TAPER STYLE MALE HOSE ENDS For 100 & 450 Hose

Aeroflow's male adapter taper style forged hose ends are designed to allow the hose end to be threaded directly into a female port without the extra cost and complication of an adapter fitting. Made from 6061-T6 aluminium, this design ensures a secure, leak free connection every time. Aeroflow's corrosion resistant, colour consistent, Hard anodised (excluding silver) adds the final touch of quality and protection you have come to expect from Aeroflow.

570 SERIES HOSE ENDS

570 SERIES FULL FLOW PTFE (TEFLON®) HOSE ENDS

(Suits 200 Series Hose)

Aeroflow's 570 Series PTFE fittings are a CNC machined one piece fitting which provides uninterrupted flow. The purpose designed olive compresses into the PTFE (Teflon) inner tube for easy, leak free assembly. The mandrel bent tight radius body has superior wall thickness and a swivel head allowing for easy adjustment. Aeroflow's 570 series fittings are the choice of professionals for use in power steering, automatic transmission, nitrous, fuel systems, cooling systems, vacuum applications, oil systems, brake and clutch lines. We recommend the 200, 250 series hose in E85 applications. Compatible Hose: 200, 250 Series PTFE (Teflon) S/S hose • Hard Anodised (excluding silver)

200 SERIES HOSE ENDS

200 SERIES PTFE (TEFLON®) HOSE ENDS (suits 200 & 250 series hose) (Suitable for use with PTFE Hose)

Aeroflow's 200 Series PTFE fittings are a braised full flow fitting. The purpose designed olive compresses into the PTFE (Teflon) inner tube for easy, leak free assembly. All angles are mandrel bent, eliminating sharp changes in direction for optimum flow. Our 200 Series fittings allows 360 Degree rotation to allow for easy adjustment making them an excellent choice for the automotive enthusiast for use in power steering, automatic transmission, nitrous, fuel systems, cooling systems, vacuum applications, oil systems, brake and clutch lines. We recommend the 200, 250 series in E85 applications. Compatible Hose: 200, 250 Series PTFE (Teflon) S/S hose • Hard Anodised (excluding silver)

90° ORB SWIVEL PTFE HOSE ENDS

Aeroflow Performance male adaptor PTFE style hose ends are designed to allow the Teflon hose end to be threaded directly into a female port without the extra cost and complication of an adapter fitting. The purpose designed olive compresses into the PTFE inner tube for easy, leak free assembly and with the 90 degree mandrel angle eliminates sharp changes in direction for optimum flow.

510 SERIES HOSE ENDS

510 SERIES FULL FLOW TIGHT RADIUS PUSH LOCK HOSE ENDS

Aeroflow's 510 series push lock fittings are a CNC machined one piece fitting which provide uninterrupted flow. The mandrel bent tight radius body has superior wall thickness with a custom designed barbed end to allow a quick, easy and leak free assembly. Aeroflow's push lock fittings come with a purpose designed cover to hide the messy cut end of the hose to give you that professional look everytime.

400 SERIES PUSH LOCK HOSE ENDS

400 SERIES PUSH LOCK HOSE ENDS

Aeroflow's 400 series push lock fittings are a mandrel bent braised full flow fitting with a custom designed barbed end to allow a quick, easy and leak free assembly. Aeroflow's push lock fittings come with a purpose designed cover to hide the messy cut end of the hose to give you that professional look everytime.

Compatible Hose: 400 Series EFI Push lock hose with clamp (Blue/Black)
• Not compatible for power steering and automatic transmission line applications.

120 SERIES NYLON HOSE & PUSH-TO-CONNECT HOSE ENDS

120 SERIES NYLON HOSE

(suits 120 series fittings)

Aeroflow's Flexible black nylon hose is ideal for vacuum, air, oil, fuel and low pressure hydraulic lines and to be used with Aeroflow's 120 Series Push-to-connect aluminium fittings. The nylon hose has an extremely smooth inner surface with a very low coefficient.

- Bend Radius 25mm
- Working Pressure 250PSI
- Temperature range -40 C to 90 C
- Burst Pressure 1000 PSI
- Working Pressure PSI 250 (17.2 Bar)
- Wall Thickness .040" (1mm)

Tube Fittings Hard Line Adapters

Aeroflow Performance offers the best solution for transition from hard tube line to AN thread fast and simple. Our tube fittings come in all different sizes to meet most applications. Our unique design provides quick assembly and easy alignment on the final application. Aeroflow's corrosion resistant, colour consistent, double anodised and hand polished finish adds the final touch of quality and protection you have come to expect from Aeroflow.

90° LOW PROFILE ORB TO BARB ADAPTERS

Aeroflow have designed these low profile 90 degree ORB to barb adapters that are perfect for tight clearance applications. They swivel 360 degrees allowing you get your desired position and are hi flow so not only are they low profile they do not restrict flow. Manufactured from 6061-T6 aerospace grade aluminium and available in Blue, Black and Silver anodized finishes. Supplied with Viton O-rings and available in straight and stepped sizing ranging from -6 to -10ORB to various barb sizes.

TRANS COOLER FITTINGS

GM TRANSMISSION & OIL COOLER ADAPTER FITTINGS

Part No	Description	Pack of
AF64-2117	VE & VF trans cooler radiator adaptor male to -6AN (x2)	
AF64-2119	VE & VF trans cooler radiator adaptor female to -6AN (x2)	
AF64-2118	VE & VF trans cooler adaptor suits 6 speed 6L80E (x1)	

GM CLUTCH ADAPTER

Part No	Description	Pack of
AF363-04	VE & VF clutch master cylinder -4AN adapter	(x1)

GM TH350 & TH400 TRANS COOLER FITTINGS (2 per pack)

Part No	Description
AF375-06BLK	1/4" NPSM straight thread to -6AN washers included
AF375-08BLK	1/4" NPSM straight thread to -8AN washers included
AF59-3750	Replacement copper washers 2 per pack

Suits late model TH350 & TH400 with washer seal.

FORD TRANSMISSION OIL COOLER ADAPTER FITTINGS (2 per pack)

These handy adapters have been tested on Ford Falcons and Territory. These 1 piece full flow adapters allow an easy installation of a remote transmission oil cooler that is required when engine performance has been upgraded or increased load from things like towing. Designed with -8AN ends ton allow for different plumbing combinations with the ability to be swivelled to get your desired angle. Supplied with Viton O-Rings.

AF72-5050	Ford ZF 6HP26 trans port fittings 16.4mm barb
AF72-5051	Ford 6R trans port fittings 18.85mm barb

NPT FITTINGS

S/S NPT MALE TO AN

Aeroflow Performance have designed this 304 stainless steel 1/16" NPT to -3AN and -4AN for applications such as external wastegates and radiator necks. Being a 304 stainless steel it can withstand extreme heat and is high strength compared to the standard alloy fitting which can break over time in racing applications.

QUICK RELEASE

Billet Fuel Sample Valve

Aeromotive's Billet Fuel Sample Valve is designed to simplify installation and make fuel checks a snap. It installs into any 1/8" NPT port and provides a duplicate 1/8" NPT port on the valve for installation of a fuel pressure gauge. When a fuel sample is required, rotate to the unlocked position, press for fuel sample and release, re-lock the valve and go race.

Billet Fuel Sample Valve ARO15631

Quick Release Aluminium Fittings

Aeroflow's quick release fittings are a market break through. These light weight fittings are made from billet 6061-T6 aluminium. They are anodized to safe guard your fittings against corrosion. They have been tested up to 15000psi and are a perfect choice for brake lines (NOT for road use Off-road and race use only), clutch or fuel lines depending which seal you choose. They connect by hand in seconds. Perfect for anti-theft device. These fittings are designed for leak free release. Please refer application guide. Aeroflow's quick release fittings are also available with a heavy duty Titanium body.

NOTE: EPDM seals must be used in brake applications. Viton seals are recommended for oiling applications. Buna N seals are recommended for all fuels except Nitromethane.

AFQR104-03BH	Titanium Quick Release with bulkhead
AFQR104-04BH	Titanium Quick Release with bulkhead

NOT suitable for fuel or oil.

3/8" Female Quick Connect to ORB-08 Port

More area and smoother transitions from the inlet to the outlet, resulting in less restriction than any other fitting line. The aeromotive line of custom fittings, adapters and hose-ends are a step above the norm, offering uncompromised fuel flow and positive sealing. Constructed of 6061 T6 aircraft grade Aluminium or stainless steel, each component is CNC-machined for precision fit and unmatched Flow. All billet aluminium fittings are anodized type ii bright dip black for corrosion protection and unrivaled aesthetics. We offer a complete line of hard to find fittings from OEM specific connections to an adapters.

ARO15118 3/8 FEMALE QUICK CONNECT ORB-08

Roll Over Valve / Vent

Aeroflow's Universal roll over valve can be screwed directly into an Aeroflow Fuel cell that has a -12 female thread. The top of the valve has a -8 ORB female thread and a stainless steel ball. It can be used with the AF996-12D, AF996-12S and AF996-12SS weld on or an AF924-12 Bulk Head nut with a choice of any -8 ORB to suit any plumbing solution. When the fitting is screwed into the top of the roll over valve it locks the ball.

-8AN Tip Over Valve	JAZ834-008-11
-10AN Tip Over Valve	JAZ834-010-11

JAZ Roll Over Vent Valves Details

This vent valve design eliminates the need to plumb a vent/splash tube for a cleaner look that saves space. It features a vented cap and brass anti-splash filter to keep your fuel in the cell and is intended for exposed cells mounted behind the driver only, like those on many Comp and Super Comp Dragsters. Not legal for use on enclosed body cars where the driver is exposed to fumes. JAZ834-108-06

Fuel Cell Tip Over Breather Valve

Filtered breather valve mounts directly to the fuel cell and seals off in the event of a roll over to prevent fuel spills.

PFS09-0492

Inline 90° Scavenge Filters

Peterson's billet aluminium inline 90° scavenge filters feature a straight male AN end and a 90° female AN end and can be mounted directly to male AN fittings for ease of plumbing. Free flowing, sizes -10AN & -12AN have twice the filter area of our Dry Sump Pan Screens.

Description

CLEAR VIEW FILTRATION

SEE THROUGH OIL FILTER ASSEMBLIES

CV101-115 **CV101-115-B**

6" DRY-SUMP OIL FILTER ASSEMBLY

6" Dry-Sump See through Filter Assembly with #16 Ports and 115 Micron Element, for running all weight oils up to 70 weight. Designed to be mounted between the Dry-sump oil pump and the oil tank on a #16 scavenge line. Also for applications where the oil tank has a flat bottom and running 60 or 70 weight oil like a lot of super charged funny cars and tractor pullers. Flat bottom unlike tapered bottom tanks particles will settle to the bottom and may not be sucked through the pressure side of the oil pump for inspection. Tapered bottom tanks can run the See through filter on the pressure side.

- Smallest Particles Filtered: 115 Microns • Bypass Relief Valve: No
- Inlet & Outlet Fitting: #16 O-Ring Boss – 1-5/16" – 12 TPI • Operating Temp: max 220 degrees Fahrenheit • Operating Pressure: max 150 PSI
- Height: 3.500 in. • Width: 6.750 in. • Length: 7.750 in. • Filter Weight: 6.15 pounds (2.8 kg)

Description
 6" Hi-Flow Dry Sump Filter With -16 Ports & 115 Micron Element, Clear Anodised **Part Number: CV101-115**
 6" Hi-Flow Dry Sump Filter With -16 Ports & 115 Micron Element, Black Anodised **CV101-115-B**

CV100-115 **CV100-115-B** **CV410-60-B**

4" & 6" CLEAR VIEW FILTER ASSEMBLY

See through Oil Filters can be used for many applications including Racing, Marine, Automotive, Farm, and for Industrial Hydraulic Systems. These Patented Oil Filter Assemblies allow the user to visually see oil pumping through the filter, which helps to determine the condition of the oil. When oil is not being pumped through the filter it can quickly drained using an air chuck for filling tires and compressed air. A hand bicycle pump will also work. Apply a small shot of air to the air fitting on the side of the inlet opening. Oil will empty out of the assembly in seconds exposing the filter element and filtered particles, even when filtering non transparent fluids like dirty oil. The See Through top allows the user to visually inspect particles and contaminants that were filtered out of the system to determine if they are from normal use or from bearings and other components excessively wearing in the engine or machinery supplying the Filter Assembly. Note: when using 50 weight or lighter oil a 60 micron element is recommended. When using 60 weight or heavier oil a 115 micron element is recommended.

- Filter Elements: 60 or 115 Microns • Bypass Relief Valve: Yes
- Inlet & Outlet Fitting: #12 O-Ring Boss – 1 1/16" – 12 TPI
- Operating Temp: max 220 degrees Fahrenheit • Operating Pressure: max 150 PSI 6" Filter Specification • Height: 3.250 in. • Width: 6.750 in. • Length: 7.750 in.
- Filter Weight: 5.75 pounds (2.60 kg) 4" Filter Specification • Height: 3.00 in. • Width: 5.00 in. • Length: 6.00 in. • Filter Weight: 3.50 pounds (1.6 kg)

CV400-115 **CV400-115-B** **CV405-115** **CV405-115-B**

4" CLEAR VIEW SCREW-ON OIL FILTER ASSEMBLY

These 4" Screw-On Filters were designed to use a System 1 or disposable filter on the bottom. This is the same filter assembly as part # 400-115 except that filter has a receiver groove in the bottom which help prevents the disposable filter seal from blowing out. Part # 405-115 has a flat sealing surface on the bottom so a System 1 O-Ring seal can seal correctly. Early finned style and System 1 filters which use 2 O-Rings can only use the outside O-Ring to seal. The inside one cannot be used. Recommend using the Billet Pro Series System 1 which uses a single larger O-Ring seal. Also needs System 1 Chevy threaded bushing when using a System 1.

- Smallest Particles Filtered: depends on the disposable filter microns, varies on brand
- Recommended Disposable Filter for CV400-115: (not included) K&N # HP-2003 or # HP-3002 or WIX #51069 or # 51060 Blackout Series can use Napa Gold filters
- Disposable Filter Thread Size: 13/16" – 16 TPI
- Bypass Relief Valve: Yes
- Inlet & Outlet Fitting: #12 O-Ring Boss – 1-1/16" – 12 TPI
- Operating Temp: max 220 degrees Fahrenheit
- Operating Pressure: max 150 PSI • Height (without disposable filter): 3.00 in.
- Width: 5.00 in. • Length: 6.00 in. • Filter Weight: 3.40 pounds (1.55 kg)

Description

 4" Screw-On Oil Filter Assembly With -12 Ports & 115 Micron Element, Black Anodised **CV400-115-B**
 (For use with disposable oil filters)
 4" Screw-On Oil Filter Assembly With -12 Ports & 115 Micron Element, Clear Anodised **CV405-115**
 4" Screw-On Oil Filter Assembly With -12 Ports & 115 Micron Element, Black Anodised **CV405-115-B**
 (For use with System 1 oil filters)

6" CLEAR VIEW SCREW-ON OIL FILTER ASSEMBLY

6" Screw-On See Through Filter Assembly with #12 Ports and 115 Micron Element, for running all weight oils up to 70 weight. Dual Filtration is recommended for motor sports ran on dirt and pushing high volumes of oil. Filters Can be used for many applications including Racing, Marine, Automotive, Farm, and for Industrial Hydraulic Systems. This Filter Assembly uses a HP-6 size and style disposable filter.

- Smallest Particles Filtered: depends on the disposable filter microns, varies on brand
- Recommended Disposable Filter: (not included), K&N #HP-5001 or WIX #51222R or John Deere #RE21058, BlackOut Series can use Napa Gold filters • Disposable Filter Thread Size: 1-1/2" – 12 TPI • Bypass Relief Valve: Yes • Inlet & Outlet Fitting: #12 O-Ring Boss – 1 1/16" – 12 TPI • Operating Temp: max 220 degrees Fahrenheit • Operating Pressure: max 150 PSI • Height: 3.250 in. • Width: 6.750 in. • Length: 7.750 in. • Filter Weight: 6.1 pounds (2.8kg)

BILLET HI-FLOW OIL BLOCK ADAPTERS

Block adapters are machined out of 6061 billet aluminum and clear or black anodized for better protection. Block adapters are a high flow design for high pressure and high volume oil systems for today's performance and race engines. These block adapters have been redesigned so they will not restrict the flow of oil. Should look up the disposable filter for application to make sure the thread size matches the adapter before install.

SYSTEM 1 Oil Filters

The System 1 Oil Filters spins right on where the standard oil filter is usually installed. It can be switched from car to car as you wish. The Filter itself was built for high powered race cars because they needed a filter they could inspect.

- The System 1 Filters real value is in it's lifetime use and obvious environmental benefits.
- High Flow Inlet** - will not restrict lubricant flow or contribute to pressure reduction
- Die Cast Aluminum Housing** - black anodised
- Anti-Aeration Filter Cone** - extra strong construction, manufactured from DuPont glass impregnated ZYTEL.
- Easy To Clean** - in soap or solvent, will not absorb waste or debris.
- Tattle-Tale Inspection** - quick removal and easy to read filtration screen gives early warning of internal problems.
- High Flow By-Pass** - maintains maximum efficiency to 5 Microns before activation. Made from DuPont glass impregnated ZYTEL and sonic welded to provide a completely secure unit.
- Dual O-Rings** - double the sealing power. Double the security.
- Universal Mounting Inserts** - adapts housing to most popular engines and remote filter systems.
- 138 Square Inches of Stainless Steel** - Delivers greater "filtration time" while promoting full system pressure. Double dutch twill, woven stainless steel mesh, is durable enough to last a lifetime. Will not tear, deteriorate or collapse under extreme pressure and extended use.
- Larger Housing** - increases oil and cooling capacity. Short housing available.
- Removable Inspection Cap** - provides quick, easy access to filter without removing the entire housing. Uses 13/16" drive wrench.

3" DIAMETER BILLET SPIN ON 35 MICRON OIL FILTERS

These Billet 3" diameter 35 micron Spin on Oil Filters are machined from 6061-T6 Billet Aluminum and Black Anodized, for long lasting protection. These cleanable 35 micron filters, fits most late model 3" diameter filter applications with a 3 3/4" short or 5 1/4" long filters. Universal threaded adapter sizes are 3/4-16 and 13/16-16. Metric filter threaded adapters are 18 mm, 20 mm and 22 mm x 1.5 threads. 3" diameter filters have single O-ring groove for block mounting

PRO SERIES BILLET

SPIN ON OIL FILTER

This Pro Series Billet Oil Filter is our newest purpose built oil filter. Designed for Blown Alcohol, Injected Nitro, Fuel Dragsters, Funny Cars & Pro Mods, this billet constructed filter housing and inspection cap is machined from 6061-T6 aluminium and anodized black for a long lasting superior finish! Incorporated into this filter is a 75 micron element designed for the rigors of 60 & 70 weight motor oil to lube your power plant with little to no restriction. Has a single O-Ring groove at the mounting surface and fits all System 1 Billet Remote Mounts (not included) with 1"12 threads. Flows 30 GPM. Also available with 35 or 45 micron element for lighter weight oils. 3-3/4" O.D. X 5-3/4" Long

PRO FILTERS

When excellent filtration is the key to oil system performance Aeroflow's Pro Filters provide an inexpensive insurance policy to protect your investment. For 200 - 2700 plus HP applications, our filter assemblies offer unmatched flow and ease of maintenance and installation. The Pro Filters also include an internal magnet to catch fine particles and are available in blue, black and silver.

Furthermore Aeroflow's Pro Filters are:

- Stainless steel reusable/washable element
- CNC-machined from 6061-T6 aircraft aluminium
- feature serviceable filter elements in different micron ratings.

89mm (3-1/2") PRO FILTERS

LIFTER VALLEY SCREEN KITS

The Milodon Lifter Valley Screen Kits provides inexpensive insurance for Small Block and Big Block Chevy racing engines-especially for dry sump applications. Designed to prevent broken parts from falling into the oil pan or pump and causing serious motor damage, these stainless steel screens affix to the oil drain back holes located in the valley area of Chevy engines. Screen kit includes instructions and epoxy.

Small Block Chevy includes screens & block-off plugs **M123150**

Big Block Chevy kit includes two epoxy kits **M123160**

FILTER FITTING SCREEN KIT

- Install in fittings to trap metal chips and debris
- Ideal for use on dry sump pumps, external oil pumps, rear end pumps, etc.
- 304 stainless steel screen uses .015" diameter 16 mesh wire
- Dimensions: .817" O.D. x 1.75" long
- Includes epoxy cement and 4 screens per kit
- Machining required for installation

MO23965

Filter Fitting Screen Kit.

37° AN FLARE FILTER

These great little 250 micron stainless steel filters simply slide into your AN flare for great inline filtration. For use with fuel, oil and water

"ENGINE SAVER"

Pre-Filter Screen

- Fits all Small Block, Big Block and 90° V6 Chevy engines with spin-on oil filters
- Unique stainless steel screen locates on top of spin-on oil filters to trap debris before it enters the filter element undetected
- Particulate matter trapped in the screen and detected during periodic inspections serves as an "early warning signal" for impending engine failures
- 304 stainless steel filtration-grade screen traps contaminants down to the 280 micron range without affecting oil flow or oil pressure
- Crimped rings at both outside and inside diameters provide increased strength and extended durability
- Designed in cooperation with Jomar Racing Engines "Engine Saver" Pre-Filter Screen. Small Block, MO23845

Small & Big Block Chevy and 90° V6 Chevy.

OIL FILTER SCREEN

Replacement OMNI oil filter screen
MO97710

OIL RETURN SCREEN KITS

- Inexpensive engine insurance!
- Traps metal fragments or loose components resulting from valvetrain failure before reaching vital engine parts
- Stainless steel mesh screens are fitted over holes in lifter gallery with supplied epoxy

MO25000 Oil Return Screen Kit, Small Block Chevy. Includes 8 oil return hole plugs to redirect oil to front/rear return galleries. Includes filter screens and epoxy.

MO25001 Oil Return Screen Kit, Big Block Chevy. Includes 4 screws

FILTER FITTINGS

Designed to trap metal chips and debris before reaching external or dry sump oil pumps, or rear end lube pumps. The 304 stainless steel screen uses .015" diameter, 16 mesh wire. Easily removed for cleaning.

MO22610

RACING OIL FILTERS

Many filter manufacturers stress the importance of filtering the smallest particles out of your engine's oil, with references to micron ratings of 10 or less for a filter's efficiency. Moroso engineers have determined that particles smaller than 20 microns in diameter are not large enough to produce engine wear. Filters with extremely low micron ratings create an excessive pressure drop across the filter. They can be so restrictive that the filter by-pass valve can allow unfiltered oil into your engine. To maximize filter performance, Moroso Racing Oil Filters have a rating of 27 microns, which produces a maximum initial restriction of only 2.5 psi when tested to SAE J806. The result is less pressure drop, more flow, less oil by-pass and maximum filtration performance important in severe racing conditions.

- Extra thick housing and base plate
- Roll formed threads for a precise tight fit
- High flow pleated filter element
- Anti-drainback valve (except MO22465)
- Buna-N gasket is compatible with all fuels & lubricants

Application
Chev Long Style, 13/16" Thread (Ryco Z24)
Chev Extra Long, 13/16" Thread (8" tall)

Part No.
MO22460
MO22461

Powersports Oil Filters

K&N world renown for its high-performance powersports air filters, has now introduced a complete line of performance oil filters for motorcycles and ATVs. K&N has actually been offering automotive performance and racing oil filters for more than 15 years and we're excited to present our new powersports oil filter.

MOTORCYCLE AND ATV OIL FILTER FEATURES:

- Includes a new high-quality rubber anti drain back valve
- An improved pressure relief valve
- A strong inner core
- A heavy-duty base plate with an improved rolled seal

Automotive and Marine Oil Filters

K&N Performance Gold® Oil Filters for automotive and marine applications has been constructed from the ground up to satisfy the high performance needs of race car owners and drivers, as well as the average vehicle or boat owner who wants the very best oil filter available. Our oil filter's efficiency rating meets or exceeds the requirements of high performance automotive engine builders. The heavy duty construction provides over 550 PSI hydrostatic burst*, and helps reduce the risk of rock and stone damage.

The real quality isn't just on the outside... the inner filter element traps contaminant as small as 10 to 20 microns in size. We use metal top end caps instead of paper to ensure that no unfiltered oil can get back into the system. The solid construction allows for oil flow rates between 12-16 gpm (depending on filter size), and is unaffected by racing fuels. All K&N Performance Gold® Oil Filters are manufactured to exacting engineering standards. They are covered by a limited warranty to be free from defects in materials and workmanship when installed and replaced using engine and equipment manufacturers recommended service interval.

- Drilled safety wire holes for racing
- Sturdy 1" wrench nut makes removal quick and easy
- Metal leaf spring provides a positive seal between element and lid
- Heavy-duty construction provides up to 550 PSI hydrostatic burst strength*
- Resin-impregnated filter media provides maximum filtering surface for contaminant removal
- Inner core provides extra structural support to prevent filter collapse
- Anti-drainback valve (where applicable) eliminates dry starts, prevents oil from draining back into crankcase during engine shutdown
- Internally lubricated gasket provides positive seal while allowing easy on and off of filter
- Rolled threads provide extra protection against stripping

FOR FURTHER INFORMATION & PART No's see pages 31 - 39 (vehicle applications) or please ring ROCKET

HP6 Style Racing Filter

This filter is a replacement for the popular Fram HP6 oil filter as used in many racing applications. It features a large body and 1-1/2" thread for high flow and fits the System One remote filter mount part number: SY221-900010-12 or Moroso part number MO23766.

HP6 Style Racing Oil Filter
KNHP-5001

Chev Extra Long Oil Filter

This extra long oil filter suits Chev Small Block and Big Block V8 engines and remote oil filter mounts with 13/16" thread.

It is 8.28" (210mm) long and has a 2 quart (1.89L capacity).

Extra Long Chev Oil Filter
KNHP-6002

K&N Pro Series Premium Oil Filters

K&N Pro Series Oil Filters have been specially designed for professional installers and service providers. Their high flow design can help to improve engine performance by reducing oil filter restriction. Our Pro Series Oil Filters have a fluted canister shape so they can be removed with a traditional oil filter wrench commonly available to commercial installers. These Pro Series oil filters provide outstanding filtration and engine protection throughout their service life. They are engineered to handle all grades of synthetic, conventional and blended motor oils. The pleated media provides high capacity making them suitable for extended oil change intervals when used in accordance with the vehicle and motor oil manufacturers recommendation. K&N Pro Series Oil Filters are available for canister and cartridge type oil filter applications.

- High-Flow / Low Restriction Design
- Rolled Threads
- Fluted shape for traditional oil filter wrenches
- Anti-drainback valves (where applicable) PSI relief valves (where applicable)

UNIVERSAL OIL FILTER CUTTER

Want to see the contaminants that your oil filter has prevented from destroying your engine? That's now easier than before with the AeroFlow oil filter cutters to cut your filter so you can scrutinize the particles confined inside.

Much like a hand held tubing cutter, they use a cutting wheel and a pair of opposing ball bearings to easily rotate the filters as they cut. Made from aluminum to guarantee ease of use and durability. Will suit 50mm to 140mm outside diameter oil filters.

AF98-2047 Universal Oil Filter Cutter
AF59-2047 Replacement cutting blades (2 pack)

REFER TO AIR FILTER SECTION FOR OIL & AIR FILTER GUIDE.

ENGINE OIL FILTERS

Aeroflow oil filters have been designed to incorporate all the latest technology to provide great filtration with minimal restriction so that your engine performs at its best with great protection. Aeroflow filters use an improved coil spring design to replace the commonly used "leaf" style spring and incorporate CNC machined thread for a precise fit. An Ultra high-Temp silicone anti-drain back valve in some models helps to prevent dry starts increasing engine life. An extra-thick backing plate and housing offers superior strength and pressure fatigue resistance which provides added protection against pressure surges in racing applications, construction also includes a hi-flow heavy duty base plate that features a fully tucked double seam. Aeroflow oil filters use a Buna-N rubber gasket which is compatible with most racing fuels and lubricants. 24mm - 15/16" hex release nut allows simple and easy removal and incorporates a hole for use with lock wire. Aeroflow oil filters use a premium plated synthetic blend media provides increased filtration at high flow rates with minimal pressure drop as well as a louvred centre tube that allows more flow area & eliminates media wear during pleat movement.

OIL FILTER ADAPTERS

CHEVROLET OIL FILTER ADAPTER

Fits Chev Small Block and Big Block (Mark IV) engines. Designed to plumb Moroso Accumulators and External or Dry Sump Oil Pumps without the need for a remote oil filter and associated plumbing hardware. Standard spin-on filter attaches to the bottom. • Lowers oil filter by 1-1/2" • Equipped with 1/2" NPT inlet and outlet ports
• Includes full instructions, mounting bolts and o-rings
Part No: **MO23690**

Oil Filter Bypass Adapter.

Spins on to oil filter mount to relocate oil filter. 1/2" NPT inlet & outlet.

SB/BB Chev '68-on Ford/Chrys with 3/4"-16 thread

CVROFB67
CVROFB69

Universal Billet Aluminum Remote Oil Filter Mount.

2 x 1/2" NPT horizontal inlets & 1/2" NPT vertical outlet. Accepts GM style spin on oil filter
CVROFM61

CHEVROLET OIL FILTER BLOCK-OFF PLATE

The Chevrolet aluminium oil filter block-off plate is designed for Dry Sump or external wet sump oiling Systems and fits Small Block and Big Block (exc. Gen V and Gen VI) Chev applications without bolt hole at center of pad. It is drilled and tapped to accept an 1/2" NPT fitting to provide increased clearance for installing the input pressure line.

Part No: **MO23840**

FORD COYOTE 5.0L OIL FILTER ADAPTER

Filter Adapter

- Replaces factory spin-on oil filter mount on engine
- Ideal when chassis restrictions don't allow the use of a block mounted filter or when a larger external filter is desired
- Billet aluminium construction with an anodized finish
- -10AN "IN" and "OUT" ports
- Includes mounting hardware and engine block sealing O-rings

Description
Ford Coyote 5.0L Oil Filter Adapter

Part No.
MO23687

BILLET OIL FILTER BYPASS PLATE

Fits: World Products Merlin Big Block or standard Small Block and Big Block (Mark IV) Chevy applications without bolt hole at center of filter pad

- Machined billet anodized aluminium Bypass Plate is needed when using a remote oil filter or returning oil from dry sump oiling system
- Sealing washers are captured in the plate for tight seal against block surface, are installed under bolt heads for leak-free performance
- Drilled and tapped to accept -10AN fittings
- Includes all mounting hardware and o-rings

MO23782 Billet Bypass Plate

REMOTE OIL FILTER MOUNT

- Revised Design
- Now accepts both Chevy style spin-on filters (13/16" -3-1/4" O-ring) and others with 3/4" -16 thread and 2-5/8" O-ring, such as early Ford and imports
- Includes two screw-in center nipples for either type of filter
- Manufactured from billet aluminium for strength, doesn't crack and isn't porous like cast aluminium pieces
- Black anodized finish to protect against corrosion
- Designed with two -12AN inlets and three outlets, one -12AN and two 1/4" NPT
- Includes One -12AN Port Plug and Two 1/4" NPT Plugs
- Easy plumbing of oil pressure lines to turbos, superchargers, and valve spring oilers

MO23764 Remote Oil Filter Mount, Front Port Style

FORD MODULAR V8 OIL FILTER ADAPTER

Replaces larger factory casting and provides for easy plumbing of remote oil filters and coolers, enabling the plumbing of external, wet or dry sump oil pumps when lower port is plugged. • -16AN fitting supplied for water outlet to radiator
• Includes 2 -10AN to -12AN Fittings for oil line plumbing and 1-10AN Plug
Oil Filter Adapter, 4.6L & 5.4L Ford Modular V8
MO23681

SPORT COMPACT OIL FILTER ADAPTER

Moroso's billet aluminium Sport Compact Oil filter adapter fits Honda, Mazda & Nissan engines that have a block thread of M20 x 1.5 and a sealing pad of 2.243" I.D. and 2.637" O.D. This adaptor is designed to plumb remote filters, coolers and oiling accessories and is equipped with -10AN inlet and outlet fittings.

