Thematic Electric Fans in Australia and have been designing and manufacturing top quality products for more than 35 years. With multiple uses for primary and supplemental add-on cooling, electric fans are quickly becoming one of the most important cooling components on today's vehicles. Davies, Craig Thematic fans are also very versatile for many other applications including refrigeration, air circulation and extraction systems demanding reliability and durability. Available in a variety of sizes from 8" through to 16" with sealed motors of outstanding quality there is a Davies, Craig thematic fan to suit all applications.

- Economical replacement for failed original parts
- 5-10% increase in engine power and fuel economy over conventional fans
- Reversible blades for upstream and downstream applications
- Compatibility with all electric fan controls
- Constant airflow regardless of vehicle speed

FAN CONTROLLERS

ELECTRIC FAN CONTROLLER

Adjustable electric fan temperature controller also allows you to monitor voltage, oil and water temperatures. Digital LED display.

Part No	Description
AF49-1029	Adjustable electric fan controller
AF59-1029	Replacement probe sensor

Thermatic Fan Switch

This mechanical switch is located next to the radiator and a copper probe is mounted inside the radiator hose to detect the cooling system temperature. The thermal switch is adjustable from 80°C to 115°C and is connected to the ignition circuit for operation. The kit contains the thermal switch, mounting bracket a length of wire connectors and a rubber seal. This switch is suitable for operation with 12 and 24 Volt systems.

Thermatic Fan Switch DC0401

Electronic Thermal Switch

This switch is provided with a probe to be mounted on the face of the radiator core to detect the temperature of incoming air. The thermal switch is adjustable from 40°C to 99°C and can be operated both thermally and also when the air conditioner is running.

The kit contains the thermal switch/relay, mounting hardware, electric wiring, connectors and probe. This switch is only suitable for 12 Volts operation.

Electronic Thermal Switch DC0402

Thermal Switch and Relay

This kit is the same as DC0401 but includes an additional relay and wiring harness which will allow operation both thermally and when the air conditioner is running.

This switch is only suitable for 12 Volts operation.

Thermal Switch and Relay DC0404

DIGITAL THERMATIC FAN SWITCH KIT

Our very own designed Digital Thermatic Fan Switch Kit can be used with our Thermatic Fans, EWP's and competitors Fans. It senses air temperature as it passes through the radiator with the sensor placed in the radiator fin section so no need to cut hoses. It has an adjustable temperature range of 40°C to 110°C (104°F to 230°F) and can show Centigrade or Fahrenheit. Temp is set by pressing the set button. It can run 1 or 2 fans. The second fan (if applicable) will start 10 seconds after Fan #1 runs. It operated thermally & also when the air conditioning is in operation.

Max voltage: 15V Max current: 50A Relay setup: Dual relay Speed: Single speed - 10 sec. delay to start up the second fan Applications: Suitable for single and dual fan applications Temperature Display: LED digital temp display + actual temp + set temp Temp Display: Centigrade + Fahrenheit Temp settings: 40°C to 110°C (104°F to 230°F) Temp setting: Push Button Circuit type: Pre-programmed micro controller Output wires: Batt + Batt - IGN, AC Clutch, Fan #1, Fan #2 Thermistor Probe Dimensions: 95x65x56 mm

DIGITAL THERMATIC FAN SWITCH KIT (12V ONLY) DC0444

Adjustable Electric Fan Thermostat Kit

Designed to allow a wide range of temperature adjustments for your electric fan. A bulb at the end of the capillary tube is inserted in the fins or attached to the top or hottest portion of the radiator. Use the adjustment knob to set a precise temperature desired for fan activation. The strong brushed stainless steel mounting bracket looks great. Complete kit includes thermostat, bracket, 30 amp relay, 30 amp circuit breaker for overall protection, wiring, terminals and hardware. Note: Temperature refers to the temp of the capillary tube, not the coolant temp. Temp range - 32°F to 248°F (-35°C to 120°C).

Adjustable Thermostat Kit with Relay PW30104
Adjustable Thermostat Kit without Relay PW30112

PWM Fan Controller

with push in probe

This controller monitors your engine temperature via the cool side of the radiator, therefore providing a more accurate reading for your cooling system. Using Soft Start Technology, fans ramp up slowly which eliminates harmful AMP spikes. The unit will continuously monitor your engine's temperature and operate the fans at the optimum fan rate as needed between 1 to 100%. The net result; the electric fans often only run between 40-60% to keep your engine cool. Additional benefits include, reduced fan speeds which means reduced fan noise, which tends to compete with that sweet sound of your engine!

This multi-fan controller has a built-in A/C Over-ride circuit and is designed to control as many 12 volt brushed electric fans as desired, up to 65 Amps combined. Even better, installation and calibration is a snap. It simply wires in-between your vehicles battery and electric fans; adding in a simple multi-meter and a twist of the temp adjuster, allows you to program the temperature to maximize your car's cooling system.

Part No: DP16795

SINGLE FAN CONTROLLER

- Adjustable fan activation range from 150°F-140°F
- Turn-off temperatures preset at 10°F below activation settings
- Finned, die-cast aluminium housing with bright finish
- Interchangeable probe design available in both push in radiator probe & 3/8" NPT thread in probe
- Includes automatic resetting circuit breaker
- Air conditioning override circuit built-in
- Includes complete installation kit with illustrated wiring & mounting instructions

Part No. Description
DP16778 Push-in radiator probe, Single fan controller
DP16779 3/8" NPT Thread-in probe, Single fan controller
MAXIMUM CAPACITY: Single fan - 35 Amps per fan

DUAL FAN CONTROLLER

- Adjustable fan activation range from 150°F-140°F
- Activate fan #1 at desired temperature
- Activates fan #2 at temperature 10°F warmer than fan #1
- Turn-off temperatures preset at 10°F below activation settings
- Finned, die-cast aluminium housing with bright finish
- Interchangeable probe design available in both push in radiator probe & 3/8" NPT thread in probe
- Includes automatic resetting circuit breaker
- Air conditioning override circuit built-in
- Includes complete installation kit with illustrated wiring & mounting instructions

MAXIMUM CAPACITY: Two fans - 35 Amps per fan

Part No. Description
DP16788 Push-in radiator probe, Dual fan controller
DP16789 3/8" NPT Thread-in probe, Dual fan controller

ELECTRONIC FAN CONTROLLER WITH BLUETOOTH CONTROL

The PAC-2800BT was designed for the ultimate in flexibility and to be a simple add-on in any application using an electric fan. Included is a 70amp relay, enough for even the most power hungry of cooling fans. Fully programmable, the PAC-2800BT will work with your existing water temp gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temp gauge. OBD II compatible vehicles can obtain the engine temperature from the ECM with the use of a BIM-01-2 (or previous BIM-01-1), purchased separately.

- Compatible with single fan, dual fan or single two-speed fan applications.
- 70A relay included, additional available separately; RLY-1(0-30 amp) or RLY-3 (0-70 amp)**.
- User-settable on and off temperatures.**
- Key-off run time adjustable from 0-5 minutes.
- Works with many stock temp gauge/ senders.
- Can be directly connected to a Dakota Digital plastic-control box instrument system.***
- Temperature and vehicle speed data transferred with one connection!
- Connection allows adjustable highway-speed fan shut off.
- OBD-II compatible (with purchase of BIM-01-2).
- Dedicated temp sender available.
- Bluetooth enabled for use with mobile programming/ setup app.
- LED readout for simple programming.

DAKPAC-2800PT

Adjustable Fan Controllers

Made for Derales electric fans but works great on any 12-volt fan. This fan control is a thermostatic controlled and adjustable to turn on and off your fan. It's adjustable in the range of 150 to 240 degrees. Cool deal here is this has a 3/8" male pipe thread probe that can be screwed in a intake manifold water port, cylinder head water jacket or with a tee pipe fitting can even be used in a heater hose.

- Adjustable fan activation range from 150°F to 240°F
- Turn-off temperature preset at 10°F below
- Interchangeable probe design available in both push-in radiator probe and 3/8" NPT thread-in probe
- Heavy duty 40/60 amp relay
- Air conditioning override circuit built-in
- Max capacity: 25 amps

Part No Description
DP16749 3/8" NPT Thread-In Probe
DP16759 Push-In Radiator Probe

ADJUSTABLE ELECTRIC FAN CONTROLLER

Turn your electric fan into a thermostat-controlled fan! PROFORM's premium adjustable fan controller make this easy! The thread-in probe can be installed directly into the water jacket of the intake manifold, engine block, or cylinder head or alternatively a push-in probe can be installed between the fins of the radiator. Fan activation is adjustable between 150-240 degrees F. This fan controller is recommended for race and street applications.

- Adjustable 150-240-degree range
- 3/8" NPT Thread-in Probe Sensor (PR69598)
- Push-in probe sensor (PR69599)
- Made from High-Quality Stainless Steel
- Complete with Band Clamp for Accurate Adjustment
- Patented and sold each
- Complete with Band Clamp for Accurate Adjustment

Description Part No.
3/8" NPT Thread-in Probe Sensor kit PR69598
Push-in probe sensor Kit PR69599

SWITCHES ADAPTERS & RELAYS

Fan Relay

AF49-1006 Fan Relay With Thermostat
On 85°C (185°F)
Off at 76°C (169°F) (3/8"NPT)
NOTE: - Relay to be used with 30 amp fuse (Fuse not supplied).

Dual Fan Relay

Aeroflow's Performance dual fan relay and wiring harness kit is essential with an twin electric fan setup. This universal kit will prevent voltage drops and amperage overloads which can cause havoc to your electrical system. It includes 2 automotive 12 volt 40 amp relays, 2 30 amp circuit breaker, all crimp fittings and a prewired relay blocks for ease of installation.

AF49-1048

FAN ACTIVATION SWITCH

Aeroflow Performance thermal temperature switch is designed to allow your electric fan to turn on and turn off at the present temperature of 79.5°C (175°F).

This bi-metal temperature switch has a 1/8" NPT universal thread to fit multiple applications. Perfect for use with the inline barb adapters with 1/8" port, available in a range of sizes from 32mm (1-1/4") to 38mm (1-1/2").

AF59-6010 Fan activation switch
AF59-6001 Plug wire loom

TEMPERATURE PROBE ADAPTERS

Adapts mechanical temperature (5/8"-18 UNF) probe to NPT holes.

NPT	Blue	Black	Silver
3/8"	AF660-06	AF660-06BLK	AF660-06S
1/2"	AF660-08	AF660-08BLK	AF660-08S

Inline Fluid Thermostat

This -6 -8 & -10AN 180°F in-line fluid thermostat, has an attractive blue anodized finish and features a swivel housing which allows for a clean and professional installation. 180°F preset turn-on temperature Turn-off temperature is preset at 165°F Male & Female -6 -8 & -10 Inlets Anodized aluminium swivel housing allowing precise positioning of thermostat. Rated at maximum 15 amp continuous draw

Part No. Size
DP35020 -6 AN X -6AN
DP35021 -8 AN X -8AN
DP35022 -10AN X -10AN

REPLACEMENT PROBES

This replacement thread-in brass 3/8" NPT probe with thermostat sensor fits part number 16749.

Part No DP16750

In-Line Fan Control

Thermostat With -6AN Inlets

With a 180°F preset turn-on, 165°F turn-off, this -6AN x -6AN fluid control thermostat engages the fan on any remote cooler electric fan so that it comes on only when needed. Brass hose barb fittings included in kit. Maximum 15 amp capacity.

- thread size: -6AN male x -6AN female
- Fitting size: 3/8" barb •Turn-on temp: 180° F
- Turn-off temp: 165° F •Maximum amperage capacity: 15 amps

Part No. DP13021

RPC THERMO FAN SWITCH SENDER

Description Part No.
 Thermostat Switch Only, On/Off 200°/185° **RPCR3107**
 Thermostat Switch Only, On/Off 185°/170° **RPCR3108**

180°F FAN SWITCH THERMOSTAT

- Single stage fan control thermostat
- 180°F preset turn-on temperature
- 165°F preset turn-off temperature
- 15 amp maximum continuous draw rated
- 6-32" sensor thread size
- 1/8" NPT bushing included in package
- 3/8" NPT bushing included in package

DP16730

70 Amp Fan Relay Kit

This kit is designed for running high amp dual fans or monster fan set-ups.

70 Amp Fan Relay Kit PW30100

Fan-Thom Electric Fan Relay

Designed as inexpensive protection for your electric fan. Provides constant voltage, protects from voltage and amperage spikes and keeps fan from feeding back through the system. An absolute necessity if adding an on/off switch to your electric fan circuit.

Fan-Thom Electric Fan Relay PW30101

Fan-Thom II Fan Relay With Thermostat Protection

Don't want to probe your radiator? The Fan-Thom II comes with a threaded thermostat that screws into the engine block or manifold for a professional installation. Thermostat thread size: 3/8"-18NPTF fitting.

93°C On / 85°C Off (200°F On / 185°F Off) PW30102
85°C On / 77°C Off (185°F On / 170°F Off) PW30103
Replacement Thermostat for PW30102 PW30110
Replacement Thermostat for PW30103 PW30111

Thermostatic Fan Switches

Use as a replacement for the Fan-Thom 2 kits or for custom applications. Must be used with a relay.

93°C On / 85°C Off - 3/8"-18 NPT Thread PW30110
85°C On / 77°C Off - 3/8"-18 NPT Thread PW30111
96°C On / 88°C Off - M10x1.50 Thread(LS1) PW30113

GM GENIII Waterproof Fan Relay Kit

Weatherproof fan relay kit with 96°C on / 88°C off (205°F on / 190°F off) thermostat for GM Gen-III. M10 x1.5 thermostat thread size.

GM GENIII Waterproof Fan Relay Kit PW30127
Replacement Thermostat for PW30127 PW30113

MECHANICAL FANS

Molded Nylon Fans

These lightweight, 6-blade nylon fans are economical and very durable. Universal bolt pattern with a 5/8" pilot hole fits most 6 cylinder and V8 engines and works with the Mr. Gasket fan spacers.

Description Part No.
Nylon Fan - 14" Diameter RS-ALL30091
Nylon Fan - 15" Diameter RS-ALL30092
Nylon Fan - 16" Diameter RS-ALL30093
Nylon Fan - 17" Diameter RS-ALL30094
Nylon Fan - 18" Diameter RS-ALL30095

MECHANICAL FAN SPACERS

UNIVERSAL BILLET FAN SPACER KIT

Fits Holden, Ford and Chev 5/16"-24 bolts and reducer bushing for 5/8" or 3/4" water pump shaft.

Part No Description
AF64-3040 1" Billet spacer kit
AF64-3041 2" Billet spacer kit

MR GASKET FAN SPACER KITS

Designed for use with aftermarket fans, these aluminium spacers allow adjustment of fan-to-radiator clearance. With 4 elongated bolt holes and a 5/8" pilot they fit most 6 cylinder and V8 engines and work with the AllStar fans. Each kit includes spacer, washers and bolts.

Univesal 12" Spacer MG2391
Univesal 1" Spacer MG2392
Univesal 2" Spacer MG2393

RADIATORS

PWR Aluminium Radiators

PWR Performance Products specialise in and manufacture complete radiators and cores for race, street, drag or OEM replacement applications within the automotive industry. Our constant on track testing environment in fields like V8 Supercars, Sprintcars, Drag racing, Rally, Go-Karts and Motocross ensures that every customer receives the latest in R&D Development and race proven performance technology. All PWR radiators are manufactured by hand from our State of art facilities on the Gold Coast. PWR produce all product from Hi-grade Aluminium incorporating a unique wider tube configuration and revolutionary louvre fin design angle, which maximises the cooling efficiencies and disbursement of heat. With these characteristics each PWR radiator will deliver consistent durability, strength and performance for today's demands.

By Special Order Please call Rocket for Application and Pricing

AFCO RADIATORS

AFCO radiators allow your car to remain at a constant temperature, which means that power delivery is more consistent. Using years of experience, advanced design, and thorough testing, AFCO radiators are designed to promote optimal air flow and cooling by utilizing appropriate fin count, tube size, core thickness, and fin serration for each particular application.

- 100% aluminium construction (no epoxy)
- 100% TIG welded • 100% pressure-tested
- Filler necks feature screw-in bleed – won't crack or leak with age
- Suits Manual Trans or Automatic with External Cooler

Hot Rod & Muscle Car

AFCO Radiators are designed to provide maximum cooling efficiency by considering core size, flow characteristics of the design, fin density, tube size and core thickness of each design. As the result of our efforts, AFCO Radiators can cool the biggest of big blocks, even as they "lope" through the summer heat at the fairgrounds.

1965-66 Mustang with LH Outlet	AFC80276N

Universal / Racing Style

AFCO Standard Universal Fit Radiators are available in a wide range of sizes and inlet / outlet configurations. These radiators are built with two 1" rows for a total core thickness of 2-1/4" and feature 3" tanks. The "U channels" on the top and bottom provide numerous mounting options for fans and fan shrouds.

Part No.	Description
AFC80104N	21.5" x 13.25" LH Inlet, LH Outlet
AFC80100FN	22.0" x 19.0" RH Inlet, LH Outlet
AFC80100N	22.0" x 19.0" LH Inlet, RH Outlet

AFC80103N	26.0" x 19.0" LH Inlet, RH Outlet
AFC80101FN	27.5" x 19.0" RH Inlet, LH Outlet
AFC80101N	27.5" x 19.0" LH Inlet, RH Outlet
AFC80102FN	31.0" x 19.0" RH Inlet, LH Outlet
AFC80102N	31.0" x 19.0" LH Inlet, RH Outlet
AFC80108N	17.0" x 21.0" Universal, Dragster/Roadster

Universal / Racing Style – Double pass

Double pass radiators pass the fluid over the top half of the radiator and then the bottom half, giving the radiator the ability to dissipate heat twice.

Our exclusive 360 degree TIG-welded baffle splits the radiator core into two sections and assures that you won't have any coolant that has entered the radiator but never made it across the core.

Description	Part No.

27.5" x 19.0" RH Inlet, RH Outlet	AFC80101NDP
31.0" x 19.0" RH Inlet, RH Outlet	AFC80126N

Aluminium Radiators

Universal aluminium Chev or Ford radiators with mounting holes. Features aluminium construction with welded end tanks.

Description Part No.
Universal Chev Radiator - 23" Wide RPCR1020

UNIVERSAL ALLOY RADIATORS

Aeroflow Performance line of universal aluminium radiators makes it easy for budget-minded car builders to get a professional quality aluminium radiator. Constructed from aluminium, we braze the radiator assembly which minimizes metal fatigue and allows for maximum durability and performance. These universal radiators are available both single and dual pass designs.

The single-pass designs use one row of 1" wide aluminium tube across left to right or right to left of the radiator. Meaning coolant flows from inlet to outlet via rows of one tube. The single pass radiator is great for most street applications with stock or mildly modified engines. Single pass design radiators will have the inlet and outlets on opposite sides.

The double-pass design flows the coolant twice, once through the top half of the radiator then again in the bottom half of the radiator. This allows the coolant longer time in the airflow and lowering your coolant temperatures by 10-20 degrees compared to the single pass design. This makes it great street and race applications. Dual pass design radiators will have the inlet and outlets on the same side.

These universal radiators are not made for any one specific car and will require modifications to fit your application. All radiators do not have any mounting brackets, this means you can easily adapt our radiator to any application.

UNIVERSAL FORD RADIATOR

AF77-2050 26" x 19" x 3" DUAL PASS

AF77-2055 31" x 19" x 3" SINGLE PASS

AF77-2056 31" x 19" x 3" DUAL PASS

UNIVERSAL GM RADIATOR

AF77-2060 25" x 19" x 3" SINGLE PASS

AF77-2062 27" x 19" x 3" SINGLE PASS

VIB-8130-S 1928-48 Black steel kit

HEAT EXCHANGERS

UNIVERSAL SMALL

HEAT EXCHANGER

The Aeroflow Performance universal heat exchanger is a dual pass/single row design which allows the coolant to flow across the core of the heat exchanger two times before exiting the radiator for lowest outlet temperature possible. In a liquid-to-air intercooler system or a supercharger setup, the air is cooled by a liquid, typically water. These systems require a supplemental heat exchanger to cool the liquid running through the intercooler.

It is recommended this type of heat exchanger is front mounted and/or accessible to fresh-air-flow for optimal performance.

- Overall Dimensions (Tank end to tank end) 605mm
- Thickness 70mm • Height 200mm
- Core dimensions. Core width 535mm, Thickness 65mm, height 174mm • 4 x M8 x 1.25mm mounting points • 2 x -12ORB female inlet/outlet ports • Bleed port on top of end tank (1/8"NPT).

AF77-2048 Small universal heat exchanger

UNIVERSAL LARGE HEAT EXCHANGER

The Aeroflow Performance universal heat exchanger is a dual pass/single row design which allows the coolant to flow across the core of the heat exchanger two times before exiting the radiator for the lowest outlet temperature possible. In a liquid-to-air intercooler system or a supercharger setup, the air is cooled by liquid, typically water. These systems require a supplemental heat exchanger to cool the liquid running through the intercooler. It is recommended this type of heat exchanger is front mounted and/or accessible to fresh air flow for optimal performance.

- Overall Dimensions:
- Tank end to Tank end: 609mm - Height: 330mm
 - Core Width: 535mm - Core Height: 298mm
 - M8 x 1.25mm mounting bungs
 - 1/8" NPT bleed port on top end of tank

AF77-2049 Large universal heat exchanger

RADIATOR COOLANT ADDITIVES

STAY FROSTY High

Performance

- Ready-to-Use Premix High-Performance Engine Coolant
- Contains Wetting Agents for Better Cooling
- Non-Toxic Propylene Glycol Freeze Protection
- Reduces Cylinder Head Temps By Up To 25°F
- Maximizes Horsepower and Torque
- Protects all metals from corrosion electrolysis, including aluminum
- Prevents scales/deposits that reduce heat transfer

VP-FROSTY-H4 3.78L (1 gallon)

STAY FROSTY Race

Formulated for high-compression, high-heat racing engines. It contains a specialized blend of wetting agents that drastically improve coolant's ability to transfer heat away from high temperature cylinder heads. Temperatures of engines are reduced by up to 100°F compared to conventional glycol-based coolant.

- Ready-to-Use - Just Pour In
- Contains No Slippery/Hazardous Glycol
- Reduces Engine Temps By Up To 100°F
- 100% Water-Based Formula • Maximizes Horsepower and Torque
- No Freeze Protection - Maximum Cooling
- Non Toxic and Biodegradable
- Blended with Chemically Stable Reverse Osmosis Water

VP-FROSTY-R4 3.78L (1 gallon)

Cool Down

Reduces cooling system operating temperatures by up to 25°C. Works great in high-performance radiator systems, towing vehicles, and long idling applications. Reduces coolant surface tension, allowing better laminar coolant flow for better heat transfer. Lubricates without the crystallization of other coolant additives.

VP-COOL Cool Down - Treats 12L of water

REDLINE DIESEL

ENGINES WATER WETTER

- Designed for heavy-duty diesel engines which use more than 33% antifreeze or a supplemental corrosion package
- Similar properties and benefits to regular WaterWetter, but lacks rust and corrosion inhibitors
- Diesel road cars and light trucks (equipped with Cummins, Duramax, and PowerStroke engines) should use regular WaterWetter to ensure proper rust and corrosion protection
- Does not lower cooling system below the thermostatically-controlled temperature

Description
Water Wetter Additive 15 oz (443 ml)

Part No.
RED80213

REDLINE PETROL ENGINES

WATER WETTER

- Unique agent for cooling systems that doubles the wetting ability of water
- Rust and corrosion protection allows for use of straight water in racing or reduced antifreeze levels in warm climates
- Improves heat transfer and reduces cylinder head temperature
- Use one bottle for most passenger cars and light trucks, treats 3 to 5 gallons or 13.2 to 15.9 L
- Designed for use with all modern aluminum, cast iron, copper, brass and bronze cooling systems
- Cleans and lubricates water pump seals
- Does not lower cooling system below the thermostatically-controlled temperature

Description
Water Wetter Additive 12 oz (354 ml)
Water Wetter Additive ½ Gallon (1.90 Liters)

Part No.
RED80204
RED80205

REDLINE FUEL SYSTEM WATER REMOVER & ANTIFREEZE

- Removes water from diesel or gasoline systems, treats up to 250 gallons
- Significantly reduces the freezing point of water in the fuel system
- Also provides excellent fuel lubrication
- Can be used in combination with SI-1 Complete Fuel System Cleaner, Diesel Fuel Catalyst, and 85 Plus

Description
Water Remover Additive 12 oz (354 ml)

Part No.
RED60302

SACRIFICIAL ANODE

ZINC ANODE PLUG

Sacrificial zinc anode insert to control electrolysis in cooling systems.
AF49-2500 1/4" NPT plug with zinc anode

RADIATOR & HEATER HOSE

STAINLESS STEEL RADIATOR HOSE KITS

Each Kit Contains:
1 x Stainless Steel Hose 1-3/4" OD
2 x Aluminium End Cap Covers - Chrome or Polished
2 x Rubber Hose Sleeve Adaptors
4 x Rubber Reducers (2 each of 1-1/4" & 1-1/2")
4 x Hose Clamps

Size	Polished	Chrome	Black

STAINLESS STEEL HEATER HOSE KITS

Each Kit Contains:
2 x Stainless Steel Hoses
44" x 3/4" OD
4 x Aluminium End Cap Covers - Chrome or Polished
4 x Rubber Hose Sleeve Adaptors
4 x Rubber Reducers (5/8" ID)
8 x Hose Clamps

Size	44" x 3/4"
Polished	RPCR7313
Chrome	RPCR7314
Black	RPCR7313BK

REPLACEMENT HOSE END CAPS

Replacement aluminium hose end caps for RPC stainless steel radiator and heater hose kits. Sold as pairs.

Description	Polished	Chrome
1-3/4" Hose	RPCR7318	RPCR7319
2" Hose	RPCR7324	RPCR7325

REPLACEMENT SLEEVE ADAPTERS

Description	Part No.
1x 2" Sleeve Adapter,	
1x 1-1/2" Reducer, 2x Clamps	RPCR7315
1x 1-3/4" Sleeve Adapter, 1x 1-1/4" & 1-1/2" Reducer, 2x Clamps	RPCR7317

HOSE END COVERS

Hose Ends

Billet Specialties has the answer for unsightly hose clamps and loud anodized colors - polished billet hose ends! Available in popular sizes for rubber and braided hoses from 5/16" to 1-3/4". Sold individually.

- Product Features
- Precision machined from 6061-T6 billet aluminum
 - Mirror polish finish
 - Hose clamp included
- | | |
|---------|-----------------------|
| BS67025 | 5/16" Fuel - Braided |

COOLING, INSULATION & AIR CONDITIONING

HOSE END FINISHERS

Hex Hose Finishers

Hex Hose finishers are designed to add a completed appearance to your hoses with easy installation of a hose clamp and are available in seven great colours: blue, red, purple, silver, black, gold and chrome. Aeroflow's corrosion resistant, colour consistent, double anodised and hand polished finish adds the final touch of quality and protection.

RADIATOR CAPS

Radiator Caps

Billet Specialties radiator caps are 2.5" diameter and are machined from 6061-T6 billet aluminum. Knurled sides provide a positive grip. Available in 7lb or 16 lb applications, the billet top and radiator cap come unassembled to allow for proper positioning of the logo.

Product Features

- Industry leading mirror finish polish
- High quality Stant® radiator cap included

BS75120	PLAIN 16LB
BSBLK75120	PLAIN 16LB Black Anodised
BS76120	PLAIN 7LB

MEZIERE SAFECAP

SafeCap has been designed to address one issue that has plagued racers for decades. Standard caps often suffer damage that can result in the cap coming off at the most inopportune times. This new cap features a set of ramp rollers for smooth and secure fitment. The billet cap offers excellent integrity, fit and finish. The locking shell and clip ensure a failsafe, secure radiator cap that will easily withstand the rigors of motorsports.

PROFORM RADIATOR CAP

Why not make the first thing you see when you open your hood a Bowtie radiator cap? This sleek radiator cap is comprised of three parts: a Stant 13 psi radiator cap, a black anodized aluminum cap cover with knurled perimeter, and lastly an embossed metal Bowtie emblem that can be centered nicely after the radiator cap has been installed. This ensures the Bowtie is lined up the way you'd like it to be!

PR141-820 Black Bow-Tie radiator cap 13psi

1932-34 Radiator Caps

Die cast and chrome plated with solid brass mounting installed.

MO63316	Racing Radiator Cap, 14-18 lbs.
MO63320	Racing Radiator Cap, 19-21 lbs.
MO63324	Racing Radiator Cap, 23-25 lbs.

PWR RADIATOR CAPS

Made in the USA by Stant, these radiator caps provide a pressure release lever to safely vent the pressure prior to removing the cap.

The large cap is the standard size found on domestic and US vehicles and the small cap is the standard Japanese type as found on Toyota and Nissan vehicles.

Small cap, 16psi
Large cap, 22-25psi

Meziere Recovery Tank

Recovery Tank Reduce aeration and maintain pressure. Designed to catch overflow liquid and purge air out of your system during heat cycles.
Dimensions 10"H x 2"W x 3"D
• 1/8" NPT ports
• O-Ring seal cap
Part No: MZWR100U (Polished)

UNIVERSAL HEADER TANK

With 5/16" male barbs and features a 32mm cap. Designed originally for racing engines, today's compact production engines can also benefit from the use of AeroFlow's Radiator Breather Tank. This tank efficiently removes trapped hot air pockets within the cooling system which can eventually cause overheating, especially during Aggressive driving. This tank allows the radiator to perform more efficiently, improving overall cooling performance. Requires radiator hose adapters for installation.
Height is 200mm 7-7/8" Diameter is 60mm 2-3/8"

AF77-1031BLK Black
AF59-1031 Replacement blanking cap (10PSI) and pressure cap (19PSI)

COOLANT FILTERS

BILLET RADIATOR FILTER/FILLER

This awesome looking billet radiator filter is designed to be fitted to the top radiator hose to filter and remove any particles before they reach the radiator and lead to clogging. The billet radiator filter is also simple to clean and install. Simply unscrew the cap and remove the filter screen and sludge collector, clean and reassemble. The filter inlet and outlet come in 1.5" dia with -16 ORB female thread inside.
(Fittings are not included)

UNIVERSAL OVERFLOW TANK

When your radiator coolant gets too hot, it will blow through your overflow spout and all over your engine bay unless you have an overflow tank. AeroFlow's new overflow tanks are available in polished billet aluminium or anodised black with 3/8" barb fittings for a simple installation. They will allow the coolant to expand and then recover as the temperature drops.

FABRICATED WRX AND STI EXPANSION TANK

Aeroflow Performance has constructed this durable, TIG-welded aluminium coolant expansion tank for perfect fitment in the 2002-2007 WRX and the 2004-2016 STI. Stock coolant expansion tanks are prone to failure after years of constant temperature variations with our tanks featuring barbed fittings for optimal durability and longevity. This expansion tank provides a 50% increase in capacity compared to the stock unit. It features a polished silver or anodized black finish that will add some additional reliability and engine bay styling. Barb fittings are removable.

AF77-2045 Polished
AF77-2045BLK Black

FABRICATED RADIATOR OVERFLOW TANKS TO SUIT FORD MUSTANG 2015 ON

Designed for 2015 + Ford Mustang is the Aeroflow Performance Fabricated radiator overflow tank. This is a direct bolt-in replacement to the stock 2 piece plastic tank which can fail after repeated high heat situations. This tank utilizes the factory stock vented radiator cap and bleeds pressure just like the factory intended it to be. The tank is available in both polished and black.

AF77-1033 Polished

9" X 3" 700ml capacity. RPCR6570

RCI OVERFLOW TANK

1 Quart (946ml) capacity, non-recovery type plastic catch can. Contains excess fluid and prevents it from reaching the tank. Features barbed inlet, drain cock and moulded in mounting threads.

1 Quart Overflow Tank - Black RCI70400

SO-CAL Overflow Tank

Designed in our own shop by Aaron Broughton and Ryan Reed, the SO-CAL overflow tank is designed for multiple applications where there was no factory overflow system. It can be used on hot rods, customs, classic trucks, muscle cars, etc. The tank, which holds roughly two quarts, is made of polished, spun aluminium, features two unobtrusive pre-tapped mounting bosses and a knurled machined cap.

S0001-62078

AIR BLEED VALVE

- Bleeds air from any cooling system
- Resistant to fuels, oil, and anti-freeze
- Brass construction with push button to release pressure
- Fits 1/8" NPT Thread

M063765

BILLET RADIATOR RECOVERY TANK

- Billet Aluminium design holds one full quart capacity (946ml)
- Vented recirculating tank includes push-lock fitting (for 1/4" O.D. flexible tubing), barbed fitting (for 3/8" rubber hose), siphon tube and drain fitting
- Dimensions: 9" high (overall), 3" tank diameter
- Billet mount included

M085505 - Billet Radiator Recovery Tank

MUSTANG COOLANT EXPANSION TANK

Direct bolt-in replacement to stock 2 piece plastic tank. Fabricated Aluminium for strength, plastic tanks fail after repeated high heat situations. This Aluminium tank can be polished, chromed, painted, powder coated or left as is for a race look. Uses factory stock vented cap, bleeds pressure like the factory intended. Billet aluminium neck has a built-in overflow like the factory tank. Integral billet aluminium hose fittings are better looking and more trouble free than screw in fittings.

Description
Coolant Expansion Tank, Mustang 2015-Up

Chev Filler Neck with AN Fitting and NPT Ports

Blue anodized aluminium. Includes two 3/8" NPT female ports to plumb water to cylinder head for additional cooling and a -16AN fitting for use with steel braid reinforced upper radiator hose.

Fits Small Block, Big Block and 90° V6 Chevy Intake Manifolds.
Water Outlet Filler Neck, -16AN with 2 x 3/8" NPT ports M063461

Ford Windsor Filler Neck with AN Fitting

Blue anodized aluminium with -16AN fitting for use with steel braid reinforced upper radiator hose. Includes gasket. Fits Ford Windsor Engines.

Water Outlet Filler Neck, Ford, -16 AN Fitting M063455

Bolt-On Filler Neck

Blue anodized aluminium. Accepts standard-size radiator cap (not included). Excellent replacement part for Moroso Filler Neck Kits. 100% leak tested.

Stamped Aluminium Filler Neck, Bolt-On M063465

Billet Aluminium Bolt-On Filler Neck

Made from 6061-T6 billet aluminium. Easily mounts to any Big Block or Small Block Chevy intake manifold, and can be used in all racing and street-performance applications where a heavy-duty filler neck is required. Includes screw-in 1/8" NPT hose fitting for expansion tanks, and accepts standard-size radiator cap (not included).

Billet Aluminium Filler Neck, Bolt-On M063466

Water Neck Block-Off Plate

This 1/4" aluminium plate provides an ideal base to weld-your-own radiator hose fitting to the intake manifold. Untreated aluminium makes it easy to drill opening and weld any size fitting of your choice. Two pre-drilled mounting holes ensure a perfect fit to the intake manifold. Perfect for racing and custom applications.

Water Neck Block-off Plate, Chevrolet M063471

Filler Neck

Fits: Ford 4.6/5.4L Engines
Allows Mod Motor Racers to upgrade existing upper radiator hose
Billet Aluminium Water Neck Outlet with -16AN Fitting
Anodized Black • Includes O-ring Filler Neck M063456

Manifold Filler Neck Kit

Locates filler neck at highest point on cars with low-mount radiators to bleed off air. Unit can be flipped 180° for either right or left outlet location.

Includes 1/2" NPT fitting for installing water temperature sending unit and two 1/4" NPT fittings for return lines on popular aftermarket cylinder heads. Made of 356-T6 cast aluminium; 3-1/4" high. Includes gaskets, bolts and washers, and standard size radiator cap filler neck.

Manifold Filler Neck Kit. Chevrolet V8 & 90° V6 MO63420

Radiator Hose Fillers

356-T6 cast aluminium Radiator Hose Fillers are spliced into the upper radiator hose to provide more complete cooling system filling. Standard size radiator cap receptacle is welded to the cast flange

(radiator cap not included) 100% leak tested

Radiator Hose Filler, 1-1/2" hose MO63730

Radiator Hose Filler, 1-1/4" hose MO63745

WELD-ON, BILLET ALUMINIUM

- Made from 6061-T6 billet aluminium
- This weld-on version can be used wherever a heavy-duty, custom-application filler neck is required
- Includes screw-in 1/8" NPT hose fitting for expansion tanks, and accepts Moroso or standard-size radiator cap (not included)
- Ideal for all forms of racing and street-performance applications

Billet Aluminium Filler Neck, Weld-On MO63486

WATER OUTLET

- -16AN Outlet
- Features two 3/8" N.P.T. female ports to plumb water to cylinder head for cooling
- Includes stainless steel mounting hardware

Description

SB & BB Chev Billet Outlet -16AN

Part No
MO63475

BILLET FILLER NECK

- -16AN female port is designed to be used with Nos. 22622, 63521, 63522, 63523, 63525
- Black anodised billet aluminium housing with the included bolt- on billet aluminium radiator neck stands 3-1/4" tall, which locates filler neck at highest point to bleed off air on cars with low-mount radiators
- The unit can be flipped 180° for either right or left water hose outlet location
- No need to worry about gaskets because on the top and bottom of the housing are machined O-ring grooves with included O-rings
- Includes a 1/2" N.P.T. port for installing a water temperature sending unit and two 1/4" N.P.T. ports to plumb return lines on popular aftermarket cylinder heads
- Includes bolts and washers

Description
SB & BB Chev Billet Filler Neck with -16AN Port

REMOTE THERMOSTAT HOUSINGS

Moroso Performance Products Remote

Thermostat Housings allow the street, race or marine enthusiast to have a thermostat in their cooling system away from the engine itself. This could be if the engine has a blower manifold that does not allow the thermostat to be on the engine itself or if Moroso Part No. 63615, 63616 or 63566 water pump adapters for the GM LS series of engines are being used.

- Made from 6061-T6 Billet Aluminium
- The housing has two -12AN female O-ring inlet ports
- Thermostat or restrictor is placed between this housing and a conventional manifold housing such as part No. 63423, where a radiator hose connects to the radiator
- Can be used with Moroso cooling system accessories

MO63425 Inlet ports on bottom
MO63426 Inlet ports on each side

SWIVEL WATER NECKS

Our swivel water necks swivel 360° for exact hose alignment. Viton seals are used internally and the flange is O-ring sealed. Features include hard coat anodizing for improved wear, steel snap ring for secure fitting retention, and a secondary locking pin.

-20 AN Swivel Water Neck **PFS10-2120**

Perterson Swivel Water Necks

Necks swivel 360° for exact hose alignment. Viton seals are used internally and the flange is O-Ring sealed. Features hard coat anodizing for improved wear and a secondary locking pin for fitting retention. Proven in NASCAR Winston Cup.

Meziere LS Waterneck

A wide variety of thermostat housing solutions are found in our arsenal. All are aluminum, precision machined and finished to the highest standards.

This part number features:

- Fits GM LS series engines
- Straight out design (no stock configuration)
- Accepts any of our WN style outlet fittings •Black anodized finish
- O-ring seal - no gasket required

Note: To complete your connection, you will need an outlet fitting.
MZWN0039S (BLACK)

LOW SWIVEL 360 DEGREE

WATER NECK

- Fits big and small block Chevy.
- Fits big block Mopar.
- *Will not accept a Mopar thermostat.
- Swivel design for easy hose alignment.
- Side ports #6AN O-ring boss both sides.
- O-ring seal. No gasket required.
- Integral 1.50" slip hose outlet.
- O-ring and stainless hardware included.
- Available in a variety of finishes

SB/BB Chev & BB Chrysler - Polished MZWN1122U

WELD ON BILLET RADIATOR NECKS

Part No **ID** **Description**
AF64-0032 32mm Raw finish, small cap
AF64-0042 42mm Raw finish, large cap

RADIATOR HOSE FILLER

Machined from 6061-T6 billet aluminium, Aeroflow radiator hose fillers are designed to be used in the top radiator hose to provide a complete coolant system fill. Machined with 2 x 1/8" NPT ports for water temp or pressure gauges. Available in polished or Polished Black anodised and made to suit 1-1/2" size radiator hose and accept the Aeroflow large style radiator cap (AF64-5042) sold separately.

Part No **Colour** **Description**
AF64-4040 Polished. Suits 1-1/2" hose and 42mm radiator cap
AF64-4040BLK Black. Suits 1-1/2" hose and 42mm radiator cap

Note: Aeroflow radiator caps are available in 7 colours! Blue, Black, Gold, Polished, Purple, Red and Silver!

REMOTE THERMOSTAT HOUSING

The Aeroflow Performance remote thermostat housing allows you to remote mount a thermostat in the cooling system away from the engine itself. This is useful for cars that have no room to allow the thermostat to be on the engine itself such as a blower manifold. This remote thermostat housing also allows you to locate the filler neck at the highest point of car with low mount radiators to help bleed air out of the system. It is designed to adapt a Chevy thermostat housing along with a Chevy thermostat. Made from billet aluminium with two female -12 ORB ports on both sides and 3/8 UNC mounting holes. Comes in two colour options black & silver.

AF64-3043S Silver Remote thermostat housing
AF64-3043BLK Black Remote thermostat housing

INLINE THERMOSTAT

The Aeroflow Performance inline thermostat housing allows you to remote mount a thermostat inline in between the top radiator hose from your cooling system away from the engine. This is useful for cars that have no room to allow the thermostat to be on the engine block. This inline thermostat accepts a 1.5" (38mm) radiator hose and takes a standard Chevy thermostat (sold Separately). Machined from billet aluminium and available in polished or black anodised finishes.

Length 3.93" (100mm)
Diameter 3.14" (80mm)
AF64-3044 Silver Inline universal thermostat
AF64-3044BLK Black Inline universal thermostat

WATER NECK SPACER

Aeroflow's Chev water neck spacer kit is the perfect solution for allowing an extra auxiliary port of coolant, can be used for many applications including plumbing coolant to a turbo charger, extra coolant flow from rear of heads or simply connecting your heater in a conversion! Available in silver or black anodised finishes.

Part No **Colour** **Description**
AF64-4051 Silver Spacer with 2 x -8ORB female ports
AF64-4051BLK Black Spacer with 2 x -8ORB female ports

Offset Thermostat Housing adapter

This polished aluminium adapter offsets the thermostat to right side of manifold. Used on 144/174 blower kits. Includes O-Ring and mounting bolts. Will NOT work on Weiland 142, 177, or 256 blowers.

Chev Thermostat Offset Adapter WM90845

Billet Specialties Water Necks

Cooling system components from Billet Specialties feature high quality precision machining, industry leading mirror finish polish and stainless fasteners. Each of our engine components are engineered to do more than look good ... they perform! Billet Specialties thermostat housings are precision machined from 6061-T6 billet aluminium and polished to a mirror finish. Fits small and big block Chevrolet® engines.

Product Features - Dual Buna N® O-rings for a positive seal eliminating the need for a gasket or sealant
- Stainless steel mounting hardware included.

Water Necks

The bottom-line for water necks is resistance to leakage. Our waternecks are manufactured with especially flat sealing surfaces, extra thick bases, and an O-ring gasket where applicable (Chevrolet 66209, 66210, and Pontiac 66212).

They are highly polished and thickly chrome plated for a lasting finish.

Easily installed in place of OEM parts.

Supplied with bolts, gaskets or O-rings.

RESTRICTOR PLATES

RESTRICTOR PLATE KIT

Restricting coolant flow leaving the engine lets you control the amount of heat absorbed by the coolant. Red, gold and blue anodised aluminium restrictor plates are mounted under the water outlet on the intake manifold. This kit consists of three restrictor plates with 15.88mm (5/8"), 19.08mm (3/4") and 25.4mm (1") I.D. holes for optimum coolant flow, 28.57mm (2-1/8") O.D.

Suitable for Gm Holden, Chevrolet and Ford

THERMOSTATS

TUFF STUFF HIGH FLOW

THERMOSTATS

Standard thermostats flow about 37 gallons of coolant per minute. With Tuff Stuff's High-Flow thermostat, that number jumps to 56 gallons per minute. That's almost a 50 percent increase in coolant flow! The increased coolant flow will reduce the delay in engine warm-up times, allows trapped air in the cooling system to escape and stabilizes the pressure of the cooling system overall.

These thermostats also have a bypass valve that allows a small amount of coolant to circulate before fully opening.

1953-1980 Mopar 180°	TUF910180

MR GASKET THERMOSTATS

These high performance thermostats are designed to resist large variations in coolant pressures that occur at high RPM's where coolant temperature and coolant pressure fight for control of the thermostat keeping it from opening at it's designated temperature. The balanced HP Thermostat features all brass and copper construction, and opens at the right temperature regardless of engine RPM.

HI-FLOW THERMOSTATS

Thermostats play a vital role in engine management. Thermostats can fail in 2 possible manners; open or close position. If stuck open, the engine's heater will operate at reduced efficiency for an extended period of time or if stuck shut, will cause your car's engine to overheat leading to costly repairs or ultimately "complete engine failure". The AeroFlow Performance range of thermostats are available in temperatures that are lower than the factory units. Reducing the temperature which an engine runs will make more power through better thermal and volumetric efficiency. This is a direct drop in with no modifications needed and includes the rubber seal if required.

Suitable for

MILODON HIGH FLOW THERMOSTATS

These High Flow Thermostats greatly aid the proper functioning of a high performance cooling system. They are engineered to warm the engine to a proper operating temperature without making it run hot enough to lose power. Also the "Balanced Sleeve" design is highly recommended for use with High Volume water pumps. With other thermostat designs, the increased flow generated by High Volume water pumps can actually attempt to hold the thermostat closed. The "Balanced Sleeve" design equals the pressure exerted on the thermostat allowing its operation to be solely regulated by coolant temperature.

GM LSA SUPERCHARGER WATER FITTING ADAPTERS

For those wanting to add a touch of class and remove those factory OEM steel lines on the supercharger and replace them with some braided line/AN options. AeroFlow Performance have designed these simple clip on fittings that attach straight to the supercharger and allows you to convert straight to -10AN or a 5/8" (15.9mm) barb.

AF50-1000	Female LSA Water fitting adapters with 5/8 barb
AF50-1001	Male LSA Water fitting adapters with 5/8 barb
AF50-1010	Female LSA Water fitting adapters with -10AN
AF50-1011	Male LSA Water fitting adapters with -10AN

GM LSA SUPERCHARGER

WATER FILLER TEE

The water filler tee is a unique billet piece that replaces the factory plastic item which is brittle and can fatigue over time. The added advantage being you cannot purchase the OEM item separately and instead have to purchase the entire line kit which is a costly expense.

AF50-1002

LS SERIES WATER PUMP PLATES

The AeroFlow Performance GM LS water pump adapter plates are designed for cooling systems that employ a remote or radiator mounted water pump. These adapters are the cleanest and simplest way to connect the coolant lines to the engine. These plates are designed to help you connect AN hoses to your engine block at the spots where the water pump usually bolts on. Featuring 4 x -100RB ports and manufactured from billet aluminium.

AF64-2241

ADJUSTABLE COOLANT CROSS-OVER LOG

The AeroFlow Performance LS cross over logs are designed to work in conjunction with our GM LS water pump plates (sold separately AF64-2241). It simplifies the plumbing of a remote mounted electric water pump by eliminating all the extra adapters and lines. This adjustable length design which allows the log to be adjusted from 172mm (6.8") to 266mm (10.5") makes it a very universal design that can be used with any engine utilizing block adapters. The coolant cross over log features 2 female -12AN swivels with 1 male -16AN flare. CNC machined from billet aluminium construction with black anodized finish only. SOLD INDIVIDUALLY.

AF64-2242

LS WATER CROSS OVER KIT

The AeroFlow Performance GM LS water cross-over kit provides a clean, professional look while providing proper air bleeding for the cooling system and can be used with Carb or EFI intakes without modifications. This Stainless Steel Steam Vent System connects the 4 corners of your LS engine to remove trapped steam and get it where it needs to go. When steam gets trapped pressures rise, when pressures rise it creates an unsafe tune condition which can lead to pre-detonation, head gasket failures, lean cylinders causing engine failure. This setup combines our compact distribution block and swivel cross over adapters with 1/4" 304 stainless steel line. Requires only 20mm (25/32") of intake manifold clearance.

AF64-2197

AF59-2187 Replacement O-ring(s) (pack of 4)

GM LS SERIES CROSS-OVER ADAPTERS
 AeroFlow Performance LS water cross-over adapters are specifically designed for the LS series engine, these cross-over adapters compliment aftermarket intakes and accessories that the factory rigid brazed hard lines will not. The lines are designed to eliminate trapped air and steam from your engine to prevent hot spots and overheating. The adapter O-ring seals and converts to -4 AN plumbing. Featuring fixed or swivel style adapters in dual or single variations allow optimal routing on your application which eliminates the need for T adapters. Available in both silver and black anodised options. Installing these water cross-over adapters in all 4 corners of the engine have been proven to decrease detonation in number 7 & 8 cylinders especially and are a great improvement over the standard steam vent plumbing.

AF64-2186	Silver	LS cross-over adapters
AF64-2186BLK	Black	LS cross-over adapters
AF64-2187	Silver	Swivel LS cross-over adapters
AF64-2187BLK	Black	Swivel LS cross-over adapters
AF64-2188	Silver	Dual Swivel LS cross-over adapters
AF64-2188BLK	Black	Dual Swivel LS cross-over adapters
AF59-2187	Green	Pack of 4 replacement O rings for Swivel fittings

WATER PUMPS

FORD FLATHEAD WATER PUMP SET (RH & LH); FITS - 1937-48 CAR, 1937-47 PICKUP
 Perfect for any original or hopped-up flatheads. Fits 85, 95 & 100 Horsepower models.
BD78-8501/2

WATER PUMPS (RH & LH); FITS - 1948-52 PICKUP
 Ideal for using on 1949-53 (8BA) Flathead V8 in 1932-48 cars as these pumps have the same front motor mount locations as 1937-48 V8s. Both RH & LH pumps have hot water heater outlets, unlike the original on RH only.
BD8RT-8501/2

FLATHEAD 50-53 WATER PUMP SET PLAIN STEEL
 * NARROW BELT *
BDEAB-8501/2

WATER PUMPS Action Plus Aluminum Water Pumps
 WEIAND'S light weight, performance aluminium mechanical Action-Plus water pumps give a weight saving of 30% to 50% over stock cast-iron pumps. These pumps feature a premium quality bearing and seal have twice the load capacity of stock pumps. WEIAND's exclusive housing counterbore keeps the bearing from "walking" out. All pumps are designed with the necessary bracket bosses and water connections to fit popular street applications.

Water Pump Spacers
 Use on 1969 and later Chevrolet small block V8 to convert short water pumps to long style.
Water pump spacer kit WM8207

HI-PERFORMANCE VICTOR SERIES ALUMINIUM WATER PUMPS

Small-Block Chevy - Standard Rotation Short-Style Pump for most 1955-72 cars and trucks (5/8" pilot shaft)
 Fits all 1955-68 small-block Chevy passenger cars, 1969-70 350 c.i.d. Corvettes and 1955-72 light duty trucks. Has 3/4" ball/ball bearing. Dimension from block surface to hub: 5-5/8".
As Cast Water Pump ED8810
Polished Water Pump ED8820

Long-Style Pump for 1969-87 V8, 90° V6 and 1973-86 truck (5/8" pilot shaft)
 Fits all 1969-87 small-block Chevy or 90° V6 passenger cars and 1973-86 light duty trucks. Does not fit Corvettes (use #8810 or #8812) or late-model vehicles with serpentine accessory drive belts (use #8881). Has heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 6-15/16".
As Cast Water Pump ED8811
Polished Water Pump ED8821

Short-Style Pump for 1971-82 Corvettes (3/4" pilot shaft)
 Fits all 1971-82 small-block Corvettes. Comes with heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5-13/16".
As Cast Water Pump ED8812

Small-Block Chevy - Reverse Rotation Long-Style Pump for 1987-94 V8 and 90° V6 (5/8" pilot shaft)
 Fits 1987-94 small-block Chevy V8s and 90° V6s using serpentine drive belt. Does not fit LT1 or Vettes. Heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 6-15/16".
As Cast Water Pump ED8881
Polished Water Pump ED8891

Short-Style Pump for 1984-91 Corvettes (3/4" pilot shaft)
 Fits all 1984-91 350 c.i.d. Corvettes. Comes with heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5.80".
As Cast Water Pump ED8815
Polished Water Pump ED8825

Short-Style Pump for use with aftermarket serpentine belts (5/8" pilot shaft)
 This pump is ideal for street rods with aftermarket serpentine belt pulleys. Comes with heavy-duty 3/4" ball/ball bearing. Dimension from block surface to hub: 5-5/8".
As Cast Water Pump ED8882
Polished Water Pump ED8892

Big-Block Chevy - Standard Rotation Short-Style Pump (5/8" pilot shaft)
 Fits all 1965-68 big-block Chevy passenger cars, 1966-72 trucks and 1969-70 big-block Corvettes. Has 3/4" ball/ball bearing. Dimension from block surface to hub: 5-3/4".
As Cast Water Pump ED8850
EnduraShine Water Pump ED88504

Long-Style Pump (5/8" pilot shaft)
 Fits 1969-87 big-blocks and some 1988-91 heavy duty trucks with Mark IV engines. Does not fit Corvettes or trucks over 1-ton. Includes 3/4" ball/roller bearing. Dimension from block surface to hub: 7-5/16".
As Cast Water Pump ED8851

Short-Style Pump (3/4" pilot shaft)
 Fits all 1971-74 big-block Corvettes. Comes with heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5-3/4".
As Cast Water Pump ED8852
Polished Water Pump ED8862

409 Pump (5/8" pilot shaft)
 Fits 1958-65 B/B Chevy 348/409 engines. Has 3/4" ball/ball bearing. Dimension from block surface to hub: 5-1/2". Inlet diameter: 1.95".
As Cast Water Pump ED8858

Big-Block Chevy - Reverse Rotation Long-Style Pump (5/8" pilot shaft)
 Fits 1988 and later C/K pickups equipped with 454 big-blocks using serpentine drive belt (no "V" Belts). Heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 7-5/16".
As Cast Water Pump ED8853

Short-Style Pump for Serpentine Belt (5/8" pilot shaft)
 This pump is ideal for street rods with aftermarket serpentine belt pulleys. Comes with heavy-duty 3/4" ball/ball bearing. Dimension from block surface to hub: 5-3/4".
As Cast Water Pump ED8854
Polished Water Pump ED8864

GM LS1 & LS2 Two-Piece Pump for GM Gen III & IV LS (3/4" pilot shaft)
 Fits 1997-2007 GM Gen III LS1 and Gen IV LS2 engines with 2004 & later two-piece Thermostat (GM PN 12581594). Has 3/4" ball/ball bearing. Dimension from block surface to hub: 6".
As Cast Water Pump ED8896
Victor Series W/Pump Pulley Suit ED8896 ED8898

5.0L Ford Ford 5.0L Water Pump (5/8" pilot shaft)
 Fits all 1986-93 5.0L V8s using a serpentine accessory drive belt. Reverse rotation; not for early model 289-302 V8s. Has heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5-3/4".
As Cast Water Pump ED8840
Polished Water Pump ED8845

Small-Block Ford For 1965-68 289, 1968-69 302, 1969 351-W (5/8" pilot shaft)
 Right-hand inlet with back plate. Dimension from casting to hub: 5.42".
As Cast Water Pump ED8841
Polished Water Pump ED8846

For 1965-67 289 Special (5/8" pilot shaft)
 "K" engine code with right-hand inlet with no back plate. Dimension from casting to hub: 5.16".
As Cast Water Pump ED8842

For 1970-78 302, 1970-87 351-W (5/8" pilot shaft)
 Left-hand inlet with back plate. Dimension from casting to hub: 5.70".
As Cast Water Pump ED8843
Polished Water Pump ED8848

For 1970-79 351-C and 351-M/400 (5/8" pilot shaft)
 Left-hand inlet with no back plate. Dimension from casting to hub: 5.71".
As Cast Water Pump ED8844
Polished Water Pump ED8849

429/460 Ford For 1970-92 429/460 (3/4" pilot shaft)
 Left-hand inlet and no backing plate. Accepts Ford backing plate #C8SZ-8508A. Fits all 1970-92 429/460 V8s in passenger cars, trucks, vans and motor homes. Has heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5-1/2".
As Cast Water Pump ED8866
Polished Water Pump ED8876

Ford FE For 1965-76 352/428 Ford FE Engines (5/8" pilot shaft)
 Fits all 1965-76 Ford FE V8s. Comes with heavy-duty 3/4" ball/ball bearing. Dimension from block surface to hub: 7.56".
As Cast Water Pump ED8805
Polished Water Pump ED8835

Small-Block Chrysler For 1969-85 318-360 Chryslers (5/8" pilot shaft)
 Direct replacement for stock water pump, will accept all factory pulleys and accessories. Special cast-iron impeller and tight clearances provide increased coolant flow, block pressure, and balanced delivery. Has heavy-duty ball/ball bearing and seal. Dimension from block surface to hub: 5.55".
As Cast Water Pump ED8877
Polished Water Pump ED8887

Big-Block Chrysler For 1958-79 361-440 Chryslers (5/8" pilot shaft)
 A unique design for maximum cooling and performance. Engineered to directly replace the stock pump in the factory cast-iron housing or work with the Mopar Performance aluminum housing. Dimension from block surface to hub: 3.40".
As Cast Water Pump ED8814
Polished Water Pump ED8824

Pontiac Pump for 1969-79 389-455 (5/8" pilot shaft)
 Fits 1969-79 389-455 c.i.d with 11 bolt front timing cover with back plate. Has 3/4" ball/ball bearing. Dimension from block surface to hub: 4-1/2".
As Cast Water Pump ED8856

Victor Series Circle Track Water Pumps

These competition water pumps are designed for circle track and endurance racing applications. They feature a revised impeller entry, a black anodized finish and .100" thicker rear cover for greater durability. Auxiliary water outlets ease fabrication of custom plumbing systems and auxiliary fittings are available as AN or NPT. These water pumps provide max cooling with equal distribution to both sides of the block within 1%. By eliminating hot spots, the engine produces optimum power from every cylinder without detonation and pre-ignition. Other features include machined cast iron impeller, billet hub and heavy-duty ball/roller bearings.

Small-Block Chevy Victor Circle Track Pump, -8 AN aux. fittings at 90° to the block (3/4" pilot shaft)

Fits all 1955-95 S/B Chevy engines. Comes with heavy-duty 3/4" ball/roller bearing. Dimension from block surface to hub: 5-13/16". Inlet diameter: 1.85".

Black Anodized Water Pump ED8816

Victor-Pro Circle Track Water Pump (3/4" pilot shaft)

An upgraded version of ED8816 water pump with improvements and features focused to the needs of current circle track racing engine builders and teams. It features an improved right side outlet passage, AN-10 side water outlet ports, aluminum back plate, marine seal, and a billet aluminium impeller. Dimension from block surface to hub: 5-13/16". Inlet diameter: 1.84".

Black Anodized Water Pump ED8819

Small-Block Ford Victor Circle Track Pump (3/4" pilot shaft)

Fits all Windsor style blocks with S/B Ford timing cover. Comes with heavy-duty 3/4" ball/roller bearing. Left-hand inlet with back plate. Dimension from block surface to hub: 5.70".

Black Anodized Water Pump ED8833

Small-Block Ford

For 1965-68 289, 1968-69 302, 1969 351-W (5/8" pilot shaft)
Black Anodized Water Pump ED88413

STREET ROD SHORT V-BELT WATER PUMP

- Passenger-side radiator hose inlet
- Provides approx. 1.5" of space at the front of the engine allowing for more radiator to fan clearance
- without a recessed fire wall
- Must use with long style (3.950") 4-bolt damper
- .750" pulley pilot shaft
- Fits M-6059-D351 timing chain cover

FMM-8501-E351S - Ford Windsor Waterpump

FORD BRASS WATER FITTINGS

Ford 351c Brass 5/8" Fitting Front Of Block Water Outlet **AF116**
Ford 351c Brass 3/4"-5/8" Step Front Of Block Water Fitting **KC117**

Team G Aluminium water pumps

Weiland Team G water pumps are ideally suited for racing. These pumps have been completely redesigned for better performance and utilize our exclusive "twisted snout" look. New, not rebuilt, they are designed from the outset with premium features that will assure reliable and consistent engine cooling performance. They are built to the highest manufacturing and industry quality standards at the Holley plant in Bowling Green, KY, and then rigorously tested to assure leak-free operation. We believe that these are the finest racing mechanical water pumps on the market today. One look will convince you of the superior design and performance capabilities of the Weiland Team G water pump line-up.

- Lightweight aluminium • CNC Machined • 3/4" shaft and pilot
- Eight-blade cast anti-cavitation impeller • 100% leak tested
- The BEST value in water pumps on the market
- New twisted snout design for updated style
- Permanent mold castings for improved appearance
- Extra Heavy Duty 1/2" thick pulley hubs for maximum durability are dual drilled to fit more applications
- Zinc plated back covers and hardware for long life and corrosion resistance

Application

Water pump Pulley Shim Kit

Set of three. This universal kit works with just about any GM or Ford water pump either with a 5/8" or 3/4" shaft. Fits between the water pump Pulley and drive flange. Contains two 1/16" shims and a 1/8" shim. Allows placement of water pump Pulley in perfect alignment with other components.

Water pump Pulley Shim Kit WM8230

MILODON HIGH PERFORMANCE WATER PUMPS

Engineered for maximum cooling performance and reliability in all applications. Whether it be the increased cooling demands of high-performance high horse power or street rod cruising or towing and RV, Milodon has a High-Performance Water Pump for your application. Milodon High Volume water pumps feature balanced distribution and improved efficiency, close tolerance impellers that increase coolant flow up to 30%. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as, improve coolant flow through the radiator. A nonrestrictive, high flow thermostat is highly recommended to enable the Milodon High Volume water pump to work to its highest capability.

All Milodon High Performance water pumps start with new, high quality steel or aluminium cast-ings, that use large diameter shafts and heavy-duty bearings. All pumps are direct factory replacements equipped with all hose connections and bosses. All Milodon Performance water pumps are protected by Milodons' 100% satisfaction guarantee.

Application

Ford 302-351 Cleveland, High Volume
Ford 302-351 Cleveland, Standard Volume
Ford 302 - Rear Sump (1980 & Up)

BB CHRYSLER ELECTRIC WATER PUMP

This all new Mopar billet aluminium electric big block Chrysler water pump features a durable 12-volt motor, billet mounting plate for added strength, and pumps up to 35+ gallons of water per minute. The retro-style Mopar Emblem is prominently displayed on the smooth, dark, powder coat finish of the motor. Depth from flange to motor's end is 3.250 inches. Fits B, RB and Hemi engines. Fits Chrysler B, RB, and HEMI Big Block Engines.

Description
BB Chrysler B, RB & Hemi Engines Water Pump, 35 GPM

Part No.
PR440-450

BB CHRYSLER MECHANICAL WATER PUMP

Drop a few more pounds off the front by adding this aluminium mechanical pump to your Mopar configuration. With the retro-style Mopar Emblem is prominently displayed, this pump is compatible with MOPAR aluminium water pump housing p/n PR440-453, PROFORM p/n PR66228, and stock pump housings. Fits Chrysler B, RB, and HEMI Big Block Engines.

Description
BB Chrysler B, RB & Hemi Engines Water Pump

Part No.
PR440-452

BB CHRYSLER SUPER LIGHT-WEIGHT WATER PUMP HOUSING

Drop a few pounds off the front end of your ride by adding this Mopar aluminium pump housing, with retro-style Mopar Emblem, to your configuration. This lighter than stock housing, is compatible with the Mopar electric pump P/N 440-450, and the Mopar mechanical pump P/N 440-453 (also compatible with PROFORM electric pump P/N 66219, and PROFORM mechanical pump P/N 66227). Fits Chrysler B, RB, and HEMI Big Block Engines.

Description
BB Chrysler & Hemi Engines Water Pump Housing

Part No.
PR440-453

PROFORM WATER PUMPS

High Flow Aluminium Water Pumps

PROFORM's new high flow mechanical water pumps feature a CNC cast iron impeller spinning on heavy duty ball bearings for up to 40% more coolant flow giving you real performance value for your dollar. Available in the stock cast look or polished.

Chev Small Block, Long Pump PR67265
Chev Small Block, Long Pump - Polished PR67264

Aeroflow MECHANICAL WATER PUMP

The high performance Aeroflow range of mechanical water pumps are designed for street applications. They are compatible with all O.E.M. accessories and pulleys. Made from lightweight cast aluminium which offers weight savings along with increased durability and cooling potential. They feature a six-blade precision impeller with curved vanes for maximum flow, pressure and equal distribution to both sides of the block. The impeller also limits high rpm cavitation which will not crack, corrode, or fatigue.

WATER PUMP SHIMS

1/16" thick water pump shims to solve pulley alignment problems. Sold 2 per package.

Water Pump Shims, 1/16" Thick (Pair)

TUF7620

WATER PUMP PULLEY SHIM KIT

Designed to align pulleys so the belts will not be misaligned. Made from aluminium sheet stock, contains two 1/16" and one 1/8" shims.

Water Pump Pulley Shim Kit

MG6129

GM LS MECHANICAL

WATER PUMP

The high performance Aeroflow GM LS mechanical water pump is designed for street applications. They are compatible with all O.E.M. accessories and pulleys. Made from lightweight cast aluminium which offers weight savings along with increased durability and cooling potential. They feature a precision cast-iron impeller design and pressure-balanced water passages which equalize flow and minimize engine hot spots at any speed. The impeller also limits high rpm cavitation which will not crack, corrode, or fatigue.

AF64-2360 Natural Cast Finish. Suits 1997-2003 GM LS Series engines.

AEROFLOW

ELECTRIC

WATER PUMPS

Aeroflow Performance electric water pumps eliminate unnecessary weight and drag experienced at high RPM. By eliminating the belt-driven mechanical pump and reducing accessory drive drag, you can increase horsepower. This makes it great for high performance engines that need high performance cooling when the mechanical pump just can't keep up. These aluminium water pumps push up to 35 gallons of water per minute of coolant circulation with a direct-drive 12-volt motor, spinning an impeller on a stainless-steel shaft. The durable aluminium housing has a black epoxy powder-coat finish for corrosion resistance. Each pump also includes radiator hose adapter, mounting hardware, and gaskets.

DEDENBEAR ELECTRIC WATER PUMPS

Engine Mounted Electric Pumps Dedenbear Cool Pumps have helped win multiple NHRA national events, plus two Winston world championships. The smallest, lightest, highest volume electric pumps available. Specifically engineered for the types of engines, radiators and radiator placements used by drag racers.

The entire unit weighs only 4 pounds and stands just 5 inches off the block. These are the shortest pumps in the industry - ideal for dragsters and cars with minimal radiator clearance.

Chev Small Block DE-WP1
Chev Big Block DE-WP2

DEDENBEAR ELECTRIC WATER PUMP MOTOR SEAL KIT Fits WP1, WP2 & WP3 Water Pumps DE-SKWP

DEDENBEAR REPLACEMENT ELECTRIC WATER PUMP MOTOR Fits WP1, WP2 & WP3 Water Pumps DE-MTRWP

Remote Water Pump

Model WP3 is the ideal remote mount electric water pump for any type of dragster or roadster engine. This universal pump weighs just 3-1/4 pounds and draws only 3 amps - yet pumps 23 gallons per minute. It can be mounted in any position.

Remote Water Pump

DE-WP3

Chevy Water Headers

Dedenbear's innovative water header replaces the usual mess of fittings, lines, elbows and tees with a single aluminium casting that weighs only 1 pound - and requires just one braided line from any remote pump. Perfect for dragster and roadster applications in which clearance is limited, our exclusive design permits the utilization of alternators or belt driven fuel pumps without water pump interference. Its tall, arched shape allows removal of the cam cover and camshaft without disconnecting the cooling system. Dual 3/4" NPT threads let coolant feed from either side of the engine and a top mounted 1/2" NPT outlet accepts a temperature sender or pressure tap.

Chev Small Block DE-WH1
Chev Big Block DE-WH2

Manifold Expansion Tank Kit

This revolutionary device improves any existing cooling system by continuously purging trapped air. The rugged aluminium casting bolts onto any Chevy or Chrysler V8 intake manifold. Includes: Cap, Gasket, Bolts, Washers, Fittings and Sight Tube. Unique 3 in one outlet accepts 1-1/2" and 1-1/4" hose or 3/4" NPT fittings.

Expansion Tank Kit DE-ET1K

BILLET ELECTRIC WATER PUMPS

Moroso Billet Electric Water Pumps are the latest in cooling technology. They pump up to 21% more water through the system during actual operating conditions than any competing pump.

- Electric motor with heavy-duty windings and sealed ball bearings
- Mounts directly to stock water pump location
- Compatible with 12 and 16 volt systems
- High-temperature Viton seal eliminates leaks
- Machined with 1" NPT inlet holes
- Clear anodized 6061-T6 billet aluminium pump housing

Small Block Chevy, 6.71" height
Big Block Chevy, 6.71" height
Fitting for 1-3/4" Hose
Ford 289-302-351W, 5.21 Height

MO63547
MO63543
MO63585

Remote Electric Water Pump

Four 1/4-20 tapped holes machined into base allow universal mounting to suit space and plumbing requirements. Machined with one 1" NPT inlet and two -12AN outlets. Supplied with 2 x -12AN fittings.

Billet Remote Water Pump MO63570

Moroso Electric Water Pump

The Moroso Billet Electric Water Pump features a unique impeller design and polished housing to operate as an integral unit and pump approximately 19 gallons per minute. The powerful 12 volt electric motor eliminates V-belt drive Draws only 7 amps.

- Weighs less than conventional mechanical pump with separate electric drive motor
- Mounts to stock location
- Overall pump height similar to stock pump height
- Water outlet size 1" NPT

Small Block Chevy MO63539
Fitting for 1-3/4" Hose MO63543

ELECTRIC WATER PUMP ADAPTER

MO63522 - Pump/Radiator Fitting -16 To 1 1/2"
MO63523 - Pump/Radiator Fitting -16 To 1 3/4"

Thermostatic Water Pump Switch

Provides automatic control of Electric Water Pumps and Electric Water Pump Drive Kits. Eliminates unnecessary battery drain by turning on the electric pump motor when coolant temperature exceeds 160° F (70°C) and turning it off when coolant temperature reaches 140° F (60°C). The toggle switch has three settings: Automatic, Manual and Off. In the "Manual" position, the motor is constantly on.

Thermostatic Water Pump Switch

MO63760

Electric Water Pump Drive Kit

Engine dynamometer tests prove that many water pumps produce severe drag on the engines at high RPM, absorbing as much as 15-20 HP. Universal application fits virtually every American V8 or V6 engine, including Chevy V8, Ford 351C, 351W, Ford Big Block and Chrysler Small and Big Blocks. Comes complete with 12-volt electric motor, all drive pulleys, belts, fasteners, and toggle switch. Intended for Drag Race applications only

Water Pump Drive Kit	MO63750

Big Block Chev	MO63610

LS SERIES WATER PUMP ADAPTER KIT

- Adapts a BBC style electric or conventional water pump to LS series engines
- Eliminates the bulky LS water pump with a more compact, cost effective pump
- Since BBC water pumps have been around for years, many different drive and pulleys are available and now can be used on a GM LS Series engine
- Kit includes: 2 billet aluminium adapter blocks (right and left), 2-1/4" pump adapter plates, fasteners, Viton O-rings, and 4 high flow -12AN fittings
- Requires use of a Remote Thermostat Housing, such a Moroso Part No. 63425, or 63426

Description	Part No.
GM LS Series Remote Water Pump Adapter Kit	MO63615

CVR PROFLO ELECTRIC WATER PUMPS

- Cast T6-6061 billet aluminium
- Carbon ceramic seal offers 10,000 hour life expectancy
- Stainless steel shaft will not corrode
- Computer designed machined billet impeller
- Mounts easily in stock location • 12 Volt, 6.1amp draw

Chev Small Block

Has mounting hole for power steering bracket. Unit comes with standard 1-3/4" inlet. Flow Rate: 55GPM Weight: 6.8 Lbs. (7350) / 7.8 Lbs. (7550)

Type of Finish: Cast Aluminium/Anodized Billet Fasteners & Hardware: Stainless Steel

Application	Part No.
SB Chevy - Clear Anodized Face (55GPM)	CVR7550

CHEV LT-1 SMALL BLOCK

On the LT-1 engine the factory pump is cam driven. Installation of this unit requires removal of the housing, disassembly and plugging of the drive hole and reinstallation. From there our unit plugs right into the housing supplied with seal and stainless fasteners. Flow Rate: 55GPM Weight: 3.0 Lbs. (6351) / 4.0 Lbs. (6551) Type of Finish: Machined Special Coating: Bright Anodized Fasteners & Hardware: Stainless Steel Type of Material: T6-6061 Billet Aluminium

Application	Part No.
GM LT-1 Small Block (55GPM)	CVR6551

Chev Big Block

Flow Rate: 60GPM Weight: 8.7 Lbs. (7454) / 9.7 Lbs. (7554) Type of Finish: Cast Aluminium/Anodized Billet Fasteners & Hardware: Stainless Steel Unit comes with standard 1-3/4" inlet.

Application	Part No.
BB Chevy - Clear Anodized Face (60GPM)	CVR7554
BB Chevy - Red Anodized Face (60GPM)	CVR7554R

CHRYSLER BIG BLOCK

Mounts directly to stock water pump locations by removing existing fan, pulley, plate and impeller; includes stainless steel mounting hardware and gasket for simple installation. Flow Rate: 55GPM Weight: 3.0 Lbs. (6440) / 4.0 Lbs. (6540) Type of Finish: Machined Special Coating: Bright Anodized Fasteners & Hardware: Stainless Steel

Application	Part No.
Chrysler B/RB/HEMI 361-440 (55GPM)	CVR6540
Cast Pump Body for CVR 6440 & CVR6450	CVR7426

Chrysler Big Block

Water Pump Install Kit

Includes water pump gasket, pump housing gasket, plugs, water pump screws, plus long and short housing screws.

Water Pump Installation Kit - Chrysler Big Block
MPP5007449

CVR EXTREME ONE PUMP

MULTIPLE ENGINE

COMBINATIONS!

Fits Small Block & Big Block Chevrolet and Small Block & Big Block Ford. Want to take the pump from your Chev to your Ford? Simply order new mounting legs and you're good to go!

- Flow Rate: 55GPM • Weight: 5.8 Lbs.
- Special Coating: Bright Anodized (coloured units only)
- Inlet fittings sold separately. • Inlet port size 1" NPT.

Application:	Part No:
Extreme Pump Assembly Black	CVR8000BK
Extreme Pump Assembly Blue	CVR8000BL
Extreme Pump Assembly Clear	CVR8000CL
Extreme Pump Assembly Red	CVR8000R
Extreme Pump Repair Kit Impellor & Gasket	CVR8054

REMOTE FLANGE

- T6-6061 billet aluminium
- Computer designed machined billet
- Kit includes 2 mounts, stainless steel
- Fasteners and o-ring

CVR EXTREME BILLET ELECTRIC WATER PUMPS

HOLDEN V8 253-308

Mounts directly in stock location. Inlet fittings are sold separately and can be changed between left and right side to suit radiator outlet. Flow Rate: 55GPM, Weight: 6.3 Lbs., Inlet Fittings Sold Separately

Application	Part No.
Holden V8 253-308 (55GPM) - Clear	CVR8508CL
Holden V8 253-308 (55GPM) - Black	CVR8508BK

CVR LS Water Pumps

- T6-6061 billet aluminium body
- Carbon ceramic seal
- Stainless steel shaft will not corrode
- Computer designed machined billet impeller
- Stainless steel fasteners included
- 12 Volt, 6 amp draw
- Optional thermostat housing available

Specifications:

Flow Rate: 55GPM

Weight: 9.9 Lbs. / 4.5kg

Optional Thermostat Housings

- Optional thermostat housings for CVR8400 pumps. Use with stock style water outlet.

Part No	Description
CVR8400BK	LS Electric Water Pump, Black Anodised
CVR8400CL	LS Electric Water Pump, Clear Anodised
CVR8180BK	Thermostat Housing, Black Anodised
CVR8180CL	Thermostat Housing, Clear Anodised

- T6-6061 billet aluminium body
- Carbon ceramic seal offers 10,000 hour life expectancy
- Stainless steel shaft will not corrode
- Computer designed machined billet impeller
- Mounts easily in stock location
- Thoroughly hand polished
- Stainless steel fasteners included
- 12 Volt, 6.1amp draw

CHEV SMALL BLOCK

Mounts directly in stock location. Inlet fittings sold separately and can be changed between left and right side to suit radiator outlet. Flow Rate: 55GPM Weight: 5.8 Lbs.

Special Coating: Bright Anodized (coloured units only) Inlet Fittings Sold Separately

Application	Part No.
Chev Small Block (55GPM) - Clear	CVR8550CL
Chev Small Block (55GPM) - Red Anodized	CVR8550R
Chev Small Block (55GPM) - Black Anodized	CVR8550BK

CHEV BIG BLOCK

Mounts directly in stock location. Inlet fittings are sold separately and can be changed between left and right side to suit radiator outlet.

Flow Rate: 55GPM
Weight: 6.3 Lbs.

Special Coating: Bright

Anodized (coloured units only) Inlet Fittings Sold Separately

Application
Chev Big Block (55GPM) - Clear

FORD BIG BLOCK

Mounts to stock location when used with CVR back plate (sold separately). Inlet fittings are sold separately and can be changed between left and right side to suit radiator outlet.

Flow Rate: 55GPM
Weight: 5.7 Lbs.

Special Coating: Bright Anodized (coloured units only)

Inlet Fittings and Back Plates Sold Separately

Application
Ford 429-460 (55GPM) - Clear
Ford 429-460 (55GPM) - Blue Anodized
Ford 429-460 (55GPM) - Black Anodized

Part No.
CVR8560CL
CVR8560BL
CVR8560BK

FORD SMALL BLOCK

Suits Windsor and Cleveland engines. Mounts to stock location when used with CVR back plate (sold separately).

Inlet fittings are sold separately and can be changed between left and right side to suit radiator outlet.

Flow Rate: 55GPM Weight: 4.0 Lbs.

Special Coating: Bright Anodized (coloured units only)

Inlet Fittings and Back Plates Sold Separately

Application
Ford 289/302/351 (55GPM) - Clear
Ford 289/302/351 (55GPM) - Blue Anodized
Ford 289/302/351 (55GPM) - Black Anodized

Part No.
CVR8502CL
CVR8502BL
CVR8502BK

FORD Back Plates

Many of today's race cars use a full front motor plate or a belt drive system for the cam. In the Ford engine, the front motor plate or the cam belt drive may also be used to block off the centre chamber in the timing cover housing and drilled only in the one spot on each side to allow water to flow back into the engine block. In this case, the back plate is an unnecessary piece and may not be needed. In all other cases a back plate will be necessary.

HOLLEY FROSTBITE BILLET ELECTRIC WATER PUMP

Electric Water Pumps are a must for High Performance vehicles where horsepower comes at a premium. These pumps eliminate common issues found in traditional mechanical Water Pumps – Parasitic horsepower loss, heavy cast housings and impeller drag. Holley is proud to introduce its latest offering in the continued expansion of our newest brand – Frostbite Electric Aluminium Water Pumps. Our line of Performance Aluminium Electric Water Pumps are available in Black and Polished finishes with offerings for popular engine platforms. When it comes to keeping your cooling system performing at peak levels, make it Frostbite!

- Frostbite Water Pumps are available in Cast and Billet aluminium housings
- Billet Water Pump rated at 40gpm
- Free up lost horsepower resulting from use of mechanical pumps
- Custom Frostbite Logo laser etched for that performance look
- Ford Water Pump applications available with Block Off Plate
- Kits come complete with gaskets, wiring pigtail, and mounting hardware
- Applications available for Small Block Chevy, Small Block Ford, Big Block Chevy, Big Block Ford, and Ford 351C/351M/400M engines

Part No.
MZWP333N
MZWP333S

REPLACEMENT LS

ELECTRIC WATER PUMP

- Fits WP319, WP329, WP330, WP331 and WP332 pumps only.
- Suitable for street or drag strip use – 3000+ hour life expectancy.
- Show quality finish.
- Standard motor provides 55 gallons per minute free flow rating.
- All stainless-steel hardware included.
- Stainless steel large diameter main shaft with high performance ceramic seal.

Replacement LS 55 GPM Water Pump - Black **MZWP359S**

100 Series Water Pumps - Ford SB Early

WP111 is the most common pump body for small block Ford engines. It will bolt up to front covers from the very early 1964 style through 1993 and slightly beyond.

It has been used as the heart of many cooling systems and can be coupled with one of several different back plates to complete your system right.

- CNC Machined Aluminium Impeller
- One Piece Carbon Ceramic Seal
- RF Suppression Circuit In Motor
- Standard Motor Flows 35 GPM

300 series water pump –

Ford SB Early

Meziere 300 series electric water pumps are the Big Daddy of electric water pumps, capable of flowing 55 gpm enough for a 600 hp oval track car or a 2,200 hp Pro Mod. They have larger internal passages and heavy-duty motors, and are available in radiator, remote-mount, or engine-mount versions. These pumps feature CNC-machined aluminium housings, epoxy-coated motor windings, an RF suppression circuit, and a one-piece carbon-ceramic seal.

- Fits small block Ford Windsor and 5.0 models pre 1994
- Suitable for street or drag strip use – 3000+ hour life expectancy
- Show quality polished finish
- Standard motor provides 55 gallons per minute free flow rating
- All stainless steel hardware included
- Ports provided for heater and bypass
- Inlet fitting, heater and bypass fitting included
- Driver's or passenger's side lower hose connection
- Stainless steel large diameter main shaft with high performance ceramic seal
- Alternate inlet fittings available

Description	Part No.
Ford Small Block, Heavy Duty (55 GPM)	MZWP311U

100 Series Water Pumps - Ford SB Late

WP173 is the right choice if you have a later model front cover on your 5.0 or 351 engine. This is known as the 1994-1995 design and is also shared by Ford Motorsport front covers.

In addition, this has been the design chosen universally for front covers purchased with belt cam drive systems. This pump is shipped with O-rings for a positive pump-to-plate seal.

- CNC Machined Aluminium Impeller • One Piece Carbon Ceramic Seal • RF Suppression Circuit In Motor • Standard Motor Flows 35 GPM • Heavy Duty Motor Flows 40 GPM • 1" NPT Inlet Fittings Sold Separately • Backing Plates Sold Separately

Backing Plates - Ford

For the correct back plate carefully check the chart below. We offer a variety of plates to mate with the WP111 or WP173 pump. One of these back plates is used to cover the centre chamber in a stock type front cover. The back plate will not be used if you are using a modern belt cam drive system. Choosing correctly will ensure easy installation.

300 Series Water Pumps –

Big Block Chrysler & Hemi

American made with quality far superior to any other performance aftermarket company, we build our water pumps with pride right here in the USA. Don't

be misled by inflated flow numbers and competitors' outlandish claims. Our 300 series pumps move more water and produce more pressure than any other electric pump on the market. That means better protection for your high horsepower, high demand engine! Our 2-year, unlimited mileage guarantee and full satisfaction money back guarantee should convince you that buying Meziere is buying value!

This water pump model features:

- Fits big block Mopar
- Suitable for street or drag strip use – 3000+ hour life expectancy
- Show quality polished finish
- High flow design provides 55 gallons per minute free flow rating
- All stainless steel hardware included
- Light weight. Complete big block Mopar unit weighs only 8.1 pounds!
- Stainless steel large diameter main shaft with high performance ceramic seal
- Pump will clear cam belt drives and most blower drives
- Dual inlet ports machined to accept any of our WN style fittings

Description	Part No.
BB Chrysler & Hemi, Standard (55 GPM) - Polished	MZWP306U

BACKING PLATE - AMC

This plate is often used when converting to an electric pump. Many of our pump designs are not able to completely enclose the original water chamber in the cast aluminum timing covers such as are found in the AMC. Use this back plate to seal up the timing cover and successfully complete your water pump installation.

- Fits AMC 360 / 401 style cover • Designed to be used with pump WP111. • 3/16 thick aluminum. • CNC profiled. • Show quality finish.

Application	Part No.
AMC 360-401 Style Cover - Black	MZWP127S

REMOTE ELECTRIC

INLINE WATER PUMP

American made with quality far superior to any other performance aftermarket company, we build our water pumps with pride right here in the USA. Don't be misled by inflated flow numbers and competitors' outlandish claims. We say what we mean and mean what we say. Our 2-year, unlimited mileage guarantee and full satisfaction money back guarantee should convince you that buying Meziere is buying value! Remote pumps fill many different needs. When an engine mounted pump is not available or space limits the ability to use one, the remote pumps are the answer. Meziere makes more remote pump configurations than any other manufacturer in the performance market. We make pumps that flow from 20 to 55+ gallons per minute. Our pumps can be configured to use almost any size line. All of our pumps are built for cooling systems and can operate properly in a harsh environment.

- Remote / universal inline design
- Suitable for street or drag strip use.
- 2400+ hour life expectancy.
- Show quality finish.
- Light weight. Complete standard unit weighs only 5.2 pounds!
- Stainless steel large diameter main shaft with high performance ceramic seal.
- Single inlet port and single outlet port each threaded #12AN to accept a variety of fit-tings.
- #12AN, #10AN, #08AN, 1" or 3/4" slip hose inlet fittings available.
- Inline design works well as a stand-alone or as a booster pump.

Description	Part No.

EXTENDED INLET FITTING

This fitting is compatible with several of our 300 and 400 series water pumps. WP337, WP362, WP431 and WP432 are examples of a few pump numbers where this fitting could be used. The #16AN end is o-ring boss configuration and the #12AN end will accept a standard #12 hose end. Extra length can be helpful when 2 angled hose ends are running next to each other. This is common when used in conjunction with WP337 or WP362.

MZWP16E12B Extended -16ORB to 12AN

WATER PORT BLOCK

ADAPTERS

For systems that employ a remote or radiator mounted water pump, these adapters are the cleanest and best way to connect the lines to the engine. These plates are designed to help you connect AN style hoses to your engine block at the spots where the water pump usually bolts on. Each features a male AN thread connection.

Electric Water Pumps

The new, revolutionary designed Davies Craig electric water pump is a performance accessory that increases cooling capacity while giving you more engine power - in fact, up to 20 HP more power! Included in the kit, is everything you need to fit it to your car in an afternoon, including, easy to understand installation instructions. The EWP is universal and fits almost all makes and models of vehicles on the road today. For those who really want the best performance, an optional controller is available.

EWP80 Nylon - 80 Litres/Min	DC8005
EWP115 Nylon - 115 Litres/Min	DC8025
EWP115 Aluminium - 115 Litres/Min	DC8040
EWP130 Aluminium - 130 Litres/Min	DC8080
EWP150 Aluminium - 150 Litres/Min	DC8060
Aluminium EWP Adapter -16 (SUIT 8005 PUMP)	DC1025

EWP115 & EWP150 ALLOY PUMP WITH LCD DIGITAL CONTROLLER COMBO

The revolutionary EWP115 is now available in light weight aluminium bundled with our Digital Controller. Designed with the high-performance pro, sprint, tarmac, circuit and drag racer in mind this rugged Alloy electric water pump has AN-16 internal threads at inlet and outlet for neat, tight, dash fitting applications. All the same exciting features offered on the EWP115 are here on the street-smart alloy EWP. The LCD EWP & Fan Digital Controller is scientifically calibrated to manage the flow rate of engine coolant to lock onto a targeted engine temperature.

Male AN block plates

Male AN block plates are the perfect way to make the connection to the front of the engine when using a remote or radiator mounted pump. They are sold in pairs and are delivered to you with the required O-rings and hardware.

MZWP8116ANS Male AN Block Plates Small Block Chevy (black)

MEZIERE SB FORD

WATER PORT BLOCK

ADAPTER SET

For systems that employ a remote or radiator mounted water pump, these adapters are the cleanest and best way to connect the lines to the engine.

These plates are designed to help you connect AN style hoses to your engine block at the spots where the water pump usually bolts on. Each features a male AN thread connection.

- Fits small block Ford 5.0 model engine with 1994 and earlier timing cover; Windsor, Cleveland and 5.0.
 - Fully machined finish on all surfaces.
 - #12AN male connection ready to accept braided line.
- Note: These block adapters will not be correct for most aftermarket cambelt drive units. Use part #WP8212AN to mate to those drives.
Note 2: If you are adapting to a factory style timing cover you will need to use the appropriate back plate for your cover. Please call if you need assistance with this.

MZWP8312ANS Pre 1994, -12AN - Black

GM LS TOP HOSE FITTING

Many of our pumps designed for the LS engine use a special fitting on top. The pumps usually come with a 1.25" hose connection. However, if you require a fitting to help you connect to AN style hose, we have the solution. This fitting uses our standard pump interface but provides a male #20AN feature for easy plumbing. It is available in black anodized finish only.

UNIVERSAL ELECTRIC WATER PUMP

The Aeroflow Performance compact brushless electric water pump is designed for universal fitment to compliment or replace a vehicle's existing mechanical belt-driven water pump. This brushless design is a magnetically driven water pump which allows high flow of up to 46.6 Litres Per Minute with the larger 1 inch (25.4mm) barb and 40 Litre Per Minute on the smaller 3/4 inch (19.05mm) barb. Being a brushless design it has no brushes to ever wear out and the pump is magnetically driven by the motor, which means that no shaft sealing is required.

Dimensions:
Overall height: 96mm (3-1/32"). Overall length: 123mm (4-3/32").
Pump diameter: 60mm (2-1/32"). Mounting bolt centres: 76mm (3")

AF49-1051 Electric water pump 3/4 inch (19.05mm) barb
AF49-1052 Electric water pump 1 inch (25.4mm) barb

EWP Mounting Bracket

The Davies Craig EWP Mounting Bracket can be used with the EWP115, EWP130 & EWP150 both Nylon and Alloy versions. It offers greater flexibility and assists with the hard mounting of the EWP to the engine bay by providing a rubber dampener to minimise vibration damage.

EWP Bracket For 115, 130, 150 Litre Pumps DC8700

LCD EWP & FAN CONTROLLER

The unique LCD EWP/Fan Digital Controller will manage the operation of your chosen EWP® by varying the speed of your pump in response to coolant temperature and manage control of your electric Thermatic Fan. No need for a separate thermal switch. The Controller varies the speed of your EWP® looking for, and locking onto your target temp. If the engine temp goes 3 degrees C over the target, the Controller will run your radiator fan until the target temp is restored. And it now does 12 & 24 Volt.

- The prominent blue Liquid Crystal Display screen (pictured)
 - Now suitable for all 12V & 24V electrical systems, with relevant displays
 - Genuine Thermometer, with coolant and targeted/set temp. displays • Diagnostic check & warm-up signals
 - Nine (9) targeted/set coolant temperatures, 60°C (140°F) to 100°C (212°F) • Flashing "EWP" logo signifying water pump in operation • Davies Craig Thermatic Fan logo, circulating signifying fan in operation • Flashing High & Low Voltage indicators
 - Low & High Temp indicators
 - Audible alarm -
1. If coolant temp doesn't exceed 40°C (104°F) within 5 minutes of start-up
 2. when coolant temperature exceeds 10°C (50°F) of set/target 3. when coolant temperature exceeds 100°C (212°F)
- Above Set/Target Temperature indicator accompanies audible alarm
 - Temperature Sensor short & open circuit indicators
 - Automatic time-out, EWP runs for 3 minutes or until engine temp has reduced to -10°C (-14°F) below set/targeted temp whichever occurs first.

LCD EWP & FAN CONTROLLER (12 & 24V) DC8081

FORD WINDSOR

EARLY EWP ADAPTOR

The Davies, Craig Ford Windsor Early EWP Adaptor has been designed for use with EWP Electric Water Pumps and Davies, Craig Thermatic Fans to replace your belt-driven mechanical fan and pump on Ford Windsor V8 engines.

DC8640

EWP Header-Adaptor Kit Suit Holden 253-304-308

The Davies, Craig EWP Header-Adaptor Kit which has been designed for use with EWP Electric Water Pumps, #8025, #8040, #8060 and EWP® Combo Kits, Parts #8030, #8050 and #8070 to replace your existing belt-driven, mechanical water pump on Holden 253/308 V8 engines. Further, if your belt-driven, mechanical water pump has a mechanical fan, you will need to replace this fan with a suitable Davies, Craig Thermatic Fan. If you've purchased one of the EWP Electric Water Pump Combo Kits, then your EWP/Fan Digital Controller has a built-in thermal switch that will control an electric Thermatic Fan in unison with your new Electric Water Pump.

Holden Water Pump Header-Adaptor Kit

DC8600

ELECTRIC BOOSTER PUMP (EBP23) - PART NO: 9050

The EBP23 is a 'brushless' 12 volt, high flow (23 litres / 6.08 gallons per minute), magnetically driven water pump. The EBP motor has no brushes to ever wear out and the pump is magnetically driven by the motor, which means that no shaft sealing is required. The many EBP applications include: booster for car heater and LPG systems, solar pump applications, water cooled motorcycle, go-kart engines, turbo air / water intercoolers & household irrigation.

ELECTRIC BOOSTER PUMP (EBP23)

DC9050

DO NOT RUN DRY.
WARNING: WARRANTY WILL BE VOID IF THE PUMP IS RUN WITHOUT FLUID.

Electric Fuel & Water Pump Relay And Wiring Kit

AF 49-1038

Electric Booster Pump

The 12 volt Davies Craig Electric Booster Pump, with its high flow capacity, specially designed hermetic seal and robust magnetic drive, makes it ideal for a range of applications. Designed as a booster for car cooling/heating systems, it can also be used for efficient cooling of go-kart and motor cycle engines, water pumping in caravans and motor homes or as a circulation pump in water to air intercooler systems. The Davies Craig EBP flows 13.3 Litres a minute and takes 3/4" (19mm) inlet and outlet hoses.

Electric Booster Pump Kit DC9001
Electric Booster Pump (Pump Only) DC9002

Thermal Switch Adaptor Kit

Now there is no need to squeeze the probe of the Mechanical Thermal Switch or EWP Controller between the radiator inlet and radiator hose. This simple and economical Adaptor Kit allows easy fitting directly into the radiator hose. Just fit probe into compression fitting, remove about 17mm of radiator hose, fit adaptor between each end of hose, secure hose clamps and the job is done. The kit comes with everything you need for a watertight and effective installation. We even supply rubber sleeves to enable fitment to radiator hose sizes from 32 to 40 mm diameter.

Thermal Switch Adaptor Kit DC0409

MR GASKET ELECTRIC WATER PUMP DRIVE KIT

The electric water pump drive kit was designed to alleviate the power drag produced by conventional pulley drive units. A heavy-duty electric motor, turning at approximately 1,500 rpm, is more than adequate to fulfill cooling needs without draining precious horsepower from the engine. This unit can be turned on and off manually, during a run, or before and afterwards, even with engine off. The kit is complete with motor mounting bracket, extra long bolts, spline pulleys, drive belt, wiring and switch. Suits Chev, Chrysler and Ford V8 engines.

Water Pump Drive Kit Replacement Belt MG4333 G210L050

EWP HEADER-ADAPTOR KIT

Davies, Craig now offers a unique EWP® Header-Adaptor Kit to suit each of the Chev BB/SB engines. A simply designed, easy-to-fit Adaptor Kit replaces the existing belt-driven mechanical water pump on the front of the Chevrolet V8 engine block. This Adapter Kit compliments the fitment of either of the following EWP® Electric Water Pump Combo Kits (Part #8030, #8050 or #8070). The EWP Adaptor Kit is supplied with 2 cast adaptors which simply bolt on to the front of the block after removal of the mechanical water pump. A 'Y' shaped blue silicone, 38mm ID hose, hose clamps, heater by-pass adaptor and return are also supplied. These are connected to the 2 adaptors and the EWP of your choice then attached to the bottom radiator hose. Further, if your Chevrolet V8 still has a mechanical driven fan (through the mechanical water pump), you will need to replace it with a Davies, Craig Thermatic Fan. If you've purchased an EWP® Combo Kit, then you will have an EWP/Fan Digital Controller with a built-in switch that will thematically control the new electric Thermatic Fan in unison with your new EWP®. Simple easy-to-follow installation instructions are supplied to ensure these Davies, Craig EWP® Electric Water Pump Combo and Header-Adaptor Kit are assembled, mounted and perform in accordance with the product's design.

EXHAUST WRAP & INSULATION

EXHAUST INSULATING WRAP

The Original Exhaust Insulating Wrap was developed almost 20 years ago by Thermo-Tec. Exhaust Insulating Wrap is an innovative way to create more horsepower and reduce temperatures under the hood. Wrapping headers with Exhaust Insulating Wrap maintains hotter exhaust gases that exit the system faster through decreased density. This produces increased exhaust scavenging, as well as lower intake temperatures. Exhaust Insulating Wrap withstands continuous heat up to 2000°F (1095°C) and it contains no asbestos. Exhaust Insulating Wrap, available in natural and graphite black colors, is sold in 15 ft. (4.5 Metre) and 50 ft. (15 metre) rolls, 1 inch (25mm) and 2 inches (50mm) wide. All Exhaust Wrap has a low profile 1/16 inch thickness.

Description	15 Ft Roll	50 Ft Roll
1" Wide - Natural	TT11151	TT11001
2" Wide - Natural	TT11152	TT11002
1" Wide - Black	TT11153	TT11021
2" Wide - Black	TT11154	TT11022

CARBON FIBER EXHAUST INSULATING WRAP

Hi-Tech Carbon Fiber appearance and Titanium like strength, Carbon Fiber Exhaust Insulating Wrap is produced utilizing pulverized Lava rock called basalt. It is extremely pliable, resistant to discoloration and can withstand 2000 degrees Fahrenheit in direct continuous contact.

1" Wide X 50' Ft Roll	TT11041
2" Wide X 50' Ft Roll	TT11042

Generation II Copper Exhaust Insulating Wrap

Generation II Copper Header Wrap improves heat resistance up to 30% more than current insulating technology, by utilizing a new proprietary coating developed by Thermo-Tec. Available in 50 foot lengths, 1" and 2" widths.

1" Wide x 50 Ft Roll	TT11031
2" Wide x 50 Ft Roll	TT11032

High-Velocity Exhaust Jackets

The Quick Wrap High-Velocity Exhaust Jacket is an innovative way to insulate and block radiant heat, using Thermal-Conductive-Technology. The jacket covers the tubes vertically allowing for a consistent fit. This allows the exhaust system to expand without restriction as it comes up to operating temperature and provides air space for added insulation. High-Velocity Exhaust Jackets can be applied with the headers on the vehicle.

4-6 Cylinder kit	TT11246
8 Cylinder kit	TT11248

Header Manifold Blanket

The Header Manifold Blanket provides excellent heat retention for exhaust headers and manifolds. This flexible heat shield simply clips into place on the upper portion of the header. The fabric side of the material faces the heat source; the aluminized side faces away, offering protection from abrasion and harmful liquid spills. The Header Manifold Blanket is available in two different kits: Two 20" x 24" blankets for V-6 and V-8 applications or One 36" x 40" blanket for straight 6 & 4 cylinder engines.

V6 and V8 Kit	TT14003
4-cylinder & straight 6 Kit	TT14004

Muffler/CAT Heat Shield

The Muffler/CAT Heat Shield is made up of woven silica with a flexible mylar finish. The highly reflective heat shield can be installed between the catalytic convertor, muffler or any other component to reflect radiant heat away from the under-carriage. Kit includes fasteners.

Muffler Shield 24" x 40" (610 x 1015mm) TT16500

Kevlar Muffler Cover

Handles continuous temperatures up to 1100° F (590° C). Reduces radiant heat inside vehicle. Dampens muffler noise and vibration. Includes stainless steel straps for installation. Neat attractive appearance and is abrasion resistant.

Kevlar Muffler Cover 24" x 40" (610 x 1015mm) TT16800

SEAM TAPE

Seam Tape consists of a two layer, highly reflective foil with a special acrylic adhesive system. This flame retardant tape is highly puncture proof, tear resistant and features superior adhesion even under the most extreme conditions

Description
2" x 30'

Part No.
TT13997

EXPRESS SLEEVE

Express Sleeves are exactly what our customers have been looking for.

The easy to use sleeving is a combination of a high temperature insulation material to a highly reflective Mylar foil with a hook and loop closure. The sleeving is designed to provide maximum protection for wires, hoses, and cables from the very damaging effect of radiant heat with an easy application. Simply pull apart the material, wrap around the wire, and re-close the sleeving. Express Sleeves reflect over 90% of radi-ant heat up to 2000 degrees Fahrenheit. It is also fireproof, fire resistant, and just looks good. Ex-press Sleeves come in 2 sizes: 1/2" to 1" and 1" to 1 1/2" in diameter and in 3', 12', and 50' lengths. Express Sleeve is also available in custom widths and lengths for special applications. Contact us today for special orders. Made in the USA

Size	Part No.
1/2" to 1" I.D (12mm to 25mm)	TT14031

HEAT SLEEVE

This new silicone-coated fiberglass fire sleeving is designed to protect wires, cables and hoses from high-temperature exposure, liquid spills and occasional exposure to flame. The high-quality sleeving is made in the U.S.A. from braided fiberglass and coated with a compound silicone rubber. It is capable of continuous protection to 500°F and short-term exposure thru 2200°F. Available in two colors, silver and black; three diameters, 1/2 in., 3/4 in. and 1 in; and three lengths, 3 ft., 10 ft. and 50 ft.

Size	Part No.
3/4" X 3', Black	TT18075

Turbo Insulating Kit

The Turbo Kit was designed to protect and improve performance of the turbo. This universal kit will keep the turbo spooled up and it virtually eliminates turbo lag. The custom cut-to-fit kit comes with a substantial amount of material to cover turbos from the smallest automotive application to heavy-duty truck applications. Two Turbo Kits are available, a 4 cylinder kit and one for 6 & 8 cylinders.

4 Cylinder kit	TT15001
6 & 8 Cylinder kit	TT15002

Starter Heat Shield

The Starter Heat Shield was developed to eliminate starter problems caused by close proximity of the exhaust to the starter. The universal kit enables the user to insulate the starter and solenoid. The unique construction of the aluminized material provides protection by reflecting 90% of radiant heat, up to 2000°F (1095°C).

Starter Heat Shield 7" x 22" TT14150

Cool-Air Tube Heat Shield

The Cool-Air Tube Heat Shield features a unique lace-up design. This unique design allows this heat shield to fit air tubes from 2-1/2" to 4" in diameter, up to 3' in length. Like most of Thermo-Tec's products, it blocks more than 90% of radiant heat from the exhaust, protecting the air tube from the destructive effects of high heat. For an added kick, Cool-Air Tube Heat Shield comes with laces in four different colors - white, blue, red and yellow.

3 ft. adjustable diameter shield TT14500

Cool-It Plug Wire Sleeves

This unique spark plug and ignition wire protector comes in red, blue and black. These dual purpose sleeves enhance performance, reduce mistfires, extend plug wire life and will not react with petroleum products. The double-wall construction keeps the wire and boot cooler in a high temperature engine. Its universal size fits most boots, is easy to install and is non-flammable. Cool-It Plug Wire Sleeves can be used in any temperature environment from street vehicles to motor homes. Sleeves are available in packs of 4 & 6.

Description	4 Pack	6 Pack
Red Plug Wire Sleeves	TT14261	TT14271
Black Plug Wire Sleeves	TT14262	TT14272
Blue Plug Wire Sleeves	TT14263	TT14273

Thermo-Shield

Thermo-Shield is a combination of materials laminated together to provide a barrier against the extreme conditions that under-hood components are exposed to. This aluminized adhesive-backed tape is great for wrapping the hoses and wires you don't want to remove. Thermo-Shield reflects radiant heat up to 2000°F (1095°C). Thermo-Shield Ultra offers twice the thickness for extra durability.

1-1/2" x 15 ft. Thermo-Shield TT14002
2" x 50 ft. Thermo Shield TT13995

Thermo-Sleeve

Thermo-Sleeve is the combination of a high temperature fabric laminated to a highly reflective Mylar foil. It provides protection from radiant heat for hoses and wires. Thermo-Sleeve's ultra light weight construction provides more insulation than traditional bulky rubber-coated fiberglass. The aluminized sleeve reflects more than 90% of radiant heat. It is fireproof and oil resistant. Thermo-Sleeve is packaged in 3 foot or 12 foot lengths and five different inside diameter sizes.

Size	3 Foot	12 Foot
1/4" to 1/2" (6 to 12mm)	TT14005	TT14006
5/8" to 1" (16 to 25mm)	TT14010	TT14011
1-1/8" to 1-1/2" (28 to 38mm)	TT14015	TT14016

2-1/8" to 2-1/2" (53 to 63mm)	TT14025	TT14026

Thermo-Flex

Thermo-Flex heat shield is a composite material with unlimited uses. The material is manufactured to provide abrasion resistance, thermal insulation and physical containment of hoses and wiring. The combination of aluminum and silica produces a sleeving that is flexible, light weight and strong. Thermo-Flex can be slit for applications such as wire looms or hose-covering with out disconnecting the ends of the wire or hose.

5/8" x 3 ft. (15 x 915mm) Silver TT17062
3/4" x 3 ft. (15 x 915mm) Silver TT17075

Micro Louver Heat Shield

Lightweight yet extremely durable, this aluminum shield features micro air louvers. These tiny vents allow air to flow through the metal shield. The movement of air across the textured surface of the shield cools by natural convection. The flexible shield bends easily by hand, making it easy to hand-form a custom fit.

12" x 24" (305 x 610mm) TT11710
24" x 24" (610 x 610mm) TT11720
24" x 48" (610 x 1220mm) TT11740

Adhesive-Backed Heat Barrier

The adhesive-backed composite material can be easily applied to any surface or wrapped around a hose or wire to make a clean, professional appearance. The highly reflective surface is capable of withstanding radiant temperatures in excess of 2000°F (1095°C)

Adhesive Backed Heat Barrier is available in four sizes.
12" x 12" (305 x 305mm) TT13500
12" x 24" (305 x 610mm) TT13575
24" x 36" (610 x 915mm) TT13585
24" x 48" (610 x 1220mm) TT13590

Aluminized Heat Barrier

This flexible, high temperature material makes it an excellent choice for any application when a versatile heat control product is needed. For conductive heat applications, the fabric side can handle temperatures in the range of 350-1200°F (175-650°C). The highly reflective metallic surface is capable of withstanding radiant temperatures of up to 2000°F (1095°C).

Heat Barrier 36" x 40" (915 x 1015mm) TT14001

Cool-It Insulating Mat

Use the Cool-It Mat to battle excessive heat and noise that penetrates the driver compartment through firewalls and floorboards. Cool-It Mat is also perfect for use in doors, under hoods and above transmission housings. Cool-It Mat is composed of resin-bonded silica blanketing insulation sandwiched between a mylar facing and a foil facing. The highly reflective mylar reflects the heat away from surfaces, while the foil side is oriented away from the heat source to conduct any penetrating across its surface, providing the ultimate in heat protection. The silica blanketing is a dual-density composite which acts as the sound insulator. Cool-It Mat is easy to trim and it can be applied with the provided push-in fasteners or with Thermo-Tec's Heavy-Duty Spray Adhesive.

24" x 48" (610 x 1220mm) TT14100
48" x 48" (1220 x 1220mm) TT14110

Thermo-Guard FR

Thermo-Guard FR offers the best in heat and sound insulation. This lightweight, durable shield does everything: reduces sound, absorbs vibration, protects from radiant heat and provides an extra layer of insulated padding. The product features 100% polyester fiber felt that provides sound and comfort control and a high-tech foil heat barrier that blocks more than 90% of radiant heat. Thermo-Guard FR is very easy to apply and it can be trimmed to fit anywhere. Great for use in trucks, RVs, buses, cars, aircraft and homes. Available in two sizes with one or two foil sides: the polyester felt material is also available without foil. May be applied with Thermo-Tec's new Heavy-Duty Spray Adhesive. **48" x 72" (1220 x 1830mm) one-side foil TT14120**
48" x 72" (1220 x 1830mm) two-side foil TT14125

The Suppressor

The Suppressor is ideal where both sound and radiant heat control is desired; perfect for firewalls, floorboards and doors. These high-quality mats offer the best in sound-dampening and heat control. The high-density polyethylene film with an aluminium foil composite is abrasion and tear resistant. Both mats are 5mm thick with a high-temperature adhesive backing. Installation is simple: cut to fit, peel away backing, press in place and remove air bubbles with the Mat Roller. We also offer the best tool for installation of these acoustical mats - the 2" Mat Roller. **12" x 12" (2 pcs) TT14600**
36" x 24" (915 x 610mm) TT14610
36" x 60" (915 x 1525mm) TT14620
Mat Roller TT14800

Kevlar Heat Barrier

The Kevlar Heat Barrier is made from Kevlar with a Mylar finish. The Barrier can withstand up to 3000° F (1650° C) of radiant heat and can stand direct contact up to 1100° F (590° C). The product can be installed using standard rivets with a backup washer or weather strip adhesive. The use of clamps or straps such as Thermo-Tec's Snap Strap can be used to hold the blanket in place for applications on manifolds or exhaust systems. **Kevlar Heat Barrier 24" x 40" (610 x 1015mm) TT16850**

Battery Wrap Heat Barrier

Battery Wrap is a combination of materials designed to provide the ultimate in protection from battery heat and vibration. The heat barrier is made up of woven silica with a flexible aluminized finish. The highly reflective surface of this material is capable of with standing radiant temperatures in excess of 2000°F. Battery Wrap is available in a kit that includes a 8" x 40" piece. **Battery Wrap Barrier kit TT13200**

Snap Strap

New and improved! Same quality stainless steel straps with a dependable multi-lock system, now in standard lengths. No more cutting to length, then attaching the lock. Narrow width straps come in pre-cut lengths with the multi-lock already attached - just insert the end and pull to tighten. Snap Strap comes in individual sizes of 9" and 18"; also in kits for V-6 or V-8 applications. **V-8 Kit 8 x 9" straps & 4 x 18" straps TT13101**
V-6 Kit 6 x 9" straps & 4 x 18" straps TT13105
12 Pack of 9" straps TT13150
6 Pack of 18" straps TT13160

Hi-Heat Coating

Use the Hi-Heat Coating to finish off a clean and well-protected Exhaust Insulating Wrap installation. The coating will protect the wrap from abrasion and harmful liquid spills. Extra resins and binders toughen the surface and help extend the life of the wrap by protecting it from friction. They also seal the pores to minimize the penetration of harmful liquids. The 11oz. (325mL) spray coating now comes in three colors - black, aluminium and copper. **Black 325mL. TT12001**
Aluminium 325mL. TT12002
Copper 325mL. TT12003

Heavy-Duty Spray Adhesive

Heavy-Duty Spray Adhesive is the answer when you need a quick-drying, long-lasting spray adhesive in a high-temperature application. Extra-strong contact-style adhesive sets quickly, lasts even in high-temperature situations. Use with Thermo-Guard FR, Cool-It Insulating Mat, Aluminized Heat Barrier and more. Comes in a large 16 oz. (473mL) spray can. **Heavy-Duty Spray Adhesive TT12005**

EXHAUST INSULATION HEAT WRAP

(White and Black)

Aeroflow's exhaust wrap is an innovative way to reduce unwanted and power-robbing engine compartment heat. By wrapping your exhaust headers and down pipes you decrease exhaust density and increase exhaust flow resulting in more power! The white and black exhaust wrap is rated to withstand 650°C (1200°F) direct heat and 1100°C (2000°F) of radiant heat. **Part No Colour Description**

Part No	Colour	Description
AF91-3000	White	25.4mm (1") x 15.24m (50ft)

SNAP-LOCK TIES

Aeroflow's Snap-Lock ties are a perfect choice for securing your wrap or cables from extreme heat areas that will handle 200lbs of tensile strength. Simply pull to tighten. Manufactured from 316 stainless steel and will handle 1370°C (2500°F). Available in two kits: 229mm (9") Long x 12 pieces and 457mm (18") long x 6 pieces. **Part No Description Length**

Part No	Description	Length
AF91-7000	Snap Lock Ties 12 Piece x 229mm (9") Long	
AF91-7001	Snap Lock Ties 6 Piece x 457mm (18") Long	

AF91-6051

AF91-6050

HEAT GUARD SPARK PLUG BOOTS

Aeroflow's spark plug boot and ignition wire insulator is the perfect solution for tight headers and turbo manifolds, also act as a dual purpose spark insulator to reduce misfires, extend plug wire and boot life and will not react to petroleum products. Universal size fits most boot sizes and can easily flex for angled boot applications. Easy to install and most importantly non-flammable. Sold as 4 packs. Dimensions: 155mm (6-7/64") long, 25.4mm (1") diameter. **AF91-6050 Black 1100°C (2000°F) radiant, 260°C (500°F) direct**
AF91-6051 Titanium 1650°C (3000°F) radiant, 1100°C (2000°F) direct

BRAIDED SLEEVE HEAT SHIELD

Insulates hoses and cables in high heat areas. Withstands up to 500°C (932°F) and splashes of 1100°C (2000°F). Not recommended for direct contact with heat source. Available in 3.7m (12ft) or 1m (3ft) lengths **Part No I.D. Suits Hose Length**

Part No	I.D.	Suits Hose	Length

FLEX BRAID WRAP

Black tight weave high coverage Aeroflow's heat-flex braid is lightweight and extremely flexible. Heat-flex braid can be used for insulating wire bundles or cables while offering that factory look. Heat-flex braid can also be used on heater and radiator hoses. With a tough woven construction, heat-flex provides a continuous temperature rating of up to 127°C (260°F) and a melting temperature of 250°C (482°F). Available in 1m (3ft) and 7.6m/25ft length rolls in 6.35mm (1/4"), 12.7mm (1/2"), 25.4mm (1") and 38.1mm (1-1/2") size I.D. Can be terminated with heat-shrink or Aeroflow hose end finishers for that professional look. **Part No Descriptions Length**

AF91-7553	38.1mm (1-1/2")	7.6m 25ft

ALUMINISED

HEAT SLEEVE

Aeroflow's new heat sleeve is designed to simply slide over hoses, cables and wires to provide the ultimate protection from radiant heat. It is constructed from a fibreglass inner weave and protected by an aluminised heat barrier that also protects from fluid and oil spills and is capable of withstanding 260°C (500°F) direct heat and 1100°C (2000°F) radiant heat.

Part No	Min ID	Max ID	Length

FLEXIBLE SELF ADHESIVE HEAT BARRIER

Aeroflow's adhesive backed barrier has the same high quality features as the flexible heat barrier with the added adhesive back allowing neat and easy installation. Flexible adhesive backed barrier can only be applied one way adhesive side down. Withstands 2000°F/1100°C radiant heat and 1200°F/650°C direct heat, can be trimmed to fit then simply peel and stick.

Part No	Description	Style
AF91-4000	38.1mm (1.5") x 4.5m (15ft)	Roll
AF91-4001	305mm (12") x 305mm (12")	Sheet
AF91-4002	305mm (12") x 610mm (24")	Sheet
AF91-4003	610mm (24") x 915mm (36")	Sheet
AF91-4004	610mm (24") x 1220mm (48")	Sheet
AF91-4005	159mm (6.25") x 660mm (26")	Sheet

FLEXIBLE SELF ADHESIVE GOLD HEAT BARRIER

Aeroflow's adhesive backed barrier has the same high-quality features as the flexible heat barrier with the added adhesive back allowing neat and easy installation. Flexible adhesive backed barrier can only be applied one-way adhesive side down. Withstands 1100°C (2000°F) radiant heat and 650°C (1200°F) direct heat, can be trimmed to fit then simply peel and stick.

FLEXIBLE HEAT BARRIER

Aeroflow's heat barrier is an excellent method for reflecting unwanted heat from surfaces needing protection. Minimal thickness to provide an easy installation and can be retained in place with Aeroflow's stainless straps or simply riveted in place. When used as a heat SHIELD the barrier should be installed so the bright metallic surface faces the heat source. When used to RETAIN heat, the fabric side faces the heat source. This allows the metallic surface to act as a barrier to prevent penetration of fluids. Withstands 2000°F/1100°C radiant heat and 1200°F/650°C direct heat and can be easily trimmed to desired size.

Part No	Description
AF91-6000	508mm (20") x 305mm (12")
AF91-6001	1016mm (40") x 305mm (12")
AF91-6002	1016mm (40") x 914mm (36")
AF91-6003	1016mm (40") x 183mm (72")

MANIFOLD HEAT SHIELD TO SUIT

LS INTAKE

Aeroflow's new LS Intake Manifold will give you an increase in horsepower! By shielding the intake manifold and reducing the heat radiating up from the engine, this shield will lower intake manifold temperatures creating a more dense fuel and air mixture hence creating more power. Being adhesive backed, the heavy duty adhesive will stick to any clean semi-smooth surface and will enhance the look and performance of your LS! With oversized front and rear, with some slight trimming it will be a perfect fit to your manifold. Withstands up to 1100°C (2000°F) radiant heat & 260°C (500°F) of direct heat.

AF91-4050 Suits LS Chev intake manifold shield trim to fit

FUEL JUG COVERS

Aeroflow's fuel jug cover will keep your race fuel cool! Available in both square and round 5 gallon jug styles. Protect your fuel at the track.

AF91-8050 Square & round jug cover

ALUMINISED STARTER HEAT SHIELD

Aeroflow's new Aluminised Starter Heat Shield is the latest in heat prevention to your starter motor. Due to starter problems that can be caused by the close proximity of an exhaust to the starter, these shields are perfect for enabling the user to insulate the starter and solenoid. Withstanding 1100°C (2000°F) radiant heat & 260°C (500°F) of direct heat, this heat shield with protect your starter from heat and increase the longevity of your starter motor. Supplied with 2 straps.

AF91-6010

EMBOSSED HEAT SHIELD

The Aeroflow Performance multi layered aluminium embossed heat shielding is the most effective way to control and manage radiant heat in any application. It can cut the effects of radiant heat by up to 90% to protect vital components in your vehicle from heat soak. This shielding is easy to cut with tin snips or scissors and can be drilled or screwed together to create a variety of different shapes. Simply fold and form edges with a hammer on a square edge. Thickness: 0.85mm (1/32")

AF91-4580 12" (304.80mm) x 12" (304.80mm)

AF91-4581 12" (304.80mm) x 24" (609.60mm)

AF91-4582 24" (609.60mm) x 24" (609.60mm)

NOISE & HEAT INSULATION

Aeroflow peel and stick adhesive backed heat / noise suppressor is constructed from the highest quality material. The pressure sensitive adhesive makes it a breeze to install especially in hard to reach places. The versatility of the heat shield allows it to be used in interior and exterior applications: to block out heat around fuel tanks and exhaust systems and provide acoustic sound deadening inside the cabin. Thickness of 2.7mm (7/64")

AF91-4500 24" (609.60mm) x 30" (762mm)

AF91-4501 24" (609.60mm) x 60" (1524mm)

AF91-4502 24" (609.60mm) x 90" (2286mm)

Aeroflow ROLLER APPLICATOR

Installing the heat and sound barrier materials is made easy with our Aeroflow applicator roller to help roll the mat for a smooth and even finish. Quality timber handle is versatile for any peel and stick product in the Aeroflow Performance insulation range. It features a sealed bearing spindle with a urethane wheel that is 50mm (1-61/64) wide.

AF98-2113

TURBO BAGS / BLANKETS

The Aeroflow Performance turbo bag / blanket range provides high quality material selection, design, and construction, whilst at an affordable price. The turbo bag isolates the heat produced by your turbocharger. This will prevent that heat from damaging components surrounding the turbocharger within your engine compartment such as wiring, hoses and plastics. When the heat is isolated in the turbocharger it improves turbocharger efficiency by keeping the exhaust gases hot. Resulting in faster spool up of the turbocharger and thus less turbo lag and a more linear power curve. Available in three different options black, titanium and carbon Universal replacement turbo bag springs available AF59-2100

STANDARD SERIES

High temp silica material rated to 1370°C/2500°F internal & 600°C/1100°F external

AF91-1006	Suit GT25/GT28 Internal gate (T28)

WASTEGATE TURBO BAG / BLANKET

The Aeroflow Performance external wastegate bag / blanket range provides high quality material selection, design, and construction, whilst at an affordable price. These wastegate bags are designed to help minimize the heat soak transfer between the main body and actuator body of the wastegate. This will allow a more stable operation of the wastegate valve allowing consistent performance of the turbo-charger. The added benefit from these bags will prevent the heat from damaging components surrounding the external wastegates such as wiring and hoses. Will suit Aeroflow External Wastegates. May also suit other brands. Available in two different options titanium and carbon.

TITANIUM SERIES

- AF91-8038 38mm wastegate bag titanium
- AF91-8044 44mm wastegate bag titanium
- AF91-8060 60mm wastegate bag titanium

CARBON SERIES

- AF91-8838 38mm wastegate bag carbon
- AF91-8844 44mm wastegate bag carbon
- AF91-8860 60mm wastegate bag carbon

SURE FIT SERIES COMPLETE KITS:

All above plus under hood kit including condenser and drier package. Attaches to existing radiator mounting holes. Comes with SuperFlow condenser, mounting brackets, standard drier, safety switch, pre-formed aluminium lines, and all mounting hardware. You must provide v-belts and refrigerant. Compressor sold separately.

AIR CONDITIONING

The HERITAGE Series

The latest in under dash evaporator kits. Available in three different bezels to complement any interior theme, the heritage Series is a great choice when your hot rod plan includes and under-dash style evaporator. Bezel choices include engine-turned aluminium, brushed aluminium and mother of pearl. Offered in both cool only and cool & heat configurations. Dimensions 16.25" x 11.5" x 6"

COOL ONLY

- Mother of Pearl VA674001
- Engine Turned Aluminium VA674002
- Brushed Aluminium VA674003

COOL & HEAT

- Mother of Pearl VA674011
- Engine Turned Aluminium VA674012
- Brushed Aluminium VA674013

Mark IV - Under Dash Cool Only System

Vintage Air has created an exact reproduction of the most popular under dash air conditioner ever made. The Mark IV features an all steel case built from the original tooling. The timeless look of chrome and real steel combined with Vintage Air's proven performance makes the new Mark IV a great choice for your period perfect ride. Comes complete with under dash evaporator and mounting brackets built-in controls and drain kit.

Mark-IV - Under Dash Cool Only System VA672001-VHY

GEN-IV MAGNUM UNIVERSAL System

GEN-IV technology delivers OEM quality climate control. Now you can enjoy true bi-level, infinitely adjustable comfort in your classic car. This large system can handle even the largest sedan or wagon. GEN-IV systems come complete with: evaporator and mounting brackets, wiring harness, electric solenoid heater control valve, A/C duct hoses, drain kit and defrost hoses and ducts.

Gen IV System features:

- Fully electronic operation - No cables or vacuum controls
- Micro-processor controlled coil temperature monitor.
- No capillary tube to install!
- Separate high capacity heat and cool coils
- Aluminium plate /fin A/C coil (most efficient design available)
- Copper/brass cuprobrase parallel flow heater coil
- In full A/C mode air bypasses heater core for less restriction
- Blend air door for instant temperature adjustment
- Infinite dash/floor air blend
- Infinite defrost /floor air blend with dedicated defrost
- Variable speed blower motor
- Positive shut off solenoid heater control valve in max A/C
- Multiple control panel options

Gen-IV Magnum - Heat, Cool & Defrost VA671400-VUZ

GEN-II Compac - 68000 Series

Amazing performance in a compact system. State of the art GEN-II servo motor control technology makes this mid sized package work better than most other's full-size systems. Amazing performance with three vents allowing you to position louvers wherever you need them. The ideal system for the coupes and smaller sedans and wagons. Features true bi-level operation in cool and heat modes and a more powerful dedicated dehumidified defroster mode.

GEN-II Compac - Heat, Cool & Defrost VA68000-VUZ-A

Gen II HEATER

New design provides superior performance from servo motor controlled air door, improved case design and our exclusive electronic servo actuated heater control valve. New three knob control operates temp, fan speed and heat/defrost balance mode. Includes universal defrost ducts. Also may be used with optional dash louvers. Includes three knob control panel (knobs can be mounted directly into dash) Includes Our Electronic Gen II Servo Controlled Heater Water Valve for positive temp adjustments VA506101 Heater with defrost and servo door control

GEN-II Super Cooler – 61005 Series

The absolute performance leader. State of the art GEN-II servo motor control technology is the foundation of our most popular heat & cool system ever. Amazing performance is achieved with the GEN-II Super's new "D" shaped air outlets. As an added benefit, you can position all 4 louvers wherever you need them. The ideal system for the largest sedans and wagons. Features true bi-level operation in cool and heat modes and a more powerful dedicated dehumidified defroster mode.

GEN-II Supercooler - Heat, Cool & Defrost VA61005-VUZ-A

GEN-II Mini – 66005 Series

GEN-II technology for the smallest cars and trucks. State of the art GEN-II servo motor control technology is now incorporated into our smallest heat & cool system. All new CAD designed case allows more capacity and air flow than our original Compac systems. The ideal system for utes and smaller hot rods. Features true bi-level operation in cool and heat modes and a more powerful dedicated dehumidified defroster mode.

GEN-II Mini - Heat, Cool & Defrost VA66005-VUZ-A

EVAPORATOR SETUP UNITS

THE EASIEST WAY TO FIT YOUR EVAPORATOR UNIT INTO PLACE.

These mock-ups are representative cases with jack-nuts and brackets for each system but without the internal components so they are extremely light weight - helpful while holding the unit in place to determine fitment, mounting and hose routing.

VINTAGE AIR CONTROLLERS

Streamline

Proline Aluminium

Control Panel

Internally lighted,
 4.5 in. wide x 2 in. tall
VA49120-VUQ
 Brushed Aluminium

4-Lever Standard Gen-II Fingertip Control

Only Gen-II delivers true OEM style louver air temperature regulation and bi-level operation of a/c and heat modes! This standard panel uses our exclusive servo actuated heater valve which allows the introduction of small amounts of heat to regulate air temperature. Simplified installation with plug-in connections, no vacuum lines, and fewer wires to route. Slightly larger face allows you to upgrade from existing vacuum system Proline Panel installations.

Description Part No.
 Horizontal, 4.63" x 2.44" Internally Lighted **VA49110-SHQ**
 Vertical, 2.44" x 4.63" Internally Lighted **VA49110-SVQ**

4-Lever MACHINED FACE Gen-II Fingertip Control

Gen-II Machined Face Panels Aluminium slide control panels put just right temperatures at your fingertips. Available in horizontal or vertical design.

Description Part No.
 Horizontal, 4.69" x 2.50" Internally Lighted. **VA48103-SHQ**
 Vertical, 2.50" x 4.69" Internally Lighted. **VA48102-SVQ**

Gen-II Streamline Panel

This Gen II control panel features same styling and dimensions as the original Vintage Air design! Engraved, polished black anodized panel. Internally lighted though the soft glow aluminium knobs.

Description Part No.
 3 Knob Oval Panel 5.5" x 2.5" **VA48104-RHQ**
 3 Knob Oval Panel 5.5" x 2.5" Black **VA481005**

UNDERDASH PODS FOR 4-LEVER CONTROLS

Underdash pods for GEN-II horizontal 4-lever control panels (control panels sold separately).

Description Part No.
 Underdash Pod for 4-Lever Panel **VA47211-SHA**
 Underdash Pod for 4-Lever Panel w/ Louver **VA47210-SHA**

4 Knob Gen-II Streamline Panels.

Our latest Streamline design fits in very compact dash or console positions. Controls all functions of any Gen-II system. Engraved aluminium panel is available in fully polished or black anodized finish. Knobs are internally lighted with a soft glow.

Description Part No.
 4 Knob Streamline 5.318" x 1" Polished **VA491200-RUA**
 4 Knob Streamline 5.318" x 1" Black **VA491229**

3 Knob Gen-IV Streamline Panel

The new all-electronic Gen-IV systems use one of these super compact 3 knob control panels. Featuring engraved mode icons and your choice of polished or black anodized finish. Internal soft-lighted aluminium knobs.

Description Part No.
 3 Knob Horizontal 4.125" x 1.25" Polished **VA491210-RUA**
 3 Knob Vertical 1.25" x 4.125" Polished **VA491214-RVA**
 3 Knob Horizontal 4.125" x 1.25" Black **VA491223-RUA**
 3 Knob Vertical 1.25" x 4.125" Black **VA491226-RVA**

4 KNOB UNDERDASH PODS

Sold complete for GEN-II systems with servo heater valve.

Description Part No.
 GEN-II 4 Knob Underdash Pod **VA49200-RHA**
 GEN-II 4 Knob Underdash Pod w/ Louver **VA49205-RHA**

CUSTOM KNOBS

These custom knobs are perfect to dress up your 4-knob controller or for custom panels or dash installs when used with the decals listed below.

Description Part No.
 Streamline Knob - Plain **VA49302-VUQ**
 Streamline Fan Knob (F) **VA49303-VUQ**
 Streamline Mode Knob (M) **VA49304-VUQ**
 Streamline Temp Knob (T) **VA49305-VUQ**
 Red Pearl Custom Bullet Knob **VA48700-RUK**
 Blue Pearl Custom Bullet Knob **VA48701-RUK**
 Green Pearl Custom Bullet Knob **VA48702-RUK**
 Gold Pearl Custom Bullet Knob **VA48703-RUK**

DECALS

These replacement decals for the 4 knob underdash pod can be used to create custom panels or for seamless dash installs.

Description Part No.
 Mode Decal **VA20559-VUP**
 Fan Decal **VA20558-VUP**
 Heat Decal **VA20572-VUP**

Dakota Digital

Dakota Digital Climate Control

The DCC-2200 and DCC-2300 Digital Climate Control systems were created to interface directly to a Vintage Air Gen-II Air Conditioning system, they provide the convenience of full climate control. Similar to other Dakota Digital instruments, they offer a full character Vacuum Fluorescent Digital readout for a simple and beautiful approach to updating your A/C system. With a direct plug-in into the Vintage Air Gen-II's wiring harness and the addition of three temperature senders installation is nearly effortless.

NOTE: The Digital Climate Control system is designed for Vintage Air Gen-II systems only and is not compatible with factory equipment or other aftermarket models or manufacturers.

DAK0CC-2200 Climate Control System / Rectangular Bezel
DAK0CC-2300 Climate Control System / Elliptical Bezel
DAK0CC-2300-C Climate Control System / Chrome Elliptical Bezel

DIGITAL CLIMATE CONTROLLER

FOR VINTAGE AIR GEN IV

Dakota Digital DCC-2400 and DCC-2500 Series Digital Climate Controllers plug directly into the Vintage Air Gen IV A/C systems. Offering a footprint of the same size as the Vintage Air controller and direct plug-in connections, installation couldn't be simpler for new or retrofit applications. Intuitive rotary encoder on the front face allows for simple operation, while the convenience of selecting your preferred cabin temperature makes this unit truly unique.

Overall Dimensions: 4.2" x 1.3"
 Cut out Dimensions: 3.97" x 1.07"

(All controllers are horizontal mount, Vertical mount is also available)

SLOTTED

Clayton Machine Works AC Vents.

Adjustable air conditioner vents designed and developed with industry leader Vintage Air. The chrome plated, die-cast vents feature adjustable louvers not unlike those found on many OEM applications. Adding to the uniqueness are the chrome plated inner bezels which can be removed and painted in a variety of combinations to suit the tastes of each individual user. The vents are designed for maximum airflow, measure 4" x 1.6" and accommodate standard 2.5" ac vent duct hoses. All mounting hardware and templates are included for the easiest of installations.

Vintage Air Machined Alloy Covers

Provides smooth detailed look and keeps clutch assembly clean and dirt free.
VA04401-VUQ Aluminium V-belt clutch cover, polished - V groove and Multi-groove 508

VINTAGE AIR Compressors & Accessories

Sanden SD 508 Compressor
 This compressor is recommended for all Vintage Air systems. It pumps 8.4 cubic inches per revolution with a maximum 6000 sustained RPM range. Available in standard finish or polished. Fits all Vintage Air brackets.

- VA04808-VUA** Double V groove pulley-standard finish
- VA04808-VUQ** Double V groove pulley-polished finish
- VA04808-VMA** 7- Groove serpentine pulley-standard finish
- VA04808-VMQ** 7- Groove serpentine pulley-polished finish
- VA04808-SWA** Single wide groove pulley-standard finish (3/4" Belt)
- VA04808-SWQ** Single wide groove pulley-polished finish (3/4" Belt)

Sanden SD 7 Front Runner Compressor

This compact but high performance compressor is an integral part of our award winning Front Runner Accessory Drive system. Use only with our pulleys engineered specifically for this compressor.

Front Runner Accessory Drive SD 7 Compressor 134a

- VA04670-MTQ** 6-Groove serpentine pulley - polished finish
- VA046703** V-Belt pulley - polished finish

Sanden Direct GM Replacement Compressor

Bolts into accessory drive mounts on most GM engines from 1996 to 2000. Chevy and GMC 4.3 six and 5.0, 5.7 V-8's. Also Cadillac Escalade 5.7 and Olds Bravada 4.3

- VA046441-MTQ** 6- Groove serpentine pulley - polished finish

Sanden Rear Exit Compressor

Excellent solution to low hood clearance issues. SD 508 Compressor with rear exit #8 and #10 male O-ring fittings. Compatible with standard female o-ring fittings.

508 Rear Exit Compressor 134a

- VA047001-SUQ** Double V groove pulley rear exit with #8 & #10 Fittings - polished finish
- VA047003-MUQ** 7- Groove serpentine pulley rear exit with #8 & #10 Fittings - polished finish

Clutch Pulley Cover

Chrome plated clutch pulley cover screws on to the front of Sanden SD 508 style A/C compressors.

Chrome Plated Clutch Pulley Cover

TUF8490A

Peanut A/C Compressor

Chrome plated Sanden 7176 (Peanut) style air conditioning compressor for R134 refrigerant. Compact design as used on many aftermarket bracket kits. Available with double V-belt or 6-rib serpentine pulley.

- Chrome Plated with Double V-Belt Pulley** TUF4517NADP
- Chrome Plated with 6-Rib Serpentine Pulley** TUF4517NA6G

CHROME SANDEN 508 COMPRESSOR

- RPCR8752** - Chrome serpentine belt.
- RPCR8754** - Chrome V belt.

UNIVERSAL COMPRESSOR BRACKET

U-Weld Fabricator's bracket for mounting Sanden SD508 or SD709 compressor. Requires welding and fabrication by customer to complete.
VA151015

Vintage Air SuperFlow Micro Tube Condensers

The importance of this unique new micro tube design and its improved refrigerant flow cannot be over emphasized. By providing increased refrigerant contact with the micro tube walls and multiple passes per circuit for low restriction pathway, the SuperFlow condenser provides up to 40% more capacity than a comparably sized tube and fin condenser.

Horizontal SuperFlow Condenser

Perfect for late model cars with more grill area. With Male O-ring fittings. Top #8, Bottom #6, includes brackets.

TUFF STUFF FORD ALTERNATORS

All Tuff Stuff alternators are hand built in Cleveland, Ohio and are tested to meet or exceed OEM specifications. All Tuff Stuff alternators are made from 100% new components and carry a one year limited warranty. Tuff Stuff has alternator applications for virtually all muscle cars, hot rods, customs and light trucks in just about every finish imaginable. Many enthusiasts prefer our clean, simple 1-wire alternator option which features a low idle cut-in internal regulator and provides plenty of charging at low RPMs. Available in chrome plated, polished aluminium, powder coated and plain as cast finishes. All alternators are for 12 volt, negative ground systems, except where noted.

- Silver Bullet Alternator • 100 & 140 AMP • Smooth Back
- 1 Wire • 1-V & 6 Groove Bullet Pulley • Chrome Finish
- Factory Cast PLUS+ Finish • 6.875" Mount Centres
- Replaces 1691-85 Small case

Propower Alternators

True one wire DELCO race alternators

Part # CVR2180 50 amps

Is the smallest and most compact CVR alternator. Its 50 amp, output makes it ideal for serious drag racing. It has the lowest amps, to weight ratio of all CVR alternators.

CVR DELCO 100 AMP

One Wire Delco Race

Alternator. For drag racing when weight is not as crucial as amperage. This alternator provides low drag, high speed bearings, high output at idle and one wire hook up.

- Voltage: 14.9
- Weight: 8.8 Lbs.
- Type of Unit: Delco External/Internal Fan
- Estimated Amperage: 100 Amps.
- Regulator: Internal Self-Exciting One Wire
- Pulley Type: Steel Single Deep Groove
- Pulley Size: 3.15"
- Bearings: Double Sealed, Low Drag, High Speed

CVR7970CL Delco 100 Amp 1-Wire Alternator

CVR BILLET ONE WIRE ALTERNATORS

Part #8106CL & BK is the ideal CVR alternator. Whether it's a high wattage stereo system, accessory lights, winches for off-road or towing use, CB's, etc. - these alternators can handle almost anything. This alternator is a combination of an industrial alternator in an automotive housing. This alternator is a one of a kind hand built unit not a modified OEM alternator. We use a hand-wound stator, heavy duty custom rectifier, self-exciting regulator which allows an automatic cut-in for charging at the lowest RPM's. NOTE: This alternator was designed as a direct replacement for early style Delco alternators. No special brackets are required.

Description
200amp Billet Alternator with V Pulley – Black CVR8106BK
200amp Billet Alternator with V Pulley – Clear CVR8106CL

DYNA FORCE ALTERNATORS 120 AMP & 160 AMP

Whether you need a high output alternator to power your muscle car, street rod or touring machine, MSD has you covered with the DynaForce Alternator. For the street, MSD offers a 120 or 160 amp one-wire alternator. Not only are they designed for extreme output at higher rpm, but MSD balances the current output to keep your electronic components up to speed during idle and lower rpm operation as well. Both the 120 and 160 AMP Alternators feature one-wire installation to keep things clean, easy and effective. The charge post of the alternators is moved to the side of the housing to allow for improved clearance to the block, plus a pulley baffle is included to ensure there is never any fan-to-belt issues (common at high rpm on lesser alternators). The housings are available in four finishes including a natural cast for stock looks, a show quality chrome, black for subtle appearance and a great new satin finish for a smooth finish. The 120 and 160 amp DynaForce Alternators are designed with straight mounts. The mounting tabs fit many GM bracket systems from the mid '60s to the mid '80s.

- Designed for maximum output from idle to high rpm
- Stator and rotor are electrically balanced for optimum performance
- Dual plane balanced rotor assembly delivers high rpm precision and reliability
- Hand assembled in the USA and NEVER rebuilt or refurbished units
- Every unit is delivered with a proof of performance
- Blue-printed assembly process ensures superior operation and longevity
- One wire installation with added fan baffle for belt protection

ALTERNATORS PLUGS

ALTERNATOR PLUG

This Aeroflow Performance alternator 2 pin plug is designed to plug straight into the Ford and Chevy model alternators. This pigtail loom is pre-terminated with the ignition input wire and the voltage sensing wire.

AF49-1530

"CS" 130D Style GM Alternator Pigtail

Pigtail for CS 130D internal fan alternator. Resistor included.

"CS" 130D Style GM Alternator Pigtail
 PW30705

DELCO TRON 10SI/12SI ALTERNATOR PIGTAIL

A replacement pigtail using the factory original plug for the popular "Delcotron" 10SI and 12SI alternators, pre-terminated with the ignition input wire and the voltage sensing wire

PW30706

Quick Disconnect Alternator Lead

Makes alternator swaps easy. Comes with mating plug and connector. Alternator side pre-wired. For use with alternators up to 65 amps.
Quick Disconnect Alternator Lead PW40110

"CS" Style GM Alternator Pigtail

A replacement pigtail using the factory original plug for the late style or "CS" style GM external fan alternator. Resistor included.
"CS" Style GM Alternator Pigtail PW30707

ALTERNATOR PLUGS

The AeroFlow range of OEM alternator plug connectors are high quality reproduction plugs that fit perfectly to the original alternator to your vehicle. This is great for those who wish to great a new loom from scratch or the original connector has been damaged from heat and/or age.

All plugs are supplied with female pins and wire seals.

AF49-1700

2-Pin alternator plug. Fits most Mitsubishi & Hitachi brand alternators fitted in GM LS VT to VY & Ford EF,EL,AU,BA.

AF49-1701

3-Pin alternator plug. Fits Ford BF & FG

AF49-1702

2-Pin alternator plug. Fits some Bosch brand alternators fitted in Holden GM LS series engines & Alloytech engines.

AF49-1703

3-Pin alternator plug. Fits Denso brand alternators fitted in some Toyota, Subaru & Mitsubishi Models

AF49-1704

3-Pin round alternator plug. Fits Nippon Denso brand alternators fitted in some Toyota, Honda, Jeep, Mazda, Holden, Ford, Subaru & Lexus Models.

AF49-1705

4-Pin alternator plug. Fits GM, Holden & Early Chev engines.

AF49-1706

4-Pin alternator plug. Fits some Mitsubishi brand alternators fitted in Mitsubishi EVO (98-05), Hyundai & Nissan VQ35 engine.

DIFF MOUNT ALTERNATOR KITS

Ford 9" Third Member

Quick Change Kit

REAR AXLE MOUNTED ALTERNATOR KITS

These kits are popular for show cars and race cars. The alternator is driven off the diff pinion instead of the crankshaft which allows for a simpler engine pulley set up and neater engine bay. These kits come with a 50 AMP one-wire alternator, alternator pulley and bracket.

NOTE: Kits require a customer supplied yoke pulley.

PM8-410	Ford 9" Third member
PM410	Ford 9" (Bracket Only)

STARTER MOTORS

DYNA FORCE

HIGH SPEED STARTERS

Anyone who struggles to start their race car engine reliably because the starter can't keep up needs to check out the new High Speed DynaForce Starter. This starter was designed for race engines using magnetos that require higher cranking speed. The 25% extra speed makes it so that even the most stubborn of motors will start. The extreme durability built into these starters ensures they can handle the teams that use them.

• For use on blown alcohol engines, magneto ignitions, or any engine requiring higher cranking RPM

- Additional 25% cranking speed
- 3.73:1 Gear Reduction
- Heavy Duty high temp solenoid for 12-16 volt systems
- Plated disc and contacts reduce arcing and increase continuity
- Billet aluminum adjustable mounting block

PROFORM

Hi-Torque Starters, 12V 1.4 KW Motor

High-torque, gear-reduction design. Offset design results in more clearance between the oil pan and the starter, and can be rotated for additional chassis clearance. The high-torque, high-output motor spins the engine over faster than stock starters, delivering 40-50% more cranking power. 3.75-to-1 sealed gear-reduction drive and full ball bearing construction. Includes shims to set pinion-gear engagement (when necessary).

PR66260	Buick 455 V8 12V 1.4 KW Motor
PR66256P	Replacement Starter Pinion for 66256, 66258, 66258

Proform Heavy Duty High Torque Mini Starter

High torque, gear reduction design. 100% new, not rebuilt. Offset design results in more clearance between the oil pan and the starter and can be rotated for additional chassis clearance. Features GM Performance Parts logo and 2.0kw motor for cranking engines up to 15:1 compression ratio. Suits 153 and 168 tooth flywheels, inline mounting bolts only.

PR141-684 Heavy Duty 2.0kw Mini Starter

PROFORM High-Compression Racing Starters

For engines with monster cubic inches or compression ratios, these 100% NEW starters challenge the specifications, durability, and reliability of anything on the market. Built from scratch with all-new components, the torque rating is a healthy 4.4:1 gear reduction, capable of cranking engines up to a whopping 18:1 compression. Fits Chevy small and big block engines.

PR67050	168 Tooth Flywheel
PR67052	Staggered mount with 168 - Tooth Flywheel

Meziere "True Start" Starter Motors

Well known among today's racers is the pain of starter failure. Because we are involved in the high performance automotive industry as manufacturers as well as competitors, we know the trouble that enthusiasts are having and we try extremely hard produce products that are needed but unavailable. Our starters are tested to the extreme and are not sold until everything is right. Standard testing includes amp draw, power and rotational speed under load as well as free rev testing to ensure proper balance of internal rotating parts. We are raising the industry standard to bring to you truly trouble-free parts for your vehicle.

- Chevy 168 tooth Duty 2.2kw starter inline bolts **MZTS400**
- Chevy 168 tooth Duty 2.2kw starter staggered bolts **MZTS301**
- Ford 164 tooth Super Duty 2.2kw starter **MZTS408**
- Ford 164 tooth Super Duty 2.2kw starter Adj Gear **MZTS409**
- Replacement Solenoid suit TS400 Starters **MZSS037**

CHEV PERMANENT

MAGNET RACING STARTER

For drag racing and applications where a smaller and lightweight starter is desired, TCI® offers the finest quality racing starter available on the market. Manufactured by Hitachi specifically for TCI®, these starters are one-third smaller than most OEM starters, which means increased room for headers and one oil pan, plus increased ground clearance. All racing starters are new, not rebuilt.

- Fits All Chevrolet 153 & 168-Tooth
- 7.5 lbs; 50% Lighter than OE • 1.74 HP • 6:1 Gear Reduction • Works w/ up to 11:1 Compression Ratio • 12 Clocking Positions
- Feather Light Permanent Magnet Motor; Small Size Works Well in Dragster Applications
- Full ball bearing construction means less internal friction & more torque transferred to the engine; Heavy duty pinion bearing
- Balanced armature encapsulated in high-temperature epoxy resist heat & vibration
- Heavy-duty solenoid utilizes contact disc instead of bar-type contact for more consistent starts
- Low amperage draw of 210-250 amps at full starting load provides increased spark for ignition system
- Individually tested under starting load for ensured dependability & reliability

BATTERIES

12 Volt - Zero Maintenance Sealed-Lead Acid Battery

- Super fast recharge
- Superior power density
- Superior long storage life
- Superior cranking power
- 100% maintenance free
- High vibration tolerance
- Non-spillable sealed battery
- Extreme Temperature performance

Service Life:

IN EXCESS OF 8 YEARS, DEPENDING ON APPLICATION

Installation: CAN BE MOUNTED IN ANY POSITION (except inverted)

Design Characteristics

Battery Type: Sealed valve, regulated pure lead-acid (VRLA) patented gas recombination technology.

Plate Design: High purity lead/tin grid, starved electrolyte

Electrolyte: Dilute high purity sulphuric acid

Safety Vent: Self re-sealing Bunsen valve per cell

ODYSSEY EXTREME RACING BATTERY

Constant pounding. Extreme heat. High-revving, high-vibration, power-sapping engines. The demands of racing demand a battery that's up to the job. But one that's lightweight and compact so you don't give any advantage to the competition. The ODYSSEY® Extreme Racing™ battery can handle it. Featuring rugged construction and packed tightly with pure lead plates, the non-spillable AGM design of the ODYSSEY Extreme Racing battery protects against the shock and vibration that can quickly destroy other batteries. And the pure lead plates mean more power—twice the overall power and three times the life of conventional batteries.

The ODYSSEY Extreme Racing battery is ideal for a complete range of racing applications, including automobiles, motorcycles, ATVs, snowmobiles and racing boats.

12V Charger for ODYSSEY Batteries

Part No: ODBC12V

12 Volt Charger for use on Odyssey and Powermaster AGM Batteries.

OPTIMA BATTERIES

Performance-minded people everywhere trust OPTIMA batteries because they know that OPTIMA keeps performing at peak power long after other batteries have failed. Find someone who is serious about performance, and chances are you will find an OPTIMA battery under their hood. Fleet users, from hardworking aircraft ground support crews to police departments and ambulance companies, depend on OPTIMA to get the job done when lives are at risk. When livelihoods are at stake, you'll find OPTIMA hard at work on the farm and in construction equipment, as well as in all types of commercial applications. OPTIMA batteries are even called upon when justice and liberty are on the line — OPTIMA batteries are approved by the U.S. Military and other branches of the government. OPTIMA batteries deliver power in extreme situations; but it doesn't have to be a matter of life or death to choose OPTIMA. It could be a simple matter of dependability. OPTIMA has become the power source of choice for race professionals, offroad enthusiasts, car stereo installers, and vintage/classic car collectors. Also, average drivers, who depend on their vehicle and need to get the most value, performance, and "peace of mind" out of their family car, recognize the many benefits of utilizing the OPTIMA and they are increasingly switching over from conventional batteries.