Description
Sport Compact Oil Filter Adapter

Part No.
MO23825

LARGE DIAMETER REMOTE OIL FILTER MOUNT

Moroso's large diameter remote oil filter mount is machined from 6061-T6 billet aluminium and features -12AN inlet and outlet threaded ports positioned vertically to improve flow, a 1/8" NPT gauge port and two screw-in adapters to accept a wide range of large-diameter filters including HP6, SY210-006, KNHP-4002 & KNHP-5001.

Description
Billet Large-Diameter Remote Oil Filter Mount.

Part No.
MO23766

OIL FILTER BYPASS ADAPTER

OEM style bypass adapter mounts the oil filter on Chevy S/B & B/B engines and allows oil to bypass the filter to ensure adequate oil delivery in all conditions. Recommended for all street and most race applications.

Description
Oil Filter Bypass Adapter, OEM Style
Part No.
PI839049

MELLINGS OIL FILTER ADAPTER

Remote Filter Mount With Primer Pump

Peterson's new primer filter mount allows you to use a standard drill to prime your engine easily. Utilizing our unique R4 rotor design, this small pump can give you 20psi of oil pressure in as little as 10 sec. to make sure all your bearing surfaces are properly oiled cutting down on engine wear. Features billet aluminium construction, AN port fittings and tube or firewall mount. For plumbing instructions click here.

SY229-90559-12

BOLT-ON BLOCK ADAPTERS

Billet block adapters to replace the bypass housing on Chevrolet engine blocks. The non-bypass block adaptor features a 1" thread to mount a System One oil filter and allows all of the oil to be filtered instead of bypassing the filter. Oil return adapters have a -10AN or -12AN fitting to allow dry sump systems to return oil in the conventional manner.

UNIVERSAL THERMOSTATIC SANDWICH ADAPTER

Our most versatile sandwich adapter kit offered and is designed to install on 90% of the passenger vehicles on the road today. This universal kit includes an 180°F thermostatic sandwich adapter with 3/8" NPT ports and fits oil filter landings from 2 3/4" up to 3 1/2" diameters, this adapter provides external oil lines to allow the addition of an engine oil cooler. It installs between the stock engine oil filter landing and the oil filter. Stock filter is retained.

- Adapter thread size: 3/4"-16, 13/16"-16, 18 x 1.5mm, 20 x 1.5mm, & 22 x 1.5mm
- Adapter O-ring size: 2-3/4" or 3-1/2"
- Adapter thickness: 1-3/4" or 2-1/8"
- Adapter inlet size: 3/8" NPT

Features

- Provides external oil lines for oil coolers without relocating the factory oil filter
 - Cast form high quality aluminium
 - Maintain factory equivalent oil filter
 - Type A Sandwich Adapter with 3/4"-16, 13/16"-16, 18 x 1.5mm, 20 x 1.5mm, & 22 x 1.5mm thread sizes, fits most applications *see application guide for specific applications
 - Includes sandwich adapter, filter adapter ring, sleeve nuts & O-rings
- DP25782**

REMOTE FILTER MOUNTS

- PREMIUM SERIES

This high quality die cast aluminium filter mount features a billet look without the expensive billet price tag.

The -10AN (7/8"-14)

O-ring inlet & outlet ports allow for simple relocating of an oil filter. With the 3 hole bracket included this unique mounting system allows mount to be rotated 180°, therefore switching the port locations.

- Removable 3 hole mounting bracket
- Powdercoated black finish
- Allows oil filter to be remote mounted anywhere
- New innovative 180° double mount design
- -10AN / 7/8"-14 O-ring ports *3/4"-16 filter thread size

FLUID CONTROL THERMOSTATS

This Billet Style Cast Aluminium Fluid Control Thermostat allows the oil to bypass the cooler until it reaches 180°F at which point the internal thermostatic valve will close and force 100% of the oil through the cooler while maintaining a constant pressure system. This process allows the engine/transmission to achieve the ideal operating temperature quicker before passing the oil through the cooler.

- Bypasses cooler at 180°F
- Provides quicker warm-up temperatures
- Perfect for cold weather climates
- Can be rotated 180° to switch flow direction
- Flows up to 20 gallons per minute
- Rated up to 200 psi
- Ultra bright finish
- New billet style design
- Thermostat only-no bracket

OIL THERMOSTAT

Perfect for use with Aeroflow oil coolers this thermostat helps maintain engine oil temperature by holding the oil until it reaches operating temperature (82°C) 180°F and then opens to allow full flow to the oil cooler. It adjusts flow according to oil temperature to maintain constant operating oil temperature.

Part No Description
AF64-4111 Oil thermostat block
AF59-4111 Replacement thermostat

Suits Aeroflow Oil Filters
 Small AF2296-2008 (No Bypass)
 Large AF2296-3001 (With Bypass)

BILLET REMOTE FILTER HEAD With Thermostat

Perfect for use with Aeroflow oil coolers this Remote filter head has a thermostat built in to help maintain engine oil temperature by holding the oil until it reaches operating temperature (82°C) 180°F and then opens to allow full flow to the oil cooler. It adjusts flow according to oil temperature to maintain constant operating oil temperature. Hard anodised black finish. -10 ORB inlet & outlet ports.

AF64-4112 3/4" - 16 filter thread with thermostat
AF59-2075 Replacement 3/4" - 16 thread insert

GM LS BILLET OIL BYPASS PLATE

Replaces factory bypass plate to allow for oil pressure gauge or oil pressure feed line. Features horizontal or vertical 1/8" NPT ports.

AF64-2189BLK

STANDARD GM LS CAST OIL BYPASS PLATE

Replacement OE cast aluminium bypass plate with gasket.
AF82-2302

BILLET LS OIL COOLER ADAPTERS

Now you can bolt on oil coolers and redirect your engine oil with these LS oil adapters. AF64-2114BLK is designed to directly bolt in place of the factory bypass cover on front sump LS Chevy engines (VT-VX-VY & VZ Commodore, 04-06 GT0) allowing you to run an oil cooler. This adapter features 2 x female -8ORB ports and 2 x 1/8" NPT ports for running temp or pressure gauges or an oil feed line for a turbocharger or supercharger.

AF64-2084BLK is designed for rear sump LS applications.
 Part No Description
AF64-2114BLK Suits front sump LS Commodore / GT0
AF59-2114 Replacement O-ring to suit AF64-2114BLK
AF64-2084BLK Suits LS Series
AF64-2184BLK 2 x -10 ports, 2 x 1/8" NPT ports.
 VT-VZ extension to clear block.

BILLET OIL BYPASS ELIMINATOR

AF64-2055BLK
 SBC & BBC spin-on filter mount (Black)
 This fitting is designed to eliminate the oil bypass found in Chevrolet engines. It also prevents unfiltered oil from spilling back into the engine. Comes with O-ring

90° Oil Filter Adapter
 Screws into block and rotates filter toward front of engine to provide clearance for engine swaps and chassis modifications. Fits most Ford engines that use Motorcraft FL-1A oil filter (filter not included).

90° Oil Filter Adapter FMM-6880-A50

FORD BILLET ALUMINIUM SANDWICH ADAPTER

Enables the installation of an oil cooler while retaining the stock oil filter location. 1/2" NPT inlet & outlet. Includes O-ring seal.
CVR0CS64

OIL FILTER THREAD INSERT
 SB Ford DART Oil Filter Thread Insert
PIPF-582-5

SPIN ON OIL FILTER ADAPTER

WITH BY-PASS

Aeroflow's small block Chevy canister to spin-on oil filter adapter will fit Chevy block's from 1968 to 1999 and will allow the bypass to open when there is 15psi pressure difference in the filter. Manufactured from 6061-T6 Aluminium for light weight and hard anodised black for case hardness.

SBC / BBC with 15psi by-pass AF64-2185BLK

BILLET REMOTE FILTER HEAD Top Entry

For use with filter relocation, suits universal applications. Double black anodised finish. Top entry -8 ORB inlet & outlet ports.

3/4" -16 filter thread AF64-2075

Replacement 3/4" -16 thread insert AF59-2075

DUAL BILLET REMOTE FILTER HEAD Side Entry

Machined from 6061-T6 billet aluminium and utilises side entry-8ORB inlet and outlet ports. Provides superior engine protection. Perfect combination when used with Aeroflows Billet Oil filters!

3/4" -16 filter thread (2 -8 port plugs included) AF64-2089

Replacement 3/4" -16 thread insert AF59-2075

Includes 2 x 1/8" NPT auxiliary port

BILLET REMOTE FILTER HEAD Side Entry

For use with filter relocation, suits left or right entry. Double black anodised finish. Side entry -8 ORB inlet & outlet ports.

3/4" -16 filter thread (2 -8 port plugs included) AF64-2061

Includes 1/8" NPT auxiliary port

Replacement 3/4" -16 thread insert AF59-2075

BILLET 6061-T6 OIL COOLER & SENDER ADAPTER

Aeroflow's billet 6061-T6 oil cooler and sender adapter allows the adaptation of an oil cooler and/or a gauge sender and/or oil feed to most engines while maintaining the stock oil filter location. With 2 x -8 ORB ports not only allows the addition of an oil cooler but the 2 x 1/8 NPT ports lets you run both a pressure, temp gauge or oil feed line, 1/8 NPT plugs included. Fits most makes and model - Holden, Ford, Nissan, Toyota, Subaru, Honda & BMW.

OIL COOLER LINE KIT

Aeroflows Universal Oil Cooler adapter and line kit has been designed for the ultimate in high performance and reliability. This Oil Cooler line kit offers our black light weight 450 series hose and our 550 one piece fittings. The universal sandwich plate not only allows the user to install an oil cooler but also offers 2 x 1/8 NPT ports for auxiliary inputs. This kit is a simple fix to all install problems. Fits most makes and model - Holden, Ford, Nissan, Toyota, Subaru, Honda & BMW.

Part No	Description
AF30-4000	Kit Includes: 3 metre 450 series hose, 2 x 90 deg -10 fittings, 2 x straight -10 fittings, 4 x ORB fittings, 1 x Billet Adapter, 1 x O-Ring (65-71mm), 2 x 1/8" Port Plugs, 5 x Thread inserts: M18 x1.5, M20 x1.5, M22 x1.5, 3/4" x16, 13/16 x16

OIL FILTER RELOCATION KIT

Fast and easy no mess oil changes are now possible thanks to Aeroflow's Universal Oil Filter Relocation System! The system contains an adapter to convert the stock filter landing to an oil passage, a remote single filter mount and 2.5 metres of -10 braided hose for custom fit oil lines. Anodised aluminium ORB fittings eliminate messy sealants, thread tape and the chance of cracking the housing due to over tightening.

Part No	Description
AF64-2042	Billet oil filter remote mount kit (-10 hose)
Universal Oil Filter Relocation Systems fit engines with the following spin-on oil filter thread sizes:	
3/4"-16, 13/16"-16, 1"-12, 18 x 1.5mm, 20 x 1.5mm and 22 x 1.5mm. They are designed for the use of oil filters with a thread size of 3/4"-16, such as AF64-2016S or AF64-2016BLK or equivalent.	
NOTE: OIL FILTER NOT INCLUDED.	

OIL COOLERS

COMPACT POWER STEERING / FUEL COOLER

This Aeroflow Performance compact fluid cooler is great for those wanting to keep your fuel or power steering fluids down in temperature under extreme conditions. These coolers feature 12.70mm (1/2") copper tubing expanded into aluminium cooling fins with extruded plastic cooling fin guards. This small 2 pass fluid cooler is great for those with minimal room and the two -6AN fittings on the end allow for universal plumbing applications. Finished in a black powder coat for long lasting durability.

AF72-6010	Length: 206mm (8-7/8") Width: 70mm (2-5/8") Thickness: 48mm (1-3/4")
------------------	--

MODULAR OIL COOLERS

Aeroflow offers a tremendous selection of the industry's highest quality coolers in a wide range of applications and profiles. These stack plate (modular style) coolers are fully brazed on all contact surfaces inside and out, further more they have a brazed seam that withstands vibrations and pulsations in the toughest environment. Any performance vehicle can benefit from an Aeroflow Cooler. Motor homes, tow vehicles, passenger cars and even motorcycles can realize extended engine and/or transmission efficiency and life. Technical Specifications: • Connections: -10 Female ORB thread, Adapters to suit any applications • For use in engines, transmissions, hydraulic systems, etc. • Max working pressure is 10 Bar (1 MPa or 145 PSI) • Burst pressure is 25 Bar (2.5 MPa or 362 PSI) • Must use mounting kit in all performance applications

Part No	Rows	Depth	Length	Height	Thread
AF72-4010	10	51mm	330mm	77mm	FEMALE -10 ORB
AF72-4016	16	51mm	330mm	123mm	FEMALE -10 ORB

AF72-4040	40	51mm	330mm	312mm	FEMALE -10 ORB

FRAME RAIL FLUID COOLER

This Aeroflow Performance slimline fluid cooler is great for those wanting to keep your auxiliary fluids down in temperature under extreme conditions. This slim frame rail design is great to mount onto the frame rail next to the transmission saving on space and cost of lines and fittings. These coolers feature 1/2" (12.70mm) copper tubing expanded into aluminium cooling fins with extruded plastic cooling fin guards. This small 2 pass fluid cooler is great for those with minimal room and the two -6AN fittings on the end allow for universal plumbing applications. Finished in a black powder coat for long lasting durability.

AF72-6015	Length: 350mm (13-5/8") Width: 63.5mm (2-5/8") Thickness: 45mm (1-3/4")
------------------	---

FRAME RAIL COOLERS

With the same 1/2" copper tubing expanded into aluminium cooling fins and embossed turbulators as our larger transmission coolers, this cooler uses a slim design to enable frame mounting in limited space applications. It includes -6AN inlets and can be used as a transmission cooler, power steering or fuel cooler with equal efficiency. Includes mounting hardware only.

- Embossed turbulators inserted in each tube agitate fluid for maximum heat transfer
- Extruded plastic cooling fin guards
- 2 pass cooler design
- 1/2" copper tubing expanded into aluminium cooling fins
- -6AN inlets
- transmissions, power steering & fuel

Part No	Width	Height	Depth
DP13221	1 3/4"	2 1/2"	1 3/4"

LARGE POWER STEERING / FUEL COOLER

This Aeroflow Performance large fluid cooler is great for those wanting to keep your fuel or power steering fluids down in temperature under extreme conditions with high demanding applications. These coolers feature 12.70mm (1/2") copper tubing expanded into aluminium cooling fins with extruded plastic cooling fin guards. This 4 pass fluid cooler is great for those wanting optimal cooling capacity for their auxiliary fluids such as power steering. The two -6AN fittings on the end allow for universal plumbing applications. Finished in a black powder coat for long lasting durability.

AF72-6011	Length: 206mm (8-7/8") Width: 127mm (5") Thickness: 19mm (3/4")
------------------	---

11"x 6" OIL COOLER KIT

Aeroflow's transmission, power steering or engine oil cooler kit features two 3/8" (9.6mm) extended barb fittings. Included in this kit is the oil cooler measuring 11" (279.4mm) length, 6" (152.4mm) width and 1-1/2" (38.1mm) thick. 1.6 meters (5.24ft) of 500 series rubber hose, hose clamps to suit and all mounting hardware necessary to mount the oil cooler. Pressure tested to 175psi.

AF72-6050 Oil cooler KIT
AF72-6051 Oil cooler ONLY

MODULAR OIL COOLER MOUNTING KIT

Properly mount your Aeroflow Oil Cooler with this Universal Aeroflow oil cooler mounting bracket (Simply cut on the line of how many row cooler you have). It is made from quality materials for strength and durability. This bracket securely holds the oil cooler preventing vibration damage. The bracket is pre-drilled for ease of mounting to any surface and comes complete with all necessary hardware to mount the cooler.

Part No **Description**
AF72-4000 Oil cooler mounting kit suits all sizes.

Aluminium Mounting Brackets

DP50020 Bracket kit - 4 mounting brackets & fasteners

SERIES 7000 ALUMINIUM/COPPER UNIVERSAL ENGINE OIL COOLER KIT - SPIN ON ADAPTER

This kit not only includes an engine oil cooler but a remote oil filter mount. This Tube & Fin oil cooler kit reduces oil temperatures to help extend the life of lower end components and oil life. It can also help to reduce coolant temperatures. This universal kit comes with a complete installation kit to install easily on most vehicle engines. Filter mount uses Fram PH8A Oil Filter or equivalent.

- Cooler style: Tube & Fin
- Cooler construction: Copper tube and Aluminium fin
- Cooler inlet size: 1/2" barb
- Cooler inlet dim: 6-1/4"
- Cooler mounting: 13-3/4"
- Spin-On Adapter type: J
- Adapter thread size: 3/4"-16, 13/16"-16, 18 x 1.5mm, 20 x 1.5mm, & 22 x 1.5mm
- Adapter thickness: 1-3/4" or 2"
- Adapter inlet size: 1/2" NPT
- Remote filter landing: 2-1/2", 2-3/4" or 3-1/2"
- Remote filter thread size: 3/4"-16
- Remote filter inlet size: 1/2" NPT
- Hose size: 1/2"
- Hose length: 10'
- Can reduce oil temperature up to 50°F
- Helps reduce coolant temperature
- Extends engine life
- Includes ports-up filter mount (Fram PH8A equivalent filters)
- 6 pass Tube & Fin style cooler
- Type J Spin-On Adapter fits most applications *see application guide for specific applications
- Complete hardware kit included

Part No	Width	Height	Depth
DP15551	16-5/8"	7-5/8"	3/4"

SERIES 10000 STACK PLATE UNIVERSAL ENGINE OIL COOLER KIT - SANDWICH ADAPTER

Our top of the line 10 row cooler is perfect for enthusiast level street use, and this universal stacked plate engine oil cooler kit can not only reduce oil temperatures to help extend the life of lower end components and oil life, it also helps reduce coolant temperatures. This universal kit includes 180°F thermostatic sandwich adapter, hose and everything you need to install on most passenger vehicles.

- Cooler style: Stacked Plate
- Cooler construction: Aluminium
- Cooler inlet size: -8AN
- Cooler inlet dim: 11"
- Cooler mounting: 12-1/4"
- Sandwich Adapter type: A
- Adapter thread size: 3/4"-16, 13/16"-16, 18 x 1.5mm, 20 x 1.5mm, & 22 x 1.5mm
- Adapter o-ring size: 2-3/4" or 3-1/2"
- Adapter thickness: 1-3/4" or 2-1/8"
- Adapter inlet size: 3/8" NPT
- Hose size: 1/2"
- Hose length: 10'
- 20,000 BTU's Per Hour
- Can reduce engine oil temp up to 50°F
- Helps reduce coolant temperatures
- Extends engine life
- High efficiency Stacked Plate 10 row cooler
- Type A Sandwich Adapter fits most applications
- Complete hardware kit included
- 20,000 BTU's Per Hour
- Cooler is rated at 250psi working pressure and 300psi burst strength

Part No	Width	Height	Depth
DP15605	13"	4-9/16"	2"

DYNO-COOL

REMOTE COOLERS

The Dyno-Cool Universal Remote Cooler can be mounted anywhere space permits, using a highly efficient copper tube/aluminium fin cooled and a curved blade fan to provide airflow and extend transmission life. Perfect for medium duty use. Mounting kit not included.

- Efficient copper/aluminium tube & fin 6 pass cooler -6AN inlets
- 450 CFM reversible Dyno-Cool Straight Blade electric fan
- Cooler style: Tube & Fin • Inlet size: -6AN male
- Fan size: 8" • CFM: 450 • Amp draw: 5.3
- Offered in 4 sizes with 11/32" barb or -6AN inlet

Cooler	Cooler	No. Of	Width	Height

SERIES 10000 STACK PLATE UNIVERSAL ENGINE OIL COOLER KIT - SPIN ON ADAPTER

This kit not only includes an engine oil cooler but a remote oil filter mount. The oven-brazed, all-aluminium stacked plate oil cooler reduces oil temperatures to help extend the life of lower end components and oil life. It can also help to reduce coolant temperatures. This universal kit comes with a complete installation kit to install easily on most vehicle engines. Filter mount uses Fram PH8A Oil Filter or equivalent.

- Cooler style: Stacked Plate
- Cooler construction: Aluminium
- Cooler inlet size: -8AN
- Cooler inlet dim: 11"
- Cooler mounting: 12-1/4"
- Spin-On Adapter type: J
- Adapter thread size: 3/4"-16, 13/16"-16, 18 x 1.5mm, 20 x 1.5mm, & 22 x 1.5mm
- Adapter thickness: 1-3/4" or 2"
- Adapter inlet size: 1/2" NPT
- Remote filter landing: 2-1/2", 2-3/4" or 3-1/2"
- Remote filter thread size: 3/4"-16
- Remote filter inlet size: 1/2" NPT
- Hose size: 1/2"
- Hose length: 10'
- 20,000 BTU's Per Hour
- Can reduce oil temperature up to 50°F
- Helps reduce coolant temperature
- Extends engine life
- Includes ports-up filter mount (Fram PH8A equivalent filters)
- High pressure Stacked Plate cooler
- Type J Spin-On Adapter fits most applications *see application guide for specific applications
- Complete hardware kit included
- 20,000 BTU's Per Hour
- Cooler is rated at 250psi working pressure and 300psi burst strength

ATOMIC-COOLER WITH FAN & HARDWARE KIT SUIT ENGINE - 8AN

With its own air supply, this popular remote cooler can literally be mounted almost anywhere, making it a popular addition for performance cars, hot rods, muscle cars and trucks. A heavy duty plate and fin cooler coupled with a Tornado fan and aluminium brackets, this universal kit comes with a complete installation kit to install easily on most vehicle engines. Also included is an 180°F in-line thermostat for activating the electric fan. •Mounts anywhere space permits •Electric fan supplies optimum airflow •Dramatically extends engine and transmission life •High efficiency OEM style Plate & Fin cooler •Clear anodized aluminium shroud •500 CFM reversible Tornado electric fan •-8AN inlet size •Engine cooler kit includes fan mounted cooler, universal thermostatic sandwich adapter, 13/16"-16", 3/4"-16", 18mm, 20mm, & 22mm sleeve nuts, two -8AN fittings, four brass 1/2" hose barb fittings, 180°F in-line thermostat, 10 ft. OEM spec hose & hardware

COMPETITION
OIL COOLER

AeroFlow's engine and transmission oil coolers feature 1/2" NPT or -10 ORB female fittings for a perfect O-ring seal, thermostat wiring, plug kit and a high quality electric fan. It accepts engine oil, transmission and power steering applications and has been pressure tested to over 200psi (13.79 BAR). The thermal switch included activates the fan at 79.5°C (175°F). The cooler also features a fin and plate construction. 350CFM 7" fan draws 6 amps. The dimensions are 254mm (10") x 190.5mm (7.5").

- AF72-6002 **Comp oil cooler with fan & thermostat 1/2" NPT**

13.5" x 9"

COMPETITION OIL COOLER

AeroFlow's new engine and transmission oil coolers feature -10 ORB female fittings for a perfect O-ring seal, thermostat wiring, plug kit and a high quality electric fan. It accepts engine oil, transmission and power steering applications and has been pressure tested to over 200psi.

- AF72-6000 **Comp oil cooler with fan & thermostat 1/2" NPT**
- AF72-6001 **Comp oil cooler with fan & thermostat -10ORB**
- AF59-6000 **Replacement temperature switch**
- AF59-6001 **Replacement temperature switch wire loom**

COMPETITION OIL COOLER MOUNTS

In many performance applications such as off-road, drag racing and street, strong vibration forces can be transmitted through the chassis to our oil cooler unit. To protect the oil cooler from damage due to excessive vibration, we recommend the use of these rubber vibration mounts. Designed specifically to fit into our competition oil coolers ONLY.

ADJUSTABLE FAN CONTROLLERS

This newly redesigned adjustable electric fan thermostat kit is designed to activate up to 2 fans with a maximum draw of 25 amps. Two kits to choose from, water jacket 3/8" NPT thread-in probe or push-in radiator probe, kit includes relay wire harness and electrical connectors for an easy installation. A/C override circuit included.

- Adjustable fan controller turn-on range from 150°F - 240°F, and turn-off preset at 10°F lower than turn-on.
- Adjustable turn-on temperature from 150-240°F
- Turn-off temperature is preset at 10°F below turn-on temperature
- Thread in 3/8" NPT probe or Push-in radiator probe
- Heavy duty 40/60 amp relay *rated at maximum 25 amp continuous draw
- A/C override circuit included
- Ground circuit relay
- Note - Operates up to a 25 amp fan or two fans with a combined draw of 25 amps or less

HEAVY DUTY RACING OIL PUMPS

Moroso "Race" Oil Pumps are designed to accommodate the consistent oil pressure and volume requirements for today's racing engine. Moroso engineers anti-cavitation grooves into the pump housing to prevent pump and an enlarged bypass area ensures a smooth flow rate throughout any RPM range.

- Application**
Chev Small Block, Standard Volume
Chev Small Block, High Volume
Chev Big Block, High Volume

- Part No.**
MO22101
MO22111
MO22160

BLUEPRINTED RACING OIL PUMP

Moroso's CNC machined blueprinted oil pump ensures the tightest tolerances and most consistent performance of any cast oil pump in its class. Anti-cavitation slots and enlarged feeder grooves are ball milled smooth, providing steady oil flow to each side of the gears for high RPM lubrication, cavitation relief and reduced spark scatter. Drive and idler shafts are extended to locate in the bottom cover, preventing dynamic shaft deflection and a socket head screw makes it easy to change pressure. Includes additional spring to suit oil pressure requirements and intermediate shaft.

BB CHEV OIL PUMP & PICK UP

- Package includes the Moroso pickup welded to the oil pump for a simple bolt-on installation
- Pickup orientation ensures proper clearance from pickup to bottom of any Moroso oil pan

- MO22162

BB Chev Standard Oil Pump & Pick Up

OIL PUMP / PICKUP COMBINATIONS

Moroso's oil pump/pickup combinations include a fabricated Moroso pick-up welded to the oil pump for leak free operation and a simple bolt-on installation. The pick-up orientation ensures 1/4" clearance from pick-up to the bottom of any 8-1/4" deep oil pan and the oil pump is a standard unit that is not modified internally.

- Application**
Chev Small Block, Standard Volume
Chev Small Block, High Volume
Chev Small Block, High Volume, 3/4" Inlet

BILLET ALUMINIUM SPUR GEAR PUMP

Moroso's billet aluminium spur gear oil pump features a 6061-T6 billet housing with 3 times larger mounting boss area to prevent breaking. The inlet area is increased to prevent cavitation and a thrust bearing assembly increases housing and gear life due to drive shaft axial forces on the drive gear. The small block pump will clear 4-1/4" stroke with most steel rods and is made to work with 8-1/4" deep oil pans. The big block pump will clear 4-3/4" stroke with most steel rods and is made to work with 8" deep oil pans

- Application**
Chev Small Block, High Volume Billet Oil Pump
Chev Big Block, High Volume Billet Oil Pump

- Part No.**
MO22171
MO22163

BILLET ALUMINIUM GEROTOR PUMP

Moroso's billet aluminium gerotor oil pump features a 6061-T6 billet housing with a hard coated finish and 5.7 times larger mounting boss area to prevent breaking. The 1.100" Gerotor puts out 25% more volume to maintain ideal pressure round after round and external adjustment allows fine tuning of bypass pressure. The inlet area is increased to prevent cavitation and a thrust bearing assembly increases housing and gear life due to drive shaft axial forces on the drive gear. This pump will clear 5.25" stroke with most aluminium rods and is made to work with 8" deep fabricated aluminium oil pans.

- Chev Big Block, High Volume Billet Oil Pump** MO22167

OIL PUMP DRIVE SHAFTS

Moroso oil pump drive shafts are made from high quality steel for extended reliability. The steel sleeve is pinned to maintain correct alignment between the oil pump and shaft.

GM LS OIL PUMP FLANGE REINFORCEMENT

- Based on customer inquiries, this product is for the individual who would like their O.E.M. or aftermarket oil pump pick up to be secured in two locations
- Flange reinforcement is installed by screwing in the supplied hardware into the unused screw hole in the Moroso, GM or Melling LS oil pump
- Can be installed without removing an already installed oil pump pickup

ELECTRIC OIL TRANSFER/SCAVENGE PUMP

AeroFlow Performance 12-volt electric oil pump is designed to handle the toughest automotive racing environments for gear oil fluid cooling and circulation or scavenge systems on your turbo drain back systems. The internals feature a hardened bronze spur gear & rotors so there are no diaphragms to fail during operation. NOTE: This gear pump will have a higher noise level due to the internal design. The pump's small size and reduced weight make it ideal for any space or weight-limited application. The pump's integrated heat-sink mounting design permits infinite head assembly rotation, allowing optimal orientation of the in and out ports. The case features vibration-resistant rubber mounting bracket and feet. Voltage: 12V DC Flow capacity: 14 Litres per minute (3.7 Gallons per minute) Can be mounted in any position Includes 2 x 12mm (1/2") brass hose tails Current Draw: 6 Amp (max. 10 Amp) Dimensions: Length 155.5mm x Width 119mm x Height 103mm AF49-1200

Adjustable Pressure Oil Pumps

The System One adjustable pressure oil pumps are the industry's finest cast pump! Available for Chev small and big block engines, they feature adjustable oil pressure from 75 to 125 psi (factory set at 65psi) and bypass oil anti-aeration diffusion screen technology. Uses stock Big Block Pickup.

Melling Select Performance Oil Pumps

Melling select oil pumps are extra insurance for high performance and race engines with CNC machined, heavy duty castings and high performance features such as billet steel gears, chromemoly shafts and adjustable pressure relief.

CHEV & HOLDEN LS1, LS6 & LS2

These pumps are a high pressure performance upgrade for MEM-295 with a 10% increase in pressure over the stock oil pump. The cast aluminum housing is CNC machined and hardcoat anodized and the cast iron cover is CNC machined and phosphate coated. The relief valve features a screw in valve plug with the optional lower stock pressure spring supplied. The high volume pump features an 18% increase in volume over stock oil pumps. Uses stock 1-1/4" bolt on screen.