The REDTOP high-performance AGM battery is ideal for trucks, SUVs, hot rods, street cars and other high-performance applications that require a spill-proof starting battery.

TurboStart BATTERIES

TURBOSTART 16V BATTERIES & CHARGERS

Turbostart continues to be the leader in the 16V motorsports world with the introduction of the S16VL lightweight 16V battery and has now put that same quality and performance into a 12V line of lightweight and high performance AGM batteries. Just like the 16V batteries, the new 12V batteries are built with 100% new lead and use AGM technology which allows for better cranking power and more reserve capacity. Turbostart AGM batteries are sealed to prevent leaks and can be mounted in any configuration needed to fit into any type of vehicle. At Turbostart we understand that in order to finish the race you have to "START" at the beginning of the race and we have proven to do that over and over again. Drag Racing to Restoration...Dirt Track to Daily Driver...and even Rock Crawling to Recreation you can trust Turbostart quality products to help START your venture off right every time.

Stainless Battery Tray Kit
 7-1/2" x 13-1/4"
 With countersunk floor so battery sits flat and doesn't hit bolt heads. Includes tray and hold downs
RPCR9323

Battery Tray

Aeroflow's Battery Trays are the perfect mounting solution for those planning to add a second battery, or even relocate or provide a better support and base for an existing battery. It has recessed slots in base so the battery does not make contact with tray fasteners. Dimensions 185mm (7-9/32") x 280mm (11"). Designed to suit comon battery sizes up to N50.

AF49-4053 Aeroflow plastic battery tray

Battery hold down clamp

Aeroflow's Battery Hold Down Clamp includes bolts, washers and wingnuts. Bolt hole centre to centre 175mm (6-7/8") and 250mm (9-27/32") bolt length

AF49-4054 Aeroflow Battery hold down clamp
 (Clamp is stretchable HD rubber)

Battery box

Aeroflow's Battery Box is ideal for protecting your battery from dirt, dust, moisture and allows correct ventilation. The battery box includes an adjustable tie down strap, allows side and end entry for battery leads. Made from high-impact propylene plastic. Inside dimensions size 260mm (10-15/64") x 180mm (7") x 200mm (7-7/8") size of the contour 340mm (13-3/8") x 245mm (9-41/64") x 200mm (7-7/8")

AF49-4052 Aeroflow plastic battery box

JAZ Sealed Battery Case

- Rotational molded plastic case is resistant to battery acid
- Measures 10-1/2" long, 13" wide and 9-1/2" tall
- Fits group 24 batteries with top or side post terminals
- Completely sealed with gasket in lid
- Vent tube to carry battery gasses outside of vehicle
- Features NHRA & IHRA approved 3/8" hold down rods
- Mounting bracket and all hardware included

PM100

MOROSO Battery Cable Terminal Kits

Brass compression-style fittings provide solid electrical connection. Two per package

MO74170 Battery Cable Remote Fitting End Kit, 3/8" opening.

MOROSO Battery Quick-Connect Plug

Instantly connects your vehicle's electrical system to an auxiliary power source, either to start the car or for fast battery charges. Also useful on tow vehicles and 4 x 4's as a power plug for winches, jumper cable connection, or battery chargers. Made of tough polycarbonate with spring-loaded copper contacts

MO74200

MOROSO Quick-Disconnect Flush Mount Battery Cable Connectors

Ideal for heavy-duty battery cable connection through firewalls or body panels. A quick release half-turn lock provides easy charger hook-ups. Black and red color-coded for easy identification. 2 per package

MO74155

BATTERY QUICK-CONNECT MINI

To save space this is a smaller version of Moroso's battery quick connect plug. Suitable up to 50 amps, using #6 wire. Instantly connects your vehicle's electrical system to an auxiliary power source, either to start the car or for fast battery charges. Made of tough polycarbonate with spring-loaded copper contacts.

MO74201

MOROSO Remote Battery Jumper Terminal

Allows battery to be placed anywhere in the car allowed by rules and still be completely accessible for between-rounds charging. Connect to battery with a high amperage battery cable such as Moroso No. 74005 or No. 74055. Universal for 6-36 volt DC applications. 2 per package with color-coded caps.

MO74140 Remote Battery Jumper Terminals

Painless Battery Remote

This kit includes one Positive (red) and one Negative (black) terminal block with 3/8" studs that allows for the connection of battery cables through a bulkhead. A safe and convenient way to create attaching points for cables anywhere in the vehicle, such as the trunk or the firewall.

PW40106 REMOTE BATTERY JUNCTION TERMINAL KIT

Thru-Panel Battery Connector

Can be used wherever a battery cable goes through a firewall or other similar panel. Connector fits through 1-1/4" hole. Use Battery Cable Remote Fitting End Kit No. 74170 to complete installation.

Black **MO74144**
 Red **MO74145**

Brass Isolation Terminal

Aeroflow's Brass Isolating Battery terminal is perfect for disconnecting the battery without removing the terminal. Simply unscrew the green knob to isolate or reconnect the battery. Suits Negative large style terminal.

Perfect for storage of Automotive and Marine vehicles.
AF49-4055 Aeroflow Battery isolation Terminal

BATTERY DISCONNECT SWITCHES

Prevents Dead Batteries, Theft and Safer to Work on Vehicle with Battery Disconnected

- UPC1202, 350A Continuous, 500A Momentary
- Plastic is Corrosion Proof and has Removable Red Key for Security

Plastic Housing Switch **UPS1202**

BATTERY ISOLATOR SWITCH

These Aeroflow battery disconnect switches are designed to isolate the battery circuit and provide anti-theft and fire protection. They also include a detachable key and weather-resistant cap and are ideal for mobile campers, marine, and farm equipment use. Use the Aeroflow battery disconnect switches to shut off all current to your battery and be safe no matter where your vehicle is.

350 Amps Continuous, 500 Amps Surge.
 12V battery isolator switch with red key

AF49-4050 Battery isolator switch & key.
AF49-4058 Replacement red key

Battery Disconnect Switch Super Duty

Moroso's Super Duty switch with rating of 2,000 amps intermittent and 300 amps continuous is perfect for engines with large starter draw, RVs, Drag Cars with alternators, and other applications. Two pairs of copper studs (1/2"-20 & 10-32) make it ideal for disconnecting alternator (or other electrical device) in addition to the battery. Sealed shaft keeps out moisture and debris. Indexing pin aligns switch with mounting panel and prevents rotation; fits mounting panels up to 1/4" thick. Includes switch position face plate; also includes decal to indicate switch location during emergencies

MO74102 Battery Disconnect Switch, Super Duty

BATTERY DISCONNECT SWITCHES

- Prevents Dead Batteries, Theft and Safer to Work on Vehicle with Battery Disconnected
- 250A Continuous, 450A Momentary
- Metal Switch has Heavy Duty Housing with Die Cast Knob

UPS1201

Combination Battery & Alternator Kill Switch

Combination Battery and Alternator Kill Switch is designed to completely shut down the battery and charging system in an emergency situation. Ideal for racing, vehicle storage, marine and RV applications. Prevents battery drain, theft and reduces risk of electrical fire. Push Off for emergency shut-down, and color coded to indicate operating position-On or Off, with a durable spring-loaded design. Meets NHRA and SCCA sanctioning body requirements.

Rated Capacity: Battery-2000 Amp Surge. 150 Amp Continuous. Alternator-120 Amp

FR1013 Combo Battery / Alternator Kill Switch

DUAL BATTERY SYSTEMS

Painless Digital Power Manager

The Digital Power Manager is a weatherproof solid state dual battery control unit that automatically engages an auxiliary battery when a large enough load is placed on the vehicles main battery. The unit will not allow the electrical loads on the vehicle's main start battery to drain the auxiliary battery resulting in a stranded situation for the driver. When the main start battery is too low to crank the engine by itself, the Digital Power Manager will combine the auxiliary and main batteries to crank the engine. Once the engine is running and spinning the alternator again, it will only allow charging of the auxiliary battery after the main battery is fully recharged by the alternator. This solid state dual battery controller / battery isolator eliminates manual switching or any second guessing when using a secondary battery in any vehicle with a 12 volt system. The unit is capable of switching up to 280 amperes of DC current for large loads such as winches or even when jump starting another vehicle. Ideal for any vehicle equipped with high power stereo systems, high amp driving lights or winches. Included in the kit is the weather proof Digital Power Manager, 6 gauge connection cables, terminals, heat shrink, mounting hardware and a remote indicator light.

PM40120 DIGITAL POWER MANAGER

250 Amp Dual Battery Control System

This controller includes a three position switch to control the second battery through the operation of the solenoid. Switch position one isolates the second battery. Position two connects the battery while the ignition is on. Position three connects the second battery at all times. Kit includes solenoid, switch, pre-terminated wire/connectors, fuse holder, fuse and mounting hardware. This weatherproof system is suitable for systems exposed to the elements, such as marine.

250 Amp Weatherproof Dual Battery Controller **PW40103**

Remote Mount Battery Cable Kit

Allows both positive and negative cables to be attached to the engine for maximum starting current. These two 16 foot, #1 gauge cables help prevent voltage drop to the engine. Eliminates the need for additional heavy cable connections between the engine and frame.

Remote Mount Battery Cable Kit **PW40105**

Master Disconnect

Panel
MASTER DISCONNECT
3" X 3-1/2"
AFC85005B

Master Disconnect Switch

Heavy duty master disconnect switch. Supplied with mounting plate.
Master Disconnect Switch PW50710

The Big Switch

Top racers realize that using a low amp switch creates resistance and actually reduces power. Flaming River's heavy duty battery disconnect switch is top of the line designed for complex electrical systems and 16 Volt batteries. Rated at 250 amps continuous service (12/16/24V) and 2500 amps for 5 second surges. The Big Switch is a spring-loaded, vibration resistant waterproof design. Accepted by most sanctioning bodies including IHRA/NHRA. Furnished with an easy-grip T-handle, anodized aluminum bracket and zinc plated mounting hardware.
FR1003 Big Switch

The Big Switch & Lever Kit

The lever kit allows for remote actuation of the Big Switch. The kit includes an 18" long, diameter aluminum threaded rod, T-handle, mounting bracket and necessary hardware. A "push off" decal is included. Accepted for IHRA/NHRA competition use.

FR1003-2 Big Switch & Lever Kit

FR1006-2 Lever Kit only without switch

LOKAR INTERIOR BATTERY DISCONNECT LEVER KIT

- Turn electrical power on or off from the driver's seat
- Lokar Direct-Mount Lever Kit fits B&M Pro Bandit, Quarter Pro, Precision Performance Products Shifters
- Lokar Vari-Mount Lever Kit fits B&M Pro Ratchet, TCI Thunder Stick, TCI Outlaw, TCI Lightning and Hurst Quarter Stick shifters or can be mounted to the floor
- Red anodized billet aluminium power lever for quick recognition
- Works in conjunction with fire system kill switch
- Master power switch available in 125 or 300 amp
- Kit standard with 8' push pull cable
- Push Pull Cables also available in 6' and 7'
- Mounting hardware included
- Kit available without the Master Power Switch

Application

B&M Pro Ratchet, TCI Thunder Stick,

Part No.

LK-1330022

TCI Outlaw, TCI Lightning, Hurst Quarter Stick Shifters or can be mounted to the floor with 300 Amp Switch

QUICK-DISCONNECT FLUSH MOUNT BATTERY CABLE CONNECTOR KIT

- Kit contains one black male and female lug, one red male and female lug
 - Ideal for heavy-duty battery cable connections through firewalls or body panels
 - A quick release taper lock provides easy charger hook-ups
 - Features brass connections for full contact
 - Accommodates 1 or 2 gauge wire
- M074156**

BATTERY DISCONNECT SWITCHES

Battery disconnect switches control electrical supply to the vehicle allowing vehicle to be shut down in the event of an emergency or to secure vehicle when not in use. Disconnects are offered as a single pole version and a double pole with two separate circuits for vehicles equipped with an alternator. Single Pole Disconnect has two terminals and is recommended for vehicles not using an alternator that need ability to be shut down in the event of an emergency or when securing a vehicle by shutting all power off to the vehicle. Note: When attempting to shut down a vehicle with an alternator using a single circuit battery disconnect, the alternator may continue supplying power to the vehicle ignition system allowing vehicle to continue to run. Double Pole Disconnect has four terminals with two separate circuits which is recommended for a vehicle with an alternator that needs to be shut down in the event of an emergency.

PW40141

REMOTE MASTER DISCONNECT KIT

This kit uses a 250 AMP solenoid and toggle switch. This switch can be hidden anywhere in the vehicle as an anti-theft deterrent by disconnecting the constant battery power from the battery to the fuse block. Kit comes complete with one 250 AMP solenoid, one toggle switch, wire, mounting hardware and connectors. Note: Solenoid draw is 2.5 AMP while engaged. If left engaged (battery connected) with vehicle not running it will drain the battery.
PW30204

BATTERY CHARGERS & TESTERS

MEMORY SAVER DETECTOR

- Memory Saver - For use when replacing vehicles battery.
 - Fully Automatic
 - Standard Fuse Protected Auxiliary Input Plug
 - Easy to Follow 3-Step Instructions Printed on Unit
 - Auto Detection - Will detect automatically if the vehicle's electronics will allow this device to save on-board data
- SE0BD-L**

DIGITAL 12V

BATTERY TESTER

- 12 Voltmeter
 - Accurate, easy-to-read LED screen.
 - Checks the battery, starting and charging systems
 - Four LED indicators
 - 12-volt batteries, up to 1200 cold cranking amps
 - Battery state of charge
 - Battery cranking ability
 - Charging system output
 - Starter motor draw
- SEBT175**

BATTERY MONITOR

- Shows battery charge percentage.
 - When connected to wireless internet, you can view your battery condition from any location.
 - Alerts user when the battery needs to be replaced or charged.
 - When connected to a Schumacher Electric charger, the app will display charging current and voltage.
- SESA1345**

TPMS (TIRE PRESSURE

MONITORING SYSTEM)

- Easy wireless monitoring of tire pressure and temperature
 - Display unit plugs into 12V vehicle outlet
 - Sensors install easily on tire (batteries are preinstalled)
 - Monitors and displays conditions in real time
 - Provides high/low pressure warning
 - Choose PSI or BAR, Fahrenheit or Celsius
- SESA1346**

LITHIUM JUMP STARTER

AND POWER PACK - 2000A

Power at your fingertips, that's what the SL1452 can provide, a powerful performance whenever and where ever you need it. It's perfect for charging smart phones, tablets and more and for emergency power on the road. It provides up to 2000 peak amps of jump-starting strength, strong enough to jump 10.0L Gas I 10.0L Diesel engines. Road-side emergencies that leave you stranded are scary. No longer will you need to depend on the assistance of another vehicle to get yours going again. This unit can jump start 50 times on one charge.

- Up to 50X Jump Starts per Charge - Delivers superior jump-starting performance.
- Advanced 16V 4-Cell Lithium High Performance Technology
- Quickly jump start vehicles in emergencies
- Ideal for 10.0L Gas I 10.0L Diesel
- Pre-Boost Technology - For ultimate cold temperature starting. Superior In Extreme Cold temperatures, jump starts in -10 degrees F
- Safe smart cable/clamps - Spark-free protection against overcurrent, short-circuit, overload, overvoltage and overcharge
- Compact design with soft-touch finish
- 10W fast wireless charging
- 2.4A USB port - Charges USB devices, including smartphones, mp3 players and tablets
- 3A USB port for faster charging
- XL LCD Display - backlit for charging status
- Built-in 3-mode LED light

SESL1452

SPI BATTERY CHARGERS/ MAINTAINERS

Patented Speed Charge Technology ensures that the battery is charged as fast and safely as possible – up to 3 times faster than traditional chargers.

Designed to charge most types of batteries (AGM, Gel, Calcium/Wet, Start & Stop).

The SPI3 is also compatible with lithium-ion batteries. The range features a digital display with scrolling multilingual instructions (except SPI1 & SPI2) insulated clamps and eyelet accessories (except SPI15), a hook attachment and protection bumpers. Reverse polarity protection, thermal runaway protection and automatic shut-off are included as standard. The SPI will charge batteries with voltage as low as 0.5V. In comparison, most chargers from the competition will only charge batteries with voltage as low as 4V. Their ventilated housing compensates for the extra heat and prolongs the life of the chargers (SPI6, SPI10 & SPI15). The SPI are energy efficient and meet the highest industry standards. They feature multi-stage charging for added precision and safety. Float-mode monitoring ensures that the battery is kept fully charged and ready to use, for extended periods of time.

AUTOMETER

BATTERY JUMP

STARTER

The E-POWER 800 Power Pack is the ultimate jumper kit, with a four-in-one jump starter, power bank battery, laptop power bank battery, and flashlight. The power pack can jump start a car up to twenty times per charge. Save money and time on calling tow trucks or waiting for help to arrive with your own easy to operate power pack.

• Battery Type: Lithium Ion • Number of Cells: 4 • Power: 26.64 Wh • Voltage: 14.8 V • Battery Weight / Device: 219 grams

Feature Points • Able to jump start a car up to 20 times per charge - no additional vehicle, tow truck or jumper cables needed; saving time and money

• Quick charging USB ports - charges virtually any USB device such as phones, tablets, digital cameras/video, laptops, and much more. (Output 1: 5V/3A, 9V/2A, 12V/1.5A, Output 2: 5V/2.1A, 3A Type-C Power Input/Output)

• Included safety jumper cables offer protection from reverse polarity, short circuit, reverse charging, low voltage and overheating

• LED Flashlight with torch mode, SOS, and strobe

• Includes compact jump starter, smart jumper clamps, type-C USB cable, carrying bag, & instruction manual

• Lightweight and easy-to-handle

• Provides peace of mind when you are away from typical sources of electricity

• For up to 4.5L Gasoline Engines and up to 3.5L Diesel Engines

AUEP-800

DOOR CONTACTS

Dakota Digital

Jamb Tac Wireless Connector Kits

Jamb Tac keeps door jamps looking neat and free from wires.

These heavy duty solid brass contacts handle up to 60 amps per circuit. Mounts anywhere in the doorjamb. Kits are complete with connectors, instructions and mounting template.

(Note that opening the door breaks contact - your power windows, door locks or speakers will not operate with the door open).

1-Wire Contact Kit	PW40021
2-Wire Contact Kit	PW40022
3-Wire Contact Kit	PW40023
4-Wire Contact Kit	PW40024
4-Wire Contact Kit with Dome Lamp Switch	PW40025

Magnetic Door Jamb Switch

Turn interior lights on and off without unsightly switches mounted on door frame. A magnet mounted on the door activates a reed switch mounted in the post for a clean look and smooth operation. Choose ground activation (ground wire to the dome light) or power activation (power wire to the dome light.)

Magnetic Door Jamb Switch, Ground Activation PW80180

Magnetic Door Jamb Switch, Power Activation PW80181

KEYLESS ENTRY SYSTEMS

Dakota Digital

CMD-4001X Remote Entry Kit

The CMD-4000 Series remote entry kits can raise and lower up to 2 windows or lock/unlock power door locks and release latches. Power Windows, Actuators or Solenoids maybe required and are offered separately or in a kit.

Key features of the CMD-4000 Series Kits include Ignition Safety Lockout which prevents doors from opening when the key is on.

DAKCMD-4001X Includes:

- CMD-4000 4 function remote system.
- Two PDR-2 35 lb pulling solenoids.
- Two XMT-4 4 button remote transmitters.

TEN-FUNCTION REMOTE ENTRY SYSTEMS

Key Features:

- All Harnesses and wire ends are fully assembled insuring easy installation.
- Heavy duty 30 amp relays provided for greater reliability.
- Code hopping technology for added security.
- 2- Six button transmitters for easier operation.
- Park light flash for visual feedback during operation.
- Ignition safety disables door and trunk release when engine is running.
- Sealed switch included for emergency driver's door entry.

10 function operation for:

- Controls driver side window up.
- Controls driver side window down.
- Controls passenger side window up.
- Controls passenger side window down.

• Remotely opens driver side door.

• Remotely opens passenger side door.

• Releases or raises trunk/ rear hatch.

• Lowers trunk or rear hatch.

• Raise auxiliary motor or releases auxiliary latch.

• Lower auxiliary motor or programmable auxiliary channel can momentarily turn on/off or toggle on/off any electrical device.

Part No. DAKCMD-10K-2

Dakota Digital Door Popper

Body Length: 1-3/4"

Stroke: 5/16"

Pushing Force: 25 lbs

Sold in pairs.

DAKDP-1

DAKOTA DIGITAL DOOR POPPER

Made from the highest quality materials and precision production methods, Dakota poppers will pop your shaved doors smoothly & reliably. Adjustable spring tension allows you to easily customise the pop-out distance. Super Door Poppers offer 1-1/2" of stroke! Unit measures 3-9/16" depressed, 5-1/16" extended.

DAKDP-3

POWER WINDOWS & SWITCHES

ELECTRIC POWER WINDOW KIT

Aeroflow Performance universal electric power window kit is a great option for any custom car that has a sliding flat side glass window. Due to the high-torque motors and custom mounting brackets, this power window kit is great for older cars that have never had power windows and installation is simple. Each kit comes with high-torque worm-gear driven motors, reinforced guide tracks and adjustable window bases, all of which assure smooth window operation that is quiet and long lasting. This kit is designed to suit 2 door cars with a flat glass that goes straight up and down and are between 152.4mm (6") to 609.6mm (24"). It is recommended to use a 40 amp relay kit (sold separately AF49-1038) to power this universal electric power window kit.

AF49-1600

POWER WINDOW KIT

Building a street rod is easier when you have Specialty Power Windows supply you with one of our universal kits. These kits are great for customizing vintage cars and modifying any vehicle with 8 1/2 inches or more of clearance beneath the window glass and above the bottom of the door. Our heavy-duty Power Wonder-Lift (PWL) cable-driven GM motor kit is simple to install and the most versatile window kit you'll find. It replaces your old crank handle and regulator, and it comes with all the parts shown here:

- Lower glass channel
- GM switches
- Complete wiring harness with switch, motor plugs, and flexible stainless-steel wire conduit for door opening

Billet Triple kits puts dual switches on the driver door and one on the passenger door. (3) switches with plugs, (1) single frame, (1) dual frame, terminals, fuse holder, wire leads, cross-over wiring and instructions.

Description	Part No.
Triple Illuminated Billet Power Window Switch	WSWL39-5BT

Power Window Switches for

Original "Crank" Handles

Keep that original look and still install power windows in your ride with these switches.

A slight push on the crank will open/close the window. Comes in either 3/8" square shank for Ford/Mopar or GM Splined shaft.

Power Window Crank Switch - Square Shaft.
WSWCA-EPWS-F

Power Window Crank Switch 1/2" Spline (Suit GM & Ford).
WSWCA-EPWS-GM

BILLET INFINITY & CHISELED POWER WINDOW SWITCHES

These new power window switches match our new SS family. We include the polarity reversing module so these switches will work with all modern power windows. The lights are a separate circuit so you decide when they are lit. Like our other switches, they are available in brushed, polished or Raven Black anodized finishes. Choose from our dimpled Infinity style or the sharper edged Chiselled rockers to get the perfect look for your build. Switch faces are 2-1/2" tall, single switches are 1-3/4" wide and doubles are 2-1/2". You will need 1-3/4" of back space. Switches come with lead wires, polarity reversing modules, mounting clips and instructions. The triple kit has a double switch on the driver's door, a single for the passenger and includes cross-over wiring. Use a double alone when centre mounting your switches.

DOOR WIRE LOOMS

STAINLESS STEEL BRAIDED DOOR WIRE LOOMS

The added looks of stainless braided door jams are 1/2" O.D. x 3/8" I.D. x 7+" effective length. One fixed and one sliding threaded aluminium boss. Plastic lined. Mount into 3/4" Diameter holes with jam nuts included. The sliding collars may be trimmed shorter when going through less material.
WSWLSS50-1/2

NYLON AND BILLET DOOR WIRE LOOMS

The look of Billet & Black, the door looms are 1/2" O.D. x 3/8" I.D. x 7+" effective length. 1 One fixed and one sliding aluminium boss. Plastic lined. 1 Mount into 3/4" and 5/8" Diameter holes with set screw secured "quick" collars.
WSWLSS57-1/2

IGNITION SWITCHES

Universal Keyed Ignition Switch

The universal keyed ignition switch is waterproof and is supplied with 2 keys. Fits 3/4" diameter hole.

Universal Keyed Ignition Switch PW80529

Touch-N-Go Keyless Ignition System

Get the most advanced keyless ignition technology at the tip of your finger, with the Touch-N-Go Start keyless ignition system for your ididit steering column. This is the industry's FIRST touch sensitive start system and features a 22mm aluminium button (25mm with column mount) with multi-color interactive LED lights that always let you know what mode it's in. There are no moving components to wear out, ensuring years of outstanding performance.

You'll never have to use your keys again! This system can be used as a simple start button system or you can utilize more advance functions, such as keyless entry. Just stick your programmable key fob in your pocket or wallet and the system will sense your approach, automatically unlocking your door as you get close and locking it up as you leave (the system only responds when the key fob is in range). For added safety, this system can also be programmed to turn on your dome lights as you approach.

- Automatically starts your car with the simple touch of a button.
- Kit comes with 2 key fobs with up to 4 programmable channels.
- Comes with a control box small enough to fit just about anywhere.

- The antenna has a proximity range of 2 to 15 ft. (When selecting the antenna placement it is important to place it near the windows so the doors or sheetmetal will not interrupt the signal)

- 22mm dash mount or 25mm column mount aluminium touch button with interactive LED display is fully customizable, with multiple colors to choose from. LED lights can be dimmed.
- Made as a direct replacement for standard keyed ignitions, this unit simulates the five common GM ignition positions: off, accessory, on, crank, and run.
- First touch simulates "Accessory" (turns on your radio and other accessories)
- Second touch simulates "On" (activates ignition circuit; fuel pump or engine computer)
- Third touch, while pressing brake pedal simulates "Crank" (engages the starter and starts the vehicle)
- Three rapid touches in a row will shut off the system and engine
- For added security, this kit comes with a built-in valet switch allowing you to override the key fob system. In the event of a dead key fob battery, the switch can be turned on to allow the Touch-N-Go system to deactivate the security, allowing the user to operate the system manually.
- No moving components to wear out.
- No internal relays. Uses Mosfet Technology.
- Made in the USA

SWITCH PANELS

UNIVERSAL SWITCH PANEL

The Aeroflow Performance switch panel features a dedicated momentary start button, 4 x on/off switches and 2 x USB ports attached onto an aluminium flat mounting panel. The high-tech rocker style switches are dust and water resistant, feature a wide profile face for use with racing gloves, a heavy-duty spring for positive engagement, various coloured LED indicator lamps, and 1/4" spade terminals to simplify wire connections with a two wire hook. A switch decal package is also included to indicate start, ignition, fuel, fan, lights, nitrous and other uses for each switch. Note: It is recommended to use a circuit breaker and fuse which are not included in this kit. Length 180mm (7-5/64"), Width 65mm (2-35/64"), Depth 45mm (1-49/64").

AF49-8000

MOROSO ROCKER SWITCH PANELS

- High-tech rocker style switches are dust and water resistant and feature a wide-profile face for use with racing gloves
 - All switches are single pole, single throw rated at 20 amps
 - Other switch features include a heavy-duty spring for positive engagement, orange LED indicator lamp, and 1/4" spade terminals to simplify wire connections
 - Five resetable 20 amp circuit breakers (except No. 74186) eliminate the need for fuses.
 - Includes complete wiring instructions and switch decal package to indicate start, ignition, fuel, fan, lights, nitrous and other uses
- MO74180 Flat Surface Mount, five on/off switches with momentary start switch, 3.388" x 8"**
- MO74181 Flat Surface Mount, five on/off switches without momentary start switch, 3.375" x 8"**
- MO74183 Flat Surface Mount, five on/off lighted switches, 2.488" x 6.695", separate panel for five circuit breakers 20 amps each, 1.350" x 6.695".**
- MO74186 Flat Surface Mount, four on/off lighted switches, with momentary start switch, no breakers, 2.488" x 6.695"**
- MO74190 Cage Mount, five on/off switches, with momentary start switch, 3.750" x 8"**

MO74194 Flat Surface Mount, five on/off lighted switches With Momentary Switch, 3.388" x 9.150", 6 circuit breakers 20 amps each & USB Ports

MO74195 Flat Surface Mount, five on/off lighted switches With Momentary Switch, 2.488" x 7.855", With USB Ports

TOGGLE SWITCH PANELS

- Make custom wiring of your vehicle much easier and professional
 - Face constructed of rugged .050" thick aluminium
 - All have power indicator lights and front mounted, E-Z access fuse holders with pigtailed attached, features not found on other manufacturer's switch panels
 - Heavy-duty on/off switches are 12 volt single-pole, single-throw with screw terminals rated at 25 amps lamp load and 35 amps inductive load
 - Heavy-duty fingertip starter controls on No. 74130, 74131 and 74133 are waterproof and dustproof, and include screw terminals rated at 12 volts and 35 amps
 - A selection of custom labels is included so you can customize each panel to your individual needs
 - Black anodized finish prevents corrosion
- MO74131 - Drag Race Switch Panel, 4" x 7.75". Includes: Starter button, five on/off switches, five E-Z access fuse holders, five power indicator lights, 20 amp fuses**

Fused Rocker Switch Panels

- Painless switch panels feature:
- Heavy-duty lightweight non-reflective housing designed to mount to a roll bar using standard metal hose clamps. Lighted rocker switches are colour coded for quick visual reference. All circuits individually fused and easily accessible for quick testing and replacement. All units come complete with 18' of high temp TXL wire using machine applied, vibration resistant, fully insulated terminals. The 4 switch panel controls; start, ignition & 2 accessories and the 6 switch panels also control fuel pump and water pump/electric fan. The 8 switch panel controls start, ignition, electric fan, 2 fuel pumps, water pump, lights and one accessory.
- 4 Rocker Switch Panel PW50301**
- 6 Rocker Switch Panel PW50302**
- 6 Rocker Switch Inline Panel PW50506**
- 8 Rocker Switch Panel PW50303**

Contour Rocker Switch Panels

The rocker switches in these panels are not only stylish but practical as well. The covers are interchangeable so each panel can be customized to each user's needs without having to purchase all new switches. Each switch is also fully sealed for protection against the elements. Finally, each panel features a charge indicator LED light. Panels come with 18 foot TXL wiring harness.

6 Switch Pro Stock Panel PW50412

Universal 8 Switch Rocker Panel

This universal rocker switch panel comes complete with stick on labels for a truly custom look. Panel feature lighted switches in various colors and additional switches are included for custom wiring.

PW50317 8 SWITCH UNIVERSAL ROCKER PANEL

Circuit Breaker Protected Rocker Switch Panels

The most popular switch panels in drag racing today are now even better. These new switch panels feature circuit breakers in place of standard fuses, so if you're on the line and circuit blows, it can be reset with just a touch. Features also include colour coded lighted rocker switches for easy identification, 18 ft. of the highest grade TXL wire, vibration resistant terminals and a black finish for reduced glare.

- 4 Rocker Switch Panel PW50304**
- 6 Rocker Switch Panel PW50305**
- 8 Rocker Switch Panel PW50306**
- 4 Rocker Switch Nitrous Panel PW50603**

Weatherproof Off-Road Switch Panels

These new switch panels are the only panels to consider if your vehicle will be subject to harsh outdoor conditions. They feature a formed polyethylene liner to seal the face plate to the dash or chassis, creating a water-resistant seal. The panels include a keyed ignition switch for security or a push-button start. All switches and circuit breakers are protected by weather resistant boots and all circuits are protected with circuit breakers. All units come complete with 18' of high temp TXL wire using machine applied, vibration resistant, fully insulated terminals. These kits are shipped unassembled with peel and stick labels for custom applications.

Fuel Pressure Safety Switches

Maintaining adequate fuel pressure is critical when it comes to nitrous. These fuel pressure safety switches can be used in conjunction with your nitrous systems to safeguard against inadequate fuel pressure.

5 PSI Switch ED72210
30 PSI Switch ED72213
50 PSI Switch ED72214

HOBBS SWITCHES

Aeroflow's hobbs switches are a great way to ensure safety of your engine. The 5-7 PSI (.3-5 BAR) (AF49-2010) can be used to cut ignition or fuel pump when pressure drops saving you from an expensive rebuild. Aeroflow also offer a vacuum pump on switch (AF49-2011) that can turn a vacuum pump on when pressure drops below 17inHG in a road driven car that has a large camshaft with low vacuum to create a better pedal feel.

AF49-2010 Hobb switch (5 PSI (.3 BAR) Open) 1/8" NPT
AF49-2011 Vacuum pressure switch, closed at 17" HG. 1/8" NPT

Aircraft Switch Cover

Shields all shaft mounted toggles switches for extra safety. Prevents accidental switching.

Aircraft Switch Cover PW80521

LED MISSILE SWITCHES WITH COVER

Aeroflow Rocket switches are now available in LED and colour coded covers. They will control virtually any accessory you can throw at them from, ignitions, boost, fans, lights, winches, NOS systems and more! These have a true 12V LED switch in the casing which means you do not need to add additional resistors typical with some other LED lighted products. Easy to use, lift the cover and flick the toggle switch up for the on position and to turn off the switch simply push the cover down!

Part No	Description	Colour
AF49-5050	On / Off missile switch with Red LED	Red
AF49-5010	On / Off missile switch with Blue LED	Blue
AF49-5020	On / Off missile switch with White LED	Carbon Fibre
AF49-5030	On / Off missile switch with White LED	White
AF49-5040	On / Off missile switch with Yellow LED	Yellow
AF49-5055	On / Off missile switch with Green LED	Green

LED MISSILE SWITCHES

Aeroflow Rocket switches are available with coloured covers. They will control virtually any accessory you can throw at them from, ignitions, boost, fans, lights, winches, NOS systems and more! Easy to use, lift the cover and flick the toggle switch up for the on position and to turn off the switch simply push the cover down!

Part No	Description	Colour
AF49-5000	On / Off missile switch	Red
AF49-5001	On / Off missile switch	Blue
AF49-5002	On / Off missile switch	Carbon Fibre
AF49-5003	On / Off missile switch	White
AF49-5004	On / Off missile switch	Yellow
AF49-5005	On / Off missile switch	Green

TOGGLE SWITCHES

• Momentary Switches ideal for starting engines
• On-Off Single Throw Switches used to control accessories such as lights, pump, fan, etc.
• Rated at 25 amps lamp load, 35 amps inductive load • ON/OFF faceplate included

MO74124 Toggle Switch Momentary On, Long Handle, 1-1/2"
MO74125 Toggle Switch On/Off, Long Handle, 1-1/2"
MO74126 Toggle Switch On/Off, Short Handle, 1-1/16"

SWITCHES

MSD8808 Four-Pole, Double-Throw Switch
MSD8812 Alternate Action Switch

Universal Momentary Switch and Cable.

Moroso Universal momentary switch and cable This precision high quality momentary switch is mounted in a coiled flex cable and can be used to control nitrous oxide systems, push-to-talk radios, roll control devices, or any other device with an instant on/off switch. It's a normally open, snap action short throw switch that's rated at 6 amps at 28 volts DC or 125 volts AC. It mounts in a 1/4" diameter hole.

MO74122 Switch Universal Momentary

NOS SWITCHES

Illuminated Rocker Switch NOS15602
Momentary Push-Button, Waterproof with Spiral Cord NOS15651
50 PSI Adjustable Pressure Switch - Normally Open NOS15685
5 PSI Fuel Pressure Safety Switch - Normally Open NOS15750

Hurst Pushbutton Switch W/Coil Cord

• High shock resistance
• Moisture and dust proof for marine and off-road racing
• Epoxy sealed contacts and terminals
• 6' (18 gauge) coil cord for mounting in almost any location
• 10 amp. capacity • Normally open
This precision snap-action switch is ideal for operating Roll/Controls, nitrous systems, trans brakes, etc. The switch is designed to provide instantaneous, smooth operation under the most severe racing conditions.

HU2483880 Pushbutton Switch W/Coil Cord

Remote Button & Cord

• Rated at 12 amps • Lightweight spiral cord, self cleaning contacts, bounce free operation. The universal remote button and spiral cord is a great all around adjustable unit and is ideal for bracket racing. Use with transbrake, launch control and nitrous systems.

Standard Remote button with spiral cord BM46003

SPIRAL CORD Button & Cord

• Rated at 12 amps • Lightweight spiral cord, self cleaning contacts, bounce free operation. A button and cord assembly with extra large actuator button. For use with gloves and Full or Pro Tree applications

Large Actuator Red button with spiral cord BM46013

SPIRAL CORD BUTTON

The Bang Shift universal spiral cord button is ideal for activating a trans-brake, a line lock or launch control, nitrous system or any other accessory requiring momentary power. The Spiral cord section is great to reach tricky spots in the car or provide extra slack when fitted to a steering wheel. Both a momentary button and a ON/OFF button is available depending on application. The switch is powered via 12 volts and rated for up to 10-amp duty.

AF72-5060BLK BLACK MOMENTARY BUTTON
AF72-5061BLK BLACK ON / OFF BUTTON

SWITCHES

ALLSTAR BRAKE LIGHT SWITCH LEVER TYPE

Switch is commonly used with under-floor mounted brake pedal assemblies when switch can contact the brake pedal arm. Spring loaded switch is designed to return to the open position and has two #10-32 tapped mounting holes, 5/8" on centres. Designed for easy two wire connection, one "+" supply and the other to power brake lights or a brake light relay. Switch is rated at 4.5 amps and features two male bullet terminals

RS-ALL76250

Universal Wiper Switch

Three position switch operates 2-speed wiper motor with on-off and washer function.

Universal Wiper Switch PW80173

Wiper Switches

We have searched high and low to assemble a selection of electrical switches that meet our quality criteria and have the right aesthetics to complement hot rods, customs, trucks, even VWs. Sourced from a number of manufacturers, before being fitted with SO-CAL's own traditional knobs and bezels.

E: Forty-style knob—black
G: Bullet-style knob

Machined from aluminium and highly polished, they're easily installed and held in place with a set screw.

Stretch Cord 2 Core Wire

Super large 14 gauge, multi-strand conductors. Coil is only 1 foot long when contracted, and stretches over 10 feet when needed. We used larger 14 gauge wire to prevent massive voltage drop that the small 16 and 18 gauge coil-cords cause. Typically less than half the voltage drop when compared to other "heavy duty" cords!! Ready to be attached to your existing button or our PBSRTD and PBSXL buttons above. Dark Blue vinyl jacket stays clean after years of use. **DE-SC2**

Stretch Cord 3 Core Wire

Three conductors? Why? Let's say you want to mount your transbrake button and your line lock button on the steering wheel... both buttons need power supplied to them right? The SC3 has 1 super large 12 gauge wire to bring power "up" to the both buttons, then use one of the 14 gauge wires to bring the transbrake button signal "down" and the other 14 gauge wire to bring the line lock button signal "down". This is a lot cleaner and less expensive than running 2 coil cords! Medium Red vinyl jacket stays clean after years of use. **DE-SC3**

Hurst Switch for Roll/Control

The Roll/Control Switch incorporates a micro switch for an immediate and accurate release. Includes 2 feet of wire for installation hookup to the Roll/Control, nitrous systems, trans brakes or other 12 volt accessories. 10 amp capacity. Normally open. **HU2483875 Roll/Control Button Switch**

MICROSWITCH AND BRACKET KITS

Designed especially for Edelbrock, Barry Grant and Holley carburetors, these kits include a snap-action microswitch, mounting hardware and a CNC-machined, red anodized billet aluminum bracket. ED72279 comes with a bendable universal bracket for easy installation.

- For Holley Dominator carburetors **ED72281**
- For Holley Square Bore carbs without choke (will not fit H.P. series) **ED72282**
- For Barry Grant Race Demon carburetors **ED72284**
- For Barry Grant King Demon carburetors **ED72285**

BUMP STAGER TRANSBRAKE CONTROLLER

The FAST Bump Stager provides improved staging accuracy by allowing users to access the patented "transcreeper" function found in FAST XFI without the added expense of converting the vehicle to a full XFI system. Available as a complete kit, the Bump Stager lets drag racers carefully pulse the transbrake. This enables the vehicle to move forward slowly during staging, creating a higher degree of repeatability than racers are able to achieve manually. The complete kit comes with everything needed for use, and a built-in 20-amp driver removes the hassle of wiring an external relay for most applications. It can be used in carbureted applications or with any aftermarket EFI system.

- Improves staging accuracy; allows access to patented "transcreeper" function found in FAST XFI
 - Lets drag racers carefully pulse the transbrake; enabling the vehicle to move forward slowly during staging, creating a higher degree of repeatability than racers are able to achieve manually
 - Works w/ any trans-brake application; Carb or EFI
- FAST30322**

TRANSBRAKE SWITCHES

DE-PBSRTD

The most consistent, most reliable switch on the market. This is a heavy duty quick acting, precision release transbrake switch with an adjustable mount and locking nut. Screw terminals on bottom connect to any wire. Adjustable button height sets with a custom lock nut.

DE-PBS-XL

This uses the same quick switch as the PBSRTD but has an extra large red button (1 inch). Fits gloved thumbs very comfortably. Great for delay boxes that allow multiple "hits". Adjustable button height.

PAINLESS

Painless Rollover

Safety Switch

Automatically shuts off power to the fuel pump in the event of a vehicle roll over. Recommended by many racing classes. not recommended for off-road use. **PW80160 ELECTRIC ROLLOVER SAFETY SWITCH**

Engine Bump Switch

This switch allows you to turn over the engine from the engine compartment for adjusting valves. It also overcomes starting problems due to an overheated starter or worn out electrical system by boosting amperage to the starter solenoid every time the vehicle is started.

Engine Bump Switch PW30201

GM LS1 WIRING HARNESS (AUTOMATIC TRANSMISSION)

This AeroFlow Performance wiring harness is designed to be a complete plug and play harness for EFI GM LS1/LS6 series engines. It is a complete standalone replacement wiring harness that suits GM LS1 engines (1997 to 2002) with drive by cable throttle body and 4L60E or 4L80E automatic transmissions. Perfect for retrofitting into older muscle cars and street rods or newer non-emissions controlled vehicles with a four wire hook-up (switched power, constant power and ground connections). The harness features a sliding grommet seal for a leak proof installation and 1.2 to 1.5 meters (3.9 to 4.9 feet) of length from the rear of the cylinder head to the PCM mounting position under the vehicle dashboard. The harness is constructed with GM Delphi connectors and terminals and high temperature wires. It includes all wiring that is required by the Powertrain Control Module (PCM) to run and control the fuel injection system and automatic transmission.

- CONNECTIONS INCLUDED FOR:**
- Fuse/Relay Box • Fuel Pump Control (Relay included) • Fan controls (Relays and fuse Sold Separately) • Check Engine Light, Speedo output, Tachometer, OBD2 Port • Idle Air Control and Throttle Position Sensor • Mass Air Flow Sensor (3 Pin)
 - Manifold Absolute Pressure Sensor • Engine Coolant Temp Sensor • Alternator Control (4 Pin) • Oxygen Sensors (x 2)
 - Knock Sensor • Crankshaft Position • Camshaft Position
 - Fuel Injectors (EV1 Plugs) • Coil Packs
 - Automatic Transmission control
- AF49-1505 GM LS1 with automatic transmission**
AF49-1590 Replacement firewall grommet

WIRING HARNESSES

UNIVERSAL WIRING HARNESS KIT

RPC's universal GM Wiring Harness uses high quality copper wires that are individual color coded and labeled the ENTIRE LENGTH of the wire. Fuse block holds standard push-in flat fuses with flashers and relays wired independently. This harness includes connectors that plug directly into GM style in-dash column ignition switch for quick installation.

- Description Part No.**
 20 Circuit Wiring Harness **RPCR1002**
 12 Circuit Wiring Harness **RPCR1002X**

AeroFlow Performance range of universal wiring harnesses complete with fuse box, relays and fuses. Each wire is colour coded and labelled every 6 inches (152.4mm) for the entire length to allow ease of installation in any car, hot rod or race car. These 8, 12 or 21 circuit wiring harnesses will wire up heater, air conditioning, wiper motor, various accessories, turn/hazard signal, relay output, brake switch, instrument cluster and more. The included fuse box is compact perfect for installation in confined areas.

AF49-1500 8 circuit wiring harness

AF49-1501 12 circuit wiring harness

AF49-1502 21 circuit wiring harness

GM LS1 WIRING HARNESS (MANUAL TRANSMISSION)

his AeroFlow Performance wiring harness is designed to be a complete plug and play harness for EFI GM LS1/LS6 series engines. It is a complete standalone replacement wiring harness that suits GM LS1 engines (1997 to 2002) with drive by cable throttle body and T56 manual transmissions. Perfect for retrofitting into older muscle cars and street rods or newer non-emissions controlled vehicles with a four wire hook-up (switched power, constant power and ground connections). The harness features a sliding grommet seal for a leak proof installation and 1.2 to 1.5 meters (3.9 to 4.9 feet) of length from the rear of the cylinder head to the PCM mounting position under the vehicle dashboard. The harness is constructed with GM Delphi connectors and terminals and high temperature wires. It includes all wiring that is required by the Powertrain Control Module (PCM) to run and control the fuel injection system.

- CONNECTIONS INCLUDED FOR:**
- Fuse/Relay Box • Fuel Pump Control (Relay included)
 - Fan controls (Relays and fuse Sold Separately)
 - Check Engine Light, Speedo output, Tachometer, OBD2 Port
 - Idle Air Control and Throttle Position Sensor
 - Mass Air Flow Sensor (3 Pin) • Manifold Absolute Pressure Sensor • Engine Coolant Temp Sensor • Alternator Control (4 Pin)
 - Oxygen Sensors (x 2) • Knock Sensor • Crankshaft Position
 - Camshaft Position • Fuel Injectors (EV1 Plugs) • Coil Packs
 - Vehicle Speed Sensor • Reverse Lockout Sensor

PAINLESS

GM LS2 / LS3 WIRING HARNESS (MANUAL TRANSMISSION)

This AeroFlow Performance wiring harness is designed to be a complete plug and play harness for EFI GM LS3 and LSX series engines using a 58 tooth crank sensor. It is a complete standalone replacement wiring harness that suits GM LS3 and LSX engines (2006 and newer) with Fly By Wire throttle body and T56 manual transmissions or non-electronic controlled automatic transmissions. Perfect for retrofitting into older muscle cars and street rods or newer non-emissions controlled vehicles with a four wire hook-up (switched power, constant power and ground connections). The harness features a sliding grommet seal for a leak proof installation and 1.2 to 1.5 meters (3.9 to 4.9 feet) of length from the rear of the cylinder head to the ECM mounting position under the vehicle dashboard. The harness is constructed with GM Delphi connectors and terminals and high temperature wires. It includes all wiring that is required by the Engine Control Module (ECM) to run and control the fuel injection system.

CONNECTIONS INCLUDED FOR:

- Fuse/Relay Box • Fuel Pump Control (Relay included)
- Fan controls (Relays and fuse Sold Separately)
- Check Engine Light, Speedo output, Tachometer, OBD2 Port
- Throttle Body • Accelerator Pedal • Mass Air Flow Sensor (3 Pin)
- Manifold Absolute Pressure Sensor • Engine Coolant Temp Sensor • Alternator Control (4 Pin) • Oxygen Sensors (x 2)
- Knock Sensor • Crankshaft Position • Camshaft Position (Non VVT only)
- Fuel Injectors (USCAR Plugs) • Coil Packs • Vehicle Speed Sensor

AF49-1506 GM LS3 with manual transmission
AF49-1590 Replacement firewall grommet

Universal Harnesses

If your car is not among the specific vehicle listed below, one of our proven universal kits is your best choice. The 12 circuit kits will cover the most basic chassis wiring needs. If your car or truck will have additional electrical accessories such as power windows, door locks or other creature comforts, you will want our 18 circuit harness. The "GM keyed column" kits are for early style "keyed" steering columns from GM and include the column mounted ignition switch. All kits come with more than enough wire and terminals, etc. to do the job, truck kits include extra long wires to suit trucks with long beds and extended cabs. You route and cut to suit your vehicle's needs.

21 Circuit Universal Kit - GM Keyed Column	PW10101
21 Circuit Universal Kit - Non GM Column	PW10102
28 Circuit Universal Kit - GM Keyed Column	PW10201
28 Circuit Universal Kit - Non GM Column	PW10202
28 Circuit Universal Truck Kit - GM Keyed Column	PW10203

8 Circuit Extreme Condition Harness Kit

Machine pre-terminated fuse block and relays. Every circuit is protected with a fuse AND a 30-amp relay for maximum reliability. Oversized, TXL, colour coded, high temp wire is used throughout. You can't make it any tougher or any more reliable! Kit Includes: Start, ignition, electric water pump, electric fan, electric fuel pump #1, electric fuel pump #2, lights & accessories. Comes with 18 feet of wire per circuit, terminals, wire ties, fusible link, rubber grommet, and easy to follow instructions. Switch panels sold separately.

8 Circuit Extreme Condition Harness Kit	PW50001
8 Switch Flat Plate Panel For In-Dash Mounting	PW50201
8 Switch Self Contained Style Panel	PW50202

Fuel Injection Harnesses

Those who choose to run the factory engine management computer will appreciate the simplicity of a Painless Fuel Injection Harness. Yes, you can whittle away at the stock harness and eventually make it work, but why complicate your life? Our engineers have worked out all the potential problems ahead of time so all you have to do is follow the straightforward instructions and you're on your way. Every wire is colour coded and labelled for ease of installation.

GM TPI 5.0L & 5.7L 1985-89 (Extra Length)	PW60202
GM TPI 5.0L & 5.7L 1990-92 (Extra Length)	PW60203

LS1 / LS6 1997-04 Elect. Throttle	PW60522
LS1 / LS6 1997-04 Elect. Throttle (Extra Length)	PW60523
GM LS1 INTERGRATED EFI/CHASSIS HARNESS 97-04	PW60608

12 & 18 Circuit Universal Fuse Blocks

Use these OEM style pre-wired fuse blocks to replace your existing fuse block or as a starting point for custom wiring. All you have to do is terminate each circuit wire and attach it to the fuse block. The 12 circuit is pre-wired and labelled for the following circuits: Air conditioning / heat, gauges/dash instruments, brake lights, headlights, coil, horn, dome light, radio, electric fan, turn signals, emergency flashers, wipers and alternator. The 18 circuit kit also includes circuits for power windows, power door locks, electric fuel pump, backup lights, cruise control, power antenna and other optional accessories. Kits include: mounting bracket, fuses, flashers, horn relay, terminals, and full instructions.

12 Circuit Universal Fuse Block	PW30001
18 Circuit Universal Fuse Block	PW30003

Universal Trunk Mount Harnesses

In many street rods and custom cars there is little or no room to mount the fuse block under the dash, forcing modifications to either the car or the harness. Our trunk mount wiring harnesses provides additional wire from the fuse block to the dash and front end, allowing the remote installation of the fuse block in the trunk or behind the rear seat. Like all Painless kits, these fuse blocks come completely pre-wired and terminated for a simple, painless installation. Includes GM column mounted ignition and turn signal plugs.

18 Circuit Universal Trunk Mount Harness Kit PW10220

Universal Weatherproof Harness

The best wiring harnesses for rough off-road conditions just got better with the introduction of this new weatherproof harness. On top of the already superior Painless design and materials, this tough new kit features: Weatherproof fuse block with clear O-ring-sealed cover, weatherproof heat-sealed crimp-on terminals, waterproof horn relay and machine crimped splices with weatherproof shrink tubing.

20 Circuit Universal Weatherproof Harness Kit PW10140

8 Circuit Modular T-Bucket Harness

We started with our proven Modular Chassis Harness and designed a harness specifically to address the basic hot rod owner's needs. This compact, streamlined, simple to install harness has all the basic circuitry needs: headlights, tail lights, brake lights, turn signals, hazards, horn, gauges, wipers, radio, electric fan, electric choke and one accessory circuit. Each wire is color-coded and printed the entire length for ease of installation. As an added plus, the fuse block is modular so if you decide at some point to add additional accessories to your bucket, you can easily snap another four circuits into place.

8 Circuit Modular T-Bucket Harness PW10308

Ford Universal Muscle Car Harness

Now you don't have to struggle with using GM colour codes while wiring your Ford muscle car. This harness features all Ford colour coded wires fully labelled with each circuit the entire length of each wire. Designed as a wiring upgrade for any 1966-76 Ford muscle car such as Galaxie, Fairlane, Falcon, Torino, Montego, etc. Will not work on Thunderbird.

1966-76 Ford 12 Circuit Harness Kit PW10123

Ford Mustang Harnesses

Give your 1965 through 1970 Mustang the Painless treatment with a new chassis wiring harness designed specifically for your 'Stang. Eliminate all of those wiring gremlins by tearing out that frayed and worn factory harness and starting fresh with a new, state of the art harness from Painless. Each harness features a modern, pre-terminated 14 - circuit covered fuse block complete with 12 blade-type micro fuses and 2 relays. All wires follow original Ford colour codes and labelled throughout for simple installation.

1965-66 Mustang 14 Circuit Harness Kit	PW20120
1967-68 Mustang 14 Circuit Harness Kit	PW20121
1969-70 Mustang 14 Circuit Harness Kit	PW20122

EZ WIRING

EZ 21

EZ 21 pre-wired fuse block will wire your car from headlight's to taillight's. It features 18 fuses and 21 circuits. The circuits are Radio, Coil, Dome Lights, Headlights, Horn, Power Door Locks, Cig Lighter, Wiper Switch, Elect. Fuel Pump, Gauges, Hazard Lights, Power Windows, AC/Heat, Elect. Fan, Backup/Cruise, Radio, Turn Signal. It also includes Horn Relay and Connector, Turn and Hazard Signals, Dimmer Switch Connector, Circuit Breaker for Headlights, 2 Flashers, 1 Alternator Plug, 2 Ignition Switch Connectors Plus more.

EZ21 EZ 21 Wiring Loom

8 Circuit Drag Race Harness & Switch Panel Kit

The Painless answer to all of your race car wiring needs. This includes an 8 circuit relay harness and a 6 switch contour rocker switch panel. The harness provides fused relay power for all your race car needs. Get away from mounting individual relays all over your vehicle and make your electrical system more reliable. Circuits covered by this system include: Start, ignition, fuel pump, water pump, electric fan, headlights and tail lights, and two accessory relays, along with a fused constant accessory power.

8 Circuit Drag Race Harness & Switch Panel Kit PW50005

GM Muscle Car Harnesses

Our universal 18-Circuit kit is modified to include custom features to make it easier to wire GM muscle cars. A pre-wired factory style bulkhead connector plugs into the fuse block through the firewall in the stock location. Easy-to-install, factory original, quick connect terminals are included for the in-dash printed circuit board. Pre-terminated plugs for the ignition and turn signal switches are included.

- 1967-68 Camaro and Firebird PW20101
- 1967 RS Headlight Harness PW30818
- 1969-74 Camaro/Firebird, Nova, El Camino, PW20102

1955-57 Chev Harnesses

An adaptation of our universal 12 and 18-Circuit harness designed to custom fit your "Shoebex Chevy" with a factory location mounting plate for the fuse block, special dash and turn signal connectors. This harness features colour coded wires fully labelled with each circuit the entire length of each wire.

- 1955-57 Chevy 12 Circuit Harness Kit PW20107
- 1955-57 Chevy 18 Circuit Harness Kit PW20106

Holden Harness

Designed to suit all Holdens up to HZ and Toranas up to UC, this 21 circuit harness features OEM colour coded wires, fully labelled with each circuit the entire length of each wire.

- Holden 21 Circuit Harness Kit PW10115

Mopar Muscle Car Harnesses

Designed for 1966-76 Chrysler muscle cars, this 12 circuit harness features Mopar OEM colour coded wires, fully labelled with each circuit the entire length of each wire. This harness also features our unique covered mini micro-fuse block pre-terminated for easy installation.

- 1966-76 Chrysler 12 Circuit Harness Kit PW10127

21 Circuit Drag Race Harness & Switch Panel Kit

Complete 21-Circuit Drag Race Wiring Kit. This kit contains everything you need to wire a race car in one box. The 8-rocker switch control centre plugs directly into the 21-circuit Pro Street harness making this the easiest and most complete way to wire a race car. Harness circuits include electric water pump, radio, electric fan, fuel pump, brake lights, headlights, taillights, wipers, turn signals, flashers, horn and ignition. The switch panel features heavy duty rocker switches to control start, ignition, fan, fuel pump one, fuel pump two, water pump, lights and one accessory.

- 21 Circuit Drag Race Harness & Switch Panel Kit PW50003

21 Circuit Pro Street Harness Kit

Looking to operate your circuits through the factory switches and not a switch panel? This Pro-Street harness is for you. Contains all the features of the 21-circuit harness in the Drag Race Wiring Kit but with necessary pigtails to direct wire the start, ignition, fan, fuel pump, water pump and lighting circuits.

- 21 Circuit Pro Street Harness Kit PW50002

Painless Convenience Module w/ Auto Headlights

The Painless Convenience Module allows you to retrofit your older vehicle with standard features found on many vehicles sold today. Cars today have many features that 15 to 20 years ago were unheard of. The Convenience Module brings these features to you in a complete kit with easy to follow instructions. In most cases, the installation of this module requires no cutting of factory wiring and can be installed in less than a couple hours. Vehicles must switch ground through the door jamb switches/ground

activated dome lights (standard on GM & MOPAR vehicles) in order for this module to operate correctly. However instructions and parts are included for vehicles with power activated door switches.

- PW63040 PAINLESS MODULE W/ AUTO HEADLIGHTS

12 Circuit Universal Race/Pro Street Fuse Block

A racing version of our PW30001 fuse block designed with all the circuits to make your race car street legal. Just terminate your wiring and attach it to the fuse block. Pre-wired and labelled for the following circuits: electric fuel pump, instruments, electric water pump, radio, electric fan, brake lights, wipers, headlights, turn signals, emergency flashers, horn, coil, dome light and alternator.

Kit includes: 10-gauge alternator lead, mounting bracket, fuses, flashers, horn relay, terminals, fusible link, and step by step instructions.

- 12 Circuit Universal Race/Pro Street Fuse Block PW50101

Weatherproof Universal Fuse Block

If you just need to replace an exposed unreliable fuse block with something dependable, this new 20- circuit weatherproof block is the solution. It comes fully assembled with wire leads that you can connect to your existing wiring and is completely sealed from the elements for trouble free performance. Includes mounting bracket.

- Weatherproof Universal Fuse Block PW30004

Circuit Isolating Auxiliary Fuse Block Kits

The safe way to add electrical accessories is with CirKit Boss, the first circuit isolator that provides both constant and ignition hot circuits. No more tapping into an existing wire or into a spare circuit at the fuse block. Using these add-on, relay activated fuse blocks is the safe way. Only a small activation wire from any ignition source is needed to turn on the relay that turns on the fuse block. All CirKit Boss models are made using TXL cross link polyethylene wire rated to 125°C. All harness wires are 48" long and factory machine terminated. CirKit Boss includes an in-line circuit breaker, relay, mounting hardware, & terminals. Protects your OEM warranty. Easy to install. Safely adds ignition hot and constant hot circuits.

- 3 Circuit - 1 Constant & 2 Ignition Hot, 30 Amp Relay PW70103
- 3 Circuit - 3 Ignition Hot Circuits, 40 Amp Relay PW70113

Weather Resistant Auxiliary Fuse Block Kits

These are the same as the units listed above with the addition of a weather resistant fuse cover for extreme use where moisture/dust resistance is important. Mounts under hood in unprotected areas.

- 3 Circuit - 1 Constant & 2 Ignition Hot, 30 Amp Relay PW70203
- 3 Circuit - 3 Ignition Hot Circuits, 40 Amp Relay PW70213
- 7 Circuit - 3 Constant & 4 Ignition Hot, 30 Amp Relay PW70207
- 7 Circuit - 7 Ignition Hot Circuits, 2 x 40 Amp Relays PW70217

Relay Block Kits

Choose from either a 3-Pack or 6-Pack of 40 amp relays. Ideal for powering accessories such as fuel pumps, water pumps, throttle stops, fan, nitrous solenoids. 3-Pack kit includes one 40 amp circuit breaker, 6-Pack includes two.

- 3-Pack Relay Block Kit PW30107
- 6-Pack Relay Block Kit PW30108

FUSE BOX COVERS

MUSTANG FUSE BOX COVER

Fits over the factory plastic fuse box lid and can be installed in just minutes

Fabricated from .100" thick Aluminium Improves under-hood appearance Can be polished, chromed, powder coated, painted or left as is for a race look

LOOMS & ACCESSORIES

Electric Water Pump Relay Kit

This relay kit provides maximum battery voltage to maximize cooling efficiency and to protect the main electrical system from damaging amperage overloads.

- Electric Water Pump Relay Kit PW50106

Waterproof Water Pump Relay Kit

Perfect for the harsh conditions encountered off-road, this relay kit provides complete protection from the elements and ensure reliable and dependable performance. These kits utilize heavy duty waterproof relays, weatherproof circuit breaker covers and extreme condition weatherproof shrinkable crimp-on terminals.

- Waterproof Water Pump Relay Kit PW30132

Weatherproof Fuel Pump Relay Kit

Perfect for the harsh conditions encountered off-road, this relay kit provides complete protection from the elements and ensures reliable and dependable performance. These kits utilize heavy duty waterproof relays, weatherproof circuit breaker covers and extreme condition weatherproof shrinkable crimp-on terminals.

- Weatherproof Fuel Pump Relay Kit PW30131

Aeroflow Electric Fuel Pump or Water Pump Relay Kit

This universal relay kit can be used for EFI fuel pumps or electric water pump to maximise battery voltage and protect the main electrical system from amperage overloads.

- Aeroflow Electric Fuel Pump or Water Pump Relay Kit PW30133

Remote Starter Solenoid

Allows you to position the starter solenoid any place you need to in order to make maintenance easier. Comes with wire and connectors to do the job right.

- Remote Starter Solenoid PW30203

Charging System Shutdown Relay Kit

Alternator feedback can keep your engine running even with the master disconnect turned off - this kit eliminates engine run-on. Highly recommended by most racing sanctioning bodies. Easy to install with all hardware and instructions. 35 amp maximum for racing only.

- Charging System Shutdown Relay Kit PW50103

High Amp Alternator Shutdown Relay Kit

This kit, complete with 250 amp solenoid, will effectively handle alternator feedback of the highest amperage alternators. Eliminates engine run-on when the master disconnect is turned off.

High Amp Alternator Shutdown Relay Kit PW50105

Auxiliary Light Relay Kit

Install extra driving or fog lights easily and properly with our Auxiliary Light Relay Kit. Switch can be wired to turn on: Low beams & auxiliary lights, High beams & auxiliary lights, or auxiliary lights only. Complete kit includes lighted switch, wiring harness, 30 amp relay and terminals.

Auxiliary Light Relay Kit

PW30803

GM Steering Column Conversion Kit

All the plugs and terminals for your early GM keyed steering column in one kit. Contains two ignition switch connectors, two turn signal connectors and one dimmer switch connector and terminals for each.

GM Steering Column Conversion Kit PW30806

GM Steering

Column Pigtail Kit

Original factory connectors to replace worn out or damaged connectors for early GM keyed steering columns. GM colour-coded wires are ready to connect into your existing harness. Includes: two keyed ignition switch pigtails, one turn signal pigtail with two connectors; one dimmer switch pigtail. Wire length: 12 Inches.

GM Steering Column Pigtail Kit

PW30805

Fibreglass Body Ground Kit

For proper electrical grounding of any vehicles with fibreglass bodies.

Fibreglass Body Ground Kit PW40026

TERMINAL STRIP

The MSD Terminal Strip can be used for virtually any wiring installation to provide a clean, professional appearance. The Terminal Strip features four separate terminals that use 6-32 screws to hold 12 gauge or smaller wires. The terminals also accept wire lugs that are .312" wide and have a "wall" between each terminal to prevent arcing and electrical shorts. It is electrically rated at 300V-20A.

MSD8810

Junction Block

Two 10 gauge posts provide a perfect way to attach two large gauge wire connections.

Junction Block PW80112

8 POINT DISTRIBUTION BLOCK

Use this block anywhere power or ground distribution is necessary. No more overloading battery terminals with numerous feeds to different components.

PW80114

Maxi Fuse Assembly

Maxi fuse assembly with 70 amp maxi fuse and cover.

Maxi Fuse Assembly PW80101
70 Amp Replacement Fuse PW80102

Electrical System Surge Protector

Voltage spikes can cause damage to various components in your vehicle's electrical system. This easy to install device clips the spikes at 14.5 volts to protect sensitive electrical accessories. Installs between positive and negative battery terminals.

Electrical System Surge Protector PW40030

DuraSpark II Harness

This harness allows for easy conversion from an old points-style Ford ignition to a modern DuraSpark II electronic ignition system. Requires DuraSpark II distributor and yellow or blue ignition module.

DuraSpark II Harness PW30812

GM HEI Pigtail

Replacement power pigtail for GM HEI distributor.

GM HEI Pigtail

PW30809

Replacement

Circuit Breakers

Push-in manual reset circuit breakers.

10 Amp Circuit Breaker PW80107
15 Amp Circuit Breaker PW80108
20 Amp Circuit Breaker PW80109
30 Amp Circuit Breaker PW80110

MSD HIGH CURRENT RELAY

MSD's High Current Relays are what you need to activate accessories that draw high current. These Relays are very reliable due to the fully automated manufacturing process and sophisticated coil winding procedure. The SPST High Current Relay is rated at 30 amps with an input voltage of 12 volts DC. The relay is ideal for use with the MSD RPM Activated Switch when 12 volts are responsible for activating a high current device such as a nitrous solenoid. The DPST relay is also rated at 30 amps with a 12 volt input voltage. This Relay is the best choice when 12 volts are required to activate multiple high current devices at the same time such as multiple stage nitrous solenoids.

MSD High Current Relay, DPST MSD8960
MSD High Current Relay, SPST MSD8961

UNIVERSAL TURN SIGNAL KIT

The toggle switches for both turn signals and flashers can be mounted anywhere. The kit is designed to be an integrated system, turn signals will work in conjunction with brake lights.

PW30120

Dual Fan Relay

Aeroflow's Performance dual fan relay and wiring harness kit is essential with a twin electric fan setup. This universal kit will prevent voltage drops and amperage overloads which can cause havoc to your electrical system. It includes 2 automotive 12 volt 40 amp relays, 2 30 amp circuit breaker, all crimp fittings and a prewired relay blocks for ease of installation.

AF49-1048

Electric Fuel & Water

Pump Relay And Wiring Kit AF 49-1038

WEATHERPACK RELAY

Aeroflow's weatherpack relay comes with relay holder and terminals. The weatherpack housing protects the fuse from the elements so its great for use inside or outside of the vehicle. Suits 12 awg wire. Includes 30amp relay. **AF49-1508 Weatherpack 30amp relay kit**
AF59-1508 30amp relay ONLY

PUSH IN FUSIBLE LINK POWER FEED

Aeroflow's fusible link allows you to piggy back a fuse position on your fuse box to draw power without any splicing. Simply remove a mini blade fuse and insert the link in its place like a double adapter, now this splits the circuit into two fused circuits. Includes 30amp mini blade fuse. 10 Pack **AF49-1511**

ELECTRICAL BULKHEAD CONNECTOR

The Aeroflow Performance weld-in electrical bulkhead 6 pin connector is a quality component to wire your fuel pump in your fuel cell project in a safe way to ensure no leaks or fumes escape. The connector kit is rated up to 40a to supply enough juice to power all aftermarket fuel pumps. The terminals are intended for use with 14-10AWG wires. The terminals are easily installed or de-pinned with ease using basic hand tools and each connector is separate making installation a breeze. This kit can include either a weld-in steel bung or a weld-in aluminum bung for the bulkhead connector, a Viton O-ring to seal the bulkhead to the bung, and a snap-ring to secure the bulkhead safely in place. Internal and external connectors are included, along with 12 crimp terminals. Max diameter of bung is 2.4" and Minimum Panel hole is 1.9".

AF49-4049 with Aluminium Weld-On Bung.
AF49-4049S with Steel Weld-On Bung.

ELECTRICAL TERMINAL BULK HEAD

Designed to conduct power or earth through a panel (minimum 4mm thick) or closed area. Through bolt design with nylon stepped washers. Perfect for use in powering intank pumps to original fuel tanks.

AF49-4051

PLUGS & TOOLS

UNIVERSAL

ELECTRICAL

DE-PIN KIT

The Aeroflow Performance electrical connector terminal de-pin kit is one of the handiest additions to your tool kit. The de-pin kit enables you to eject the terminals out of connector easily and without damaging the terminal, wire or connector.

AF49-8552

Pin Extraction Tool MSD8193

This Tool allows you to remove the terminal from the Weathertight Connector if you need to make repairs or change your wiring.

MSD8190 10 Male Pins and Seals
MSD8191 10 Female Pins and Seals

Quick Connect Terminal Kits

Make your own locking quick connect plugs easily and quickly. Each kit includes a male and a female connector and the appropriate number of terminals.

NOTE: Accepts only 14 -20 gauge wire.

4 Wire Quick Connect Terminal Kit PW40008
6 Wire Quick Connect Terminal Kit PW40009
9 Wire Quick Connect Terminal Kit PW40010
12 Wire Quick Connect Terminal Kit PW40011
15 Wire Quick Connect Terminal Kit PW40012

DEUTSCH CONNECTORS

These connections are protected with thick seals that will keep water, mud and debris away from the contacts. These terminals can handle more current than conventional connectors and do not require special tools. Supplied with terminals, seals and housings.

MSD8183 2-Pin Connector, 16 gauge
MSD8181 4-Pin Connector, 16 gauge
MSD8180 6-Pin Connector, 16 gauge
MSD8185 8-Pin Connector, 16 gauge
MSD8186 12-Pin Connector, 16 gauge

WEATHERTIGHT SEALED CONNECTORS

If you need electrical connectors that are unaffected by water, chemicals, vibration, temperature or dirt, and that will not come apart accidentally, then you need MSD WeatherTight Connectors. The WeatherTight connectors are molded from a special nylon material to withstand temperatures from -40° to +257°F and are indexed to prevent mismatching. Positive locks let you know when the connectors are completely joined by producing an audible CLICK. No click means no connection. For maximum electrical isolation, each terminal has its own tower so there is no chance of shorting between the wires. Each terminal tower utilizes self-lubricating silicone seals for protection against water, dust, oil, and other engine compartment fluids.

Connector	Individual
6-Pin	MSD8170
4-Pin	MSD172
3-Pin	MSD8172
2-Pin	MSD8173
1-Pin	MSD8174

TWO PIN CONNECTOR

MSD8824 MSD Two Pin Connector

AUTOMOTIVE ELECTRICAL CONNECTOR KIT

Features a spade style crimp terminal which will handle max 20 AMP. It will accept wire size from 1.0mm to 1.5mm. Each Kit includes 10 x 1 pin connectors, 10 x 2 pin connectors, 8 x 3 pin connectors, 8 x 4 pin connectors, 200 male/female pins and one crimp tool.

AF49-9550-KIT

HEAT SHRINK

Be prepared for your next wiring project with this 61 Piece Heat Shrink Kit from AeroFlow Performance. Heat shrink tubing is a type of extruded plastic tubing that can be cut to size and fitted over a wire or cable joint to protect and insulate the connection. When heated is applied the tubing shrinks permanently providing a protective seal. Packaged neatly in a reusable clear plastic storage case, offering a range of pre-cut 4-1/4" long heat shrinks with sizes varying from 4mm to 25mm. The 2:1 shrink ratio allows for a great seal to protect your wiring. All sizes are also available in refill packs of 10 to keep your case always full and ready to go again.

Kit Includes:

20 x 3/16" (4.77 mm)	15 x 1/4" (6.35 mm)
10 x 3/8" (9.52 mm)	10 x 1/2" (12.7 mm)
4 x 3/4" (19.05 mm)	2 x 1" (25.40 mm)

AF49-8989BLK	10 PACK 1" (25mm)

FLEX BRAID WRAP

Black tight weave high coverage AeroFlow's heat-flex braid is lightweight and extremely flexible. Heat-flex braid can be used for insulating wire bundles or cables while offering that factory look. Heat-flex braid can also be used on heater and radiator hoses. With a tough woven construction, heat-flex provides a continuous temperature rating of up to 127°C/260°F and a melting temperature of 250°C/482°F. Available in 1m/3ft and 7.6m/25ft length rolls in 3/4", 1", 1 1/2" and 1-1/2" size I.D. Can be terminated with heat-shrink or AeroFlow hose end finishers for that professional look.

CLASSIC BRAID WIRING WRAP

The perfect solution to clean up and protect the wiring in your vehicle. The laterally split design allows for easy installation over splices and inline connectors without exposing wires and cables. Resistant to the majority of chemicals and automotive fluids. Available options in sizes from 1/8" to 1" in various lengths. They are also available in chassis and fuel injection kits containing everything you will need to cover your harness. ClassicBraid is a self-wrapping split braided wiring loom for that classic show car look! Its smooth texture and appearance will transform your engine bay, giving you that factory installed look. The tightly woven construction provides excellent blockage against mud and dirt, while maintaining adequate drainage. The lateral split design has a minimum 25% overlap to allow for easy installation and optimum wiring protection.

- Continuous Temperature Rating -94° to 257°F
- Melting Point 482°F

COIL HARNESS & PLUGS

GM LS1 COIL HARNESS

AeroFlow Performance EFI LS1 Coil Sub Harness. This coil sub harness is intended to be used with factory LS1 coils with the factory GM Coil-on-plug connectors. These sub-harnesses allow for custom coil brackets that place coils closer together or in a different position besides the factory location. Available in OEM length, designed to be a complete plug and play. Sold Individually.