BILLET BIG BLOCK CHEV OIL PUMP - HIGH VOLUME

- Aluminium billet high volume oil pump for street & strip applications with 8" deep pans.
- 25% increase in volume over stock oil pump.
- Pump features a lightweight billet 6061-T6 aluminium housing & cover with a protective anodized hardcoat. The high-volume gears are also coated.
- The chrome-moly drive shaft has been extended. Pump shafts have been extended into the cover for support.
- The pickup screen has been integrated into the pump body and features a stainless-steel wire mesh.
- This pump has multiple pressure settings and is CNC manufactured to exacting tolerances and surface finishes.
- The supercharged inlet allows for improved performance at high RPM's.
- Includes 12770 chrome moly intermediate shaft and stud kit and +10# and -10# relief springs.
- BB Chev High Volume Street & Strip Oil Pump 8" Deep Pans
- ME10070-800SS

BILLET BIG BLOCK CHEV OIL PUMP - STANDARD VOLUME

- Aluminium billet STANDARD volume oil pump for street & strip applications with 8" deep pans.
- Pump features a lightweight billet 6061-T6 aluminium housing & cover with a protective anodized hardcoat.
- The chrome-moly drive shaft has been extended. Pump shafts have been extended into the cover for support.
- The pickup screen has been integrated into the pump body and features a stainless-steel wire mesh.
- This pump has multiple pressure settings and is CNC manufactured to exacting tolerances and surface finishes.
- The supercharged inlet allows for improved performance at high RPM's.
- Includes 12770 chrome moly intermediate shaft and stud kit and +10# and -10# relief springs.
- BB Chev Standard Volume Street & Strip Oil Pump 8" Deep Pans
- ME10070-800SS

GM LSX LOW VOLUME STANDARD PRESSURE OIL PUMP

- Melling engineered this oil pump specifically for the performance aftermarket LS engine blocks with "priority main oiling". This pump is not meant to support engines with variable valve timing and displacement on demand. The flow rate of the 10294 has been reduced to match the lubrication needs of aftermarket blocks with priority main oiling systems. This eliminates the need to modify a stock pump to reduce its output. Its reduced displacement requires less power to operate. All the features that make our performance wet sump oil pumps best in class have been utilized in the new 10294 low volume pump. In comparison the 10294 is a low volume version of the Melling 10295 performance oil pump.
- Reduced flow output (-15%) as compared to stock oil pump
- Hard coat anodized aluminium housing
- Phosphate coated cast iron cover
- Standard pressure spring installed
- Includes optional +10 psi and +25 psi high pressure springs
- Threaded pressure relief nut
- Uses 7/8" stock bolt-on oil pickup tube assembly
- Includes O-rings for oil pickup tube assembly.
- GM LSX, Low Volume, Standard Pressure Oil Pump
- ME10294

GM GEN III STANDARD VOLUME HIGH PRESSURE OIL PUMP

- Melling improved the standard volume GM LS Gen III oil pump. Design changes to the housing, cover, and components together combine to improve the performance, durability, and capability of the oil pump. Melling has engineered this oil pump specifically for performance LS applications. It can be used in any GM Gen III application that uses Melling's stock replacement M295 oil pump.
- Exclusive rotor design with improved strength
- Hard coat anodized aluminium housing
- Phosphate coated cast iron cover
- High pressure (+10 psi) spring installed
- Includes optional standard pressure spring
- Includes optional +25 psi spring for COPD applications
- Threaded pressure relief nut
- Uses 7/8" stock bolt-on oil pickup tube assembly
- Includes O-rings for oil pickup tube assembly
- GM Gen III Standard Volume, High Pressure Oil Pump
- ME10295

GM GEN III HIGH VOLUME, HIGH PRESSURE OIL PUMP

- This pump delivers 18% more flow as compared to the standard volume 10295 oil pump. The design changes incorporated into 10295 have been carried over to this pump. The 10296 pump was engineered specifically for performance LS applications that demand increased oil flow. It can be used in any GM Gen III application with no modifications required to install the pump.
- Exclusive high volume (+18%) rotor design
- Hard coat anodized aluminium housing
- Phosphate coated cast iron cover
- High pressure (+10 psi) spring installed
- Includes optional standard pressure spring
- Threaded pressure relief nut
- Uses 7/8" stock bolt-on oil pickup tube assembly
- Includes O-rings for oil pickup tube assembly
- GM Gen III High Volume, High Pressure Oil Pump
- ME10296

**HEMI 5.7 & 6.4 STANDARD VOLUME,
HIGH PRESSURE OIL PUMP**

Melling improved the standard volume third generation Chrysler Hemi oil pump for use in 2009 engines and newer with VCT and MDS. Melling has engineered this oil pump specifically for performance 5.7L & 6.4L Hemi applications. It can be used in any Chrysler application that uses Melling's stock replacement M452 or M462 oil pumps.

- Hard coat anodized aluminium housing
 - Phosphate coated cast iron cover
 - High pressure (+10 psi) spring installed
 - Includes optional standard and +20 psi high pressure springs
 - Threaded pressure relief nut
 - Uses 1.00" diameter stock bolt-on oil pickup tube
 - Includes O-ring for oil pickup tube assembly
- ME10296**

**MELLING SHARK TOOTH HELICAL ASYMMETRICAL
GEAR OIL PUMP**

Melling has improved the heart-beat of the traditional internal gear pump. It is now significantly smoother through the use of new helical asymmetrical gears. The new gear design provides the engine with an improved flow of oil without the usual pulsing found in traditional gear pumps. The reduction in the pressure ripple from the pump will also provide benefits to the distributor and camshaft drive. All pumps includes -12550 chrome-moly intermediate shaft w/steel guide.

- SMOOTHER**
- Significant reduction in pressure ripple (pulsing)
 - Reduction in torque ripple in pump drive
 - Improved distributor operation - reduction in spark scatter
 - Improved distributor gear wear & intermediate shaft wear
- TIGHTER**
- Improved sealing of gear tips to housing
 - Reduced internal leakage
 - Improved efficiency and performance
- QUICKER**
- Increased inlet vacuum
 - Primes faster

**SB CHEV 262-400 (1975-80) &
PONTIAC 305 (1982-87)**

| Standard Volume, Uses 3/4" Press Fit Screen | ME10554ST |

MELLING SHARK TOOTH BILLET OIL PUMPS

Melling Shark Tooth Billet oil pumps utilize an exclusive helical asymmetrical steel gear design which improves the operation of the distributor resulting in less spark scatter and wear on the drive gear. These pumps consume less power as compared to competitor pumps. The length of the pump's drive shaft has been increased to allow for additional support in the cover eliminating shaft deflection to allow the gears to run true at high RPM levels.

- 70% less pressure pulsing and resultant cyclic loads
- Reduced time to prime and oil delivery to engine components
- Improved tip sealing and overall operating efficiency
- Weighs 1.75 lbs less than the traditional SB cast iron pump
- Chrome moly shafts with additional shaft support
- Fits into the same space as the stock oil pump and pickup
- Integral Pickup Improves overall performance & eliminates potential failures

**BB CHEVY BILLET
ALUMINUM PROLUBE
OIL PUMP**

Designed specifically for Chevy engines. Precision machined from T6-6061 Billet Aluminium the Prolube pump is engineered to withstand the punishment of the harshest racing environment.

- Aircraft quality chrome moly gear shaft eliminates fatigue due to vibrations
- Chrome moly sleeve and wear plate eliminate any possible wear to T6-6061 billet aluminium housing from the gear or the shaft
- Precision machined steel billet gears ensure perfect mesh and can withstand higher RPMs
- Lower gear supports eliminates any possible deflection
- Fully adjustable oil pressure bypass is designed to return the oil to the pickup area, which reduces both aeration and oil temperature
- Enlarged inlet and oil passages increase oil flow and efficiency
- Modular T6-6061 billet valve body and pickup (patent pending)
- Patent pending modular bottom feed pickup design can be interchanged to fit a variety of oil pan depths
- Removable pickup screen for ease of service
- Clears a 4-3/4 stroke with most aluminium rods without modifications
- Includes oil pump drive shaft
- NOTE: Pickup Sold Separately

CVR0P545

CVR OIL PUMP DRIVE SHAFT

Machined from heat-treated chromemoly steel. Featuring a larger diameter than OEM units for added torque capacity.

Description	Part No.
Small Block Chev	CVRDS41
Big Block Chev	CVRDS42

**ARP Oil Pump
Shaftdrive Kits**

Lose oil pressure and the engine is trash! Now you don't have to depend on a stock oil pump drive shaft in your expensive high performance or wet sump racing engine. ARP oil pump drive shafts are made from heat treated, premium, aerospace chrome moly. Plus, we've increased the body diameter to make it tougher - more able to handle the added torque requirements of increased capacity oil pumps or heavy viscosity racing lubricants. Rated at 170,000psi the added tensile strength delivers longer service life of this critical component.

CHRYSLER OIL PRESSURE REGULATOR

Permits oil pressure adjustment externally even when the engine is running. Very valuable asset for dialling-in desired oil pressure, for compensating for low oil pressure on street application or excessively high oil pressure on the track (more than 75 PSI hot is usually unnecessary and uses ex-tra horsepower to drive). Suits Milodon Pumps #21225 #21460 #21461 #21462 #21463 #21464 #21465

Chrysler Wedge and 426 Hemi Oil Press Reg M121550

EXTERNAL WET OIL PUMPS

**EXTERNAL SINGLE STAGE OIL
PUMP/VACUUM PUMP KIT**

- This kit includes a Moroso Tri-lobe Single Stage Oil Pump with a Moroso Enhanced Design 4-Vane Vacuum Pump driven off the back
 - By driving the V-band clamp attached vacuum pump off the back of the oil pump this creates a compact weight saving design with one belt only being utilized
 - Single stage external Tri-lobe oil pump is included that has a spur gear 1.200 pressure section, eliminates the camshaft loads that occur with an internal pump. Has replaceable fittings, -16AN inlet, -12AN outlet
 - Enhanced Design 4-Vane Vacuum Pump is included that pulls more vacuum and is designed with maintenance-free precision
 - Sealed roller bearings. Has replaceable -12AN Inlet and Outlet fittings
 - V-band clamp is included

OIL PUMP DRIVE KIT - HONDA

This kit fits Honda 1.6L, 1.8L & 2.0L B-series engines and drives the oil pump at 53% of crankshaft speed. The kit includes all necessary hardware: Stepped steel washer, drive pulley, drive mandrel, radiused tooth gears, and correct length drive belt, Crank bolt, and alternator drive.

Drag Race Oil Pump Drive Kit, Honda B-Series M025710

EXTERNAL OIL PUMP PICKUP KIT

Complete kit including everything needed to convert a steel wet sum oil pan for use with an external pump. Adapts to a variety of pans, welding required. Includes screened pickup box, pickup tube and specially machined -12AN fitting.

External Oil Pump Pickup Kit for Steel Oil Pans M024840

WET SUMP OIL PUMPS

Our Wet Sump Pumps are built around our Patent Pending 4 lobe rotor which provides excellent oil pressure and flow in excess of 30 GPM on the High Volume pump for the highest need motors.

R4 Single Stage Pump

Chevrolet

- Application**
- Left Side Mount, Standard Pressure
- Left Side Mount, HV Pressure

MOROSO

MOROSO TRI-LOBE LINE OF DRY SUMP PUMPS, DOOR CARS

The best performing dry sump pump line that Moroso has ever produced! Moroso's new aluminium dry sump pumps have been developed with our decades of oiling system expertise to give you a lighter, better performing oil pump that will save weight and make more crankcase vacuum!

The new oil pumps feature:

- Tri-lobe aluminium scavenge sections featuring individual timing gears to ensure proper clearance at the highest RPM's
- Spur gear pressure section based off Moroso's highly successful billet wet sump pump design
- Variable spring rates optimize your oil pressure for smooth, reliable oil pressure readings
- Multiple #16 scavenge outlet options for increased flow back to your dry sump tank and/or fitment requirement on your application
- Pump weighs almost half of gerotor pumps, and takes up to 40% less power to drive!
- Custom pressure section sizes for increased efficiency with different pump speeds
- Door car and dragster brackets available, includes all necessary fittings

INCREASED POWER!

- Steady oil pressure throughout RPM range • Increased vacuum
- Consistent oil pressure at high heat levels
- Consistent oil pressure at high vacuum levels
- Oil pressure adjustability, allows for finer tuning of pressure levels
- EASIER TO PLUMB AND FIT! • Includes all necessary fittings
- Internal Manifold w/ -16 AN return, no need for separate manifold
- Built-in bracket mounts pump higher and closer to the engine, for better engine compartment packaging in a Dragster
- Two pressure outlet locations for easier plumbing
- Vertical oil pressure adjuster makes it easier to change oil pressure settings
- Made in the USA

Part# Description

1.100 Pressure/1.100 Scavenge	
MO22241	Single Stage
MO22243	Three Stage
MO22244	Four Stage
IO22245	Five Stage

OIL PUMP AND VACUUM PUMP DRIVE KITS

- Flange Style • Bolts to balancer—balancer does not need to be drilled like older designs
 - Pulleys are hard coat anodized and mandrel is black oxide for exceptional strength and extended service life
 - Kits include: one-piece, forged steel drive mandrel, 4" V-belt pulley for alternator, 2-1/2" V-belt pulley for vacuum pump, 1" (16 tooth) Gilmer pulley for external oil pump, guide plates, assorted spacers, belt guides and hardware
- MO63853** - SBF, Style: Short, Mandrel Length Minus Flange: 3.500"
Required Balancer: 4-Bolt, 3.30" bolt circle, 2.382" male register, Length: 4.125"
MO63857 - SBC, Style: Short, Mandrel Length Minus Flange: 2.990"
Required Balancer: 3-Bolt, 3.20" bolt circle, 1.250" female register", Length: 3.380"
MO63858 - BBC, Style: Short, Mandrel Length Minus Flange: 2.990"
Required Balancer: 3-Bolt, 3.20" bolt circle, 1.250" female register, Length: 3.645"
MO63860 - GM LS Series, Style: Short, Mandrel Length Minus Flange: 2.990"
Required Balancer: Aftermarket, using GM LS bolt pattern, 3-Bolt, 3.20" bolt circle, 1.250" female register, Length: 3.645"

DRAG RACE OIL PUMP DRIVE KITS

With Electric or Crank-Drive Water Pump

- Fits most popular drive setups including 1/4" front engine plate mounting and crank trigger ignition unless otherwise stated
 - Drives Oil Pump at 57% of crankshaft speed
 - Kits include all necessary hardware: Grade 8 fasteners, hard coat anodized Gilmer pump and drive pulleys and correct Length drive belts
 - Works with all Moroso Dry Sump Pumps and External Oil Pumps
 - Also see Moroso Alternator Drive Kits on page 166-168
- MO23600** Oil Pump Drive Kit, SBC and 90° Chevy V6, Drag Race with crank-driven water pump. Use Moroso Water Pump Pulley No. 64900.
MO23610 Oil Pump Drive Kit, BBC, Drag Race with crank-driven water pump.
MO23660 Oil Pump Drive Kit, SBC and 90° Chevy V6, Drag Race with electric-drive water pump.
MO23672 Oil Pump Drive Kit, BBC, Drag Race with electric-drive water pump, works with both crank trigger ignition and 1/4" motor plate.

DRY SUMP PUMP PULLEY

Gilmer Style. Machined from billet aluminium for unmatched precision. Hard coat anodized for extended durability. 3/8" pitch pulleys fit 5/8" diameter shafts. Use with Moroso Gilmer Drive Pulleys to suit desired drive ratio. Compatible with 3/8" pitch gilmer tooth drive pulleys and belts manufactured by Moroso and others. Includes key and 4 set screws to lock pulley to the shaft in a positive manner.

28-Tooth Dry Sump Pump Pulley **MO23528**
32-Tooth Dry Sump Pump Pulley **MO23532**

CRANKSHAFT PULLEY

Gilmer Style 3/8" pitch pulley fits 1" diameter keyed drive mandrels. Machined from billet aluminium for unmatched precision and hard-coat anodized for extended durability.

- 16-Tooth Mandrel Drive Crankshaft Pulley **MO97170**
18-Tooth Mandrel Drive Crankshaft Pulley 1" Wide **MO97171**
18-Tooth Mandrel Drive Crankshaft Pulley 1/2" Wide **MO97172**

VACUUM PUMP, EXTERNAL OIL PUMP DRIVE KIT

Includes One-piece forged steel Drive Mandrel, Gilmer Crank Drive Pulley and V-belt Crank Pulley, which are machined from 6061-T6 aluminium. Pulleys are hard coat anodized and mandrel is black anodized for exceptional strength and extended service life. Spacers & hardware included.

Description

- Small Block Chev, 4.655" overall length **MO63859**
Big Block Chev, 4.655" overall length **MO63849**
Big Block Ford 429-460, 4.80" overall length **MO63847**

Part No.

DRY SUMP SCAVENGE MANIFOLDS

Fully fabricated 3 or 4 Stage scavenge manifolds with quick release fittings. Designed for Moroso Dry Sump Pumps. Includes -10AN inlet cups and -16AN outlet. Complete kits with machined aluminium pump fittings, O-rings and quick release pins for an easy installation. For use with dry sump tanks with a single -16AN inlet.

- 3 Stage Dry Sump Scavenge Manifold **MO22692**
4 Stage Dry Sump Scavenge Manifold **MO22693**

GILMER DRIVE BELT

- For Moroso Dry Sump Pump setups
 - Will also work with other manufacturers' 3/8" pitch Gilmer Drive setups
- Gilmer Belt, 60 - Tooth, 22-1/2" x 1" MO97110**

RADIUS TOOTH BELTS-8 MM PITCH

- Thin Series Belts for Moroso Vacuum Pump and Alternator Pulleys
 - Fits 1/2" wide or greater pulleys
 - Strong and lightweight with less belt stretch
 - Provides lower tension with positive engagement and no slippage
- 8mm Radius Tooth, 30.6" Long (776 mm) MO97152**
8mm Radius Tooth, 10.158" Long (258 mm) MO97151

DRY SUMP OIL TANKS

Moroso Dry Sump Tanks separate air quickly from oil, prevent foaming and insure a continuous supply of oil to the pump under all racing conditions! As oil enters the tank, it rotates around the tank wall and deaerates by spreading over a large surface area, allowing trapped air bubbles dissipate quickly. This then lets the restored oil flow easily to the bottom outlet of the tank where it can return to the pump and engine. Tanks are supplied with or without integral filtered breather tanks and all have carefully engineered inlet locations with -AN fittings, large diameter billet aluminium screw-on filler caps and drain plugs.

MO22683 Dry Sump Tank, 7" Diameter x 13" Tall, 5 Quart Capacity, 3 x -12AN inlets, -12AN outlet and -12AN Breather fitting. Use with MO85465 or MO85466 Breather Tanks.

MO22684 Dry Sump Tank, 7" Diameter x 13" Tall, 5 Quart Capacity, 3 x -12AN inlets, -12AN outlet and integral filtered breather tank.

MO22686 Dry Sump Tank, 7" Diameter x 15" Tall, 5 Quart Capacity, 1 x -16AN inlet, -12AN outlet and -12AN Breather fitting. Use with MO85465 or MO85466 Breather Tanks.

MO22687 Dry Sump Tank, 7" Diameter x 15" Tall, 6 Quart Capacity, 1 x -16AN inlet, -12AN outlet and integral filtered breather tank.

MO97571 - Replacement Lid with O-ring

DRY SUMP TANK MOUNTING KIT

- Lightweight Mounting Kit comes complete with all hardware to secure dry sump tank to Drag Race car
- Stainless steel clamps with T-bolt fastener and vibration-proof nylon insulated lock nut keep tank secure under severe conditions
- Removable rubber clamp inserts insulate the dry sump tank from vibration and damage

MO22676 Dry Sump Tank Mounting Kit, fits tanks with 6-1/2" to 7" diameters.

OIL PUMP BLOCK-OFF PLATE

Easy, bolt-on anodized aluminium plate seals oil passage on rear main cap when dry sump systems are used. Requires no drilling or tapping for installation. Fits Small Block, Big Block and 90° Chevy V6.

Oil Pump Block-Off Plate. Chevy V8 & 90° V6

MO23790

EXTENDED DRY SUMP TANK MOUNTS

Moroso offers aluminium Dry Sump Tank Mounts for all 7" diameter Moroso tanks. The kits include a .250" thick billet aluminium mounting flange to mount to any motor plate application. The rounded aluminium saddle ensures proper contact to the tank and along with the rubber strips, vibration is reduced to a minimum. The stainless steel clamps are sanctioning body legal, and will hold the tank securely to the mount. Mounts are 5.25" from mount to saddle base.

MO22677 Straight Extended Tank Mount.
MO22678 30 Degree Extended Tank Mount.
MO22679 U-Weld-It Extended Tank Mount

90 DEGREE SCAVENGE FILTER

Aeroflow now offers this great 90 degree dry sump pan filter that protects your valuable dry sump pump from debris in your engine oil. The filter allows for easy cleaning and inspection without removing the engine sump.

R4 DRY SUMP OIL PUMPS

Peterson Dry Sump Pumps are built around our Patent Pending 4 lobe rotor which provides excellent oil pressure and flow in excess of 30 GPM on the High Volume pump for the highest need motors. The 4 lobe rotor also provides excellent vacuum to free up horsepower in the engine. 1.200" Scavenge Rotors

1.200" Scavenge Rotors

Description	Part No.

VALVE COVER ONE WAY

VALVE POP OFF

Breather assembly is installed in valve cover on engine's running crankcase in vacuum condition, valve seals engine from air entering engine, but opens in the event of crankcase pressure allowing crankcase to vent
Valve Cover One Way Valve Pop Off
PFS08-0450

REMOTE RELIEF VALVE

Peterson's Remote Relief Valve enables the racer to adjust oil pressure on engines where the rules require that the oil pump be in its stock location in the pan. This can also be used in dry sump applications to make the pressure regulator more accessible.

Description
Remote relief valve -10AN
Remote relief valve -12AN w/ -10AN relief fitting
Remote Relief Valve Outer Spring
Remote Relief Valve Inner Spring

PFS13-2913

VACUUM REGULATOR

Peterson's new adjustable vacuum regulator is on the leading edge of engine management. It has been proven to regulate crankcase vacuum and hold a steady level through extensive testing. Vacuum can be regulated from as high as 29.7 in/hg down to 2 in/hg. This regulator is machined from Billet aluminum and features the same great quality as all of Peterson's products.

Description
Vacuum Regulator w/-12AN Bung
Replacement Air Filter For PFS08-0455

PFS08-0455
PFS08-0455-10

Inline Temperature Port Assembly

Peterson's inline temperature sender fitting assembly has a standard 5/8-18 threaded port for a mechanical temperature probe.

Description
-10AN x -10AN Hose
-10AN x -10AN Bulkhead
-12AN x -12AN Male

Part No.
PFS09-1940
PFS09-1941
PFS09-1960

OIL PRESSURE GAUGE FITTING

This oil pressure fitting gets the oil pressure gauge line connection up where it is more accessible. Fitting is 1/8 NPT on engine side -4 AN for Gauge connection.

PFS15-1041 Oil pressure gauge fitting straight

LIFTER VALLEY RISER TUBES

Peterson's lifter valley riser tubes are installed in the lifter drain back holes to prevent oil drain back through these holes while allowing the engine to breathe through the holes. 70 micron filter screens are installed in the tube opening. Filter drain holes need to be taped to 1/4 NPT

Description

SB Chev riser tube 9/16" Hex top 1/4 NPT thread **PFS15-1050**

ALUMINIUM MALE Y-MANIFOLDS

Peterson's return line manifolds consolidate scavenge return lines from the pump to a single return line to the oil tank & for use with dual fuel pumps to a single line fuel system.

Description
Y-Manifold -10 AN, -10 AN, -10 AN
Y-Manifold -10 AN, -10 AN, -12 AN
Y-Manifold -12 AN, -12 AN, -12 AN

Spline Drive for ATI/MSD combo

Our new spline drive is available for engines running the popular ATI dampener with MSD crank trigger combo. Made from billet aluminium and then anodized for durability, these drives feature the next evolution in drive design. Featuring a large nut to aid in turning the motor over, this design gets rid of the key and mandrel and features a modular spline design. Includes adapter and bolt for crank, spline drive hub and hardware, and end cap and bolt for drive. Pulleys and belt sold separately.

DRY SUMP OIL TANKS

Peterson "New Generation" Oil tanks are the leader tank technology. Manufactured using aircraft quality components, internal baffling provides excellent de-aeration of the scavenge oil while maintaining a tall column of oil over the pick-up. The tanks disassemble easily and the tank tops can rotate in relation to the bottoms for ease in fitting placement.

Description
1.5 Gal, Dual Scavenge Inlet, 15.5" x 6" Diameter
2.0 Gal, Dual Scavenge Inlet, 19.5" x 6" Diameter
2.5 Gal, Dual Scavenge Inlet, 24.0" x 6" Diameter

1 1/2 GALLON "FLOWERPOT" DRAG TANK

Peterson's low profile drag tank was created from nostalgia dragsters and altered. It offers the performance and oil capacity of our standard 1 1/2 gallon tanks but in a shorter and a slightly wider package for applications where height is a problem.

Description
1 1/2 Gallon, Single Scavenge, -12 AN
10 3/4" High X 9" Diameter.

Part No.
PFS08-0890

7" DRAG TANK

Our 7" drag tank has been proven in competition by Kurt and Warren Johnson to provide excellent oil control and absolutely no blowing oil. It features our race proven tank design with and integrated 1 quart catch can or 2 x -12 AN Male breather fittings for an external catch can. Also includes heater bung, lightweight billet connecting ring and our large billet aluminium cap. 16" overall height.

Description
7" Drag Tank, Single Return, 2 x -12AN Breathers
7" Drag Tank, Single Return, w/ Catch Can
7" Drag Tank, Dual Return, 2 x -12AN Breathers
7" Drag Tank, Dual Return, w/ Catch Can

PFS08-0100
PFS08-0102
PFS08-0101

Sprint Car Tank Bracket

Peterson's lightweight sprint car tank bracket bolts directly to the front of the small block Chevy engine and mounts any 6" diameter tank. This bracket is fabricated from aircraft quality aluminium and uses stainless steel straps for durability.

Description
Mount Bracket, 6" tank to SBC

Part No.
PFS08-0105

Direct Screw-In Breather

-12 AN male thread to screw directly into the breather bung on Peterson Dry Sump Tanks. Can also be used on engine valve covers as a fill plug/breather, when a -12 AN port is welded into an aluminium cover. 1 3/8" OD on tube. Includes bung and filter.

Description
Breather with filter and -12 AN Weld Bung

Part No.
PFS08-0415

PAVEMENT OVAL DRY SUMP OIL TANKS

This tank features a built in return oil filter with 60 or 75 Micron stainless pleated element. Built in dual breather system with elements on top of the tanks eliminates the need for a remote catch can. Great for marine applications and asphalt late models!

Description
3 Gal, 9" Diameter Tank w/ Filter

DIRT LATE MODEL OIL TANK

Our filter tank for Dirt Late Models features a high flow spin on filter inside the cap that makes checking your return filter simple. A built-in dipstick makes checking your oil level easy and radiused full flow fittings eliminates back pressure on the return lines.

Description
4 Gallon Dual Return Tank, 9" x 20"

PFS08-9016

UNIVERSAL CATCH CANS 480ml (16.2oz)

The Aeroflow performance billet universal air / oil separator has been designed to protect your modern diesel & petrol engines by reducing the amount of oil vapour entering the crankcase. Each can features stainless steel reusable and cleanable filter mesh, a built in billet dipstick, two -10ORB ports and one -4ORB which can be utilised for a drain. This dual version is essentially 2 single catch cans mounted to one common bracket. Available in polished or black.

Diameter 63.5mm (2-1/2"), Depth 82mm (3-7/32") Height 146mm (5-3/4")

AF64-4364	Polished
AF64-4364BLK	Black

UNIVERSAL CATCH CAN EXTENSION

The Aeroflow Performance universal catch can extension is an upgrade specifically designed for customers who have the short universal catch can (AF64-4363 or AF64-4364). This extension is an O-ringed anodized aluminium section that screws into the centre of your existing catch can. This will increase the volume of the catch can to 950ML on the single catch can AF64-4363. This upgrade also includes a longer O-ring sealed aluminium dipstick to make up for the increased depth with the extension.

AF64-4373 Silver
AF64-4373BLK Black

UNIVERSAL BREATHER TANK (550ml) with Breather

Breather comes with a single -12 ORB to suit all sizes lines. These professionally constructed tanks have a billet valve on the base to ensure easy drainage. With a 1/8" npt thread on the base they can also be plumbed back as an oil salvage system or remote drain. They come in either polished or black anodised finish and include billet stainless steel breather filter. Also feature two M8x1.25 mounting bungs. Diameter 79mm (3 1/8") Height 280mm (11")

UNIVERSAL BREATHER TANK (1.25L)

Our state of the art breather comes with 2x -12 ORB to suit all sizes lines. These professionally constructed tanks have a billet valve on the base to ensure easy drainage. With a 1/8npt thread on the base they can also be plumbed back as an oil salvage system or remote drain. They come in either polished or black anodised finish

AF59-1017

DRY SUMP BREATHER TANKS

• 3/8" NPT Inlet
• Use as a remote breather/oil separator on dry sump tanks, rear axle housings, etc.
• Designed to be panel-mounted and comes complete with Filtered Breather No. 68815 and drain cock
• Dimensions: 3-1/8" diameter, 6-1/2" tank height without filter
***MO85470**
Dry Sump Breather Tank, 3/8" NPT inlet.

BREATHER/CATCH CAN WITH BILLET MOUNTING BRACKET

• A perfect companion for engines equipped with dry sump pumps, vacuum pumps or non-dry sump or non-vacuum pump equipped engines that historically have "pushed oil" with other breather tanks
• Features internal baffling with mesh media for superior air-oil separation
• -12AN male side fitting and petcock facilitates tank draining
• Includes a panel mount, billet aluminium clamp that has two supplied 1/4" -20 mounting hardware
• Dimensions: 3-1/8" dia., 6-1/2" tank height (without filter), 11-1/2" overall height
MO85467

Vacuum/Dry Sump Pump 2.5 Quart

- Eliminates the need for two tanks with a larger capacity 2.5 quart tank complete with dual -12AN fittings allowing hookup from Vacuum Pump and Dry Sump Pump
- All-aluminium, lightweight 3" x 17-1/2" (installed) tank includes mounting clamp to simplify installation
- Includes non-hooded, clamp-on-style Filtered Breather that traps oil while allowing air to escape freely
- Hand-operated drain cock facilitates tank cleaning

MO85466 Breather Tank, Vacuum/Dry Sump Pump, 2.5 Quart.