AF49-1504

GM LS1 COIL

PLUG & PINS

The Aeroflow Performance GM LS1 coil plug is a great solution when re wiring the car for a fresh start or you wish to make new extension harnesses yourself when relocating the coil packs. Over time with heat these plugs can become brittle and break apart so it's a great idea to replace them to avoid any unwanted misfiring issues

AF49-1525

GM LS COIL EXTENSION HARNESSSES

These harnesses are designed to extend from your OEM harness to your coil harness when you have relocated your coils further away.

AF49-1509 460mm (18") long
AF49-1510 1170mm (46") Long

GM LS2 COIL

OEM HARNESS

Aeroflow Performance EFI LS2 Coil Sub Harness. This coil sub harness is intended to be used with factory LS2 coils with the factory GM Coil-on-plug connectors. Sold Individually.

AF49-1534

GM LS2 COIL PLUGS (4 Pack)

These Aeroflow Performance 4 pin ignition coil pack automotive plugs are used with GM series LS2 engines or when you wish to convert over to the later model coil packs on any conversions. The set of 4 pre-terminated coil plug looms allow easy installation on current wiring without the need to crimp. Perfect for those that are replacing worn damaged connectors or for those creating a new loom due to relocating coils.

Note: Extra pins supplied for custom looms.

AF49-1535

INJECTOR PLUGS & ADAPTERS

INJECTOR ADAPTERS

The Aeroflow Performance range of injector harness adapters are an easy plug and play solution which requires no wiring. Gone are the days of having to splice, crimp or solder wires to make a mess of your wiring and cause potential wiring issues in the future. These OE quality adapters come in a range of different varieties to suit many different applications.

SENSOR PLUGS & ADAPTERS

BOSCH PRESSURE & TEMPERATURE SENSOR

Aeroflow Performance combined liquid pressure and temperature sensor is the one and only sensor you need for your race car. It features 2 sensors in one small compact unit. The liquid pressure reads 0-150 psi (0 to 10 bar) and the temperature rating is -40 to 140 deg C (-40 to 284 F).

Using stainless steel internals means it is suitable for Diesel, petrol, alcohol-based fuels, water, engine oil and transmission oil. Note- We highly recommend remote mounting these sensors as mounting straight into an engine block can run vibrations through the sensor and cause premature failure of the sensor.

- 45-degree cone seat with Male M10 x 1.00mm fitting
- Bosch Trapez 4-pin connector (plug/pins sold separately AF59-1554)

- Tightening torque 37.5Nm

AF49-1554 Combined pressure and temperature sensor

AF59-1554 BOSCH PRESSURE & TEMPERATURE SENSOR PLUG AND PINS

PRESSURE SENSOR PLUG

This wiring plug is specifically designed to suit TI/EURO and Honeywell Pressure Sensors as well as GM throttle position sensors. Includes plug, pins and rubber seals.

• Suits AF49-1551 pressure sensor.

AF49-1520

PRESSURE SENSOR

The AeroFlow Performance pressure sensor (transducer) is a 150PSI (10 Bar) sensor with linear voltage output. Commonly used as an oil pressure sensor or fuel pressure sensor it also works with automotive gauges and data-loggers (as a pressure sender / transducer sensor) on popular aftermarket brands and Ecu's. Can also be used for Wastegate Pressure and in CO2 Systems making it a very versatile sensor. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range. It includes the plug and pins to easily wire into any application (plug / pins also sold separately AF49-1520)

- This sensor has a 1/8" NPT thread
- The sensor body material is Brass
- Overall length is 44.30mm (1-47/64")
- Operating pressure range is 0 to 10 bar (150 psi)
- Supply voltage range is 4.65 to 5.35 volts (working voltage is 5 volts)
- Response working time is 10 milliseconds

AF49-1551**PRESSURE SENSOR BLOCK**

The AeroFlow Performance pressure sensor block is a must to protect your transducers from harsh engine vibrations, shock loads and heat leading to premature failure to the sensitive internals of the modern day pressure sensor when mounting directly to engine blocks. To prolong the life and reliability remote mounting these sensitive pressure sensors is recommended to improve service life and reliability. This block allow you to remote mount up to 3 sensors with 3 x 1/8" NPT and 10 x 1/8" NPT for input line configurations. This make it perfect to improve engine bay organization by neatening up wiring, plumbing and bringing all the sensors to one location for easy maintenance. Compatible with all transducers that utilize 1/8 NPT male threads and 7/8" or smaller body/hex diameter.

The kit includes: 1x 3 Port Sensor Block, 3x 1/8" NPT Plugs, 2x M6 Stainless Steel Bolts, 2x M6 Stainless Steel Washers, 2x M6 Stainless Steel Nyloc Nuts, Mounting hole spacing: 35mm Total length 105mm (4-9/64"). Total width 31mm (1-1/8"). Height 25mm (63/64)

AF456-03BLK Black
AF456-03S Silver

TEMPERATURE SENSOR

The AeroFlow Performance temperature sensor is a Negative Temperature Coefficient (NTC) thermistor sensor. The NTC is a passive resistor, and the resistance of an NTC varies with temperature. More specifically, as the ambient temperature around an NTC increases, the resistance of the NTC decreases. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range. It includes the plug and pins to easily wire into any application.

- This sensor has a 1/8" NPT thread
- The sensor body material is Brass
- Overall length is 51.70mm (2-1/32")
- Depth of sensor is 22.20mm (7/8")
- Operating temperature range is -20 to 150°C (-20 to 302°F)
- Supply working voltage is 5 volts
- Response working time is 10 milliseconds

AF49-1550**GM LS MAP SENSOR ADAPTER**

This mass air flow adapter from AeroFlow Performance is designed to adapt a LS3 map sensor to a LS1 intake manifold. The LS3 map sensor conversion is popular for aftermarket turbocharged applications to allow the ECU to read higher boost pressures. LS3 map sensor (AF49-1553) and LS1 to LS3 map sensor adapter harness (AF49-1533) is sold separately.

AF64-2149**MAP SENSOR ADAPTER HARNESS**

This adapter harness is used when upgrading from an early LS1 1 Bar MAP sensor to the late model LS3 2.5 Bar MAP sensor. This harness can also be used as an extension harness when changing the position of the sensor in the engine bay. LS3 map sensor is sold separately AF49-1553

AF49-1533**FORD BARRA MAP SENSOR**

This genuine Bosch Ford Barra Manifold Absolute Pressure (MAP) sensor is designed to direct fit into Ford BA, BF, and Territory Turbo engine only, this is not the sensor on the intercooler pipe but in the intake manifold. This sensor is used to determine engine load on forced induction engines. This sensor is a popular upgrade intended to be used on engines producing positive manifold pressure up to 1.7 BAR, or roughly 24psi of boost. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range. This sensor can also be used for universal applications that also require a map sensor up to 1.7 BAR.

AF49-1560 BOSCH O 281 002 514**BOSCH GM LS3 MAP SENSOR**

The AeroFlow Performance GM LS3 Manifold Absolute Pressure (MAP) sensor is designed to direct fit into VE Holden Commodore & HSV LS2 LS3 L76 L77 L98. This sensor is used to determine engine load on forced induction engines. This sensor is a popular upgrade intended to be used on engines producing positive manifold pressure up to 1.5 bar, or roughly 21psi of boost. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range.

AF49-1559 BOSCH O 261 230 262**MAP SENSOR**

The AeroFlow Performance Manifold Absolute Pressure (MAP) sensor is a 4BAR (58PSI) MAP sensor. This sensor is used to determine engine load on forced induction engines. This sensor is intended to be used on engines producing positive manifold pressure up to 3 bar, or roughly 44psi of boost. This sensor is not recommended for use with engines that will not see boost above 1 bar, as it limits sensor resolution. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range. It includes the plug and pins to easily wire into any application.

- This sensor has a 5mm (13/64") vacuum barb
- Overall length is 52mm (2-2/64")
- Overall Width is 27.50mm (1-5/64")
- Overall body height is 11.60mm (29/64")
- Operating pressure range is 20 kpa to 400 kpa
- Supply voltage range is 4.65 to 5.35 volts (working voltage is 5 volts)
- Response working time is 1 millisecond

AF49-1552**VE AIR INTAKE SENSOR HARNESS**

Designed to suit the VE commodore air intake sensor when deleting the MAF sensor for aftermarket engine tunes.

AF49-1513**GM LS KNOCK SENSOR CONVERSION HARNESS**

AeroFlow Performance GM LS knock sensor conversion harness allows for dual wire knock sensors to be plugged into the factory LS1 harness. It adapts from the one knock sensor on the LS1 and convert over to the dual LS3/LSX knock sensor system. NOTE: In order to this you may require special PCM software changes or a PCM programmed for the use of dual wire knock sensors. Made from OEM Delphi-Packard connectors with high temp cross-linked polyethylene TXL wire. Total length is 1300mm.

AF49-1531**GM LS CAM SENSOR EXTENSION**

AeroFlow Performance LS1 cam sensor extension harness is required when converting from LS1 camshaft sensor position to the front timing case on the later LS series engines. This 36" (914mm) long harness enables your harness to reach the cam position sensor in the timing cover from the original position on the rear of the engine.

AF49-1540 GM LS1 cam sensor extension wiring harness**AF49-1514****AF49-1515****O2 SENSOR EXTENSIONS**

The AeroFlow Performance oxygen sensor extensions are a must when upgrading the exhaust and the O2 sensors are moved further away from their factory OE location. They feature an OEM design that plugs right into the OE sensor harness on one end and the O2 sensor on the other with no cutting or splicing required. Made from high temperature resistant wiring and with a fire retardant shielding for added protection against the heat from the exhaust system. Designed to be a plug and plug in Holden Commodore early VT and late VY, VZ & VE.

AF49-1514 Late VY, VZ & VE 360mm (14-11/64")**AF49-1515 VT to early VY 360mm (14-11/64")****AF49-1537 GM LS O2 extension female to female plug****GM THROTTLE POSITION SENSOR**

This genuine AC Delco GM Original Equipment Throttle Position Sensor (TPS) from AeroFlow Performance is the recommended replacement for your GM vehicle's original component. The TPS reports the throttle position to the engine control module, which uses the signal to adjust fuel delivery and ignition timing.

AF49-1561 Genuine AC Delco 17123852 TPS**FLY BY WIRE****EXTENSION****HARNESS**

Designed to suit VZ-on LS based engines with the fly-by-wire throttle body, this extension harness is perfect for aftermarket Hi-Rise manifold where the original wiring simply will not reach.

Will not suit 5.7L VZ Commodore. Overall length 590mm (23")

AF49-1516**ELECTRONIC THROTTLE CONTROLLER**

The AeroFlow Performance Electronic Throttle Controller (ETC) unit is a throttle response controller that allows you to tune the throttle curve of your vehicle's engine. By providing new points of reference for your vehicles throttle mapping this will either sharpen or dampen your vehicles throttle response. This is designed to work with most fly by wire throttle vehicles which tend to have delay from the moment the accelerator pedal is pressed. The ETC reduces and eliminates this delay by giving you the ability to adjust the throttle's sensitivity.

The ETC unit is equipped with a clear display and settings menu for easy operation. The 3 modes (Standby, Economy, Performance) offer different settings for different driving styles and conditions. The Performance mode and Economy mode also feature 10 adjustable settings in each mode.

The ETC is an easy to DIY install. Purchase the unit itself and the required harness to suit the vehicle. This harness will allow you to plug in-between your factory pedal assembly and pedal plug, the wiring is then simply run through the dash and the unit is mounted in a suitable location.

AF49-6500 ETC Unit Only (harness sold separately)

ETC Plug and play harnesses are available for most vehicles.

For full listing please visit aeroflowperformance.com

BOSCH ACCELERATOR**PEDAL PLUG**

This wiring plug is specifically designed to suit Bosch DBW accelerator pedals.

AF49-2137**BOSCH DBW****THROTTLE BODY PLUG**

This wiring plug is specifically designed to suit Bosch electronic throttle bodies.

AF49-2135**ETHANOL CONTENT SENSOR****PLUG & PINS**

E85 Flex Fuel sensor plug and pins ONLY

AF49-1521**REPLACEMENT E85****CONTENT SENSOR**

Part No. IM3907

ETHANOL CONTENT SENSOR

This genuine GM (#13507129) continental E85/Flex Fuel ethanol content sensor from AeroFlow Performance measures a vehicle's fuel ethanol content percentage. This allows users with programmable engine management systems (capable of tuning for flex fuel) the ability to optimize an engine's tuning calibration for fuel ethanol content. While many petrol stations label flex fuel as E85 (85% Ethanol and 15% Gasoline), actual ethanol content can be much different. Using this E85 Ethanol content sensor it delivers the ability to determine the amount of fuel blend being used at any given time. This sensor is a universal fitment with a 3/8" (9.52mm) barbs on either end. It does not include the plug and pins which are sold separately (AF49-1521). This sensor measures 50mm Overall Length, 30mm Overall Width, 80mm Overall Height.

AF49-1555**E85 CONTENT SENSOR BYPASS BLOCK**

AeroFlow Performance flex fuel/E85 content sensor bypass block is designed to be used with our E85 Content Sensor (AF49-1555) or ACDelco (GM) 13577429, 13507129. This block has been engineered with a dual flow system to provide optimal flow without restriction when using this sensor on either the feed or the return. This block has an integral bracket for mounting on a frame rail, floor, firewall, or other locations, and the swivelling design allows for angling the electrical plug as well.

AF64-1555 -100RB PORTS

FAST-FLASH™ POWER PROGRAMMER, 98-05™ GM GASOLINE ENGINES

FAST-FLASH™ Power Programmers give your vehicle a 15 minute tune-up that unlocks hidden performance potential, yielding maximum horsepower and torque. The process is simple – just plug the programmer into your vehicle's under-dash ODBII port, and answer a few questions. Select from three distinct modes (performance, towing or economy), and FAST-FLASH™ automatically reprograms your vehicle's computer for idle quality and optimized air/fuel ratios. It also re-calibrates the ignition timing, transmission shift points and the speedometer for gear and tire changes

- Select from performance, towing or economy mode
- Optimize engine parameters for performance camshafts
- Modify/remove stock speed limiter setting
- Calibrate fuel octane level for various fuels
- Adjust the spark curve for the fine tuning of ignition timing
- Read live streaming engine data
- Modify air/fuel ratio at wide-open throttle
- Change engine idle speed and cooling fan activation temperature
- Check and clear diagnostic trouble codes
- Adjust the transmission shift points & firmness

FAST170382

Universal O2 Sensor Processor Kits

FAST engineers have developed a kit that makes it easy for anyone to measure an engine's air/fuel ratio. This plug and play universal O2 sensor processing kit allows your data acquisition system or dyno software to record and display air/fuel ratios. Since it uses fully automatic sensor calibration, there's no need for manual "free-air" calibration that competitive units require. Additionally, each sensor kit is a standalone unit, so using multiple kits for measuring all your engine's cylinders is easy. Compatible with FAST Digital Air/Fuel Meters.

Description	Part No.
Universal O2 Sensor Processor Kit	FAST170579
XFI Wide-Band	
Auxiliary O2 Sensor Processor Kit	FAST170577

AIR FUEL RATIO GAUGE

The AeroFlow Performance digital Air Fuel Ratio Kit has been designed for you to provide good insurance for your engine to ensure it does not run too lean while driving. Accurate AFR data is critical when tuning an engine. Running rich can cause a loss in power, while running too lean may result in serious engine damage. Using the AeroFlow Performance wideband AFR gauge with a 5-wire heated wideband LSU 4.9 sensor during the tuning process allows you to monitor AFR's and adjust tuning parameters to optimize them for maximum power and efficiency.

Featured with this wideband is a blue LCD with a digital readout in the centre of the gauge, and a bar-graph style LED's around the outside of the gauge that change from green (rich) to yellow (optimal) to red (lean) for immediate reference to the AFR.

- This wideband range reads from 10.0:1 to 20.0:1 AFR readings.
- Gauge to Sensor cable is 3 meters (9.84 ft)
- LSU sensor cable is 980mm (3.21ft)
- Gauge diameter is 2-1/16" (52mm)
- O2 Sensor bung is M18x1.5mm
- LSU 4.9 WIDEBAND SENSOR IS NOT COVERED UNDER ANY WARRANTY

Included in this kit is the gauge, LSU 4.9 5 wire heated O2 sensor, weld-in bung, wiring harness, and instructions for installation.

AF49-7500

WIDEBAND

OXYGEN SENSOR

The AeroFlow Performance 5-wire heated wideband LSU 4.9 oxygen sensor is a must during the tuning process as it allows you to monitor AFR's and adjust tuning parameters to optimize them for maximum power and efficiency. • Wire harness is 980mm (3.21ft) (from hexagonal nut to the connector) • LSU 4.9 WIDEBAND SENSOR IS NOT COVERED UNDER ANY WARRANTY

AF49-7501

O2 SENSOR EXTENSION

This AeroFlow Performance O2 oxygen sensor extension harness is a great option when your current wideband O2 sensor cable is just too short for your setup. This extension will allow you to reach where it is needed without the stress of having to make an entire new harness from scratch.

- Length is 3 meters (9.84 ft)
- Suits LSU 4.9 wideband O2 sensor

AF49-7502

WIDEBAND OXYGEN SENSOR PLUG

The AeroFlow Performance wideband oxygen sensor plug and pins are a great solution when installing a new o2 sensor into your exhaust system. This plug will suit all LSU 4.9 wideband oxygen sensors such as AF49-7501 and Bosch. Included with seals and terminals ready to wire up your sensor.

AF49-7511 Plug and Pins

LM-2 Air/Fuel Ratio Meter

The LM-2 combines an air/fuel ratio meter, a full-function 32-channel datalogger, and powerful software to deliver a complete tuning workshop for less than the cost of one dyno day. Whether you have a piggy-back fuel controller, race carb, aftermarket ECU, OBD-II tuning software, or a flash/chip programmer, an LM-2 is the tool you need to dial in maximum HP.

The meter's digital signal processing technology provides data on exactly how rich or lean an engine is running at any load. The LM-2's self-calibrating circuitry also compensates for changes in temperature, altitude, and sensor condition. • Patented "Direct Digital" Wideband Technology

- Wideband O2 Compatible with ALL fuel types
- Single or Dual Channel Version Available
- OBD-II Scan tool- read/clear DTCs and log up to 16 channels of CAN OBD-II Data • Log directly to SD card (included)
- Playback log data on screen and/or with powerful LogWorks software (included) • Large high-contrast graphics LCD
- Built-in RPM converter (direct frequency or with optional inductive clamp) • 4 fully-differential analog inputs
- 2 configurable linear analog outputs
- Positive lock connectors for all connections
- Innovate MTS serial IN and OUT • USB connection to your PC

LM-2 Kit with Single Wideband O2 Sensor IM3806
LM-2 Kit with Dual Wideband O2 Sensors IM3807

LM-2 Window Mount

"Window Mount" will allow you to have the LM-2 mounted to your windshield. This will help provide a better view of the display while tuning. Innovate LM-2 Window / Dash Mount Suction Cap IM3814

The LM-2 DUAL BASIC

The LM-2 basic kit is a lower cost option for users who want to display AFR on the meter and/or on a PC. To log RPM, or to Output the wideband signal to an external device you'll need the LM-2 Analog IN/OUT Cable optional accessory. For OBD-II features you'll need the LM-2 OBD-II Cable optional accessory. To record internally to your LM-2 you'll need the SD Card optional accessory. This unit also comes in a cardboard box, the black hardcase is an optional accessory LM-2 Carrying Case.

Part Number: IM3894

LM-2 Basic Kit

The LM-2 Basic Kit includes the LM-2 meter, Bosch wide-band oxygen sensor, 8 ft sensor cable, cigarette-lighter power adapter, USB cable for PC connection, weld-in bung and plug, LogWorks software CD, and quick-start guide. This kit only includes accessories to display your Air/Fuel Ratio either on the meter and/or on your PC. To log RPM, or to Output the wideband signal to an external device you'll need the LM-2 Analogue IN/OUT Cable optional accessory. For OBD-II features you'll need the LM-2 OBD-II Cable optional accessory. To record internally to your LM-2 you'll need the SD Card optional accessory. This unit also comes in a cardboard box, the black hard case is an optional accessory.

LM-2 Basic Kit (Air/Fuel Only) IM3837

ECF-1: (FUEL) Ethanol

Content & Air/Fuel Ratio Gauge (Four-in-one, ethanol content %, fuel temp., fuel press., and wideband O2)

ECF-1: (FUEL) Ethanol Advanced Gauge Complete Kit, includes Ethanol Sensor, Fuel Pressure Sensor, Fuel Line Fitting (3/8" M to 3/8" F w/1/8" NPT Side Port, O2 Sensor, & Bung

Part Number: IM3903

MTX-D: Ethanol Content % & Fuel Temp.

DISPLAY RANGE
 Ethanol Content %: 0-100%
 Temp: -40-257 °F (-40-125°C)

KEY FEATURES
 Ethanol Content
 Error reporting for ethanol content sensor (Digital Display)
 Fuel Temp
 Change exterior LED as a fill bar or light a single indicating LED
 Programmable exterior LED ranges vs. color
 Programmable unit of measure as °F or °C
 Programmable fuel temperature warning (outer LED)
 2-Configurable analog outputs
 Ethanol Content: 0v = 0%, 5v = 100%
 Fuel Temp: 0v = -40 °F, 5v = 257 °F (-40-125°C)

MTX-D: Ethanol Content Percentage & Fuel Temp Gauge Kit, includes: Gauge (Black Faceplate, Black Bezel), Silver Bezel & White Faceplate, Harness, Program Cable (Serial), Ethanol Content Sensor, Quick Start Installation Guide. **Part Number: IM3904**

ECB-1: (BOOST) Ethanol Content & Air/Fuel Ratio Gauge

(Four-in-one, ethanol content %, fuel temp., vacuum/boost press., and wideband O2)

ECB-1: (BOOST) Ethanol Advanced Gauge Complete Kit, includes Ethanol Sensor, 4 BAR MAP Sensor, O2 Sensor, & Bung

Part Number IM3906

DB AIR/FUEL RATIO GAUGE ONLY

This gauge can be purchased as an accessory to be used with the LC-1, LC-2, LM-1 or LM-2. These kits include the DB Gauge, mounting hardware, and quick-start guide.

Description
 Blue LED Gauge **Part No. IM3793**
 Red LED Gauge **IM3794**

MTX-L PLUS DIGITAL AIR/FUEL RATIO GAUGE KIT

The New MTX-L PLUS wideband gauge features our patented DirectDigital™ technology and all-new Advanced Sensor Control which receives feedback from the sensor more frequently and optimizes heater control. The combination of these technologies makes the MTX-L Plus our fastest, most durable and accurate air/fuel ratio gauge ever!

- FASTER Sensor Frequency for faster O2 sensor feedback
- FASTER Analog Output Speed helps ensure that your ECU sees changes in air/fuel ratio as they happen
- ENHANCED Heater Control for superior sensor performance in forced induction and other high performance applications
- Large digital readout and programmable "Digital Needle" provides the functionality of a needle gauge with the pinpoint accuracy of a digital display
- Digital display in AFR or Lambda 52mm (2 1/16") diameter gauge body with included interchangeable faceplates and bezels Bosch™ LSU 4.9 wideband O2 sensor Patented 100% digital wideband air/fuel ratio technology!
- Ability to calibrate O2 sensor for maximum accuracy
- Wideband O2 compatible with several fuel types
- Innovate MTS serial in/out (for use with MTS enabled devices to add additional logging channels)
- Datalog using powerful LogWorks software on your PC

Part No: IM3924

MTX-OL PLUS WIDEBAND

AIR/FUEL OLED GAUGE KIT

The new MTX-OL Plus from Innovate Motorsports is the most accurate, responsive and reliable wideband AFR gauge ever built. The all-new advanced sensor control drastically increases sensor feedback frequency and optimizes heater control to set a new standard for performance in every application. The MTX-OL Plus features a vivid, high-contrast OLED display that's easy to read and looks incredible. Innovate's patented DirectDigital™ technology combined with a Bosch™ LSU 4.9 wideband sensor provide category defining speed and accuracy. Interchangeable dials and bezels allows for simple cosmetic customization. An integrated serial in/out port allows for seamless integration with Innovate MTS devices and easy data logging of critical AFR readings using the powerful free LogWorks software package.

- User configurable OLED display (AFR or Lambda)
- 52mm (2-1/16") diameter gauge body
- Interchangeable faceplates and bezels: black and silver bezel, black and white faceplates included
- Bosch™ LSU 4.9 wideband O2 sensor
- Patented 100% digital wideband air/fuel ratio technology
- Ability to calibrate O2 sensor for maximum accuracy
- Wideband O2 compatible with several fuel types
- Configurable linear 0-5v analog output for wideband O2 for use with piggy back or stand-alone ECU's as well as external data loggers
- Innovate MTS serial in/out (for use with MTS enabled devices to add additional logging channels)
- Datalog using powerful LogWorks software on your PC

LC-2 DIGITAL WIDEBAND LAMBDA O2 CONTROLLER KIT W/O SENSOR

The evolution of the world's most popular stand alone digital O2 sensor controller, the Inno-vate Motorsports LC-2 builds upon the legacy of the LC-1 by adding simplicity and leading edge technology. The LC-2 utilizes 100% digital wideband air/fuel ratio technology. The LC-2's patented award-winning DirectDigital signal processing technology provides data on exactly how rich or lean an engine is running at any load. The LC-2's self-calibrating circuitry also compensates for changes in temperature, altitude, and sensor condition. The LC-2 includes a digital in-put/output, 2 full-programmable analog outputs, and is ideal for applications such as dynamometers, data acquisition systems, standalone ECUs, and gauges.

- LC-2: Complete Lambda Cable Kit Includes: LC-2 Controller, 8 Ft. Sensor Cable, Program Cable & Manual *NO O2 SENSOR OR BUNG INCLUDED*

Part No: **IM3881**

LC-2: DIGITAL WIDEBAND LAMBDA O2 CONTROLLER KIT WITH SENSOR

LC-2: Complete Lambda Cable Kit (3 ft.). Includes: LC-2 Controller, Bosch Wideband O2 Sensor, 3 Ft. Sensor Cable (Overall length 5 ft.), 1" Mild-Steel Exhaust Bung, *Program Cable, & Manual.

Part No: **IM3884**

DB Air/Fuel Ratio Gauge Kit

The G2 Air/Fuel Ratio Gauge Kit features a 2-1/16" face and digital LED display available in blue or red. Supplied with the LC-1 cable and wide band sensor, it is a complete air/fuel ratio display system.

- Extremely Accurate Wide-Band Technology
- Includes LC-1 & Sensor

G2 Air/Fuel Ratio Gauge Kit (Blue LED) **IM3795**

Bosch LSU 4.9 wideband O2 sensor
Ability to calibrate O2 sensor for maximum accuracy

Part Number: **IM3855**

SCG-1 BOOST CONTROL WITH WIDEBAND SENSOR

The Innovate Motorsports SCG-1 is a revolutionary approach to boost control that integrates an advanced standalone boost controller with Innovate's industry leading DirectDigital™ wideband air fuel ratio technology. When we decided to build a boost controller, we knew we had to offer more capabilities than other products available today, while still maintaining the user friendly functionality demanded by our customers. Instead of repackaging the same boost control technology that has been used for decades, we choose to pair our advanced O2 sensor control technology with our all-new, proprietary solenoid control that provides superior boost control accuracy, response and safety. We also added a user programmable shift light and housed the entire package in a compact gauge body for ease of installation and use

Description
SCG-1: Solenoid Boost Controller w/Wideband Gauge Kit

Part No
IM3882

DLG-1: DUAL LAMBDA (AFR) GAUGE KIT

Gauge Kit - includes the DLG-1 gauge, (2) Wideband oxygen O2 sensors, (2) 8 ft sensor cables, LC-2 Wideband Controller, (2) O2 sensor weld-on bungs, Black/Silver bezel, Black/White faceplate, Serial program cable, & Installation manual.

IM3891

MTX-L PLUS: DIGITAL AIR/FUEL RATIO GAUGE

The New MTX-L PLUS wideband gauge features our patented Direct Digital technology and all-new Advanced Sensor Control which receives feedback from the sensor more frequently and optimizes heater control. The combination of these technologies makes the MTX-L Plus our fastest, most durable and accurate air/fuel ratio gauge ever!

- FASTER Sensor Frequency for faster O2 sensor feedback
- FASTER Analog Output Speed helps ensure that your ECU sees changes in air/fuel ratio as they happen

MTX-L PLUS: Digital Air/Fuel Ratio Gauge Kit (8 Ft. Cable) **IM3918**

MTX DIGITAL SERIES VACUUM/BOOST & SHIFT LIGHT GAUGE KIT

MTX Digital Series "Dual Function" Vacuum/Boost & Shift Light (RPM). One gauge with TWO functions! That's the perfect solution to help maximize limited space on your dash! The 2 1/16" (52mm) gauge features a water resistant casing, interchangeable faceplates and bezels, locking connectors for simplified installation, and MTS serial connections used to connect with other Innovate devices for logging.

KEY FEATURES
• Display as either inHG/PSI or BAR (seven-segment)
• Over Boost Warning (seven-segment)
• Progressive Shift Light or Single Stage Shift Light (outer LEDs)

KIT INCLUDES:
• Gauge (Black Faceplate, Black Bezel) • 4-Bar MAP Sensor • Silver Bezel & White Faceplate • Program Cable (Serial)
• MAP Accessory Kit, T Fitting, Vacuum Hose, and Zip Ties
• RPM Harness (6 inch)
• Quick Start Installation Guide (Full manual on CD)
• Software CD (LogWorks & LM Programmer)

Part No: **IM3851**

MTX-A: 20 PSI VAC/BOOST GAUGE

KIT INCLUDES: Gauge (Black Faceplate, Not Interchangeable), Black Bezel, Silver Bezel, Program Cable (Serial), 4-Bar MAP Sensor, MAP Accessory Kit: T Fitting, Vacuum Hose, and Zip Ties, Quick Start Installation Guide

Part No: **IM3857**

MTX DIGITAL SERIES WATER TEMPERATURE & BATTERY VOLTAGE GAUGE KIT

This "Dual Function" gauge is the perfect way to monitor critical engine parameters on one display. The 2 1/16" (52mm) gauge features a water resistant casing, interchangeable faceplates and bezels, locking connectors for simplified installation, and MTS serial connections used to connect with other Innovate devices for logging.

KEY FEATURES

- Water Temperature • Display in either degF or degC • Water Temp Warning (seven-segment) • Battery Voltage • Program exterior LED ranges vs Color • Program Voltage Warning (outer LEDs)

KIT INCLUDES:

• Gauge (Black Faceplate, Black Bezel) • Silver Bezel & White Faceplate • Program Cable (Serial) • Thermistor • Quick Start Installation Guide (Full manual on CD) • Software CD (LogWorks & LM Programmer)
Part No: **IM3853**

PSB-1: POWERSAFE BOOST & AIR/FUEL RATIO GAUGE KIT

Gauge Kit - includes the PSB-1 gauge, Wideband oxygen O2 sensor, 8 ft sensor cable, 4-Bar MAP Sensor, Relay, O2 sensor weld-on bung, Black/Silver bezel, Black/White faceplate, Serial program cable, & Installation manual.

IM3892

MTX DIGITAL SERIES EXHAUST GAS TEMPERATURE (EGT) GAUGE

This 2 1/16" (52mm) gauge features a water resistant casing, interchangeable faceplates and bezels, locking connectors for simplified installation, and MTS serial connections used to connect with other Innovate devices for logging.

KEY FEATURES

- Change from EGT to CHT range. CHT range allows greater resolution
- Display in either °F or °C
- Change exterior LED as a fill bar or light a single indicating LED
- Program exterior LED ranges vs Color
- Program EGT Warning.

KIT INCLUDES:

• Gauge (Black Faceplate, Black Bezel)
• Silver Bezel & White Faceplate
• Program Cable (Serial)
• EGT K-Type Probe (Stainless Steel)
• EGT Mounting Hardware with Bung (Optional Clamp-on Style Available P/N: 3869, no included)
• Quick Start Installation Guide (Full manual on CD)
• Software CD (LogWorks & LM Programmer)

Description
MTX Digital Series Exhaust Gas Temperature (EGT) Gauge
Part No **IM3854**

MTX DIGITAL SERIES OIL PRESSURE & TEMPERATURE GAUGE KIT

MTX Digital Series "Dual Function" Oil Pressure & Temperature. One gauge, TWO functions! In addition, the 2 1/16" (52mm) gauge features a water resistant casing, interchangeable faceplates and bezels, locking connectors for simplified installation, and MTS serial connections used to connect with other Innovate devices.

Pressure Key Features

- Display in either PSI or BAR (seven-segment)
 - Program Low Oil Pressure Warning (seven-segment)
- Temperature Features
- Change exterior LED as a fill bar or light a single indicating LED
 - Program exterior LED ranges vs. Colour
 - Program unit of measure as °F or °C
 - Program Oil Temperature Warning (outer LEDs)

Kit Includes:

• Gauge (Black Faceplate, Black Bezel)
• Silver Bezel & White Faceplate
• Program Cable (Serial)
• Thermistor
• Electronic Pressure Sensor 0-145 PSI (10 Bar)
• Cable for Pressure Sensor
• Quick Start Installation Guide
MTX Digital Series Oil Pressure & Temperature Gauge Kit **IM3913**

MTX-A: EXHAUST GAS TEMP (EGT) GAUGE

KIT INCLUDES: Gauge (Black Faceplate, Not Interchangeable), Black Bezel, Silver Bezel, Program Cable (Serial), EGT K-Type Probe (Stainless Steel), EGT Mounting Hardware with Bung (Optional Clamp-on Style Available P/N: 3869, not included), Quick Start Installation Guide

Part No: **IM3865**

MTX-D: DIGITAL SERIES

FUEL PRESSURE GAUGE

KEY FEATURES:

- Range 0-145 PSI (10 Bar)
- Industrial grade electronic pressure sensor
- Display in either PSI or BAR (seven-segment)
- Program Low Oil Pressure Warning

KIT INCLUDES:

- Gauge (Black Faceplate, Black Bezel) • Silver Bezel & White Faceplate
- Program Cable (Serial) • Electronic Pressure Sensor 0-145 PSI (10 Bar)
- Cable for Pressure Sensor
- Quick Start Installation Guide

MTX-D: Digital Series Fuel Pressure Gauge Kit IM3917

Standalone Wideband Controller Cable

The LC-1 is a complete wideband controller build in to a sealed cable. It features the same award-winning patented digital measurement principal found in the LM-1, and includes digital input, output, and 2 programmable analog outputs. The LC-1 can interface directly with most dynos, ECU's and data recorders on the market. The LC-1 can also log directly into LogWorks via the Innovate MTS data bus. This enables laptop or PC-based logging directly from one or more LC-1 controllers. Since the LC-1 can be channeled, users can now affordably tune individual cylinders for precision power balancing.

LC-1 Wideband Controller Cable (with Bosch O2 sensor) IM3877

Inductive Pickup

Inductive Clamp Accessory for LM-2, DL-32, LMA-3, and RPM Converter. Simply clamp on to one spark plug wire to log RPM. Cable is 6 feet in length. LM-2 kit includes inductive pickup and adapter needed for connection to LM-2.

Inductive Pickup with LM-2 Adapter IM3834

MTX-A: 30 PSI Vacuum / Boost Gauge

DISPLAY RANGE

Oil / Water Temperature
Pressure Range
-29 inHG to 30 PSI
Part Number: IM3908

MTX-A: Water / Oil (Fluid) Temperature Gauge

DISPLAY RANGE

Oil / Water Temperature
120-280 °F
Part Number: IM3861

Innovate PSN-1 Nitrous Bottle Pressure & Air Fuel Ratio

The PSN-1 is a nitrous bottle pressure gauge and wideband air fuel ratio gauge with a built in RPM window switch. It features Powersafe technology which monitors nitrous bottle pressure, engine RPM and air fuel ratio and can disable the nitrous solenoid when these parameters are not within range.

Part Number: IM3899

TC-4 PLUS

The TC-4 PLUS includes the TC-4 PLUS, Serial Program Cable, Molex to Molex Patch Cable (to daisy chain with other MTS compatible devices), and manual.

The TC-4 PLUS is 4 channel

type-K thermocouple amplifier device that can be used a stand-alone system or as part of a MTS (Modular Tuning System). The TC-4 PLUS includes a digital input/output, 4 full-programmable analogue outputs, and is ideal for applications such as dynamometers, data acquisition systems, or standalone ECUs.

- K-Type thermocouple amplifier that adds 4 temperature inputs to an MTS Log Chain
- Temperature range 32-1999 deg F, 0- 1093 deg C
- 4-Configurable linear 0-5V analog outputs (one per input)
- The TC-4 PLUS can be used to measure other temperature metrics such as intercooler inlet, outlet temperature and catalytic converter

TC-4 PLUS (4-Channel Thermocouple Amplifier) IM3915

SSI-4 PLUS

The SSI-4 PLUS includes the SSI-4 PLUS, Serial Program Cable, Molex to Molex Patch Cable (to daisy chain with other MTS compatible devices), and manual. P/N 3914. The SSI-4 PLUS will allow the capture of data from 4 external sensors. These sensors can be frequencies such as engine RPM and speed sensors or 0-5V references like MAP sensors and pressure transducers. The SSI-4 PLUS may be used as a stand-alone system or integrated with other Innovate Motorsports MTS products to create a log chain.

- Simple sensor device that adds 4-inputs to an MTS Log Chain
- Channel 1 and 2 inputs can be configured for RPM, Speed (VSS), Frequency, and 0-5 volt. In addition to the above, the channel 2 input can be used for duty cycle or dwell.
- Channel 3 and 4 inputs can be used for 0-5 volt
- 5 volt output to power external sensors

SSI-4 PLUS (4 Channel Simple Sensor Interface) IM3914

FOR WELD-IN O2 SENSOR BUNGS SEE FABRICATION SECTION

Exhaust Clamp

Patent-pending, Venturi-effect, tapped exhaust clamp for obtaining accurate lambda measurements in non-cat autos or other engines.

IM3728

Power Cable, Cigarette lighter

10-ft. long, for direct connection on LM-1 or LM-2 to cigarette lighter or accessory plug.

LM-1 Power Cable IM3740
LM-2 Power Cable IM3808

REMOTE PUSH BUTTON

Accessory cable used to trigger the start and stop of a record session remotely on a PL-1.

IM3901

MTS Carrying Case

The MTS (Modular Tuning System) carrying case is a durable plastic case, designed to hold the LM-1 and all accessories included in any configuration of the MTS kits.

IM3754

LM2 CARRY CASE

- Foam insert fits LM-2 for better protection
- Innovate Motorsports Logo printed on Case
- Room to store all cables needed for the kit

IM3836

MTX-D GAUGES TEMPERATURE SENDER

Replacement temperature sender (thermistor) with 2 prong connector for MTX-D: Oil Pressure & Temperature and MTX-D: Water Temperature & Battery Voltage.

IM15-0049

USB TO SERIAL ADAPTER

Adapter for computers without Serial ports. This cable will convert Serial to USB. Hardware drivers included.

IM3733

18-ft. Sensor Cable

To Minimize the effects of noise coupling with the extended-length sensor cable, Innovate recommends minimizing the length of the power-supply cable. 2' is ideal. Noise coupling may be present if the bar graph is flickering. Excessive coupling will result in sensor errors.

LM-2 Extended Sensor Cable IM3828

LM-2 Sensor Cable IM3810

Replacement 8ft Sensor Cable. Included in LM-2 kits

LM-2 OBD-II Cable IM3809

OBD-II / CAN Interface Accessory Cable for LM-2.

LM-2 Serial Patch Cable IM3812

LM-2 Serial Patch Cable makes the LM-2 MTS Compatible (LC-1, LMA-3, DL-32, SSI-4, TC-4). Four pin Molex to serial 2.5. Not included with LM-2 kit.

Heat-Sink Bung Extender (HBX-1) IM3729

The Bosch LSU4.2 wide-band O2 sensor (shipped as part of the LM-1 kit) is rated to operate at an exhaust gas temperature of 1300 degrees (F), and a sensor housing temperature of 900 degrees (measured at the bung) for maximum accuracy and control. When either of these operating temperature ranges is exceeded, the sensor can no longer be accurately controlled. Further, operating at or over these temperatures for any length of time can significantly reduce the lifetime of the sensor. The LM-1 is designed to display an error message under these conditions (currently 08- Sensor Timing Error) rather than provide inaccurate readings. For some turbo vehicles, rotary engines, and other setups, this error message can be encountered with annoying frequency.

Bosch Oxygen Sensor

IM3737

Bosch LSU4.2 5-wire, wide-band O2 sensor

IM3888

Bosch LSU 4.9 5-wire, wide-band O2 sensor.

SENSOR CABLE FOR BOSCH LSU 4.9 O2 SENSOR

Sensor cable for use with Bosch LSU 4.9 O2 Sensor, Compatible with the LM-2, LC-2, and MTX-L, SCG-1, DLG-1, PSB-1, and PSN-1. NOTE: The latest generation widebands are compatible with both the Bosch LSU 4.2 and 4.9. Please note that the sensor connector is different for each sensor. Reference the Sensor/ Sensor cable identifier image below.

3 Foot Sensor Cable **IM3890**
8 Foot Sensor Cable **IM3887**
18 Foot Sensor Cable **IM3889**

LM-2 ANALOG I/O CABLE

Adapter Input and Output Accessory Cable for LM-2 (Needed for RPM Input).

IM3811

MTX SERIES GAUGES PROGRAM CABLE

The Serial Program Cable will allow you to connect the MTX series gauges, LM-2, LC-2 SCG-1, PSB-1, and PSN-1 to your PC.

IM3840

MTX SERIES GAUGES PATCH CABLE

4ft serial patch cable (4pin to 4pin) for LM-2, LC-2, and MTX series gauges

IM3846

Clamp-On Tailpipe Sensor Mount Kit

Made of stainless steel and convenient for quick oxygen sensor tests, this easy-to-use FAST kit slides into the tail pipe to eliminate welding. The actual O2 sensor screws into the kit, which includes a rubber cover to prevent damage to polished exhaust tips.

Clamp-On Tailpipe Wide-Band Sensor Mount Kit FAST170620

POCKET LOGGER PL-1

The PL-1 is the latest in Innovate Motorsports' line-up of products to allow for easy data logging of your MTS (Modular Tuning System) compatible product. Whether you have an LC-2 & SSI-4, MTX gauges, or any other combination of Innovate Motorsports MTS devices, the PL-1 integrates seamlessly to record all the data from the connected devices.

kit includes:

- PL-1, Pocket Logger • 2GB SD Memory Card • SD Memory Card Reader, USB to PC • Power Cable, 12v • LogWorks 3.0 Software, available for download (CD not included) • MTS Patch Cable, Locking 4-pin to 4-pin, for newer devices like the MTX gauges or LC-2.
- MTS Patch Cable, 2.5mm to 4-pin, needed for LC-1, SSI-4, TC-4, & LMA-3

Part No: IM3875

AVAILABLE THROUGH ROCKET
CALL FOR MORE INFORMATION

V300SD Data Recorder

The affordable V300SD series data recorder is our newest data recorder. In base configuration, the V300 monitors six parameters, but it can be expanded to monitor up to 67 channels of data to meet the needs of most users. The V300SD can sample data as quickly as 1000 times per second.

Uploading recorded data to your computer is done via a SD memory card, which provides you with hours of recording time and the ability to store many runs prior to uploading the data. The V300SD also has multiple methods of displaying monitored data in real time. When linked by serial cable to your PC you can view all recorded functions in either graph format or on 8 virtual gauges while the vehicle is running. Any monitored function can also be displayed in real time on Racepak's optional Intelli-Gauges, Ultra Dash or IQ3 display dash.

- Engine & Driveline RPM
- Engine/Driveline RPM differential
- Battery voltage
- Acceleration G-force
- Lateral G-force

V300SD with Datalink Lite

R200-KT-V300SDL

V300SD with Datalink Standard

R200-KT-V300SDS

SPORTSMAN Data Recorder

The Sportsman Data logger is an economical solution that utilizes the same hardware and software as our professional series data recorders. The base kit includes a driveshaft sensor and collar so you can start maximizing your runs sooner.

Features:

- 21 total channels
- 8 EGT Sensor outputs available (EGT's not included)
- 7 internal and external
- 6 V-Net

Specifications:

- V-Net: up to 100 per second

Monitors:

- Engine RPM • Driveline RPM
- Battery voltage • Acceleration G-Force
- Lateral G-Force • 12 Volt event

Part No: R610-KT-SPRTMN

Split Collar and Magnet Assemblies

8-magnet collars. Perfect for automatic-equipped vehicles, to assist in picking up driveshaft RPM sooner than a conventional 2-magnet collar.

Description

8 Magnet Collar Suit 2.125" Shaft

Part No

R800-CL-8M-2125

8 Magnet Collar Suit 2.187" Shaft

R800-CL-8M-2187

INTERFACE EXTENSION CABLE

Cable to extend Analog and Interface Module connections on V300/V300SD, V500/V500SD and G2X Pro data loggers.

Description

Interface Extension Cable 24", 7-Pin

Interface Extension Cable 36", 7-Pin

Interface Extension Cable 60", 7-Pin

IQ3 Logger Dash

The IQ3 dash represents an entirely new concept in data logging dashes. By placing the 32 channel data logger, 512 MB memory card, GPS board and 3 axis G meter inside the dash, every feature of the data system is now located in one central location. And, when that 32 channel data logger is one of Racepak's exclusive smart sensor type, that means that only one small cable will transmit the data from all the sensors to the rear of the dash.

- 32 Channels • Internally Mounted GPS • Internal 3 Axis G Meter
- 512MB microSD Memory Card • Programmable Shift Lights
- Programmable Warning Lights With On Screen Warning
- 24 Programmable Sensor Inputs On 4 Pages
- Programmable 5 Character Channel Name • Gear Indicator
- Predictive Lap Time • Prop Slip and Prop Speed for Boats
- Speed, Lap Time, Lap No. From GPS
- Metric / Imperial Configurable

IQ3 Logger Dash

R250-DS-IQ3LD

IQ3 Display Dash

The IQ3 Display Dash is designed for use with any of Racepak's current series of Vnet data loggers. This includes the G2X (red housing version), G2X Pro, V300SD and V500 data loggers. This model does not include the internal data logger, GPS, 3 axis G meter or 512MB memory card. Rather, this data is supplied by the external data logger (depending on the Vnet data logger utilized) but still provides all the display and programming features of the data logger dash.

- Programmable Shift Lights • Metric / Imperial Configurable
- Programmable Warning Lights With On Screen Warning
- 24 Programmable Sensor Inputs On 4 Pages
- Programmable 5 Character Channel Name • Gear Indicator

IQ3 DRAG DASH

The IQ3D is designed for the sportsman drag racer looking for a compact, all-in-one solution. It combines the look and feel of our popular IQ3 dash with a robust, built-in data logger. Information is displayed on four user-definable pages and recorded data is stored on a microSD memory card located on the face of the dash for easy access. The IQ3D has built-in support for over 20 of the most popular EFI systems.

- Wiring harness (includes 2 programming buttons)
- Driveshaft Sensor (Please note: Drive Shaft collar sold separately)
- Oil Pressure Sensor
- Water Temperature Sensor
- USB programming cable
- Racepak Datalink II software
- MicroSD card & reader

R250-DS-IQ3D

GPS MODULE

Add GPS speed to any non-gps equipped Racepak V-Net data recorder through the use of Racepak's GPS V-Net module. Utilizing a standard V-Net tee connector, the module is installed and "read" into the DatalinkII software, providing a speed data channel for analytical, display and odometer information. Samples at 10hz.

R220-VM-GPS

IQ3S STREET DASH

The IQ3s is a complete dash cluster replacement, providing all standard road functions in a compact, simple to use unit. Standard data, such as speed, odometer, turn signals, hi/low beam and parking brake indicators are displayed, along with programmable shift and warning lights. It is an ideal complete instrumentation package for vehicles with modern engine swaps or aftermarket EFI systems.

• IQ3s Dash

- Wiring harness (includes 2 programming buttons)
- 1 - Oil Pressure Sensor
- 2 - Fluid Temperature Sensors (Coolant & Transmission)
- USB programming cable
- Racepak Datalink II software

R250-DS-IQ3S

IQ3SL STREET LOGGER DASH

The IQ3SL Street Logger Dash adds data logging to the popular IQ3S Street Display Dash. It's an ideal solution for any vehicle that needs full road instrumentation and the ability to record data, putting both into one easy to use unit. Standard data, such as speed, odometer, turn signals, hi/low beam and parking brake indicators are displayed, along with programmable shift and warning lights. Plus, it features internal processing to read data from OBDII and most aftermarket ECU and EFI systems, making it ideal for modern cars, or vehicles with modern EFI engine swaps. In addition to data provided from OBDII, ECU or EFI (if connected), the IQ3SL records engine RPM, speed, gear, coolant and oil temp, oil pressure, and up to six additional V-Net channels. The display features four user-definable pages of information, and data is collected on a front-mounted MicroSD card for convenience.

• IQ3s Dash

- Wiring harness (includes 2 programming buttons)
- 1 - Oil Pressure Sensor
- 2 - Fluid Temperature Sensors (Coolant & Transmission)
- USB programming cable
- Micro SD Card
- USB SD Card adapter
- Racepak Datalink II software

R250-DS-IQ3SL

V-NET BLUETOOTH MODULE

This module allows your system to communicate with Racepak's Virtual Dash App, which allows you to turn your wireless device into a virtual IQ3 dash.

R230-VM-DASHAPP

DIGITAL DASHES

INVISION LCD DASH

The InVision Digital Dash is a one model, universal solution for your entire dash. Monitor the speedometer, tachometer, fuel level, oil pressure, water temperature, and volts all in one place. Upgrade your worn, outdated or inaccurate dash with the latest, modern LCD offering from AutoMeter.

- 12.3" LCD display with three user selectable screens
- Features high beam & turn signal indicators as well as user selectable warning light
- All kits include a wiring harness and sending units for water temperature and oil pressure as well as a joystick for dash customization
- Adjustable RPM range and displays in imperial or metric measurements

- Helps protect your vehicle with visual or audible alarms - low fuel level/oil pressure/voltage and high-water temperature
- Speedometer easily calibrates to OEM or aftermarket vehicle speed sensors and the tachometer is capable of calibrating to many engine types
- Speed sensor not included

AU7000

Dakota Digital

HOLLEY 7" STAND ALONE DIGITAL DASH KIT

Have you been looking for a dash solution for your vehicle, but just cannot find anything you like or that is cost effective? No need to look any further as Holley has created a full colour touch screen dash that includes sensors for monitoring basic engine parameters as well as a GPS speedometer all in a cost effective package! Holley's stand-alone digital dash has great features such as; a weather resistant aluminium housing for durability, multiple gauge and indicator type selections, customizable screen and gauge layouts and a virtual switch panel just to name a few. With the integrated 3 axis accelerometer and data-logging, the dash is ideal for anything from a JR dragster to Sportsman racing. It is also equally at home in a daily driver, or a show winning roadster.

- Features:
- Compact, customizable dash for use in a variety of applications
 - 7" low glare, high brightness, high contrast, full colour touch screen for easy viewing even in full sun
 - 800x480 resolution with auto brightness and dimming
 - Operating voltage min 8V - 20V
 - Includes USB GPS for Speedometer display with a magnetic base for a quick and clean install
 - Weather resistant aluminium housing with flexible mounting options
 - Completely customizable layouts, with multiple default configurations to get you running in no time!
 - Multiple gauge & indicator types with limitless customization options
 - Quickly toggle between multiple active screens (tune, warm-up, race, drive, etc.)
 - Virtual Switch Panel (replaces the need for physical switches)
 - Retains the same gauge customization flexibility as the EFI dash, but now allows use with any vehicle
 - Powerful data log software provides in-depth analysis (10 samples/sec) of all inputs and outputs, including the integrated 3 axis accelerometer and USB GPS-no need for separate data logging boxes
 - Built in Data logging playback allows you to view your last run on the fly
 - A variety of additional sensors are available for use with the dash, including fuel pressure, nitrous pressure, boost, with more to come!
 - Pair with a Holley EFI LED Light Bar (PN 553-107) for a truly customizable solution!
 - User definable warnings for any input
 - Configurable progressive shift lights and light bar
 - Expandable internal storage on micro SD card
 - Free Software and Firmware upgrades, providing a future proof display solution
 - Included parts: Standalone digital dash kit with I/O adapter, USB memory stick, terminated vehicle harness, oil pressure sensor, CTS sensor, MAT sensor, USB GPS
- Part No: H0553-109

PRO-COMP

Pro-Comp Pro Dash Display

Get up-to-the-second data with Pro-Comp Pro dash display systems from Auto Meter. Their driver information centers are packed with high performance movements and are designed for a seamless in-dash look. Both Pro-Comp street dash and race dash models are built with full-sweep stepper meter movement for precision accuracy. Auto Meter Pro dash systems have integrated programmable warning lights and an LCD message display for temperatures, pressure, battery voltage, and fuel levels. Pro-Comp race displays have no provision for fuel level or odometer readings, but their playback recording mode provides up to two hours--or 15 runs--of continual dash sensor input data that you can save for review and analysis.

All Pro dash systems are water, dust, dirt, shock, and vibration-proof, with LCD backlit displays for excellent visibility in bright sunlight or complete darkness. For ease of installation, a robust professional wiring harness is included. Auto Meter Pro-Comp Pro dash display systems are great for the street and perfect for the strip. They offer superior build, programmable integrated alarms, a signature analog tachometer, and high-visibility digital readouts.

HDX SERIES GAUGE KITS

Available with your choice of black or silver alloy gauge-face styling, each HDX system allows the user to select independent illumination colours for the gauge readings and needles, as well as the message centres. Calibration and personal settings are manipulated with the built-in, capacitive-touch buttons, or the available Bluetooth app for Apple and Android devices. Each needle hub is black nickel plated spun-aluminium to match the buttons. All HDX instrument systems feature dead-faced indicators (turn signals, high beam, check engine, cruise control, parking brake, plus two user-definable), and a red, settable warning light for each gauge. With our central control box, installation is greatly simplified with vehicle-harness sourced signals and supplied, solid state sending units connecting cleanly to their respective terminal. Click the tabs below for a more in-depth look at the HDX series!

Chevy Car**

VHX Instruments
The new VHX Systems fit directly into the stock instrument bezel of a 1955-56 Chevy Car without modification, adding a wealth of features to this iconic vehicle. Fully lit needles, backlight faces, and highly visible LCD message centers are a few of the things that you can see which set the VHX Series apart from yesterday's traditional approach to instrumentation. A few of the

features which you don't normally see are the micro-controlled precision stepper motors, solid state sensors for unparalleled accuracy, and user-customizable display feedback, all supported by an unrivaled limited lifetime warranty which has become the standard for Dakota Digital instrumentation systems. Completely engineered and manufactured at our facility in Sioux Falls, South Dakota, the VHX Series has completely revolutionized the instrumentation industry!

Universal Dual Round VHX Instrument

A new look on a traditional layout, the dual round gauge format has been a design staple for generations. Allowing flexibility into nearly any type of vehicle, these 5.4" dual round packages complement several vehicle themes. Gauge housings machined from 6061 aluminum, finished in flawless chrome plating. Cutout diameter of 5". Depth of 1.85". Fully lit needles, backlight faces, and highly visible LCD message centers are a few of the things that you can see which set the VHX Series apart from yesterday's traditional approach to instrumentation. A few of the features which you don't normally see are the micro-controlled precision stepper motors, solid state sensors for unparalleled accuracy, and user-customizable display feedback, all supported by an unrivaled limited lifetime warranty which has become the standard for Dakota Digital instrumentation systems. GPS SPEED SENSOR

The GPS-50-2 was completely Designed and Built in the USA, specifically made for the custom automotive market and the unique challenges which exist. Highly advanced electronic and software design allow the GPS-50-2 to work unlike anything else, with accelerometers and predictive software to compensate for times when GPS inherently struggles: overpasses, mountains, tunnels, heavy tree cover, large buildings, passing large vehicles, etc. Unique electronic architecture provides for negligible current usage when off, yet lightning-fast start-up and signal acquisition. Updating the speed information 10 times per second provides tremendous accuracy, while the integrated omni-directional antenna provides for a wide range of installation flexibility. Want to use the GPS-50-2 to activate a cruise control system? No problem! A cruise control system requires a great deal of resolution and accuracy, so adding the 600041 external antenna will allow you to optimize the antenna mounting, while placing the GPS-50-2 receiver anywhere you like!

OBD II SPEEDOMETER/TACHOMETER INTERFACE

The Dakota Digital STA-1000: Simple, Late-Model Drivetrain integration has never been simpler! The STA-1000 plugs directly into the OBDII diagnostic connector, providing a user-adjustable traditional Speedometer, Tachometer and Check-Engine output for your choice of aftermarket instruments.

Features: • Fully compatible with common aftermarket electronic speedometers
• User selectable output of: 4k, 8k, 16k PPM signals, Sine or Square wave options • +/-35% speed signal correction, compensating for tire size or gearing changes • Adjustable 4, 6 or 8 cylinder tachometer signal output • Check Engine light output provides a grounded (-) output to activate a check engine light of your choice • Automatically calibrated output for an aftermarket cruise control can be activated by making connection to the higher-resolution fixed VSS sensor
• Small footprint measures 4-3/4"x 3"x 1" making it easy to hide

Description
OBD II Speedometer/Tachometer Interface

Part No.
DAKSTA-1000

UNIVERSAL SPEEDOMETER AND TACHOMETER INTERFACE

The functionality of three devices in one 4" x 2" x 1" case! The SGI-100BT can adjust/split/recalibrate an electronic speed signal, calibrate a tach signal, and aid in the creation and adjustment of a gas tach signal for diesel swap applications!

• Speed calibration from 25% - 400%
• Multiple speed outputs available for multiple devices.
• Electronic pull-up built in; high or low voltage input.
• Tachometer settings from 1-16 cylinders and 5V or 12V signal type.
• Diesel applications: outputs for 4, 6 or 8 cylinder tachs.
• Can read off flywheel sensor (available separately), timing gear sensor or alternator W-terminal (stator tap).
• Bluetooth technology syncs unit to available mobile app for programming and setup. • Built-in programming buttons and LED display for setup in lieu of app systems.

DAKSGI-100BT

Universal Speedometer Signal Interface

The SGI-5 Universal Signal Interface Unit can handle nearly any of your electronic speedometer signal conversion and calibration issues. The SGI-5 can recalibrate 2,000 pulse per mile (ppm) through 250,000 ppm electronic speedometer pulse rates, either up or down. The SGI-5 is great for adjusting aftermarket and OEM electronic speedometers on vehicles after changing rear end gears, tire sizes, or drivetrain changes affecting the speedometer.

The SGI-5 is used as either a signal multiplier (up to 4X) or signal divider (up to 125X), making this unit extremely flexible for almost any application. While the SGI-5 is intended to correct only the signal feeding the electronic speedometer, in many cases where a speed signal is shared or on a databus, the SGI-5 can instead correct the signal feeding the engine and transmission computers. If your vehicle is equipped with an anti-lock braking system (ABS), it is generally advised to ensure the signal reaching the ABS controller is not altered to eliminate any potential problems affecting control algorithms within the system. Some vehicles also utilize the output shaft speed to calculate transmission slip and lock-up. When a signal feeding the PCM is altered, this may cause the PCM to detect a constant slip. Consulting a service manual may be of assistance in determining the signal routing within the vehicle if the SGI-5 is decided to be used in a situation such as this.

DAKSGI-5 Universal Speedometer Signal Interface

ELECTRONIC TO MECHANICAL ADAPTER SPEEDOMETER DRIVE

The missing link between your cable-driven speedometer and late model electronic transmission! Measuring 5 1/2" x 3 1/2" x 2", the ECD-200BT allows the use of a mechanical-cable speedometer to be used in conjunction with a modern drivetrain which provides only an electronic output.

• 36" cable available for GM thread-on, GM clip-on and Ford clip-on style speedometers.
• Powerful motor is quiet enough to mount the module inside the cabin.
• Waterproofed case can also be mounted under the hood, or even inside a fenderwell.
• Bluetooth-enabled to sync with available mobile app for stone-simple set up.
• Supplied programming switch and LED readout make setup easy.
• For OBD-II equipped vehicles the supplied pigtail will easily plug into the DLC, simplifying the wiring connections.
The ECD-200 uses PID control of the cable speed to provide quick, smooth operation as well as preventing overdriving or damaging the speedometer needle. Consider this the most precise and easiest to use cable-drive unit on the market!

Application
GM/Ford thread-on, 5/8"
GM clip-on
Ford clip-on

AIRDRIVE WIFI

OBD-II MODULE

AutoMeter's new state of the art AirDrive module provides a plug and play solution that wirelessly transmits data through a secure WiFi network from your vehicle to our award winning AirDrive gauges. Program configurable colours, warning points and peak recall functions through AutoMeter's free AirDrive smartphone app. Quick and easy installation is as simple as plugging the control module into the vehicle's OBDII port, mounting and powering gauges, and connecting to the mobile app, eliminating any fear of voiding factory warranties on your new vehicle. The AirDrive system is capable of broadcasting two additional analogue sensor inputs to deliver information not found on your vehicle's data bus. Take plug and play performance to the next level with the AutoMeter AirDrive system.

AU9110 Android & Apple IOS

SIGNAL SPLITTER / ADAPTER, OBD-II

This low profile OBD-II signal splitter / pass through allows for remote location of connections for AutoMeter products like AirDrive, DashLink, DashControl and SmartConnect instrumentation while providing an additional easy to access connection point for other on board devices requiring access to the OBD-II data stream. AU5323

DASHLINK,

OBDII DIGITAL GAUGES, ANDROID & IOS

DASHLINK, OBDII DIGITAL GAUGES, ANDROID & IOS Create a virtual dashboard for your vehicle using the completely redesigned AutoMeter DashLink II app. Easy OBDII plug and play installation makes for the fastest performance gauge installation available. DashLink enables you to take advantage of AutoMeter's years of instrumentation and data acquisition expertise to transform your Apple iOS or Android enabled device into a customizable display and monitoring system. AutoMeter DashLink II puts you in control - Monitor and data log engine and vehicle performance, fuel economy, and instantly read and clear troublesome check engine lights, all with the easy to use plug-n-play functionality of the DashLink II system.

- Display - Feature the gauges you want, where you want them on your favorite iOS or Android device
- Data Log - Record and playback log files showing OBD-II and acceleration data
- Peak Recall - Help keep your eyes on the road or track by using the built-in recall to view the maximum values at your convenience
- Skid Pad - Show lateral and accel/braking G's with min/max indicators
- Rainbow Track Map - Visualize your location, acceleration and braking as you drive laps around the track. Compare different laps to see how acceleration and braking changed from lap to lap
- Inclinometer - Monitor the pitch and roll of your vehicle for off-road use
- Support for OBD-II diagnostics - Read and clear diagnostic trouble codes (DTCs)
- Averages - Determine average fuel consumption, average vehicle speed, average boost pressure, or any other parameter monitored
- Trip Computer - Maintains stats for up to 5 trips
- New Features:
 - Automatic data-logging when certain conditions are met (pedal position >50%, MAP above 60 kPa, etc.)
 - GPS track mapping with line coloration by user selectable PID (instantaneous MPG, HP/Torque, pedal position, etc.)
 - Alarms/alerts with sound when user set conditions are met
 - Link to Facebook to post results
 - User selectable background colors

AU6900 Cobalt

D-PIC

- 2 1/16" gauge size – for mounting in a Pod, Pillar, or custom Dash
- Available in Ultra-Lite or Cobalt gauges
- Choose either forward or lateral G Forces on the LED array
- LED array graph will show magnitude of the G force, while the instantaneous value will be display in the numeric digital display
- Peak memory feature allows you to recall the highest G Forces achieved in both axes (all four directions) during Real-Time operation 0 to 60mph Acceleration Time
- Measure your vehicle's 0-60mph acceleration time with precision
- Capture Peak Acceleration G Forces
- Capture Peak Deceleration G Forces
- Test your vehicle's capabilities and times for quarter mile acceleration, and see both your 1/4 mile speed in MPH and elapsed time in seconds
- Practice and record your reaction time in 1/4 mile acceleration mode
- Calculate peak horsepower to the wheels (whp) of your vehicle in
- Compare your latest peak to a saved best, see the difference between the two, and monitor how performance upgrades affect your vehicle's performance.

COBALT INTER-ACT PACK

Models (AU6132, AU6192, & AU6121)
120°-240° F / 8-18 volts / 0-100 PSI
Includes Mechanical water temp, voltmeter, and mechanical oil pressure gauge.

AU6200

COBALT DIESEL INTER-ACT PACK

Models (AU6104, AU6149, & AU6144)
0-35 PSI / 100° - 250° F / 0° - 1600° F
Includes mechanical boost gauge, short sweep electric trans temp., and pyrometer gauge.

AU6201

COBALT Five Piece Kit Boxes

Five piece kits including a 3-3/8" diameter 160mph speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

AU6900 COBALT 5 GAUGE KIT

NV INTER-ACT PACK

Models (AU7332, AU7392, and AU7321)
120°-240° F / 8-18 volts / 0-100 PSI
Includes mechanical water temp, voltmeter, and mechanical oil pressure gauges.

AU7300

NV DIESEL INTER-ACT PACK

Models (AU7304, AU7349, and AU7344)
0-35 PSI / 100° - 250° F / 0° - 1600° F
Includes mechanical boost gauge, short sweep electric trans temp., and pyrometer gauges.

Turbosmart 30PSI BOOST GAUGE

The Turbosmart boost gauge is the perfect accessory for any of our Gated Boost Control Valves. Featuring precision mechanical operation, a black face with silver bezel, bright backlighting and a 30psi boost range. All hook-up and panel mounting hardware included. Aluminium dash mounting cup also available.

GBCV Boost Gauge 0-30psi 52mm - 2 1/16" TS-0101-2023
GBCV Boost Gauge Mount Cup 52mm - 2 1/16" TS-0101-2024

GT SERIES

GT Series In-Dash 3-3/8" & 5" Speedometers & Tachometers

When you're ready to put the best instrumentation available in your vehicle, don't settle for slow and inaccurate factory equipment. Our In Dash Tachs and Speedos, feature our famous high performance movements and are designed with seamless dashboard mount in mind for the ultimate driver information center.

- AU8088 3-3/8" 160MPH Electric Speedometer
- AU8097 3-3/8" 8,000RPM Electric Tachometer
- AU8089 5" 160MPH Electric Speedometer
- AU8098 5" 8,000RPM Electric Tachometer

2-1/16" Mechanical Gauges

Bronze bourdon tube 270 degree sweep movements and durable nylon gearing have made these rugged and long lasting gauges a proven high performance favorite for over 50 years. These mechanical gauges require no electrical power for operation making them an ideal choice for racing vehicles with no or low powered electrical systems.

- AU8001 Boost/Vac 30In.Hg/20PSI
- AU8003 Boost/Vac 30In.Hg/30PSI
- AU8004 Boost 35PSI
- AU8005 Boost 60PSI

- AU8021 Oil Pressure 0-100PSI
- AU8031 Water Temp. 140-280°F
- Includes 6ft capillary tubing and 1/2" NPT fitting.
- AU8032 Water Temp. 120-240°F
- Includes 6ft capillary tubing and 1/2" NPT fitting.

2-1/16 Full Sweep Electric

- AU8010 Fuel Level Programmable 0/280 ohms
- AU8044 Pyrometer Kit 0-1600 °F
- AU8053 Oil Pressure 0-100PSI
- AU8055 Water Temperature 100-260°F
- AU8063 Fuel Pressure 0-100PSI
- AU8070 Wideband Air/Fuel Ratio ANALOG
- AU8079 Wideband Air/Fuel Ratio DIGITAL
- AU8091 Voltmeter 8-18 Volts

2-1/16" Short Sweep Electric

- AU8014 Fuel Level (0 ohms E/90ohmsF)
- For most GM US vehicles from 1965 to present.
- AU8015 Fuel Level (73 ohms E/8-12ohms F)
- For most Ford, GMH(74-79) and Chrysler vehicles.
- AU8016 Fuel Level (240 ohms E/33ohms F)
- Use 3262 fuel level sender (not included). Suits GMH 1980 on
- AU8027 Oil Pressure 0-100PSI
- AU8037 Water Temperature 100-250°F
- AU8048 Oil Temperature 140-300°F
- AU8049 Transmission Temperature 100-250°F
- AU8092 Voltmeter 8-18 Volts

GT Series 5 Piece Gauge Kit

Auto Meter GT Series gauge kits include 5" diameter 160mph Speedo, 2-1/16" diameter oil pressure, water temperature, fuel level & volts & are equipped with cutting-edge, white LED illumination to maximize visibility in all conditions. They feature matte black bezels to help minimize cockpit glare, while aircraft-inspired dials constructed from real carbon fiber.

- AU8002 5 Piece Kit With Electric MPH Speedo

GM Series By Autometer

GM BOWTIE LOGO GAUGES

Monitor your vehicle's vital signs with these rugged, precise gauges—while flying the Chevy Bowtie flag. A wide array of instruments in several styles is offered to better suit your vehicle. GM Performance Parts-logo gauges are liquid-filled and designed for the rigors of high performance street use or racing. All gauges are intended for 12-volt electrical systems and feature a matte black bezel and 12-volt backlighting. Mounting hardware is included unless otherwise noted. These gauges are made by Autometer and work with all Autometer parts and accessories.

GM1302-00408

Includes speedometer, oil pressure, voltmeter, water temperature and fuel level gauges, and all required sensors and sending units

HOONIGAN

AU4497-09000

The AutoMeter X Hoonigan gauge collaboration started with Head Hoonigan in Charge, Ken Block's 1965 Ford Mustang Hoonicorn RTR, made famous by the Gymkhana SEVEN instalment of his viral video series. A set of bespoke gauges were created for the project, and we are now proud to announce their availability for your own tire slaying creations! Built upon proven AutoMeter Pro-Comp Ultra-Lite internals, these instruments are fitted with unique Hoonigan Industries designed cosmetics which include matte black, Hoonigan 'stamp' dials with stencil font, two colour fluorescent red and matte black pointers, and satin silver 'Monster' bezels.

PHANTOM II INTER-ACT PACK

Models (AU7532, AU7592, & AU7521)
120°-240° F / 8-18 volts / 0-100 PSI **AU7500**
Includes Mechanical water temp, voltmeter, and mechanical oil pressure gauges

PHANTOM II DIESEL INTER-ACT PACK

Models (AU7504, AU7549, & AU7544)
0-35 PSI / 100° - 250° F / 0° - 1600° F **AU7501**
Includes mechanical boost gauge, short sweep electric trans temp., and pyrometer gauges.

SPORT-COMP Silver

3-3/4" Pro-Comp Silver Memory Tach

Pro-Comp Memory tachometers include a rugged air core meter movement for superior monitoring accuracy. Models are available for different racing ignitions in both Monster and Standard sizes. They include peak RPM memory recall which some utilize a remote mounted switch. Race teams can review the highest RPM attained to help select the optimum gear ratios.

- AU6604 10,000RPM Silver Tach (Std./Elec)

5" & 3-3/4" Sport Comp Silver

Tachometers

The 3911 Sport Comp "Silver" tachometer with Shift Lite includes Auto Meter's Dial In Exactness. This feature actually utilizes the tach's fluorescent red pointer to indicate the chosen shift RPM. By depressing the Push To Display button the shift point RPM is indicated by the tach pointer. Then by turning the Shift Set knob, the pointer sweeps up or down until the preferred RPM is selected

- AU3910 10000RPM Silver Tachometer.
- AU3911 10000RPM Silver Tachometer with ShiftLite
- AU3781 3-3/4" 8000RPM Tachometer

2-5/8" Sport Comp Silver Mini Tachometers

This Sport Comp mini tachometer is made with rugged air core meter movement for quick accurate response. With proven performance and reliability it fits into tight areas and matches the popular silver look of the Ultra-Lite series.

- AU3707 2-5/8" 8,000RPM Silver Tach

ULTRA-LITE

5" Silver Tachometers

The Pro-Comp 2 tachs include a two stage shift light. The bright red Quick Lite and the Dial In Exactness feature give instantaneous notice of shift points to provide faster response times during shifts. High and fast revving cars utilize the Dual Range models which feature a dial face that dramatically expands critical racing RPM range. Peak RPM memory recall reviews the highest RPM achieved during a race.

In-Dash 3-3/8" & 5" Speedometers & Tachometers

When using a late model transmission, Auto Meter electronic speedometer is the answer. The electronic programmable speedometer features push button calibration that can be easily set while driving. This allows easy recalibration after changing gear ratios or tyre size. Retains mileage even if it is recalibrated or 12 volt power is removed. Programmable speed, will work with any 500 to 200,000 pulse/mile sender. May be used with existing sender if car has one.

AU4487	3-3/8" 120MPH Electronic Speedometer

Mechanical Speedos above include Trip Odometer.
Models 4494 and 4499 include high peak RPM Memory Recall and have a smaller 3-3/8" diameter rear case.

2-1/16" & 2-5/8" Mechanical Metric Gauges

These mechanical gauges have the dramatic new silver look for those racers needing metric calibrations.

AU4303-M	2-1/16" Boost/Vac 60cm.Hg-2.0 Bar
AU4303-M2	2-1/16" BOOST-VAC, 1/4-2 BAR, MECH
AU4421-J	2-5/8" Oil Pressure 0-7 Kg/Cm2*
AU4431-M	2-5/8" Water Temp. 60-140degC*
AU4411-M	2-1/16" Fuel Pressure 0-1.0 Bar

NOTE: * Inc. 6ft. Nylon tubing, 1/8" & 1/8" NPT fittings.

Mechanical Gauges

The hottest instruments for the sportsman and professional racers in any motorsport. Aluminium construction greatly reduces weight while satin anodised aluminium dial and bright red fluorescent pointers make them easy to read. Bourdon tube mechanism provides proven durability and accuracy on mechanical gauges with 270deg. sweep.

ULTRA-LITE PEAK MEMORY & WARNING GAUGES

Developed in conjunction with top nascar teams, these gauges help drivers focus on the track, and provide critical data to the crew. features include built-in, attention-grabbing, user-programmable red led warning lights and one-touch peak memory recall. boost gauges recall peak boost for easy review after a pass. all other pressure gauges recall lowest pressure drop and temperature gauges provide peak data on temperature spikes. Ideal for all forms of racing and high performance street applications.

2-5/8" Silver Face Liquid Filled Gauges

The toughest gauge in racing, Liquid Filled Gauges from Auto Meter are available in the hottest racing look. The silver LFG's are designed to match the anodised aluminium look of the Ultra-Lite Series. They provide the strength and durability you have come to expect from Auto Meter. Liquid Filled Gauges are designed to withstand the harshest race environments.

AU4602	Blower 0-60PSI
AU4603	Boost 30In.Hg/30PSI

Gauges include 1/8" & 1/4" NPT fittings, 6ft nylon tubing.

- AU4611 Fuel Pressure 0-15PSI.** Must be mounted outside of vehicle. Requires braided stainless steel tubing and mounting cup.
AU4612 Fuel Pressure 0-100PSI. Must be mounted outside of vehicle. Requires braided stainless steel tubing and mounting cup.
AU4621 Oil Pressure 0-100PSI
AU4622 Oil Pressure 0-200PSI
 Gauges include 1/8" & 1/4" NPT fittings, 6ft nylon tubing
AU4626 Brake Pressure 0-200PSI
AU4631 Water Temperature 140-280°F Inc 6ft capillary
AU4632 Water Temperature 120-240°F Inc 6ft capillary
AU4641 Oil Temperature 140-280°F
 Includes 6ft capillary, and 1/2" NPT fitting
AU4631-SP4 Oil Temperature 140-280°F
 Includes 4ft capillary, and 1/2" NPT fitting

5" Ultra Nite Tach Glow In The Dark

AU4594
5" Ultra-Nite Tach,
Memory 0-10,000 rpm
 Memory Tach features recessed switch plate design. Operates on 4, 6 or 8 cylinder engines. For standard/electronic and most high performance electronic racing ignitions.

2-5/8" Ultra Nite Glow In The Dark Gauges

Easily identified by their anodised blue exterior, these Ultra-Nite gauges offer unique features needed in many forms of racing. The luminescent dial glows at night for dimly lit tracks when no battery is available to light conventional gauges. A sealed, water resistant case keeps moisture and debris out and light weight anodised aluminium fittings on the temperature gauges are ideal for sprint car racing. These are made for harsh environments where light weight is desired.

- AU4511 Fuel Pressure 0-15PSI** Must be mounted outside of vehicle. Requires stainless steel tubing and mounting cups.
AU4521 Oil Pressure 0-100PSI*
AU4523 Oil Pressure 0-150PSI
 AU4521 & AU4523 Inc. 1/8" & 1/4" NPT fittings, 6ft nylon tubing.
AU4531 Water Temp 140-280°F Includes 6ft capillary tubing.
AU4532 Water Temp 120-240°F Includes 6ft capillary tubing.
AU4533 Water Temp 140-280°F Includes 4ft capillary tubing.
AU4535 Water Temp 140-280°F Includes 3ft capillary tubing.
AU4541 Oil Temp 140-280°F
 Inc. 6ft capillary tubing, 1/2" NPT alum. fitting.

EXTREME ENVIRONMENT

Designed for the absolute harshest environments, the AutoMeter Extreme Environment series gauges provide the very best in waterproof sealing. One of the single most important factors in determining how your engine performs (and how long it performs between rebuilds) is proper oil temperature during operation. Knowing your exact temp allows you to make sure you've got the proper oil weight and cooling capacity. Using AutoMeter's advanced 1/8" NPT two wire temperature transducer, you can be assured of the most accurate possible readings of the life blood of your engine. The advanced Digital Stepper Motor Drive keeps needle movement smooth and precise. Preconfigured warning points change the gauge's LED illumination from white to red, allowing you to concentrate on the work at hand or taking the checkered flag. A direct plug-in wiring harness is included for ease of installation.

- Waterproof Design - Sealed front and rear for protection against the elements in exposed cockpits
- 6 pin DTM connector at gauge makes for a sealed connection
- Ultra light weight construction - 70% Lighter than Pro-Comp Liquid Filled 2-5/8" gauges, 60% lighter than Ultra-Lite 2-5/8" Mechanical, 25% lighter than Spek, 10% less than Elite
- White through-dial LED lighting with red pre-set full dial warning with solid and blink transitions
- External momentary switch for control of brightness and peak recall
- Stepper motor design with unique multi-scale dial derived from NASCAR tech for optimized resolution and accuracy in critical operating range
- Preset backlight color change warning - 260°F

Includes T-fitting and 3/8" OD x 1/8"-27 NPT fitting. Use only approved brake line.

AU5431 Water Temp. 140-280°F
 Includes 6ft capillary tubing & 1/2" NPT fitting.

AU5432 Water Temp. 120-240°F
 Includes 6ft capillary tubing & 1/2" NPT fitting.

AU5433 Water Temp. 120-240°F
 Includes 12ft capillary tubing & 1/2" NPT fitting.

AU5433SP Water Temp. 120-240°F
 Includes 20ft capillary tubing & 1/2" NPT fitting.

AU5435 Temp. 140-340°F
 Includes 8ft capillary tubing & 1/2" NPT fitting.

AU5441 Oil Temp. 140-280°F
 Includes 6ft capillary tubing & 1/2" NPT fitting.

AU5443 Oil Temp. 140-280°F
 Includes 12ft capillary tubing & 1/2" NPT fitting.

AU5443SP Oil Temp. 140-280°F
 Includes 20ft capillary tubing & 1/2" NPT fitting.

AU5451 Temp. 140-280°F
 Includes 8ft capillary tubing & 1/2" NPT fitting.

AU5451 Trans Temp. 140-280°F
 Includes 8ft capillary tubing and 1/2" NPT fitting.

AU5484 Vacuum 30In. Hg*
 *Note: Includes 6ft nylon tubing 1/8" & 1/4" NPT fittings.
 **Note: Require braided stainless steel line

Autogage

Autogage 5" Shift-Lite Monster Tachs

These economical tachs offer race inspired style with the trademark Auto Meter Monster look. Auto Meter's rubber lined gauge provides protection against vibration while mounting base allows mounting in any location. Auto Meter has added the trademark large Shift-Lite to the Autogage tachometers. This bright amber light signals shift points with "Dial-In-Exactness". By turning the "Shift Set" knob on the tach, the pointer sweeps up or down until the preferred RPM is selected. The Shift-Lite on models 233911, 233904 and 233905 can be removed from the Shock Strap and mounted in a convenient location. The 233903 Shift Lite is mounted on the tach face. Tachometers operate on 4, 6 or 8 cylinder engines with most standard and high performance electronic ignitions.

- AU233903 10,000 RPM Shift Lite Tachometer**
 Shift Lite on the Shield
AU233904 10,000 RPM Shift Lite Tachometer

AU233907 10,000 RPM SILVER Memory Tachometer
 Without Shift Lite
AU233911 10,000 RPM SILVER Shift Lite Tachometer
 With external Shift Lite

5" Autogage Monster Memory Tachometers

Autogage Memory Tachometers with Peak RPM Memory feature. Allows you to recall the highest RPM achieved. Helps point out engine over-revving and aids in setting optimum gear ratios. Rubber lined shock strap provides protection against vibration while mounting base allows mounting in any location. Bright amber Shift Lite on model 233906 signals shift points with "Dial In Exactness". By turning the Shift Set knob, the pointer sweeps up or down until preferred RPM is selected. Shift Lite can be removed from Shock Strap and mounted in a convenient location.

- AU233902 10,000 RPM Memory Tachometer
- AU233906 10,000 RPM Memory Shift Lite Tachometer With external Shift Lite

AU233908 AU233909

3-3/4" PEDESTAL TACHOMETER

Getting great performance or saving money doesn't have to be choice. Engineered by AutoMeter in Sycamore, IL, The Auto Gage line of instruments provide the best bang for the buck performance in the industry. For a fast street car or a weekend racer, Auto Gage provides levels of accuracy and durability unheard of in the price category. With countless wins in magazine comparison tests, the best value in gauges comes from exactly the place you'd expect it to. AutoMeter.

- AU233908 10,000 RPM BLACK Shift Lite Tachometer With external Shift Lite
- AU233909 10,000 RPM SILVER Shift Lite Tachometer With external Shift Lite

3-3/4" Tachometers

These American made tachometers in traditional chrome or modern black, they include a new rugged air core meter movement for maximum accuracy and quick response. And when the sun goes down, the through dial illumination and lit pointer provide excellent night time legibility. A red line shift marker slides to any preferred position as a reminder to help prevent engine over revving. Mounting base is specially designed for easy installation and adjusts for different heights.

- AU2300 8,000 RPM Black Tachometer Tach features a contemporary satin black case
- AU2301 8,000 RPM Chrome Tachometer Polished chrome gives tach a traditional look Tachometer

Shift-Lite Tachometer

Helps optimise driving performance when you bring your street car to the race track. The critical shift point is dialled in with an adjustable knob on the tach face. When the engine revs to this pre-selected rpm, a bright red light on the dial comes on to indicate the shift.

- AU2302 8,000 RPM Shift-Lite Tachometer
- AU2309 8,000RPM Black Tach w/external Shift-Lite

3-3/4 White Face Tachometers

Auto Meter now offers these popular American made tachometers with a white face and black pointer for the street performance enthusiast in the popular Auto gage series.

- AU2303 8,000 RPM Black Tachometer
- AU2304 8,000 RPM Chrome Tachometer

Mini Tachometer

Perfect for those hard to fit interiors, these compact instruments can maximise driver awareness and safety. The tachometer installs easily and comes in 6,000 or 8,000 rpm. The miniature gauges come individually or in popular console packages.

- AU2305 8,000 RPM Black Mini Tach
- AU2306 6,000 RPM Black Mini Tach

Low RPM range offers maximum dial legibility. Operates on 4, 6 & 8 cyl engines with most factory or aftermarket ignitions.

2-1/16" Auto Gauges

- AU2360 **Mechanical Oil Pressure 0-100PSI** Inc. 6ft. nylon tubing, 1/8" and 1/4" NPT fittings
- AU2361 **Mech. Water Temp. 130-280°F** Inc. 6ft. capillary tubing 1/2" and 3/8" NPT fittings
- AU2362 **Electrical Voltmeter 10-16 Volts** CAUTION: Use ammeter only on alternators with maximum output of 60 amps or less. Higher output alternators must use voltmeter. Ammeter must be installed by experienced mechanic.

1-1/2" Gauges & 1-1/2" Gauge Consoles

- The electric gauge versions provide simple installation and include quick glance colour coded dials. The mechanical gauges allow a wider, full sweep dial. Through the dial lighting enhances the gauge's night time readability.
- AU2352 **Mech. Water Temp. 130-280°F** Inc. 6ft. capillary tubing 1/2" and 3/8" NPT fittings
 - AU2354 **Electric Oil Pressure 0-100PSI** Includes elec. sender 1/8" and 1/4" NPT fittings
 - AU2355 **Elec. Water Temp. 100-280°F** Inc. 1/8" elec. sender, 3/8" and 1/2" NPT fittings
 - AU2356 **Electric Voltmeter 8-18 Volts**
 - AU2391 **Electrical Mini Gauge Console** Oil, water, volt. Tubing, fittings & hardware included. Gauges feature colour coded bands for easy and accurate monitoring
 - AU2396 **Mechanical Mini Gauge Console** Oil, water, volt. Tubing, fittings & hardware included.

2-1/16" Mechanical Gauge Steel Panels

- AU2332 **Oil Pressure 0-100PSI** Inc. 6ft. nylon tubing 1/8" and 1/4" NPT fittings
- AU2333 **Water Temperature 100-280°F** Inc. 6ft. capillary tubing 1/2" & 3/8" NPT Fittings
- AU2337 **Vacuum Gauge 30 In. Hg** Inc 6ft. nylon tubing and universal T Fitting

2-1/16" Mechanical White Gauge Consoles

- White face gauge consoles feature contoured steel mounting panels along with red and green light bulb covers for a custom look at night. When economical price an accuracy are important, the short sweep mechanical consoles are the right choice. For optimum styling and accuracy, install the easy to read, full sweep gauge consoles.
- AU2323 **Black 2-Gauge Console, Oil/Water** Gauges in 5-1/8" long contoured steel panel
 - AU2324 **Black 3-Gauge Console, Oil/Water/Volt** Gauges in 7-1/8" long contoured steel panel
 - AU2325 **Chrome 3-Gauge Console Oil/Water/Volt** Gauges in 7-1/8" long contoured steel panel
 - AU2326 **Black 2-Gauge Console, Oil/Water Full Sweep** Gauges in 5-1/8" long contoured steel panel
 - AU2327 **Black 3-Gauge Console, Oil/Water/Volt Full Sweep** Gauges in 7-1/8" long contoured steel panel

2-5/8" Mechanical Gauges Steel Consoles

- AU2394 **Black Console (Oil, Amp, Water)** 10 Gauge wire required for Amp gauge hook up.
- AU2395 **Chrome Console (Oil, Amp, Water)** 10 Gauge wire required for Amp gauge hook up.
- AU2398 **Black Console (Oil, Volt, Water)**
- AU2399 **Chrome Console (Oil, Volt, Water)**

2-1/16" Mechanical Gauge Console

When economical price and accuracy are most important, these short sweep mechanical gauges provide the answer. Sold in either console packages or individually, these mechanical gauges include contoured steel mounting panels and red and green light bulb covers for a custom look.

- AU2345 **Black 2-Gauge Console (Oil, Water)** Gauges in 5 1/8" long contoured steel panel
 - AU2347 **Black 3 Gauge Console (Oil, Water, Amp)** See CAUTION note. Gauges in 7 1/2" long contoured steel panel. 10 Gauge wire required for Amp gauge hookup.
 - AU2348 **Black 3 Gauge Console (Oil, Water, Volt)** Gauges in 7 1/2" long contoured steel panel
 - AU2349 **3 Gauge Console (Oil, Water, Volt)** Chrome, 7 1/2" long contoured steel panel
- For optimum styling and accurate readings these popular gauges are the wise choice for highway driving. A black bezel surrounds the easy to read, full sweep dial face. Through dial lighting with red and green light bulb covers included enhance night time driving.

2-1/16" Full Sweep Mechanical Gauge Console

- AU2392 **Black 2-Gauge Console (Oil, Water)** Gauges in 5" long console
- AU2393 **3-Gauge Console (Oil, Amp, Water)** Gauges in black metal panel. 10 Gauge wire required for Amp gauge hook up.
- AU2397 **3-Gauge Console (Oil, Volt, Water)** Gauges in black metal panel.

2-5/8" Mechanical White Face Gauge Console

- Full sweep 2-5/8" size mechanical gauges. They are offered with a white dial face, providing an easy to read modern look. red and green light bulb covers are included to create a custom dash look at night.
- AU2328 **Black Console, Oil/Water/Volt** Gauges in 9-1/8" long black panel
 - AU2329 **Chrome Console, Oil/Water/Volt** Gauges in 9-1/8" long chrome panel

2-5/8" Mechanical Gauges

- Full sweep mechanical gauges. Can be mounted in chrome or black cups, under or in dash for a custom look. All individual gauges include an optional chrome plated bezel. Through the dial lighting with optional red and green light bulb covers for enhance night time driving.
- AU2310 **Boost-Vac/Pressure** 30In.Hg. Vacuum/20psi Pressure. Includes 6ft nylon tubing, 1/8" and 1/4" NPT Fittings
 - AU2311 **Fuel Pressure 0-15PSI** Requires braided stainless steel tubing and mounting cup. Gauge MUST be mounted outside vehicle for safety.
 - AU2312 **Oil Pressure 0-100PSI** Inc. 6ft nylon tubing, 1/4" and 1/8" NPT fittings.
 - AU2313 **Water Temperature 100-280°F** Inc. 6ft nylon tubing, 3/8" and 1/2" NPT fittings.
 - AU2314 **Oil Temperature 100-340°F** Inc. 6ft capillary tubing 1/2" and 3/8" NPT fittings.
 - AU2315 **Fuel Level** (73 ohms E/8-12 ohms F) Most Ford and Chrysler vehicles.
 - AU2316 **Fuel Level** (0 ohms E/90 ohms F) For most GM USA vehicles. NOTE 2315 fuel level gauge connects to stock sender in fuel tank. Measure resistance (ohms) with an ohmmeter when tank is empty and full.
 - AU2317 **Vacuum Gauge 30In.Hg** Includes 6ft nylon tubing and T-Fittings.
 - AU2319 **Voltmeter 10-16 Volts (Electrical)**

AUTOMETER HELPFUL HINTS

In all Gen 3 Holden applications Tacho calibration should be set to 4cylinder for correct operation.

When it comes to matching your stock sender to new fuel gauges getting the correct resistance is the key.

GM Holden sender units up to early HQ are 0 - 30 ohms

Late HQ up to HZ also including LH & LX torana are 73 - 10 ohms

WB - VR Holden are 282 - 40 ohms

All Ford Falcons up to XF are 73 - 10 ohms

If your not sure what you have get your auto electrician to check the resistance of your fuel sender.

SERIES™

Include a black bezel design similar to the unique design originally introduced in the Sport-Comp Series. The compact size and matching black mounting cups make these gauges the perfect choice in any application.

3-3/4" Street Tachs

These classic, steel case tachometers include a fast action air core meter movement that measures engines to 8,000rpm. A redline shift marker can be adjusted to help maximise horsepower and prevent damage from over-revving.

AU2894 8,000 RPM Black Street Tach

5" In-Dash Tachs & Speedos

- AU2639 Oil Temperature 140-300F**
Inc. 1/8" elec sender 3/8" & 1/2" NPT fittings.
- AU2640 Trans. Temperature 100-250F**
Inc. 1/8" elec sender 3/8" & 1/2" NPT fittings.
- AU2641 Fuel Level**
(0 ohms E/90 ohms F) Most GM vehicles from '65 to present.
- AU2642 Fuel Level**
(73 ohms E/8-12 ohms F) For most Ford and Chrysler vehicles.
- AU2643 Fuel Level**
(240 ohms E/33 ohms F) Use with 3262 Fuel Level sender.
- AU2648 Fuel Level**
(0 ohms E/30 ohms F) For most GMH vehicles before 1965
- AU2644 Ampmeter 60-0-60 Amps**
CAUTION Use only on alternators with maximum output of 60 Amps or less. Higher output alternators **MUST** use voltmeter.
- AU2645 Voltmeter 8-18 Volts**
- AU2651 Voltmeter 16-36Volts**
- AU2636 Differential Temperature 100-250F**

2-1/16" Full Sweep Electrical Gauges

- AU2656 Fuel Level, Programmable 0-280 Ω**
- AU2655 Pyrometer, 0-2000 °F**
- AU2632 Clock Quartz Movement**
Includes second hand. Operates on 12 volts.
- AU2661 Fuel Pressure 0-15PSI**
- AU2660 Fuel Pressure 0-30PSI**
- AU2663 Fuel Pressure 0-100PSI**
- AU2675 Air Fuel Ratio**
- AU2653 Pyrometer 0-1600°F**
- AU2654 Pyrometer 0-1600°F**

TRADITIONAL CHROME BEZEL

Ideal for custom car or race applications requiring a small size or custom car builders desiring the traditional chrome design, these quality gauges are the perfect choice. They are available in both mechanical or electrical movements. The mechanical gauges offer a full 270deg. sweep dial face for maximum legibility.

AU2895

Tachs & Speedos

- AU2895 3-3/4" 8,000 RPM Chrome Street Tach**
- AU2897 3-3/4" 8,000 RPM Short Sweep with Super Bezel**
- AU2893 2-5/8" 8,000 RPM Chrome Mini Tach**

Tachs & Speedos

- AU2489 3-3/8" 160MPH Programmable Electronic Speedo**
- AU2492 3-3/8" 120MPH Mechanical Speedo**
- AU2494 3-3/8" 160MPH Mechanical Speedo**
All Speedometers come with trip odometer.
- AU2499 3-3/8" 8000RPM In Dash Elect. Tach**
Operates on 4,6 or 8 cylinder engines with most factory and aftermarket ignitions.

2-1/16" Mechanical Gauges

- AU2430 Air Locker Pressure 0-150PSI**
 - AU2401 Boost 30in Hg Vac/20PSI**
Inc. 6ft nylon tubing 1/8" and 1/4 NPT fittings.
 - AU2403 Boost 30in Hg Vac/30PSI**
Inc. 6ft nylon tubing 1/8" and 1/4 NPT fittings.
 - AU2411 Fuel Pressure 0-15 PSI (carb)**
Gauge **MUST** be mounted outside of vehicle. Requires braided stainless steel tubing and mounting cups.
 - AU2412 Fuel Pressure 0-100 PSI (Fuel Inj.)**
Gauge **MUST** be mounted outside of vehicle. Requires braided stainless steel tubing and mounting cups.
 - AU2413 Fuel Pressure w/Isolator 0-15PSI**
May be installed inside vehicle by mounting isolator in engine compartment. Includes 4ft braided stainless line from isolator to gauge. Requires braided stainless steel tubing to connect isolator to fuel source.
 - AU2421* Oil Pressure 0-100 PSI**
 - AU2422* Oil Pressure 0-200 PSI**
 - AU2431* Water Temperature 140-280°F**
 - AU2432* Water Temperature 120-240°F**
 - AU2433 Water Temperature 120-240°F**
Inc. 12ft capillary tubing and 1/2" NPT fittings.
 - AU2441* Oil Temperature 140-280°F**
 - AU2484 Vacuum 30in Hg**
Inc. 6ft capillary tubing and universal T-fitting.
 - AU2451 Transmission Temperature 140-280°F**
Inc. 8ft capillary tubing and universal T-fitting
- Note: *Inc. 6ft nylon tubing 1/8" and 1/4" NPT fittings

2-1/16" Electrical Gauges

- AU2514 Fuel Level**
(0 ohms E/90 ohms F) Most GM vehicles from '65 to present.
- AU2515 Fuel Level**
(73 ohms E/8-12 ohms F) For most Ford and Chrysler vehicles.
- AU2516 Fuel Level**
(240 ohms E/33 ohms F) Use with 3262 Fuel Level sender.
- AU2517 Fuel Level**
(0 ohms empty/30 ohms full) Most 1965 GM vehicles pre 1965
- AU2518 Fuel Level**
(16 ohms empty/158 ohms full) Ford 1987 to present
- AU2522 Oil Pressure 0-100 PSI**
Inc. electric sender 1/8" and 1/4" NPT fittings
- AU2532 Water Temperature 100-250°F**
Inc. electric sender 1/8" and 1/2" NPT fittings.
- AU2542 Oil Temperature 100-250°F**
Inc. 1/8" electric sender 3/8" and 1/2" NPT fittings.
- AU2543 Oil Temperature 140-300°F**
Inc. 1/8" electric sender 3/8" & 1/2" NPT fittings.
- AU2552 Trans. Temperature 100-250°F**
Inc. 1/8" electric sender 3/8" & 1/2" NPT fittings.
- AU2586 Ammeter 60-0-60 Amps**
CAUTION Use only on alternators with maximum output of 60 Amps or less. Higher output alternators **MUST** use voltmeter. Ammeter **MUST** be installed by experienced mechanic.
- AU2585 Clock Quartz Movement**
Includes second hand. Operates on 12 volts.
- AU2587 Hourmeter 8-32 Volts DC input**
Non-re-settable meter with Quartz accuracy for recording up to 100,000 hours
- AU2592 Voltmeter 8-18 Volts**

DATA AQUISITION

Allows you to record and playback up to 80 seconds of RPM activity to analyse your shift points and improve consistency. Connect to any Autometer tach to turn it into a playback tach and view recorded data on the gauge face. Also usable as a shift light controller.

Features:

- 80 Second Playback
- Digital RPM Display
- Super Bright LED Shift Light
- Easy, 3 Button User Programmable Interface
- Single Programmable Shift Point
- Four Programmable Shift Points and Launch Light
- Progressive Colour Change Shift Lights
- Custom Shift Light Colour

Tach Facts Software

Tach facts software allows each stored run from the Ultimate II to be downloaded to a PC for review and analysis. Zoom In feature allows target areas of the graph to be expanded both horizontally and vertically for more accurate information.

AU6890 Tach Facts Software

Software sent on CD and requires a minimum of a PentiumII processor or equivalent. Tach Facts works on Windows 98, 95, 2000, NT Millennium or XP. Included with dual channel tachs.

Pit Road Speed Tach Programmer

Required for optimal (1 RPM Resolution) Programming of Pit Road Speed and Shift Light
Functionality of the #6847 Elite Series Pit Road Speed Tachometers.

AU9119 Pit Road Speed Tach Programmer

Note: All Playback models operate on 4, 6, or 8 cylinder engines with standard and electronic racing ignitions.

5" Sport-Comp Playback Tachometer

- AU3964 9000RPM Sport Comp Silver Playback Tach**
 - AU3965 11000RPM Sport Comp Silver Playback Tach**
 - AU3966 9000RPM Sport Comp Black Playback Tach**
 - AU3967 11000RPM Sport Comp Black Playback Tach**
- Review your entire run right on the tach, right at the track for a detailed view of your car's performance under extreme race conditions. The replay can be viewed on the tachometer in 1/3 real time, and enhanced using the fast forward and fast reverse function. Data is recorded at a rate of 50 samples per second, for optimum accuracy. Four shift points can be selected, and an Auto Meter shift light may be added to increase driver consistency.

CLASSIC & HOT ROD GAUGES

km/h Street Rod Kits for Australia

with programmable km/h speedo

- AU1302-M** Arctic White 5 Piece Kit
- AU1421-M** Designer Black 5 Piece Kit
- AU1602-M** Old Tyme White 5 Piece Kit
- AU1809-M** Antique Biege 5 Piece Kit

ARCTIC WHITE SERIES

The Arctic White series features a brilliant white face with an easy to read modern dial. A fluorescent red pointer is seen through a clear domed lens with a polished chrome bezel.

AU1303

Street Rod Kit Boxes

Five piece kits include a 3-1/8" diameter 120mph or 190kph speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. Quad gauge kits include the quad gauge with oil pressure, water temperature, volt and fuel level in one gauge and a 120mph electronic speedo or electronic tach / speedo combo gauge and are available in 3-3/8" or 5" diameter. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

- AU1300** Five Piece Kit with Mechanical MPH Speedo
- AU1302** Five Piece Kit with Electronic MPH Speedo
- AU1302-M** Five Piece Kit with Electronic KPH Speedo
- AU1308** 3-3/8" Quad Gauge & Electronic Speedo Kit
- AU1309** 3-3/8" Quad Gauge & Electronic Tach/Speedo Kit
- AU1303** 5" Quad Gauge & Electronic Speedo Kit

Tachos, Speedos & Quad Gauges

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use AU5291 for GM applications or AU5292 for Ford applications.

- AU1397** 2-1/16" 7000rpm In Dash Mini Tacho
- AU1388-M** 3-1/8" 190kph Electronic Speedo
- AU1398** 3-1/8" 7000rpm In Dash Tacho
- AU1388** 3-1/8" 120mph Electronic Speedo
- AU1396** 3-1/8" 120mph Mechanical Speedo
- AU1390** 3-3/8" 8000rpm In Dash Tacho
- AU1380** 3-3/8" 120mph Electronic Speedo
- AU1381** 3-3/8" 120mph / 8000rpm Tach / Speedo Combo
- AU1312** 3-3/8" Quad Gauge (Fuel, Oil, Water, Volts)
- AU1313** 3-3/8" Dual Combo (Fuel, Oil)
- AU1330** 3-3/8" Dual Combo (Water, Volts)
- AU1399** 5" 8000rpm In Dash Tacho
- AU1389** 5" 120mph Electronic Speedo
- AU1310** 5" Quad Gauge (Fuel, Oil, Water, Volts)

2-1/16" Gauges

To use a fuel level gauge with your original sender, measure the resistance at empty and full and select the matching gauge. 0-90 Ohms suits most aftermarket fuel cells and 240-33 Ohms is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge

- includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.
- AU1315** Fuel Level, 0 Ohms E / 90 Ohms F (GM 1965-on)
- AU1316** Fuel Level, 73 Ohms E / 10 Ohms F (Ford & Chrys)
- AU1317** Fuel Level, 240 Ohms E / 33 Ohms F (Universal)
- AU1318** Fuel Level, 0 Ohms E / 30 Ohms F (pre-1965 GMH)
- AU1321** Oil Pressure Mechanical 0-100psi
- AU1327** Oil Pressure Electric, 0-100psi
- AU1332** Water Temperature Electric, 120-240F
- AU1337** Water Temperature Electric, 100-250F
- AU1372** Boost/Vac Mechanical, 30in.Hg - 20psi
- AU1385** Clock, Quartz Movement
- AU1391** Voltmeter, 8-18 Volts

OLD TYME BLACK SERIES

Street Rod Kit Box

Each kit includes 120MPH Speedometer, 100PSI Oil Pressure, 100degF-250degF Water Temperature, 8-18V Voltmeter and a 240 ohms/33ohms Fuel Level Gauge. All gauge senders (including Fuel Level sender), lighting and mounting hardware are included.

- AU1708** 3-1/8" Speedo/2-1/16 x 4 Gauge Kit mechanical speedo
- AU1709** 3-1/8" Speedo/2-1/16 x 4 Gauge Kit Electronic speedo
- AU1720** 3-3/8" Quad Gauge & 120mph Electronic Speedo Kit

Tachometers & Speedometers

- AU1797** 2-1/16" 7,000RPM Electric In Dash Mini Tach
- AU1787** 3-1/8" 120MPH Electric Programmable Speedo
- AU1796** 3-1/8" 120MPH Mechanical In Dash Speedo
- AU1798** 3-1/8" 7,000RPM Electric In Dash Tach
- AU1713** 3-3/8" Quad Gauge (Fuel 240-33 ohm, Oil, Water, Volts)
- AU1790** 3-3/8" 8,000RPM Electric In Dash Tach

2-1/16" Gauges

- AU1715** Fuel Level (0 Ohms E/90 Ohms F) For most GM vehicles from 1965 to present.
- AU1716** Fuel Level (73 Ohms E/8-12 Ohms F) For most Ford and Chrysler vehicles.
- AU1717** Fuel Level (240 Ohms E/33 Ohms F) Use 3262 fuel level sender. Commodore
- AU1718** Fuel Level (0 Ohms E/30 Ohms Full) For most GMH vehicles before 1965.
- AU1727** Oil Pressure 0-100PSI Includes 1/8" elec. sender and 1/4" NPT adaptor
- AU1737** Water Temp. 100-250°F Inc 1/8" elec. sender, 3/8" & 1/2" NPT adapters
- AU1785** Clock Quartz movement
- AU1791** Voltmeter 8-18 Volts

AMERICAN PLATINUM SERIES

Auto Meter's American Platinum series offers a clean brushed aluminium dial face and black nickel bezel surrounding a clear domed lens. This is accented by an aggressive number style and pointer for a powerful look deserving of street rods.

Street Rod Kit Boxes

- Five piece kits including a 3-1/8" diameter 120mph speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.
- AU1901** Five Piece Kit with Mechanical MPH Speedo
- AU1902** Five Piece Kit with Electronic MPH Speedo

Tachos & Speedos

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use AU5291 for GM applications or AU5292 for Ford applications.

- AU1994** 2-1/16" 7000rpm In Dash Mini Tacho
- AU1995** 3-1/8" 7000rpm In Dash Tacho
- AU1988** 3-1/8" 120mph Electronic Speedo
- AU1993** 3-1/8" 120mph Mechanical Speedo

2-1/16" Gauges

To use a fuel level gauge with your original sender, measure the resistance at empty and full and select the matching gauge. 0-90 Ohms suits most aftermarket fuel cells and 240-33 Ohms is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.

- AU1904** Fuel Level, 0 Ohms E / 90 Ohms F (GM 1965-on)
- AU1905** Fuel Level, 73 Ohms E / 10 Ohms F (Ford & Chrys)
- AU1906** Fuel Level, 240 Ohms E / 33 Ohms F (Universal)
- AU1907** Fuel Level, 0 Ohms E / 30 Ohms F (pre-1965 GM)
- AU1928** Oil Pressure Electric, 0-100psi
- AU1938** Water Temperature Electric, 100-250F
- AU1986** Clock, Quartz Movement
- AU1992** Voltmeter, 8-18 Volts

AU1602

OLD TYME WHITE SERIES

The Old Tyme White series features a timely, nostalgic look with the accuracy of a modern air core meter. Bold numbers on the white coloured face are accented by a chrome bezel, antique black pointer and a clear domed lens.

AU1620

Street Rod Kit Boxes

Five piece kits include a 3-1/8" diameter 120mph or 190kph speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. Quad gauge kits include the quad gauge with oil pressure, water temperature, volt and fuel level in one gauge and a 120mph electronic speedo or electronic tach / speedo combo gauge and are available in 3-3/8" or 5" diameter. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

- AU1601** Five Piece Kit with Mechanical MPH Speedo
- AU1602** Five Piece Kit with Electronic MPH Speedo
- AU1602-M** Five Piece Kit with Electronic KPH Speedo
- AU1600** 3-3/8" Quad Gauge & Electronic Speedo Kit
- AU1620** 3-3/8" Quad Gauge & Electronic Tach/Speedo Kit
- AU1603** 5" Quad Gauge & Electronic Speedo Kit

Tachos, Speedos & Quad Gauges

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use AU5291 for GM applications or AU5292 for Ford applications.

- AU1694** 2-1/16" 7000rpm In Dash Mini Tacho
- AU1695** 3-1/8" 7000rpm In Dash Tacho
- AU1688** 3-1/8" 120mph Electronic Speedo
- AU1688-M** 3-1/8" 190kph Electronic Speedo
- AU1693** 3-1/8" 120mph Mechanical Speedo
- AU1690** 3-3/8" 8000rpm In Dash Tacho
- AU1680** 3-3/8" 120mph Electronic Speedo
- AU1681** 3-3/8" 120mph / 8000rpm Tach / Speedo Combo
- AU1613** 3-3/8" Dual Combo (Fuel, Oil)
- AU1630** 3-3/8" Dual Combo (Water, Volts)
- AU1612** 3-3/8" Quad Gauge (Fuel, Oil, Water, Volts)
- AU1699** 5" 8000rpm In Dash Tacho
- AU1689** 5" 120mph Electronic Speedo

- AU1610** 5" Quad Gauge (Fuel, Oil, Water, Volts)

2-1/16" Gauges

To use a fuel level gauge with your original sender, measure the resistance at empty and full and select the matching gauge. 0-90 Ohms suits most aftermarket fuel cells and 240-33 Ohms is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.

- AU1604** Fuel Level, 0 Ohms E / 90 Ohms F (GM 1965-on)
- AU1605** Fuel Level, 73 Ohms E / 10 Ohms F (Ford & Chrys)
- AU1606** Fuel Level, 240 Ohms E / 33 Ohms F (Universal)
- AU1607** Fuel Level, 0 Ohms E / 30 Ohms F (pre-1965 GM)
- AU1628** Oil Pressure Electric, 0-100psi
- AU1621** Oil Pressure Mechanical 0-100psi
- AU1638** Water Temperature Electric, 100-250°F
- AU1686** Clock, Quartz Movement
- AU1692** Voltmeter, 8-18 Volts

AU1200

OLD TYME WHITE II SERIES

The Old Tyme White II series features the same nostalgic look as the Old Tyme White series with white LED full dial lighting for enhanced night time visibility. Bold numbers on the white coloured face are accented by a chrome bezel, antique black pointer and a clear domed lens.

AU1203

OLD TYME WHITE II SERIES

Street Rod Kit Boxes

The five piece kit includes a 3-1/8" diameter 120mph electronic speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. The quad gauge kit includes a 5" diameter quad gauge with oil pressure, water temperature, volt and fuel level in one gauge and a 5" diameter 8000rpm / 120mph electronic tach / speedo combo gauge. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

- AU1200 Five Piece Kit with Electronic MPH Speedo
- AU1203 5" Quad Gauge & Tach / Speedo Combo Kit

Tachos, Speedos & Quad Gauges

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use AU5291 for GM applications or AU5292 for Ford applications.

- AU1297 3-3/8" 8000rpm In Dash Tacho
- AU1287 3-3/8" 120mph Electronic Speedo
- AU1290 5" 8000rpm / 120mph Tach / Speedo Combo
- AU1210 5" Quad Gauge (Fuel, Oil, Water, Volts)

2-1/16" Gauges

Fuel level gauge AU1216 is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.

- AU1216 Fuel Level, 240 Ohms E / 33 Ohms F
- AU1227 Oil Pressure Electric, 0-100psi
- AU1237 Water Temperature Electric, 100°-250°F
- AU1292 Voltmeter, 8-18 Volts

DESIGNER BLACK II SERIES

The Designer Black II series features the same styling as the Designer Black series with through the dial white LED lighting and lighted pointer for enhanced night time visibility. The clear domed lens surrounded by a chrome (or black chrome) bezel makes a provocative statement to custom interiors

Street Rod Kit Boxes

The five piece kit includes a 3-1/8" diameter 120mph electronic speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. The quad gauge kit includes a 5" diameter quad gauge with oil pressure, water temperature, volt and fuel level in one gauge and a 5" diameter 8000rpm / 120mph electronic tach / speedo combo gauge. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

- AU1201 Five Piece Kit with Electronic MPH Speedo
- AU1204 5" Quad Gauge & Tach / Speedo Combo Kit

Tachos, Speedos & Quad Gauges

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use AU5291 for GM applications or AU5292 for Ford applications.

- AU1296 3-3/8" 8000rpm In Dash Tacho
- AU1286 3-3/8" 120mph Electronic Speedo
- AU1291 5" 8000rpm / 120mph Tach / Speedo Combo
- AU1211 5" Quad Gauge (Fuel, Oil, Water, Volts)
- AU1414 3-3/8" Quad Gauge (Fuel 0-90 ohm, Oil, Water, Volts)
- AU1479 3-3/8" 120mph Electronic Speedo (Wheel Odometer)

2-1/16" Gauges

Fuel level gauge AU1206 is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.

- AU1206 Fuel Level, 240 Ohms E / 33 Ohms F
- AU1228 Oil Pressure Electric, 0-100psi
- AU1238 Water Temperature Electric, 100°-250°F
- AU1293 Voltmeter, 8-18 Volts

DESIGNER BLACK SERIES

The designer black series is a popular choice among street prodders. The dials are easy to read with modern dial graphics and a fluorescent red pointer. The clear domed lens surrounded by a chrome (or black chrome) bezel makes a provocative statement to custom interiors.

Street Rod Kit Boxes

Five piece kits include a 3-1/8" diameter 120mph or 190kph speedo and 2-1/16" diameter oil pressure, water temperature, volt and fuel level gauges. Quad gauge kits include the quad gauge with oil pressure, water temperature, volt and fuel level in one gauge and a 120mph electronic speedo or electronic tach / speedo combo gauge and are available in 3-3/8" or 5" diameter. All gauge senders (except electronic speed sensor), lighting and mounting hardware are included.

- AU1400 Five Piece Kit with Mech. MPH Speedo (Black Bezel)
- AU1420 Five Piece Kit with Mechanical MPH Speedo
- AU1421 Five Piece Kit with Electronic MPH Speedo
- AU1421-M Five Piece Kit with Electronic MPH Speedo
- AU1408 3-3/8" Quad Gauge & Electronic Speedo Kit
- AU1409 3-3/8" Quad Gauge & Electronic Tach/Speedo Kit
- AU1403 5" Quad Gauge & Electronic Speedo Kit

AU1403

Tachos, Speedos & Quad Gauges

Electronic speedos are programmable and are easily calibrated to suit different tyre sizes and diff ratios. Works with OEM electronic speed sensors. If your trans doesn't have a speed sensor you can use

AU5291 for GM applications or AU5292 for Ford applications.

- AU1477 2-1/16" 7000rpm In Dash Mini Tacho
- AU1478 3-1/8" 7000rpm In Dash Tacho
- AU1487 3-1/8" 120mph Electronic Speedo
- AU1487-M 3-1/8" 190kph Electronic Speedo
- AU1476 3-1/8" 120mph Mechanical Speedo
- AU1490 3-3/8" 8000rpm In Dash Tacho
- AU1480 3-3/8" 120mph Electronic Speedo
- AU1481 3-3/8" 120mph / 8000rpm Tach / Speedo Combo
- AU1412 3-3/8" Quad Gauge (Fuel, Oil, Water, Volts)
- AU1499 5" 8000rpm In Dash Tacho
- AU1413 3-3/8" Dual Gauge (Fuel Oil)
- AU1430 3-3/8" Dual Gauge (Water, Volts)
- AU1489 5" 120mph Electronic Speedo
- AU1410 5" Quad Gauge (Fuel, Oil, Water, Volts)

BLACK BEZEL

- AU1497 2-1/16" 7000rpm In Dash Mini Tacho (Black Bezel)
- AU1498 3-1/8" 7000rpm In Dash Tacho (Black Bezel)
- AU1488 3-1/8" 120mph Electronic Speedo (Black Bezel)
- AU1496 3-1/8" 120mph Mechanical Speedo (Black Bezel)
- AU1496 3-1/8" 120mph Mechanical Speedo (Black Bezel)

2-1/16" Gauges

To use a fuel level gauge with your original sender, measure the resistance at empty and full and select the matching gauge. 0-90 Ohms suits most aftermarket fuel cells and 240-33 Ohms is for use with the universal fuel level sender, part# AU3262. Oil pressure gauge includes 1/8" NPT sender and 1/4" NPT adapter. Water temperature gauge includes 1/8" NPT sender and 3/8" & 1/2" NPT adapters.

Matching 3-1/8" diameter 8000rpm tachometer is sold separately. **Five Piece Street Rod Kit with 3-1/8" Elect Speedo AU880087**
3-1/8" 8000rpm Tachometer AU880088

FORD MASTERPIECE GAUGE COLLECTION

FMM-19017-B961 CHROME BEZEL SERIES (KIT)

5-gauge kits include: speedometer, oil pressure gauge and sender, water temperature gauge and sender, fuel level gauge and sender and battery voltage gauge.

Luxurious finishes embossed with Ford emblem Chrome design with white background, gray sweep zone, black graphics and needle-style pointer. Includes all components necessary to install Electronic operation, except Speedometer, which is mechanical. Case diameter is 3-1/8" (Speedometer) and 2-1/16" (Water, Oil, Fuel & Battery) Fuel-level sender compatibility is 240 OHM empty, 33 OHM full - 12 volt (Available separately M-10871-A962) Fuel-level sender is adjustable from 6" to 23" Speedometer, Oil Pressure Gauge and Sender, Water Temperature Gauge and Sender, Fuel Level Gauge and Sender and Battery Voltage Gauge.

COBRA SERIES

This vintage sports series offers chrome bezels, through the dial lighting, an authentic reverse sweep speedometer and a matching tach and gauges. The 4" diameter tach and speedo are a direct fit in most Cobra car dashes.

Sky Drive

Calibrate your speedometer in less than a minute and you don't even have to leave your driveway! Sky Drive is the world's most accurate electronic speedometer sending unit.

No need for ECU converters or pulse signal generators screwed onto your transmission. The new Sky Drive uses GPS Satellite signals to operate your electronic speedometer. It updates 10 times per second and with one push of a button it's ready to go.

CISN81A Sky Drive

All American Tradition

The face of this instrument features a spun central point with a black background which allows the polished aluminum numbers and indices to radiate off the face. This series is offered standard with polished stainless high stepped bezels and curved glass, the white teardrop pointers and elegant "All American" emblems complete this masterpiece. Tom Gale has once again collaborated with the team at Classic Instruments with wonderful results. Part numbers listed below have high step bezels. For low profile radial bezels change the suffix from SHC to SRC.

2 1/8" Oil Pressure

All American™ Series

Tom Gale, formerly Chief Designer of the Daimler Chrysler Corporation, has led the Classic Instruments™ design team in the production of a beautiful new series. This new series incorporates the unique look of spun metal into a graceful All American® series. The instrumentation is delicately hand crafted with a raised "AAW" logo. This innovative design features curved glass, which flows into the smooth contour of a polished stainless radial bezel.

CIAW00SRC - 5 Gauge Set
5 Gauge Set: 3 3/8" Speedo & 2 1/8" Fuel, Oil, Temp, Volts

CIAW01SRC - 6 Gauge Set
6 Gauge Set: 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts

CIAW02SRC - 2 Gauge Set
2 Gauge Set: 3 3/8" Speedo, Quad

CIAW03SRC - 3 Gauge Set
3 Gauge Set: 3 3/8" Speedo, Tach, Quad

CIAW09SRC
2 1/8" Fuel 240-33 ohm

CIAW11SRC
2 1/8" Fuel 75-10 ohm

CIAW12SRC
2 1/8" Fuel 0-90 ohm

CIAW13SRC
2 1/8" Fuel 16-158 ohm

CIAW14SRC
2 1/8" Fuel 0-30 ohm

CIAW26SRC
2 1/8" Water Temp

CIAW30SRC
2 1/8" Volts

CIAW55SRC
3 3/8" Speedo 140 mph

CIAW70SRC
3 3/8" Tach 7,000 rpm

CIAW76SRC
3 3/8" Quad

CIAW81SRC
2 1/8" Oil Pressure

Nostalgia VT Gauge Series

A modern look back in time with the class and elegance you'd expect from Classic Instruments.

This series features a raised accent ring in the center complemented by the custom built, hand-made chrome pointer. Alternating diamond indices give this series a rich, classic feel. The beautiful color combination captivates a nostalgic, vintage finish on the series. This series comes with stainless high step bezels, curved glass, and is available in several combinations of instruments.

CINT00SHC - 5 Gauge Set
3 3/8" Speedo & 2 1/8" Fuel, Oil, Temp, Volts

CINT02SHC - 2 Gauge Set
3 3/8" Speedo, Quad

CINT03SHC - 3 Gauge Set
3 3/8" Speedo, Tach & Quad

CINT80SHC - Tachometer
3 3/8" 6,000 rpm tach

Esquire Series

Classic Instruments is pleased to announce the release of the Esquire Series. These new square gauges command respect and portray an image of stylish excellence. Featuring a custom machined aluminum bezel, glass lens, chromed pointer, laser etched numerals, a warm grey and cream on a spun aluminum dial face and warm LED lighting. Available individually or in a variety of set combinations that includes all necessary sending units.

- CIES00** - 5 Gauge Set
3 3/8" Speedo & 2 1/8" Fuel, Oil, Temp, Volts
- CIES02** - 2 Gauge Set
3 3/8" Speedo, Quad
- CIES03** - 3 Gauge Set
3 3/8" Speedo, Tach & Quad
- CIES80** - Tachometer
4" 8,000 rpm tach

Rocket Tachometer

The retro styled, half sweep tachometer features a dual layer design, color changing rocket booster, a red pointer, and a rich black face with bright white numerals and indices. Finished with a stainless low step bezel and flat glass the Rocket Tach comes mounted in a chrome cup that allows for a variety of mounting positions. Stock calibrated for eight cylinder engines the Rocket Tach can be special ordered for other configurations. Computer generated signals will require the use of an SN76 adaptor (not included). Great for completing that nostalgic look with the latest electronic technology, the Classic Instruments Rocket Tach is truly a blast from the past!

- CIRT80SLF** - Tachometer
3 3/8" 8,000 rpm tach

Tetra™ Series

This three gauge instrument cluster is a great solution for an all inclusive gauge package. Each kit comes complete with all the appropriate sending units and everything you need to install the set into your vehicle.

- CITE01BSLF** - 3 Gauge Set
3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CITE01GSLF** - 3 Gauge Set
3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CITE01TSLF** - 3 Gauge Set
3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CITE01WSLF** - 3 Gauge Set
3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp

Classic White™ Series

A favourite design that captures that elusive "Continental" flair of the 20's, this newest version of our original Classic Series (first conceived in 1975 and the design that started our company) retains the same stylish appeal. The Classic White Series offers a clean and elegant image for your restomod or classic truck.

- CIHRHC56SLF** - 5" Speedo 180 mph (reverse wind)

Velocity Series

Easy to read fonts, featuring drop shadow for legibility. Pointers bright orange for functionality and aesthetic appeal. Sets come complete with necessary sending units for installation.

- CIVS01WBLF - White 6 Gauge Set** 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts
- CIVS01BBLF - Black 6 Gauge Set** 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts

BelEra™ Package

The BelEra Package delivers twenty-first century accuracy and precision in an elegant design to compliment the classic lines of the 1955 and 1956 Chevrolet. The BelEra Package includes: An electronic 140 MPH speedo, 8,000 RPM tach, oil, volt, temp and fuel gauges, plus high beam and turn signal lights. A gear selection indicator insert for automatic or overdrive transmission is optional. Fits your stock gauge bezel.

- CIBE01B---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil
- CIBE01BB---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil
- CIBE01G---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil
- CIBE01T---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil
- CIBE01W---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil
- CIBE01WW---F - 6 Gauge Set** 6 Gauge Set: BelEra Package - 3 3/8" Speedo, 2 1/8" Fuel, Volt, Tach, Temp, Oil

Traditional™ Series

The Traditional Series reflects the simple yet decorative styling of the great performance cars of the past. Part numbers listed below have flat glass. For curved glass change the suffix from SLF to SLC.

- CITR00SLC - 5 Gauge Set** 3 3/8" Speedo & 2 1/8" Fuel, Oil, Temp, Volts Curved glass
- CITR00SLF - 5 Gauge Set** 3 3/8" Speedo & 2 1/8" Fuel, Oil, Temp, Volts Flat glass
- CITR01SLF - 6 Gauge Set** 6 Gauge Set: 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts
- CITR02SLF - 2 Gauge Set** 2 Gauge Set: 3 3/8" Speedo, Quad
- CITR03SLF - 3 Gauge Set** 3 Gauge Set: 3 3/8" Speedo, Tach, Quad
- CITR04SLF - 3 Gauge Set** 3 Gauge Set: 3 3/8" Speedo, 2 Duals
- CITR05SLF - 4 Gauge Set** 4 Gauge Set: 3 3/8" Speedo, Tach, 2 Duals
- CITR51SLF - 6 Gauge Set** 6 Gauge Set: 5" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts
- CITR52SLF - 2 Gauge Set** 2 Gauge Set: 5" Speedo, Quad
- CITR53SLF - 3 Gauge Set** 3 Gauge Set: 5" Speedo, Tach, Quad
- CITR54SLF - 5 Gauge Set** 5 Gauge Set: 5" Speedo, 2 1/8" Fuel, Oil, Temp, Volts
- CITR61SLF - 3 Gauge Set** 3 Gauge Set: 5" SpeedTachular & 2 - 3 3/8" Duals
- CITR62SLF - 2 Gauge Set** 2 Gauge Set: 5" SpeedTachular & 5" Quad
- CITR64SLF - 3 Gauge Set** 3 Gauge Set: 5" Speedo, 3 3/8" Dual (fuel, oil), 3 3/8" Dual (temp, volts)

57 Chevy Pod Cluster

This exclusive Gauge set is only available from Classic Instruments™. The '57 Chevy Pod Cluster is designed to fit easily into the stock pod cluster of a '57 Chevy. This Gauge set comes with an interface box to make installation and calibration easy and less time consuming. Gauge bezel shown in picture is not included. Matching electric clocks available separately.

- CICHO1BSLF - 3 Gauge Set - Black with White Lettering** 3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CICHO1GSLF - 3 Gauge Set - Grey with Red & White Lettering** 3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CICHO1TSLF - 3 Gauge Set - Tan with Brown Lettering** 3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp
- CICHO1WSLF - 3 Gauge Set - White with Black Lettering** 3 Gauge Set: Tetra Series - 5" Quad (Speedo, Tach, Oil, Volts) & 2 1/8" Fuel, Temp

CLASSIC INSTRUMENTS

CLASSIC INSTRUMENTS

Moal Series

We are proud to present some of the most unique gauge & bezel assemblies we have ever offered. Designed by renowned custom builder, Steve Moal to capture the look and feel of WWII era aircraft instruments which found their way into many post war hot rods and land speed contenders. Set includes 3" Speedo & Tach and 2" Oil, Fuel, Volts & Temp. Large Speedo bezel features LED turn signal and high beam indicator lights in "adjuster knobs". Bomber bezels sold Separately.

CIMA01BLF - 6 Gauge Set 6 Gauge Set: 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts
CIBZMA6GS - 6 Bezel Set 6 Bomber style bezels for use with Moal series 6 gauge set.

Vintage™ Series

The original Vintage Series offers you the elegance and detail of the golden age of motoring. This styling has been a favorite of Classic customers for over 20 years - and has been more widely copied than any other instrument design in history!

BOMBER BEZELS™

designed by Moal Coach Builders
 Accessorize your ride with the new trim bezel designed by Moal. Guaranteed to give you the Aviator look you've been searching for! The bezels are designed to fit any 2-1/8" or 3-3/4" Classic Instruments gauge. The large speedometer ring houses the turn signals and high-beam LED lights in the simulator adjustor knobs. All of the rings are powder coated in a durable matte black. They also have machine screws at each corner and carry the Classic Instruments five year warranty. Easily fits over any stainless low-step bezel.

Moal Bezels/Part CIBZMAGGS

B.O.G. (Big Ol' Gauge)

The BOG (Big Ol' Gauge) is an all-inclusive gauge package that includes an electronic programmable speedometer, tachometer, fuel level, volt, oil pressure, and coolant temperature gauges. The package is mounted into a custom machined, nickel-plated aluminum bezel and features a curved glass lens. Turn signal and high beam indicators come standard, built into the dial face. The BOG mounts into a 7 5/8" hole, so when size isn't an issue, go with the BOG! Comes with all necessary sending units and can be built to match your existing fuel sender if needed.

Speedometer,Tacho , Water Temp , Fuel,Volts , Oil Pressure

V8 Speedster Series

Tom Gale, formerly Chief Designer of the Daimler Chrysler Corporation, has led the Classic Instruments™ design team in the production of a beautiful new series. Designed with unique dial faces that are spun and engine turned aluminum. The pointers for this series is a new design and each pointer is chrome plated. The face has a trademarked chrome V8 emblem with significant American Hot Rod Heritage. Also, the light diffusers have laser etched indices lining up with the indices on the gauge faces.

- CIV8SR00SHC** 5 Gauge Set

- CIV8SR01SHC** 6 Gauge Set
3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts
- CIV8SR80SHC** 3 3/8" Tach 8,000 rpm

V8 Red Steelie

Classic Instruments™ design team introduces the Red Steelie gauge set and their first red faced gauge. Designed with unique dial faces that are spun aluminum. The pointers for this series is a new design and each pointer is chrome plated. The face has a trademarked chrome V8 emblem which signifies American Hot Rod Heritage. Also, the light diffusers have laser etched indices lining up with the indices on the gauge faces.

- CIV8RS80SHC** 3-3/8" Speedo

- CIV8RS01SHC** 6 Gauge Set: 3 3/8" Speedo, Tach & 2 1/8" Fuel, Oil, Temp, Volts

65-66 Mustang Package

We are proud to announce the 1965-66 Mustang gauge package. We have taken a five gauge set (Speedometer, Fuel 75-10 ohms range, Volts, Water Temp, and Oil Pressure), with the option of an added tachometer (Ultimate gauge), and combined it with mounting brackets for our gauges to fit into your Mustang housing. The mounting system is easy to install and will fit with most aftermarket bezels. Each gauge set comes with an easy to follow step-by-step instruction manual to wire in all your gauges.

- CIMU65GS00-C** 5 Gauge Set: G-Stock 3 3/8" Speedo & 2 1/8" Fuel, Volt, Temp, Oil
- CIMU65GS35-C** 5 Gauge Set: G-Stock 3 3/8" Ultimate Speedo & 2 1/8" Fuel, Volt, Temp, Oil

UNIVERSAL GEAR SHIFT SENSOR KIT

The GSS-3000 is a new generation of gear-shift position system from Dakota Digital. We've minimized the decoder (the brain of the system), and the new, smaller size with inboard terminals allows for easier installation. Able to be used with a Dakota Digital instrument system or on its own, this versatile unit can relay transmission gear position to a VFD, VHX, HDX or RTX instrument system, as well as the DGS-series of standalone indicators. • Built-in outputs for reverse lights (up to 15amps) and neutral safety switch (with supplied 30amp relay). • Easy setup and calibration. • User-calibrated for 2-4 forward gears plus Park, Reverse and Neutral. • Stainless steel mounting hardware included for a variety of transmissions.

DAKGS3-3000

GEAR SELECTOR INTERFACE MODULE

Know what gear you are in with Classic Instruments' new and improved gear selector sending unit kit. The kit includes a transmission mounted sensor and interface module that works with Classic Instruments gear selector gauges or individual LED indicator lights.

- Kit includes mounting hardware
- Works with most three and four speeds automatic transmissions
- Easy push-button calibration
- Also works as backup light trigger or neutral safety switch
- Works with Classic Instruments' gear selector gauges or individual LED indicator lights

CISN46

LED Shift Indicator Kits

If you already have a Lokar Shifter, or if you are in the market for a new shifter, you can have the best of both worlds; a Lokar shifter and its component LED Shift Indicator with your choice of dash or boot style. The LED shift indicator is completely compatible with many Lokar shifters, past and present. There are a variety of options that can be combined together to give you the exact features you desire. Features: • Exclusive removable pin locks position without adjustment on installation • Solid state circuit boards and state-of-the-art sensors • Long life LED • Displays only engaged gear • Billet Aluminum Indicator module and bezels • Versatile: Control Module compatible with most 12 volt LED Indicators

SHIFT LIGHTS

Adjustable Shift Lights

Proform's Adjustable RPM Shift Lights feature a graduated dial indicator to allow you to dial in your shift point without a tachometer. Range is 3000 to 12,000 rpm in 200 rpm increments. Does not require separately purchased RPM modules. Some applications may need a late-model tach adapter.

PR67005C

Adjustable Shift Light - Black

WIRELESS DIGITAL MINI SHIFT LIGHT

AND PORTABLE TACHOMETER COMBO

Proform's new Wireless Mini Digital Shift Light and Portable Tachometer can be easily installed in vehicles with 1-12 cylinders. The transmitter hooks up under the hood with just 3 wires, and sends a signal to the shift light which is inside the driver compartment.

- Only 4-1/4" long • Bright 3 LED light • All settings are easily controlled with two buttons • 100-12,000 RPM range in 100 RPM increments • Cylinder range of 1 thru 12
- Adjustable brightness for the digital display, and a display on/off feature when in use.

PR67006C

DIGITAL MINI SHIFT LIGHT AND DIAGNOSTIC TACHOMETER COMBO, 3-WIRE

Easy to set digital shift light will help you leave your competitor eating exhaust at the track! Proform's new Mini Digital Shift Light and Diagnostic Tachometer can be easily installed in vehicles with 1-12 cylinders. Measuring at only 4 1/4" long, this 3 LED light will give you the signal when it's time to shift!

- All settings are easily controlled with two buttons.
- 100-12,000 RPM range in 100 RPM increments
- Cylinder range of 1 thru 12
- Adjustable brightness for the digital display, and a display on/off feature when in

PR67007C

MSD Adjustable Intensity LED Shift Light

Pro Stock drivers were looking for a simple and small shift light that they could easily control the intensity of the LED. Easy enough. Here's the solution that plugs directly into our Programmable 7-Series Ignitions. MSD7542 Adjustable Intensity LED Shift Light

MSD DIGITAL SHIFT LIGHT

The most universal and easy to use shift light available! This new compact Digital Shift Light can be installed on everything from 1-cylinder points triggered engines to Modular Ford engines with coil-on-plug technology. The tiny digital controller inside the compact housing gives you the ability to program the rpm activation points through the easy to view LED panel and two programming buttons. When the engine reaches the activation rpm, the six red LEDs illuminate bright enough to alert your senses into throwing the shifter at the exact rpm. You can even program up to four different rpm values for different gears! (4 stage only). The DSL can be installed on single cylinder engines up through 12-cylinders on stock ignitions or high powered aftermarket systems.

NOTE: Supplied with the new GMR pickup. This makes installation even easier on diesels, points, coil-on-plug and most any other applications!

Digital Shift Light 4 Stage Programmable MSD8963
Digital Shift Light Single stage MSD89631

MSD SHIFT LIGHT

The MSD Shift Light will turn on to "remind" you to shift when the engine reaches your specified rpm. You select the rpm using the same plug-in modules that are used with your MSD Soft Touch Rev Control. The Shift Light features a bright cluster of LEDs (light emitting diode) making it easily visible, even in bright daylight. The light will also turn on for a second or two when the ignition switch is first turned on to inform you that the light is functioning properly. The Shift Light will work on 2, 4, 6 or 8-cylinder engines and will plug directly into the tach output on MSD 6, SCI, 7, 8 and 10 Series Ignitions or can be connected to the negative coil terminal when used with points or inductive type ignitions. The MSD Shift Light is 4.5" L x 3.5" H with a 1.5" diameter lens. (No rpm modules are supplied.)
Shift Light MSD8952
RPM Modules sold separately, please see ignition section for full range of modules available.

DIGITAL PRO SHIFT SYSTEM

Autometer's Digital Pro Shift System (DPSS) is an advanced shift light and tachometer with many exciting features. It is available in two styles: as a standard 2-1/16" gauge or the traditional tube style with a new, innovative swivel mounting system. A controller is also available for those who wish to add DPSS features to an existing shift light.

DPSS Level 1

The DPSS's digital RPM display provides highly accurate and precise readings so you get the perfect shift at the right RPM.

Features:

- Digital RPM Display
- Super Bright LED Shift Light
- Easy, 3 Button User Programmable Interface
- Single Programmable Shift Point

DPSS Level 2

The four programmable shift points allow you to set an entire cycle of gear changes. This feature allows you to keep your eyes on the road and still monitor your shift points. The LED lights will illuminate when you reach your shift point and flash when this RPM is exceeded.

The launch feature allows you to set a precise launch RPM from a dead stop.

Features:

- All Level 1 Features
- Four Programmable Shift Points and Launch Light
- Progressive Colour Change Shift Lights
- Custom Shift Light Colour

DPSS Level 3

Level 3 allows you to record and playback up to 80 seconds of RPM activity to analyse your shift points and improve consistency. Connect to any Autometer tachometer to turn it into a playback tach and view recorded data on the gauge face.

Features:

- All Level 1 & 2 Features
- 80 Second Playback

TUBE STYLE DPSS

The tube style DPSS is available in black or silver and features the unique AIM swivel mounting system that allows for left and right adjustments as well as angle adjustment in all directions.

Description	Level 1	Level 2	Level 3
Tube Style - Black	AU5343	AU5348	AU5350
Tube Style - Silver	AU5344	AU5349	AU5351

GAUGE STYLE DPSS

The gauge style DPSS is available in different series to complement your other Autometer gauges. It is a standard 2-1/16" gauge housing and works with Autometer cups and mounting accessories or can be dash mounted.

Description	Level 1	Level 2	Level 3
Cobalt Series	AU6187	AU6188	-
C2 Series	AU7187	AU7188	-
NV Series	AU7387	AU7388	-
Phantom Series	AU5787	AU5788	-
Sport Comp Series	AU3387	AU3388	AU3389
Ultra Light Series	AU4387	AU4388	AU4389

DPSS CONTROLLER

These controllers allow you to add DPSS functionality to your existing shift light. All of the DPSS features are available except for the custom shift light colours. Level three will also connect to any Autometer tachometer to turn it into a playback tach.

Description	Level 1	Level 2	Level 3
DPSS Controller	AU5312	AU5313	AU5314

Quick-Lite Shift-Lites

LED Shift-Lite is a replacement option for Auto Meter tachometers with the larger size light. Can also be used as a shift-light when used with the Auto Meter DPSS controller or other RPM trigger.

- AU5330 Quick-Lite Shift-Lite (Black)
- AU5331 Quick-Lite Shift-Lite (Silver)
- AU5329 Quick-Lite Shift-Lite (Chrome)

Shift-Lite

- As found on the Auto Meter Monster Tachs
- AU5334 Shift-Lite (Black) Yellow lens & Boot
- AU5335 Shift-Lite (Silver) Yellow lens & Boot

Auto Meter Pro Shift-Lite

The Pro-Shift is an independently operating shift light with advanced microcircuitry. The shift-point is selected by inserting a precisely calibrated RPM module.

The amber light activates when the engine reaches the chosen RPM. Suits points or electronic ignitions. A variety of clearly marked RPM module pills are available. Different coloured lenses and night covers are also available.

AU5340 Pro Shift-Lite (4,6 Or 8 Cyl.)

RPM Pill Kits

For use with the Pro Shift-Lite or RPM activated module. Each kit includes 5 calibrated module pills in 200 RPM increments.

AU5353	RPM Pill Kit (3000, 3200, 3400, 3600, 3800 rpm)
AU5354	RPM Pill Kit (4000, 4200, 4400, 4600, 4800 rpm)
AU5355	RPM Pill Kit (5000, 5200, 5400, 5600, 5800 rpm)
AU5366	RPM Pill Kit (5600, 5800, 6000, 6200, 6400 rpm)
AU5356	RPM Pill Kit (6000, 6200, 6400, 6600, 6800 rpm)
AU5367	RPM Pill Kit (6600, 6800, 7000, 7200, 7400 rpm)
AU5357	RPM Pill Kit (7000, 7200, 7400, 7600, 7800 rpm)
AU5368	RPM Pill Kit (7600, 7800, 8000, 8200, 8400 rpm)
AU5358	RPM Pill Kit (8000, 8200, 8400, 8600, 8800 rpm)
AU5359	RPM Pill Kit (9000, 9200, 9400, 9600, 9800 rpm)
AU5360	RPM Pill Kit (10000, 10200, 10400, 10600, 10800 rpm)

Super-Lite Shift Light

For the ultimate in shift light technology, check out the new Super-Lite.

This new super bright light has 12 LEDs for high intensity shift alerts; no missing this Shift Light! A three position brightness switch allows you to adjust for day or night racing. This shift light replaces any existing Auto Meter Shift Lite or can be used with DPSS Controller.

- AU5332 12 LED Shift-Lite (Black)
- AU5333 12 LED Shift-Lite (Silver)

WARNING & DASH LIGHTS

LOW OIL PRESSURE WARNING LIGHT

Quick-response switch immediately alerts the racer to a low oil pressure condition. Switch is adjustable to illuminate when pressure falls below 15 to 50 psi. Extra large 2-1/2" diameter Lexan lens is impossible to ignore. Light assembly is rubber-mounted to protect against shock.

Description	Part No.
Low Oil Pressure Warning Light Kit	MO49500
Replacement Oil Pressure Switch	MO97015

Mini Pro-Lite Warning Light

Light-weight aluminium mini light operates the same as a 3240 Pro-Lite by giving you unmistakable warning in the midst of racing action. A bright red incandescent bulb attracts immediate attention (night cover included). 12 Volt power & sender required. Sender options below.

- AU3238 Mini Pro-Lite Warning Light Ultra Lite (Silver)
- AU3239 Mini Pro-Lite Warning Light (Black)
- AU3254 Mini Pro-Lite Warning Cover Kit. Includes blue, yellow and red boots

Warning Light Senders

- AU3241 Pressure Sender 18PSI.
- AU3242 Pressure Sender 30PSI
- AU3243 Pressure Sender 50PSI
- AU3246 Temp Sender 200 degF
- AU3247 Temp Sender 220 degF
- AU3248 Temp Sender 275 degF

Pro-Lite

Warning Light

The original Pro-Lite warning light gives you unmistakable warning in the midst of racing action when there's little time to monitor gauges. It is recommended that the Pro-Lite be used in conjunction with gauge to give first alert to problems.

- AU3240 Pro-Lite Includes red lens & night cover, sender req.
- AU3250 Blue Lens Kit (Inc. Lens & night cover)
- AU3251 Yellow Lens Kit (Inc. Lens & night cover)
- AU3252 Red Lens Kit (Inc. Lens & night cover)

Indicator Lights

Painless Indicator Lights

These lights have multiple applications. They can be used as indicator lights, warning light or even as shift lights. Available in three sizes.

Indicator Lights 5/16"

- PW80203 5/16" Indicator Light - Amber
- PW80204 5/16" Indicator Light - Red
- PW80205 5/16" Indicator Light - Green
- PW80206 5/16" Indicator Light - Blue

Pilot / Dash Lamps

- AF30-2207 7 Bar (100 PSI) (white face, black pointer)

INLINE BARB WITH 1/8" NPT PORT

These AeroFlow Billet fuel pressure gauge adapters are ideal for adding a fuel pressure gauge to your fuel system. Made from lightweight aluminium and tapped 1/8" NPT for your fuel gauge they are available in sizes 5/16" barb and 3/8" barb

Barb	Blue	Black	Silver
5/16"	AF138-05	AF138-05BLK	AF138-05S
3/8"	AF138-06	AF138-06BLK	AF138-06S

MAGNAFUEL

FUEL PRESSURE GAUGE

Accurate pressure readings are critical for proper calibration. MagnaFuel supplies 1 1/2" diameter gauges. These are the right tools for the job.

1-1/2" Fuel Pressure Gauge 0-15 PSI	WIMP0101
1-1/2" Fuel Pressure Gauge 0-60 PSI	WIMP0102

AEROMOTIVE FUEL PRESSURE GAUGE

- Fuel Pressure Gauge
- 1.5" Diameter
- 0-15 PSI Or 0-100 PSI
- Liquid Filled
- Includes integral pressure relief valve.
- 0-15 psi Fuel Pressure gauge ARO15632
- 0-100 psi Fuel Pressure gauge ARO15633

CLAY SMITH LIQUID FILLED PRESSURE GAUGE 0-15 PSI

Liquid filled 0-15psi fuel pressure gauge, 1-1/2 O.D with 1/8" NPT thread
MNCSPG15LFBK Black Face
MNCSPG15LFWH White Face

MR Gasket Fuel Pressure Gauges

Ideal for in-line hook up of fuel pressure almost anywhere. This gold anodised aluminium fuel block has 3/8" inlet and outlet. It comes complete with a 1-1/2" diameter gauge with 1/2lb increments and a range of 0-15lbs.

MG1560 Fuel Block with Pressure Gauge

This conveniently small 1-1/2" gauge will fit almost anywhere. The gauge has 1/2 lb. increments with a range of 0-15 lbs. and has a 1/48" NPT male fitting.

MG1561 Fuel Pressure Gauge

Holley

Fuel Pressure Gauges

MOON DIRECT MOUNT PRESSURE GAUGE 0-60 LBS

MNMPG115LF 0-60 Lbs

MNMPG110LF 0-15 Lbs

LIQUID FILLED. Another mini type gauge for application right at the source of pressure. Can be used as fuel or oil pressure gauge. Mechanical movement with a chrome bezel. 1-1/2" diameter with a 1/8" NPT connection.

PRESSURE GAUGES WITH ENGINE-TURNED FACIA 0-15 lbs

MNMPG210LF 0 - 15lbs

MNMPG215LF 0 - 60lbs

PRESSURE GAUGES WITH ENGINE-TURNED FACIA

NITROUS GAUGES

AEROFLOW Nitrous Pressure Gauge

Measures from 0-1500 PSI and is essential in monitoring the pressure in the bottle for optimal performance. It is recommended to keep the pressure between 900-950 psi which is indicated in green on the gauge to allow ease of tuning the nitrous system. It may be fitted to the bottle or just in front of the nitrous solenoid with a 1/8 NPT male fitting attached the back of the gauge. With this liquid-filled gauge it provides protection against vibrational dampening to allow more accurate readings.
AF30-2215

NOS

NOS Fuel Pressure Gauges

They include both standard and glycerin-filled gauges (1-1/2" diameter) plus, large 2-5/8" gauges in many colors.

Fuel pressure gauges measure from 0-15 psi and are intended for use with carburetor plate and direct port nitrous systems. Gauges equipped with an isolator for in-cockpit installations are available, as are glycerin-filled gauges (1-1/2" only) that provide more accurate and uniform readings through dampening vibration.

NOS15900 1-1/2" Dia Standard 0-15 lb. Fuel Pressure Gauge

NOS15902 2-5/8" Dia Standard 0-15 lb. Fuel Pressure Gauge

Fuel Pressure Gauges for EFI Applications

Designed specifically for use with NOS EFI nitrous systems where much higher fuel pressures are used. Accurate from 0 to 120 psi. A glycerin filled version is available to provide vibration dampening and allow a more accurate and uniform reading.

15906NOS 1-1/2" dia 0 to 120 psi Fuel Press Gauge for EFI

NOS

Nitrous Pressure Gauges

The NOS Nitrous Pressure Gauge measures from 0 - 1500 psi (although the recommended level is 900-950 psi) and is essential in monitoring the bottle. Available in "standard" and glycerin-filled models designed to withstand engine vibration, etc.

NOS15910 1-1/2" dia 0-1500 PSI with -4AN adapter

NOS15911 2-5/8" dia 0-1500 PSI Blue face

NOS15912 1-1/2" dia 0-1500 PSI with -6AN adapt

NOS

Racer's Nitrous and

Fuel Pressure Gauges

Designed with the professional in mind, these gauge kits are engineered with greater accuracy and convenience. Each gauge includes a Schrader valve fitting for quick and accurate pressure checks to help maximize your performance run after run. Also features a 1' steel braided hose extension for extra convenience. Fuel pressure gauge measures from 0-30 psi while the nitrous gauge measures from 0-1500 psi.

15930NOS (Fuel)

15931NOS (Nitrous)

VACUUM GAUGES

Vacuum Gauge

2" Diameter 0-30 in. Hg vacuum gauge with chromed steel case and 1/8" NPT brass fitting. Includes adapter to attach to vacuum hose.