Breather Tank -Racing Vacuum Pump

Remote breather and oil separator tank is a perfect companion for Moroso's Racing Vacuum Pumps Features -12 AN fittings All aluminium, lightweight tank features mounting straps to simplify installation Includes non-hooded, clamp-on-style Filtered Breather that traps oil while allowing air to escape freely

Hand-operated drain cock facilitates tank draining Dimensions: 3-1/8" dia., 6-1/2" tank height (without filter), 11-1/2" overall height Separates for easy cleaning

Breather Tank MO85500

AIR-OIL SEPARATOR SMALL BODY

- Moroso Air-Oil Separator is plumbed into a vehicle's PCV system and captures the excess crankcase vapors and the residual oil mist from re-entering the intake tract
- Ethanol enriched fuels put off more moisture during the combustion process - the Moroso Air-Oil Separator is an excellent tool for collecting this extra moisture
- Billet Aluminium body is available either with raw or black anodized finish
- 4.5" tall by 3.75" (clamp installed) diameter body, fits in more places than our standard air-oil separators
- Supplied 3/8", 90° inlet & outlet fittings and 36" of 3/8" rubber hose
- Includes a billet aluminium mounting clamp
- The two piece body of the Air-Oil Separator unscrews for cleaning and draining

MO85496 - Air-Oil Separator, Raw Finish

FORD MUSTANG

AIR-OIL SEPARATOR

- Plumbed into a vehicle's PCV system to capture the excess crankcase vapours, residual oil mist and moisture from re-entering the intake tract
- Vehicles from the factory vent these excess crankcase vapours, residual oil mist and moisture right back into the intake manifold which could cause detonation, oil deposits to form in the intake tract including the valves themselves and from lowering the efficiency of the intercooler in intercooler equipped vehicles
- Increases engine performance from cleaner intake air
- Air-Oil Separators have billet aluminium bodies with internal baffling and mesh media
- Includes heavy duty brass inlet and outlet fittings. Fuel/Emission/PCV Vapour hose, stainless steel mounting bracket and billet aluminium mounting clamp for the body of the separator
- Some Vehicle crankcase ventilation systems require that 2 Air-Oil Separator bodies be used to properly capture and ventilate the system

MO85681 - Air-Oil Separator Kit Small Body, Mustang GT, 2015-16, Black Anodized Finish

BREATHERS TANKS

- Black polyethylene for light weight
- 2" Breather filter mounted on top
- Four sizes of inlet fittings available
- Can be modified for additional fitting for dual vent hoses
- Aluminium bottom drain fitting
- 3/8" NPT Petcock
- Works with Mounting Bracket Part No. 63401
- Dimensions: 3-1/8" Dia. 7.50" tank height without Breather, 10.50" with Breather

MO85400 - Breather Tank, -12AN Fitting
MO85402 - Breather Tank, -10AN Fitting
MO85404 - Breather Tank, -8AN Fitting
MO85406 - Breather Tank, -6AN Fitting

BREATHING TANK

- Internally Baffled
- Can be use as a remote crankcase breather tank with the installation of Moroso P/N 22635 Positive Seal Fittings
- Designed to be panel-mounted and comes with T-bolt mounting Clamp
- Comes with Breather No. 68815
- Dimensions: 3-1/8" dia., 6-1/2" tank height without filter
- Drain valve

MO85473 - Breather Tank, (2) 3/8" NPT, Female Bungs, 180 Degrees apart

Air/Oil Separator Tank

Use as a remote Air/Oil Separator and Filter on Vacuum Pump Systems. Designed to be plumbed between the valve cover (usually) and the "IN" side of the Vacuum Pump Features -12AN Inlets and Outlets and a -6AN Drain Dimensions: 3-1/8" dia., 6" tank height.

MO85471 Filtered Oil Separator Tank for Vacuum Pumps
MO 97580 Twist On Non-Breather Cap

AIR-OIL SEPARATOR

LARGE BODY

- Plumbed into a vehicle's PCV system to capture the excess crankcase vapors and the residual oil mist from re-entering the intake track
- Vehicles from the factory vent these excess crankcase vapors and residual oil right back into the intake manifold which could cause detonation and oil deposits to form in the intake track including the valves themselves
- Polished Billet aluminum body complements any engine compartment and can be chromed or powder coated for a custom look
- Includes 3/8" 90° inlet & outlet fittings, 36" of 3/8" rubber hose for plumbing the air-oil Separator inline, and a billet aluminum mounting clamp for the body of the Separator
- Features a bottom drain with elbow that makes draining the collected oil virtually mess-free

MO85474

CIRCULATOR PUMPS

CIRCULATOR PUMP

circulator pumps are used to circulate diff or transmission oil through a fluid cooler. They feature a 5/8" shaft and -8AN male fittings.

- Description**
- Stage 1 Rear End Pump
- 2 Stage Rear End & Trans Pump
- Mount Plate for 9" Rear Ends
- Mount Plate for Quickm Change Rear Ends

VACUUM PUMPS

VACUUM PUMPS

Extra vacuum increases power by improving ring seal and preventing blow-by, intake-charge contamination and detonation; and by allowing the use of low-tension piston rings for less friction. Moroso's "purpose-built" racing pumps offer all these power advantages and more and are your best alternative over the passenger car "smog pumps" that are being offered by others for race applications. Moroso offers four different model pumps and all the accessories you'll need for your install. These pumps will suit any engine combination and requirement.

"ORIGINAL DESIGN" RACING VACUUM PUMPS

- Pulls Much More Vacuum Than Stock "Smog" Pumps
- Available in 3 or 4 Vane Design
- Billet Aluminium Housing
- Special Vane Material for Improved Seal and Wear
- Special -12AN Inlet/Outlet Fittings Won't Leak
- Completely Rebuildable in 15 Minutes
- Bracket (Available Separately) bolts directly to Big and Small Block Chevy Heads and any motor plate

MO22640 3-Vane Vacuum Pump.
MO22641 4-Vane Vacuum Pump. For Drag Race cars with dry sump oiling systems where increased crankcase vacuum is desired.
MO22644 4Vane, -12AN fittings Natural Aluminium Finish
MO22645 Vacuum Pump Service Kit, 3-Vane.
MO22646 Vacuum Pump Service Kit, 4-Vane.

"ENHANCED DESIGN" RACING VACUUM PUMP

- 4 Vane Pump Weighs 12 oz. less than "Original Style" Racing Vacuum Pump
- Pump is 1" shorter than original design
- New design pulls 13.9% more vacuum
- Achieves greater vacuum sooner
- Rotor is keyed to shaft, eliminating fastener failure
- Contains maintenance free precision sealed roller bearings
- Kit Includes Pump, Billet Adjustable Bracket and Special -12AN Inlet and Outlet Fittings
- Bracket will mount to front or rear of pump and will allow 360° rotation before fastening for choice of inlet/outlet location
- Mounts to motor directly or to motor plate in the same holes as "Original Style" Moroso Vacuum Pump*

*Note: Belt length may change depending on mounting location. New belt may be required.

MO22642 4-Vane Racing Vacuum Pump.
MO97642 Vacuum Pump Service Kit, 4-Vane.

ENHANCED DESIGN 3-VANE VACUUM PUMP

- We've taken our popular 3-Vane Vacuum Pump and added tricks that we learned when designing our "Enhanced Design" 4 Vane Vacuum Pump and through continual development of our Vacuum Pump line.
- The "Enhanced Design" features allow the pump to pull more vacuum than the "original" style 3-Vane pump
- Achieves greater vacuum sooner
- Virtually maintenance free
- 3-Vane Design weighs less than "original" style pumps
- Designed with maintenance-free precision sealed roller bearings
- Does not include a mounting bracket, see Moroso mounting bracket options. • Includes -12AN Fittings

MO22840 Enhanced Design 3-Vane Vacuum Pump, Hard Anodized Finish

4-Vane Vacuum Pump "Pro Mod" Style Large Cubic Inch And Blower Motors

- Achieves much greater vacuum sooner
- Flows up to 150% more air volume at low RPMs. Will achieve up to 26 inches of vacuum. Rotor is keyed to shaft, eliminating fastener failure. Utilizes sealed maintenance free bearings. Bracket will mount directly to motor plate and allow 360 degrees of rotation. Kit includes large 4 vane pump, billet adjustable bracket, -16 AN beaded fittings. Pump weighs 7 lbs. 8 ozs. with fittings and bracket included.
- 4-Vane, Pro Mod Vacuum Pump with mount and hardware.

MO22643
MO97644

ENHANCED DESIGN 4-VANE VACUUM PUMP

Moroso Performance Products has taken its "Enhanced Design" 4 Vane Vacuum Pump, Part No. 22642 and repackaged it so that it does not come with a mounting bracket. We did this due to the amount of mounting bracket options that we currently have. The end result is more versatility in mounting options and a lower buy in price on the pump itself.

- "Enhanced Design" pulls more vacuum
- Can be used efficiently on wet or dry-sump engines
- Achieves greater vacuum sooner
- 4-Vane Design weighs less than "original" style pumps
- Virtually maintenance free, designed with maintenance-free precision sealed roller bearings.
- Includes -12AN fittings
- Does not include a mounting bracket

MO22842 Enhanced Design 4-Vane Vacuum Pump, -12AN Fitting, Hard Anodized Finish

LARGE STYLE 4-VANE VACUUM PUMP WITH DUAL LINE MANIFOLD

- Moroso Performance Products the leader in Vacuum Pump technology just released its "Large Style" 4-Vane Vacuum Pump. This pump was released from feedback from racers and engine builders who craved the performance of the Moroso "Pro-Mod Style" vacuum pump but needed a pump that was physically smaller and lighter.
- Pulls large consistent vacuum numbers
- Creates vacuum quickly and linearly
- Virtually maintenance free, designed with maintenance-free precision sealed roller bearings
- Includes a manifold for dual feed applications or installation of a relief valve
- Comes with a 36 tooth 3/8" pitch 1/2" wide Gilmer pulley, adjustable mounting bracket and -12AN fittings

MO22843 Large Style 4-Vane Vacuum Pump

VAC PUMP REBUILD KIT

Rebuild kit for original style Vacuum Pump MO22640 & MO22641, Excluding Vanes, Includes Shaft & Hub **MO97180**

VACUUM PUMP BRACKETS

Moroso offers Billet Aluminum Vacuum Pump Mounting Brackets that fit a variety of engine and vacuum pump combinations. These brackets fit the engines directly or mount to a motor plate. Refer to the listings.

MO63909 Moroso "Original" Style Vacuum Pumps. Use this bracket to mount pump to the passenger or drivers side head on a Big Block Ford. Anodized.

MO63910 Moroso "Original" Style Vacuum Pumps. Use this bracket to mount pump to motor plates on ALL engines. Also mounts to Big and Small Block Chevy cylinder heads.

MO63911 Moroso "Original" Style Vacuum Pumps. Mounts to SB Ford, driver or passenger side cylinder heads.

MO63915 Moroso "Enhanced Design" Vacuum Pump. Mounts to Small Block Ford, driver or passenger side cylinder heads.

MO63917 Replacement Bracket for Moroso "Enhanced Design" Vacuum Pump.

MO63923 GM LS Series passenger side cylinder head Bracket suit 22640 and 22641 vac pump

VACUUM PUMP IDLER PULLEY KIT

Idler Pulley clamps the front diameter of a Moroso Enhanced Series Vacuum Pump Unique tensioner system with a heavy duty/high speed bearing reduces belt flap throughout rpm range. Slotted bracket allows for a range of adjustment. Kit contains the Idler Pulley, the Idler Pulley bracket which is constructed out of billet aluminum and includes high quality hardware for years of service

Description	Part No
Moroso Idler Pulley Kit For Enhanced Vacuum Pumps	MO63903

VACUUM PUMP PULLEY V BELT, OFFSET

- Allows Moroso Vacuum Pumps to be installed in cars with minimal drive mandrel space Hard coat anodized
- Offset 7/8", 5" diameter pulley uses stock (3-bolt) mounting pattern with 1.16" bolt circle
- Use with Moroso Vacuum Pump Nos. 22640, 22641, 22642, 22644, 22840 and 22843

Offset Vacuum Pump Pulley **MO64887**

VACUUM PUMP PULLEY, GILMER TYPE

- Fits Moroso Racing Vacuum Pumps or similar "smog" pumps that use OE-style, 3-bolt mounting pattern; accepts standard Gilmer belts with 1/2" width or less
- Direct, bolt-on installation
- Precision machined from aircraft-quality aluminum
- Use with Moroso 3- or 4-Vane Vacuum Pump Nos. 22640, 22641, 22642, 22643, 22644, 22840, 22842 and interchangeable drive components

Vacuum Pump Pulley, Gilmer Type, 36 Tooth **MO64888**

Vacuum Pump V-Belt Pulley

Competition style pulley bolts directly to OEM, Holley® and other "smog" pumps used as engine vacuum pumps to improve ring seal. Precision machined from the highest grade aircraft aluminum and hard coat anodized for extended service life. Deep V-groove ensures belt retention under all racing conditions. Machined with six holes to reduce weight. 5"-diameter pulley uses stock (3-bolt) mounting pattern with 1.16" bolt circle. Designed in collaboration with acclaimed Pro Stock engine builder Dale Eicke May be used with Moroso Vacuum Pump No. 22640 and 22641 and crankshaft Pulley No. 23520 and 23523 **A.I.R. Pump V-Belt Pulley MO64885**

V-Belt Crankshaft Pulleys

Ideal for driving alternators and/or vacuum pumps at optimum speed. Fits any 1" dia. crank-driven mandrel with 1/8" x 1/8" keyway. CNC machined from billet aluminum with hard coat anodized finish. May be used with Moroso Vacuum Pump No. 22640 and 22641 and Vacuum Pump Pulley No. 64885 **2.5" V-Belt Crankshaft Pulley MO23520**
4" V-Belt Crankshaft Pulley MO23523

Vacuum Pump Pulley, Gilmer Type

Fits Moroso Racing Vacuum Pumps or "smog" pumps that use OE-style, 3-bolt mounting pattern; accepts standard Gilmer belts with 3/8"-pitch and 3/4" width. 28 tooth, 3-5/16" o.d. Direct, bolt-on installation Precision machined from aircraft-quality aluminum with hard coat anodized finish for extended service life. Use with Moroso 3 or 4 Vane Racing Vacuum Pumps No. 22640/22641 and Interchangeable Drive Components **Vacuum Pump Pulley, Gilmer Type MO64886**

BILLET ALUMINUM EQUALIZING PLATES WITH FITTINGS

Includes 1/8" NPT Fitting and -12AN Fitting. Allows the vacuum pump and vacuum gauge to be connected. Can also be used as a drain back location Black Anodized **MO65397**

Fuel Pump Block-Off Plate, SBC

Fuel Pump Block-Off Plate, BBC, Ford and Chrysler **MO65398**

POSITIVE SEAL VENTED FITTING

- Designed to greatly simplify the plumbing of a vacuum pump
- Screws into side of valve cover
- Provides leak free o-ring seal on any flat valve cover surface
- No welding required
- Blue anodized aluminum
- 12AN Fitting, Positive Sealing. **MO22635**

POSITIVE SEAL 1/8" NPT FITTING

This handy fitting is designed to facilitate connection of a vacuum gauge to the valve cover without welding. Includes o-rings. **Positive Seal 1/8" NPT Fitting MO22632**

BILLET ALUMINUM VACUUM RELIEF VALVES

Replaces 22638 and 22639

- Two styles (Part No. 22637) allow fastening through valve covers or (Part No. 22636) threaded directly into intake manifold
- Vacuum relief point is adjustable by shiming an internal spring to get the precise amount of vacuum desired
- Can be disassembled for easy cleaning and maintenance and will work with any vacuum level
- They are made of 6061 T6 Billet aluminum and have a smooth, attractive finish

MO22636 Billet Aluminum Vacuum Relief Valve, 3/8" NPT. (22638)
MO22637 Billet Aluminum Vacuum Relief Valve, 3/4"-16 Thread. (22639)

Vacuum Pump Regulator

Regulator screws directly into the vacuum pump's -12AN inlet 360 degree directional adjustability Prevents the need for drilling additional holes in the valve cover Anodized - Clear **Vacuum Pump Regulator MO22633**

VACUUM PUMP REGULATOR

- Regulator screws directly into vacuum pump's -12AN inlet—no need to drill additional holes in the valve cover
- 360° directional adjustability by turning the built-in adjustment knob to get the precise amount of vacuum desired
- Tightening the integral locknut keeps the adjustment locked until the next adjustment is needed
- Can be disassembled for easy cleaning and maintenance and will work with any vacuum level
- Made from 6061 billet aluminum with a clear anodized finish
- Prevents pulling excess oil out of the crankcase

MO22629 Vacuum Pump Regulator, Easy Adjustable Knob

BILLET ALUMINUM ADJUSTABLE

VACUUM RELIEF VALVES 12AN, Adjustable

Vacuum relief point is adjustable by turning the built-in adjustment knob to get the precise amount of vacuum desired. Tightening the integral locknut keeps the adjustment locked until the next adjustment is needed. Can be disassembled for easy cleaning and maintenance and will work with any vacuum level They are made of 6061 aluminum and have a smooth, attractive finish **MO22631 Mounts through sheet metal**

CVR 4-VANE

VACUUM PUMP

- Can be used on wet or dry-sump engines
- Designed with precision sealed roller bearings
- 4.375" O.D. body, 5.050" from back of pump to pulley mounting flange
- Precision machined from T6-6061 aluminum
- Clear hard anodized for extended wear
- Can be driven as high as 8000 RPM
- Supplied with two -12AN fittings
- Supplied with vacuum pump mounting bracket to SBC and BBC cylinder heads or any engine using a motorplate
- Achieves greater vacuum sooner
- Maintenance free

4-Vane Mechanical Vacuum Pump Kit CVRVP625K

CVR 5" VAC PUMP PULLEY

5" Diameter V-Groove Pulley For CVRVP625K 4-Van Vacuum Pump **CVRV528**

ACCUMULATORS & ACCESSORIES

ACCUMULATORS

Moroso Oil Accumulators provide an instantaneous supply of oil when pressure falls below a safe level. Our professional series Accumulator, designed for all-out competition, is now available with a 3- or 1.5-quart capacity. The 1.5-quart version is perfect for Sport Compacts and other vehicles with 4- and 6-cylinder engines while the 3-quart version is for V8 engines. Moroso Accumulators can also be used to manually pre-lube engines before starting to prevent cold-start scuffing and premature bearing wear. **MO23900 Accumulator, 3 quart capacity, 20-1/8" x 4-1/4"**
MO23901 Accumulator, 1.5 quart capacity, 10" x 4-1/4"
MO23902 Accumulator, 3 quart capacity, 23" x 4-3/4"
MO97530 Accumulator "o" ring kit

ACCUMULATOR MOUNTS

Designed to be easily fastened to any flat surface, these brackets provide safe, sure mount for Moroso Accumulators and include T-Bolt type clamps which are accepted by NHRA. **MO23920 Accumulator Mount for MO23900 & MO23901**
MO23921 Accumulator Mount for MO23902

ONE WAY OIL CHECK VALVE

1/2" NPT to 1/2" NPT one way valve for use with oil accumulators and oil coolers to prevent of oil drain-back. **Check Valve, One Way MO23875**

ACCUMULATOR VALVE

Best for Competition - Kit includes Moroso Part No. 23905 Solenoid Valve plus a Pressure Valve

- Better than a regular manual electric valve — our Solenoid pressure valve allows only the needed volume of oil to be released for quicker filling and discharging
- Screw-in sensor electronically activates when engine oil pressure drops below normal. When the engine returns to normal pressure, the accumulator refills automatically, ready for the next possible occurrence
- Best to use in remote mount situations, where accessing a manual valve is not an option
- Easy three-wire hookup
- Comes in two pressure ranges: choose the one that best suits your engine combination

Description Accumulator Valve, 20-25 PSI **Part No.** **MO23907**

12 VOLT SOLENOID VALVE

The 12 Volt solenoid valve allows remote control of fluid flow from the driver's seat and is used when using an accumulator to pre lube an engine. Each side of the solenoid valve contains a 1/2" NPT female port and a 1/2" NPT male nipple is also to suit other plumbing needs. The solenoid valve is open when toggle switch is on, when switched off remains closed. Includes toggle switch and 16 gauge wire. A 20-Amp fuse must be used between the power source and the switch.

Solenoid Valve with 1/2" NPT female ports **MO23905**

OIL HEATERS

OIL PREHEATERS

- Heater element designed specifically for heating oil; does not scorch or boil the oil like "converted water heater" designs
- 212 watts of power raises temperature of 12 quarts of oil 60°F in about 30 minutes
- Element screws into place; available with aluminum or steel 1" NPT fitting
- 120 volt rating; includes detachable 7-foot cord
- Length of heating element is 4-1/2" from fitting to tip

MO23990 Oil Preheater, Internal, Steel fitting.

EXTERNAL HEATING PADS

- New and improved lamination process
- Excellent for pre-heating of oil pans, tanks and automatic transmission pans
- Available with self-adhesive or hook/spring attachment methods
- Etched foil design distributes heat evenly
- Superior grade silicone outer shell resists oil and dirt

MO23995 External Heating Pad, 6" x 12", hook and spring attachment. 360 Watts. 8" 110V cord.

MO23996 External Heating Pad, 5" x 7", self-adhesive. 400 Watts(min). Heats oil from 66°F to 160°F in only 25 minutes. 36" 110V cord.

Peterson Oil Tank Heaters

Pre-heating of oil in dry or wet sump systems is important to ensure good lubrication on initial startup. Immersion style does a great job of pre-heating your oil, however, it requires welding a bung into the tank. 300 Watt immersion style heater. 240 volt detachable cord. Come complete with both steel and aluminum 1/2" NPT bungs.

PFS08-0300

PFS08-1302

OIL TANK HEATERS

Pre-heating of oil in dry or wet sump systems is important to ensure good lubrication upon initial start-up. Our immersion style heaters do a great job of pre-heating your oil, however it requires welding a bung into the tank.

Whereas our wrap around styles can be glued using hi-temp RTV silicone to glue to the outside of the tank or pan.

VAC-U-PAN SYSTEMS

CRANKCASE EVACUATION SYSTEM

- Reduces crankcase pressure throughout entire rpm range for increased piston ring seal, reduced intake charge contamination, and fewer oil leaks
- Track and dyno tests prove significant increases in engine performance
- Includes 2 each: Oil Separators/Breathers, Breather/Filler Cap Grommets, One-Way Check Valve and Weld-In Nipple for header collector

MO25900

Crankcase Evacuation System.

UNIVERSAL CRANKCASE EVACUATION SYSTEM

For racing applications. Breathers install into 1.25" valve cover holes. Drill and weld the one way valves into the headers to remove excess gases from the engine. Kit includes: 2 x breathers, 2 x grommets, 2 x hose clamps and 2 x one way valve bodies. Hose not included.

RPCP2050

Crankcase Evacuation System

Crankshaft Evacuation System

Designed primarily for drag race applications, this crankcase evacuation system is designed to reduce pressure build-up in the engine crankcase, providing for better piston ring seal, less intake charge contamination, and reduced oil leaks caused by high crankcase pressures, while increasing engine performance. Kit includes two chrome plated Mopar style push-on valve cover breathers, two breather grommets, two check valves and two 3-1/4" long, 45 degree cut/threaded tubes, which must be welded into collectors.

MG6002

Crankcase Evacuation System

MO68780

Replacement Breather Cap

OIL RESTRICTORS

Nissan RB26DETT Oil Restrictor

The design of the Tomei oil restrictor is based on the experience of developing N1 endurance and drag racing RB26DETT engines. By limiting the diameter of the orifice to 1.5mm we succeeded in securing enough lubrication to the camshaft and valve while gaining oil in the oil pan, and preventing problems associated with allowing excessive oil to reach the cylinder head.

Oil Restrictor - Nissan RB26DETT

5R-TOMEI-T191071

ENGINE OIL RESTRICTOR KIT

- Reduces oil flow to upper engine assembly.
- Reduces power-robbing windage.
- Do not use with hydraulic lifters.

Part No

Description

AF64-2086 Pre 1986 Chevy oil restrictor kit

AF64-2097 Chevy Motown Block oil restrictor kit

AF64-2094 Ford Cleveland oil restrictor kit

Oil Restrictors

When building a high performance engine with a solid or solid roller cam, it is necessary to meter the amount of oil going through the lifters and up to the rocker arms. Too much oil to the top will starve the main and rod bearings and cause engine failure. These oil restrictors are simple and easy to use parts and should be considered when installing a solid lifter or a solid roller camshaft. Screws Directly Into Oil Galley with No Machine Work. .055" Orifice.

Description

Chevrolet V8 Screw-in Oil Restrictors (Pair)

Part No.

C04917

LIFTER VALLEY VENTS

- Positive ventilation to upper engine
- Prevents drainback to crankshaft
- Helps stop excessive windage and horsepower loss
- All aluminium - 8 per kit

Lifter Valley Vents. Fits SBC and others 1/4" NPT with Hex Head.

MO25025

MO22010

MO22016

MO22045

MO22050

OIL RESTRICTOR KITS

- Reduces oil flow to upper engine assembly, leaving more oil available for the rod and main bearings
- Reduces power-robbing windage by reducing the volume of oil passing by the rotating assembly on its return to the pan
- Do not use with hydraulic lifters

MO22000 Oil Restrictor Kit. SBC and BBC engines, .060" orifice dia. Oil delivery holes at rear cam bearing must be tapped to install. Two per pack.

MO22010 Oil Restrictor Kit. SBC and BBC engines, .0625" orifice dia. Screws into existing lifter gallery cleaning plug holes at back of block. Two per pack.

MO22016 Oil Restrictor Kit. Fits newer GM-Style blocks (including Gen V and Gen VI), .0625" orifice diameter with oil lifter gallery bosses flush with bell housing face. Two per pack.

MO22017 Oil Restrictor Kit. Fits Merlin II blocks, .0625" orifice diameter. Screws into existing lifter gallery cleaning plug holes at back of block. Two per pack.

MO22045 Oil Restrictor Kit. Ford 302-351W and Dart Iron Eagle Ford blocks. Kit includes: Four - Cam Bearing Restrictors (used in Ford & Dart Blocks); One - 7/16" -14 Restrictor for Lifter Gallies (Ford Only); One - 1/8" NPT Restrictor for Lifter Gallies (Dart); One - 1/8" NPT Plug for Lifter Gallies (Dart).

MO22050 Oil Restrictor Kit. Ford 351 Cleveland, designed and used by Jack Roush Racing. Five per pack.

OIL FLOW RESTRICTOR

PLUGS

These plugs solve the common high-performance engine problem of too much oil in the head area.

The plug restricts approximately 75% of the oil to the top end of the engine for better lubrication and prevents oil wastage at the lifters (which will cause windage problems).

This also keeps the sump better supplied with oil. Installs easily into the back of the block in place of the stock plugs. Not for use with hydraulic lifters. STAINLESS STEEL FLUSH for Small Block and Big Block Chevy late model Bowtie, Rocket and Merlin Blocks. Plug has an Allen head to allow flush mounting in the block and is made from stainless steel to avoid stripping out on removal

MAGNETIC DRAIN PLUGS

Aeroflow performance magnetic drain plug traps particles to prevent recirculation and engine damage. With a pre drilled hole in the hex head to wrap up some safety wire (except AF59-2001) and new gasket provided. With many thread sizes available to suit most makes and models. We recommend maximum torque rating of 20ft/lbs (27 NM)

AF59-2001	1/2" - 20 Suits most Aeroflow pans (NOTE: NOT DRILLED)
AF59-2003	M12 X 1.25mm suits most models from Nissan , Infiniti, Lexus , Toyota , Scion.
AF59-2004	M14 X 1.5mm suits most models from Honda , Mitsubishi , Saab , Hyundai , Ford Focus/Fiesta/ Mazda
AF59-2005	M16 X 1.5mm suits most models from Subaru , BMW , Scion , Peugeot, Renault , Mini Cooper
AF59-2006	M20 X 1.5mm suits most models from Subaru , Porsche

GM LS Retrofit Engine

Oil Pan With Extra Clearance

- Designed for LS engine retrofit installations in GM muscle/classic car and truck chassis requiring more oil pan to chassis clearance around the front half of the oil pan. Perfect for: : 67-69 Camaro/Firebird, 68-74 Nova/Apollo/Ventura/Omega
 - NOTE - Oil pan #302-2 may not be used with LS7 engines or "stroker" engines greater than 3.62".
 - Can be used anywhere a GM F-Body oil pan can be used
 - New applications will be added as testing confirms fitment
 - Provides OEM fitment - OEM oil filter mounting, OEM oil cooler port provision, OEM engine NVH suppression, OEM flange gasket and sealing, proper structural rigidity and OEM bell-housing attachments.
 - Provides maximum clearance for vehicles where the steering linkage is behind the engine crossmember.
 - Cast and machined aluminum
 - Complete kit includes sump baffle, OE style pick-up tube, sump plug, oil filter stud, oil passage cover, etc.
- GM LS Retro-fit Oil Pan - 1955-87 GM/Muscle Car/Classic Car/Trucks H0302-2**

GM LS retrofit engine oil pans

GM's popular LS engines are finding their way into a large variety of vehicles. They make great power, plus they're very durable and reliable. Unfortunately, the factory LS pans don't always fit or they hang too low for today's hot rods. Holley's new LS Retro-fit Engine Oil Pan is designed to help! It provides maximum clearance to the chassis and ground, plus provides an OEM fitment for durability and proper sealing.

GM LS RETRO-FIT OIL PAN 1955-87 GM/MUSCLE CAR/CLASSIC CAR/TRUCKS H0302-1

LS CONVERSION OIL PAN EXTRA CLEARANCE

The factory GM LS pans don't always fit or they hang too low for a lot of conversion applications. The Aeroflow Performance LS conversion oil pan is designed to help! It provides maximum extra clearance to the chassis frames and ground. Designed for LS engine conversion installations where you require more oil pan to chassis frame clearance around the front half of the oil pan. This cast aluminium oil pan is modelled off the OEM GM LS oil pan so it shares OEM oil filter mounting, OEM oil cooler port provision, OEM engine NVH suppression, OEM flange gasket and sealing and OEM bell-housing attachments.

Complete kit includes sump baffle, OE style pick-up tube, sump plug, oil filter stud, oil passage cover.
Capacity : 5.85 Litres (6.18 quarts)
Max crank stroke: 3.62"
Recommended oil filter: AF2296-1017
AF82-2300

LS SERIES CONVERSION PANS

The factory GM LS pans don't always fit or they hang too low for a lot of conversion applications. The Aeroflow Performance LS conversion oil pan is designed to help! Designed for LS engine conversion installations where you require more oil pan to chassis frame clearance around the front half of the oil pan. This cast aluminium oil pan is modelled off the OEM GM LS oil pan so it shares OEM oil filter mounting, OEM oil cooler port provision, OEM engine NVH suppression, OEM flange gasket and sealing and OEM bell-housing attachments. Complete kit includes sump baffle, OE style pick-up tube, sump plug, oil filter stud, oil passage cover.
Capacity : 5.85 Litres (6.18 quarts)
Max crank stroke: 4.25"
Recommended oil filter: AF2296-1017
AF82-2301

STANDARD GM LS CAST OIL PAN

This Aeroflow Performance oil pan kit is designed to replace your rusted or damaged OE oil pan with quality, reliable reproduction style parts. Keep the oil, your engine's lifeblood, where it belongs. This front sump design oil pan is a direct replacement fit for Holden Commodore VT-VZ or GM part number GM12640748. This late model VZ style sump is often used for early Commodore, Nissan 240sx, Toyota 86 and Subaru BRZ LS engine conversions. It is also compatible with all LS Series engines including the LSA. Later VE/VF engines will be required to use engine block oil dipstick tube plug AF64-2196 (sold separately). The Cast aluminium sump comes with oil pick up, oil pan gasket, oil cooler block off, mounting bolts and dipstick and tube.