H026-501 0-30 in. Hg Vacuum Gauge

VACUUM GAUGE

- Used to determine vacuum in your engine
- Will fit any 1/8" NPT thread
- Excellent vibration and shock resistance
- M089610** - Vacuum Gauge, 1.5" Diameter, 0-30" Hg

TYRE GAUGES

MOROSO

DIGITAL TYRE PRESSURE GAUGE BACK LIT

- 2-5/8" dia. gauge face
- Accurate within .005%
- Reads to .1 psi
- Can be adjusted to read in BAR
- Auto-Off feature to increase battery life
- Battery level on gauge face
- Includes 9V battery which is easy to change
- Includes rubber gauge cover
- 16" hose with finger operated air-bleed valve allows you to release pressure quickly
- Hose has easy grip angle chuck end
- M089574** - Digital Tyre Pressure Back Lit Gauge, 0-15 psi

Auto Meter

Auto Meter Tyre Pressure Gauge

The 60psi gauge retains the last measurement until pressure is released. Patented design assures accuracy and durability, while a large dial and angled chuck enable easy measuring.

AU2343 Tyre Pressure Gauge 60psi (Mechanical)

MR. GASKET CO

Pro Tyre Pressure Gauge

Mr. Gasket Pro, tyre pressure gauges are developed for professional race or high performance street cars high quality and accuracy within 1% are mandatory. The large, four inch diameter stainless steel case protects the brass bourdon tube mechanism, which insures repeatability. Easy-to-read gauge face on 0-15 psi gauges is calibrated in 3lb. increments. The 15 inch hose is ideal for big offset racing wheels, and built-in plastic hand grip, air bleed valve, and swivel chuck make it easy to adjust tire pressure quickly!

MGP7200 Tyre Pressure Gauge 0-15 lb.

MOROSO

Lighted Tyre Pressure Gauges

Accuracy 2-1/2%
 • Longer, 15-1/2" hose is ideal for use with deep-dish wheels
 • Lighted Tyre Pressure Gauges using (EL) lighting technology
 • A momentary switch, built into the side of the gauge, activates the light when pressed
 • Includes standard -size 9V battery, which is easy to change and provides long-life power source
 • Protective rubber cover, molded around the switch and battery, isolates the gauge from shock when dropped or struck
 • Pressure release valve and hardened steel swivel chuck for extended life
 • Includes rugged, polyethylene carrying case with open-cell foam padding to protect gauge during transportation and storage

- MO89582** Lighted Tyre Pressure Gauge, dial type, 0-15 psi
MO89583 Lighted Tyre Pressure Gauge, dial type, 0-60 psi

Tyre Pressure Gauge Cover

Protective rubber cover insures long service and continued accuracy of Moroso 2-5/8" Tyre Pressure Gauges. Specially designed ribs on the inside and outside of the cover provide superior protection when the gauge is dropped or struck. A test for anyone who uses Moroso gauges (Nos. 89550, 89560, 89570 & 89580), or other 2-5/8" o.d. x 1-1/8" gauges
 Note: Not required for Moroso's Lighted Tyre Pressure Gauges. Will not fit Pro Series tyre gauges.

- MO89590** Tyre Pressure Gauge Cover

MOROSO Digital Tyre Pressure Gauges

High quality digital gauge with auto-off feature after 20 minutes. Gauge face has a 2" wide display window which reads to hundredths. Individually calibrated for full scale accuracy. Features a low battery indicator. Readout displays in multiple scales (PSI, Bar, Pascal, HG)
 Comes with foam-lined storage case. Overpressure indicator. Includes standard-size 9V battery, which is easy to change and provides long-life power source. 16" hose with a finger operated air-bleed valve allows you to release pressure quickly.
 Hose has easy grip angle chuck end.

- MO89540** Digital Tyre Pressure Gauge, 4 digit readout, 0-15 psi, (accurate within -0.15 lb.), 2-5/8" dia. gauge

MOROSO Pro Series Tyre Pressure Gauges

Premium high-quality instruments with brass internals and Bourdon Tube Pressure Element provide full-range accuracy to within 1/2%. Extra-large 4" diameter face and knife-edge pointer eliminate human error. Adjustable pointer can be calibrated at the race track. Fiberglass-reinforced thermoplastic housing withstands harsh racing environments. Long 16" hose with pressure release valve and hardened steel swivel chuck is perfect for getting into deep-dish wheels. Rugged polyethylene plastic carrying case is lined with a medium-density, open-cell foam insert to keep gauge protected during transportation and storage.

- MO89552** 0-15 psi.
 Major increments at 3 psi with minor increments at 0.1 psi

MOROSO Tyre Pressure Gauges

Individually calibrated for accuracy within 2%. The large 2-5/8" dia. dial face is easy to read, while the hardened swivel chuck rotates 360° for positive valve stem attachment. 15-1/2" hose with a finger operated air-bleed valve allows you to release pressure quickly

- MO89550** Tyre Pressure Gauge, dial type, 0-15 psi
MO89555 Radial Tyre Pressure Gauge, dial type, 0-40 psi

MOROSO Flutter Guard Tyre Gauge

Individually calibrated for accuracy within 1% of the full scale. Moroso's vibration controlled dial mechanism design keeps an accurate reading under most conditions. Manufactured with stainless steel bourdon tube, movement and case. Large 2 and five-eighths inch dia. dial face is easy to read, while the hardened swivel check rotates 360 degrees for positive valve stem attachment. 15 and one-half inch hose with a finger operated air-bleed valve allows you to release pressure quickly.

- MO89581** Flutter Guard Tyre Gauge, dial type, 0-15 psi.

Proform Tyre Pressure Gauges

Don't let a little tyre pressure change affect you on race day! Quickly and easily gauge tyre pressure with PROFORM's easy-to-use, hose-equipped tyre pressure gauges. 1 1/2" diameter face and heavy-duty shatterproof glass make this tool a must have for every tool box.

- PR67403** Tyre Pressure Gauge 0 - 60 lbs.
PR67404 Tyre Pressure Gauge 0 - 15 lbs.

Pro-Comp Tyre Pressure Gauge

Having an exact measurement of your tyre pressure is oftentimes the difference between lighting up the win lights and blowing your tires off at the line. Auto Meter's professional grade digital tyre pressure gauge provides the most accurate measurement available in a durable package designed for the rigors of life at the track.
 • 0-15, 0-60, 0-40, 0-100 PSI Range
 • Accuracy: 2.5% FS
 • Large 2.25" dial face for easy viewing
 • Sure grip rubber shock isolation boot
 • 13.75" Stainless braided line
 • Angled chuck enables easy measuring
 • Mechanical pressure release valve
 • Rugged carrying case
 • Shock dampening easy-grip housing

- AU2159** 0-15 PSI (Mechanical)
AU2160 0-60 PSI (Mechanical)
AU2162 0-40 PSI (Mechanical)
AU2164 0-100 PSI (Mechanical)

HOONIGAN Tyre Pressure Gauge

At Hoonigan, we have a penchant for killing tires. We are constantly dialling in air pressure for optimal tire destruction and, luckily, Autometer came through to help us out! - The Hoonigans When the master tire slayers from the Donut Garage approached the gauge experts at AutoMeter for assistance in developing an instrument to fine tune their petrol-fuelled exploits, we were only too happy to oblige.

- 60 PSI gauge with Hoonigan stamp signature dial design
 • Accuracy: 2.5% FS
 • Large 2.25" dial face for easy viewing
 • Shock dampening easy-grip housing
 • 13.75" Stainless braided line
 • Includes protective case

- AU2160-09000** 0-60 PSI (Mechanical)

GAUGE ACCESSORIES

PRESSURE SENSOR BLOCK

The AeroFlow Performance pressure sensor block is a must to protect your transducers from harsh engine vibrations, shock loads and heat leading to premature failure to the sensitive internals of the modern day pressure sensor when mounting directly to engine blocks. To prolong the life and reliability remote mounting these sensitive pressure sensors is recommended to improve service life and reliability. This block allow you to remote mount up to 3 sensors with 3 x 1/8" NPT and 10 x 1/8" NPT for input line configurations. This make it perfect to improve engine bay organization by neatening up wiring, plumbing and bringing all the sensors to one location for easy maintenance. Compatible with all transducers that utilize 1/8 NPT male threads and 7/8" or smaller body/hex diameter.

- The kit includes: 1x 3 Port Sensor Block, 3x 1/8" NPT Plugs, 2x M6 Stainless Steel Bolts, 2x M6 Stainless Steel Washers, 2x M6 Stainless Steel Nylon Nuts. Mounting hole spacing: 35mm
 Total length 105mm (4-9/16")
 Total width 31mm (1-1/8")
 Height 25mm (63/64)
AF456-03BLK Black
AF456-03S Silver

TEMPERATURE SENSOR

The AeroFlow Performance temperature sensor is a Negative Temperature Coefficient (NTC) thermistor sensor. The NTC is a passive resistor, and the resistance of an NTC varies with temperature. More specifically, as the ambient temperature around an NTC increases, the resistance of the NTC decreases. This sensor is fully calibrated for high accuracy and designed for high stability across the temperature range. It includes the plug and pins to easily wire into any application.

- This sensor has a 1/8" NPT thread
 • The sensor body material is Brass
 • Overall length is 51.70mm (2-1/32")
 • Depth of sensor is 22.20mm (7/8")
 • Operating temperature range is -20 to 150°C (-20 to 302°F)
 • Supply working voltage is 5 volts
 • Response working time is 10 milliseconds

- AF49-1550**

UNIVERSAL GAUGE WIRE HARNESS

Ready to upgrade the instrumentation in your hot rod, but finding the wiring a bit daunting? AutoMeter has you covered with their Universal Gauge Wire Harness. Pre-terminated and colour coded with detailed installation instructions, this product provides everything you need to wire a standard 5 or 6 instrument set, including turn signal and high beam LEDs!
 • Accommodates 5 or 6 gauge installations consisting of any AutoMeter In-Dash Tachometer, Speedometer, and four short sweep electric, air-core gauges (Fuel Level, Oil Pressure, Water Temperature, and Voltmeter)
 • Colour coded and pre-terminated for simplified installation.
 • Includes: Main Wire Harness (gauge side and vehicle side with pre-terminated multi-pin separation connectors), Lighting Ground Wire Harness, 8 butt connectors, 8 crimp connectors, 2 green turn signal LEDs, 1 amber high beam LED, 1 red brake or check engine LED.
 • Not intended for use with the following AutoMeter gauge types: Digital Stepper Motor, Digital Display, Dual Gauge, Mechanical, Quad Gauge, or Tach/Speedo Combo.

- Universal 5 or 6 Gauge Harness**

- AU2198**

GPS SPEEDOMETER INTERFACE

Tickets are no fun. Calibrating a speedometer isn't a great deal of fun either. AutoMeter's GPS Speedometer Interface is the no fuss solution to complete your speedometer installation. Ideal for off-road applications with large wheel and tire combinations, racing gearboxes, and applications where packaging considerations prevent conventional speed sensor or cable installations.

- Plug and Play with AutoMeter Electronic Programmable Speedometers.
 • Lightning quick 10 Hz signal update rate is the fastest available.
 • Fully sealed and paintable magnetic micro antenna (Dimensions: 1.472 in. x 1.339 in. x 0.508 in.). Includes 16 ft. of wiring for plenty of mounting versatility.
 • GPS module is fully sealed against water and dust. Includes 6.5 ft. wiring harness. Case Dimensions: 3 in. (6 in. w/ wiring & connectors) x 2.5 in. (4 in. w/ mounting tabs) x 1 in.
 • One touch calibration process takes only seconds for most other electronic speedometers.

- AU5289**

FUEL BRIDGE

The Fuel Bridge wires in between your fuel level gauge and sending unit and allows you to use any AutoMeter fuel level gauge with any stock or aftermarket sending unit. The triple push button with LED display allows for easy set up. This unit is a compact size at 3 1/8" wide x 2 1/2" tall x 3/4" thick. A low fuel level warning is available at 10% and off at 15%. It can turn on an LED or relay.

- Allows you to use any AutoMeter fuel level gauge with any stock or aftermarket fuel sending unit
 • Three push buttons with LED display for easy set up
 • Low fuel level warning at 10% and off at 15% with ability to trigger LED or relay
 • 8 pre-programmed resistance ranges for popular fuel level sending units
 • Configurable option with linear adjustments at 5 points (F, 3/4, 1/2, 1/4, & E) anywhere between 0-1000 or 1000-0 ohms
 • Compact size - 3" x 2-1/2" x 3/4"
 • Pre-programmed for the following: 240/33, 0/90, 0/30, 16/158, 73/10 (linear and non-linear), 10/180, 40/250

AU3299 Connector, Wiring, 8 Terminal
(For Elec. In-Dash Tach or Speedometer)

LS SERIES TACHO PLUG & PLAY HARNESS

If you've tried to get your tach to function after an LS swap, you know that it isn't always a simple procedure. Save time, frustration and don't make a single cut in your factory wiring with Auto Meter's Plug and Play LS Tach Harness. This Plug and Play solution lets you quickly and easily install the Auto Meter 9117 Tach Adapter onto your LS-derived engine. OEM spec connectors and wiring assure a hassle free installation that takes minutes rather than hours. No splicing, cutting or risks of voiding your vehicle's warranty. It's completely reversible and couldn't be easier. Get the best possible results in the least amount of time with the solution guaranteed to work right, the first time.

- Includes Auto Meter 9117 tach adapter
- The complete plug and play solution
- Does not alter factory wiring
- Plugs into factory ignition coil connectors
- 3ft harness length
- Sealed connector plug in to Auto Meter 9117 Tach Adapter

AU9123 LS Plug & Play Harness With Tach Adapter

Low Pressure Gauge Isolator

Fuel press isolator kit for 15 psi gauges, red anodized aluminium, -4an fittings
AU5376

DIESEL TACH ADAPTER

The modern electronic tachometer typically requires an ignition system to read. This has made hooking up a tach to a diesel engine a bit of a challenge, due to the lack of any sort of ignition. Solutions up to this point have been complicated and temperamental. AutoMeter's new Diesel Tach Adapter makes the process incredibly easy and affordable. Simply attach the included pickup to the outside of the alternator and calibrate with the push-button module. You can drive any AutoMeter tachometer with no fuss (including our new line of low rev tachs that are perfect for low rpm diesel applications). It will work just about any engine with a crank driven alternator, so you're not limited to just diesel applications.
AU9112

Pro-Control

Can be used as a rev-limiter, air shift activator or nitrous trigger. As a rev limiter it guards against over-revving by allowing 100% power until reaching the pre-set RPM level. Models without reset button interrupt ignition power for a fraction of a second. Models with reset button are for supercharged engines. Reset unit shuts off engine completely.

AU5301	For Standard/Electronic Ignition
AU5302	For Vertex Magneto OAC & MSD Pro Mag Ignition
AU5306	For Vertex Magneto OXC or Super Mag Ign (Shutdown model)

*These models include a By Pass Delay to prevent activation of nitrous at the drag race starting line. Allows full power despite RPM being higher than dialed in on the Pro-Control.

Signal Converters

AU9118	Magneto Signal Converter (Allows any AutoMeter tach, Pro-shift lite or RPM activated module to be used on most magneto applications)
AU9117	Tach Adapter (Allows any AutoMeter tach, Pro-shift lite or RPM activated module to be used on distributorless ignition)

Dimmer Switch

Allows for isolated dimming of LED through the dial lit gauges separate from OEM dash. Compatible with all LED lit instruments.
AU9114

AU3229	Braided Stainless Steel Line 4ft. #4, 3/16ID, for use with mechanical pressure gauges and fuel pressure gauges.
AU3234	Braided Stainless Steel Line 3ft. #3, 3/16ID, for use with mechanical pressure gauges and fuel pressure gauges.
AU3235	Braided Stainless Steel Line 4ft. #3, 3/16ID, for use with mechanical pressure gauges and fuel pressure gauges.
AU3236	Braided Stainless Steel Line 6ft. #3, 3/16ID, for use with mechanical pressure gauges and fuel pressure gauges.

Aeroflow Oil Pressure Gauge Adapters

These adapters allow you to add an electric oil pressure gauge while still retaining the stock warning light or gauge. The adapters are 2-1/2" long and fit inline between the engine and the stock oil pressure switch and have a 1/8"-27 NPT port on the side to suit the aftermarket pressure sender.

Description	Part No.
1/8"-27 NPT	AFGA-31
1/4"-18 NPT	AFGA-32
1/8" BSP	AFGA-33
M10 x 1	AFGA-34
M14 x1.5	AFGA-35
M16 x1.5	AFGA-36
M18 x1.5	AFGA-37
Ford 260, 289,302 & 351W	AFGA-38

RADIATOR HOSE GAUGE ADAPTERS

Aeroflow's new Billet Hose Adapters with 1/8" NPT Auxiliary Port are perfect for mounting gauge senders to monitor radiator temperatures. These are perfect to slip between radiator hoses and enable you to mount a sender effortlessly.

Part No	Colour	Description
AF64-2232	Black	1-1/4" 32mm OD adapter with 1/8" port
AF64-2234	Black	1-11/32" 34mm OD adapter with 1/8" port

DASH KNOBS

Roadster Supply Dash Knobs

- A: S0001-50405** Art Deco knob—polished
- B: S0001-62118** Art Deco knob—black
- C: S0001-50400** Speed-style knob
- D: S0001-50425** Forty-style knob—polished
- E: S0001-50426** Forty-style knob—black
- F: S0001-50440** Shoebox-style knob
- G: S0001-50433** Bullet-style knob

Add some shine to the interior of your hot rod, custom, truck, VW or whatever with these Roadster Supply dash knobs. Machined from aluminum and highly polished, they're easily installed and held in place with a set screw. Heck we've even used them, especially the Art Deco and Forty knobs, as draw knobs on our cupboards and kitchen units. The Art Deco and Forty knobs are particularly great for period restorations.

Clayton Machine Works Dash Knobs

Designed by Paul Atkins these chrome plated dash knobs come in smooth or grooved design and measure 7/8" diameter

Chrome Dash Knob - Smooth CLA-DK802
Chrome Dash Knob - Grooved CLA-DK803

Polished Dash Knobs

Part No
AF49-2005

Description
 Number plate bolts with built in LED lights

**SO-CAL Speed Shop Art
Deco License Plate Light**

The SO-CAL Art Deco License Plate Light is fashioned after automotive designs of the late 30's and '40's. It's beautifully die-cast and features luxurious chrome plating. The flush design requires two 3/16" dia. mounting holes and a 7/8" dia. hole for the light receptacle. Includes; light bulb, pig-tail socket, mounting hardware and neoprene gasket.

**LICENSE PLATE
BRACKET (SS);**

FITS - 1932-64 PICKUP

At 65 miles an hour (or more) a lot of pressure is exerted on these brackets as there is nothing aerodynamic about a license plate. That's why we stamp ours from heavy gauge steel. They're built tough and can take a 65 mph breeze with gusts up to 100 mph. Dimensionally they are identical to original and are ready to bolt on. You are guaranteed a high-quality, and long lasting product.
Polished Stainless Steel.

VIA-13000-AQSTS Quartz halogen 12volt with turn signal installed

1930-31 STAINLESS STEEL HEADLAMPS

Show quality stainless head lamps. Licenced by Ford Motor Company as an official Licenced restoration Product. These headlamps feature 8-1/2" diameter brass chrome plated reflectors, bulbs, correct glass lenses, lens gaskets, wiring, mounting nuts and a super bright polish. Boxed complete pairs. Quartz halogen headlamps have 12 volt halogen bulbs installed. 6 volt halogen bulbs may be ordered seperately & installed by the customer.

1930-31 Head Lamps

VIA-13000-BQS Quartz halogen 12 volt
VIA-13000-BQSTS Quartz halogen 12 volt with turn signal installed

1932 STAINLESS STEEL HEADLAMPS

Show quality stainless head lamps. Lenses and the top of the headlamp housing have the Ford script logo as the original, and are licenced by Ford Motor Company as an official licensed restoration product. These headlamps feature 9-1/4" diameter brass chrome plated reflectors, bulbs, correct glass lenses, lens gaskets, wiring, mounting nuts and a super bright polish. Boxed complete in pairs. All stock one bulb & two bulb headlamps are supplied with 6 volt bulbs installed. Quartz halogen headlamps have 12 volt halogen bulbs installed. 6 volt halogen bulbs may be ordered seperately & installed by the customer.

1932 Head Lamps

VIB-13000-QS Quartz halogen 12 volt

VIB-13000-QSTS

Quartz halogen 12 volt with turn signal installed

1932 Original Style Headlights

Highly polished stainless steel, with Drake's Super Halogen Reflector System. Sold as pairs.

1932 Original Style Headlights (Pair)
BDB-13000

1933/34 STAINLESS STEEL HEADLAMPS

Show quality stainless head lamps. Lenses and the top of the headlamp housing have the Ford script logo as the original, and are licenced by Ford Motor Company as an official licensed restoration product. These headlamps feature 8-7/8" diameter brass chrome plated reflectors, bulbs, correct glass lenses, lens gaskets, wiring, mounting nuts and a super bright polish. Boxed complete in pairs. All stock one bulb & two bulb headlamps are supplied with 6 volt bulbs installed. Quartz halogen headlamps have 12 volt halogen bulbs installed. 6 volt halogen bulbs may be ordered seperately & installed by the customer.

1933/34 Headlamps

VI40-13000-QS Quartz halogen 12 volt

VI40-13000-QSTS

1932-48 Ford Cars & 32-47 Quartz Halogen Kit 12V

Each style features our modern reflectors, carefully designed by our optical engineers to correctly project modern Halogen candle power through original-style glass lenses. This produces a super bright light beam that shines where you need it without sacrificing the original headlight appearance. These kits offer the brightest, safest lighting ever available. Comes complete with everything you need for both headlights including reflectors, bulbs (Hi & Lo-Beams), wiring, lens gaskets, hardware and instructions. Reflector outside diameter: 6 7/8in.

VI78-13027-QK12

1932 Quartz H4 Adapter Kit

This kit gives you everything in the picture. It comes with bulbs, sockets, reflectors, and gaskets for both headlights. Installs easily in any model A headlight.

VI8-13027-QK12

QUARTZ HALOGEN REFLECTOR KIT

Die stamped brass, chrome plated. Available with and without turn signal.
VI4813027QK12
 1935/36 pass & 35/39 pickup

VI4813027QK12TS

1935/36 pass & 35/39 pickup with turn signal bulb

HEADLAMP TURN SIGNAL KIT

These kits will install a turn signal bulb inside the headlamp lens. Kit includes 2 x turn signal sockets with wires, 2 x amber 12 volt turn signal bulbs & instructions.

VI8-13026-TS12

1928/39 pass & pickup drill reflector mount

Customer must drill or punch 3/4" dia hole in reflector to mount these sockets.

VI78-13026-TS12

1937/40 pass & 40/41 pickup

Upper headlamp bucket mount.

Amber Bulb for Turn Signal

12 volt duo filament for turn signal
VI11A-13465-A12V

HEADLIGHT LENS RETAINER CLIPS

Fits 1935-36 Car & 1935-39 Pickup (Set of 6)
VI48-13061-S

COWL LAMPS

1933/34 Deluxe Cowl Lamps

Show quality cowl lamps complete with stainless steel housings and rims, die cast chrome arms, correct glass lens, reflectors, bulbs, wiring and nuts. 12volt bulbs are installed.

VI40-13302 Original reflectors installed
VI40-13302-TS Turn signal installed

1932 Deluxe Cowl Lamps

Show quality cowl lamps complete with stainless steel housings and rims, die cast chrome arms, correct glass lens, reflectors, bulbs, wiring and nuts. 12 volt bulbs are installed. 6 volt bulbs may be ordered separately.

VI8-13302 Original reflectors installed
VI8-13302-TS Turn Signal kit installed

Dummy Spotlight

Well proportioned spot light features a sleek design and has a fully adjustable head. Complete with mounting brackets. 5" lens. Fits lefthand or righthand side of car
UP30648 Chrome plated dummy spotlight

HEAD LIGHT LOOMS

Anchor-tight® headlight Braid

for "U-Cut-to-Fit", non-kinking stainless steel headlight braid. Designed with threaded steel stud, insuring that you won't experience any of the typical separation between braid and fitting that shows unsightly wires out in the open. Pull, tug or bump your headlight braid and it will stay in place, leaving you with protected wires and a clean set up. Kit complete with two 12" flexible braided stainless steel Teflon lined housings, threaded STEEL studs, aluminum fittings, aluminum grill shell washers and headlight wire.

1933-34

Chopped Headlight Stands

Deep draw steel stamping. Fits 1933-34 passenger car.
 VICHP-13125/6-C 1933-34 Chopped Chrome Plated stands
 VICHP-13125/6-B 1933-34 Chopped Black finish stands

1936 Ford Car Headlight Mounts

Die stamped steel. Necessary for correctly mounting and adjusting the headlights. Fits between headlight buckets and fenders. Finished in black EDP coating, ready to mount.

BD68-13125-A 1936 Ford Car Headlight Mounts

HiBoy

Headlight Stands

Polished forged stainless steel. Designed to mount on the upper shock bolt. Will mount on all vintique headlamps including dietz type & King Bees. Includes special polished stainless steel shock bolts and polished stainless ny-lock nuts.

VIHR-13125/6-SS

CRANK TRIGGERS

SHIELDED MAG CABLE

This Shielded Magnetic Pickup Cable will help protect the trigger signal from the distributor or crank trigger pickups from Electro Magnetic Interference (EMI). The pickup wires are wound together and routed through a special aluminum skinned sleeve that connects to ground. This provides a ground shield around the trigger wires. The Harness is six feet long and is equipped with matching 2-Pin connectors. Recommended with MSD Digital Ignitions and aftermarket EFI racing systems.

Shielded Magnetic Pickup Cable, 6' MSD8862

FLYING MAGNET CRANK TRIGGER KITS

Most crank triggers have a wheel, with steel studs sticking out, bolted to the harmonic balancer. As the crankshaft turns the studs pass by a stationary magnetic pickup, triggering the ignition. This pickup can be triggered by other bolts, debris or even vibrations which will cause a loss of power or engine damage. The MSD Flying Magnet Crank Trigger uses four magnets secured in the aluminum trigger wheel that pass by a stationary non-magnetic pickup to trigger the ignition. This "flying magnet" design produces accurate trigger signals and the non-magnetic pickup cannot be false triggered. Each Flying Magnet Crank Trigger includes a two-piece mounting bracket for the non-magnetic pickup that in most cases will work on either the passenger side or driver's side of the engine (the SB Chrysler and SB Ford brackets mount on only one side). The CNC-machined aluminum bracket securely holds the pickup in place and is slotted to provide a wide range of timing adjustment. Spacers are included so you can mount the bracket on engines with standard motor mounts or engines with a .25" motor plate. These systems will trigger MSD 6, 7, 8 and 10 Series Ignitions and all MSD Timing Accessories.

RED KITS

 SB Chevy, 8" Balancer - Black MSD86153
 BB Chevy, 8" Balancer - Black MSD86203

CRANK TRIGGER EZ-ADJUST

Making small, precise timing changes with a crank trigger is simple with the new EZ-Adjust! This accessory installs to most MSD Flying Magnet Crank Trigger brackets. Adjustments are made by turning a bolt rather than loosening the entire pickup assembly and moving it. Once your adjustments are made the Adjuster locks in place.

MSD8605 Crank Trigger Ez-Adjust Kit

NOTE: Will not work with the Buick V6 Kit, the Chevy small block, 6.25" kit, MSD8600. Bracket not included.

UNIVERSAL CRANK TRIGGER KIT

Racers have always been inventive and willing to fabricate the parts they need if nothing is available. Building a crank trigger system is not an easy task but there has been an increasing number of unique front hub systems and distributorless ignitions that require one. MSD's Universal Flying Magnet Crank Trigger Kit will give you a head start in fabricating a custom kit for your application. This kit is supplied with everything you'll need to get you going in the right direction. A 7" billet aluminum wheel is supplied that has magnet positions for 4, 6, 8, 10 or even 12-cylinder engines. An oversized bracket arm is supplied that can be cut down to your specs and an "L" shaped holder is also supplied that can be machined for the 3/4" or 3/8" pickup.

MSD8655 Universal Crank Trigger Kit

NON-MAGNETIC PICKUP

MSD's Non-Magnetic pickups are engineered for extreme applications. In fact, this pickup was designed and tested on 300+ mph top fuel dragsters! To live up to MSD's demanding expectations in these extreme applications, we took it upon ourselves to design and build the pickups inhouse. This way we can control every aspect of their assembly and quality. Each pickup is hand wound on a special bobbin and terminated to our tinned conductor, teflon jacketed wiring. These wires are also routed through a strain relief for protection. This assembly is then installed into the precision housing and is potted with a fracture resistant epoxy compound. To ensure that the windings are entirely encased in epoxy the pickups undergo a vacuum procedure to remove any air inside the housing. All of these procedures are necessary to produce the strongest, most reliable non-magnetic pickup available.

MSD8276 Non-Magnetic Pickup for MSD Flying Magnet Crank Trigger Kits (3/4" X 16 X 2.25")

COMPACT NON-MAGNETIC PICKUPS

The Non-Magnetic Pickups are available in two housing sizes. The 3/4" model is used with MSD's flying magnet Crank Trigger Kits. The 3/8" diameter pickups are used with MSD's Sprint Car Crank Trigger systems as well as the professional racing kits from RCD and PSI.

MSD8159 36" Shielded Harness 3/8" X 24 X 1.5"
 MSD 8154 32" Harness 3/8" X 24 X 1.5"

MAGNETIC PICKUP

This is a replacement pickup for older style crank trigger systems that require a magnetic pickup. This pickup is magnetic and must be used with a trigger wheel equipped with steel studs to create a signal. The pickup is 3/4"x16. Magnetic Pickup (for old style crank triggers only)

MSD8505

Holley

HOLLEY EFI Crank Trigger Kits

Holley's EFI Crank Trigger Kits are engineered to provide an accurate crank speed & position signal to Holley EFI systems in the most-demanding, high horsepower, racing applications. Crank position is measured every 10 degrees as opposed to every 45 degrees for a standard 4-Magnet, MSD "style" Crank trigger. It is designed for applications using a standard ATI or Fluidamper "style" balancer up to 7-1/4" in diameter.

Features:

- 8" diameter, 1/4" thick, billet steel, 36-1 tooth, crank wheel with Black Zinc Oxide finish for superior corrosion resistance & striking good looks.
- Crank wheel centers off of the balancer's hub, eliminating the need for a centering ring
- All billet, 6061-T6 aluminum sensor mounting brackets with "bright-dipped" black anodized finish & Laser etched Holley EFI logo
- Custom 3-wire, ferrous-target, Hall-effect sensor with M12X1mm threads for finer gap adjustment
- All Grade 8 & Mil. Spec mounting hardware

36-1 Tooth Crank Trigger System for:

Big Block Chevy **H0556-113**
Small Block Chevy **H0556-116**
Small Block Ford **H0556-115**

OIL PUMP PLUGS & CAM SYNC

Pro-Billet Oil Plugs

Our Chevrolet Front Drive Distributors brought the need for a distributor plug. Both are billet aluminum and feature a slip collar to ensure correct installation depth.

Oil Plug for Wet Sump Engines **MSD8513**

CAM SYNC PLUGS

MSD's cam sync plugs are the perfect solution when running an aftermarket sequential EFI system with coil-per-cylinder ignition. The cam sync plug installs in place of a traditional distributor, providing a half-effect cam sync signal needed for the EFI system to reference the # 1 cylinder. For wet sump applications, the plug also drives the oil pump. MSD's cam syncs are plug and play with Holley EFI systems and can easily interface with most aftermarket EFI systems.

- Built-in L.E.D. makes set-up and indexing quick and easy
- Plug-and-play with Holley EFI and compatible with other aftermarket EFI systems requiring a cam sync signal
- Drives the oil pump in the absence of a traditional distributor
- CNC billet housing with black anodized cap provide good looks and excellent durability
- Chevrolet version is supplied with a cast Melonized distributor gear and adjustable slip collar for blocks with a non-standard deck height
- Ford 289-302 and 351W versions are supplied with a steel distributor gear
- Ford Big Block version is supplied with a bronze distributor gear

HEI DISTRIBUTORS

GENUINE STROMBERG

Reliable electronic ignition - 12v negative ground

No points. No black (or red) box. Simple two-wire hook-up OE-style timing adjuster. Stock black cap Old-school performance tag with unique ID Triggers most multi-spark CD ignitions. NEW FROM STROMBERG for your flathead Ford. The e-FIRE distributor, with electronic ignition, traditional looks, easy installation and simple set-up.

Everyone has electronic ignition. No points, no condenser, no black (or red) box and very little maintenance. Just higher efficiency, economy and accurate spark timing.

It's easy to install, with just two wires to a regular coil, and adjusts just like a stocker with the static timing screw on the side so you don't have to unbolt it and turn the whole body. The advance rate (and max total advance) is tuned specifically to suit the flathead V8 motor and every e-FIRE distributor is machine tested and ready to run.

NOTE: Must be used with a points style coil only, with a resistance of at least 3.0 Ohms (Ω) or 1.5 Ohms with a ballast resistor. DO NOT use a low-resistance or HEI-style coil.

Part No	Description
STROM21A-12	2 bolt 12V
STROM21A-6	2 bolt 6V

MSD Pro-Billet HEI

The Chevrolet HEI Distributor is a favorite for muscle cars, street rods and even circle track racers. The integrated coil keeps underhood wiring clean, and for race cars, the idea of running one wire to the distributor keeps things simple.

However, when it comes to performance, the stock HEI falls short. MSD answers the need for a strong, accurate and high performance HEI with our Pro-Billet HEI. The distributor is supplied with our Digital HEI Module and Coil so there is plenty of spark energy combined with improved dwell and timing control. Tig welded on top of the distributor shaft is MSD's adjustable centrifugal advance assembly. Three sets of springs and four stop bushings let you dial in up to 24 different timing curves to match your driving needs. Plus, there's a vacuum advance for those concerned with economy.

NOTE: The MSD8365 is designed to replace GM HEI Distributors that use a 4-Pin ignition module.

MSD8365 **MSD Pro-Billet Chevrolet HEI**
MSD84742 **Kit with Distributor, Leads, Separators & Clamp**
MSD83653 **Black MSD Pro-Billet Chevrolet HEI**

HEI DUST COVER

The Modified HEI Dust Cover allows you to remove the stock HEI coil in your distributor cap and replace it with an externally mounted coil such as the Blaster 2 Coil. This increases the reliability and the performance of the stock HEI system. The Modified Dust Covers are made from high quality plastic that resists spark loss and uses brass conductors to ensure low resistance connections. Designed to be installed on stock HEI distributor caps with no modification.

MSD8401 **Modified HEI Dust Cover**
MSD8402 **Factory Style HEI Dust Cover**

MSD STREET FIRE™ HEI DISTRIBUTOR

Street Fire components will offer a quality designed alternative to the bottom bargain parts that are springing up all over. We're so assured with the quality of our new Street Fire HEI Distributor that we provide a one year warranty with it! We know the importance of a centrifugal advance in a distributor so our engineers made sure that the StreetFire received an advance assembly with coated weights and welded weight pins (not just pressed in like other models). Another area that you cannot afford to scrimp on is with a distributor gear. The Street Fire is fit with the same gear that is used on our Pro-Billet models. The metallurgy of this gear has been refined for years to perform through the harshest conditions. Inside, the ignition module and coil work together to produce a stout spark to light the fuel mixture for great performance. The high voltage is transferred through a new rotor to the brass terminals of the distributor cap and out to the plugs.

The Street Fire Distributor is the first product to come from our new value branded ignition line.

MSD5596	Street Fire Module
MSD5597	Street Fire Vacuum Advance, adjustable

THE ULTIMATE HEI KIT

The Ultimate HEI Kit has everything you need to make your early model GM HEI Distributor a great performance distributor! The MSD HEI Module features special circuitry that produces 50% higher coil drive currents than a stock module resulting in higher spark energy at racing rpm. By matching the Coil specifications with the module, MSD also delivers more accurate timing and dwell control.

To ensure all of this new power makes it to the plugs, the kit is supplied with a high quality rotor and a durable cap with brass terminals for superior conductivity. Even a new dust cover to top it all off is supplied. Don't mess around with stock appearing ignition modules and cheap overseas models. The MSD Ultimate HEI Kit delivers proven performance!

MSD8501 Ultimate HEI Kit

Note: For use with non-computerized (4-pin module) HEIs only.

DIGITAL HEI MODULE AND COIL

MSD offers a Digital HEI Module and performance coil that will fire up your stock HEI Distributor. The Module is a direct plug-in for the 4-pin HEI module and will produce up to 7.5 amps of current. This increased energy will continue through racing rpm reaching 9,000 rpm! The Digital Module is extremely accurate in its delivery of this energy resulting in more accurate ignition timing. Another unique feature is an adjustable rev limiter. You can dial in an engine saving rev limit ranging from 5,000-10,000 rpm. The other unique feature of this module is it's patent pending technology that can detect if an illegal traction control has been installed. For street cars, you'll never know this feature is there, but for circle track racers that are breaking the rules, they'll find themselves with a low rpm limit activated! If a traction control event is detected, the Digital HEI module will go into a rev limit mode. To get the most performance out of the Digital HEI Module, MSD offers a performance Coil as well. This Coil drops right in place of the original coil and fits under the stock coil cover.

MSD83647	Digital HEI Module
MSD8225	MSD HEI Coil

HEI DISTRIBUTOR KIT

The MSD HEI Distributor Kit allows you to get rid of your bulky GM HEI distributor (large cap with internal coil) and bolt in some true MSD performance in a smaller package. The Ready-to-Run distributor features a built-in spark energy intensifier which provides a much more powerful spark than the stock HEI. MSD's race proven mechanical advance allows you to tune in an ignition curve while a vacuum advance provides street economy. An MSD Blaster SS Coil tops off the system to deliver the high voltage sparks to the distributor.

MSD8474 HEI Distributor Kit, Chevy V8

NOTE: Replaces 4 and 5-pin HEI modules only. On 5-pin systems the Knock Sensor is not retained.

DISTRIBUTORS

XPRO DISTRIBUTORS & IGNITION ACCESSORIES

Aeroflow now offer a line of performance Xpro distributors for the most popular V8 engines. The bodies are machined from 6061-T6 billet aluminium and utilise a chromium manganese titanium steel gear. These distributors are ready to run and do NOT require an external ignition box. The internal ignition module features a built in adjustable rev limiter. Aeroflow Xpro distributors are easy to install with only 3 wires to connect with weather tight connector and wiring harness included. Simply connect power, coil negative and earth. they also come with a grey output wire that is used to send a tach signal and set your built in rev limiter or trigger your aftermarket EFI system.

HOLDEN 253 - 304 - 308 - 355

XPRO READY TO RUN DISTRIBUTOR

Holden V8 ready to run XPRO distributors come complete with ignition module and built in adjustable rev limiter. These distributors are ready to use and do not require any external ignition boxes.

Ignition Kits

- MSD84745 Ford ready to run 289, 302 kit**
- MSD84746 Ford ready to run 351W kit**
- MSD84747 Ford ready to run 351C & 460 kit**
- MSD84741 Chevy ready to run kit**

This kit is supplied with everything you need for your ignition including a Ready-to-Run Distributor, Blaster SS Coil, 8.5mm Spark Plug wires with separators and even a billet Hold-Down Clamp. The Ready-to-Run Distributor is a great choice for your engine. It features a high output module that produces a vigorous jolt across the plug gap and the installation is simple with just three wires to connect! Also, a steel gear is installed for compatibility with hydraulic roller camshafts.

Digital E-Curve Distributors

The Digital E-Curve Distributor will drop right in your engine, easily connect to the coil and fire up! There are no external controls or boxes to mount and connect, and you can set a timing curve with the twist of a rotary dial!

That's right, no more springs or stop bushings to change. A new digital module lets you select from nearly 100 different advance curves, including a vacuum advance! Simply remove the cap and rotor to access the rotary dials and select a curve to match your application. You can also set an rpm limit that will protect your engine from overrev damage caused by a missed shift or driveline failure. This limit is adjustable from 5,000-10,000 rpm. These adjustments are possible due to an advanced digitally-controlled ignition module. Not only does the module offer these adjustable options, it also produces a hearty jolt of energy to the coil to produce a powerful spark to fire up your engine's performance. Also, a magnetic pick-up is used for reliable and accurate trigger signals throughout the entire rpm range of your engine. The E-Curve Distributor is topped with MSD's Rynite molded cap and rotor and is supplied with a heavy-duty gear and a matching 3-Pin Weathertight wiring harness.

- Digitally controlled stand-alone distributor with adjustable electronic advance
- Set a centrifugal advance and vacuum advance curve electronically
- High output ignition module produces a powerful spark for improved performance
- Simple three wire connection and you're ready-to-run
- Dial-in a rev limit to protect your engine from overrev damage

Chrysler Small Block 318-340-360 MSD8504

Pro-Billet Ready-To-Run Distributors

The Pro-Billet Ready-to-Run distributor is the perfect upgrade for outdated points distributors or bulky HEIs. Simply install the distributor in the engine, connect three wires, the coil and fire it up! A maintenance-free magnetic pick-up accurately triggers the module. The increased output of the amplifier easily outperforms stock ignitions and will smooth out the engine's idle, improve starting and provide a much higher rpm range. The Ready-to-Run features MSD's adjustable mechanical advance which allows you to custom tailor an ignition curve to match your engine's needs. There is also a vacuum advance canister to help improve economy. For positive street performance, the Ready-to-Run is the best choice.

Street Pro-Billet Distributors

The Street Pro-Billet is a popular route for people looking for proven race performance for their street cars. A vacuum advance canister provides economy and the proven MSD mechanical advance gives you the opportunity to dial-in a timing curve to fit your needs. Inside, an oversized steel shaft is QPQ-coated for low friction and rides in a sealed ball bearing at the top of the distributor with an extra-long sintered bushing at the bottom. This combination keeps the shaft steady creating accurate spark delivery at any rpm. The Street Pro-Billet relies on a magnetic pick-up to trigger the MSD Ignition Control which delivers the powerful sparks to the coil. This pick-up is extremely accurate and never needs adjusting. NOTE: Must be used with an MSD 6, 7, 8 or 10 Series Ignition.

Pro-Billet Distributors

This is our most popular performance distributor! The housing is machined from a billet of 6061-T6 aluminum on a state-of-the-art CNC machine producing exact tolerances. For high rpm stability, a .500" steel shaft is supported by a sealed ball bearing and a long sintered bushing. This shaft also receives a QPQ coating for friction reduction and resistance to corrosion. A precision machined reluctor is attached to the shaft which triggers the magnetic pick-up mounted in the housing. This high output magnetic pick-up is the most accurate way to trigger your ignition. Plus, with no moving parts to wear or adjust, the pick-up is maintenance free! Just above the pick-up is MSD's adjustable mechanical advance assembly. Different springs and stop bushings are supplied so you can tune an advance curve to match your application. NOTE: Must be used with an MSD 6, 7, 8 or 10 Series Ignition.

Pro-Billet Small Diameter

This Distributor was designed for racers and street rodders that have space limitations due to firewall interference, blowers or oversized intake manifolds such as tunnel rams. The distributor is 3/8" narrower and almost 1" shorter than a standard distributor. Proven performance features include a high output magnetic pick-up and precision machined reluctor for accurate ignition triggering. A fully adjustable mechanical advance allows you to tailor the advance curve to your specific application. Topping it all off is our own small diameter cap. This is molded out of durable Rynite® material and comes with an optional wire retainer. NOTE: Must be used with an MSD 6, 7, 8 or 10 Ignition.

Flat-Top Pro-Billet Distributor

This distributor sits low in the engine block, then is topped with our special Crab Cap that positions the spark plug terminals horizontally to give you plenty of clearance. The distributor incorporates a mechanical advance assembly that you can easily tune with the supplied springs and stop bushings. For trigger accuracy, a maintenance-free magnetic pick-up is used. This pick-up plugs directly into an MSD Ignition Control. The Flat-Top Distributor is supplied with our Dupont, Rynite molded distributor cap and rotor along with a heavy duty gear for long life in your engine. NOTE: Must be used with an MSD 6, 7, 8 or 10 Ignition.

Chev V8 Small Block & Big Block MSD84891

Pro-Billet Extra Small Diameter

This Chevy distributor is the smallest ever built by MSD! It is specifically designed for racers and street rodders with space limitations due to firewall interference, blowers or oversized intake manifolds such as tunnel rams. It measures 1/2" narrower and over 1" shorter than a standard distributor.

- CNC machined billet aluminum housing is 1/2" smaller in diameter and over 1" shorter than conventional Chevy V-8 distributors with the "points" type cap
- Supplied with small diameter HEI style distributor cap and rotor
- Will not accept a vacuum advance canister
- O-ring seals can be added to modified blocks to improve oil pressure control
- Must be used with an MSD 6, 7, 8, or 10 Series Ignition
- Special oil tract improves lubrication to the distributor and cam gear
- Maintenance-free magnetic pickup and precision reluctor create stable trigger signals throughout the rpm range
- Easy-to-adjust mechanical advance with supplied springs and stop bushings (except locked out versions)
- Adjustable slip collar mounting flange for engines with modified deck heights
- Polished steel shaft is QPQ coated and guided by a sealed ball bearing and extra-long sintered bushing
- Advance plate and weights are fine blanked from chrome moly steel and QPQ coated for friction reduction
- Advance weight pins are staked and tig welded to the plate
- Nylon pads ensure smooth operation of the advance weights
- Mechanical advance assembly can be locked out for crank trigger systems

Chev V8 Small Block & Big Block MSD85701

CHEVY PRO-BILLET DISTRIBUTOR FOR LATE MODEL/MODIFIED RACING

Designed to handle the rigors and harsh racing conditions of late model, modified, and off-road racing. Starting at the top of the distributor, a larger diameter distributor cap is securely bolted to the billet aluminum housing. The extra width prevents the chance of spark scatter during high rpm racing. Under the injection molded rotor is a billet steel reluctor and proven magnetic pickup assembly. The steel reluctor offers the material and strength required to be modified for advanced cylinder-to-cylinder timing orders. These components are parylene coated to prevent corrosion and the timing is locked-out for a solid signal from idle to redline. Inside the CNC-machined housing, a sealed ball bearing assembly guides a .500" shaft that receives a friction reducing QPQ coating. Mounted to the base of this shaft is an oversized (+.006") bronze distributor gear to ensure the proper mesh with the cam gear. •CNC-machined billet aluminum housing provides a solid foundation •Adjustable slip collar allows for precision installation with modified blocks or intakes •Billet reluctor and a magnetic pickup produce accurate trigger signals •Large diameter Ford style cap prevents spark scatter and securely bolts in place •A Weather tight connector seals and locks the pickup wiring

MSD85705

Billet Chrysler Small Block Distributor

Remove the MSD cap and Race Rotor and you'll find easy access to the adjustable mechanical advance assembly. This advance is designed for accuracy and strength with TIG-welded weight pins, nylon pads for smooth movement of the weights and a QPQ coating for friction reduction. Different advance springs and stop bushings are supplied so you can custom tailor a timing curve to fit your Chrysler's needs. Supporting the advance assembly is a hardened, polished steel shaft. Two ball bearing guides are used to support the shaft producing incredible stability. Precision paddles of a zinc-plated reluctor pass a maintenance-free magnetic pick-up creating a trigger signal that tells the MSD to fire. NOTE: Must be used with an MSD 6, 7, 8 or 10 Series Ignition.

Chrysler Small Block 273-360 MSD8534

Pro-Billet Can Sync Distributor

Features an adjustable cam sync pickup as well as a magnetic pickup inside the distributor to trigger the ignition control. The Hall-effect sync pickup is adjustable up to 60° BTDC to meet the needs of most aftermarket ECUs and even is crimped with a common 2-pin Weathertight connector. A great new feature is the two piece adjustable rotor that is supplied. This assists in setting up the proper rotor phasing for accurate timing and spark control. Each Cam Sync Distributor is topped with MSD's adjustable two piece rotor to provide rotor phasing adjustments. This distributor must be used with an MSD 6, 7, 8 or 10-Series Ignition.

Billet Ford Distributors

For Ford enthusiasts that are serious about performance! Just under the brass terminals of the MSD cap and rotor is an easy-to-adjust mechanical advance assembly. The assembly is fine blanked from chromoly steel, TIG-welded for strength plus receives a QPQ coating. The precision weights glide on nylon bushings for smooth advancement and different springs and stop bushings are supplied so a variety of advance curves can be tuned. The steel shaft that spins the advance and reluctor receives a friction reducing coating plus is guided by a sealed ball bearing and long sintered bushing. This combination provides stable timing signals and spark delivery at any rpm. Triggering chores are handled by MSD's race proven, maintenance-free magnetic pick-up.

NOTE: Must be used with an MSD 6, 7, 8 or 10 Series Ignition.

Pro-Billet Honda Distributor

Finally, a performance distributor for Honda and Acura engines! This all new Pro-Billet Distributor is designed for the popular Honda/Acura '96-'01 JDM/USDM 1.6/1.8L B-Series DOHC VTEC engine platform. The Pro-Billet Distributor is designed for performance from the inside out starting with a precise billet aluminium housing. Inside this strong new housing is a ball bearing guide for high rpm stability. Hall-effect pick-up assemblies are used to improve trigger signals and are also compatible with the factory ECU. The distributor uses a small external ignition module that creates a much higher energy spark to the Blaster SC coil. This inductive spark also has longer spark duration and even fires multiple times at lower rpm. This increased spark output improves combustion resulting in improved performance through the entire rpm range. NOTE: External Ignition Module and Coil must be purchased separately.

Honda 1996-01 1.6/1.8L B-Series DOHC VTEC Engines	MSD8488
Ignition Driver, required with Distributor	MSD6305
Blaster SC Coil, recommended with Distributor	MSD8235

MSD HVC Series Professional Racing Distributors

Developed to handle miles of 9,000 +rpm racing. Inside, there are two Hall-effect style pick-ups that can be switched for redundant systems. These pick-ups are stacked so any individual cylinder timing will not be affected between pick-ups. Also, the secondary pick-up is adjustable +/-8° so teams can easily tune to their needs. The timing is locked out on these distributors and for stability there is a 1.58" diameter precision ball bearing which also holds the endplay at zero. Engine pressures are sealed off through a double seal assembly and the large Dupont Rynite injection molded distributor cap is securely bolted to the billet base. The HVC Distributors are supplied with a cap and rotor. A 6-foot harness is available separately, PN 8857, to connect the distributor to the ignitions. Also, a gear is not installed and must be purchased separately.

Marine Distributor Ready-to-Run

MSD's new Ready-to-Run marine distributors are the perfect upgrade for boats that are relying on worn-out breaker points or weak ignition systems. These new distributors feature a powerful ignition module built into the billet aluminium housing. That means no extra ignition box is needed! This module produces a stout inductive spark that will improve combustion of the fuel mixture for better drivability. Beneath the durable bolt-down injection-molded cap, a maintenance-free magnetic pickup produces accurate trigger signals, while an oversized shaft is guided by a sealed ball bearing. An easy-to-adjust mechanical advance allows you to custom-tailor a timing curve to match your application. Their Ready-to-Run design makes installation a breeze. Simply drop one in the engine and connect three wires and you're ready-to-run across the lake! All are equipped with flame arrestor holes machined into their CNC-machined aluminium housings, and are supplied with a cap, rotor, gear, and weathertight wiring harness.

MSD83606	Marine chevy ready-to-run

Pro-Billet Distributors with Slip Collar

If you have a slightly taller block or have decked the heads, the distance between the distributor mounting pad and the cam gear/oil pump drive may be different. MSD offers these Distributor with an adjustable slip collar with 1.5" of adjustment so you can be sure the distributor is installed correctly. The distributor shares the same features of the standard Pro-Billet Chevrolet model including a ball bearing guide, long sintered lower bushing and an oil seal. To trigger the MSD Ignition a maintenance-free magnetic pick-up is secured in the billet base of the distributor. Just above this pick-up assembly is an adjustable mechanical advance assembly. NOTE: Must be used with an MSD 6, 7, 8 or 10 Ignition.

Chev V8 Small Block & Big Block	MSD85561
Chev V8 Small Block & Big Block (Extra Tall)	MSD8547
Chev V8 with Locked out Timing and Bronze Gear	MSD85501

Pro-Billet Front Drive Distributors

MSD's Pro-Billet Front Drive Distributor is the solution for race engines that don't have room for a standard distributor due to firewall clearance or intake combinations. The MSD Front Drive Distributor is belt-driven from a pulley installed on the camshaft. For increased strength and durability a 9mm belt is used which is wider than any other drive assembly. The distributor head is CNC-machined from a billet of aluminum and is secured to a strong precision bracket. This system is an extremely accurate way to distribute the spark energy from your MSD Ignition! We revised the front drive with our standard Ford-style cap and rotor. This creates a downsized package for an easier fit in tight engine compartments. The Front Drive Distributor is supplied with mounting bolts, cam pulley and drive belt. NOTE: Must be used with a Jesel Camshaft Belt Drive Kit and an MSD Flying Magnet Crank Trigger.

MSD5506	Ford V8 Socket Cap
MSD5500	GM Points Style with Socket Cap
MSD5501	GM HEI V8 Internal Coil
MSD5502	GM External Coil V8 EFI

MSD DISTRIBUTOR CAPS

MSD molds the most popular V8 distributor caps in-house. These caps are injection molded from DuPont® Rynite material and feature spark plug-style terminals. These terminals offer improved locking connections and the Rynite material is extremely strong with excellent dielectric properties. Plus, most caps have an optional wire retainer that is supplied with these caps to lock the wires in place.

MSD HEI COMPONENTS

With the introduction of our 20 Amp Extreme HEI Module, we needed an HEI Cap and Rotor that could withstand the high output. The answer was to mold our own HEI Cap, Rotor and Coil Cover. The Cap and Rotor will fit our HEI Pro-Billet Distributor, PN 8365, plus will work on stock applications.

- MSD8411 V8 HEI Cap**
- MSD8410 Rotor**
- MSD8402 Coil Cover**
- MSD8401 Modified Coil Cover**

MSD COIL COVERS FOR STOCK HEI CAPS

People like the functional wire retainer and the looks of our HEI Coil Cover, so we molded one that will work with stock size V8 HEI Caps.

- MSD8402 Coil Cover for Stock HEI Caps**
- MSD8401 Modified for External Coil Applications**

MSD CAP-A-DAPTS

If the Pro-Cap doesn't work on your application, these MSD Cap-A-Dapts will do the trick. The MSD Cap-A-Dapt adapts a large, Ford style cap onto your MSD distributor. This large cap spaces the spark plug terminals farther apart which prevents the chances of cross-fire and ionization from occurring. Spark plug style terminals used on the cap for tight connections that will not vibrate loose. The rotor is injection molded out of Rynite® for incredible strength and resistance to spark. Thick vanes are incorporated to stir up the air in the cap for even more prevention of ionization occurring. Three Cap-A-Dapts are available; two with a fixed rotor and another with an adjustable, two piece rotor. The Two Piece Rotor allows you to adjust the rotor tip to cap terminal alignment so you can adjust the rotor phasing. All of the MSD Distributors are phased at the factory, but if you are running a Multi-Step Retard or Timing Controller, having the ability to adjust the rotor phasing is beneficial. The Cap-A-Dapts will install on most MSD Billet and Pro-Billet Distributors (except the Ford FE, PN 8594). Both kits are supplied with a high quality cap with brass terminals, rotor and cap spacer.

- MSD8445 Cap-A-Dapt, Fixed Rotor**
- MSD8420 Cap-A-Dapt, Adjustable Rotor**
- MSD8441 Cap-A-Dapt, Small Diameter Distributors**

CRANK TRIGGER DISTRIBUTOR ROTORS

Molded from strong, durable Rynite material these rotors are designed specifically for MSD Crank Trigger Distributors. The rotor tip is secured with a screw for high rpm racing applications.

- MSD8567 Rotor for Crab Cap Distributor**
- MSD8568 Rotor Base for Crab Cap Distributor**
- MSD8457 Rotor and Base for Low Profile Distributor**

RACING ROTORS

These rotors are designed with high rpm and performance in mind which is why they are standard on most MSD Pro-Billet Distributors. Both rotors are injection molded from Rynite material for incredible strength and high dielectric properties. Plus the stainless steel/brass rotor tip is also screwed in place so it can handle extreme rpm and high heat conditions. The rotors also feature deep molded vanes to stir up the air inside the cap to prevent spark ionization. The rotor screws are set deep in the housing to prevent spark scatter.

- MSD8467 Racing Rotor, for MSD and GM Distributors with Window Caps**

NOTE: Will not fit PN 8485 and PN 8473 Distributors.

- MSD8423 MSD Ford Distributors and Cap-A-Dapts**
- MSD8421 Adjustable Rotor for Cap-A-Dapt**

REPLACEMENT ROTORS

MSD Distributor Rotors are molded from high quality, voltage insulating material to resist carbon tracking while ensuring that the ignition spark reaches the spark plug terminals. For optimum voltage carrying capabilities the rotor tips are made from low resistance brass for maximum voltage transfer.

- MSD8470 Rotor for VW, MSD8485, and Ford 2.3L, Distributors only**
- MSD8410 Rotor, GM and MSD HEI**
- MSD8427 Rotor, GM & MSD Small Cap HEI (MSD8366)**
- MSD8070 Rotor for Ford & MSD 5.0L Late Model**
- MSD8072 Rotor for Ford Socket Cap**
- MSD84673 Rotor for Crab Cap on MSD8351, MSD8353 & MSD8541**
- MSD84674 Rotor for MSD8488 Honda Pro Billet Distributor**
- MSD8470 VW Rota Suite 8485 & 8473**

MSD TIMING TAPES

Accurate ignition timing is one of the most vital adjustments you can make to your engine. Proper timing can mean the difference between winning and losing a race or even blowing an engine (as a worst case scenario). Recognizing the importance of the timing, MSD offers these Timing Tapes. The MSD Timing Tape comes with eight different tapes to fit common balancers ranging from 5.25" to 8" in diameter. The tapes are marked off in one degree increments from 14° ATDC to 64° BTDC and are printed on a tough, chemical resistant material. Not only do the MSD Timing Tapes help you get an exact timing setting, they allow you to see exactly where the Total timing is set. Remember, the Total timing is just as critical, if not more, than the initial timing and the MSD Timing Tape will help you ensure that it is set accurately.

- MSD8985 MSD Timing Tapes**

MAGNETIC PICKUP

The MSD Magnetic Pickup replacement is the same high output assembly that is currently found in all MSD Distributors. It is supplied with the two pin connector installed. NOTE: Not for use as a replacement on OEM Distributors.

- MSD84661 Magnetic Pickup Assembly, All MSD Billet and Pro-Billet Distributors**

REPLACEMENT 6FT 2-PIN MAGNETIC TRIGGER CABLE

When you need to replace your worn-out or burned cables, MSD offers all of the cables you will ever need. You could also use these cables to connect your MSD unit to your distributor.

- MSD8860 replacement 6ft 2-pin magnetic trigger cable**

MSD Billet Reluctors

These MSD billet reluctors are designed to obtain maximum performance. Many engine builders actually modify the reluctor of their distributor to obtain different timing for each cylinder. These reluctors are CNC-machined from billet steel for absolutely precise dimensions and strength. The steel allows for extra machining without losing strength, so the reluctors can be tailored to meet your specifications.

- MSD8415 MSD RELUCTOR WHEEL 8 LEG BILLET STEEL**

VACUUM ADVANCE

This is the replacement canister for MSD distributors equipped with vacuum advance except the PN 8365 HEI Distributor. Vacuum Advance Mechanism

This bracket allows you to easily remove the vacuum advance from MSD distributors that are cw rotation (except PN 8365) and small diameter distributors.

- MSD8468 Vacuum Advance Lockout**

LOW RESISTANCE HEI BUSHING

The carbon rotor button in a stock HEI distributor cap has very high resistance. When the high voltage of an MSD 7 Series Ignition is added, this resistance builds up heat and can actually melt the distributor cap. The solution to this problem is the use of the MSD Low Resistance HEI Bushing which will pass the secondary voltage from the distributor cap to the rotor without excessive heat buildup.

- MSD8412 Low Resistance HEI Bushing**

MSD ADVANCE WEIGHTS KIT

Weight kits fits all MSD Distributors. Allows you to tailor your timing curve for your particular application.

- MSD8628 Advance Weights Kit All MSD Distributors**

ADVANCE KITS

The MSD Distributor Advance Kits are the same kits that come with your MSD Distributor. The kit contains an assortment of springs, advance limit bushings.

High Performance Module For Accel Electronic Breakerless Distributors

The advanced engineering for the HEI ultra performance module has been repackaged into a smaller size to fit inside the bowl of the ACCEL electronic breakerless distributors. The high amperage dwell circuit ensures full coil saturation for high RPM performance. Surface mount electronic technology maximizes efficiency, output and reliability. ACCEL 51000, 61000 and 71000 Series Electronic Breakerless Distributors are equipped with the 35366 module while the 52000 series use the 35372 module, both of which operates on 12 volts, so there is no need to run a ballast resistor. Accel coils to use with these modules include p/n's: 8145, 8145C, 140001, 140008 and 8140HV.

- Accel Electronic Breakerless Module For 51000, 61000 & 71000 Series Distributor AC35366**
- Accel Electronic Breakerless Module For 52000 Series Distributor AC35372**
- For 41000 Series & GM HEI AC35361**

ACCEL HEI BATTERY AND TACHOMETER PIGTAIL CONNECTOR

Finally, a Dual HEI Connector for GM HEI "Coil In-Cap". The Dual HEI Connector helps clean up your engine bay by eliminating the use of single spade connectors to make battery and tachometer connections. Also holds the 12 volt and tachometer wires securely in place. Made from a hi-temperature durable plastic to withstand all extreme conditions of an engine bay

 † - Use Cap Holddown Kit P/N 31031 to convert to Low Profile Cap and Rotor on all ACCEL distributors except 44000, 45000, 46000 Series. Use P/N 31047 on 44000 Series.

HEI Advance Curve Kit

Designed to fit all GM HEI distributors with E Clips.

The kit includes two weights, special centre plate, three sets of colour coded springs and two pairs of nylon bushings. Also included is a comprehensive instruction sheet, complete with graphs showing typical advance rates using various spring/weight combinations.

MG929 GM HEI Dist, 74-79 w/out engine computer.

Advance Curve Kits

This kit allows full advance between 2,000 and 2,800 RPM. get maximum power and engine acceleration. GM Advance Curve Kit, Delco distributors pre 1969, with 2 weights, 1 bushing and 3 sets of springs, heavy, medium and light

MG925A

GM Advance Curve Kit, Delco

distributors 1969 and later with 2 weights, 1 bushing and 3 sets of springs, heavy, medium and light for multiple curve ranges

Distributor Shim Kit

Having the distributor at the correct height in the block, especially with milled heads or deck, prevents oil pump bind and spark scatter. These shims are designed to be installed between the block and the distributor mounting flange to give the correct spacing. Three nylon shims with thicknesses of .030", .060" & .100" are included.

MG6059 Distributor Shim Kit

Distributor Gear

Alloy Aluminum/Bronze gear includes attaching pin. Recommended for use with all hi-performance steel alloy and billet cams. Fits .491" diameter shaft.

MG1044 Fits Chevy SB & BB V8 and 200-229 cu. in. V6, standard rotation

DISTRIBUTOR HOUSING SHIM KIT

Fits: Small Block, Big Block, and 90° V6 Chevy engines. Eliminates oil pump bind and spark scatter when using a distributor in an engine with resurfaced heads or decks. Made from high impact nylon to exact GM gasket specs. Kit insures leak-free operation and contains one each .030", .060" and .100" shims.

Distributor Housing Shim Kit, 1.290 I.D. & 1.830 O.D

ADVANCE CURVE KITS

Re-curve your distributor for full spark advance at the optimum RPM. Three sets of advance springs allow you to adjust the rate of spark advance. Weights and centre plates precision stamped with smooth edges. HEI kit features a special design centre plate to eliminate over-centering of the centrifugal weights. Comes with complete installation instructions.

MSD700 Ballast Resistor (0.75-1.5ohms)

Ignition Modules

Mallory's UNILITE and Magnetic Breakerless Ignition Modules are self contained module assemblies which have no moving parts to wear out. Using Mallory's breakerless ignition circuit, combined with modern surface mount Thermal Clad construction, these ignition modules can drive both OEM and high performance ignition coils. For best results always use a Mallory PROMASTER Coil. Hookup is as easy as a three wire connection.

MSD605 UNILITE Ignition Module.
MSD609 Magnetic Breakless Module.

Super Duty - High Energy Distributor Cap

For more than 35 years, the traditional replacement distributor cap for the Mallory (YL Bowl) YD, YL/HP, 25, 26, 27, 37, 38, 47, 50, 57 and 60 Series 8 cylinder automotive distributors has been the Part No. 209. Now it shares that spotlight with a red, screw down, Super Duty High Energy Distributor Cap, Part No. 208. This new cap features:

- Screw mounted spark plug wire retainer.
- Brass contact terminals with spark plug type ends for better wire retention.
- Positive locking screw down distributor cap.
- Specially designed cap with a larger contact terminal diameter than the standard distributor cap.
- Counterbalanced rotor with specially designed ribbing to prevent cap tracking.
- Thermoplastic materials for high dielectric strength and impact resistance qualities that prevent damage.

For first time installations, select the complete Conversion Kit. The kit contains distributor cap, rotor and mounting hardware. Parts are also available separately.

DISTRIBUTOR GEARS

Carbon Ultra-Poly Composite Distributor Gears

COMP Cams is proud to introduce the latest innovation in distributor gears. Manufactured from a super-strong Carbon Ultra-Poly Composite material, these gears represent the next evolution in distributor gear technology. Having undergone stringent testing in various street and performance applications, the Composite Distributor Gears are a proven solution to wear issues associated with bronze gears and steel core camshafts.

- NASCAR proven to yield precise timing & extended durability
- 300% increased durability over bronze gears with steel camshafts
- Available in several shaft diameters

Application	Shaft	Part No.
Chev Small & Big Block	.491"	CO12200
Chev Small & Big Block	.500"	CO12140

Ford 302-351 Windsor	.530"	CO35100
Ford 302-351 Windsor	.467"	CO35200

Bronze Distributor Gears

One of the first requirements when installing a steel roller cam is the addition of a bronze distributor gear. A stock cast iron gear is not compatible with a steel camshaft. COMP Cams gears are machined from AMPCO-45 extruded aluminium bronze with 5% nickel added. These gears feature a high-strength tooth design that resists wear - even when used with high pressure oil pumps. These extra-tough gears are the answer when higher mechanical properties are demanded.

Chev Iron Distributor Gear

Fits Chevy small block and big block engines with 0.491" shaft. Replacement component for Proform and other brands of distributor. Not for use with roller camshafts. Chev Distributor Gear - .491" Shaft PR66961C

Holden V8 Distributor

& Oil Pump Gears

Distributor and oil pump gears for Holden 253-304-308 V8 engines. Bronze gears are required for engines with steel billet roller cams and the hardened iron oil pump gear is suitable for factory roller and aftermarket flat tappet cams.

Description	Part No.
Bronze Distributor Gear	HA-99GER1825-00
Bronze Oil Pump Gear	HA-99GER1824-00
Hardened Iron Oil Pump Gear	HA-99GER7122-00

Oil Pump / Distributor Gears

Crow Cams has you covered with oil pump and distributor gears for those hard to find local applications.

Description Part No.
Falcon 6 XD on distributor gear with 0.490" shaft CCDG2
Falcon 6 points distributor gear with 0.530" shaft CCDG2A
Holden V8 treated oil pump gear. Suits roller cams CCDG4
Valiant 265 15 tooth oil pump gear CC60062

DISTRIBUTOR GEARS

MSD distributor gears are made of a special alloy iron that is treated to a low friction coating process.

To you this means long life, an easy break-in period and reliable performance!

IRON GEARS

MSD Iron Gears Feature: Increased outer hardened layer thickness (RC 55-60). Micro polished surface for smooth contact. Proprietary formulated ductile iron. Melonite QPQ coated reduces friction and initial wear. Interstitial carbide concentration improves wear resistance and running properties.

MSD8561 Iron Melonized Chevy Gear, .500" ID (Marine)

MSD8532 Iron Chevy Gear, .500" ID, Oversize 0.006" OD

MSD85852 Iron Gear, Ford 351W, .531" ID

MSD85832 Iron Gear, Ford 289, 302, .468" ID

MSD85812 Iron Gear, Ford 351C, 351M,

400, 429, 460, FE, .531" ID

NOTE: Some Ford Gears do not have roll pin holes

MSD85833 Non-EFI 302 with Roller Cam, 0.468" ID MSD85833

BRONZE GEARS

MSD Bronze Distributor gears are machined from quality AMPCO 45 aluminum bronze containing 5% nickel. This special combination creates high strength gear teeth that are less prone to wear even with high volume oil pumps.

Replacement Slip Collar

This replacement slip collar suits all MSD distributors with the adjustable slip collar.

MSD8539 Replacement Adjustable Slip Collar

PRO MAGS

PRO MAG 44

The Pro Mag 44 is the King of all magnetos. With no points to replace, no magnets to recharge and by producing an amazing 44 amps of primary current, it's no wonder that the 44 is the only choice in nitro gulping top fuel racing! The 44 requires an external Electronic Points box to manage the primary current through the accurate triggering of the magnetic pickup. A special coil is required to handle this hit of current and pumps it up to 50,000 volts with over 1 Amp of energy firing across the plug gap. For racers with serious boost pressures and fuel, the Pro Mag 44 is the only way to go.

MSD 20 AMP GENERATORS

The 20 amp magneto is a favourite in alcohol slurping engines such as sportsman dragsters and quick-8 racers. The three different generators available, a band clamp design in cw and ccw rotation plus model built on a chevy distributor base. All three require the msd8106 electronic points box. The band clamp version are equipped with a large ford style cap while the chevy version uses a cap a 4-inch cap and both are topped with a heavy duty retainers.

MSD81392 MSD Chev pro mag

generator cw dunn drive

MSD PRO MAG 20

generator ccw dunn drive

PRO MAG 12LT

Designed with Sprint cars in mind, the Pro Mag 12LT offers light weight, and incredible power. The compact housing also sits an inch lower for improved clearance of the fuel injection plus features a band clamp mount for easier timing adjustments. The Electronic Points Box is the brain of the Pro Mag 12. It controls the spark duration and the unique full power firing sequence of the Pro Mag 12. The energy from the generator is controlled with Field Effect Transistor (FET) technology which is far superior to mags still using points as a trigger source. Each Pro Mag 12LT is supplied with a bronze gear, band clamp, cap and rotor.

PRO MAG TIMING RETARD

Ignition timing is always a compromise of power because one setting will not produce optimum combustion throughout the entire rpm range of your engine. The Pro Mag Retard Control allows you to compensate for these changes by retarding the timing at exactly when you want, and how much you want. The Timing Retard features two separate channels so it can be used with single or dual Pro Mag systems. The amount of retard is set with MSD retard modules and up to 30° (with MSD Pro-Cap) can be removed. The retard is activated with two activation wires and can be controlled manually, through a timer or rpm activated switch. There is a built-in tach output terminal that can be used to trigger an rpm activated switch plus there's an LED that indicates when the retard for each channel is activated. The Pro Mag Timing Retard is supplied with retard modules for 1° - 10°, vibration mounts and shielded harnesses. Note: For use with all MSD Pro Mags and a 12 volt source is required.

Note: For maximum retard rates, the MSD Pro Cap must be used.

Pro Mag Timing Retard

MSD 8168

TACH CONVERTER

The output signal that is used to trigger magnetos is different than a conventional electronic ignition. This compact device converts the Pro Mag's coil signal into a 12 volt square wave signal so common tachometers designed for electronic ignitions can be used with the Pro Mag. The Converter is less than three inches in length and its circuits are encased in epoxy for water and vibration resistance.

Pro Mag Tach Converter

MSD8132

Note: Requires a 12 volt source.

Also operates with Mallory and Vertex magnetos.

Timing Tape Pro 44 Magneto

Proper ignition timing is essential to your engine's performance. Get it right with a little help from MSD! MSD Pro Mag timing tape will assist in the initial setup of your Pro Mag's timing. Designed for use with Pro Mag 44 magnetos, this timing tape is placed on the generator housing. Then, by fashioning a pointer, you get a better idea of when to change the ignition timing by moving the housing.

MSD8126 Timing Tape Pro MAG 44

12LT CHEVY SLIP COLLAR AND CLAMP

The Chevrolet Pro Mag 12LT, part number MSD7908, features a unique Slip Collar and Anti-Rotation Clamp assembly. The Clamp features MSD's three point clamp design plus its straight edges match to the Slip Collar so it cannot rotate at all.

Anti-Rotation Clamp - Steel, 0.22lbs

MSD7905

BAND CLAMP

This extra strong, locking band clamp is required when using a Band Clamp magneto mount (12 or 44 versions). The stainless steel Clamp tightly locks and holds the generator to its drive housing.

Band Clamp

MSD8148

DUNN CROSS DRIVES

All of the MSD band clamp style Pro Mags are supplied with a standard "Dunn Cross Drive". The MSD Dunn Drive is CNC machined from 1018 steel then receives a corrosion resistant QPQ coating. The replacement drive mechanism is supplied with a new locknut for installation.

Cross Drive for Band Clamp, 0.900" tall

MSD 8107

12LT CAP-A-DAPT

If space permits, this Cap-A-Dapt is a great update for Pro Mag 12LT generators. A billet aluminium housing bolts in place on the top of the mag, followed by an adapter ring. The rotor drive is modified to accept a larger rotor for the increased diameter of the new cap. The kit comes complete with a rotor adapter, rotor, cap spacer, housing and cap.

Fits Tall Chev Only, MSD8139, MSD8149

MSD8123

PRO MAG SETUP TOOL

This special tool may look strange, but it will help you get your timing set before firing the engine. A special cap allows you to crank the engine without it firing so you can set the timing with a timing light. A cut-out in the cap also allows you to check the rotor phasing.

Pro Mag Setup Kit, Pro Cap

MSD7405

Programmable Controls

The all new Digital Retard Control and Interface offer up to 32 steps of retard for each magneto! What's better than 32 possible steps of retard? How about the fact that these can be programmed to be activated through time. This means that all of the pneumatic activation controls and complicated hoses and wiring can be replaced by one easy to install component! The battery powered Interface has an LCD touch screen for easy programming. Up to 30° of retard can be set in 0.5° increments down to 0.05-second intervals. The retard curve is interpolated creating a smooth, precise timing setting. The unit will store up to four different programs so changing from one to another is quick and easy. Other unique programs include a throttlelift alternate setting and an automatic pickup signal selector. This means that in the case of a pickup failure, the other processor will duplicate its retard program for the other channel. The Programmable Retard System can be used with the Pro Mag 12 and 44 systems.