AF82-2305 VZ Holden Commodore standard LS1, LS2, LS3

LS REAR SUMP PAN WITH EXTRA CLEARANCE OIL FILTER ATTACHED

CLEARANCE OIL FILTER ATTACHED

Conversion pan for rear sump applications. With trap door. Includes oil filter adapter (AF59-2012) built into oil pan. extra clearance with cut out in oil pan to fit oil filter. extra capacity oil pan with large wings on each side of oil pan. 6.65 liters of engine oil. Uses stock block mounted LS dipstick.

VT-VZ LS Chev

VE-VF LS Chev

LS CHEVY COMPETITION BAFFLE INSERT

LS series Chevys are prone to oil starvation at high speed cornering, braking and acceleration, especially at high RPM where oil windage is more common. Aeroflow's baffle plate with trap doors completely encloses the oil pump pickup for protection and oil starvation in racing conditions and when oil level is low. This baffle plate with trap doors is a direct replacement for the stock baffle. Manufactured from aircraft grade aluminium and designed to fit Commodore VT - VF. Note: Some modifications required to fit early LS pans.

AF82-2007 VT-VY LS Chev baffle insert suits Commodore
AF82-2010 VT-VZ LS Chev baffle insert suits Commodore / GTO pan
AF82-2011 VE-VF LS Chev baffle insert suits Commodore / G8 pan

SUPER OIL PANS

Aeroflow's range of super oil pans available for most popular V8 engines are the perfect choice for street or track driven high performance engines. These pans start out as new stamped steel pans which are customised with specially designed extra oil capacity wings. These wings allow extra oil capacity without affecting ground clearance which helps maintain more constant oil temperatures for reliability and feature windage trays and crank scrapers. Available in chrome, black and raw unpainted finishes.

LS FRONT SUMP PAN WITH EXTRA CLEARANCE OIL FILTER ATTACHED

Conversion pan for front sump applications. With trap door. Includes oil filter adapter (AF59-2012) built into oil pan. extra clearance with cut out in oil pan to fit oil filter. extra capacity oil pan with large wings on each side of oil pan. Fits: 1978-2007 front sump Holden Commodores can also be used in additional applications; check dimensions for clearance. Designed to be used with Aeroflow pickup AF82-2409. Uses 1/4" universal dipstick AF64-2123, AF64-2123BLK.

Note: May require crossmember modifications in some model Commodores.

LS SUMP BOLT-ON OIL FILTER ADAPTER

Aeroflow offer the bolt-on oil filter adapter separately for the front or rear GM LS fabricated Aeroflow oil pan. This block is CNC machined from 6061-T6 aluminium and hard anodised black finish. This block accepts the OE oil filter AF2296-1017. It features 1x 1/4" NPT port for auxiliaries. This block suits front sump oil pan (AF82-2016) and rear sump oil pan (AF82-2012).
AF59-2012

LS SUMP 900 BOLT-ON OIL FILTER FILTER ADAPTER

Aeroflow offer this optional bolt-on oil filter adapter separately for the front or rear GM LS fabricated Aeroflow oil pan. This block turns the oil filter 90 degrees to a horizontal position and is CNC machined from 6061-T6 aluminium and hard anodised black finish. Features 1x 1/4" NPT port for auxiliaries. This block accepts the OE oil filter AF2296-1017. This block suits front sump oil pan (AF82-2016) and rear sump oil pan (AF82-2012).
AF82-2022

GM LS SLIMLINE OIL BLOCK ADAPTER

Aeroflow offer this bolt-on slimline oil block adapter separately, for the front or rear GM LS fabricated Aeroflow oil pans. This block features two -10AN male fittings facing straight down attached to a slimline plate that bolts to the Aeroflow LS series oil pans. This block suits front sump oil pan (AF82-2016) and rear sump oil pan (AF82-2012). Plate thickness 9.52mm (3/8"), total height 33mm (1-19/64").
AF82-2030

LS OIL BLOCK ADAPTER

Aeroflow offer the bolt-on oil block adapter separately for the front or rear GM LS fabricated Aeroflow oil pan. This block is CNC machined from 6061-T6 aluminium and hard anodised black finish. Has 2 x -10 female ORB fittings includes bolts & o-rings. This block suits front sump oil pan (AF82-2016) and rear sump oil pan (AF82-2012). Length 139mm (5-15/32"), width 41mm (1-39/64"), height 33mm (1-19/64"), centre to centre of -10ORB 41mm (1-39/64").
AF82-2013

GM LS 90° OIL BLOCK ADAPTER

Aeroflow Performance now offer the bolt-on oil block adapter in a 90 degree (horizontal) position. Still retaining the two female -12ORB fittings but with the horizontal outlets is great for tight clearances to run your remote oil filter lines. This block suits front sump oil pan (AF82-2016) and rear sump oil pan (AF82-2012). CNC machined from 6061-T6 aluminium and hard anodised black finish. Length 133mm (5-15/64"), width 41mm (1-39/64"), height 33mm (1-19/64").
AF82-2009

• 7 Quart Capacity

• Clears 4.125" stroke with most steel rods

• Fits 4 bolt Dart, GM and Merlin main caps

• 3 trap door baffles, 2 runners for oil control in Road Racing, also

makes an excellent Drag Race oil pan

• Has a built in crank scraper, removable screen windage tray and

anti-slosh to free up horsepower

• Rear Sump is 7.5" Deep, 12" wide and 10.5" long

• Steel with a clear zinc finish

• Compatible with most starter/flywheel combinations

CHEVROLET BIG BLOCK

Designed for Competition Eliminator, Super Gas, Super Comp and Bracket cars. Installation may require modifications to cross-member.

- Fully fabricated aluminum with billet end seals to ensure consistent sealing surface to billet front covers and rear main caps
- Utilizes "race" pan rail bolt pattern
- Double kick-out design ensures large stroke clearance and wide main cap clearance
- Solid louvered windage tray w/main cap partitions for maximum power and oil control
- For use with 168-tooth flywheel combination
- Sump design works with Moroso spur gear and gerotor billet oil pumps
- Features one O-ring magnetic drain plug and two -8AN drain backs
- Accepts 4.75" stroke with aluminum rods
- 8" Deep
- 6 Quart Capacity

MAZDA 13B ROTARY

Fits Mazda RX-3 & RX-4 models; several rotary engine conversions including 1981-84 Toyota Starlet, 1964-83 Toyota Corolla, 1971-73 Datsun 1200 & others with little or no crossmember modifications; also tube chassis cars.

- 6-1/4 Quart Capacity, 4" Deep
- Rugged 3/8" thick billet aluminium gasket rail with integral cross-brace serves as a girdle to greatly strengthen the entire engine assembly and reduce flexing under hard driving
- Fully fabricated
- Dual trap door baffles
- Enlarged sump increases capacity to 6-1/4 quarts (with stock oil cooler installed), while adding only a quarter-inch in depth to provide ample ground clearance
- Includes oil temperature sender provisions
- Includes magnetic drain plug with extra copper washer, pan mounting kit with hex-drive steel studs to eliminate stripping the engine block and serrated-face flare nuts to withstand vibration
- Accommodates stock pan gasket and dipstick (with modification)

Deep Rear Sump, Fabricated Aluminium Pan

MITSUBISHI 4G63

Fits: 1989-92 1/2

Mitsubishi Lancer

including VR4 and EVO.

Can be used with Front and All Wheel Drive.

- 6-1/4 Quart Capacity, 6-1/2" Deep
- One piece, 1/4" thick billet aluminium pan rail
- Trap door baffles provide adequate oil control
- Built-in mounting flange allows use of the stock turbo drain tube
- 1/2" NPT bung accommodates oil temperature sender
- Includes mounting kit with hex-drive studs and serrated-face nuts
- Magnetic drain plug included

Kicked-Out Sump, Aluminium Pan

MO20960

MITSUBISHI EVO 10

Fits: 2008-Up Mitsubishi EVO 10, will fit with factory air conditioning.

Oil Pan, Fabricated Aluminium, Race Baffled for Mitsubishi Evo 10, 2008-Up. Engine Application: Mitsubishi 4B11T engines

- Has a .375" thick billet aluminium oil pan rail with a fabricated .100" thick aluminium sump
- Features a race-proven, three door assembly and removable anti-slosh baffle that keeps oil contained in oil pump pickup area during road racing and drag racing
- Holds 1.5 more quarts than stock
- 1/2" NPT fitting for oil temperature sensor and O-ring style drain plug
- Includes mounting kit with hex drive steel studs and serrated-faced flange nuts
- Reuses stock air conditioning hardware and bedplate

Mitsubishi EVO 10 Fabricated Aluminium Oil Pan

MO20969

MITSUBISHI EVO 7, 8, 9, ROAD RACE

BAFFLED OIL PAN

Aluminium, Wet Sump, 6.5 Quart Capacity Engine Application: Mitsubishi 4G63T 14 Race Baffled Fits: 2001-2007 Mitsubishi Evo, 7, 8, 9 with aftermarket lower intercooler pipe

- Has a 3/8" thick billet aluminium oil pan rail with a fabricated aluminium sump that is 3/4" deeper than the stock oil pan
- Features a race-proven, trap door assembly and an anti-slosh baffle that keeps oil contained in the oil pump pick up area during road racing and drag racing
- To free up horsepower and to help with oil temps, the oil pan also features a removable windage tray and crank scraper
- Holds 1.5 more quarts than stock, 6.5 quart capacity
- Has an accommodation for stock or aftermarket oil return lines
- Includes a heavy duty, bolt-on oil pump pick up
- Magnetic drain plug and a mounting kit comprised of hex drive steel studs and serrated flange nuts are included
- Uses stock dipstick
- 1/2" NPT fitting for oil temperature sender

NISSAN SR20DET

Engine Application:

Nissan, SR20-Rear

Wheel Drive

- Manufactured from aircraft aluminium
- Dual internal baffling insures oil control not present in an OE oil Pan
- Magnetic drain plug included
- Bolt-in upgrade replaces OEM steel pan
- Use Stock Oil Pump & Pickup
- 1/4" aluminium rail
- Metric studs and nuts included
- Oil Temperature provision

Nissan SR20DET Fabricated Aluminium Pan

MO20975

SUBARU EJ20 & EJ25

Fits Subaru EJ20/EJ25 in

Impreza Gen. 1, 2, 3, Liberty

Gen. 1, Gen. 2 and Forester

Gen. 1 and universal applications

such as Sand Rails, Clears Stock and

Twin Type Headers. Competition Baffled

for Rally, Road Race, Drag Race and

Sand Rail.

- 5 Quart Capacity
- Fabricated aluminium with billet pan rail
- Bottom of oil pan is finned for heat dissipation
- Windage tray for increased horsepower saving and oil control
- 1/2" NPT fitting for crank case ventilation or for head drain back
- 1/2" NPT fitting for oil temperature sender
- Oil pump pickup and pan gasket and mounting hardware included
- Included adapter allows use of factory dipstick

EJ20 - EJ25 Oil Pan, Aluminium with Billet Rail

MO20965

ACURA/HONDA B SERIES

Engine Application:

Acura VTEC, Non-VTEC

and Honda 1.6L B16A3

- Steel, Clear Zinc
- Kicked-out sump
- Includes 6 trap doors, 2 baffles and a removable sump tray
- Turbo/Supercharger oil drain back and temperature sensor bung
- Magnetic drain plug
- Works with OEM exhaust manifold and most aftermarket exhaust/header combinations
- Use with stock Honda oil pan gasket

Acura/Honda B Series

GM LS RETRO-FIT LOW PROFILE OIL PAN

Our LS retro-fit low profile oil pans give you the extra clearance needed for those tight engine swaps. OEM style fit with an OEM filter mounting location and oil cooler provision for an easy installation on almost any chassis. 6-quart oil capacity and includes pick up, sump baffle, gasket and hardware.

Description

GM LS Retro-Fit Low Profile Oil Pan - Satin

Part No.

RPCR8465

FABRICATED ALUMINIUM OIL PAN

- Made from strong & lightweight aluminium
- 100% Tig welded seams
- Engineered baffles for excellent oil control and pick up feed
- Thick aluminium pan rails and seal areas for a leak free seal and to prevent warping
- Drain plug included

MILODON

OIL PANS

CHEV SMALL BLOCK STROKER LOW PROFILE

Uses high horsepower output design. The pan front is deeper to allow the use of a full length, competition style tray included. Tray is attached in the pan by quick release fasteners to allow easy removal. The pan will fit stock crossmember cars without modification, as well as stock starters and oil filters. Will fit up to a 4" stroke with steel Carrillo or Eagle style rods.

• 8 1/4" Deep • 6 Quarts (5.7L) Capacity

Application
Chev Small Block 1955-79, LH Dipstick
Chev Small Block 1986-97, RH Dipstick
Standard Duty Pickup
Extreme Duty Pickup

M18316

CHEV SMALL BLOCK DRY SUMP

Built to be equally effective in all types of racing whether drag racing, road racing or circle track. Three 12AN fittings are used in the front, middle and rear positions. A high efficiency screen oil separator de-aerates the recovered oil before it is returned to the tank. Pro Competition design features full kick-out for maximum oil control and horsepower output. Requires small style starter.

• Measures 4" Under Crank • 5 1/2" Deep Reservoir

Chev Small Block 1955-79, LH Dipstick **M131700**

SB CHEV DART SHP PRO COMPETITION SUMP

For tube chassis cars, stock framed cars or dragsters where maximum power output and shut-off oil control is needed. Designed to fit cross membered cars, such as Camaros and Chevelle's, with only a reasonable amount of crossmember modification. This horsepower style pan incorporates light-weight, steel construction with a full kick-out and full-length louvered tray assembly which gives maximum horsepower output. High strength magnetic drain plug included.

• 5 Quart (4.7L) Capacity Plus Filter
• 4 1/4" Front Depth, 8 1/4" Rear Depth

Application
SB Chev Dart SHP, Right Hand Dipstick

Part No.
M131169

CHEV SMALL BLOCK MARINE V-DRIVE

Recommended for recreational to competition boats when engine is installed in hull with flywheel forward. Full length windage tray provides maximum power while controlling oil movement, even during severe boat handling. Has a large 12AN oil drain suitable for installing an external oil drain line. Built from extra heavy 16 gauge material to handle harsh marine environment and extreme use. Pan will fit with 4" stroke crank and Carrillo / Eagle style rods.

• 8 Quarts (7.6L) Capacity • 8" Deep
Chev Small Block 1955-79, LH Dipstick

M131300
M18470

CHEV SB SUIT DART SHP BLOCK

High power output design uses a deeper pan front to allow the use of a full length competition style windage to yield the most available power. Tray fastened into the pan so no extra mounting is required. Pan fits stock crossmember without modification when the correct Tall-Narrow frame and engine motor mounts are used. The Short-Wide mounts can not be used. Low profile sump allows good ground clearance, use of the stock starter and oil filter yet increases capacity. Includes high strength magnetic drain plug.

Application
Chev SB Suit Dart SHP Block Suit RH D/Stick

Part No.
M130907

CHEV BIG BLOCK EXTRA LOW PROFILE

This pan is equally suited for use on the street or the race track. Fits all Chevy chassis, including 1966 & 67 Chevelles, except 1962-67 Nova. Oil control baffles are used to provide consistent oil pressure and subdue any unwanted, power robbing oil movement. Pans have notched rails for up to a 4-1/2" stroke with most aluminium rods without modification.

• 7 3/4" Deep • 6 Quarts (5.7L) Capacity

Application
Chev Big Block 396-454 Mark IV

CHRYSLER 318-340 & 360 STOCK REPLACEMENT

Designed for 318-340 & 360 Small Block Chrysler engines that are not used for racing and need a new stock style pan.

• 4 Quarts (3.8L) Capacity • 7 1/2" Deep

Application
Chrysler Small Block 318-340 1960-72
Chrysler Small Block 360 1972 & Up

Part No.
M130750
M130755

CHRYSLER 340 & 360 LOW PRO

Designed for 340 & 360 Chrysler engines where superior oil control and increased ground clearance is desired. Features increased oil capacity, which is an absolute must to handle the demands of higher RPM, while increasing oil control by raising the rear pan floor. Highly efficient horizontal baffles are used for oil control while the sump rear features added large tube header clearance. Due to pan being moved up toward crank, there is no room for a windage tray.

• 7 Quarts (6.6L) Capacity • 7 3/4" Deep

WINDAGE TRAYS & BAFFLES

PAN BAFFLE

Installed between the oil pump and rear main, this special baffle effectively prevents oil from "climbing" up the rear of the pan into the crankshaft during hard acceleration.

Description	Part No.
Small Block Chevy	MI32500
Big Block Chevy	MI32505

THE "DIAMOND STRIPPER" SCREEN WINDAGE TRAY

The most sophisticated windage tray available today! This exclusive Milodon design features hundreds of small louvers that quickly scavenge oil from crankshaft rotation, but prevents splash back common to screen-type windage trays. This is a completely finished, gold irridated part that does not require additional fitting. And it flat works! Extensive dynameter and on - track testing verifies that Milodon "Diamond Stripper" windage trays out-perform all other screen type trays. Small Block Chevy trays will fit both the 350 and 400 bolt pattern. They will also fit right and left side dipsticks with the tray adjusted properly, as the dipstick will go underneath the tray.

Application	Part No.
SB Chev 350 & 400	MI32250
BB Chev Mark IV, V & Gen VI	MI32260

SOLID, LOUVERED WINDAGE TRAYS

Specially contoured solid trays with louvers that permit rapid return of oil to sump. This windage tray provides optimum protection against oil splash-back, and provides increased power. Ideal for street and strip applications.

WINDAGE TRAY INSTALL KIT

Required to properly mount the tray assembly. Adjustable mounting position allows the tray to work at its maximum potential by being as close as possible to the rotating assembly (min. 100") and to avoid any unnecessary interference with the oil pan. Install with the 7/16" nuts torqued to 65 ft./lbs or 1/2" to 85 ft./lbs using oil, and the 3/8" nuts torqued to 35 ft./lbs.

OIL PUMP SUPPORT BRACKETS

Designed to prevent pump housing cracking in high stress and vibration conditions. Will fit aftermarket and O.E. oil pump.

Description	Part No.
Small Block Chevy	MI17200
Big Block Chevy	MI17100

CHEV OIL CONTROL KITS

These kits convert stock-type oil pans into competition style pans for proper oil control, consistent oil pressure and horsepower gain. Includes Teflon coated windage tray, which attaches to stock type main cap studs with standoffs. Also includes crankshaft scraper and bolt-on rear pan baffle.

Description	Part No.
Oil Control Kit, SBC with LH or RH dipstick	MO23035
Oil Control Kit, BBC	MO23036

CHEV LOUVERED WINDAGE TRAYS

Louvered design allows oil thrown from rotating assembly to drain into sump without splashing back. Teflon coated for quick drainage to reduces windage and increases power. Mounts with Moroso Stud Kits or with stock extended main cap studs.

Description	Part No.
Windage Tray, SBC with LH or RH dipstick	MO23020
Windage Tray, BBC	MO23030

CRANKSHAFT WIPERS

Removes excess oil from crankshaft to reduce horsepower-robbing windage. Made from .035" steel plate which comes pre-fit so only slight amounts of material must be removed. Trim to within .045" of the connecting rods and counterweights for best results.

Description	Part No.
Crankshaft Wiper, Small Block Chev	MO25800
Crankshaft Wiper, Big Block Chev	MO25830

MAIN CAP BAFFLES

Designed for racing or street-performance applications to prevent oil from reaching crankshaft during hard acceleration. Mounts between rear main bearing cap and oil pump.

Description	Part No.
Main Cap Baffle, Small Block Chev	MO23000
Main Cap Baffle, Big Block Chev	MO23010

FORD WINDSOR LOUVERED WINDAGE TRAY

For Ford 5.0L Windsor engines. Will not fit blocks with 4-bolt main caps. Louvered design allows oil thrown from rotating assembly to drain into sump without splashing back, reducing windage and increasing power.

Description	Part No.
Louvered Windage Tray, Ford 5.0L	MO22930

FORD CLEVELAND LOUVERED WINDAGE TRAY

For Ford 302-351 Cleveland & 351M Engines. Fits Moroso Oil Pans MO20557 and MO20558. Louvered design allows oil thrown from rotating assembly to drain into sump without splashing back, reducing windage and increasing power.

Description	Part No.
Louvered Windage Tray, Ford 302-351C & 351M	MO22939
Windage Tray Mounting Kit.	MO38192

LOUVERED WINDAGE TRAY Ford 351W/SVO

Ford 351W/SVO with Rear Sump Oil Pans
 • Fits Moroso Drag Race Pan Nos. 20507, 20520, 20523 and 20532
 • Louvered design allows oil thrown from rotating assembly to drain into sump without splashing back, reducing windage and increasing power
 • Mount with Moroso Windage Tray Stud Kit No. 38192 (See Fastener Section)
MO22935 Louvered Windage Tray, Ford 351W

LOUVERED WINDAGE

TRAY LS ENGINE

- Louvered design allows oil thrown from rotating assembly to drain into sump without splashing back, reducing windage, increasing power and cutting down oil temperature
- Manufactured from 16 gauge steel
- Mounts right to the main caps
- Fits Moroso Oil Pan No. 20141

MO22941 Louvered Windage Tray, LS Engine

GM LS LOUVERED

WINDAGE TRAY

WITH ARP STUDS

- Louvered design allows oil thrown from the rotating assembly to drain into the sump without splashing back, reducing windage, increasing horsepower and cutting down on oil temperature
- Manufactured from 16 gauge steel
- Mounts right to the main caps with the customer supplied ARP Main Stud Kits
- Fits Moroso Oil Pan Nos. 20139, 20140, 20141, 20142, 20143, 20145, 20147, 20148, 20149, 20150, 21150, 21152, 21153, 21157 and 21158
- Must use Corvette C-6 Dipstick and tube Part Nos. 12570788 & 12570787

Description Part No
GM LS Louvered Windage Tray with ARP Studs MO22943

DART LS NEXT

WINDAGE TRAYS

- LS NEXT SHP Blocks LS1, LS2, LS3 & LS6 **DA32000118**
- With Mounting Bolts
- LS NEXT SHP Blocks LS1, LS2, LS3 & LS6 With Mounting Bar **DA32000120**

UNIVERSAL WINDAGE

TRAY SCREEN

- Keeps rotating assembly free of unwanted oil to reduce horsepower robbing windage
- Screen must be trimmed for each engine application

Description Part No
Uni-Directional Windage Tray Screen, 23" x 16" MO22912

SUBARU &

TOYOTA OIL BAFFLE

- The Moroso Double Tier, Drop in baffle assembly fits the O.E.M. oil pan without modification by sandwiching between the engine block and oil pan
- The baffle assembly with directional oil return flaps creates an oil containment area that keeps the oil pump pickup fed and oil off the rotating assembly to free up horsepower and cut down on oil temperatures
- Baffle Kit will help protect the engine from oil pressure surges in prolonged corners with high lateral G forces or long acceleration runs
- Constructed out of aluminum and comes with 2 sealing washers for the internal drain tubes

Description Part No
Subaru BRZ & Toyota 86 Oil Baffle MO23045

NITROUS SYSTEMS

Sniper Nitrous Systems 100-150HP

The Sniper is the economical entry-level kit from NOS that simply blows away competitive kits. The Sniper was developed to introduce enthusiasts to the use of nitrous at a very affordable price. The Sniper is a fully adjustable system that is designed to provide from 100-150 extra horsepower in popular 4 barrel square bore applications. Sniper kits comes race ready right out of the box with all necessary components, including a distinctive bright orange 10 lb. bottle with the industry standard industrial valve, adjustable plate with jets, solenoids, plus all required lines, hoses, fittings, clamps and a detailed instruction sheet to make installation simple.

Sniper Kit - Square Bore NOS07001

Sniper Universal Wet Systems 35-125HP

A great complement to NOS's cutting-edge nitrous kits, the Universal Sniper EFI kits are great for the budget minded builder that wants the power nitrous is famous for. And, since it's made by NOS, the Sniper kits benefit from the experience of a proven Nitrous. Each kit comes with all components necessary for a simple installation including NOS "Soft-Plume" Fogger nozzle, orange 10lb sniper bottle, steel bottle brackets and stainless steel braided line. The 4 & 6 cylinder kit includes jetting for 35-50-75 horsepower and V8 kit includes jetting for 75-100-125 horsepower.

Sniper Universal Single Fogger Kit - 4&6 Cyl NOS07005
Sniper Universal Single Fogger Kit - V8 NOS07006

Super Powershot Nitrous Systems 100-150HP

Kit includes premium NOS components including an anodized nitrous plate, a genuine NOS 10 lb. bottle with the NOS Hi-Flow bottle valve and premium NOS nitrous and fuel solenoids. They are set up at the factory for each application to provide a safe application of power and can offer an increase of up to 150 horsepower to V8 applications at the touch of a button. Each Powershot system comes standard with a 10 lb. capacity nitrous bottle, aircraft quality stainless steel braided hose, injector plate, solenoids and all other necessary electrical and mounting hardware for a complete installation.

Super Powershot - Square Bore NOS05101
Super Powershot - Spread Bore NOS05104
Universal Super Powershot - NO Injector plate NOS05000

Cheater Nitrous Systems 150-250HP

The NOS Cheater system is designed for use on 350 CID or larger, carbureted engines. It uses large nitrous and fuel solenoids and can be adjusted to any desired power level from 150 to 250 horsepower, in a matter of seconds. Cheater systems are easy to install and utilize a 1/2" thick injector plate which fits between the carburetor and intake manifold. Cheater systems include a 10 lb. nitrous bottle, four stages of jets, aircraft-quality steel braided line and all other necessary electrical and mounting hardware for a complete installation.

Cheater System - Square Bore NOS02001
Upgrade to Bigshot Kit for NOS02001 NOS0025

NOS CROSSHAIR NITROUS PLATE SYSTEM

NOS's new CrossHair plate systems have been designed with the serious racer in mind and are capable of 350+ HP. Based off of the ever popular Double Cross plate systems, the CrossHair™ takes this time tested design and improved it for better distribution of the fuel and nitrous. This is especially important with the complex intake Manifold designs out today.

The CrossHair™ plate systems feature double down nitrous bars for improved distribution and atomization, along with new track tested tune up's. The New CrossHair™ nitrous plates will give you the power you need, when you need it.

CrossHair™ kits come with a blue anodized CrossHair™ plate in either Holley 4150™ or 4500™ (Dominitor®) bolt patterns, new improved solenoids, jetting, plumbing and hardware. Available separately, NOS offers electrical wiring kits and Bottle kits in a variety of combinations so you can make up your own custom kit combination.

Description Part No
Crosshair 4150 4-Barrel Plate Kit NOS02153
Crosshair 4150 4-Barrel Plate Kit (No Solenoids) NOS12566
Crosshair 4500 4-Barrel Plate Kit NOS02154
Crosshair 4500 4-Barrel Plate Kit (No Solenoids) NOS12666

NOS NITROUS

BOTTLE KITS

In the past, if you have purchased a no Bottle kit or a plumbing kit, it was difficult to make sure you get all the other needed parts such as the bottle. Inevitably no matter how hard you have tried, something is forgotten like the Bottle nut or the PTFE Bottle nut washer. NOS has made this task easy by introducing Bottle kits. The new NOS Bottle kits are available with 10 or 15lb bottles in Hi-Flow valve configurations or in a 12.8lb carbon fiber Bottle kit. The NOS Bottle kits come complete with the bottle, Bottle nut and PTFE washer, Bottle brackets and 16ft of -6AN feed line. (GAUGE NOT INCLUDED)

Description Part No
Nitrous Bottle Kit 10lb With High Flow Valve NOS14761
Nitrous Bottle Kit 10lb With Super High Flow Valve NOS14762
Nitrous Bottle Kit 15lb With High Flow Valve NOS14763
Nitrous Bottle Kit 15lb With Super High Flow Valve NOS14764

Dual Shot Cheater System 100-250HP

Sometimes the application of too much power can be detrimental to a good launch. These are times when you need the help of a NOS Dual Shot Cheater system to maximize performance from the starting line, all the way through the lights. It's like having two systems in one. The Dual Shot Cheater system incorporates two Super Powershot solenoids for the first stage and two Cheater solenoids for the second stage.

This system is intended for use on V8 engines with a minimum displacement of 350 CID. For best results, a single plane intake manifold should be used.

Dual Shot Cheater - Square Bore NOS02201
Dual Shot Cheater - Dominator NOS02202

Big Shot Nitrous Systems

The NOS Big Shot systems use a special fogging plate design that vastly improves nitrous flow, fuel atomization and mixture distribution. Power output is adjustable from 200-400 horsepower simply by changing fuel and nitrous jets. Single stage Big Shot systems incorporate a NOS Pro Shot nitrous solenoid with -6 AN nitrous supply line. Systems include a variety of power jets, 10lb. nitrous bottle, 1/2" fogging plate, filters, fittings for fuel and nitrous, switches and all electrical and other hardware necessary for installation.

Big Shot System - Square Bore NOS02101
Big Shot System - Dominator NOS02102

Sneaky Pete

The Sneaky Pete was designed as a true Cheater Kit. This kit will enable you to obtain that extra tenth of a second without being obvious. It will be necessary to jet the carburetors a little richer (over and above what is normal, since you will have to compensate for the nitrous from the Sneaky Pete) while being "sneaky" since no additional fuel source is utilized. The kit comes complete with a compact, easy to conceal 10oz. bottle, nitrous solenoid, nylon nitrous line, wiring, 9v battery holder and an assortment of jets.

Sneaky Pete (Carbureted Applications ONLY) NOS05029

EFI Dry Nitrous Systems 40-150HP

These systems inject nitrous directly into the air intake and use the factory EFI system to provide the extra fuel necessary. All the required electronics are included to enable the OEM computer to compensate for the extra fuel requirement on demand. Jets are included that allow the user to adjust power outputs to match available traction. The system can be activated only at wide open throttle and comes with a safety shut-off in the event fuel pressure drops below what is required to maintain an adequate flow. Supplied with everything required for a complete installation.

Sportsman Fogger Systems 50-250HP

Engineered for precise distribution of nitrous and fuel for all carbureted or EFI engines. The NOS Sportsman Fogger Systems offer superior atomization and tuning by injecting precisely measured amounts of fuel and nitrous into each individual port with our patented Fogger Nozzles. Power levels are adjustable by changing nitrous and fuel jets in each Fogger Nozzle. The latest in high-tech solenoid technology allows for an extreme degree of reliability with jetting adjustability ranging from a 50 to a 150 extra HP gain. All Sportsman Fogger Systems include a 10 lb. capacity nitrous bottle, Powershot nitrous and fuel solenoids, Fogger nozzles, aircraft quality steel braided hose, and all other necessary electrical and mounting hardware for a complete installation.

Universal EFI Wet Nitrous Kits 35-125HP

The Ultimate Single fogger Wet System, the PowerFogger wet kits are great for vehicles where an NOS application specific kit is not available. This kit uses a single fogger nozzle to inject fuel and nitrous into the intake runner or plenum. The highest-quality NOS components are utilized for the best looking, best performing system on the market. NOS "Soft-Plume" Fogger nozzle, 10lb. blue bottle, bottle brackets, micro switch, relays and all other components are included for a simple installation. Drive-By-Wire kits include a wide open throttle controller for simple and safe installation. The 4 & 6 cylinder kits include jetting for 35-50-75 horsepower and V8 kits include jetting for 75-100-125 horsepower.

GM LS-1 & LS-2 Plate Systems 100-150HP

These systems are easily installed and feature a spray bar plate that mounts between the throttle body and the intake plenum. They can be adjusted to produce from between 100 and 150 extra horsepower, with provided jets. Activation is through a microswitch that is throttle-activated. All necessary plumbing and hardware is included to make a complete system. A detailed instruction manual is also provided.

- Chev & Holden LS-1 Engines NOS05168**
- Chev & Holden LS-2 Engines NOS05169**

Pro Shot Fogger System 150-500HP +

The Pro Shot Fogger utilizes patented Fogger2 Nozzle technology for excellent combustion, distribution and adjustability, allowing each cylinder to be injected with a precise cool, dense fuel laden nitrous fog mixture. Featuring our Super Pro Shot solenoids, power levels may be adjusted from 150 HP, to well above 500 extra HP. The Pro Shot Fogger system is designed primarily for highly modified V8 engines built with race quality components and includes a 10 lb. capacity nitrous bottle, Super Pro Shot nitrous and Cheater fuel solenoids, Fogger2 nozzles jetting from 250 to 450 extra HP, steel braided hose and all other necessary electrical/ mounting hardware for a complete installation.

Pro Shot Fogger V8 System NOS02462

Pro Race Fogger System 150-600HP +

The Pro Race Fogger incorporates the latest in NOS technology for producing the largest horsepower gains of any single stage nitrous system available today. This system features our R-series bottom-discharge solenoids which offer the least restriction and most flow of any other design. The NOS Pro Race Fogger is fully adjustable to produce from 150 horsepower all the way to well over 600+ horsepower and is designed specifically for use on highly modified competition-only engines. This system comes standard with a big 15 lb. bottle with a Super Hi-Flow valve, N2O gauge, exclusive Y-shaped Equal Flow distribution blocks, stainless tubing, high flow "Y" fittings at all unions, and all other necessary mounting hardware for a complete, professional installation. Manifold not included.

Pro Race Fogger V8 System NOS04466

Motorcycle Fogger Kit

It doesn't matter whether you are on the track or on the dirt. Touch the button and fast becomes "hang on." You can add pushbutton horsepower quickly and simply with the NOS Fogger kits for 4-stroke motorcycles or ATVs. Designed for easy installation, each Fogger kit comes complete with everything you need; including detailed, easy to follow instruction, electric fuel pump, nitrous and fuel solenoids, Fogger2 nozzles, filters, fittings, tubing, fuel pump, distribution blocks or T-fittings, jets, switches, hose, and all other hardware necessary for complete installation.

4 Cylinder, 4 Stroke Motorcycles over 700cc NOS03008

Nitrous & Fuel Jets

NOS worked with experts in precision hole drilling to develop a proprietary manufacturing process for our new Precision SS jets during years of exhaustive research and development. The result significantly raises the bar in terms of jet accuracy and precision and renders all the competition's jets obsolete. NOS is the only nitrous manufacturer to 100% individually flow-test jets. NOS jets are available in sizes from 0.014" to 0.125" To order add the size to the basic part number, eg. NOS13760-63 is the part number for a .063" Stainless Jet.

Description
Basic Part No.
Precision SS Flare Jets NOS13760-##

Replacement Jet Packs

These are the same jet packs supplied with NOS carburetor plate kits.

- Super Power Shot 1 each of 47, 53, 55, 61, 63, 71, 73 & 82 Jets NOS13721**
- Cheater 1 each of 63, 71, 73, 82, 91, 93 & 102 Jets NOS13726**
- Big Shot 1 each of 82, 91, 93, 102, 116, 110 & 120 Jets NOS13731**

Nitrous Pressure Gauges

The NOS Nitrous Pressure Gauge measures from 0 - 1500 PSI (although the recommended level is 900-950 PSI) and is essential in monitoring the bottle. Available in "standard" and glycerin-filled models designed to withstand engine vibration, etc.

- 1-1/2" Nitrous Pressure Gauge with -4AN adapter NOS15910**
- 1-1/2" Nitrous Pressure Gauge with -6AN adapter NOS15912**
- 2-5/8" Nitrous Pressure Gauge with Blue Face NOS15911**

Fuel Pressure Gauges

Our "standard" fuel pressure gauges measure from 0-15 PSI and are intended for use with carburetor plate and direct port nitrous systems and our EFI gauges are designed for use with NOS EFI nitrous systems where much higher fuel pressures are used. Accurate from 0 to 120 PSI. A glycerin filled version is available to provide vibration dampening and allow a more accurate and uniform reading.

- 1-1/2" Fuel Pressure Gauge 0-15 PSI with Red Face NOS15900**
- 1-1/2" Fuel Pressure Gauge 0-120 PSI for EFI NOS15906**

NITROUS GAUGE

The aeroflow performance 38mm (1-1/2") nitrous pressure gauge measures from 0-1500 PSI and is essential in monitoring the nitrous bottle for optimum performance. Recommended pressure is indicated in colour coded levels for your convenience.

* Note adaptor not included and sold separately under AF140-04 for -4AN or AF140-06 for -6AN.
AF30-2215

Nitrous & Fuel Filters

One of the most important components of any nitrous system, NOS filter fittings feature an aircraft type stainless steel mesh filter element to keep contaminants from attacking the solenoid and plugging the jets. The new NOS high pressure Billet Aluminium Filters feature a precision billet aluminium body and a cleanable stainless steel mesh filter element that has 10 times the filtering area of a standard filter.

- Billet Inline Nitrous filter -4AN, 140 micron NOS15550**
- Filtered NOS Fitting, 1/4" NPT x -4AN - Blue NOS15560**
- Filtered NOS Fitting, 1/4" NPT x -6AN - Blue NOS15564**
- Filtered NOS Fitting, 1/8" NPT x -4AN - Blue NOS15570**

High Pressure Nitrous Filter

Aeroflow's high pressure Nitrous filters feature a precision billet aluminium body and cleanable high-flow 140 micron stainless steel element that has ten times the filtration area of a standard filter. Body is 76mm (4") long x 30mm (1-3/16") in diameter.

Launcher Nitrous Controllers

Nitrous Oxide Systems is proud to present the Launcher. It combines all the functions a Nitrous racer could ever want into a single, easy to use controller. This handy device can be programmed to independently control 2 stages of nitrous and with the optional slave controller you can add two more stages for a total of 4 fully programmable stages of nitrous control. It features full data-logging capability for easy reviewing of past runs through laptop, handheld controller (SD card) or LCD touch screen (SD card) and easy to use graphical software makes the Launcher a breeze to program. The launcher is available as the launcher controller only; the Launcher controller with 3.5" colour LCD touch-screen (Includes stylus and mini SD card for data-logging); or the Launcher controller with the handheld tuner for data-logging and quick changes in the staging lanes.

2 Stage WOT / RPM Activated

Window Switch

The WOT/RPM activated window switch is a small, compact, user friendly unit with features like, 2 fully programmable independent RPM window switches that can operate from 0 to 20,000 RPM for anything from a low rpm engine to a high revving sport bike. It has the capability to read a rising or falling throttle position sensor for accurate activations every time. The WOT/RPM activated window switch also features a programmable output to activate a shift light for on-time gear pounding shifts and a handy recall feature that shows max RPM and TPS voltage for easy set up.

2 Stage WOT/RPM Activated Window Switch **NOS15982**

MINI 2-STAGE PROGRESSIVE NITROUS CONTROLLER

Nitrous Oxide Systems is proud to announce their new Mini 2 Stage Progressive nitrous controller. Featuring two completely independent stages of nitrous control, each with its own throttle position activation switch and progressive ramps. It allows you to get the most out of your nitrous system and put more power to the ground when traction is at its best. RPM on/off control eliminates the need for a window switch and allows you to turn the nitrous off and on at set points. It also features two programmable outputs, so you can control timing retard or other devices. With the hand held programmer, it makes programming quick and simple and allows you to mount the main box out of site.

- 2 fully independent nitrous controllers in one small bullet-proof case
 - Hand held programmer for ease in programming
 - Allows you to mount the main box out of sight
 - Integrated throttle position activation switch eliminates the need for a separate WOT switch
 - Progressive nitrous ramps feature:
 - Delay time programmable from 0 to 9.9 sec.
 - Start percentage programmable from 0 to 99%
 - Ramp time programmable from 0 to 9.9 sec
 - End percentage programmable from 0 to 99%
 - Nitrous can be programmed to ramp up or down
 - RPM on/off control eliminates the need for a separate window switch
 - Solenoid control channels with a 40 amp load capacity for large solenoids
 - Two output signals for use with timing retards or activation switches
- NOS15974**

Purge Kits

The primary purpose of a purge valve is to release trapped air or gaseous nitrous from lines. Helps to ensure consistent performances. And it looks cool, too. You've probably seen the Import or Pro Mod guys do it. The Ntimidator LED kit illuminates the nitrous plume with a striking blue light to put the fear into your opponents. Includes all required components.

Purge Valve Kit for -4AN Line	NOS16030
Purge Valve Kit for -6AN Line	NOS16032
Ntimidator LED Purge Kit for -4AN Line	NOS16033
Ntimidator Dual LED Purge Kit for -4AN Line	NOS16037
Blue LED Upgrade Only for Std Purge Kits	NOS16033

Intercooler Spray Bar Kit

The NOS intercooler spray bar kit features a new snake design that delivers 20% greater intercooler coverage area for improved cooling and can be cut to length for use with all intercoolers unlike competitive halo units. This kit decreases intake air temperatures by 11° C and allows you to safely run more boost for more power. Kit includes 5lb NOS bottle & all necessary hardware for easy installation

Inter-Cooler Spray Bar Kit w/ 5lb. Bottle	NOS16034
Inter-Cooler Spray Bar Only	NOS16035

Bottle Heater

NOS systems are calibrated for optimum performance with a bottle pressure of 900-950 psi. The pressure will change with temperature. Bottle heater kits are available thermostatically or pressure controlled to keep the bottle at correct pressure and suit 10lb or 15lb bottles.

Temperature Controlled Bottle Heater	NOS14164
Pressure Controlled Bottle Heater	NOS14169

Bottle Blankets

Insulating the bottle helps maintain pressure by keeping heat in the bottle when it's cold, or heat out when it's hot outside. The blankets are made of a rugged, easily cleaned Nylon outer shell with insulation. It's also an excellent "dress up" accessory—and perfect for "covering" battle-scarred bottles.

Blanket for 10 lb. Bottle, 7" Diameter **NOS14165**

Fuel Pressure Safety Switches

Maintaining adequate fuel pressure is critical when it comes to nitrous. These fuel pressure safety switches can be used in conjunction with your nitrous systems to safeguard against inadequate fuel pressure.

5 PSI Switch	ED72210
30 PSI Switch	ED72213
50 PSI Switch	ED72214

Pressure Deactivation Switch

This new Pressure Deactivation Switch is adjustable from 3 to 25 psi to disengage the nitrous system once the turbo has achieved the set boost pressure level. Factory pre-set at 7 psi, this switch is ideal for hard-core racing applications to prevent wheel spin and over-boost. Pressure Deactivation Switch (adjustable from 3-25 psi) **ED72209**

HOBB SWITCHES

AeroFlow's hobb switches are a great way to ensure safety of your engine. The 5-7 PSI (.3-.5 BAR)(AF49-2010) can be used to cut ignition or fuel pump when pressure drops saving you from an expensive rebuild. AeroFlow also offer a vacuum hobb switch (AF49-2011) that can turn a vacuum pump on when pressure drops below 17inHG in a road driven car that has a large camshaft with low vacuum to create a better pedal feel.

AF49-2010	Hobb switch (5 PSI (.3 BAR) Open) 1/8" NPT

BILLET BOTTLE MOUNTS

Aeroflow bottle mounts are perfect for nitrous, CO2, fire and fresh air bottles. Can be mounted to weld on tabs, flat surfaces or chassis bars by purchasing the suitable bar mount. Multiple mount sizes ensure you get the best fit for your needs. Manufactured from billet 6061-T6 aluminium; the mounts feature recessed rubber O-rings for a secure scratch free hold with many bottle types. Accurately machined with 2 x 1/4"-20 female threaded holes with 2-5/8" / 66.7mm spacing. Aeroflow's bottle and bar mount system is available in polished or black anodised finishes and sold individually.

AF6500-2000BLK	Black	Suits 2" (50.8mm) dia bar

Standard & Quick Release Bottle Brackets

NOS brackets are designed to securely hold your nitrous bottle at the proper angle for maximum flow through the siphon tube. Standard brackets available made of steel with black vinyl coating, or Nylon. Quick-release aluminium models also available. Steel Bracket for 2 lb. & 2-1/2 lb. Bottles, 4-3/8" Diameter NOS14100

- Steel Brackets for 5 lb. Bottles, 5-1/4" Diameter NOS14110
- Steel Brackets for 10 lb. & 15 lb. Bottles, 7" Diameter NOS14125
- Quick Release Alum Brackets for 10 lb. & 15 lb. Bottles NOS14140

Billet Aluminium Bottle Brackets

The ultimate mount for your NOS bottle. These brackets are precision CNC machined from solid billet aluminium for high strength and great looks. NOS14101 & NOS14106 mount the bottle to the roll cage tubing and NOS14130 is designed to be bolted to the floor.

- Billet Brackets for 10oz Bottle to 1" or 1-1/4" Tube NOS14106
- Billet Bracket for 2lb Bottle to 1-1/4" Tube NOS14101
- Billet Brackets for 10 lb. & 15 lb. Bottles NOS14130

Remote Bottle Openers

The NOS Remote Bottle Controls are the perfect add-on convenience accessory for electronically turning a nitrous bottle on and off. A simple flick of the switch eliminates the chore of opening the trunk to turn your bottle on or off. Operates on 12 volts DC and fits 5 lb. or larger nitrous bottles. All come complete with all necessary hardware, wiring and easy to follow installation instructions.

- Remote Bottle Opener NOS14168
- Solenoid Style Remote Bottle Opener NOS16058

Bottle Components

Standard Medical bottle type nut and -4AN nipple	NOS16100
Bottle gauge adapter, -4AN (swivel type)	NOS16103
Bottle gauge adapter, -6AN (swivel type)	NOS16104
N2O 660 bottle nut wrench	NOS16130
Safety blow-off disc & cap, 5 lb. and larger bottles	NOS16150
10 oz, 1 lb, 2 lb, 2-1/2 lb safety disc (round valve)	NOS16151
10 oz, 1 lb, 2 lb, 2-1/2 lb safety disc (old square valve)	NOS16152
Nitrous bottle valve blow down tube	NOS16160
O-ring, 5 lb. bottle and larger	NOS16200
Bottle nut washer (Teflon), 5 lb. bottles and up	NOS16210
Hi-Flo Bottle Valve for 10 lb. bottle	NOS16140
Mini Hi-Flo for 10 oz. 5/8" bottles	NOS16146
Super Hi-Flo for 10 lb. bottle	NOS16139
Super Hi-Flow Bottle Valve with Blue Face Gauge	NOS16137
Blow Off Safety Disc 2nd& 3rd	NOS16168
Blow Off Valve Adapter -8an 2ndGen	NOS16169

Injector Plate Kits

NOS Injector Plates assure a steady, precise metered flow of nitrous and fuel for reliability backed with years of laboratory research as well as dyno and drag strip testing. NOS Injector Plates are available for those who want to build their own system or upgrade their current nitrous system without having to go through the expense of a new complete system. Unless specified, NOS Injector plates incorporate a low profile, 1/2" thick design and are constructed of solid billet or die cast aluminium with a durable black finish. Included are all applicable gaskets, studs, jets and plumbing.

- Squarebore Cheater Plate Kit NOS12500
- Squarebore Big Shot Plate Kit NOS12510
- Squarebore Super Power Shot Plate Kit NOS12530
- Spreadbore Powershot Plate Kit with NO Jets NOS12820
- Dominator Big Shot Plate Kit NOS12610
- Chev/Holden LS-1 Plate Kit for 78mm Throttle Body NOS13434
- Chev/Holden LS-2 Plate Kit for 90mm Throttle Body NOS13435

Original Fogger & Fogger 2 Nozzles

Both the original Fogger and Fogger 2 nozzles are made from brass and have a black finish. They feature an etched NOS logo and tags for fuel and N2O identification during installation or jet changes, and are available in a choice of standard, 180°, 90° left, or 90° right configurations. The unique flow design of the Fogger 2 provides superior atomization of supplemental fuel as well as more even fuel distribution within the nitrous flow than other nozzles.

- Fogger Nozzle - Brass NOS13700
- Fogger 2 Nozzle - Brass NOS13700B

P.O.D. (Pressure On Demand) Nitrous Pressure Controller

Are you looking for constant Bottle pressure without having to constantly check your gauge and cycle your Bottle heater? The P.O.D. is designed to control a remote Bottle opener along with a Bottle heater with just the push of a button. With features like a cool blue LCD screen for easy monitoring and the ability to hold accurate Bottle pressure with in +/- 5 PSI of the target pressure, the P.O.D. will allow you to get the best performance possible from your nitrous system. The NOS P.O.D. works by monitoring Bottle pressure thru a pressure transducer based on a user set target pressure. The P.O.D. will also automatically cycle the Bottle heater on and off to maintain the preset Bottle pressure. Coupled with the ability to open and close the bottle, the P.O.D. takes all the guesswork out of trying to maintain correct Bottle pressure.

- Features:
- LCD display for easy monitoring
 - Screen displays bottle temperature and pressure
 - Pressure sensor for accurate readings within +/- 5 PSI
 - Programmable target pressure
 - Built in error codes for easy diagnostics (NOS14180)
 - Built in Diagnostics with error codes (NOS14181)
 - Temperature sensor for monitoring actual bottle temperatures
 - Works with any brand bottle opener
 - Current-sensing technology prevents bottle valve damage
- Nitrous Pressure Controller W/ Bottle Heater NOS14181
Nitrous Pressure Controller NOS14180

T12 DRY FOGGER NOZZLE

NOS has developed our first dedicated "DRY" nitrous Fogger nozzles specifically designed for use with multi-stage, direct port, Electronic Fuel Injected applications. Titanium is the basis for this 2 stage dry nozzle. Ideal for multi-stage EFI applications. They can also be combined with the T13, 3-stage nozzles, to get that 5-stage nitrous system going strong. Made from billet Titanium, they are strong as steel and light as aluminium. If you're looking for the ultimate in dry, direct port, technology, this is it.

- Titanium construction for light weight, strength and durability • 0.150" internal orifice
- 2-Stage Direct Port Applications
- For Dry Nitrous Use • Straight (180 Degree) Spray Pattern
- 1/16" NPT Threads • Internal profiling maximizes flow
- Easy upgrade to existing Direct Port nozzles NOS13682

T13 DRY FOGGER NOZZLE

NOS has developed our first dedicated "DRY" nitrous Fogger® nozzles specifically designed for use with multi-stage, direct port, Electronic Fuel Injected applications. Titanium is the basis for this 3 stage dry nozzle. Ideal for the application where 2 stages are just not enough. They can also be combined with the T12, 2-stage nozzles, to get that 5-stage nitrous system going strong. Made from billet Titanium, they are strong as steel and light as aluminium. If you're looking for the ultimate in dry, direct port, technology, this is it.

- Titanium construction for light weight, strength and durability
- 3-Stage Direct Port Applications • For Dry Nitrous Use
- Straight (180 Degree) Spray Pattern • 1/16" NPT Threads
- Internal profiling maximizes flow

DRY FOGGER NOZZLE-SINGLE STAGE

NOS has developed our first dedicated "DRY" nitrous Fogger nozzles specifically designed for use with multi-stage, direct port, Electronic Fuel Injected applications. Stainless Steel is the basis for this single stage dry nozzle. Ideal for single or multi-stage EFI applications. They can also be combined with the T12, T13 or other Fogger nozzles, to build that Multi-stage nitrous system. Made from 303 Stainless Steel, they are strong and corrosion resistant. If you're looking for the ultimate in dry, direct port, technology, this is it.

- 303 Stainless Steel construction for strength and durability
- 1-Stage Direct Port Applications • For Dry Nitrous Use
- Straight (180 Degree) Spray Pattern • 1/16" NPT Threads
- Single, straight flow path for maximum nitrous delivery
- 0.150" internal orifice

Fogger Annular Discharge Racing Nozzles

This new nozzle design produces an even tighter "cone" of nitrous oxide/fuel mixture and provides more precise control of nitrous/fuel ratios throughout the jetting spectrum. It is important to note that the Annular Discharge nozzle shoots out straight, and as such is NOT a direct replacement for the standard Fogger or Fogger 2 nozzles. It is designed to be fitted to the manifold at a very tight angle. Because of the way the Annular Discharge nozzle can be installed, it does not protrude into the intake tract and disrupt flow. The nozzles are made of stainless steel for superior durability.

- Annular Discharge Fogger Nozzle - Stainless Steel NOS13700R

Soft Plume 90° Fogger Nozzles

Ideally suited for many manifold designs including E.F.I., the Soft Plume 90° nozzle effectively disperses the fuel/nitrous mixture in an atomization pattern that is second to none and particularly beneficial to smaller displacement engines. It is very popular in stock applications. The Soft Plume 90° nozzle is made of rugged stainless steel and has a record of outstanding reliability.

- Soft Plume 90° Nozzle - Stainless Steel NOS13716

Fan Spray Nozzles

The NOS line of Fan Spray nozzles are designed to be used as independent nozzles for nitrous and fuel where installation restrictions might make the Fogger Nozzle impractical. Fan Spray nozzles are fully adjustable with a simple jet change and feature injection at a 90° angle.

- Fan Spray Nozzle, Blue - Requires Jet NOS13500

NOSzle EFI Nozzles

If you're looking to do something custom with your Fuel Injected manifold NOS has the answer. The NOSzle is a 3-piece billet aluminium design which is precision machined to channel additional fuel and nitrous and mounts easily under the stock injector. This method of distributing fuel and nitrous takes the danger out of single-nozzle fogger systems and the hassle out of traditional direct port fogger kits. For a high performance EFI motor, the NOSzle is perfect in form and function.

- NOSzle EFI Nitrous Injector NOS08001

JET SPRAY NOZZLE 90°

Jet Spray Nozzle, Adjustable, 3AN 90° Discharge, Requires Jets - Designed to be used as independent nozzles for nitrous and fuel where installation restrictions might make the Fogger Nozzle impractical. For example, the hidden under-the-manifold direct port nitrous system utilizes Jet Spray nozzles due to room restrictions. Jet Spray nozzles have a fixed metering orifice and spray at either straight or 90° angles depending on your needs.

- Adjustable Jet Spray Nozzle
- Fixed metering orifice
- Requires Jets

Pro Race Fogger

"Professional" Nitrous System "NO BOTTLE"

NOS research and development continually strives to push the performance envelope to the next level. The new Pro Race Fogger kits are available with the Soft Plume Fogger or Annular Fogger nozzles. The Professional Pro Race Fogger kits also feature new distribution blocks and solenoids. The distribution blocks are made from billet aluminium and are bright dip anodized in red and blue. They also feature 3/16" compression fittings that can be used with hard line or with poly line. The Pro Race Fogger kits come with a new Pro Race nitrous solenoid that features a new proprietary plunger material that resists swelling, yet seals as good as a Viton® type material. The nitrous Solenoids also feature new blue powder coated housings where the Cheater fuel solenoid features red powder coated housings for easy identification and good looks

Pro Race Fogger "PROFESSIONAL" V8 System NOS04466

Distribution Blocks

NOS Distribution Blocks are precision machined to help distribute balanced amounts of nitrous and fuel to each intake port. All NOS Distribution Blocks use 1/8" NPT "in" and are available with 1/8" NPT or 1/16" NPT "out." Fittings must be ordered separately.

1 in 3 out -1/16" NPT hex block	NOS16705
1 in 4 out 1/8" NPT std. block	NOS16710

Racer's Nitrous And Fuel Pressure Gauges

Designed with the professional in mind, these gauge kits are engineered with greater accuracy and convenience. Each gauge includes a Schrader valve fitting for quick and accurate pressure checks to help maximize your performance run after run. Also features a 1" steel braided hose extension for extra convenience. Fuel pressure gauge measures from 0-30 PSI while the nitrous gauge measures from 0-1500 PSI.

2-1/4" - Racer's Fuel Pressure Gauge	NOS15930
2-1/4" - Racer's Nitrous Pressure Gauge	NOS15931

1/16 NPT Pipe Tap

This tap will be required to install all NOS Fogger nozzles into a manifold. Its somewhat unique size may make it difficult to find locally, but we've got you covered.

1/16 NPT Pipe Tap NOS15990

Fogger Nozzle Mounting Kit

Nozzle Mounting Kit is required for mounting nitrous Fogger nozzles in thin wall tubing or rubber hoses.

Nozzle Mounting Kit NOS17283

Jet Drills

A complete set of numbered drills from .0135 to .098, comes packaged in a durable carrying case for precision drilling of brass flare and funnel jets. A must for the toolbox of every serious tuner. Not for use with precision SS jets.

Jet Drills .0135 to .098 NOS15992

Bottle Nut Wrench

Special wrench designed for quick removal of bottle nut adapters on NOS Hi-Flo & Super Hi-Flo valves without damage. Short handled design prevents over tightening.

Bottle Nut Wrench NOS16130

Cryogenic Refill Pump Station

The NOS Refill Station is designed for performance retailers in the business of refilling nitrous bottles or racers who use a substantial amount of nitrous oxide. It's safe, easy, and quick: taking only a minute or two to accomplish. The Refill Station comes complete with all the plumbing, hoses, gauge, valve, fittings, and bottle stand necessary to transfer nitrous from a mother cylinder to the receiving bottle instantly. It runs off your shop's compressed air and requires no electrical hook-up. Also required is an air compressor, scale, mother bottle and water separator.

Cryogenic Refill Pump Station with Stand NOS14251

Assembled Plate Systems

These assembled systems feature the Patented Nitrous Pro-Flow cross-bar plate with its exclusive stainless steel spray bars with "Fan Spray Tube Technology", and optional burst panel protection. Systems are assembled using our high flow fuel solenoids, high flow nitrous solenoids, nitrous purge solenoid, patent pending solenoid mounting bracket, and stainless hard lines from the solenoids to the plate. Completely plumbed and wired into 6 prong weather pack connectors. Stainless steel jet pack and supporting weather pack connectors are included along with detailed installation and operating instructions. Complete your system with a 10lb or 15lb Completion Kit (available separately). Single Stage Systems 100-500HP

Description	Part No.
4150 Carb, 100-500hp No Burst Panels	WI309207
Single Stage Systems 350-600+HP	
4150 Carb, 350-600+hp No Burst Panels	WI309201
4500 Carb, 350-600+hp No Burst Panels	WI309541

SINGLE STAGE DIRECT PORT NITROUS SYSTEM

Nitrous Pro Flow 8 Cylinder Direct Port systems offer maximum horsepower capability. At the heart of these systems is the Nitrous Pro Flow V-Force nozzle, providing optimized mixture quality and balanced cylinder to cylinder distribution. Included in these systems are our Equalizer Distribution Blocks, which provide the best possible distribution of nitrous and fuel while maximizing flow and preventing a phase change in the nitrous oxide. Also included in our systems are high flow fuel solenoids, high flow nitrous solenoids, nitrous purge solenoid, and stainless steel hard lines.

Kit includes:
 • Jets for (5) HP levels
 • Weatherpack connectors for easy & clean wiring
 • All necessary fittings for installation on a manifold
 • Stainless steel pre-flared 3/16" Lines
 • Kit does not include bottle, feed line, or bottle brackets
Single Stage Direct Port System 150-500HP WI308101
Direct Port Bottom Out Nozzle System 150-500HP WI308111

Manifold Pressure Relief Valve

This spring loaded pressure relief valve for sheet metal intakes features a 1.25" hole that allows for the venting of excessive pressure whether it is from a nitrous backfire or a naturally aspirated hiccup. The part is excellent insurance to protect expensive carburetors, throttle bodies and intake manifolds. The parts are fully CNC machined, anodized and o-ringed to seal to the manifold.

Manifold Pressure Relief Valve Set (Pair) **WI333222**
 Manifold Pressure Relief Valve (Each) **WI333221**

Sheet Metal Burst Panels

These large diameter burst panel kits are typically installed in nitrous oxide injected applications in sheet metal manifolds and where space will not permit use of our Manifold Pressure Relief Valve. These panels also work in blown applications. The kits include 2 burst panels, 2 retention rings and stainless steel mounting screws. Nitrous Pro Flow burst panel kits incorporate our replaceable burst panels that will vent pressure between 75-90 psi, for backfire protection.

Burst Panel Kit for Sheet Metal Intakes (Pair) **WI333202**
 Replacement Burst Panels (Pair) **WI333202**
 Replacement Burst Panel (Each) **WI333201**
 Low Pressure Burst Panel Kit (Pair) **WI333211**
 Replacement Low Pressure Burst Panels (Pair) **WI333212**

Burst Panel Replacement Parts

Description
 Replacement Burst Panel Set (Qty. 6) **Part No. WI332006**
 Replacement Burst Panel Retention Ring **WI331110**
 Aluminium Burst Panel Hex Tool **WI910101**
 High Flow Filter/Line Adapter

Nitrous Pro Flow's unique Patent Pending bottle mounted high flow filter replaces the bottle adapter fitting and in-line filter for a cleaner, more efficient package with fewer connections. Our filter incorporates a stainless steel body and a cleanable stainless steel mesh filter element. Fits all standard nitrous bottle valves and available in -4 or -6 feed line sizes.

Description
 -4AN Bottle Mounted Filter/Line Adapter **Part No. WI368014**
 -6AN Bottle Mounted Filter/Line Adapter **WI368016**
 Replacement Filter & Teflon Washer Kit **WI307801**

NITROUS PROFLOW BOTTLE

The Nitrous Pro-Flow bottle with its patent pending valve and tube assembly flows 360 lb/hr more than the competitor's high flow valve and tube! Independent testing showed a 20hp in-crase by switching bottles alone. The unique Radiused inlet and large diameter pick-up tube design prevents separation in the flow of the nitrous which can cause a phase change and a re-sulting loss in flow. The valve assembly is a specially modified version of the industry standard. Nitrous Pro-Flow lightweight aluminum bottles are powder coated black and are available in 10lb and 15lb sizes. **10lb Nitrous Bottle WI307210**

SYSTEM COMPLETION KIT

System Completion Kits include a Nitrous Pro Flow bottle with a modified Ultra high flow valve and pick-up tube assembly. The unique Patent Pending Radiused inlet and large diameter pick-up tube design prevents separation in the flow of the nitrous which can cause a phase change and a resulting loss in flow. The Nitrous Pro Flow valve/tube combination flows 360 lb/hr more than the competition. As a result, independent testing has shown a 20hp increase by simply switching to the Nitrous Pro Flow bottle. A nitrous pressure gauge, high efficiency nitrous filter / adapter fitting (eliminates one connection), 16 ft of feet line, and heavy-duty quick release bottle mounting brackets are also included in the kit. **10lb Bottle Completion Kit WI307510**

NITROUS SYSTEMS

Perimeter Plate Nitrous Systems

Our revolutionary Perimetre Injection Technology provides optimum nitrous and fuel atomisation for maximum horsepower. The ZEX Perimetre Plate Nitrous System is a complete kit that provides the optimum spray efficiency with nitrous and fuel outlets placed at 12 injection points around the perimeter of the intake manifold opening. This provides optimum distribution of nitrous oxide and fuel and delivers the most horsepower possible from your kit. Through an ingenious cooling technology called Cryo-Sync, super chilled nitrous is injected through the ZEX plate before being injected into the engine. This rapidly cools the carburettor and intake manifold, generating even greater power. The ZEX Perimetre Plate Nitrous System is tuneable from 100 to 300 horsepower and is available for both square flange and Dominator, four-barrel carburetted applications.