Pro Mag Digital Retard Interface

MSD7570

Pro Mag Digital Multi-Stage Retard Control

MSD 8971-BLUE

PRO-CAP

The MSD Pro-Cap is the largest and strongest cap and rotor available! There are two Pro-Cap kits available: One for use on most MSD Pro-Billet Distributors and another for MSD Pro Mags. The Cap has a big five inch diameter with two full inches between each terminal! This ensures accurate spark delivery and far less chance of spark scatter inside the cap. The entire assembly is injection molded from Dupont® Rynite™ material for incredible strength and high dielectric properties. The Rotor features a deep skirt and thick vanes to stir up the air to prevent ionization and the rotor screws are even overmolded with Rynite for increased spark isolation. The extra thick rotor tip can easily handle high heat and is indexed and firmly secured with two screws. The Pro-Cap is crowned with a screw-down retainer to keep all of the plug wires firmly attached to each terminal.

CAP/WIRE RETAINER

Racing produces high winds and severe vibrations which can actually "whip" a plug wire causing it to fall off. With an MSD Wire Retainer this is impossible! These Retainers will securely hold the Pro Mag's cap in place while locking the spark plug wires to the terminals. Band Clamp Pro Mags and MSD8123 Cap-A-Dapt MSD8121

12 AMP MAG KILL SWITCHES

These heavy duty switches will stand up to the abuse of the racing world. The switches are rated to handle the power of the Pro Mag 12. The housing is designed to survive high impacts and features a molded-in elastomer seal between the toggle lever and bushing. The beefy aluminum housing provides a secure mount to withstand extreme racing conditions. Note: Not for use with the Pro Mag 44.

SPST Kill Switch, Single 12 Amp Mag Only MSD8111

KILL SOLENOID

This heavy duty Solenoid is designed to handle the high current of the ProMag 44 as well as the vibrations and harsh conditions of Top Fuel racing. The Solenoid is Normally Closed and when you apply 12 volts to it, it opens the ground path and allows the engine to run. Once the 12 volts are removed the Solenoid closes to ground shutting off the magno's power. 44 Amp Kill Solenoid MSD8134

REPLACEMENT CAP AND ROTOR

This replacement cap and rotor are injection molded from Dupont Rynite material for high voltage isolation characteristics with heavy duty construction. Stainless terminals are used for resistance to corrosion caused by ozone in the cap. The rotor features a brass/stainless steel rotor tip plus has a lock screw for secure mounting to the Mag's shaft.

Replacement 4" Cap and Rotor MSD7919
Replacement 4" Cap and Rotor (Black) MSD79193

REPLACEMENT PRO MAG 44 CAP AND ROTOR

This Cap and Rotor Kit is the replacement for the 44 Amp Pro Mags, or the 12 Amp Band Clamp models. The cap and rotor are molded from Dupont Rynite material with excellent high voltage isolation characteristics. The rotor features a brass/stainless steel rotor tip that is screwed into the rotor ensuring long life at high rpm.

Replacement Large Cap and Rotor MSD8119
Replacement Rotor Only MSD7920

REPLACEMENT BLACK RING

Known simply as "the black ring" this is a replacement spacer that comes on full size band clamp Pro Mags (MSD8130, MSD8140, MSD8150, MSD8160 Generators) Replacement Cap Ring MSD8120

REPLACEMENT HARNESSSES

These replacement harnesses suit the MSD8168 Pro Mag Timing Retard Control.

Replacement Activation Harness MSD8163
Replacement Shielded Mag Pickup Harness MSD8164

PRO MAG BAGS

This heavy duty nylon bag will protect your Pro Mag from water and mud during post-race cleanup or even on the track. Each bag is made from a durable nylon with a polyurethane backing to repel water and has a thick draw cord with a quick release barrel lock. Mag Bag, Pro Mag 12LT Generator MSD8166

Magneto Hold Downs

RCD's magneto hold-down provides the ultimate clamping ability which prevents movement of the magneto base. An adjustable aluminium post allows height to be changed so clamp is normal to the hold-down stud. Magneto Hold-Down 481X Titanium RCD301811-0005
Magneto Hold-Down 481X Steel RCD301811-0006
Magneto Hold-Down 426 Titanium RCD301811-0010
Magneto Hold-Down 426 Steel RCD301811-0011

Magneto & Fuel Pump Clamps

These unique three piece holding clamps provide the ultimate means of clamping a magneto or fuel pump to the drive base. Unlike band clamps, this billet, three piece clamp retains its proper shape for the maximum holding power. Clamps are machined from 7075-T6 aluminium. Billet Magneto Clamp RCD RCD301806-0001
Billet Magneto Clamp Dunn RCD301806-0002
Billet Fuel Pump Clamp RCD300707-0002
Fuel Pump Clamp Adapter RCD300705-01

Magneto Supports

These magneto supports clamp around the magneto body. The dual support clamps between the two magnetos and the single supports use a strut mounted to the engine. Single Magneto Support 4.37" Long RCD301821-0037
Single Magneto Support 7.00" Long RCD301821-0038
Dual Magneto Support RCD301821-0004

Offset Magneto Drive

Offset Magneto Drive clamps to our Fuel Pump Extensions, extending the fuel pump out 2.45" while providing a drive for a magneto or 426 style dry sump oil pump. The second drive is parallel to the fuel pump drive and offset 6.60". Input drive shaft is machined from heat treated chrome-moly steel with ball bearing on both sides of drive sprocket. A flexible coupler between the magneto and drive minimizes impact loading on the magneto. A 3/8-16 tapped hole is provided on the back of magneto side to brace the housing. Offset Magneto Drive Short Shaft RCD302000-0003
Offset Magneto Drive Long Shaft RCD302000-0005

Dual Magneto Drive

Dual Magneto Drive is used in conjunction with the Angled Magneto Drive. The 10" offset of the Angled Magneto Drive moves the magnetos away from the right cylinder head while keeping the drive tucked in close to minimize interference with the blower belt. The first magneto is driven directly from the angled drive, while the second magneto is driven by a 1/2" wide, 8mm GT belt. A rod end and brace are provided to support the end of the drive. The drive is easily removed with the angled drive remaining in the block allowing it to be quickly installed on a spare engine that has the angled drive installed and timed. Dual Magneto Drive RCD302000-0015

BILLET FRONT OFFSET DRIVE w/ SUPPORT BRACE

The RCD drive can be mounted directly to the cam cover for unblown applications, or if the blower drive is already extended. Drive and Mag can be clocked anywhere in 360 degrees. Standard rotation for S/B & B/B Chevy. Oil feed port. 3 bolt magneto clamp. RCD-302500-0010

Angled Magneto Drive

This unique RCD part, angles the magneto 10° to clear cylinder heads, blower and manifold. It features a one piece housing machined from billet 2024-T3 aluminium and input shaft/oil pump drive machined from heat treated and ground 300M steel, a universal joint mounted in ball bearings and a flexible coupler between the magneto and drive to minimise impact loading on the magneto.

Angled Magneto Drive 392/417 RCD303000-0010
Angled Magneto Drive TFX/426/KB RCD303000-0015
Angled Magneto Drive 481X RCD303000-0020
Replacement Angle Drive Bronze Drive gear RCD303021-09 (TFX/426/KB)

Triangle Drive

The RCD triangle drive was designed for engines with limited drive options and will attach to any marmon clamp style fuel pump extension. The RCD triangle drive is constructed of billet 2024 aircraft grade aluminium. The 8mm Gates Poly Chain GT drive belt is completely enclosed to keep out debris. Any of the three drive locations can be used for magneto, 426 style oil pump or fuel pump by simply changing mounting flanges. All drive locations are coupled with hyrel spiders to help dampen engine harmonics. There are three threaded holes on the back of the drive if extra bracing is needed. The triangle drive comes with everything you need to drive two magnetos and a fuel pump. Billet clamps are recommended with this drive because of the horizontal mounting style. Clamps are sold separately. 426 style wet or dry sump oil pump adapter is also sold separately. Triangle Drive RCD303500-0001

IGNITION CONTROLS

WARNING: Make sure your MSD Ignition has a registered C-Tick Sticker. It is illegal to sell or use MSD ignitions without the approved C-Tick sticker.

STREET FIRE CDI

The Street Fire Capacitive Discharge Ignition is perfect for Performance enthusiasts with a tight budget. The ignition offers capacitive discharge technology and will fire a series of multiple sparks that last for 20° of crankshaft rotation when the engine is running under 3,000 rpm. This ensures combustion of the air/fuel mixture and produces great throttle response and smooth idle. The CDI is built around a durable cast aluminium housing and easily connects to points, amplifiers and magnetic pickup distributors. An adjustable rev limiter will protect the engine in the event of driveline failure. This rpm is adjustable with plug-in rpm modules, available in 100 rpm increments. If you have a 4, 6 or 8-cylinder engine, the Street Fire CDI will connect and fire it up. MSD5520 Street Fire CDI Ignition

LS IGNITION CONTROL

As the popularity of GM LS engines continue to grow, so does the demand for a powerful, reliable and easily adaptable ignition system. MSD has answered this demand with an updated and improved version of the popular 6LS box. Whether using a stock crate engine or building a custom powerhouse, the MSD LS Ignition provides the control you need to achieve the performance you want. Dial in the perfect tune for your LS using the easily adjustable preset timing curves or hookup to your computer and program a custom setup with our user friendly MSD View software. New features of the LS Ignition include: high speed data acquisition, an optional coolant temperature sensor input, idle timing control, as well as individual cylinder timing. These features are in addition to the existing programmable step retard, launch retard and RPM rev limiters from its predecessor.

- Fits most LS Engines • No PC required for basic functionality
 - Six pre-programmed timing tables for easy set-up
 - Rotary selector switch allows timing changes on the fly
 - Nitrous and boost compatible • High speed data acquisition
 - Fully Sealed direct plugin connectors
 - Programmable step retard • Launch and max rev limiters
 - Optional coolant temperature sensor input
 - Launch retard • Idle timing control • Individual cylinder timing
 - Compatible with all MSD, Accel and GM LS coils
- MSD6014 Red MSD LS Ignition Control
MSD60143 Black MSD LS Ignition Control

Digital 6A Ignition Control

The MSD 6A Ignition Control set the standards that other ignitions strive to reach. For 2011, the bar has been raised even higher as we introduce the all new Digital 6A Ignition Control! MSD started with a clean slate and drew up plans for an all new housing. We kept the same footprint as the traditional 6AL but lowered the profile for a sleek look. The wiring is all routed out one end of the unit through a sealed and locking connector. This eases installation and keeps your wiring looking neat and clean. Inside the Digital 6A you'll find a microprocessor that monitors and controls every firing. The circuits are updated with efficient components that help the ignition produce more power while drawing less current! In fact, the new Digital 6A delivers over 530 volts to the coil with up to 135mJ-145mJ of spark energy – for every firing! Increased output combined with MSD's proven multiple spark series is a win-win situation! The new Digital 6A is supplied with the wiring harness and the components you'll need for installation. The ignitions are compatible on 4, 6 or 8-cylinder engines with 12-volt, negative ground electrical systems. They'll accept trigger inputs from breaker points, amplifiers and magnetic pickups.

- MSD6201** MSD Digital 6A Ignition
- MSD62013** MSD Digital 6A Ignition BLACK

Digital 6AL Ignition Control With Soft Touch Rev Control

The MSD 6AL Ignition Control set the standards that other ignitions strive to reach. In fact, you'll find ignitions from other companies that carry the 6AL name (and in some cases, the same part number). MSD started with a clean slate and drew up plans for an all new housing. We kept the same footprint as the traditional 6AL but lowered the profile for a sleek look. The wiring is all routed out one end of the unit through a sealed and locking connector. This eases installation and keeps your wiring looking neat and clean. The rev limiter was moved right on top of the housing for easy access to the two rotary dials to set the limit in 100 rpm increments. Inside the Digital 6AL you'll find a microprocessor that monitors and controls every firing and rev limit. The circuits are updated with efficient components that help the ignition produce more power while drawing less current! In fact, the new Digital 6AL delivers over 530 volts to the coil with up to 135mJ-144mJ of spark energy for every firing! Increased output combined with MSD's proven multiple spark series is a win-win situation!

The new Digital 6AL are supplied with the wiring harness and the components you'll need for installation. The 6AL is also supplied with vibration mounts. Both ignitions are compatible on 4, 6 or 8-cylinder engines with 12-volt, negative ground electrical systems. They'll accept trigger inputs from breaker points, amplifiers and magnetic pickups.

- MSD6425** Digital 6AL Ignition With Rev Control
- MSD64253** Digital 6AL Ignition With Rev Control BLACK

6AL-2 Ignition Control

The 6AL-2 ignition control combines a new housing, new digital controls and more power in a sleek package. Inside the new cast aluminum housing you'll find an advanced micro-controller that manages the timing and rpm of the ignition. The spark output of the new box has been turned up to 535 volts of primary voltage with spark energy reaching up to 135millijoules! The multiple sparks of the 6AL-2 burn in the cylinder for 20° of crankshaft rotation to ensure complete combustion. Two more great features are the rev limiters! There are two rev limiters; one for high end overrev protection and another you can activate off a clutch or transbrake to set a launch limit. This feature will help your car blast off the starting line! Adjustments are made via four rotary dials for 100 rpm increment control! The all new capacitive discharge ignition will easily connect to nearly any 12-volt negative ground distributor system, even Hall-effect pickups. The ignition is supplied with wiring and vibration mounts for a complete installation. It's even compatible of 4, 6 and 8-cylinder engines. Must be used with the MSD HVC Blue Coil, PN 8252

- MSD6421** 6AL-2 Ignition Control
- MSD64213** 6AL-2 Ignition Control-Black

Programmable 6AL-2

The Programmable 6AL-2 Ignition will provide street and performance cars to take advantage of tuning-in an ignition curve or boost timing map from a PC. Also, using MSD's Pro-Data+ software will provide simple adjustments to a two step rev limiter, step retard and more! The Programmable 6AL-2 shares the same advanced features of the new 6AL-2 with 535 primary volts and spark energy reaching 135 mJ! Vibration mounts, wiring and a PC cable are supplied. Must be with the MSD HVC Blue Coil, PN 8252

- MSD6530** RED Programmable 6AL-2
- MSD65303** BLACK Programmable 6AL-2

MSD 6LS IGNITION CONTROLLER

There's no denying that the hottest engine around is GM's Gen III engine, most often referred to as the LS-1, LS-6 or now the LS-2. Our engineers have been working overtime to provide the components you need to fire up performance! The 6LS Ignition Controller can now be installed on EFI equipped engines or with a carburetor. To take advantage of the programming on an EFI engine, you'll need the new PN 8886 Harness. The 6LS Controller allows you to run a pre-programmed timing curve or you can hook up your laptop and build a custom curve. Our Windows based software, the Pro-Data+, makes it easy to map a complete timing curve, program a launch rev limit, set a step retard or even plot a boost timing map.

- MSD6010** MSD 6LS Ignition Controller, for Gen III Engines
- MSD6012** 6LS-2 Ignition Controller for LS2/LS7
- MSD8886** GEN III EFI Harness
- MSD88862** LS2 WIRING HARNESS

This new Harness allows you to run the 6LS Ignition Controller, PN 6010, with the factory EFI system!

DIS Dual Coil Ignitor

In the past, adding ignition boxes and coils to factory transistorized ignitions was virtually impossible. All that has changed now that MSD has developed the Dual Coil Ignitor and CPC Signal Converter. The MSD6302 and MSD6304 both allow you to install an MSD DIS-2 or DIS-4 on 4-cylinder engines with either waste spark or coil-per-cylinder ignitions. Both require MSD coils to be installed for a complete package.

- MSD6302** DIS COIL IGNITOR 2 CHANNEL
- MSD6304** DIS COIL IGNITOR 4 CHANNEL

6 BTM IGNITION CONTROL

The 6 BTM is ideal for engines with a turbo or supercharger. Not only will the engine benefit from MSD's full power CD sparks, but there is also an adjustable boost/timing retard circuit to prevent detonation. When your supercharger (turbo or blower) forces the air/fuel ratio into the engine, the cylinder pressure inside the combustion chamber increases. The result is a great amount of power but this can also lead to detonation which can result in severe engine damage. The 6 BTM lets you dial away detonation by retarding the timing in relation to the boost pressure. By electronically controlling the ignition timing your engine can run on the threshold of detonation to obtain maximum power and efficiency. The BTM features a dash mounted control knob that lets you adjust the amount of timing retard. It can be adjusted from 0° per pound of boost to 3° per pound. The boost pressure is monitored by a sensor built into the MSD. The 6 BTM also shares the Soft Touch Rev Control of the 6AL Ignition for overrev protection. The BTM is supplied with rubber shock mounts and rpm modules for 3,000, 6,000, 7,000 and 8,000 rpm.

- MSD462** MSD 6 BTM Ignition Control with Boost Timing Master, 4, 6 (even-fire only) and 8-Cylinder

NOTE: Not compatible with distributorless systems. With an MSD 6 Ignition, some factory and aftermarket tachometers and fuel injection systems may require an MSD Tach/EFI Adapter.

MSD DIGITAL-6 PLUS IGNITION CONTROL

The MSD Digital-6 Plus Ignition Control combines terrific power, digital accuracy and great accessories making it ideal for street/strip applications. Every spark of the Digital-6 Plus Ignition is packed with 135 millijoules of spark energy and 535 primary volts. When used with the MSD HVC Coil, PN 8252, a spark with over 300 milliamperes burns across the plug gap for 400 microseconds. Below 3,300 rpm the Digital-6 Plus produces a series of sparks that burns in the cylinder for up to 20° of crankshaft rotation. This incredible heat ensures combustion to produce great power, quick throttle response, smooth idle and quick starts. 4, 6 (even-fire) and 8-cylinder engines

- MSD6520** MSD Digital-6 Plus Ignition Control

MSD OFFROAD REV CONTROL

This Rev Control plugs directly into the 6-Offroad Ignition Control. It allows you to set an rpm limit that will save your engine from overrev damage in the event of driveline failure, a slick spot on the trail or missed shifts. The rpm limit is adjustable with special Weathertight RPM Modules and is supplied with 4,000, 6,000 and 8,000 rpm modules.

- MSD8769** Offroad Rev Control

MSD 6-OFFROAD IGNITION CONTROL

The MSD 6-Offroad Ignition Control will provide your engine the spark power it needs to get you over, through, under and around any obstacles you encounter. From an idle to 3,000 rpm the MSD produces multiple sparks rather than just a single spark which is a great benefit when you're crawling over rocks or creeping up steep grades. This spark series lasts for 20° of crankshaft rotation and ensures complete combustion of the fuel mixture producing quick throttle response and a smooth idle. To battle the harsh off-road elements, the 6-Offroad is completely potted with an epoxy compound called CibaTM. This material encases the circuits creating a water and vibration proof ignition. Weathertight connectors are also installed to provide positive locking and water resistant electrical connections.

The 6-Offroad will install to virtually any vehicle with a 12 volt electrical system and a distributor. It will connect to points, amplifiers or magnetic pickups on 4, 6 or 8-cylinder engines.

- MSD6470** MSD 6-Offroad Ignition Control

NOTE: The MSD 6-Offroad Ignition Control features a special connector that plugs directly into an external rev limiter, the Offroad Rev Control, MSD8769.

MSD 6M-2 MARINE IGNITION CONTROL

The MSD 6M-2 Ignition Control is designed for performance marine applications where a high energy and reliable ignition is a necessity. The capacitive discharge (CD) design of the MSD produces full power sparks throughout your boat's entire rpm range. Below 3,000 rpm, a series of multiple sparks burn in the cylinder for 20° of crankshaft rotation ensuring complete combustion. Together, these sparks produce easier starting, great throttle response, more power and reduced plug fouling during pro-longed idling. To protect the 6M-2's electrical circuitry from marine conditions, the entire unit is potted with CibaTM compound. This material prevents the electrical components from coming into contact with water or other chemicals that could cause damage. Weathertight Connectors with multi-ribbed seals are used to make the electrical connections to the 6M-2. These connectors securely lock together and each terminal has its own barrel so there is no chance of shorting. The 6M-2 can be triggered by either a magnetic pickup (distributor or crank trigger), amplifier or by a breaker points distributor. The cable harness has the proper connector so you can plug the 6M-2 into one of the Pro-Billet MSD Marine Distributors.

- MSD6560** MSD 6M-2L Marine Ignition with rev limiter

MSD DIGITAL 6M-3L MARINE IGNITION

We've raised the bar and added an all-new UL listed marine ignition box to our line-up. The 6M-3L is a fully sealed unit with a single wiring connector making installation neat and easy. Three rotary dials and an LED display simplify setting the cylinder select, start retard and rev limiter. Plug-in rev limiter chips and hard to read dials are a thing of the past. For diagnostic purposes, the LED display can also be set to a live tach mode on V8's and even display battery voltage with the turn of a knob. The 6M-3L is a capacitive discharge ignition that multi-sparks from idle to 3,000 RPM providing a clean idle and quick throttle response. Above 3,000, capacitive discharge sparks will run clean through 12,000 RPM. Boasting more features and higher spark energy than its predecessor, the 6M-3L is the performance upgrade your boat needs!

- Large, easy to read LED display
- Shift interrupt feature eases shifting
- MSD's smoothest rev limiter yet, protecting parts and saving your engine
- Records highest RPM the engine turned for last 20 minutes of run time
- Easy setup of features with three rotary dials on the face of the unit
- Built-in Start Retard adjustable in 0, 10 or 20 increments for quick, easy starts and extend starter life
- LED display shows rev limit, highest RMP turned, cylinder select, start retard, battery voltage and can be set to tach mode
- Full delivery of spark energy and easy starting down to 6 volts battery supply
- Highly efficient, low current draw for extended battery life
- Fully potted housing to withstand demanding marine conditions
- Sealed connector for clean wiring and trouble-free operation
- Works on 4, 6 and 8 cylinder engines
- Reverse polarity and overheat protection provide ultimate reliability
- Can be triggered by magnetic pickup, amplifier, and points inputs

- MSD6564** MSD Digital 6M-3L Marine Ignition

MSD 6CT IGNITION CONTROL

Superior design makes it the most advanced ignition to ever hit a circle track. Packed with legendary MSD Ignition power, the 6CT offers a slew of features. A large digital LED display makes it easier than ever to see the rev limiter setting when dialling it in using the laser etched rotary dials on the face of the unit. Rev limiting is controlled via microprocessor making it so smooth the chassis is virtually undisturbed when charging into turns. The rotary dials are also used to set cylinder select for 4, 6, and 8 cylinder engines, and to adjust the built-in start retard providing options of 0°, 10° or 20° of timing retard for quick starts. As an added bonus the LED display can be used as a live tach or will display your race cars battery voltage. The unit records the highest RPM your engine turned during the race which can be easily recalled on the LED display as well. The 6CT offers all this and more in a fully potted, tamper proof housing that utilizes a single connector to keep wiring tidy.

- MSD's smoothest rev limiter yet! Won't upset the chassis and easy on parts
- Large, easy to read LED display
- Simple setup of features such as the rev limiter with three rotary dials on the face of the unit
- Built-in Start Retard adjustable in 0°, 10° or 20° increments for quick, easy starts and extend starter life
- LED displays rev limit, highest RMP turned, cylinder select, start retard, battery voltage and can be set to tach mode
- Full delivery of spark energy down to 6 volts battery supply
- Highly efficient, low current draw for extended battery life
- Fully potted housing to stand up to demanding race conditions
- Single plug-in connector for clean wiring
- Tamper proof screws to prevent modification of unit
- Records highest RPM the engine turned for last 20 minutes of run time
- Works on 4, 6 and 8 cylinder engines
- Reverse polarity and overheat protection provide ultimate reliability

MSD6427 MSD 6CT Ignition Control

MSD 6T CIRCLE TRACK IGNITION

The MSD 6T is the winningest ignition in stock car and road racing! To withstand severe jolts and vibrations of harsh racing, the 6T's capacitor and transformer receive additional bracing for a solid mount. All of the circuits and components then receive an extra thick coating of Humi-Seal adding even more vibration protection. Top it all off with a set of sturdy vibration mounts and you have one of the toughest ignitions offered! Even in the toughest conditions the 6T Ignition Controls deliver race winning performance!

MSD6400 MSD 6T, Circle Track

MSD 6CT PRO CIRCLE TRACK IGNITION

Based on the superior design of the MSD 6CT, the 6CT PRO adds another offering to MSD's line of technologically advanced ignitions for circle track racing. Packed with legendary MSD Ignition power, the 6CT PRO offers a slew of features. A large digital LED display makes it easier than ever to see the rev limiter setting when dialling it in using the laser etched rotary dials on the face of the unit. Rev limiting is controlled via microprocessor making it so smooth the chassis is virtually undisturbed when charging into turns. The rotary dials are also used to set cylinder select for 4, 6, and 8 cylinder engines, and to adjust the built-in start retard providing options of 0°, 10° or 20° of timing retard for quick starts. As an added bonus, the LED display can be used as a live tach or will display your race cars battery voltage. Like the 6CT, the 6CT PRO records the highest RPM turned by the engine for the last 20 minutes of run time. However, the RPM recording can be quickly reset with a momentary push button (customer supplied) instead of having to leave the unit powered up for 20 minutes straight. The 6CT PRO offers all this and more in a fully potted housing that utilizes a single connector to keep wiring tidy.

- MSD's smoothest rev limiter yet! Won't upset the chassis and easy on parts
- Large, easy to read LED display
- Records highest RPM the engine turned for last 20 minutes of run time
- Highest RPM recording can quickly be reset with an external momentary switch
- Easy setup of features with three rotary dials on the face of the unit
- Built-in Start Retard adjustable in 0°, 10° or 20° increments for quick, easy starts and extend starter life
- LED display shows rev limit, highest RMP turned, cylinder select, start retard, battery voltage and can be set to tach mode
- Full delivery of spark energy down to 6 volts battery supply
- Highly efficient, low current draw for extended battery life
- Fully potted housing to stand up to demanding race conditions
- Single plug-in connector for clean wiring
- Works on 4, 6 and 8 cylinder engines
- Reverse polarity and overheat protection provide ultimate reliability

MSD6428 MSD 6CT Pro Circle Track Ignition

MSD SCI & SCI-L IGNITION CONTROLS

Smaller displacement engines that run through high rpm are in dire need of a high output CD Ignition. At higher rpm, stock inductive ignitions cannot produce full power sparks resulting in a loss of top end power or even a miss. This is even more prevalent when a turbo or nitrous is added to the mix to increase cylinder pressures. The MSD SCI Series Ignitions feature capacitive discharge (CD) circuits which deliver powerful sparks at any rpm. Below 3,000 rpm the SCI Ignitions produce a series of sparks that last for 20° of crankshaft rotation. These sparks will smooth the idle, produce quick starts and lightning quick throttle response. There are two models available of the SCI Ignition; the standard SCI, PN 6300, and the SCI-L with an adjustable rev limiter, PN 6320. Both can be used on most engines with a distributor.

MSD6300 MSD SCI Ignition Control

LS CIRCLE TRACK IGNITION CONTROL

CT525 crate engines and built LS mills alike need a way to control 8 coils, RPM and timing. The 6014CT makes this easy with factory connectors that plug directly into the LS cam sensor, crank sensor and coils. If running a CT525 a preset timing curve and rev limiter setup is preprogrammed.

For built LS engines that require a little more attention, plug your laptop in to program a timing curve and rev limiter with the user friendly MSD View software. Supply the unit with power and ground and you're off to the races!

- Direct plug-in to factory GM LS sensors and coils
- Pre-programmed to run the GM CT525 crate engine out of the box
- Laptop programmable RPM limit, timing curve and coil selection for custom tuning
- Auto detects coils, cam sensor and crank sensor
- Will run 24x 1x, 58x 1x and 58x 4x crank / cam sensor combinations
- Self-powered with USB for laptop programming
- Steady, accurate timing control
- Dedicated plug for Tech Official

MSD6014CT LS Circle Track Ignition Control

PROGRAMMABLE MIDGET IGNITION

The Programmable Midget Ignition is a complete electronic distributorless system consisting of a powerful capacitive discharge Ignition Control, a four tower high output coil pack and uses two non-magnetic pickups with a trigger wheel as a crank trigger source. Adding to the accuracy and high output of this ignition system, is the advantage of being able to precisely program the timing throughout the engine's entire rpm range. By using the optional Hand Held Programmer, PN 7550, or MSD's Pro-Data+ software package on a Windows based PC, racers can program two different timing curves down to .1° per 100 rpm increments! Other features of the Programmable Midget Ignition include a rev limiter to protect the engine from overrev damage, a start retard and a circuit that monitors the battery supply voltage.

The Midget Ignition produces full power capacitive discharge sparks at any rpm so you can be assured of complete combustion. To control this power and the programs, a 15 MHz microcontroller analyzes the various inputs and is capable of extremely quick compensations to maintain exact timing and rpm. The Midget Ignition is supplied with the Ignition Control, two Non-Magnetic Pickups, Trigger Magnet, On/Off Switch and Software.

MSD6214* MSD Programmable Midget Ignition
MSD8240* Midget Coil Pack
MSD31689 Universal Midget Super Conductor Lead Set

NOTES: Coil Pack, PN 8240, must be purchased separately. Crank Trigger Wheel must be fabricated for each application.

MSD HVC COIL

The new HVC Coil is designed exclusively for the HVC Professional Racing Ignition Control. The E-Core design of the HVC Coil is more efficient in producing more output with less loss. • E-Core design produces more voltage and current while running 50% cooler than canister coils. • Massive laminations and windings are engineered for less energy loss. • Delivers high voltage to ionize the plug gap while the spark glows with high current.

MSD8250 MSD 6 HVC Coil (Only for use with MSD HVC Ignition Control)

MSD 6 HVC PROFESSIONAL RACING IGNITION

The MSD 6 HVC Ignition is specifically engineered for professional racing applications that endure high rpm for a long duration. The result is a reliable ignition that produces more output energy and voltage with less current draw! All of the MIL-Spec (MIL-86A) wiring is routed into NASCAR mandated Weathertight connectors. Matching harnesses are supplied with the HVC Ignition.

MSD 6 HVC Professional Racing Ignition Control with built-in rev limiter (Requires Coil MSD8250) MSD6631
Deutsch Connectors MSD6601
Soft-Touch Rev Limiter, Deutsch Connectors MSD6632

MSD 6TN AND 6ALN IGNITIONS

The ultimate ignitions to perform throughout tough racing conditions! The "N" Series Ignitions feature the mandatory 6-Pin Weathertight connector to meet NASCAR's ignition wiring rule, 20-6.1. This special connector provides a tight, positive locking connection with individual seals to keep dirt and moisture away from each connection. All of the MSD's primary wiring meets MIL-86A specifications with special tinned conductors for superior crimps. Inside the strong cast aluminum housing, the multiple sparking CD circuits are encased in a clear two part silicone elastomer for the ultimate in vibration protection. A special clear base plate is also installed for easy tech inspection. Add a set of sturdy vibration mounts and the 6TN and 6ALN are virtually vibration proof! The 6TN is equipped with a special 4-Pin connector that plugs directly into an MSD Soft Touch Rev Control, PN 8738, while the 6ALN has a built-in Rev Control. These rev controls are adjustable with plug-in modules and will save your engine from overrev damage caused by missed shifts or driveline failure.

MSD6401 MSD 6TN, 4, 6 (Even-Fire V6 only) & 8-Cyl
MSD6430 MSD 6ALN, 4, 6 (Even-Fire V6 only) & 8-Cyl
NOTE: The 6ALN is supplied with a 3000, 6000, 7000 and 8000 rpm module. MSD 6 Series Ignitions are not compatible with distributorless systems.

MSD 7AL-2PLUS IGNITION

The "Plus" model updates the original 7AL-2 with improved internal components plus our engineers added a 2-Step Rev Control and a useful diagnostic LED. Over 50% more spark energy! Visually, you'll notice the two terminal strips that allow for easier wiring in your race car. The LED over the power connections will come in handy for troubleshooting as it flashes only when the coil fires. That way you know that the coil, the trigger source and ignition are all functioning properly. The mounting pattern is the same as the 7AL-2 and is supplied with vibration mounts and a few rpm modules.

MSD 7222* MSD 7AL-2 Plus Ignition Control

MSD72223 MSD 7AL-2 Plus Ignition Control BLACK

NOTE: MSD 7 Series not compatible with distributorless systems.

MSD 7AL-3

PRO DRAG RACE IGNITION

The MSD 7AL-3 Ignition Control has been a favorite of sportsman racers as well as racers that run multi-stage nitrous systems. The ignition combines high output spark energy for high compression race engines combined with the most popular drag racing accessories including a 3-Step rev limiter, 4-stage retards, a start retard and RPM Activated Switch. In 2013, MSD is relaunching the 7AL-3 with upgraded features, a new look and updated internal components including surface mount circuitry. The new ignition, PN 7330, is easy to spot with a black anodized housing and features a new adjustable start retard circuit. Racers will also be happy to learn that the ignition can now be used on 4, 6 or 8-cylinder engines.

MSD7330 MSD 7AL-3 Ignition Control, V8 only

MSD 8-Plus

The MSD 8-Plus Ignition produces the same extreme output of the original 8-Series, yet is now in a smaller housing with improved efficiency and internal components. One distinct change is now a built-in 2-Step Rev Control. Now you can switch between two rev limits without extra wiring or housings. For those that are looking for a dual fire MSD 8, the new 8-Plus is all you need. Our engineers were able to deliver an ignition that is capable of firing two coils at once for those extreme racers using dual plug race setups.

Part No MSD7805

DIS PLUS IGNITION CONTROLS

The mid 1980's were the beginning of the end for distributors in regard to new cars. The Buick Grand Nationals started using coil pack technology while many other GM vehicles were using dual tower coil packs sometimes known as Waste Spark systems. When Ford moved to the 4.6L Modular engine in the '96 Mustang, there were two coil packs with four towers each set up as a Waste Spark. Other common applications came from Mitsubishi and eventually Chrysler systems. MSD's DIS Ignition Controls are designed for engines with coil pack, waste spark ignition systems. The DIS-2 has two channels, to fire two coil packs, while the DIS-4 is capable of firing up to four coil packs (or even for individual coils). Each Control delivers full power Capacitive Discharge sparks from idle through racing rpm. Below 3,000 rpm there is a series of multiple sparks that last for up to 20° to improve idle, starting and throttle response. The adjustable features of the DIS Ignitions have also been upgraded with rotary dials. These provide easier, and more precise adjustments of the overrev limiter and the holeshot rev limit. Also, there is now a step retard that can be wired directly to a nitrous system or switch for activation!

MSD 62152 MSD DIS-4 Plus
(For use on 6 or 8-cylinder engines with two, three or four coil packs.)

PROGRAMMABLE DIGITAL-7 PLUS

If you're a consummate engine tuner and know how to take advantage of minute changes in timing during a quarter mile pass, then the Programmable Digital-7 Plus is the Ignition for you! All of the standard programmable features such as Individual Cylinder Management, Step Retards, Rev Limits, Shift Points and more are included in the Plus version but you also get more. Much, much more. A MAP sensor is required for the boost circuit. The Ignition is supplied with wiring harnesses, mounting hardware, an RS232 computer harness and the Pro-Data+ software on a floppy disk. (The Hand Held Monitor, PN 7550, can also be used for programming.) It will accept trigger signals from a points/ECU output or a magnetic pickup. The recommended Coils are MSD8251 or MSD8261.

MSD7531 Programmable Digital-7 Plus

MAP SENSOR

A MAP sensor is required for the Boost Retard feature. Be sure to know the approximate amount of boost you will be running in order to select the correct sensor.

MSD23111 1-BAR, 2 - 15 psi
MSD23121 2-BAR, 2 - 30 psi
MSD23131 3-BAR, 2 - 45 psi

Pro-Data+ software

The Pro-Data+ software makes setting up your Programmable Ignition easy! There is a Gear Retard chart where you map out each curve and another chart for the boost retard curve. Just a click of your mouse adds or moves points on each curve. There is also a boost pressure gauge along with a retard dial and tach so you can view the changes in real time.

PROGRAMMER/MONITORS

If you do not have a laptop or PC, all of the CPC Ignition Control's optional programs can be set with this hand held Programmer/Monitor. The LCD will display the programming options which you can select to adjust or view the program that is already in the ignition. The unit is easy to handle, even with race gloves on, and weighs in at under half a pound.

MSD7550 Programmer/Monitor

HIGHER OUTPUT RACE ONLY DIS IGNITION CONTROLS

The DIS Ignitions all deliver a stout, CD spark that is capable of burning the majority of air/fuel mixtures. There are of course exceptions, such as full bred race engines running high boost pressures from turbos, blowers or nitrous. To answer these needs, a Higher Output version of the DIS Ignition Controls. The DIS Plus HO Ignitions produce an incredible 170 millijoules of spark energy with 470 primary volts. This increased output will light up fuel mixtures even under extreme cylinder pressures. The DIS-HO boxes are not CARB approved and are designed for drag racing applications only. **NOT FOR STREET USE SHORT DURATION.**

MSD62153* DIS-4 PLUS HO, 2, 3 or 4-Coil Packs

SYNCHRONIZATION PICKUP KITS

To take advantage of the Programmable Digital-7's Individual Cylinder Management system, a synchronization pickup must be incorporated so the ignition knows exactly which cylinder is firing. MSD offers two ways to accomplish this.

SPARK PLUG WIRE SYNC KIT

This pickup simply installs to the number one sparkplug wire and senses the trigger signal and sends this information to the Ignition through a fiber optic cable.

MSD7555 Spark Plug Wire Sync Kit

CAM SYNC PICKUP

The Pickup Kit is supplied with a non-magnetic pickup, connectors, the magnet and retainer. You will need to fabricate a bracket assembly and install the magnet to the cam gear.

MSD2346 Universal Cam Sync Pickup Kit

DISTRIBUTORLESS TACH DRIVER

Ever wonder how you can install an aftermarket tachometer on a vehicle with no distributor and multiple coil packs? MSD has the answer with the new Distributorless Tach Driver! The compact Tach Driver measures only 1.5" x 3.5" x 2" and is potted with a polyurethane compound for vibration and water protection so it can easily be mounted under the hood. It wires inline on the coils' 12 volt supply wire where it senses the current going through this wire and converts this information into a 12 volt output signal that most aftermarket tachometers use as a trigger signal. It can be used on 4, 6 or 8-cylinder engines.

MSD8913 Distributorless Tach Driver

NOTE: Not for use on Chevrolet LS-1 style engines.

DUAL CHANNEL IGNITION ADAPTER

In some instances when you install an MSD Ignition, the factory ECU may not be able to distinguish when the coil fires. This is the signal that is also responsible for firing the injectors (or the tachometer), which may cause a no-run situation. The Dual Channel Ignition Adapter simulates the original coil trigger signal thus allowing the ECU to properly trigger both the tach and fuel injection with the MSD DIS Ignition installed. In most cases, the Adapter plugs directly into the MSD's Harness. For vehicles using an MSD DIS-2 Ignition, only one PN 8912 is required. For DIS-4 applications, two PN 8912's are required.

MSD7730

MSD7761

MSD77303

MSD Power Grid System

MSD set the standard in programmable ignition systems. In fact, every NHRA Pro Stock championship in the last few years has been with an MSD Programmable 7. Drag radial, twin turbo outlaw cars and 10.5-tire classes all rely on the advanced programming of MSD's Programmable 7 Ignitions. Wait until they see the Power Grid. The Power Grid Ignition System is the next evolution of our Programmable 7-Series Ignition Controls. The Grid incorporates an efficient 32 bit microcontroller and an all new software program, called MSD View, and is USB compatible. The Windows based software is designed with tabs to help racers easily select different programming windows and parameters. Also, the data acquisition files of the ignition are now captured on a micro SD card for ease of storage and reviewing. The Power Grid Ignition incorporates CAN-Bus technology which reduces the amount of wiring and simplifies the addition of accessory modules. The CAN-Bus is a common harness that accessory controls are connected to and easily brought into the programming library of the View Software. With this technology, racers can connect the Power Grid system directly into their Racepak Data Recorder and other Racepak products. The Power Grid Controller is the brains behind the entire system and can be used with any MSD Ignition or the Pro Mag to provide advance ignition tuning capabilities. While it is compatible with all MSD boxes, the new Power Grid System Controller has been specially designed to mount to the Power Grid-7 box. Also, this new Ignition packs higher output than the current programmable units!

The Power Grid Controller is supplied with the View Software, wiring harness, micro-SD card and mounting hardware. The ignition, available separately, is supplied with the harness and mounting hardware.

- MSD7720 MSD Power grid 7 ignition controller
- MSD7730 RED MSD Power grid system controller
- MSD77303 BLACK MSD Power grid system controller
- MSD7740 MSD Power grid 4 connector can bus hub
- MSD7751 MSD Power grid manual launch control
- MSD7761 MSD Power grid rev & time base & slew rate module
- MSD7762 MSD Power grid boost retard module
- MSD7763 Boost Controller, Up to 43.5 PSI
- MSD77403 Black MSD Power grid 4 connector can bus hub

POWER GRID POWER MODULE ONLY

The MSD Power Module is a fully programmable, four stage solid state relay that can handle up to 20 Amps of current per channel. The Power Module eliminates the need for electromechanical relays, fuses and timers. Outputs can be controlled independently or simultaneously, giving great flexibility. It can be configured as a digital output (i.e. ON/OFF) or as a Pulse Width Modulated output (i.e. PWM) with user-programmable frequencies up to 10 Kilohertz. Outputs can use Time, RPM or temperature to control fans, pumps, nitrous systems and much more. A High Speed Data Logger can be used to record all functions when paired with the MSD PN 7730 Power Grid.

- Takes the place of 4 electromechanical relays
- Built-in overcurrent protection, no fuses needed
- 80 Amp capacity, 4 channels rated up to 20 Amps each
- Each channel is controlled via input wires or as programmed in the MSDView software
- Can be used stand alone or with MSD Power Grid PN 7730
- Trigger signals can include power, ground, temperature, or time
- Data Acquisition available when used with MSD Power Grid
- Available in Red (PN 7764) or Black (PN 77643)

MSD7764 RED Power Grid Module
MSD77643 BLACK Power Grid Module

PRO MAG A/FUEL POWER GRID

The Pro Mag A/Fuel Power Grid Controller is designed for use with the MSD Pro Mag 44 in drag racing applications, which compete in the Top Alcohol Dragster category or sanctioning bodies that allow electronic ignition timing control when using a single or dual Pro Mag system. Although the Power Grid Controller has dual outputs it can be used with, a single Pro Mag or Dual Pro Mag that allows you to control Ignition Timing based on Time. The additional features such as Individual Cylinder Timing, which allows you to change timing on each cylinder or the Pedal Retard that allows retarding timing upon pedal lift with and Inhibit delay and an auto pickup signal selector. This means that in the case of a crank trigger pickup failure, it will trigger the dead channel running magneto seamlessly.

- Provides a programmable time-based timing curve with up to 30 points
- Stores up to 12 different timing maps
- Easily transfer or change timing maps while in the staging lanes
- Limited Bluetooth Connection
- Individual Cylinder Timing
- Data Acquisition
- Configure Power Grid data to Racepak

MSD8772 Pro Mag A/Fuel Power Grid

MSD WIDE BAND O2 FOR POWER GRID

Add valuable data logging capability to your Power Grid with the addition of the plug-n-play Wide Band O2 Module. Aside from providing O2 data to your Grid, the module also provides a 0-5v output to drive an air/fuel ratio gauge or provide a signal to other data loggers. Multiple modules and sensors can be connected to a single Power Grid setup if desired. The completely sealed unit uses a Bosch 4.9 oxygen sensor, and is easy to set up and no free air calibration is required.

- Plug-n-play with MSD Power Grid
- Easy set-up! No free air calibration required
- Completely sealed unit for durability in race environments
- Bosch 4.9 oxygen sensor
- 0-5v output to run an air/fuel gauge or data logger
- Dual-colour LED provides on board diagnostics
- Multiple modules can be used on a single Power Grid
- Data logs air-fuel ratio and heater voltage
- Fuel Calibration Options for gasoline, methanol, ethanol, E85, propane and diesel
- Custom Fuel Calibration option can be programmed by user

MSD7765 MSD Wide Band O2 for Power Grid

6-Hemi Harnesses

Chrysler used two different coil packs on the late model Hemi engines. For connections on a carbureted engine a Harness will be required. For EFI engines, the Harness and an Adapter will be required.

Harness:
 '03-'05 - MSD 88863
 '06-'08 - MSD 88864

Adapter for Factory EFI:
 '03-'05 - MSD 88815
 '06-'08 - MSD 88816

VIBRATION MOUNTS

- MSD8800** Vibration Mounts, 7AL-2, 7AL-3, 8 & 10 Series, 4 Pack
- MSD8823** Vibration Mounts, 5 & 6, Digital 7 Series, 4 Pack
- MSD8825** Vibration Mounts, Pro Power Coil, 3 Pack

E6 IGNITION CONTROL

- Multi-Spark CD, for race or street, up to 14.5:1 compression ratio, nitrous-oxide, supercharged and turbo
- More HP, torque, crisper throttle response
- For 4, 6, 8 cylinder with distributor
- HI-6 delivers higher spark-gap current than comparable digital CD ignitions
- "Plug-n-Go" universal harness included
- Sequential rev limiting stops engine damaging "popping and banging" at rev limit
- Bigger rotary switches with precise "Click-In" detents for easy rev limit adjustments; no "chips" needed; adjusts in 100 RPM increments
- Shock mounts included for race conditions.
- Points, module, mag triggered
- Fully potted with new, soft urethane for heat, dirt and moisture protection
- Surface-mount, fully digital components; the most reliable CD ignition available

FAST6000-6400 Single stage Rev Limiter
FAST6000-6424 Dual stage Rev Limiter

E6 IGNITION CONTROL & COIL KIT

- FAST E92 Coil
- Multi-Spark CD, for race or street, up to 14.5:1 compression ratio, nitrous-oxide, supercharged and turbo
- More HP, torque, crisper throttle response
- For 4, 6, 8 cylinder with distributor
- HI-6 delivers higher spark-gap current than comparable digital CD ignitions
- "Plug-n-Go" universal harness included
- Sequential rev limiting stops engine damaging "popping and banging" at rev limit
- Bigger rotary switches with precise "Click-In" detents for easy rev limit adjustments; no "chips" needed; adjusts in 100 RPM increments
- Shock mounts included for race conditions.
- Points, module, mag triggered
- Fully potted with new, soft urethane for heat, dirt and moisture protection
- Surface-mount, fully digital components; the most reliable CD ignition available

FAST6000-6405 Single Stage Rev Limiter
FAST6000-6424KIT Dual Stage Rev Limiter

XR700 Points-To-Electronic Ignition Conversion Kits

The Fireball XR700 is designed for replacement of breaker points and failed OE modules in street driven vehicles. XR700 units are compatible with the original coil and ballast resistor. Because there are no contact points or rubbing block to wear out, you set the engine timing once.

- FAST700-0226XR700 - Ford V8, Acc34, Delco 4,6,8**
- FAST700-0231XR700 - Bosch, Lucas, Jap 4,6,8Cyl, Mallory/Marelli 4 Cyl**
- FAST700-0300XR700 - Lucas 4,6,8,12 Cyl**
- FAST700-0309XR700 - Mallory V8 YL & Uniilite.**
- FAST700-0292 74-83 Imports 4 & 6 Cylinder Bosch, Hitachi & Nippondenso OE Electronic modules.**

XR3000 Points-To-Electronic Ignition Conversion Kits

The XR3000 points conversion ignition is the high performance version of the proven XR700, and produces up to 150% greater spark gap energy than stock points-type systems, significant extension of the upper RPM ignition performance limit. Allows use of high output coils without requiring ballast resistor. Suit most points type distributors. Maximises spark duration, for quicker starting and responsive off-idle performance.

- FAST3000-0226 XR3000 - Ford V8, Acc 34, Delco 4,6,8 Cyl**
- FAST3000-0231 XR3000 - Bosch, Lucas, Jap 4,6,8 Cyl**
- FAST3000-0300 XR3000 - Lucas OPUS 4,6,8,12 Cyl**
- FAST3000-0309 XR3000 - Mallory V8 YL & Uniilite**

XR700 and XR3000 Features

- INFRARED OPTICAL TRIGGER** Infrared beam is unaffected by oil, moisture and dust to provide precise, stable ignition.
- EASY INSTALLATION** No special tools or wiring required.
- RUGGED LOW PROFILE EXTRUDED ALUMINIUM HOUSING** Easy to mount in cramped engine compartments
- FULLY PROTECTED** Two step acrylic conformal coating and epoxy encapsulation protects components and increases resistance to shock, vibration and moisture. Resistant to typical underhood temperature extremes and can be mounted safely in the engine compartment

OPERATING SPECIFICATIONS

- Operating Voltage** 6-18 V (Reverse Polarity Protected), negative ground only.
- Coil Current Limit** 4.5 amps for XR700 (limited by ballast resistor) 5.5 amps for XR3000
- RPM Range** 6,500RPM for XR3000, 6,000RPM for XR700 RPM range higher for 4 and 6 cylinder engines
- Primary Voltage Output** 400 volts (inductive discharge)
- Primary Energy Output** 90 millijoules for XR3000 with PS91 60 millijoules for XR700 with PS20/40 coil
- Primary Spark Gap Current** 100 millijoules for XR3000 with PS91 60 millijoules for XR700 with PS20/40 coil
- Spark Duration** 300 microseconds at 6,000 RPM
- Operational Limit** Continuous maximum RPM at 185 degF

XR700 & XR3000 Parts

- Ignition Modules & Optical Triggers**
- FAST700-0001 XR700 Ignition Module** (12 Volt Neg or Pos Ground)

ELECTRONIC TIMING & RPM CONTROLS

Start and Step Timing Control

This compact controller provides an adjustable start retard to help high compression engines crank over easily, plus has a single stage retard. The unit measures 2.75" x 2.37" x 1.25" and simply connects between the distributor and the MSD Ignition. Two rotary dials offer simple adjustments. Perfect for high compression nitrous cars.

MSD8987 START AND STEP TIMING CONTROL

Timing Twister

If you need to adjust and control the timing of your late-model GM or Ford, you need a Timing Twister! User friendly control plugs into the stock wiring harness and gives you the ability to adjust the engine's timing with the twist of a dial. The Timing Twister has four rotary dials that give you the ability to advance the timing curve, set up a step retard or even select a retard rate based on boost pressure. Control over the timing can help improve economy, improve performance and help tune the engine for other modifications. The Timing Twister does not modify ignition timing at idle, but becomes active above 1,800 rpm. Once above that rpm, the entire timing curve can be advanced up to 9° in 1° increments. There is another setting for a wire-activated step retard, primarily designed for use with nitrous oxide. Another great feature is for the forced induction crowd. When used with the optional MAP sensor, you can easily dial in a retard that is based on boost pressure. Twist in .1° - 1.9° of timing per pound of boost to retard the timing up to 30°. If you ever need to bypass the modified timing settings, there's a dial to twist and the factory curve will be used. How easy is that! Go ahead, give your timing a twist!

Timing twisters are available for:
GM LS1/LS6 MSD8625
GM LS2/LS7 MSD86251
Ford 4.6L, '96-'04 MSD86252

ADJUSTABLE TIMING CONTROL

The MSD Adjustable Timing Control puts you in control of your ignition timing from the driver's seat! A dash mounted control knob allows you to adjust the ignition timing to compensate for changes in altitude, low octane gas, or heavy loads. For cars driven every day but raced occasionally on the weekends, this control is perfect. Increased fuel mileage and performance are just some of the benefits as the ignition timing can be advanced or retarded to prevent engine detonation. The control knob mounts to the dash board for easy and accurate timing adjustments up to 15°. The Control can be used on 4, 6 and 8-cylinder engines and must be used with an MSD Ignition Control.

MSD8680 Adjustable Timing Control, MSD Ignition

BOOST TIMING MASTER FOR MSD IGNITIONS

The Boost Timing Masters allow you to adjust the amount of ignition retard from 1° per pound of boost to 3° per pound via a control knob that you mount on the dashboard.

This way you can make adjustments on the fly to prevent detonation as fuel quality or altitude and air quality changes up to a maximum of 15° retard. You can also set a boost pressure point to start the retard. There is a boost pressure port to connect to your manifold and the BTM wires easily to the MSD Ignition Control. NOTE: This unit must be used with an MSD 6, SCI, 7, 8 or 10 Series Ignition.

MSD8762 BTM for MSD Ignitions

STARTER SAVER WITH SIGNAL STABILIZER

When you install a crank trigger system, having locked out timing may put a strain on the starter and flywheel.

This compact controller provides a retard that automatically retards the timing during cranking to ease the pressure. The MSD Starter Saver measures only 1.5" X 3.5" X 2" and wires into your ignition system with only four wires. It can be programmed to retard the timing 10° or 20° during cranking only. The retard is activated when the engine begins cranking and is deactivated once the engine reaches over 800 rpm. (If the engine rpm drops below 500 rpm it will activate again.) The Starter Saver receives the trigger signal through an MSD Crank Trigger pickup or the Distributor's magnetic pickup.

MSD8984 Starter Saver with Signal Stabilizer

NOTE: The Starter Saver can only be used on V8 applications using an MSD Distributor or Crank Trigger

**DIGITAL MULTI-RETARD**

The Digital Multi-Retard provides four different stages of retard along with an adjustable start retard feature - all of this with no modules!

The MSD Multi-Retard uses a high speed RISC microcontroller to direct the timing functions. This controller can make extremely quick compensations to the timing while maintaining accuracy to within 1°. There is also an innovative Magnetic Pickup Compensation circuit built-in to allow for rock steady timing with a variety of different mag pickups. There are four separate retard stages that can be activated independently or together for a total sum of retards. Each stage is adjustable from 0° - 9° and a maximum of 20° of retard can be pulled out. There is also an optional start retard circuit that can be programmed to retard the timing 5°, 10°, 15° or 20° during cranking. The Digital Multi-Retard can be used on a 4, 6 or 8-cylinder engines and must be used with an MSD Ignition Control.

Digital Multi-Retard MSD8975

**RETARD MODULES**

MSD Retard Module Kits give you a full selection of retard modules to be used with your Timing Controls.

Retard Module Kits:

MSD8774 11°, 12°, 13°, 14°, 15°
MSD8775 16°, 17°, 18°, 19°, 20°
MSD8776 5°, 6°, 7°, 8°, 9°, 10°
MSD8777 1°, 2°, 3°, 4°, 5°
MSD8773 Zero Degree Module

**RETARD MODULE SELECTOR**

The Retard Module Selectors allow you to select between 12 retard amounts with the turn of a dial. The Selectors plug into the retard module receptacle of any MSD Timing Controls.

MSD8676 Retard Module Selector, 0°-11°

**PROGRAMMABLE TURBO LAUNCH CONTROLLER**

This stand alone microprocessor boost controller is exactly what-over-the-top turbo powered cars need. This Control uses an extremely fast microcontroller to control boost pressure via an electronically operated waste gate valve. Through easy to use Pro-Data+ software, you can control the amount of boost pressure used during the burnout and map a boost curve based on time for the launch and entire run. Control over the boost pressure is achieved through a PWM output that controls a three way electrically operated air valve that is installed between the turbo and the waste gate actuator. (This can also be programmed to your particular actuator.) To help in setting up and tuning the Controller, there is also an acquisition file that records the engine rpm, manifold pressure and the pulse width modulator output. After a pass you can save and download the file to review each pass.

Programmable Turbo Controller MSD7562

**MSD MULTI-FUNCTION IGNITION CONTROLLERS**

MSD engineers incorporated the favorite controls of the race proven Programmable Digital-7 Ignition into an accessory for racers already using an analog MSD Ignition Control with a rev limiter such as the MSD 6AL, SCI-L or 7AL-2. The Controllers are loaded with easy to program adjustments. The Controller lets you adjust the timing of every cylinder, map a complete timing curve, pull timing out during the launch, set rev limits, shift points, start retard and much more. Don't let all of these functions worry you. MSD developed two very easy ways to program the Controllers. For PC users, MSD offers the Pro-Data+ software or for the noncomputer racers, there is a hand-held Programmer Monitor. The Multi-Function Ignition Controllers can be triggered with a points/ECU trigger, magnetic pickup in a distributor or the non-magnetic pickup of a crank trigger. It must be used with an MSD Ignition Control and can be used on 4, 6 or 8-cylinder engines. Each is supplied with Pro-Data+ software disk, PC harness, vibration mounts, wiring and thorough instructions.

MSD8979 Multi-Function Ignition Controller

MSD8977 Multi-Function Ignition Controller with Boost Retard

**SOFT TOUCH REV CONTROL - MSD 6T, 6TN, 6HVC**

This rev limiter is designed exclusively for the MSD 6T, 6TN and 6-HVC Ignition Controls. It has a special 4-wire connector that plugs into the MSD Ignition. The Soft Touch is a very smooth rev limiting action that "holds" the engine at the selected rpm limit without backfires, extreme roughness or engine damage. The rpm limit is adjusted with plug-in modules and 6,000, 7,000 and 8,000 modules are supplied.

NOTE: Must only be used with an MSD 6T, 6TN or MSD 6 HVC Ignition and is adjustable for 4, 6 and 8-cylinder operation.

Soft Touch Rev Control, MSD 6T/6TN, MSD8738 MSD 6 HVC Ignition

**SOFT TOUCH REV CONTROL™**

For points and OEM Ignition systems. The Soft Touch Rev Control, MSD8728, is designed to be used on standard points ignition or inductive ignition systems. This means that the MSD8728 can be installed on engines with a GM HEI Ignition, Ford or Chrysler electronic ignition, any standard breaker points systems or even with an MSD 5 or Blaster Ignition (non-CD ignitions). The Soft Touch Rev Control is adjusted with plug-in modules and is supplied with 6,000, 7,000 and 8,000 rpm modules. When the engine reaches your set rpm, the Soft Touch circuitry kicks in and drops the spark to certain cylinders. This limiter produces very accurate and smooth, backfire free rev limits. Can be used on 4, 6 or 8-cylinder engines with inductive ignitions. NOTE: Not for use with CD Ignitions.

MSD8728 Soft Touch Rev Control, Non CD Ignitions

**SOFT TOUCH MARINE REV CONTROL**

The Marine Rev Control plugs directly into the 6M-2 Marine Ignition and will protect your engine from over-revving caused by broken drive components or when the boat's drive mechanism comes out of the water. Circuitry in the Soft Touch drops the spark from one cylinder at a time and then fires that cylinder on the next cycle for a smooth limiting action without backfires or roughness. The rpm that the limiting action occurs at is adjusted with plug-in modules and is supplied with modules for 4,000, 6,000 and 8,000 rpm.

MSD8768 Marine Rev Limiter, for MSD 6M-2 Ignition

**Multi-Step RPM Selector, 2-Step Digital**

These MSD 2-step rev controllers coupled with MSD's digital 6AL (msd6425) ignition box let you choose from two different rpm limits that can be activated at different times. For example, you can use a lower-rpm setting for staging and then automatically switch to a higher-rpm setting after you release your trans-brake or line lock. The 2-Step is also digitally controlled and connects to the Digital 6AL's gray tach output wire. There are two easy to read rotary dials that let you set the launch rpm in 100 rpm increments from 2,000-11,800 rpm. There is an activation wire that connects to the transbrake, a clutch switch or to the line-lock to activate the low rpm limit. When that switch is released, the low rpm limit is turned off and the car launches hard!

MSD8732 MSD TWO STEP MODULE SELECTOR DIGITAL

**TWO AND THREE STEP MODULE SELECTORS**

The MSD Module Selectors allow you to choose two or three different rpm limits that can be activated at different times. With this ability, the possibilities are endless. As an example, we'll use a drag car with a Three Step Module Selector plugged into the rpm socket of a 7AL-2 Ignition. The different rpm modules are activated when 12 volts is applied to a corresponding wire. By connecting one wire to the line-lock circuit, one module will be activated during the burnout. This helps keep tyre temperatures consistent and when the line-lock button is released, the limit turns off. When you're on the starting line, you can activate the second limit through the clutch or trans switch. This provides a steady and consistent rpm for firm holeshots every time. When no modules are selected, the remaining high limit is active to protect the engine in the event of driveline failure. The Two Step works the same, but only with two different limits. The Module Selectors can also be used with an MSD Timing Control. By plugging the Selector into a retard module socket, you can activate different retard amounts at select times. This is a great feature for engines being upgraded to a multi-stage nitrous system. With the addition of an RPM Activated Switch, you can use the Two Step to activate a shift light at different rpm. The Module Selectors must be used with an MSD Soft Touch Rev Control or a Timing Controller with a high speed retard module. No rpm or retard modules are supplied.

MSD8739 Two Step Module Selector

MSD8737 Three Step Module Selector

**RPM ACTIVATED SWITCHES**

MSD8950 RPM Activated Switch

MSD8956 RPM Activated Window Switch

MSD also offers an RPM Activated Switch to be used with Magnetos. A 12 volt source is required.

**LS 2-Step****Launch Control**

GM Performance fans will love this direct plug-in 2-Step Launch Control. The unit is easy to install with factory style connectors for a splice-free installation. When you're staged, you can hold the pedal to the floor while the rpm stays at a consistent level producing consistent launches.

2-Step for GM LS Series engines MSD8733

**FORD COYOTE 5.0L****2-STEP 2011-ON**

When activated, the rpm will be held at a steady rpm and once the green light comes on, release the clutch and take off - but be sure to hold on! The rpm is adjusted with two built-in rotary dials ranging from 1,800-9,900 rpm in 100 rpm increments. A handy LED shows when the launch rev limit is active.

- Easily set a launch rpm for consistent holeshots
- Connects to the factory coils for easy installation
- The best way to launch hard

Ford Coyote 5.0L 2-Step 2011-On MSD8731

**TPS/RPM Activated Switch**

MSD is making it easy to activate a nitrous system on late model engines with the new TPS/RPM Switch. This switch is easy to use with push button programming and works with mechanical switches or fly-by-wire systems. You can easily set an rpm for precise activation in conjunction with a TPS setting. For high rpm protection you can select an rpm to deactivate the system. The universal switch can also handle up to 25 amps so in most cases a relay and extra wiring isn't needed.

TPS/RPM Activated Switch MSD8940

**Manual Launch Control and Shift Light**

This handy Controller lets you change the launch rpm setting of MSD's Programmable Controls for last second changes with the turn of a dial. This way, if you're in the staging lanes you can compensate for changing track conditions quickly. NOTE: For use with MSD Programmable Digital Controls.

Manual Launch Control MSD7551

**MSD ADJUSTABLE LOW RPM MODULE**

With this module, the user you can dial-in any rpm between 1,000 and 3,000 rpm by simply turning a potentiometer. Ideal for vehicles with automatic transmissions that are using the MSD Two Step Module Selector to leave the starting line below 3,000 rpm.

MSD8677 Adjustable Module, 1,000-3,000 RPM

DIGITAL RPM WINDOW SWITCH

Are you looking for an RPM Switch that will turn a circuit on, then off at a different rpm? How about one for your late model coil-per-cylinder ignition system? Or, something for your car with dual coil packs? Maybe one for a Viper or even a Harley Davidson? Look no further, our new Digital RPM Window Switch will do it all! This Switch will accept an input rpm signal from a coil negative terminal (for stock ignitions), a tach output from an ignition control, an ECU tach output or even a 5 volt tach signal. Another great feature is that no rpm modules are needed! The rpm activation points are programmed by simply scrolling through the LED display to your desired rpm amounts. The switch has two outputs; one Normally Open, the other is Normally Closed. It can be programmed from 200 rpm to 15,000 rpm in 100 rpm increments. It can be used with an input voltage of 9-18 volts.

MSD8969 Digital RPM Window Switch

TACH SIGNAL GMR PICKUP

This little device simply attaches, no splicing or cutting, to a current carrying wire and turns that information into a 12-volt rpm signal. This signal can be used to activate a shift light, rpm activation switch or a tachometer. One example is to connect the GMR, which stands for Giant Magnetoresistive, to a diesel injector current wire. This will produce a signal that can be used to trigger a tachometer or a shift light! There's no easier way to connect an rpm device to a diesel engine! Another example is on a late model engine equipped with a coil-on-plug ignition system. One of the coil's primary current wires is simply routed into the pickup clip and GMR converts this pulsing into a 12-volt signal for a shift light!

MSD8918 GMR Pickup

POINTS OR AMPLIFIER (FACTORY IGNITION MODULE)

If you are triggering an MSD Blaster, 5, 6, SCI, or 7 Series Ignition with its white wire or points terminal, you will need the MSD8910 Tach Adapter. The MSD8910 will correct the operation of most voltage triggered tachometers or fuel injection systems that do not work directly off the tach output terminal of the MSD Ignition Unit. MSD8910 is for use on non-current limiting ignitions, originally equipped with a ballast resistor and MSD8910-EIS is designed for current limiting ignition systems (non ballast resistor systems).

MSD8910 Tach/Fuel Adapter (Points)
MSD8910-EIS Tach/Fuel Adapter (Electronic)

RPM Module Kits

RPM module kits include five modules in 200 rpm increments. Each kit is within a 1,000 rpm range. For example, the MSD8745 is supplied with: 5,000,5,200, 5,400, 5,600, 5,800 modules.

EVAN INCREMENTS

3,000-3,800:	MSD8743	3,100-3,900:	MSD87431

ODD INCREMENTS

Programmable Fuel Pump Voltage Booster

The updated Fuel Pump Booster is an easy way to maintain the proper fuel pressure on your car after adding a power adder such as a turbo or supercharger. What is updated in order to maintain the proper fuel delivery. The amount of increase is adjustable from a range of an additional 1.5 - 22 volts up to 30 psi which can all be set and adjusted from your PC with MSD's easy to use Windows based software. The MSD Booster will wire to the factory fuel pump relay or with a secondary booster pump.

MSD2351 Programmable Fuel Pump Voltage Booster

LSx Trigger Converter

The GM LS Series engines are being built for a lot of different performance and racing applications. You can see good ol' hot rodder ingenuity taking place as racers are running carburetors and even using distributors on these engines! This device plugs into the factory crank sensor of an LS1/LS6 engine and converts the factory trigger signal into a 12-volt square wave signal to trigger an MSD Ignition Control such as a 6 or 7 series ignition control. For racers that are incorporating a front mount distributor to their LS engines, this means you don't need to run an external crank trigger. Note: A distributor is required, such as MSD's new Front Mount race distributor, MSD8712.

LSx Trigger Converter MSD6301

MODULE HOLDER

The MSD Module Holders are exactly what you need to keep track of your MSD RPM or Retard Modules. Machined from a solid piece of aluminum or a new flexible plastic piece are available.

MSD8755 Module Holder

RPM MODULE SELECTORS

The RPM Module Selector plugs directly into the rpm module socket on all MSD Soft Touch Rev Controls & accessories that use plug-in modules. The user can then select between twelve different rpm limits by simply turning the knob. Six models are available to cover a range from 3,000 rpm to 12,800 rpm in 200 rpm increments.

MSD8670 Module Selector, 3,000-5,200
MSD8671 Module Selector, 4,600-6,800
MSD8672 Module Selector, 6,000-8,200
MSD8673 Module Selector, 7,600-9,800
MSD8674 Module Selector, 9,000-11,200
MSD8675 Module Selector, 10,600-12,800

TACH & FUEL ADAPTERS

DISTRIBUTORLESS TACH DRIVER

Ever wonder how you can install an aftermarket tachometer on a vehicle with no distributor and multiple coil packs? MSD has the answer with the Distributorless Tach Driver! The compact Tach Driver measures only 1.5"x 3.5"x 2" and is potted with a polyurethane compound for vibration and water protection so it can easily be mounted under the hood. It wires inline on the coils' 12 volt supply wire where it senses the current going through this wire and converts this information into a 12 volt output signal that most aftermarket tachometers use as a trigger signal. It can be used on 4, 6 or 8-cylinder engines. Note: Not for use on odd-fire engines.

MSD8913

Distributorless Tach Driver

DUAL CHANNEL IGNITION ADAPTER

In some instances when you install an MSD Ignition, the factory ECU may not be able to distinguish when the coil fires. This is the signal that is also responsible for firing the injectors (or the tachometer), which may cause a no-run situation. The Dual Channel Ignition Adapter simulates the original coil trigger signal thus allowing the ECU to properly trigger both the tach and fuel injection with the MSD DIS Ignition installed. In most cases, the Adapter plugs directly into the MSD's Harness. For vehicles using an MSD DIS-2 Ignition, only one unit is required and for DIS-4 applications, two units are required.

MSD8912

Dual Ignition Adapter

MSD89121 Dual Ignition Adapter Ford CPC Systems

STAND ALONE SOLID STATE RELAY

Clean up your wiring with an MSD Solid State Relay Block. This module takes the place of 4 standard relays and eliminates unsightly wiring. 4 independent channels can be activated using either power or ground. Each channel is capable of handling up to 20 Amps of continuous current providing up to 80 Amps of power. Controls electric fans, water pumps, nitrous solenoids, auxiliary lighting and any other electrical accessories that would normally require a relay. LED status indicators ensure proper wiring and operation of each channel. Should a problem arise, the relay block has built-in automatic over-temp, short circuit and overload protection. The 7564 can easily be mounted using the supplied hardware and mounting tabs that can be rotated 90° to accommodate various mounting locations. It's compact and clean design will make your wiring project a breeze.

- 4 Channels, 20 Amps each
- Clean, easy install with minimum wiring
- Over temp, short circuit and overload protection
- Diagnostic LED's
- Multiple mounting options
- Activate with power or ground
- Channels can be run in parallel for devices requiring more than 20A single-channel rating

MSD7564 Red Stand Alone Solid State Relay
MSD75643 Black Stand Alone Solid State Relay

Universal DIS Cam Sync

The Universal DIS Cam Sync Generator will produce a sync signal for the following MSD Ignition components; Programmable DIS-2, PN 6212, Multi-Channel Controllers, MSD6562 and MSD6563. This way you can take advantage of our individual cylinder timing feature on these controls. The Cam Sync Generator will produce a cam sync signal by detecting when the number one cylinder is under compression. This is done through its signal wire which is wrapped around the designated spark plug wire.

MSD8916

Universal DIS Cam Sync

MAGNETIC PICKUP

If you are using the magnetic pickup input (green and violet wires) to trigger your MSD Ignition, you will need the MSD8920 Tach Adapter. The MSD8920 will correct the operation of most voltage triggered tachometers that do not work directly off the tach output terminal of the MSD Control. This Adapter should also be used on current triggered tachs (hooked in series with the ignition switch).

MSD8920 Tach/Fuel Adapter (Magnetic Pickup)

DELAY BOXES & ELECTRONICS

Reaction Time Delay

The standard of the industry from the company that invented delay boxes - and hold the U.S. patent on the whole theory! Engineered for use with either 12 or 16 volt electrical systems, model RTD7 splices into your existing transbrake and/or roll control circuits. The box can be mounted in any position, even upside down (for overhead locations). No special wiring or batteries are required. Dedenbear's exclusive ignition noise filters permit use with solid core plug wires and all types of ignition systems, including magnetos. The RTD's 30 amp capability will easily handle any transbrake manufactured. Dedenbear's quartz crystal timer ensures optimum accuracy under all conditions. Four push button thumb wheels let you quickly select and delay up to 9.999 seconds. Of course, "early release" protection has always been standard. Dedenbear's is the only design that puts a full 12 volts to the transbrake, with no voltage drop through the delay box. A complete wiring diagram and delay setting tips are included with the detailed directions.

- 30 amp capability easily handles any transbrake manufactured
- Quartz crystal timer ensures optimum accuracy under all conditions
- Accidental Release Protection (A.R.P.)
- Four pushbutton thumbwheels let you quickly select any delay up to 9.999 seconds
- Virtually no voltage drop through box
- State-of-the-art electronic noise protection circuits
- Simple and quick to set
- 12 and 16 volt compatible

Reaction Time Delay

DE-RTD7

Lightning & Lightning Plus Delay Boxes

Dedenbear introduces the smallest delay box with throttle stop timers available. Wrapped in an attractive billet enclosure, the Lightning has the same reliability you've come to expect from Dedenbear. Loaded with features, the Lightning offers incredible value, the best bang for your buck. The Lightning Plus has all the same features as the Lightning but with a 250% larger display making it the easiest to read delay box Dedenbear manufactures.

- Billet aluminium enclosure.
- DE-L1 Face size is only 6" x 3"
- DE-L2 Face size is only 7.5" x 3"
- 4 different delay modes: "Cross Talk", "Crossover", "Interface", and "Run Delay"
- Adjustable transbrake lockout, Crossover Compensation and Trip Protection
- Independent line lock output
- Two 4-stage timers, adjustable to the thousandth
- Starting line control output with adjustable time release
- "Super Start" automatic starting line control for activating a throttle stop prior to staging
- Remote display output for LED dial-in board
- Compatible with all cylinder engines and all ignitions, even magnetos
- 12 & 16 volt compatible

Lightning Delay Box

DE-L1

Command Center Model DE-CC3

Packed with even more features than the original, the Command Center 3 provides all the electronics needed to run today's most sophisticated race cars. This compact unit has the most independent outputs of any multi-function delay box ever.

Check out all these features:

- Lighted LCD display in easy to understand words
- Lighted keypad with raised number and scroll buttons
- 4 different types of delay boxes built right in: Standard 4 digit, Crossover*, 2 hit Interface (once off their top, once off your top) and Twice-Your-Tree (your top and your bottom)
- Exclusive "Last Chance" feature in case you missed the tree
- "Skip Up/Skip Down" feature lets you hit a second button to add or subtract delay time.
- Two separate 4 stage timers adjustable to the thousandth of a second for controlling throttle stops, nitrous oxide or timed shifts
- Separate "Starting Line Control" has an adjustable release time to bring your throttle up just before launch
- "Super Start" control for activating a linkage stop prior to staging
- RPM activated switch for controlling CO2 or electric shifters can also be used as a third 4stage controller
- Built in digital tachometer for checking tach input
- "Pro/Full" feature saves two groups of settings for running multiple classes
- Remote display output to control a lighted dial-in board
- Exclusive safety features such as our patented "Trip Protection", and a programmable

transbrake lockout for down track anti-reengagement So quit trouble-shooting your wiring hoping all your separate boxes are wired and set correctly, and get yourself a Command Center 3 and start winning races. With all these features this is truly an "Everything-In-One" Delay box.