• Adjustable from 100 to 300 horsepower
 • Nitrous and fuel injected at 12 points around intake plenum
 • Cryo-Sync Technology cools the carburettor and manifold
 • Available for both square flange & Dominator applications

Description
 Square Flange Perimetre Plate System **Part No. ZEX8240B**
 Square Flange Perimetre Plate System - Blackout **ZEX82040B**
 Dominator Perimetre Plate System **ZEX82048**

Ford Mustang GT Wet Nitrous System 2011-On

ZEX engineers have custom designed the first plug-and-play nitrous system on the market specifically designed for the 2011-Current Ford Mustang GT 5.0L. This system is specifically tailored to the Mustang's new 5.0L V8 engine. ZEX engineers not only tuned the kit to add 75-175 additional horsepower, but also made the installation easy and ensured engine safety at the same time.

- Fully adjustable from 75-175 HP w/ supplied tuning jets; Perfect for mild to wild performance
- A complete wet nitrous system; Everything is included for a safe, proper installation
- Works safely on stock or modified engines; Naturally aspirated, turbo or super charged
- All major components are factory pre-assembled inside the Nitrous Management Unit; Easy, plug & play two-hour installation

Description
 Ford Mustang 2011-On Wet System **Part No. ZEX82390**
 Ford Mustang 2011-On Wet System - Black **ZEX82390B**

LS SERIES PERIMETER PLATE BLACKOUT NITROUS SYSTEM

ZEX™ has a complete, race ready perimeter plate system for LS applications and is a direct fit for FAST™ LSX™/LSXR™/LSXRT™ 102mm Intake Manifolds. Adjustable from 100-250 horsepower, the system provides optimum spray efficiency and fuel distribution with nitrous and fuel outlets placed at 12 injection points around the perimeter of the intake manifold's inlet.

- Adjustable From 100 to 250 Horsepower
- Complete Wet System; Includes Everything for A Safe, Proper Installation
- Works Safely on Both Stock & Modified Vehicles

GM LS Blackout Perimeter Plate Nitrous Kit ZEX8195
 (Electronic Throttle Body)

Race Perimeter Plate Nitrous Systems

The ZEX Race Perimeter Plate Nitrous System is for the serious competitor who wants only the highest performing system on his or her race car. This race kit is fully adjustable between 100 and 450 horsepower. Featuring ZEX Perimetre Injection Technology, nitrous is injected directly into the intake manifold plenum in a 360-degree ring. This smoothes out the distribution and results in a consistent and safe power delivery. The system also benefits from Cryo-Sync Technology to help lower the temperature of the carb and manifold surfaces, creating a cooler, denser nitrous/fuel/air charge entering the engine. The system includes the perimeter plate, a 10 lb. nitrous bottle with high-flow race valve, -6AN feed lines and fuel and nitrous solenoids.

- Add anywhere from 100 to 450 horsepower
- Nitrous bottles available in 10 or 15 lb. size
- Both square flange & Dominator applications available

Description
 Square Flange Race Perimetre Plate System **Part No. ZEX82311**
 Square Flange Perimeter Plate System - Black **ZEX82040**
 Dominator Race Perimeter Plate System **ZEX82312**

SQUARE FLANGE

DUAL PERIMETRE PLATE NITROUS SYSTEM

Until recently, nitrous systems for dual 4-barrel intake manifolds have consisted of a couple of plates bolted under the carburetors, equipped with crude brass spray bars to inject nitrous and fuel into the intake charge. The ZEX™ system has nitrous and fuel outlets placed at 24 injection points around the perimeter of the intake manifold's plenum. This distributes nitrous oxide and fuel perfectly and guarantees the most horsepower possible. With another ZEX™ developed technology called Cryo-Sync™, super chilled nitrous is injected through the ZEX™ plates to cool the carbs and intake before being injected into the engine. Finally, ZEX™ Airflow Enhancement Technology creates an intense low pressure area under the carbs while you spray, helping to smooth and increase the airflow into the engine.

Perimeter Plate Conversion Kits

Update your obsolete spray-bar type nitrous system with one of our Perimeter Plate Conversion Kits. This cost effective and easy-to install alternative immediately delivers all the benefits of the ZEX Perimeter Plate Nitrous System without having to purchase an entirely new nitrous kit. The conversion kit includes the perimeter plate, fitted carburettor gaskets and jet conversion chart.

- Delivers even distribution for maximum power & engine safety
- Available for square flange & Dominator applications

Universal EFI Wet Nitrous Systems

The ZEX Universal Wet Nitrous Systems are universal kits that are designed to work safely on stock type engines but are also engineered to perform flawlessly on highly modified turbo and supercharged combinations. It is a simple, 2 hour installation and the kits include proper tuning jets, a range of fuel tap fittings, solenoids, filters and activation electronics that are factory pre-assembled in the Nitrous Management Unit. Active Fuel Control monitors bottle pressure & adds or subtracts enrichment fuel for maximum engine safety & power.

- 4-6 cylinder kit includes jets for adding 55-75 horsepower
- V8 kit includes jets for adding 75-125 horsepower
- Designed for stock engines but will also work on modified engines

Race EFI Nitrous System

For serious race applications, the ZEX Race EFI Nitrous System is the best choice. Featuring Fuel Shear Technology, enrichment fuel is injected directly into the centre of the nitrous plume, yielding total and even fuel atomisation. Tuneable from 100-250 hp, the race kit features other important ZEX features: Active Fuel Control to adjust fuel enrichment with fluctuations in bottle pressure and the patented ZEX electronic TPS switch for nitrous activation at wide-open throttle.

- Delivers 100-250 horsepower increase
- Features: Active Fuel Control, Fuel Shear Technology & TPS switch
- Designed for serious street/strip & race applications

Dual Stage EFI Nitrous System

The ZEX Dual Stage EFI Nitrous System is more effective than a typical single stage system because it gradually adds the nitrous power in two separately controlled stages instead of one big "hit" to give you a faster quarter mile ET. The first nitrous stage is activated automatically when you go to wide-open throttle via the TPS-mounted switch. The second stage activates when you press an additional activation push-button. It also includes jets for adding an extra 50-300 horsepower and is a complete kit, right down to the wire ties. Features Active Fuel Control which adjusts fuel enrichment in accordance with bottle pressure so you'll never run too rich or too lean and Fuel Shear Technology that injects enrichment fuel directly into nitrous plume for better atomisation.

- Tuneable from 50-300 additional horsepower
- Two separate power stages for maximum traction control

Description

Dual Stage EFI Nitrous System

Part No.
ZEX82065

Turbo Nitrous System

The ZEX Turbo Nitrous System is specifically designed to help spool-up engines equipped with big turbos. This kit has all of the same great features as our standard EFI wet nitrous systems but includes the addition of a fully adjustable boost switch, which allows you to spray a small shot of nitrous to help spool-up the turbo as soon as a certain level of turbo boost is reached, the nitrous automatically shuts off.

- Adjustable from 25 to 75 horsepower
- Eliminates boost lag for instant turbo power
- Shuts off nitrous once the turbo has spooled-up

Description

Turbo Nitrous System

Part No.
ZEX82218

V8 EFI Direct Port Nitrous Systems

A complete, easy-to-install direct port nitrous system for any V8 EFI engine. The kit adds 75 to 300 horsepower, uses our self-adjusting, patented injector nozzles, and activates nitrous at wide-open throttle using our patented throttle position sensor switch technology. The kit includes everything necessary, including a bottle, brackets, solenoids and plumbing and electrical connectors, making it a snap to install on virtually any V8 EFI engine.

- Adjustable from 75 to 300 horsepower
- Uses distribution flex-lines for an easy fit on your intake manifold

Description

Big Block V8 EFI Direct Port Nitrous System

Part No.
ZEX82062
ZEX82063

4 Cylinder EFI Direct Port Nitrous System

The ZEX 4 Cylinder EFI Direct Port Nitrous System is unique in that it comes with pre-made nozzle flex lines to make installation a snap, so you don't have to spend hours cutting and bending traditional hard-lines. This kit also features dual stage jet technology uses one jet in the distribution block and one jet in the injector nozzle to offer finer tuning adjustments & hp level changes. The kit adds 50 to 200 horsepower and uses our patented fuel adjusting nitrous nozzle.

- Adjustable from 50 to 200 horsepower
- Perfect for fully built competition engines
- Uses one injector nozzle per cylinder for perfect distribution

LSX Manifold Direct Port Nitrous System

The ZEX LSX Manifold Direct Port Nitrous System is the only custom made system for the FAST LSX Intake Manifold. Designed to add from 75 to 300 hp, the kit uses a patented injector nozzle that delivers optimum nitrous and fuel atomisation and activates at wide-open throttle using our patented throttle position sensor technology. This kit includes 10 lb. bottle, brackets, nitrous & fuel solenoids, electronic throttle activation switch, and all plumbing & electrical connectors including custom made distribution flex-lines that give it a perfect fit on the popular FAST LSX Intake Manifold.

- Adds anywhere from 75-300 horsepower
- Perfect for FAST LSX Intake Manifold

ZEX82032

GEN-III Nitrous System

The GEN-III Nitrous System is specifically fuel tuned for GM's LS1, LS2, LS6 and LS7 engines. These engines use higher fuel pressures (58psi) and have noticeable power increases when custom jetted. In addition to optimised jet tuning, this kit also includes an extra long 18 foot nitrous feed line from the bottle.

- Adjustable from 75 to 175 horsepower
- Extra long nitrous feed line for easy installation
- Uses the vehicle's TPS sensor to activate only at wide-open throttle

GEN-III High Output Nitrous System

Our GEN-III High Output Kit is ideal for any GM LSX-powered vehicle looking for a serious power upgrade from the standard ZEX system. This kit features giant, high-flow nitrous and fuel solenoids and -4AN nozzle feed lines. All of this high-flow hardware allows you to spray from 100-250 hp. Also included with this ZEX system is Fuel Shear Technology, which injects enrichment fuel directly in the nitrous plume for better atomisation.

- Allows you to spray from 100-250 horsepower
- Enrichment fuel injected into nitrous plume for better atomisation
- Designed specifically for GM Gen-III engines

Description

LSX High Output Nitrous System

Part No.
ZEX82087

Dry Nitrous Systems

ZEX Dry Nitrous Systems incorporate the patented Active Fuel Control which monitors the nitrous bottle pressure and adjusts fuel enrichment to achieve the perfect mixture. This ensures your engine will never run too rich or too lean when you engage the nitrous system. ZEX nitrous activates at wide-open throttle using an electronic switch that monitors your engine's TPS sensor. The design ensures that your nitrous is engaged at the perfect wide-open throttle position every time. A complete "Dry" system - everything is included for a safe, proper installation and all major components are factory pre-assembled inside the Nitrous Management Unit.

NITROUS BOTTLE BRACKETS

ZEX Bottle Brackets are a durable and easy to use solution for mounting any 10 lb. or 15 lb. nitrous bottle. These brackets feature rubber strap covers that protect your bottle's finish from damage and have convenient to use wing nuts so that no tools are required to remove the bottle.

- Durable Stainless-Steel Construction
- Rubber Strap Covers Protect the Bottle's Finish
- Convenient Wing Nuts Eliminate the Need for Tools When Removing the Bottle

Zex 10 lb or 15 lb Nitrous Bottle Brackets ZEX82013

Liquid Filled Nitrous Gauges

Serious racers know that optimum nitrous system performance is generated when nitrous bottle pressure is maintained between 900-1000 psi. The gauge offered in this kit is not only accurate, but the liquid filling helps protect the gauge's delicate internal components from severe vibration, commonly found in race cars and serious street/strip type vehicles. Includes inline adapter for -4AN or -6AN lines.

Liquid Filled Nitrous Gauge 0-1500psi, -4AN **ZEX82341**
Liquid Filled Nitrous Gauge 0-1500psi, -6AN **ZEX82342**

LED Purge Kits

Ensures instant nitrous power by clearing delivery lines of vapour. Includes complete nitrous purge kit and a ZEX Purge-Cloud LED Kit (Purge-Cloud LED Kit available for individual purchase). LED light is available in red, green or blue and is powerful enough to illuminate a 15ft. nitrous cloud.

Purge-Cloud Light Kit - Blue **ZEX82170B**

Programmable TPS Switch

ZEX patented TPS activation circuit placed in an easy-to-install, standalone unit allows anyone with non-ZEX nitrous system to activate nitrous at wide-open throttle.

- Fully self-programmable
- Perfect for throttle-by-wire vehicles

Programmable TPS Switch ZEX82108

Traction Control

Window Switch

Allows user to select the rpm range that nitrous system can operate in, both lower and upper rpm limits. Allows you to select gear in which nitrous starts spraying. Fully programmable and adjustable up to 20,000 RPM Perfect for traction limited, street tyre type vehicles where spraying too soon results in loss of traction.

Traction Control Window Switch ZEX82085

Fuel Flow Check Tool

For maximum nitrous power and engine safety, nitrous kit manufacturers tune their systems with various jet sizes and fuel pressures. While installing the recommended jet is simple, correctly setting your nitrous system's fuel pressure can be a real challenge if you don't have the right tool. ZEX™ created the Fuel Flow Check Tool just for this purpose. By temporarily attaching it to your fuel solenoid's feed line, you can simulate the normal fuel flow your nitrous system sees when it is activated. Once your fuel system is in this "flowing" condition, you can easily and accurately adjust your fuel pressure regulator. Once the regulator is set, you simply remove the tool, reconnect your fuel line to the solenoid and you are all set for the track. The ZEX™ Fuel Flow Check Tool includes a laboratory quality, liquid filled, 0-15psi gauge, -4AN and -6AN adapters, calibration jets and all necessary fittings for easy assembly. You simply won't find a more accurate or easy-to-use tuning tool for your nitrous system. **ZEX82244**

GM LSA SUPERCHARGER ACCESSORIES

GM LSA BLOWER HUB & PULLEYS

Increase the horsepower of your LSA engine with these blower pulleys. Available in 60.96mm (2.4") and 64.7mm (2.55") with matching blower hub sold separately. Replace the factory pulley with the blower hub, then you can easily install either the 60.96mm (2.4") or 64.7mm (2.55") blower pulley depending on the boost you want to make. These pulleys have a textured anti-slip finish to enhance belt grip. 64.7mm (2.55") pulley gives up to 2psi over stock pulley, 60.96mm (2.4") pulley gives up to 4psi over stock pulley. These have been tested with factory size crank pulley diameter.

Blower hub coupler
60.96mm (2.4") blower pulley **AF64-2126**
64.7mm (2.55") blower pulley **AF64-2127**
AF64-2128

GM LSA SUPERCHARGER SPACERS

Aeroflow Performance supercharger spacers to suit the GM LSA. This spacer sits underneath the stock supercharger and raises it by 10mm (25/64") to provide better airflow to the rear cylinder banks. It removes the restriction in airflow which allows more air flow thus more horsepower to be gained along with the ability to reduce intake temperatures. Now made form high-temp PTFE with rubber o-ring seals to withstand higher intake temperatures caused by extreme use.

AF1850-1008 GM LSA Supercharger Spacers
AF59-1850 Replacement GM LSA spacer O-Ring
AF59-1851 Replacement GM LSA spacer square rubber gasket

GM LSA GASKETS

The Aeroflow Performance LSA Intake Gasket kit includes one set of intake gaskets, one throttle body gasket, water pump gaskets and both supercharger gaskets.

AF1850-1010 LSA 6 piece intake gasket set
AF1850-1011 LSA / LS3 intake gaskets only

GM LSA / LS3 INTAKE SPACERS

Aeroflow Performance has designed the thermo plastic intake spacers. These are designed to suit your GM LS3 style heads allowing you to bolt on the GM LSA supercharger or simply can be bolted on to your GM LSA engine. Being a thermo plastic material gives it the added benefit of reduced heat transfer as the supercharger is no longer sitting directly on top of the cylinder but rather 10mm (25/64") above. * Note this will raise the blower assembly up 10mm so be sure to check for bonnet clearance for conversion cars.

AF1850-1005 GM LSA / LS3 INTAKE SPACERS
AF59-1850 Replacement GM LSA spacer O-Ring
AF59-1851 Replacement GM LSA spacer square rubber gasket

GM LS SERIES INTAKE ADAPTERS

Aeroflow Performance billet 6061 aluminium intake adapters allow the end user to choose adapters to suit either cathedral or rectangle port cylinder heads. One adapter allows you to bolt up any cathedral port intake or supercharger to your rectangle port heads. The other allows you to bolt up any rectangle port intake or supercharger to your cathedral port heads. This means you can simply adapt an LSA blower or late model manifold to your early heads. Kit comes complete O-Rings for a sure seal. If bolting up an LSA intake you require M6x1 x 70mm UHL bolts. When running a car intake manifold you require M6 x 130mm UHL bolts and when running a truck intake manifold you require M6 x 90mm UHL length bolts. Adapters are 12.7mm (1/2") thick.

AF1850-1007 Rectangle to Cathedral Port Heads
AF1850-1009 Cathedral to Rectangle Port Heads

GM LSA ISOLATOR COUPLER

Aeroflow Performance LSA isolator coupler installs as a direct replacement for the original. This is specifically designed to handle high boost and high load applications where the factory one can fail.

AF64-2129

GM LSA MAP

SENSOR DELETE

This Aeroflow Performance LSA Supercharger MAP sensor block off plate is designed to allow you to block off either the 2nd MAP sensor, or the 2nd IAT sensor on your LSA supercharger lid. The sealing plug is CNC machined from billet aluminium and anodised in a black finish. This delete plate comes with O-ring & bolt.

AF64-2199

GM LSA VACUUM

DELETE PLUGS

These Aeroflow Performance LSA Supercharger vacuum port block off plates are a great way to rid the engine bay of the unnecessary vacuum lines on your LSA blower during conversions. These sealing plugs are CNC machined from billet aluminium and anodised in a black finish. These pair of plugs come with O-rings and bolts.

AF64-2198

SUPERCHARGERS & SUPERCHARGER KITS

Edelbrock

FORD MUSTANG E-FORCE SUPERCHARGERS

These Edelbrock E-Force Supercharger systems will boost the performance of your Mustang to impressive levels without changing the daily driving characteristics. These Mustang Supercharger systems are exclusively designed to provide instant, reliable and safe horsepower for a stock Mustang with low boost for minimum stress on the engine. They feature minimum air restriction in and out of the supercharger, along with individual long intake runners for maximum low end torque for great off throttle performance. E-Force superchargers provide the most power at the lowest amount of boost, resulting in performance that is safe to operate on a completely stock engine.

WEIAND

142 Pro-Street Supercharger Kits

Weiland's Pro-Street supercharger kits are engineered to give SB Chevy's 25% to 40% more power while maintaining outstanding street ability. All Weiland 142 blowers feature 100% new CNC machined parts, including new thick wall cases & rotors to eliminate high RPM flex and provide maximum reliability. All superchargers are built in Weiland's state of the art supercharger manufacturing cell and each supercharger is 100% boost tested to help you squeeze the maximum power and efficiency out of your supercharger.

- * Develop 400 to 450+ horsepower
- * Low profile design for bonnet clearance
- * Available for standard & aftermarket heads
- * Increases torque for heavy cars and towing applications
- * Great power adder for low compression crate engines
- * Available polished or unpolished
- * Full-time power every time you hit the throttle with no lag

Application	Satin	Polished
6-Rib Kit S/B Chev Long	WM6500-1	WM6510-1
6-Rib Kit S/B Chev Short	WM6503-1	WM6508-1
6-Rib Kit S/B Chev Vortec Long	WM6542-1	WM6543-1

144 Low-Profile Supercharger Kits

The 144 system is a practical addition to any performance or tow vehicle where hood clearance and/or the use of a long water pump and three v-belts are required. It features Teflon tipped rotors for tight rotor to case tolerances and will fit under most stock hoods on trucks and muscle cars (may require a small cowl induction hood for some applications). Weiland 144 blowers feature 100% new CNC machined parts including new thick-wall cases & rotors and are 100% boost tested to help you squeeze the maximum power and efficiency out of your supercharger!

- * Develop 400 to 450+ horsepower
- * Low profile design for bonnet clearance
- * Available for standard & aftermarket heads
- * Increases torque for heavy cars and towing applications
- * Great power adder for low compression crate engines
- * Available polished or unpolished
- * Full-time power every time you hit the throttle with no lag

10-Rib Kit S/B Chev Long	WM7740-1	WM7750-1

174 Pro-Street Supercharger Kits

Want instant, full time power from your Ford powered street machine? Weiland's Pro-Street supercharger kits are engineered to give 25% to 40% more power while maintaining outstanding street ability. Engineered to fit 289/302 Fords (or stroker versions based on the 8.200" deck height), this kit will transform your mellow street engine into a monster with incredible torque and top end power. It is designed to work in conjunction with stock type accessory drives and is available in Satin or Polished finishes. This 174 low profile blower features Teflon tipped rotors for tight rotor to case tolerances.

- * Develop 400 to 450+ horsepower out of a mild 302 Ford
- * Fits all small block Fords with 8.200" deck heights
- * Substantial increase in torque unmatched by centrifugal superchargers
- * Available polished or unpolished
- * Full-time power every time you hit the throttle with no lag

6-71 Series Supercharger Kits

HORSEPOWER - Weiland's 6-71 kits are the ultimate statement of power and looks. These supercharger kits are designed to generate 50%+ more horsepower and torque across the RPM range. Weiland's 6-71 blower kits are equipped with exclusive two lobe rotors for maximum boost at lower RPMs and feature all new construction including rotors, case, end-plates, manifold and snout. Billet belt tensioner components and V-belt pulleys round out the package to give you everything necessary for installation. Kits are engineered to produce 10-12 lbs of boost on small blocks and 5-7 lbs of boost on big blocks but are a simple pulley change away from hard-core tuning. All 6-71 kits are available with either the traditional 1/2" pitch or the extra tough 8mm belt configurations to suit your needs. In Satin or polished finishes.

- * 175-275+ Horsepower increases
- * Maximum visual appeal
- * Available for Small and Big Block Chev's
- * Available with traditional 1/2" pitch or 8mm belt drive
- * Full-time power every time you hit the throttle with no lag

BLOWER KITS DO NOT INCLUDE SUPERCHARGERS. THEY ARE SOLD SEPERATELY

GM LS SERIES BLOWER KITS - CARBURETTED

These manifold and blower drive kits for GM LS series engines suit carburetors and bolt on 4150 or injector hat style EFI systems. Includes 2-piece billet aluminium manifold, blower snout, dual carb adapter, idler pulley, idler bracket, blower pulley, crank pulley, adapter hub, blower belt, gaskets and hardware. Requires AT1917246 balancer and AT1916993 crank fixture kit and a standard series 6-71 to 14-71 supercharger (not front offset). Available in polished aluminium or black anodized finish.

Application	Polished	Black
LS Cathedral Port, Carburetted	B2631	B2631-BLK
LS Rectangle Port, Carburetted	B2633	B2633-BLK
GM LS1/LS2/LS6 Cathedral Port, Carburetted Dual Sideways 4150	B2631	B2631-BLK
GM LS3 Rectangle Port, Carburetted Dual Sideways 4150	B2633	B2633-BLK

LS Cathedral Port, EFI	B2632	B2632-BLK
LS Rectangle Port, EFI	B2634	B2634-BLK

GM LS SERIES BLOWER KITS - EFI

These manifold and blower drive kits for GM LS series engines suit multi-point EFI systems. Kit include 2-piece billet aluminium manifold, blower snout, dual 4150 throttle body adapter, billet lower fuel rails, idler pulley, idler bracket, blower pulley, crank pulley, adapter hub, blower belt, gaskets and hardware. Requires ATI 917246 balancer and 916993 crank fixture kit, 2 x 4150 throttle bodies, upper fuel rails and a standard series 6-71 to 14-71 supercharger (not front offset).

Application	Polished	Black
-------------	----------	-------

SB CHEVY 6V-71 BLOWER DRIVE KITS

This manifold and blower drive kits suit the smaller 6V-71 series superchargers and are perfect for 327-350 cubic inch small block Chevy street engines. Includes manifold, blower snout, dual 4150 carb adapter, idler pulley, idler bracket, blower & crank pulleys, blower belt, gaskets and hardware. Available in polished aluminium or black anodized finish. Use with 6V-71 series superchargers (sold separately).

Application	Polished	Black
SBC Standard Port, 1V Accessory	B2600	B2600-BLK
SBC Standard Port, 1V Accessory	B2601	B2601-BLK

SBC Large Port, 6 Rib Accessory	B2607	B2607-BLK

SB CHEVY 6-71 BLOWER DRIVE KITS

These manifold and blower drive kits suit standard 6-71 series blowers. Kits include manifold, blower snout, dual 4150 carb adapter, idler pulley, idler bracket, blower & crank pulleys, blower belt, gaskets and hardware. Available in polished aluminium or black anodized finish. Use with standard 6-71 series superchargers (sold separately).

Application	Polished	Black
SBC Standard Port, 1V Accessory	B2610	B2610-BLK
SBC Standard Port, 2V Accessory	B2611	B2611-BLK
SBC Standard Port, 6 Rib Accessory	B2612	B2612-BLK

SBC Large Port, 6 Rib Accessory	B2617	B2617-BLK

SB CHEVY 8-71 FRONT OFFSET BLOWER KITS:

These manifold and blower drive kits suit 8-71 series blowers for high output and large cubic inch small block Chevys. Kits include manifold, blower snout, dual 4150 carb adapter, idler pulley, idler bracket, blower & crank pulleys, blower belt, gaskets and hardware. Available in polished aluminium or black anodized finish.

Use with front offset 8-71 series superchargers (sold separately).

Application	Polished	Black
SBC Standard Port, 2V Accessory	B2621	B2621-BLK
SBC Standard Port, 6 Rib Accessory	B2622	B2622-BLK

192 & 250 CID

Low Profile

Superchargers

Only The Blower Shop's Low Profile Superchargers fill today's need for high quality, low profile blowers that fit within most engine compartments and suit the needs of today's high performance vehicles. The TBS 192 and 250 CID low profile superchargers offer these advantages:

- 100% CNC machined case made from 6061-T6 aluminium bar stock (stronger than a casting and polished to a high luster with no porosity) • Billet aluminium bearing plates, front cover, and snout precision fit to exact tolerances • Input shaft and coupler of heat-treated 4340 material for added strength and durability
 - Machined to accept standard 6-71 style carburettor adapters (250 CID only) • 2-lobe rotor design for high efficiency under 10 psi of boost • Extruded rotors CAD designed and CNC machined to tight tolerances • Teflon O.D strip for better sealing and increased efficiency • Heat-treated helical gears to keep rotors in perfect time and precision ground for smooth, quiet, long term operation
 - For maximum grip and wear protection, 16 rib serpentine belt system with black hard-anodized pulleys
 - 250 CID kits are available for standard deck and tall deck
- 192 S/B Chev kit 2V Standard Port** **B3110**
192 S/B Chev kit 2V Street Large Port **B3112**
250 B/B Chev kit 2V Standard * **B3120**
250 B/B Chev kit 2V Tall * **B3125**
 * Note: Carburettor Adapters and Top Drive Pulleys sold separately

BILLET BLOWER EFI INJECTOR CASE

TBS now offers a unique blower case tailored directly to EFI.

This 6-71 & 8-71

Billet Aluminium

Supercharger features

drilled EFI ports in the side

of the blower case.

This increases performance as

air flows better and more efficiently

when it is dry. By injecting fuel mid-way in the case, it allows air

to fill the rotor cavity at a higher velocity, which increases volume

and boost capabilities while also keeping the blower cool.

• Machined from 6061 Billet Aluminium

• Polished, but can be anodized black or an additional cost.

• Designed to work in conjunction with Bosch EV-1 Style Injectors

(Shown above in photo #3)

• High Helix 120 Degree Rotors

• 6 Point Teflon Strips

BDSBL-8711-0000

BDSBL-8712-0000

BLOWERS 6-71 & 8-71

All BDS blowers are assembled by hand with heavy duty competition components. The same parts used to assemble our racing blowers are the same parts used in all of our blowers. Heavy duty bearings and special double lipped Teflon seals are used to ensure long life. The heavy duty bearing plates and cases are machined to precise specifications that produce the most efficient blower possible. All BDS blowers are fully show polished as a standard feature.

BDSGC-9561

BLOWER SNOOT ASSEMBLY & COUPLERS

BDS high performance street blower drive components are designed with the toughness and durability required for the most demanding of blower drive systems. The drive snouts utilize a heavy-duty double ball bearing and heavy-duty oil seal. The snout housing is made from aircraft billet aluminium and the snout shaft is made from 4100 series heat treated steel. The 1-1/8" -48 male spline of the shaft connects to the blower gear coupler bolted to the face of the blower gear. Designed to bolt directly to a stock style blower gear cover, the same snouts are available in three standard lengths and combined with our pulley spacers, there is a wide variety of drive spacing available to accommodate almost any application.

Blower Manifolds

To increase performance through even distribution of air and fuel to each cylinder, The Blower Shop has developed its own intake manifolds for small and big block Chev applications. TBS manifolds include the following:

- Provisions for thermostat
- Raised floor with large radius on ports for better air flow, Increased performance and even fuel distribution
- Tall deck uses standard deck distributor height
- Available in Satin or Polished finish

BDSDK-3121

BLOWER DRIVE KITS 6-71 & 8-71

BDS Drive Kits are manufactured from aircraft aluminium and steel alloys to ensure maximum performance and durability. A number of options are available to customize your drive kit for your specific requirements. Accessory vee grooves can be provided to drive the water pump, alternator, power steering and air conditioning accessories. All drive kits utilize a steel crank hub for harmonic balancer to replace the stock factory harmonic balancer.

Competition Manifolds
 TBS competition manifolds are suitable for methanol injected drag engines and have no provision for a thermostat. They are pre-drilled for port injection nozzles and are supplied with gaskets, aluminium stud & nut kit and burst panel frame. The burst panel insert, part no. B2585 must be purchased separately.

SB Chev Large Port Manifold - Satin B2536

SUPERCHARGER COOLERS

TBS Intercooler
 The Blower Shop's Intercooler was developed because of the screaming need to reduce intake temperatures in high-performance marine power plants. To assure optimum performance and durability, TBS designed and built our system exclusively from billet aluminium and gave it a fin count of 19 per inch on the air side and 16 on the water side. After TBS coats the core with exclusive "Chromacoat" protective coating for added beauty and long life, we pressure test it to 100 pounds per square inch. We then include a billet end tank with 2 integral 3/4" NPT fittings for added strength and increased water flow.
TBS Intercooler for 6-71 to 14-71 Blowers B5050

Ford Mustang 2015-17 Supercharger Coolant Tank
 • Direct bolt-in replacement for the tank that comes in the Ford Performance Part No. M-6066-M8627 supercharger kit or Roush Performance Part Nos. 421542, 421823 & 422001 supercharger kits or tanks factory installed on Roush supercharged Mustangs
 • Fabricated of aluminum for strength, factory tanks fail after repeated high head situations
 • Can be polished, chromed, powder coated or left as-is for a race look
 • Can be packed with ice for the track or dyno pulls for quicker E.T.'s and more horsepower
 • Accepts factory screw on cap
M063509

SUPERCHARGER SPACERS

TBS BLOWER SPACER
 Everyone's needs, like everyone's cars, are unique to your end goal and how they want to achieve it. TBS helps supply those needs with or line of blower spacers giving you more options than before with blower height when building your ideal setup. Cast Aluminium polished to a mirror-like finish that will include the hardware and gaskets to bring your setup to the height you need.