Thunder Delay Box

Perfect for the avid bracket racer, Dedenbear's new Thunder super crossover delay box has all the latest delay box features without the throttle stop timers or RPM switches. The Thunder is easy to use and has great looks.

- Billet aluminium enclosure
- 4 delay modes: "Cross-Talk", "Crossover", "Interface", and "Delay" • Independent line lock output
- Adjustable transbrake lockout • 12 & 16 Volt compatible
- Crossover Compensation and Trip Protection
- Pro/Full feature allows saving two groups of settings
- Small size, only 6-7/8" by 4" face size and 1-1/2" thick

RPM SWITCH

Model No DE-RPM2 (Switch Module Only)

Dedenbear's unique RPM switch runs any RPM activated device, including shift lights and all other brands of automatic shifters.

The switch uses an MSD, Mallory, Crane or other electronic ignition system to sense RPM and handles up to a 10 amp output.

Pushbutton thumbwheels let you quickly select any shift point in 100 RPM increments, from 100 to 9900 RPM.

A built in delay feature eliminates the possibility of "false" shifts due to tire spin or converter flash on the launch. Fixed at approximately .5 second, this delay circuit is wired into your transbrake or roll control. Even if your car spins its tires, the RPM2 deactivates your automatic shifter until the preset time period expires. RPM switch modules are included with every Dedenbear shifter package if ordered as a kit. RPM switches are also available separately. Set for standard 8 cylinder, custom applications are available by special order.

SHIFT TIMER

Model No DE-ST1 (Switch Module Only)

This Shift Timer has a single stage timer that can be used to shift your CO2 or electric shifter by time instead of RPM.

An adjustable timer from 0-9.99 seconds. Selectable +12 volt pulse output. Short .5 second pulse for shifting, long

17.0 second pulse for single nitrous oxide, throttle stops, timing retards, or shifting and holding Lencos.

Output terminals are Normally Closed (normally "on") and Normally Open (normally "off") to either apply or remove +12 volt power. Release of the transbrake or line lock solenoid starts the timer at the beginning of the run. Small box design allows mounting anywhere inside the vehicle.

The Shift Timer has all of Dedenbear's legendary noise filtering and noise resistance, ensuring accurate timing and excellent repeatability.

Bear Stop - Electric Throttle Stop

As veteran racers, Dedenbear engineers understand that racing carburetors like to run wide open. Since the Bear Stop uses its own set of secondary butterflies to regulate air/fuel flow, your carburettor operates at full throttle throughout the run.

Weather changes can be compensated for and fuel metering always remains correct. An optional Primary Butterfly Kit is available with a second set of butterflies and linkage.

The Bear Stop is typically used either with a throttle stop timer or by running a fixed setting for the entire run. The throttle stop timer allows a racer to turn the throttle stop off and on as the car goes down the track. In either method the throttle stop can be overridden allowing you to "run a guy down" on the top end by manually pushing an override switch. Adjusting the Bear Stop is simple; An indexed stop bolt lets you easily make precise and repeatable settings. Using a throttle stop controller to activate the stop results in even more accurate E.T. adjustments.

Bear Stop Electric Throttle Stop DE-TS1

Optional Primary Butterfly Kit Replacement Solenoid

DE-PK1
DE-SOLTS

Two Stage Throttle Stop Controller

Designed as an engineered package with Dedenbear's throttle stops, the TSC2A can also be used to provide control over a variety of other devices, including automated shifters, timed ignition retard, nitrous systems and lean out solenoids.

When being used on a throttle stop, the dual stage control lets you launch at wide open throttle (for lowest reaction time), reduce power at mid track (for any duration desired) then resume wide open throttle (for the top end charge).

Two Stage Throttle Stop Controller DE-TSC2A

TRANSBRAKE SWITCHES

Model No DE-PBSRTD

The most consistent, most reliable switch on the market. This is a heavy duty quick acting, precision release transbrake switch with an adjustable mount and locking nut. Screw terminals on bottom connect to any wire. Adjustable button height sets with a custom lock nut.

DELAY BOX INSTALLATION KIT Model No DE-IX

Designed as an engineered system for the RTD7, CO2, SCC01, SCC1, and CC3, this complete kit can be used to easily and correctly install any type of delay box.

The package includes a heavy duty, quick acting, precision release transbrake switch with bracket and adjusting lock nut; heavy duty, 14 gauge stretch cord; 10 foot lengths of 14 gauge wire; 15 foot length of 12 gauge wire; fuse with in line holder; wiring connectors; terminals; mounting screws; 25 nylon wire ties; and a detailed wiring diagram.

Note: SCC1 and CC3 owners may need some extra wire & connectors for the additional features in these units.

MULTIPLE RELAY CENTER

Electronic devices are becoming more common in race cars today and these devices typically require lots of wiring to connect everything. This is especially true with cars using multiple stages of Nitrous Oxide. It is so versatile, that it can be used to power anything in a car that needs high power levels, not just nitrous systems.

- Use for high powered Nitrous solenoids or other high power devices such as fuel pumps, water pumps, throttle stops, fans, etc.
- Four relays pre-wired and ganged together to power up to four stages of NOS solenoids
- One separate relay with inputs and outputs completely isolated to allow wiring in any configuration
- Relay inputs can be "negative" or "positive"
- Relay outputs can be "negative" or "positive"
- Indicator LEDs for relay coils and outputs make troubleshooting a snap
- Easy access replaceable fuses for each relay
- Incredibly simplifies wiring and improves reliability

Multiple Relay Center DE-MRC1

DIAL IN BOARDS

Lokar Dial-in Board Cage Mount & Universal Adjustable Angle Mount Brackets

Cage and Universal Adjustable Angle Mount Dial-In Board and Brackets are manufactured with 6061 aluminum featuring a ball-milled design. Mounts onto cage without interfering with roll-bar padding. No drilling required for mounting to the cage. Bracket available for 1 1/2" cages and 1 5/8" cages. Offered in polished, black anodized and clear anodized finishes.

Features:

- 6061 aluminum
- No interference w/roll-bar padding
- No welding or drilling required
- Adjustable arm for leveling
- Bracket available for 1 1/2" and 1 5/8" cages
- Reversible Dial-In Board
- Universal Adjustable Angle Mount style available (Can mount on flat or angled surface)
- Polished, Black and Clear anodized

Part Number Description

LK-1110104	1 1/2" Polished Dial-In Board, Cage Mount
LK-1110107	1 1/2" Black Anodized Dial-In Board, Cage Mount
LK-1110108	1 1/2" Clear Anodized Dial-In Board, Cage Mount
LK-1110114	1 5/8" Polished Dial-In Board, Cage Mount
LK-1110117	1 5/8" Black Anodized Dial-In Board, Cage Mount
LK-1110118	1 5/8" Clear Anodized Dial-In Board, Cage Mount
LK-1110124	Polished - Universal Adjustable Angle Mount
LK-1110127	Black Anodized- Universal Adjustable Angle Mount
LK-1110128	Clear Anodized - Universal Adjustable Angle Mount

COILS

IGNITION COILS

Excellent High performance replacement for import and local vehicles with a canister type oil filled ignition coil. Re-Engineered windings for even faster throttle response and higher RPM power. Aeroflow's Xpro Coil is effective to over 10,000 RPM. Available in male terminal type and female socket types in black or chrome finishes. Mounting options available separately are AF42-1250 (stainless Steel coil mount) or AF64-2900 (polished billet alloy) or AF64-2900BLK (black anodized billet alloy).

SPECIFICATIONS:

PRIMARY RESISTANCE	0.7 ohms
SECONDARY RESISTANCE	5.6k ohms
FREQUENCY	236hz
MAXIMUM VOLTAGE	45,000 volts

Part No Finish Description

AF4220-8202	Black	Female socket type ignition coil
AF4820-8202	Chrome	Female socket type ignition coil
AF4220-8223	Black	Male terminal type ignition coil
AF4820-8223	Chrome	Male terminal type ignition coil

Racing Coil

Specifically developed by ACCEL coil engineers for maximum performance in racing applications.

- Superior to other performance coils for total available voltage, spark energy, and spark duration.
- Special spring-loaded windings and silica steel cores eliminate vibration-induced failure.
- Vacuum-filled with premium grade transformer oil and gasketed to ensure positive insulation of all windings.
- Extra-tall Alkyd coil towers eliminate "flashover" to primary terminals.

NOTE: For Racing use with CD ignitions only!

AC140002 Racing Coil Universal CDI

SUPERSTOCK BREAKERLESS ELECTRONIC COIL

Excellent high performance coil for vehicles that have been converted from points to a breakerless electronic distributor or electronic ignition system, where a canister type oil filled can coil is preferred. Designed with optimized low resistance, high turns ratio windings to work specifically with ACCEL 41, 51, 52, 61 & 71000 Series breakerless electronic replacement distributors. Engineered for higher energy output resulting in quicker starting, improved throttle response and more high RPM power. Special crimped and soldered internal connections ensure positive contacts. High performance tan Alkyd tower provides "flashover" protection to primary terminals.

Specifications:

Primary Resistance 0.7 Ohms
Secondary Resistance 10.8 k Ohms
Turns Ratio 113 : 1
Maximum Voltage 45,000 volts

AC8145 SuperStock coil (Yellow)
AC8145C SuperStock coil (Chrome)

FAST PS20/PS40 COILS

The PS20 and PS40 Coils are designed to enhance the output of factory ignition systems. They fit in place of most OEM canister coils, and thanks to their lower resistance and optimized turns ratio, will produce a higher output spark when used with breaker points, amplified ignitions or with the FAST® XR-i Points Replacement system. These coils will reliably deliver a high output spark through 6,500 RPM on mild street performance applications and are oil filled to keep the windings cool. Both coils are supplied with a ballast resistor which is required if you plan to fire up your original breaker point style ignition system.

PS20 Premium Street Coil, Black
PS40 Premium Street Coil, Nickel Plated

FAST730-0020
FAST730-0040

FAST PS50/PS60 COILS

The PS50 and PS60 Coils are ideal for street cars packing a little more power and are running a FAST I6 Ignition or XR-3000 Breakerless Conversion System. These coils feature lower resistance windings to ensure the most voltage possible is brought into the coil with an optimized turns ratio for the best output. This combination is ideal for engines that endure higher RPM and performance such as circle track, road racing and off-road racing. The coils are filled with oil for optimum cooling and are housed in a sturdy steel canister that can handle the abuse of racing. They're topped off with an alkyd mounded top and brass, screw-type terminals.

PS50 Performance Coil, Black
PS60 Performance Coil, Nickel Plated

FAST730-0050
FAST730-0060

BLASTER COILS FOR POINTS, ELECTRONIC OR MSD IGNITIONS

With a stock points style ignition, a ballast resistor must be placed in-line with the positive terminal of the coil.

The following Blaster Coils are supplied with a 0.8 ohm ballast resistor plus a terminal and boot to fit most applications. Mallory Unilite applications also require the ballast resistor. Points ignition systems require this ballast resistor included with kit in addition to any original resistor or resistor wiring. NOTE: The ballast is not necessary if an MSD 6 or 7 series Ignition Control is being used with the points distributor.

MSD8200 Blaster 2 Kit, Chrome
MSD8203 Blaster 2 Kit, Red

FOR MSD IGNITION AND LATE MODEL APPLICATIONS

The following Blaster Coils share the same special windings and high voltage output as the other Blaster 2 coils, but do not include a ballast resistor. When you are using an MSD Ignition Control, the Ignition is responsible for delivering the voltage to the coil so a ballast is not necessary.

MSD8202 Blaster 2 Red Housing
MSD8223 Blaster 3 The Blaster 3 Coil features an extra tall tower design to improve the coil wire attachment and spark isolation. Supplied with a 90° terminal and boot

MSD BLASTER HIGH VIBRATION COIL

In applications such as off-road, marine or other harsh conditions, the MSD Blaster High Vibration Coil is the best choice. The sturdy metal housing of the High Vibration Coil is completely potted with a premium grade epoxy to completely encase the coil's primary and secondary windings. This method of construction is designed to protect the coil's internal components from high and low frequency vibrations that are commonly experienced in racing. To form the spark plug tower, alkyd material was used for its high dielectric characteristics. This special material will not carbon track when high voltage is passed across its surface making it ideal for coil tower applications. The primary coil terminals are made of brass and are spaced far apart to prevent any possibility of arcing to ground. For convenience, a standard canister type coil mount, MSD8213, can be used plus the coil can be mounted in any position.

MSD8222 MSD Blaster High Vibration Coil

Chrome Coil Brackets

Chrome plated steel coil brackets for most cylindrical ignition coils. Uses bolt and nut instead of self tapping screw for durability.

RPCR9650 Ford Style Coil Bracket
RPCR9366 GM Stand-up Style Coil Bracket

Aeroflow Stainless Steel

The Aeroflow coil bracket offers easy, universal mounting for your typical 54-57mm (2-13/64") size cylinder shaped coils. The bracket features a bolt and nut type fastening instead of the easily stripped self-tapping screw and manufactured from stainless steel and plated for a high durable lustre. Also available in black coated finish.

AF42-1250 Stainless Steel
AF42-1250BLK Black Finish

BILLET COIL MOUNT BRACKET

Aeroflow coil mounting bracket offers easy, universal mounting for standard sized and Aeroflow Xpro ignition coils. The bracket is available in polished and shiny black anodised finishes. Overall length 113mm (4-7/16"), Height 70mm (2-3/4") Width 25mm (63/64"), Ø to Ø is 96mm (3-25/32")

Part No Colour Description ID

AF64-2903BLK Black 54.4mm (2-9/64")

STREET FIRE IGNITION COILS

MSD Street Fire Ignition Coils are designed to deliver quality at a value price and feature factory style housings that ensure a direct bolt in replacement. Increased turns ratio combined with lower primary resistance results in more output voltage.

MSD5524 Canister Coil
MSD5526 GM Dual Connector Coil
MSD5527 Ford TFI Coil

MSD HEI COIL

HEI owners now have a choice to replace their stock coil with the MSD High Energy Untitized Coil for GM HEI Distributors. This new coil is a direct replacement of the stock coil. The coil features special low inductance, high temperature windings which charge faster to give you increased spark energy at higher rpm. The premium epoxy filled construction is designed to withstand harsh race applications as well as the wear and tear that daily usage dishes out, and still deliver more spark energy to the spark plugs. Recommended with MSD module MSD8304.

MSD8225 MSD HEI Coil

High-Performance 50,000 Volt HEI Coil

Results in more completely burned fuel. Offers 15,000 more volts than stock
PR66943C

Ford High-Performance Coil
For Ford Cars & Trucks
PR66959C

Super Coil

- Universal 12 Volt High Output coil engineered to improve the performance of any street-driven or racing engine equipped with a points ignition.
- Unique winding design with premium grade magnet wire and mylar construction delivers superior spark energy.
- Molded case with generous surface area provides high thermal conductivity for cool operation.
- Extra-tall coil tower with integral voltage dam prevents "flashover" to primary terminals.

AC140001 Super Coil

NOTE: ACCEL 140001 Super Coils are supplied with a 0.85 ohm Ballast Resistor which must be used in conjunction with the vehicle's original ballast resistor, if equipped.

FAST E92 E-CORE IGNITION COIL

The FAST E92 E-Core Ignition Coil is the perfect solution for customers who currently run a FAST E6 CD Ignition or other modern ignition system. Designed to electrically match the FAST E6 CD Ignition, this coil provides a guaranteed perfect electrical match and ensures that both components deliver maximum performance. The FAST E92 E-Core Coil Ignition is able to provide up to 70% more output than standard OEM coils due to the computer-designed, robust gauge windings. This results in less resistance and better heat dissipation for improved higher RPM performance. The FAST E92 E-Core Ignition Coil is completely over-molded to ensure maximum protection from rusting and corrosion. The over-molded design also allows the unit to be significantly lighter than the standard OEM component.

- Perfect electrical match to the FAST E6 CD Ignition
- Provides up to 70% more output than OEM coil
- Completely over-molded coil provides protection from rusting & corrosion
- Over-molded coil allows for an overall lighter unit

FAST308250 FAST E92 E-Core Ignition Coil

FAST E93 E-COIL RACING COIL

When it comes to high compression and cylinder pressures with redline revving RPM, the E93 Coil is the best choice. This coil was engineered from the inside out to handle the needs of race engines. Inside the low profile coil housing is heavy gauge wiring for use on both sets of windings resulting in a highly effective turns ratio of 60:1. The internals are encapsulated in urethane for protection against extreme vibration and abuse from racing environments. The secondary tower is also lengthened to aid in spark isolation and terminal connection.

FAST730-0192

FAST I91 INDUCTIVE COIL

The I91 Coil is designed for use with FAST high output inductive ignition systems such as the I6 Ignition Control or the XR-3000 Electronic Conversion Systems. The internal design is optimized to produce a long duration spark coupled with higher voltage output making it ideal for street and performance applications.

MSD PRO POWER COIL

The MSD Pro Power Coil is the best choice for short duration applications such as drag racing. The special windings of the Pro Power Coil have extremely low resistance to produce the highest voltage possible with great spark energy when used with an MSD 7, 8 or 10 series Ignition Control. To isolate the high voltage, the coil wire tower rises tall above the primary terminals and uses a spark plug style terminal for a firm connection to the coil wire. The housing is molded from a high dielectric polyester material and a Ciba Arathane compound adds vibration protection to the coil windings. Vibration mounts are also supplied.

MSD8201 Pro Power Coil
MSD8218 Billet Mount, BB Chevy

This aluminum bracket is sold separately and mounts on the back of big block Chevrolet cylinder heads to ease the mounting of the Pro Power Coil.

NOTE: Not recommended with MSD 6 or Digital-7 Series ignition. Coil and mount sold separately.

MSD 10 PLUS COIL

This new coil is used exclusively with the MSD 10 PLUS Ignition Control. The MSD 10 PLUS uses MSD's Patented Stacker Ignition technology to combine the best characteristics of a Capacitive Discharge Ignition with an Inductive Ignition. The result is a spark with incredible voltage and long duration and this Coil is designed exclusively to handle it all.

MSD8208 MSD 10 PLUS Coil, for MSD 7502 Ignition Only

Note: Cannot be used with the dual coil MSD 10, MSD7500 or MSD7501.

MSD82658

MSD8262

BLASTER GM LS SERIES COILS

Looking to replace your worn out LS coils with a more efficient upgrade? The new MSD Blaster LS Coil line is ideal for your modern GM muscle car or truck. The coils are designed as a bolt-in replacement yet have been thoroughly tested and detailed by our experienced engineering team. The improved efficiency of these Blaster Coils will give your LS the ignition boost you're looking for.

LS SERIES COIL BRACKET

What to do with those pesky coils in such a confined space? In addition to new LS Slant-Edge valve covers, Proform has designed an attractive way to lift your coils off your valve cover so you can see the Chevrolet emblem. A unique rail mounting system attaches to the threaded holes on the valve cover, and the individual coils attach to the rail so they can be mounted in multiple positions. All necessary hardware included.

GM LS Series Coil Bracket for LS3/LS7 **PR69521**
GM LS Series Coil Bracket for LS1/LS6 **PR69520**

REMOVEABLE COIL MOUNTING BRACKET

Fits LS series engines. Hinged to provide quick access to valve cover fasteners and moves coils toward back of motor to free up area on front of valve cover for breathers, vacuum pump fittings, fill caps, etc. Fits O.E.M. and larger aftermarket coils with 2-9/16" bolt spacing. Use with Moroso Fabricated Aluminium Valve Cover MO68355

Coil Mounting Bracket, Hinged, Removeable **MO72396**

EXTENSION CORD FOR GM LS IGNITION COILS

If you're thinking of relocating your LS ignition coils somewhere out of sight, then you'll need at least one of these extension cords, because you'll have to relocate the wiring harness also. This cord has authentic Delphi connectors and is build and tested to withstand life in the engine compartment.

PR69525 18" Extension Cord for GM LS Ignition Coil Wire Harness.

PR69526 46" Extension Cord for GM LS Ignition Coil Wire Harness.

GM LS COIL

EXTENSION HARNESSSES

These harnesses are designed to extend from your OEM harness to your coil harness when you have relocated your coils further away.

AF49-1509 460mm (18") long
AF49-1510 1170mm (46") Long

LS IGNITION COILS

Aeroflow now offer a powerful performance upgrade for the Chev LS Engine. These coils are a direct bolt-in and are engineered with high quality internal materials and components for coils that will produce higher voltage and spark energy. The coils are available to suit LS1, LS2, LS3, LS4, LS6, LS7 and LS9 series engines. SOLD INDIVIDUALLY

AF4020-8262 will suit LS1 & LS6 series (Single coil)
AF4020-8265 will suit LS2, LS3, LS4, LS7 & LS9 series (single coil)

SMART IGN-1A

IGNITION COIL PACK

Do you need require precision control over your ignition system? Or just want to upgrade your stock coil packs? Here at Aeroflow we have the answer with our high output IGN-1A smart coil. This coil delivers similar performance to a CDI system without the need for the bulky and costly CDI control box, as the igniter is built right into each individual coil. They produce more spark energy while consuming less power without sacrificing voltage output. These IGN-1A coils deliver a powerful, long duration spark and are ideal for use in high-boost or high-compression engines. Capable of working with both 12 and 16 volt electrical systems and many aftermarket ECU's makes it the coil pack of choice.

AF4020-8289 SOLD INDIVIDUALLY
AF49-8289 IGN-1A PLUG AND PINS

GM LS SMART COIL HARNESS

These wiring harnesses are similar in design to factory GM LS coil harnesses, but they are a direct plug and play to the Aeroflow Performance Smart Coils (AF4020-8289). They plug into most GM LS plug and play main harnesses if you want to replace factory GM LS coils with ign-1a smart coils. Includes a pair of coil harnesses for an 8-cylinder engine.

AF49-1532

IGNITION

COIL-ON-PLUG

COIL PACK

Is your car miss firing, have you burnt a coil pack out or simply looking to upgrade to provide a much stronger and more consistent spark? These Hitachi style high performance coil on plug coil packs are the answer. They are a great upgrade when increasing boost pressure and can be used with a variety of engines with the correct fitting kit (sold separately). These are a direct fit for the R35 GTR VR38DETT engine and similar to OEM Nissan part number 22448-JF00B or Hitachi part number HEX EXA 2410N.

AF4020-8299 Coil on plug coil pack sold individually
AF49-8299 Plug and pins

GM 2 TOWER COIL PACK

Nothing beats bolt-on and direct connection components especially when they improve performance like this Aeroflow Performance GM 2 tower coils. Designed specifically for the GM/Holden engines used from the mid 1980's to late 1990's. The lower primary resistance produces a higher voltage output compared to the stock coil packs. This improved spark helps burn the fuel mixture more efficiently, resulting in smooth idle and heightened mid-range rpm power.

AF4020-8224 SOLD INDIVIDUALLY

SINGLE TOWER

IGNITION

COIL PACK

This Aeroflow Performance single tower ignition coil is designed for high performance applications with multi-channel drivers. They can be set up for coil-per-cylinder (CPC) for most ignition systems. With the low resistance of these coils and the quick rise time make it great for high revving, multi-coil systems. This coil is surrounded by an injection mold of rymite and nylon housing with a single high-tension tower. Each coil comes complete with a wiring harness and mounting hardware.

AF4020-8232 SOLD INDIVIDUALLY

SINGLE TOWER IGNITION COIL PIGTAIL

The Aeroflow Performance CPC ignition coil pigtails are a great solution when installing our CPC coils (AF4020-8232) into your ignition system. This pre-terminated pigtail includes earth ring terminal (6mm), power and earth bullet terminals.

AF49-8232 Sold Individually

Holley

HOLLEY IGNITION COIL

The Holley dual tower coils provide higher spark energy than even high power single racing coils, while still providing the durability of a factory ignition system. Excellent for any supercharged, turbocharged, nitrous, or high compression engines, or anyone wanting the unmatched timing accuracy and spark energy this system offers.

HO556-104

COIL-NEAR-PLUG SMART COIL

This coil is designed for use with Holley® HP and Dominator ECUs, as well other EFI systems that can drive "smart" ignition coils. Although it is designed for high powered race applications, it can be used on street driven vehicles as well.

- Peak Voltage – 44,000 Volts • Peak Output – 102 Mj
- Maximum Battery Voltage 17.0 Volts
- Includes mating connector and pins

HO556-112

LS SERIES BILLET COIL RELOCATION MOUNTS

Aeroflow have developed a light weight and versatile solution to relocating your LS series style coils. Perfect for conversions or simply running remote coils. Coil mounts can be split to run 2 or 4 coils mounted side by side. Stylish and functional CNC machined from Billet 6061-T6.

Part No	Colour	Description	Bolt Spacing
AF64-4032	Polished	LS1 & LS6 mounts	65mm
AF64-4032BLK	Black	LS1 & LS6 mounts	65mm
AF64-4034	Polished	LS2, LS3 & LS7 mounts	72mm
AF64-4034BLK	Black	LS2, LS3 & LS7 mounts	72mm

REMOTE COIL MOUNTING BRACKET

Fits LS series engines and relocates ignition coils from valve cover. Features non-magnetic, stainless steel studs used to help prevent potential crossfire from the coils. Fits O.E.M. and larger aftermarket coils with 2-9/16" bolt spacing.

Remote Coil Mounting Bracket with Spacers M072395

BLASTER SS COIL

Don't let the compact size of the Blaster SS Coil fool you because it is packed with performance! The efficient E-core windings are designed to produce high amounts of current without sacrificing the voltage output. The secondary windings are wound on a segmented bobbin which improves the placement and distribution of the high voltage. This unique winding design also reduces the chance of voltage breakdown between the primary and secondary windings. For even more protection, these windings are encased in a polyurethane compound for complete protection against vibration. The Blaster SS features brass terminals and a sturdy Rynite housing. It can be used with stock ignitions or ready to run distributors and is supplied with vibration mounts.

MSD8207 Red Blaster SS Coil
MSD82073 Black Blaster SS Coil
MSD8839 Replacement Vibration Mounts

SS IGNITION COILS

Engineered with advanced bobbin technology, high turns ratio windings encased in a protective polyurethane compound for higher energy and voltage outputs. Results in quicker starts, improved idle quality, crisper throttle response and cleaner high RPM power. These coils are compatible with OEM ignition and capacitive discharge ignition systems. Coil comes complete with vibration mounts and terminals for easy installation.

Turns ratio: 70:1
Primary resistance: .355 ohms
Secondary resistance: 4.4K ohms
Inductance: 6.9 mH
Maximum voltage: 40,000 Volts
Peak Current: 300 Ma
Spark Duration: 220 uS

BLASTER DIS RACING COIL

For all-out race cars with multi-channel coil drivers this new Blaster Coil will provide the incredible voltage your vehicle needs. This coil will top off your MSD DIS HO Ignition system with its low resistance and quick rise time. This combination can produce a spark with incredible voltage that's capable of burning the fuel mix in any cylinder!

MSD8230 Blaster DIS Racing Coil
Note: Designed for engines equipped with an MSD DIS Ignition system only.

DODGE COIL

MSD8228
Late Model Dodge, Pin Connector

FORD 4-TOWER COIL

MSD 8241 For 1995-1998 4.6L DOHC/SOHC Ford Coil Pack, 4-Tower

BLASTER™ SINGLE TOWER COIL

For performance applications with multi-channel coil drivers this Single Tower Blaster Coil is a great choice. The Coil will also top off your MSD DIS-HO Ignition system when it is set up for a coil-per-cylinder ignition system. The coil's low resistance and quick rise time make it ideal for high revving, multi-coil performance systems.

MSD8232 Blaster Single Tower Coil

GM SINGLE CONNECTOR COIL

- Direct replacement coil is designed with improved materials and windings to produce a strong output
- This improved spark helps burn the fuel mixture more efficiently, resulting in a smooth idle and improved midrange RPM power
- The coil is designed to deliver a strong spark and will connect to factory wiring
- Note when installing an MSD Ignition with this coil, use a PN 8877 harness for a direct plug-in installation
- Direct performance replacement for GM Coil, 1996-1999
- 80:1 turns ratio and lower primary resistance produce high voltage output
- Works with stock ignition as well as MSD Ignitions

MSD8231 GM SINGLE CONNECTOR COIL

BLASTER TFI AND GM COIL

Top off your Ford or GM Ignition system with these great new replacement coils. The Blaster TFI and GM Coils have MSD performance in factory style housings! MSD designed these Coils by combining our Blaster Coil experience with E-core coil efficiency. Each coil has a unique turns ratio plus there is lower primary resistance than the stock coil. This all amounts to a bolt-in replacement coil that produces more output voltage. The Coils will work with stock ignition systems as well as MSD equipped cars and trucks.

Installation Tip: If you plan to install an MSD Ignition with your Blaster TFI Coil, use a MSD 8874 Harness for a direct plug-in installation. For the Blaster GM Coil, use a MSD8876 Harness.

MSD8226 Blaster GM Dual Connector Coil
MSD8227 Blaster TFI Coil

accepts an HEI style plug terminal and boot and strong vibration mounts are supplied for a secure mount.

MSD STREET FIRE IGNITION

COIL WITH 6-TOWER PACK

These new coils mount directly in place of the factory coils and accept the factory connectors. Spark energy is increased thanks to improved materials and windings that were spec'd by MSD engineering.

- Capacitive discharge technology
- Multiple sparks improve starting and idle
- Full power output at high RPM
- Perfect for budget minded enthusiasts
- Ensures combustion/great throttle response

Description Part No
Ford 6cyl 6 Tower Coil Pack MSD5529

MITSUBISHI/NEON/TALON

MSD offers these two 4-tower coils as replacements for a variety of years ranging from 1994-2002 on vehicles including Mitsubishis, Neons and others. The difference between the two coils is the wiring connector.

MSD8229 Round Terminals
MSD8239 Flat Terminals

GM DIS COIL (Commodore V6)

Used on vehicles from the mid 1980's to late 1990s. Suits 3.8L V6 Commodore VN Series II on

MSD8224 GM 2-Tower Coil Pack
Installation Tip: If you plan to install an MSD DIS Ignition, use Interface Modules, MSD8870.

COIL INTERFACE MODULE

These Modules make installing an MSD DIS Ignition Control easier on GM engines. The Module simply installs between the ignition module and the coil pack to separate the coil primary terminals and the ignition module wires.

MSD8870
MSD8870 GM Interface Module, GM 2-Tower Coil Packs
MSD8224 GM Coil Pack Used on a variety of GM engines from the mid '80's through the late '90's.

Blaster Coils for Late Model Hemi and Ford Mod Motors

- Improved Spark Energy
- Patented winding design and materials
- Direct bolt-in to factory connectors

Fire up your late model Hemi or Mod Motor with a set of MSD's Blaster Packs. The Coils are a direct bolt-in and deliver increased spark energy over the factory models. Our engineers spec'd superior materials and winding ratios to increase the output of the coil while retaining the factory fit.

Blaster Hemi Coils, 8-Packs
MSD82568 Early Model, '03-'05
MSD82558 Late Model, '06-'08

Blaster Coil-on-Plugs for Ford, 8-Pack
MSD8242 99-04 4.6L SOHC Individual
MSD82428 99-04 4.6L SOHC Set of 8
MSD82438 05-08 SOHC Ford Set of 8
MSD82448 FORD 5.4L 4-Valve DOHC

BLASTER COIL

5.0L COYOTE

The all new Ford 5.0L Coyote engine is hot, but MSD now offers a coil that will make it even hotter! MSD developed a replacement coil that incorporates improved windings and material to increase the output of the coil. Also, when other modifications are being added, you can rely on the Blaster Coil to recover quicker through high rpm with a powerful spark to promote combustion.

MSD82488 Blaster Coil 5.0L Coyote (Set of 8)

STREET FIRE COIL

5.0L COYOTE

These coils mount directly in place of factory style versions and accept the OEM connectors as well. Performance output is improved thanks to a careful selection of better materials and efficient winding ratios.

MSD55158

Street Fire Coil 5.0L Coyote (Set of 8)

BLASTER HVC II

This coil utilizes an iron UCore design with a segmented bobbin for improved voltage distribution. The bobbin is molded from a special Dupont Rynite material and wound specifically to produce the most current possible with incredible voltage and lightning quick rise time. The blue housing is also molded from high dielectric Rynite material. The brass primary terminals are spaced far apart and the secondary tower is well protected for increased spark isolation. The housing is completely potted with an epoxy compound for vibration resistance and installs with sturdy vibration mounts.

MSD8253* Blaster HVC II Coil, for 6 Series Ignition Controls

PRO POWER HVC IITM COIL

MSD engineers drew upon their experience with Top Fuel cars and coils used with our Pro Mag 44 to create the new HVC II Coil for use with the MSD 7 Series Ignition Controls. The new HVC II Coil is completely built in-house so our engineers have exclusive control over their performance and quality. The Coil utilizes an iron U-Core design with a segmented bobbin for improved voltage distribution. The bobbin is molded from Dupont Rynite FR946 material which has incredible dielectric capabilities at high temperatures. MSD also incorporated a cutting edge winding material that has an improved insulation and is also capable of enduring extreme voltages. Together, these materials create a durable coil with incredible voltage capabilities, lightning quick rise time and lengthy spark duration. The housing, also molded from Rynite material, features far spaced brass primary terminals and a well protected secondary tower for increased spark isolation. The housing is completely potted with an epoxy compound for vibration resistance and installs with sturdy vibration mounts. For use with MSD 7 and 8 Series Ignitions.

MSD8261 HVC Pro Power II Coil, for 7 Series Ignition Controls

HIGH VOLTAGE/HIGH

CURRENT PERFORMANCE

COILS

Coils have always had to compromise voltage output against current output. More voltage increases the initial ionization of the spark plug gap, but lowers the amount of current, or heat, that follows across the plug gap. When a coil is designed to produce more current, the voltage output generally suffers which taxes the ease of ionizing the gap. The MSD HVC Coils are designed to produce maximum voltage and energy!

To accomplish this combination of high voltage and current MSD uses an E-core winding design. This is a very efficient design where less loss occurs during the transfer of electricity due to the closed core of the coil. Another benefit is that the coils run extremely cool, even at high racing rpm, thanks to the efficient design and huge laminations.

BLASTER HVC COIL

The Blaster HVC is designed & recommended for high rpm, long duration applications such as road course and circle track racing using an MSD 6 Series Ignition.

MSD8252 Blaster HVC, for 6-Series Ignitions

MSD HVC COIL

The HVC Coil is designed exclusively for the HVC Professional Racing Ignition Controls, MSD6631.

MSD8250 MSD 6 HVC Coil (Must be used with the 6 HVC Professional Ignition)

PRO POWER HVC COIL

The Pro Power HVC Coil is designed for racing applications with an MSD 7 or 8 Series Ignition Control.

MSD8251 Pro Power HVC, for 7-Series Ignitions

NOTE: For use with MSD 7 or 8 Series Ignitions only.

Universal Coil On/Near Plug Harness

Universal Coil On/Near Plug Harness – Use to connect Holley PN 558-312 or factory GM LSx coil harnesses to Holley HP or Dominator ECU's

- For use with Holley HP or Dominator ECU's
- Universal
- Connects 558-312 or factory GM LSx coil harnesses

H0558-307

MSD COIL WIRE RETAINER

The MSD Coil Wire Retainer holds the boot securely in the coil. The lower portion of the retainer snaps around the body of the coil under the flange and is held in place with a nylon tie wrap. Some coils are shorter than others, so a spacer ring is included to adapt to them. With this combination the coil wire cannot vibrate loose during severe racing conditions. The MSD Coil Wire Retainer fits most of the MSD Blaster Coils (except the Ford Blaster 2F and Blaster 3) and most aftermarket canister type coils.

MSD8217 Coil Wire Retainer, Canister Coils

COIL WIRE

MSD offers these two style coil wires to make the change easy.

Also, remember that the coil wire see eight times the use of each plug wire so changing the coil wire as a maintenance is also a good idea.

MSD84039 8.5mm Super Conductor

18" long, 90° terminals and boots are installed on both sides to connect to an HEI style terminal. A Power Tower is also supplied to adapt a socket style cap.

AUTOMATIC COIL SELECTOR AND TACH SPLITTER

Running redundant ignition systems gives you a piece of mind during long races, but how do you swap the coil wire to the backup ignition? Pulling into the pits to have someone physically move the coil wire from the primary coil to the backup coil takes far too much time. The MSD Automatic Coil Selector solves this problem by automatically sensing which coil is being fired and then transfers that coil's high voltage to the distributor cap. The Automatic Coil Selector has two posts that connect to the high voltage coil towers of the ignition coils while a third post connects to the distributor cap. When a racer switches from their primary ignition to the backup ignition, the Coil Selector automatically switches to the backup coil. As the diagram shows, you must have two ignition controls, two coils and a single-pole, double throw transfer switch. All it takes is a flip of the switch to run a completely new ignition system.

MSD8210 Automatic Coil Selector

TECH NOTE: The Automatic Coil Selector cannot be used with an MSD 7, 8 or 10 Series Ignition.

FIREWALL FEED-THRU

Molded from Rynite® and nylon, the Firewall Feed-Thru provides 1/2" of insulation to ensure that the coil's spark reaches the distributor. The Firewall Feed-Thru mounts in a 1" hole directly to the firewall and has high tension towers on each side connected through a brass rod for full spark transfer. Available in Red and Black/Red.

MSD8211 Firewall Feed-Thru, Red/Black

FIREWALL FEED THROUGH

If you have your coil mounted in the passenger compartment, you need the AeroFlow Performance firewall feed through. These are specifically designed to ensure that the spark gets to the distributor cap instead of jumping to ground at the firewall and the voltage leaks into the passenger compartment. A 12.7mm (1/2") brass rod is surrounded by an injection mould of rynite and nylon housing to form a spark isolating path through the firewall. This feed through requires only a 25.4mm (1") diameter hole to mount directly to the firewall with spark plug style terminals on both ends used for strong coil wire connections.

AF4020-8212

IGNITION LEADS

XPRO UNIVERSAL LEAD SETS

AeroFlow's Universal spark plug wire sets come with the spark plug terminal and boots fitted with the other end open. Distributor cap boots and terminals for both late model type (HEI male terminals style) and early style (female terminals) are included so you can cut to the preferred length. The kit is supplied with a mini crimper. It is a 8 cylinder kit supplied with three 32" 812.80 mm, two 48" 1219.20mm, two 50" 1270mm and two 56" 1422mm

XPRO CERAMIC BOOTS

Aeroflow Performance ceramic lead boots have been developed to address the problems associated with burnt spark plug boots. Whether you're running headers with close tolerances, a turbo manifold and dump pipe with very little room in the engine bay for heat shields or you're just over melting your spark plug boots from extreme heat. These black ceramic wire boots are the answer! They can withstand temperatures of up to 1090 degrees Celsius (2000 °F). Available separately in packs of 2 or 8 pieces in 90°, 135° and straight. These ceramic boots will perfectly match our 8.5mm spiral wound low resistance, high EMI suppression ignition lead and lead sets.

e-FIRE High performance Spark Plug Wires

For your flathead Ford. High performance spark plug wires. Whether you have a front mount (59A) or top mount (8BA) distributor, we've got you covered. Designed to work with both electronic and points-style distributors, e-FIRE plug wires give you strong fire power with high level RFI/EMI resistance.

The spiral-wound, stainless steel suppression core is protected by tough fiberglass reinforcing braid for strength and flexibility. And the 100% silicone insulation resists high temperatures, moisture, oil and chemicals, and protects against arcing and voltage leaks. With low 500 Ohm/ft resistance, they get more energy into your plugs too.

Easy installation is always high on our list. So, here's the best bit. With the Ford Flathead engine firmly in mind, the 90-degree cap terminals and boots are pre-fitted for smarter 'distributor first' installation. Why? Because we know how hard it is to trim those front mount wires up close to the radiator where access is limited. Your knuckles will thank you. Plus it leaves you free to use the supplied 90-degree spark plug boots or choose your own hot rod terminals. All leads are 7mm diameter so they fit through your flathead plug wire looms or tubes. They're cut to length, too, with a long coil wire to reach your firewall.

NOTE:

Our wires fit front mount Ford 21A 'crab cap' distributors (e-FIRE and Original Equipment are the same) and 1949-53 8BA distributors. They do not fit our early Ford flathead caps nor modern caps with male, HEI-type bullet-style terminals.

STROM 9705K

ULTRA 40 SLEEVED IGNITION LEAD SET

- 7mm diameter wire with 40 ohms of resistance per foot
- Sleeving adds extra dielectric strength
- Sleeving extends spark plug wire life and protects against exhaust header heat, chaffing and contaminants
- Complete, ready to install sets available for specific engines

----------	----------------------------------

SPARK GUARD

MSD's Spark Guard is a dielectric grease that solves many common ignition troubles. It stops voltage leaks, eases boot removal, prevents moisture buildup inside the spark plug wire boots, and even helps protect against radio noise (EMI). It also simplifies the installation of MSD Universal Spark Plug Wire Sets. Spark Guard will not dry up or harden so it will retain its spark isolating capabilities indefinitely.

MSD8804	Spark Guard
---------	-------------

MSD 8.5mm Super Conductor Wire Available in RED or BLACK

The MSD 8.5mm Super Conductor Wire is the ultimate performance plug wire. The wire's extremely low resistance with high Electro Magnetic Interference suppression is a combination that defies the common laws of physics. Less resistance means more energy is delivered to the plugs which helps burn the fuel mixture completely and complete combustion means more power. With less than 50 ohms per foot, the 8.5mm wire is capable of delivering 30 times more spark energy to the plug over most OEM wires! This low resistance is produced due to a special copper alloy conductor. The copper-alloy material has excellent voltage carrying capabilities as well as strength. This conductor is then tightly wrapped around a ferro-magnetic impregnated center core. So tightly in fact, that for every single foot of wire there is 40 feet of conductor windings! This combination is responsible for suppressing EMI noise to the equivalent of a 1,500 ohm per foot wire. The outer sleeve of the Super Conductor is just as impressive as the conductor. The tough sleeve also provides a solid foundation to crimp the terminals, delivering the highest terminal pull-off strength of any other performance wire. Many different custom length sets are available as well as universal sets that you custom tailor to match your application. Available in Red and Black.

Note: All universal kits are supplied with Eagle factory fitted spark plug boots. Distributor/Coil boots, terminals and instruction sheet are supplied with kit.

MSD SPARK PLUG WIRES UNIVERSAL SETS

Routing spark plug wires is an art form. It takes patience and time to route your wires away from the headers, through separators and to the distributor cap. Some wire sets fit perfect, but a lot of people want to build their own so they can route them exactly how they see fit. MSD's Universal wire sets come with the spark plug terminal and boot installed with the other end open. Distributor cap boots and terminals are included so you can cut the wire to the desired length, then install the terminal with the supplied Mini-Stripper-Crimper. It's a little more work, but in the end it will be worth it!

D. For engines with late model type (HEI "spark plug top") distributor caps. Multi-angle boots and terminals installed on one end. 90° distributor boots and terminals included.
8-Cylinder Engine MSD31183, MSD31189

E. For engines with late model type (HEI "spark plug top") distributor caps (Ford Duraspark or MSD Cap-A-Dapt). 90° spark plug boots installed with 90° distributor boots and terminals included.
8-Cylinder Engine MSD3122, MSD31223, MSD31229

G. For late model GM LT-1 Engines, this set comes with the LT-1 Boots and Terminals installed and 90° spark plug boots and terminals loose.
8-Cylinder, Straight LT-1 Boot MSD32129
8-Cylinder, 90° LT-1 Boot MSD32139

H. For race Hemi engines, this kit is supplied with MSD's Hemi tubes and HEI style boots and terminals for the distributor cap.
8-Hemi Single plug set, Red Tubes MSD31529
8-Hemi Single plug set, Black with Black tubes MSD31523
16-Hemi Dual plug set MSD31559

I. For GM Gen III engines such as the LS-1 or LS-6, these wires are perfect when you relocate the coils. Both 90° and MA boots supplied.
LS-1/LS-6 Engines MSD32079

J. For Ford fans, these wires are designed for DOHC Modular engines.
Ford Modular, 4.6/5.4L DOHC MSD31889

TWO-IN-ONE UNIVERSAL WIRE SETS

To cover all your bases, these wire sets are supplied with both the boot and terminals that fit older, socket style distributors caps, as well as the ones for spark plug style terminals.

J. Set includes terminals for engines with early type (socket) and late type (HEI "spark plug top") distributor caps. Multiangle boots and terminals factory installed on one end.

Superconductor

	Black	Red
4-Cylinder Engine	MSD31153	MSD31159
6-Cylinder Engine	MSD31179	
8-Cylinder Engine	MSD31193	MSD31199

K. Set includes terminals for engines with early type (socket) and late type (HEI "spark plug top") distributor caps. 90° boots and terminals factory installed on one end.
8-Cylinder Engine MSD31233, MSD31239

TECH TIP:

RACE TAILORED & CUSTOM FIT SPARK PLUG SETS
The MSD Race Tailored Heli-Core and 8.5mm Super Conductor Wire Sets are designed specifically to fit race engines equipped with headers or an MSD Distributor. Model specific sets available for 4cyl, 6cyl and 8 cyl engines. Please call ROCKET for more information or consult manufacturers catalogue.

PROFESSIONAL RACING BOOTS

These new spark plug boots are designed for extreme racing applications. Using a proprietary blend of materials, the boots can handle much higher temperatures over an increased amount of time. Three designs are available; straight, 115° and a 90° boot are supplied with MSD durable Dual Crimp Terminals.

	2 per Pack	Pack of 8
90° Pro Temp Boots	MSD3325	MSD8852
115° Pro Race Boots	MSD3326	MSD8853
Straight Boots	MSD3327	MSD8854

BULK BOOTS AND TERMINALS

If you plan on building a lot of custom sets of wires for special applications, you can now get MSD Boots and Terminals in bulk sets of 100.

100 Terminals		
A. Multi-Angle Dual Crimp Terminals	MSD34605	
B. 90° Plug Style Dual Crimp Terminals	MSD34615	
C. 90° Socket Cap Terminals	MSD34635	
E. Multi-Angle	MSD34565	
F. 90° Spark Plug Style	MSD34515	
G. 90° Socket Cap	MSD34525	
H. HEI Style w/ Nipple	MSD34555	

REPLACEMENT BOOTS

AND TERMINALS

MSD boots are designed with longevity in mind. Each boot provides excellent heat resistance as well as maximum protection against spark loss.

A. Multi-Angle Boots and Terminals, 2/Card	MSD3301
B. 90° MSD Boots and Terminals, 2/Card	MSD3311
C. HEI Style 90° Boots and Terminals, 2/Card	MSD3320
D. 90° Socket Boots and Terminals, 2/Card	MSD3321
F. Blaster 2 Coil Boot and Terminal, 1/Card	MSD3331
G. 90° Non-Logo Boots and Terminals, 2/Card	MSD3323
H. LS1 Style 45° Boots and Terminals, 2/Card	MSD3304

REPLACEMENT BOOTS AND TERMINALS KITS

These MSD replacement plug wire boot and terminal kits are perfect for enthusiasts who build their own wire sets or need to replace damaged boots. The boots are made from a high temperature silicone compound and feature a gray finish. The terminals have large crimp tabs to grasp the wire, and wide contacts to grip the distributor cap receptacle.

- MSD8849 Distributor boots 90deg & terminals hei w/wire retainer set of 9
- MSD8850 Spark plug boots 90deg terminals set of 9
- MSD8851 Distributor boots 90 deg & terminals non-hei set of 9

PRO STOCK HEMI TUBES

MSD has new ignition accessories for Ford and Chrysler Hemi Pro Stock engines. These engines' heads have a long, skinny tube machined in the head to access the spark plug. This narrow passage makes it considerably difficult to install spark plug wires. MSD answers with a new injection molded spark plug wire boot that reaches down to securely connect the wire to the spark plug. The set of eight includes the tubes and components to assemble the wire for an easy installation.

MSD HEMI TUBES

MSD's new Hemi Tubes are molded from Rynite for incredible strength and high spark isolation properties. For easy assembly and disassembly we incorporated a new twist-lock cap at the base. The redesigned tubes meet NHRA's requirements. The Tubes are available in a set of 16 with eight red and eight black.

MSD3475	MSD Hemi Tubes, Set of 16
MSD3467	MSD Boots for Hemi Tubes, Set of 50
MSD3467-1	MSD Boot for Hemi Tubes, Each

Hemi Tube Ends Replacements

LINEAR WIRE LOOMS

Using the valve cover mounting bolts, these handsome Bowtie looms are positioned along the valve cover to hold the wires in a neat parallel arrangement. The epoxy-coated Bowtie Emblem is centrally located for maximum visibility. The wire holders are opened and closed individually, with a patented nylon wedge, to allow the tops to have a smooth surface without screw holes. The wire holders will accommodate wires up to 8 mm in diameter

Black Crinkle; Red Bowtie	PR141-709

Bowtie Wire Looms

The Chevrolet and Bowtie Emblem are moulded in red onto the black nylon head of each wire loom, mounted on chrome stems. Fits Chevrolet small-block V8 1958-86 and Chevrolet big-block V8 1965-91. 4-wire looms, 2 per package.

PR141-636	Chev Bowtie Wire Looms
-----------	------------------------

Ford Wire Looms and Dividers

Keep that mess of ignition wires under control with wire looms and dividers. 6 wire dividers per package (2 each of 2, 3 & 4 wire). Wire looms sold in pairs and fit 289-302-351W engines, 5/16" bolt hole.

PR302-636	Ford Racing Wire Looms - Blue
PR302-640	Ford Racing Wire Looms - Black
PR302-637	Ford Oval Wire Dividers - Blue
PR302-641	Ford Oval Wire Dividers - Black

Slotlok Wire Separators

Includes 2 each of 2, 3, and 4-Wire Separators. Chrome plated or anodized to resist fading. Exclusive interlocking design with nylon wedge. For 7 & 8 mm spark plug wires.

PR66214 Slotlok Wire Separators - Chrome

UNIVERSAL LOOM KITS

Includes four 2-hole looms, two 3-hole looms, and four chrome plated brackets which secure to valve cover bolts

MO72150	Blue, 7-9mm
MO72151	Red, 7-9mm
MO72153	Black, 7-9mm

SHOW CAR LOOM KITS

Includes eight 2-hole looms, two 4-hole separators, and four chrome plated brackets which secure to valve cover bolts

MO72170	Blue, 7-9mm
MO72168	Red, 7-9mm
MO72167	Black, 7-9mm

BIG BLOCK

CHEVY LOOM KITS

Includes four right-side and four left-side chrome plated brackets, two 1-hole looms, two 2-hole looms, two 3-hole looms, two 4-hole looms, two 4-hole separators, and two 2-hole separators

MO72175	Blue, 7-9mm
MO72176	Red, 7-9mm
MO72178	Black, 7-9mm

SMALL BLOCK

CHEVY CENTERBOLT LOOM KITS

Includes two right-side and two left-side chrome plated brackets mount to engine, two 4-hole wire looms, six 2-hole looms, two 4-hole wire separators, and two 2-hole separators

MO72140	Blue, 7-9mm
MO72141	Red, 7-9mm
MO72143	Black, 7-9mm

FORD SMALL

BLOCK LOOM KITS

Includes: three 4-hole wire looms, one 3-hole wire loom, one 2-hole wire loom, one 1-hole wire loom, two 4-hole wire separators, one 3-hole wire separator, one 2-hole wire separator, and six chrome plated brackets

MO72130	Blue, 7-9mm
MO72131	Red, 7-9mm
MO72133	Black, 7-9mm

SUPER MAX™ LOOM KIT

Includes six chrome plated brackets and mounting bolts with related looms and separators to route plug wires from the distributor in the order to each cylinder without crossing over.

MO72190 Blue, 7-9mm

HIGH-TEMP UNDER HEADER LOOM KIT

Designed for routing wires under headers on old and new style Small Block Chevy engines

Includes four chrome plated brackets, two 4-hole looms, two 2-hole looms, two 4-hole separators, two 3-hole separators, two 2-hole separators and mounting bolts

MO72195 Black, 7-9mm

SPARK PLUG WIRE SEPARATORS

- Protect against heat damage by preventing contact with hot engine components
 - Prevent crossfiring by firmly holding plug wires away from one another
 - Can be used for routing wires over valve covers or under headers
 - Wires "snap" into place with slight pressure
 - Sets include two 2-hole separators, two 3-hole separators and two 4-hole separators
 - Available in Blue, Red, Yellow and Black

SPARK PLUG BOOTS

Aeroflow's spark plug boot and ignition wire insulator is the perfect solution for tight headers and turbo manifolds, also act as a dual purpose spark insulator to reduce misfires, extend plug wire and boot life and will not react to petroleum products. Universal size fits most boot sizes and can easily flex for angled boot applications. Easy to install and most importantly non-flammable. Sold as 4 packs. Dimensions: 155mm (6-7/64") long, 25.4mm (1") diameter.

AF91-6050 Black 1100°C (2000°F) radiant, 260°C (500°F) direct

AF91-6051 Titanium 1650°C (3000°F) radiant, 1100°C (2000°F) direct

SPARK PLUG BOOT SLEEVES

- Have "Dual Wall" construction, which assures protection from spark plug and ignition wire burnout
- Protects up to 1200 Deg. F.
- Wires and Boots stay cooler in exhaust area
- Porous/breathable to reduce Oven Effect
- Non-flammable, will not react with petroleum-based products
- 1" I.D., 5-1/2" Long
- Expands and stretches over regular surfaces, will work with 135 Deg. and 90 Deg. Spark Plug Boots
- Sold in pairs

INSULATED WIRE SLEEVE

- Available in Black, Blue, Red and Ultra 40 in Blue
 - Closely woven fiberglass impregnated with high voltage, leak resistant silicone which adds up to 8,000 volts of extra insulation
 - Extend spark plug wire life by adding insulation against exhaust header heat
 - For best results, we recommend that the sleeve cover the full length of wire from spark plug boot to distributor boot and sealed with Shrink Sleeve No. 72030 or No. 72031
 - Nos. 72000, 72002, 72004 fits 7 & 8mm wire; No. 72011 fits 8.65mm wire
 - Packaged in 25' lengths
 - Developed for Moroso by racing legend Smokey Yunick
- MO72002 Insulated Spark Plug Wire Sleeve, Red
MO72004 Insulated Spark Plug Wire Sleeve, Black
MO72011 Ultra 40 Insulated Spark Plug Wire Sleeve, Blue

SPARK PLUGS

CHAMPION PLUGS for Flathead engines
Spark Plugs (ea) Suit Ford Flathead and cars 1938 to 1954
BD7RA-12405-C

ACCEL Header Spark Plugs

The overall length of these plugs has been reduced 1/4" to 3/8" (depending on the specific spark plug) to gain critical air gap space between the spark plug boot and the exhaust manifold or header tube. This helps eliminate burning the spark plug boot or dimpling the header tube. The shorter spark plug length also can make it easier to install and remove the spark plugs in certain applications where there is not a lot of room to fit a socket or move a wrench around.

- Short Body For Header Clearance • Projected Tip Style
- Supplied In Packs Of 8 Plugs

Racing Spark Plugs

We realize race teams push their vehicles to the edge. Knowing this we design every NGK Spark Plug to withstand severe mechanical and thermal shock associated with these high-revving, high-compression race engines. As a result of our superior quality, you'll have confidence knowing you have the World Leader in spark plug technology firing your way to victory.

¹HXC types feature .030" projection. N1032Y has .120" projection (all other projection .060"). ²8000 series plugs are PowerSport designs. ³No heat range for surface gap plugs. ⁴Fine wire designs may run slightly hotter than standard centre electrodes.

ACCEL SPARK PLUG

INDEXING WASHERS

14MM Indexing Washer Kit - 30 assorted washers
AC1002

SPARK PLUG INDEXING TOOL

High compression engines run better with the spark plugs indexed. This way spark plugs can be properly set so there is no piston dome interference. Fits 14mm and 18mm Spark Plug Threads.
PR66795

Spark Plug Indexer

the ARP indexing tool takes the guess-work out of installing spark plugs where the combustion chamber and high dome piston clearances is critical. Anodized for protection and quick recognition. For use with tapered gasket 14mm plugs.

Spark Plug Indexer ARP920-0001

SPARK PLUG INDEXING WASHERS

Designed for use on all 14mm spark plugs with 5/8" hex. With three thicknesses in each package, one will correct the electrode placement on any plug and simplify the time consuming task of spark plug indexing. The washers are precision stamped from copper for perfect sealing and heat transfer. 30 per pack, 10 of each size.

CRATE ENGINES

CHEV 350 ENGINE 350/265

The Gen 0 small-block features excellent performance and durability across a wide variety of applications. Part of GM's small-block V8 series, it's one of the most successful engines in our automotive history. Available for most GM applications from 1973 to 1985 plus MORE. The nodular iron crankshaft features enlarged journal fillets for increased durability. The 5.7L is an all-iron GM small-block V-8 rated at 265 HP.

Base Tech Specs

GM PRODUCTION L92/LS3 GEN IV

ALUMINIUM BLOCK

The LS Series cylinder block is the foundation for the serious performance achievements that are driving a new generation of street and racing enthusiasts. Features include a deep-skirt casting (the block side extends below the crankshaft centerline); 6-bolt cross-bolted main caps, strong and lightweight aluminum alloy casting (most production blocks) and provisions for the latest in engine control management. The cam-in-block configuration brings inherent torque to every LS engine, with production-based blocks capable of supporting combinations of 500 horsepower or more. Whether you're building a mild street engine or an Outlaw racing engine, starting with a strong LS cylinder block brings the assurance that you'll make the power you need with a durable foundation.

L92/LS3 Aluminium Block Features:

- Direct replacement for 2007-2008 L92 and 2008 LS3 6.2L
- Production aluminium block with iron sleeves
- Production oiling system •6-bolt main bearing caps
- 9.240" deck •Use with LS1, LS6, LS2, L92 or LS3 cylinder heads
- 4.065" finish bore (103.25mm) •Provisions for "active fuel management" •Great for stroker cranks and even more cubes
- Tested to over 500 HP

GM 4.065" Bore, 9.240" Deck, Aluminium Block GM12623967

GMSX SEMI FINISHED STANDARD DECK BOWTIE BLOCK

The next generation of high performance GM blocks has been released! GM Performance parts, working with NHRA pro stock legend Warren Johnson, designed the LSX block to be the ultimate high performance LS block. Our goal was to bring the LS community race block technology at street car prices. Just like every engine part in the GM performance parts portfolio, the LSX Bowtie block is held to the highest industry standards for tolerances, materials and construction. Features: •100% CNC machined cast iron •True priority main oiling •6 head bolts per cylinder •Standard 4.400" bore spacing •Extra thick Siamese cylinder bores •Fully machined bores, ready to hone to fit •Semi-finished, machined decks, ready to be decked to your specs. •Increased deck thickness •LS7 style 6 bolt "dowel located" main bearing caps •Wet sump and dry sump capability •Deep skirted head bolt holes (same as OEM aluminium blocks) •All stock bolt holes are stock thread size •Maintains all OEM "LS" family exterior mounting features •Front motor plate mounting holes added •Added material around cam bearings for extra strength •8mm exterior/interior 5th and 6th head bolt holes •All 5 cam bores machined for bearing # 12453169 •Standard .842" lifter bores •Screw-in soft plugs •Accommodate any "LS" series oil pan and oil pump •External oil pump feed at rear of block •Main web bay to bay breathing holes for increased HP •Access windows for cylinder head stud access (intake side) •Extra breathing pocket added near starter for better windage •Includes new cam retainer # 19166177, rear cover #19166178, lifter retainers #19166182 and OEM replacement cam bearings LSX Cast Iron Block - 9.26" Deck GM19260093

LSX BOWTIE BLOCK

This durable iron-block casting is based primarily on GM's production LS7 block, but designed with more material in key areas including thicker deck and bores to support displacements of 454 cubic inches or more, and unique six-bolts-per-cylinder-head clamping capability that enables forced-induction and nitrous combinations of greater than 2,000 horsepower. Because the LSX Bowtie block is based on production LS blocks, all of the LS-Series Gen IV cylinder heads, crankshafts, oil pans, camshafts, and accessories bolt right up to it. There is also a tall-deck version for building even larger engines. Chevrolet Performance delivers the LSX Bowtie Block semi-finished, allowing you to finish it to your needs. Whether you're building a "tame" 500-horse street engine for your hot rod or a 1,700 horsepower turbo engine for an Outlaw drag racer, the LSX Bowtie Block is the foundation for an unbeatable combination - at an unbeatable price!

LSX Bowtie Block - Standard Deck

- 3.880" finished Siamese cylinder bores
- 9.260" semi-finished standard deck height (ready to be decked)
- 4.250" maximum stroke (professional engine builders only!)
- Capable of 364- to 482-cubic-inch displacements
- Orange powder-coated finish • Accepts all LS and LSX Series heads, cranks, cams, etc. • Approximate finished weight is 225 pounds LSX Bowtie Block specs and features include:
- CNC-machined cast-iron block • True priority main oiling
- 6-head bolts per cylinder • Standard 4.400" bore spacing
- Extra-thick Siamese cylinder bores • Semi-finished, machined thicker decks • LS7-style, 6-bolt dowel-located billet main bearing caps • Wet-sump and dry-sump oiling capability • Production-style deep-skirt head bolt holes • Production bolt hole and thread sizes
- Maintains production exterior accessory mounting provisions
- Front motor plate mounting holes added
- Additional material cast around cam bearings for greater strength
- 8mm exterior/interior fifth- and sixth-head bolt holes
- Standard 0.842" lifter bores • Accommodates all LS oil pumps and oil pans • External oil pump feed (rear of block)
- Main web bay-to-bay breathing holes to support greater horsepower • Includes unique cam retainer, rear cover and lifter retainers

MOPAR 426 HEMI

CAST IRON ENGINE BLOCK

It's back! Without steady and reliable access to a Gen II cast iron 426 Hemi in over a decade car enthusiasts and sportsman racers have been left to source scrapyards, market places and garages to create a workable and affordable solution. Together with Energy Manufacturing Ltd. Callies Performance Products has a new licensing deal with Fiat Chrysler Automobiles to allow you to tap into this legendary platform on demand at an affordable price. Included with block: Block Plug Kit, Camshaft Bearings (Loose), .040" Oil Gallery Restrictors (installed), and Rear Oil Seal with fasteners.

Block Specifications:

- Bore Size: 4.500" Unfinished
- Bore Size (Max): 4.600"
- Deck Height: Standard Deck, 10.725"
- Deck Thickness: .600"
- Camshaft: Standard Stepped Can Tunnel
- Camshaft Height: Standard, 5.150"
- Camshaft Housing Bore (Max): 60mm Roller Bearing
- Lifter Diameter: .905"
- Lifter Angle: 45°

FORD PERFORMANCE

BOSS 302 CYLINDER BLOCK

The legend is reborn with this all new 302 block. The new Boss 302 is the ultimate small block Ford engine block for street or race. The Boss 302 block replaces the 302-R race block and has many improvements over the previous design. With a bore size of 4.125" and a 3.400" stroke it has a maximum capacity of 363 cubic inches. • 8.2" deck height • 4.125" bore, rough finished to 3.990" • Maximum recommended stroke 3.400" • Splayed 4-bolt centre main caps • Finished lifter bores • Accepts factory roller lifter guides & retainer • Revised oiling and cooling system passageways • Siamese bore with drilled coolant crossover holes • Increased bulkhead material • Screw in welsch plugs • Accepts 1/2" head bolts • Uses common OD cam bearings Boss 302 Engine Block FMM-6010-BOSS

BOSS 302 CYLINDER BLOCK

8.2 DECK BIG BORE 4.120"

The all new 302 8.2 deck block for big bore builds! • Same as M-6010-BOSS except allows for bigger bore by deleting coolant crossover holes between cylinders • Finished at 4.120" rough bore. Designed for minimum bore wall thickness .180" @ 4.125" (Sonic check recommended for bores greater than 4.125") • 8.2" deck height • Maximum recommended stroke 3.400", clearance dependent on crankshaft/connecting rod manufacturer • Splayed 4-bolt main on 2, 3, 4, main caps • 2-bolt main on 1 and 5 main caps • 2.248" main journal diameter (stock 302W size) • Finished lifter bores • Revised oiling and cooling system passageways • Increased bulkhead material • Threaded core and galley plugs (straight thread port plugs with O-ring) • Unique cam plug included FMM-6010-BOSS302BB - Boss 302 8.2" Deck Big Bore 4.120"

BOSS 351

CYLINDER BLOCK

9.2 DECK BIG BORE 4.125"

Ford Racing introduces the all new B OSS 351 9.2 deck block for big bore engine builds! • Same as M-6010-BOSS35192 except allows for bigger bore by deleting coolant crossover holes between cylinders • 4.185" bore capacity (sonic check recommended), finished at 4.12" rough bore • 9.2" deck height, finished at 9.200" plus .010" to .015" • Maximum recommended stroke 4.00", clearance dependent on crankshaft/connecting rod manufacturer • Splayed 4-bolt main on 2, 3, 4, main caps • 2-bolt main on 1 and 5 main caps • Main bearing bores finished to low limit • 2.749" main journal diameter (stock 351C size) • Finished lifter bores • Machined to accept factory roller lifter guides and lifter guide retainer • Revised oiling and cooling system passageways • Increased bulkhead material • Threaded core and galley plugs (straight thread port plugs with O-ring) • Unique cam plug included Boss 351 9.2 Deck Big Bore 4.125" FMM-6010-B35192BB

GM SMALL BLOCK CHEV ENGINE BLOCKS

The GM Performance Parts production-based blocks are the right choice for street car rebuilds or to start your own mild engine project. They come in the same dimensions that you are already familiar with and are produced to the high level of quality that GM is famous for. Remember, these are brand new castings that are machined to our exacting tolerances and delivered to you at an affordable price. These blocks are designed for street engines that demand good strength and a high level of durability.

- Non-siamese bores • Standard 350 main journal sizes
- 4-bolt main caps • 383 Block is cleared for stroker cranks
- Machined for hydraulic roller and flat tappet lifters

Description Part No.
350 Bare Block, 1-piece rear seal GM10105123
383 Bare Block, 1-piece rear seal GM88962516

GM Performance 6.0L LY6 Cast Iron Bare Block 4.00"

Bore Gen IV Based

GM19369841

Deep-Skirt Casting (the block side extends below the crankshaft centerline)
6-Bolt Cross-bolted Main Caps
Strong and Lightweight Aluminum Alloy Casting (most production blocks)
Provisions for the latest in Engine Control Management
9.240" Standard Deck Height
2.560" Standard LS Crankshaft Journal Diameter
1-Piece Rear Main Seal
Main Journal Type: OEM
Engine Block Style: Stock/OEM standard deck
Deck Height (in): 9.240 in.
Cylinder Bore as Shipped: 4.000 in.
Engine Block Material: Cast Iron
Main Caps Included: Yes
Main Cap Material: Nodular iron
Main Cap Fasteners Included: Main bolts only no side cap bolts
Rear Main Seal Style: 1-piece
Finished Cylinder Bores: Yes
Cam Bearings Included: No
Freeze Plugs Included: No
Main Bearings Included: No

BOSS 351 CYLINDER BLOCK 9.2 DECK

4.000 BORE

Ford racing engineers have designed the replacement for the legendary BOSS 302 and 351 blocks using the latest technology and manufacturing techniques from both the production and racing worlds. The BOSS block capability has been proven around the world – both on the track and on the street. By preserving many of the dimensions and features from the original 289-351 blocks, the BOSS block are compatible as replacements for the use in just about any vehicle that used a Windsor-style engine. Cast from diesel grade iron and designed with added material in key areas, BOSS block strength is far superior to any ford OE block ever produced.

- The all new 351 9.2 deck block!
- Same as M-6010-BOSS35195 except at 9.2" deck height
- 4.125" bore capacity, finished at 3.990" to 3.995" rough bore
- 9.2" deck height, finished at 9.200" plus .010" to .015"
- Maximum recommended stroke 4.00", clearance dependent on crankshaft/connecting rod manufacturer
- Splayed 4-bolt main on 2, 3, 4, main caps
- 2-bolt main on 1 and 5 main caps
- Main bearing bores finished to low limit
- 2.749" main journal diameter (stock 351C size)
- Finished lifter bores
- Machined to accept factory roller lifter guides and lifter guide retainer
- Revised oiling and cooling system passageways
- Siamese bore with drilled coolant crossover
- Increased bulkhead material
- Threaded core and galley plugs (straight thread port plugs with O-ring)

Boss 351 9.2 Deck 4.000 Bore FMM-6010-BOSS35192

BOSS 351 CYLINDER BLOCK 9.5 DECK 4.000 BORE

The legend is reborn with this all new 351 block! Stronger than the original!

- 4.125" bore capacity, finished at 3.990" to 3.995" rough bore
- 9.5" deck height, finished at 9.500" plus .010" to .015"
- Maximum recommended stroke 4.250", clearance dependent on crankshaft/connecting rod manufacturer
- Splayed 4-bolt main on 2, 3, 4, main caps
- 2-bolt main on 1 and 5 main caps
- Main bearing bores finished to low limit
- 2.749" main journal diameter (stock 351C size)
- Finished lifter bores
- Machined to accept factory roller lifter guides and lifter guide retainer
- Revised oiling and cooling system passageways
- Siamese bore with drilled coolant crossover
- Increased bulkhead material
- Threaded core and galley plugs (straight thread port plugs with O-ring)

Boss 351 9.5" Deck 4.000 Bore FMM-6010-BOSS35195

BOSS 351 CYLINDER BLOCK 9.5 DECK BIG BORE 4.125

The all new 351 9.5 deck block for big bore builds!

- Same as M-6010-BOSS35195 except allows for bigger bore by deleting coolant crossover holes between cylinders
- Finished at 4.120" rough bore. Designed for minimum bore wall thickness .180" @ 4.125" (Sonic check recommended for bores greater than 4.125")
- 9.5" deck height, finished at 9.500" plus .010" to .015"
- Maximum recommended stroke 4.250", clearance dependent on crankshaft/connecting rod manufacturer
- Splayed 4-bolt main on 2, 3, 4, main caps
- 2-bolt main on 1 and 5 main caps
- Main bearing bores finished to low limit
- 2.749" main journal diameter (stock 351C size)
- Finished lifter bores
- Machined to accept factory roller lifter guides and lifter guide retainer
- Revised oiling and cooling system passageways
- Increased bulkhead material
- Threaded core and galley plugs (straight thread port plugs with O-ring)
- Unique cam plug included
- The foundation for big bore 9.5" deck projects

Boss 351 9.5 Deck Big Bore 4.125" FMM-6010-BOSS351BB

CAMSHAFT BEARINGS

Common outer diameter cam bearings for Ford Racing 302 and 351 cylinder blocks. Available to suit standard cams or custom ground common OD camshafts.

Bearings for Standard Cam **FMM-6261-J351**
 Bearings for Common OD Cam **FMM-6261-R351**

DART IRON EAGLE BLOCKS - SMALL BLOCK CHEV

Iron Eagle small-blocks are available in standard and tall-deck versions so you can select the crankshaft stroke and connecting rod length that's right for your combination. We raised the camshaft and spread the oil pan rails to provide extra clearance for stroker cranks. The versatile Iron Eagle block is the perfect starting point for a big-inch small-block project, you can build a 455ci small-block with Dart!

- Siamesed cylinder bores • Cylinders can be safely bored to 4.185"
- Relocated oil pan rails are spread .400" per side
- Steel four-bolt main caps on all 5 mains • Two-piece rear main seal fits standard racing crankshafts • Raised camshaft provides more clearance for stroker cranks • Big-block camshaft bearings
- Dual starter mounts allow starter to be mounted on either side
- Side and front engine mounts

DART SHP IRON BLOCKS - SMALL BLOCK CHEV

Dart's new Special High Performance (SHP) small-block meets the need for an affordable, precision-machined cast-iron block with superior features. Designed for high-performance and heavy-duty applications producing up to 600 horsepower, the SHP block is the ideal starting point for hot rodders, drag racers, circle track competitors, off-roaders, and high-performance marine enthusiasts.

- Siamesed cylinder bores
- Cylinders can be safely bored to 4.185"
- Ductile four-bolt main caps on centre three
- Two-piece rear main seal fits standard racing crankshafts
- Dual starter mounts allow starter to be mounted on either side

Part No	Deck	Bore	Mains	Main Caps

DART SHP PRO IRON SMALL BLOCK CHEV

The Dart SHP Pro block adds a new dimension to the SHP line, with the affordability of an SHP block, new features for more powerful engine builds and the desirable weight of an SHP casting. The SHP Pro has all of the features that make the SHP block so popular, priority main oiling, siamesed bores, extra thick decks and compatibility with most OEM parts, in addition it sports some new features that make it suitable for builds that will use higher spring pressures and run at higher rpm ranges. Billet main caps, a big block cam bore and bigger lifter bores add up to greater strength and stability.

Features: • Big block Chevy cam bore • .904 lifter bores
 • Brand new precision machined, light weight cast iron block.
 • Billet steel main caps • ARP main studs
 • Siamese bores 4.000" or 4.125" (unfinished).
 • Extra thick decks ensure reliable head gasket seal.
 • Blind head bolt holes don't go through to water jacket.
 • Clearance for 3.75" stroke with steel rods.
 • 350 main journals accept commonly available crankshafts.
 • Uses 1981-1985 USA stock style oil pan and dipstick.
 • Uses stock stamped steel or plastic timing cover.
 • All OE bolt holes for starter, clutch ball, etc...
 • Priority main oiling system directs oil to main bearings, first for more dependable lubrication.

Part	Deck	Bore	Main Description	Main Cap