Carburettor Adapters
 2x4 Carburettor Adapter (Satin) WM7163
 2x4 Carburettor Adapter (Polished) WM7163P

TBS FORWARD CARBURETTOR SPACER
 The Blower Shop Forward Carburettor Spacer is built out of the same aircraft grade aluminium as our industry-leading roots superchargers. Polished to a mirror-like finish, they not only match our line of show quality polished blowers but they complete the seamless transition between the carburettors and the supercharger. TBS Forward Carburettor Spacers are made from 6061 billet aluminium that is O-ringed on both sides so no gaskets or messy silicone has to be used. Specifically engineered to ram the air/fuel into your blower system resulting in more horsepower and higher air/fuel volume. Designed to push the carbs forward and change how the air and fuel mix. Get the most efficiency possible on your Supercharger. It goes 2" up and 2" forward.

IDLER PULLEY ACCESSORIES

BDS idler pulleys are made from billet 6061 aircraft aluminium and T6 heat treated for outstanding durability and performance. The 2" and 3" idler pulleys utilize two single row, factory lubricated, rubber sealed ball bearings pressed into the idler housing. The belt running surface of the idler has been "crowned" in the centre to help keep the blower belt centered in the idler pulley and on track. The 5/8" idler pulley mounting bolt is not supplied with the idler pulley due to the various length requirements for different mounting applications.

BLOWER CRANK HUBS

BDS crank hubs are made from 4100 series aircraft alloy hardened steel, designed to replace the stock factory harmonic balancer for blower application only, and are necessary for proper operation and longevity of the complete blower drive assembly. Factory harmonic balancers are not designed to handle the additional stress of driving a supercharger along with other accessories. They will normally crack or break near the keyway and come off the engine causing severe damage

BILLET 8MM PITCH PULLEYS

BDS offers one of the largest selections of blower pulley style and sizes available. All blower pulleys are manufactured from billet aircraft aluminium alloy 6061 and are T6 heat treated ensuring performance and durability. Manufactured to the tightest tolerances in the industry. BDS blower pulleys are guaranteed to mesh properly with the belt, reducing excessive wear and drag on the entire drive system. Each pulley is stamped with the number of teeth for easy identification and is manufactured 3.5" wide with a two inch diameter register and a six hole pattern, with a 2.760" bolt pattern.

FORD ACCESSORY V-PULLEY

Ford Accessory Vee Groove Pulley with 5/8" center hole for crank bolt. It can be stack with additional BDS Vee Groove Pulleys and BDS drive spacers. The vee pulley is .700" wide with a diameter of 6.25". It is made with billet 6061 aluminium. This part is used in all BDS' Ford Blower & Drive Kits

BLOWER DRIVE PULLEY SPACER

BDS pulley spacers are manufactured from the same high quality aircraft aluminium alloy as the blower pulleys. Machined to precise specifications there are a variety of sizes that may be mixed and stacked together to provide the necessary spacing for almost any application. The spacer have the same two inch register and six hole universal pattern as our blower pulleys.

Poly Chain GT2 Blower Belts

This second generation Poly Chain product has a patented tooth profile which substantially improves stress distribution. In addition, it incorporates the latest urethane and aramid materials technology for the tensile member, coupled with a completely new manufacturing method. These materials have very high modulus and tensile strength. This unique product has horsepower ratings up to four times that of its rubber counterpart. This belt has been widely accepted in the fuel classes as giving superior performance compared to any other belt.

Poly Chain GT2 PS Series Blower Belts

The newest generation Poly Chain belt developed exclusively for Top Fuel cars but may be run in any class, for those demanding superior performance. This new generation Poly Chain uses a modified core construction and materials used in the proven Poly Chain predecessor. Tests on championship race teams have shown an increase in reliability and the ability for more runs per belt, reducing overall belt replacement costs. The result is a product superior to anything in its class - without exception.

SUPERCHARGER LUBRICANTS

The DMPE Inc. Supercharger Gel Lube provides a better performing supercharger by addressing Teflon wear and leak path control. While extending Teflon / Nylatron wear through proper lubrication extends supercharger performance longevity, the gel's ability to cling to the rotating rotors and internal parts also increases the efficiency of the unit by filling up the clearance between moving parts. It tightens the seal between rotor to rotor, and end frame to rotor clearance thus allowing the supercharger to increase efficiency by reducing leak paths. This also reduces costs by decreasing time between overhauls. The gel lube is not affected by methanol like many supercharger lubes, therefore provides a better, longer lasting seal. The Gel Lube Remover was specifically manufactured to remove the above lubricant

BLOWER BELT GUARD

Aeroflow's belt guards are machined from billet aluminium and available in black or silver anodised. This guard covers the top 150 degrees of the blower pulley. This guard offers protection for the fuel, oil lines or anything that passes outside the blower belt. Mounting hardware is required and is sold separately.

Part No	Colour	Description
AF64-2905	Silver	Blower belt guard
AF64-2905BLK	Black	Blower belt guard
AF64-2906	Silver	44.5mm (1-3/4") spacers (sold individually)
AF64-2906BLK	Black	44.5mm (1-3/4") spacers (sold individually)
AF64-2907	Silver	67mm (2-5/8") spacers (sold individually)
AF64-2907BLK	Black	67mm (2-5/8") spacers (sold individually)
AF64-2908	Silver	76mm (3") spacers (sold individually)
AF64-2908BLK	Black	76mm (3") spacers (sold individually)
AF64-2909	Black	57mm (2-1/4") studs (sold individually)
AF64-2910	Black	86mm (3-3/8") studs (sold individually)
AF64-2911	Silver	Starter plate for blower belt guard (Roots)
AF64-2911BLK	Black	Starter plate for blower belt guard (Roots)

Removable Blower Mount Starter

The blower mount removable starter features unobstructed access to the blower belt and top sprocket. This assembly features an aluminium frame and steel handle, and quick disconnect plug mounted on the starter. A second plug is included to attach your cables and battery pack. A hand wheel at the rear of the starter is used to manually engage the jaws thereby lengthening its life. With the starter removed, all that remains is the faceplate, stands, jaw and belt guard. This starter requires approximately 14" in front of the top blower sprocket.

Blower Mount Starter Assembly

RCD100500-0011

Belt Guard or Starter Stand Spacer

These starter drive mounts are used in conjunction with the blower mount removable starters. Starter drives are configured per application, utilizing a top blower belt guard or lightweight aluminium A faceplate, various length stands and appropriate hardware. Stands for spacing are available in the following standard lengths: 1-3/4", 2-5/8", and 3".

Starter Face Plate Stands Only - 1-3/4"

RCD100521-01

Starter Face Plate Stands Only - 2-5/8"

RCD100521-02

Starter Face Plate Stands Only - 3"

RCD100521-03

Blower Belt Guards

The RCD belt guard is incorporated into the starter face plate and consists of three sections which are purchased separately. The crescent shaped aluminium guard covers the top 150° of the blower sprocket and, if needed, continues down the tension side of the belt to approximately 3" below the crankshaft. The starter locks-on in the same manner as before offering unrestricted access to the top blower sprocket, allowing belt removal and blower ratio changes. The middle guard has two button holes located at its top. With its screws loosened, this piece slides out of the block bracket and the blower can be removed as usual. The main belt guard parts are available in aluminium. Complete set weighs less than 2 lbs. including all mounting hardware and starter bracket.

Ford Idler Plates

This idler bracket assembly provides the most stable mounting platform for the idler pulley. The back plate is 3/4" thick. The outboard support is 1/2" thick. Accepts either smooth or toothed idler pulleys. All parts machined from 2024-T3 aluminium bar and plate. Note: This bracket does not block off the water holes.

Small Block Chev Idler Plate

For all small block Chevys and derivatives such as Rodeck or Donovan. Machined from 3/4" thick aluminium plate for rigidity in full competition applications. The kit includes: studs, spacers, nuts, washers and 1/4" thick water block-off plates.

SBC Idler Plate

RCD156206-0006

Big Block Chev Idler Plates

Fits all Big Block Chev, KB, KB Olds, Rodeck and 481X. It is machined from 3/4" thick aluminium plate. It has a 7" long slot which provides for adequate adjustment. The assembly includes: studs, spacers, nuts, washers and 1/4" thick water block-off plates. Also available with outboard idler support which provides the most stable platform for mounting the idler pulley.

Chrysler 426-440 Idler Plate

This is the most popular idler plate for the 440 or the 426 Chryslers with only one magneto. It can be used with a dual magneto drive but the idler pulley travel is limited by interference with the magneto drive. This 3/4" thick idler plate provides a stable platform for the idler pulley. Assembly includes studs, spacers, nuts and washers.

Crankshaft Front Bearing Supports

RCD's Crankshaft Front Bearing Support is designed to minimize the stress imposed on the front of the crankshaft when driving a blower. A unique feature of our crankshaft support is the hub which is machined from one piece of heat treated chrome-moly steel billet. This insures that the end where the ball bearing mounts will run true with the end of the crankshaft. The hub has a wall in the centre for a bolt to mount it on the crank and double .250" keyways. The front slots are used to drive another accessory like oil pumps.

Camshaft Gear Drives

RCD manufactures a complete line of gear drives for most applications, delivering unsurpassed quality and performance. RCD's drive are used on the fastest cars in the world - teams that demand the best, use the best for that winning edge! All drives contain the standard features noted below along with others that may be required for the particular application.

- All covers machined from solid billet 2024-T3 Aluminium
- 4340 or 9310 steel gears are finish ground after heat treatment
- Crank gears are double keyed 180°
- Vernier cam hubs and gears for precise cam
- 9310 steel idler gears with outer bearing race machined into the gear
- One piece cam hub with 5/8" hex for fuel pump drive
- Cam end play is adjusted with precision steel shims
- All bolts, nuts, studs, and keys are heat treated chrome-moly steel
- Adjustable TDC pointers. (all except SBC - can use ATI pointer)
- O-ring seals on all covers, parts and accessories

WATER-METHANOL INJECTION

STAGE 1 BOOST COOLER

Race gas quality fuel on pump gas! Increase your pump gas octane by 25 points and make more power efficiently with a cooler running motor! The Snow Performance Stage 1 Boost Cooler® water-methanol injection kit is available for all forced induction applications (supercharged/turbocharged) and uses an adjustable boost switch to inject a fixed amount of water-methanol into the system until boost goes below the switch set point. Proven to deliver 30-70 HP increases to all forced induction applications! This makes it a good choice for low to medium boost setups (1-15 PSI) looking for an octane enhancement and cooler intake charge. Activation can also be set up through any other user-chosen switch, such as a full throttle switch, nitrous switch, etc.

Features:

- Made in USA • Nickel Plated Metal Fittings
- Industry Leading 300 PSI Pump For More Pressure Than The Competition • Adjustable Boost Setting
- Level Switch Upgrade and Red LED to Alert User of Low Level
- Green LED to Alert User When System is Injecting
- Your Choice of Red, Blue, or Black Methanol Resistant High Temp Nylon Tubing
- 3 Proprietary Hypersonic™ Nozzles For The Best Atomization on the Market

What's In The Box:

- 300 PSI UHO (Ultra High Output) Pump • 3 Quart Reservoir
- All Tubing Necessary for Installation • 10' ¼ Inch High Temp Nylon Tubing • 18" High pressure Boost Line
- 3' (Black) Wire Loom • Adjustable Boost Switch (1-15 PSI)
- Pig Tail Harness • Level Switch Upgrade • 1 Nozzle Holder/Check Valve Combo • 3 Hyper-Sonic™ Nozzles • Required Hardware Needed For Installation • Snow Performance Running S Decal
- Comprehensive Instructions to Install on Any Forced Induction Vehicle

Stage 1 "THE NEW" Boost Cooler

RPSP201

DIESEL STAGE 1 BOOST COOLER

WATER-METHANOL INJECTION KIT

Decrease EGTs and increase HP in your diesel by 65HP+ in the most cost effective water-methanol injection kit on the market! Utilizing an adjustable boost pressure switch and dual nozzles to deliver precise amounts of water-methanol once 30 boost PSI has been reached (Boost Engagement Adjustable, 30 PSI Boost Hobbs Switch Included). Recommended for all high boost and competition diesels looking to increase HP while decreasing EGTs when on heavy throttle. Comes with easy to mount race ready 3QT tank, high flow check valve, and quick-connect fittings, 300 PSI UHO Pump, and LED alert system.

Diesel Stage 1 Boost Cooler Water-Methanol Injection Kit RPSP301

Stage 2 Boost Cooler

This kit uses manifold boost pressure to determine when and how much fluid to inject. Proportionally injecting according to boost pressure gives the most accurate delivery of water-methanol and allows the most cooling and performance improvement over the widest range. More power and driveability is the result. It can be used on any forced induction engine: carburetted, fuel injected, turbocharged, positive displacement or centrifugal blowers. The most suitable are the centrifugal supercharged and turbocharged engines, as they build boost in a more progressive manner concerning water-methanol injection. The positive displacement blower engines will work, but it might take more work to dial in the delivery. For higher boost applications (over 25psi), the controller can be upgraded to our VC100 unit. **Kit includes:**

- 150+ PSI High Volume Pump • 3 Quart Reservoir
- Digital Variable Controller • Comprehensive Instructions
- 2 Nozzles To Cover a Wide Range of Horsepower
- All Required Hardware Needed For Installation

Stage 2 Boost Cooler RPSP20010

2011-2017 FORD MUSTANG GT 5.0L STAGE 2 FORCED INDUCTION WATER-METHANOL INJECTION KIT

Snow Performance has combined performance, quality and easy installation in this new water-methanol injection system engineered specifically for forced induction (supercharged/turbocharged) 2011+ Ford 5.0 Coyote engines. Increase your pump gas octane by 25 points and make more power efficiently with a cooler running motor! Complete with custom water-methanol injection throttle body spacer plate, braided stainless line, and 4AN fittings offering unsurpassed reliability and ease of install. The Stage 2 uses a progressive VC-50 controller (ISO 9001 Manufactured) that proportionally injects more or less according to boost pressure. Start and full points are adjustable for engagement and delivery curve to match what the engine requires. Proportionally injecting according to boost pressure gives an accurate delivery of water-methanol and allows cooling and performance improvements over a wide range for improved drivability. The VC-50 controller (52mm gauge) offers the functionality of a boost gauge and water-methanol controller all in one! Highlighting a 7 colour (Blue, White, Red, Yellow, Orange, Purple, Green) OLED screen displaying boost, percentage of injection, low level, secondary nozzle activation, prime button, and 4 fault codes directly on the screen you can tailor the controller to match your OEM gauges or mix and match up to two colours. Fits all forced induction (supercharged/turbocharged) 2011+ Ford Mustang GTs equipped with the 5.0L Coyote engine.

Benefits:

- Made In USA • Cooler Denser Air Charge • Achieve 116 Octane Quality Fuel From Pump Gas • Safely Run More Boost & Timing
- Cleans Engine Combustion Of Carbon Build Up
- Progressive Water-Methanol Injection
- Features: • Hard Anodized Black Fittings
- Industry Leading 300 PSI UHO Pump For More Pressure Than The Competition • 52mm Boost Gauge and Adjustable Progressive Water-Methanol Controller All in One
- 7 Colours OLED Screen Displays Boost, Injection Percentage, Injection Error (s), Prime Button, Second Stage Activation, and Low Level • New Prime Feature Ensures Water-Methanol In Lines With Push of A Button • 4 Fault Modes (Clogged Line/Broken Line)
- Level Switch Upgrade • 2 Proprietary Hypersonic Nozzles For The Best Atomization On The Market
- NOTE: For Forced Induction Applications Only

Stage 2 Boost Cooler 2011-2017 Ford Mustang GT 5.0L
Forced Induction Water-Methanol Injection Kit RPSP2132-BRD

DIESEL STAGE 2 BOOST COOLER WATER-METHANOL INJECTION KIT UNIVERSAL

Lower EGTs 100-300 degrees and increase HP by 65+ with a cleaner, cooler running Diesel! The Snow Performance Diesel Stage 2 Boost Cooler is available for all diesel truck owners looking to have the benefit of water-methanol injection throughout the trucks boost range. The Stage 2 utilizes a progressive VC-50 controller (52mm gauge) that commands two water-methanol nozzles that proportionally inject more or less according to boost pressure. Start and full points are adjustable for engagement and delivery curve to match what the engine requires. Proportionally injecting according to boost pressure gives an accurate delivery of water-methanol and allows cooling and performance improvements over a wide range for improved drivability. The VC-50 controller (52mm gauge) offers the functionality of a boost gauge and water-methanol controller all in one! Highlighting a 7 color (Blue, White, Red, Yellow, Orange, Purple, Green) OLED screen displaying boost, percentage of injection, secondary nozzle activation, prime button, and 4 fault codes directly on the screen you can tailor the controller to match your OEM gauges or mix and match up to two colors. 7 Gal Tank included for trip ready installation. Recommended for all daily driven diesel trucks that see light towing.

- Made In USA
- Will Not Leave Signature On Vehicle (Warranty Intact Power Added!)
- Reduced EGTs 100-300 Degrees
- Increased HP 65+
- Increased Boost
- Cleans Engine Combustion Of Carbon Build Up
- Reduced Emissions (Less Regen)
- New Prime Feature Ensures Water-Methanol In Lines With Push of A Button
- 4 Fault Modes (Clogged Line/Broken Line/Pump/Solenoid)

Diesel Stage 2 Boost Cooler Water-Methanol Injection Kit Universal RPSP450

Blower Restraints

Stroud Safety builds supercharger restraints for almost all applications. All are SFI approved for 14.1 and 14.2. The 14.1 unit is for the bracket racer that needs minimal restraint for his class. It comes complete with header mounts and adjustable straps and fits either a 6-71 or 8-71 supercharger. The 14.2 unit fits 10-71, 12-71 and 14-71 blowers. The kit consists of the top plate, blower bag and all the fittings to attach to the motor. The blower strap anchors are the new Stroud type with the locking pins sewn to the blower strap, preventing the loss of the locking pins.

Blower Restraint Complete (SFI 14.2)
Blower Restraints (SFI 14.1)

Part No.
SS1600
SS1610

STAGE 2.5 BOOST COOLER FORCED INDUCTION

This kit utilizes the only OEM approved water methanol injection pump on the market with proprietary heat flange, twin seals, and custom motor winding to run cooler and longer than the competition. The Extreme Environment 300 PSI UHO pump is designed to be in the elements with O-Ring connections that are then sealed and potted to ensure no moisture can enter the pump internals. Compare this to pumps that use a pump "sleeve". These sleeves will keep moisture around the pump unit leading to corrosion as well as trap heat greatly decrease pump life. The Stage 2.5 comes standard with 100% methanol resistant components using stain-less steel, nickel plating, EPDM, and hard anodizing to ensure years of continued use. Tie that in with new Snow Performance ACU-SEAL compression fittings for guaranteed leak free operation even when using 100% methanol. Whether running a supercharger, turbo, or high compression motor the Stage 2.5 Boost Cooler will make the induction charge colder, denser, and increase 91 octane fuel to 116 octane race gas levels allowing full power all the time!

Features: • U.S.A. Made • Adjustable Progressive Water Methanol Engagement & Monitoring • Digital Boost Reading (1-50 PSI) • Recommended For Street Driven Turbo and Centrifugal Supercharger Applications • Supports 1,000+ HP • 100% Methanol Resistant (Stainless Steel, Nickel Plating, Hard Anodizing, EPDM) • Snow Performance Hyper-Sonic Water Methanol Nozzle • Snow Performance ACU-SEAL Water Methanol Compression Fittings • Snow Performance OEM Approved Extreme Environment 300 PSI UHO Water Methanol Pump • Snow Performance Running "S" Engraved Low Profile Nozzle Holder • Snow Performance Running "S" Engraved Low Profile High Flow Check Valve

Stage 2.5 Boost Cooler Forced Induction **RPSP210**

STAGE 2.5 BOOST COOLER GM LT1 6.2L SUPERCHARGED KIT

Snow Performance has combined performance, quality, and easy installation in this new water-methanol injection system engineered specifically for all forced induction (super-charged/turbocharged) 2016+ Gen 6 Chevy Camaro SS 6.2L LT1 engines. Increase your pump gas octane by 25 points and make more power efficiently with a cooler running motor! Complete with custom water-methanol injection throttle body spacer plate, braided stainless line, and 4AN fittings offering unsurpassed reliability and ease of install. The Stage 2 uses a progressive VC-50 controller (ISO 9001 Manufactured) that proportionally injects more or less according to boost pressure. Start and full points are adjustable for engagement and delivery curve to match what the engine requires. Proportionally injecting according to boost pressure gives an accurate delivery of water-methanol and allows cooling and performance improvements over a wide range for improved drivability. The VC-50 controller (52mm gauge) offers the functionality of a boost gauge and water-methanol controller all in one! Highlighting a 7 colour (Blue, White, Red, Yellow, Orange, Purple, Green) OLED screen displaying boost, percentage of injection, low level, secondary nozzle activation, prime button, and 2 fault codes directly on the screen you can tailor the controller to match your OEM gauges or mix and match up to two colours. Fits all forced induction (supercharged/turbocharged) 2016+ Camaro SS 6.2L.

Stage 2.5 Boost Cooler GM LT1 6.2L Supercharged **RPSP2161-BRD**

STAGE 3 BOOST COOLER DIRECT INJECTED

The Snow Performance Stage 3 Boost Cooler brings true 2D mapped water-methanol injection delivery to your DI (direct fuel injected) and forced induction (turbocharged/supercharged) vehicle. The Stage 3 creates a 2D injection map based off boost and fuel pressure sensor input to deliver an extremely accurate amount of water-methanol when the engine needs it most. Bringing fuel pressure into the mix allows the injection curve to be extended past specific boost points for greater range/control. None invasive, the Stage 3 Boost Cooler controller is designed to mount on the steering column or the dash so no additional gauge pods need to be purchased and functions as a boost gauge, water-meth controller and fuel system monitor all in one! Proven to reduce the air inlet temperature by up to 100 degrees and increase octane by 25 points for maximum HP and cooling. Comes with adjustable Stage 3 water-meth controller, 1/4" High Temp Nylon line and easy to install quick-connect fittings.

Stage 3 Boost Cooler Direct Injected **RPSP320**

STAGE 3 BOOST COOLER BOOST/EFI

The Snow Performance Stage 3 Boost Cooler is the most advanced water-methanol injection system for your EFI (electronic fuel injected) and forced induction (turbocharged/supercharged) vehicle. The Stage 3 creates a 2D injection map based off boost and fuel injector pulse width to deliver the most accurate and tunable water-meth delivery on the market. Taking it one step further the Stage 3 will control 2 Hyper-Sonic™ Nozzles independently of one another to solidly the exact amount of water-methanol is provided at all rpm ranges of the engine. This 2D map injection and dual stage technology translates into the most accurate injection curve and tuneability of any water-methanol system giving 50-110 HP gains and up to 150 degree reduction in air temps! Tie this in with the industry leading Snow Performance 300 PSI UHO pump, Hypersonic Nozzles™, and terminated weather tight OEM harnessed wiring connections and the Stage 3 promises to be the easiest and most effective water-methanol system on the market for your EFI and boosted vehicle.

Kit includes: • 300 PSI UHO (Ultra High Output) Pump • 3 Qt Reservoir • All Tubing Necessary for Installation • 10' 1/4 Inch High Temp Nylon Tubing • 18" High pressure Boost Line • Terminated Digital Variable Mapping Controller • Terminated Plug & Play Wire Harness • Power Solenoid Upgrade • Level Switch Upgrade • 2 Nozzle Holder/Check Valve Combo • 3 Hyper-Sonic™ Nozzles • Snow Performance Running S Decal • Required Hardware Needed For Installation • Comprehensive Instructions to Install on any EFI/Boosted Vehicle • Snow Performance 1-Year Warranty

Stage 3 Boost Cooler Boost/EFI **RPSP310**

DIESEL STAGE 3 BOOST COOLER WATER-METHANOL INJECTION KIT UNIVERSAL

Snow Performance has combined performance, quality, and ease of installation in this new water-methanol injection kit designed for all turbo diesel owners who demand colder EGTs while towing heavy loads. The Diesel Stage 3 Boost Cooler utilizes a 2D mapped controller that commands injection based on boost pressure and EGTs (exhaust gas temperatures) to maintain extremely cold air inlet temperatures, 100-300 EGT decreases, decreased emissions, cleaner engine components, and increased fuel economy all while giving 65+ HP to help pull large hills with easy effort while towing. A must have for the diesel enthusiast that is concerned about the longevity of his truck that sees heavy towing. None invasive, the Diesel Stage 3 Boost Cooler controller is designed to mount on the steering column or the dash so no drilling/marring of the interior needs to take place or additional gauge pods need to be purchased. Functions as a boost gauge, water-meth controller and EGT monitor all in one! Concerned about warranty? The Snow Performance Stage 3 does not leave a signature on the vehicle leaving your diesel truck with its warranty intact. 7 Gal Tank included for trip ready installation. Recommended for all daily driven diesel vehicles that see heavy towing where EGTs become dangerously high.

Diesel Stage 3 Boost Cooler Water-Methanol Injection Kit Universal **RPSP50100**

STAGE 4 BOOST COOLER PLATINUM WATER INJECTION KIT

Calling all tuners! Snow Performance now offers water-methanol injection with OEM level fuel system control for exact amounts of water-methanol to be delivered at any RPM range of the vehicle. The Stage 4 Boost Cooler utilizes engine RPM/Boost PSI to create a 2D fully adjustable water-methanol tune. Unlike any other system on the market the Stage 4 can give more or less water-methanol at any specific engine load state similar to a standalone ECU. Using Snow Performance Platinum Tuning Software (free) the tuner can monitor, adjust water-meth delivery, data log/save files, and save/send completed water-methanol tunes to remote customers using a computer while on the dyno. Comes complete with USB cord, terminated wiring connections, LED alert system and 1/4" Nylon Tubing / quick-connect fittings. Recommended for all tuners looking for maximum water-methanol control.

Stage 4 Kit with Nylon Line **RPSP9000**
Stage 4 Kit with Braided Line **RPSP9000-BRD**

VC-50 CONTROLLER

The all new VC-50 water-methanol injection controller from Snow Performance is available for all forced induction (turbocharged/supercharged) vehicles. Heavily loaded, the VC-50 controller comes with a built in manifold absolute pressure sensor that proportionally injects more or less water-meth according to boost pressure. Start and full points are adjustable to match what the engine requires. New dual tone 7 colour (white, green, blue, red, orange, purple, yellow) OLED screen shows boost, percentage of injection, low level, secondary nozzle activation, and 2 specific fault modes (clogged line/broken line) directly on the screen. The controller has the ability to command two stages of water-methanol, is prime button equipped, and can be turned on/off to act as a boost gauge only or boost gauge and water-meth controller all in one!

- Made in USA
- Robust ISO 9001 Quality Display
- Progressive Fully Adjustable Boost Referenced Water-Methanol Controller
- Heads Up Display
- Pigtail Harnessed Wiring Connections
- Fully Adjustable Dual Tone 7 Color Screen (Red, Blue, Green, Orange, Purple, White, Yellow)
- Comes With Universal 2 1/16 Gauge Pod Assembly

RPSP60500

MVCV (MUSCLE CAR VARIABLE CONTROLLER)

The MVCV (Muscle Car Variable Controller) is a progressive water methanol injection controller that utilizes engine vacuum to command injection. Complete with a 5 wire pigtail harness and rpm lockout feature. You can decide exactly what RPM you want your water-methanol to engage. Perfect for all non supercharged/turbocharged vehicles with a carburetted engine looking for an octane enhancement and cooler intake charge. Note: For carburetted naturally aspirated vehicles only.

RPSP60040

MAFU CONTROLLER (MAF/MAP)

Controlled by the mass air flow sensor output (voltage/frequency) or a manifold absolute pressure sensor, the MAFU is fully adjustable to progressively inject water-methanol along the entire RPM range of the vehicle. Complete with a 4 wire pigtail harness.

RPSP60100

VC-20 CONTROLLER

The VC-20 controller is a progressive water-methanol controller that can be mounted in the cab/engine bay. Referencing boost (1-20 PSI) this controller will progressively inject water-methanol to match the boost curve of your vehicle. Completely stand alone, this controller will not affect operation of any other vehicle systems. Included 3 wire harness means the only wiring needed for controller is good ground, 12V key on power source, manual boost source, and connection to a Snow Performance pump. NOTE: Boosted Applications Only

RPSP60090

GAS STAGE 3 DIRECT INJECTION WATER METHANOL CONTROLLER

The Snow Performance Stage 3 Boost Cooler DI Water Methanol Controller delivers progressive 2D water methanol control in a easy to use compact interface.

- U.S.A Made
- SEMA Award Winner
- 2D Progressive Water Methanol Engagement (Boost / High Flow Fuel Pump 0-5V)
- Compact LCD Heads Up Display

RPSP60300

Stage 3 Gasoline Boost Cooler™ Upgrade

Already have a Snow Performance Stage 2 gasoline Boost Cooler™? Snow Performance offers you the option to upgrade just the controller to make your Stage 2 system into a Stage 3. Extremely easy to set up and dial in - the software creates a delivery map from just a few easy to set start and full points you punch in. The LCD Screen displays boost pressure, fuel injector duty cycle, as well as water-methanol injection percent. Quick, easy, positive adjustments are made with 2 push buttons. Low profile design allows for easy-to-view and discrete mounting. Upgrade includes:

- LCD Screen, Pushbutton Digital Variable Mapping Controller
- Comprehensive Instructions

RPSP60061 Stage 3 Gasoline Boost Cooler™

PARTS & ACCESSORIES

STAGE 4 WATER METHANOL CONTROLLER

Upgrade your water methanol injection kit to the Snow Performance Stage 4 Boost Cooler. Recommended for applications running 100% methanol looking to control the injection system similar to a OEM fuel system.

- OEM Fuel System Control
- Boost / RPM / Sensor Input
- Snow Performance Stage 4 Software: Data Log, Send/Save Tunes, PC Computer Compati-ble
- Fully Harnessed Bosch Wiring Connections

RPS770000

WATER/METHANOL PUMP

Take your forced induction ride to the next level with a Holley water/meth injection system! Integrated into the Holley HP and Dominator EFI Systems is the capability to control water/methanol injection, allowing you to safely run on lower octane pump gas! What makes the Holley water/methanol system unique and light years ahead of competitive systems, is that the solenoid flow has been characterized within the ECU. Program in an exact flow amount into the software, and that flow is injected into the engine. This is critical to ensure that neither too little (causing engine damage), nor too much (causing a large loss in power) water/methanol mix is injected into the engine. Select the exact percentage of water/methanol mix to be delivered vs. the percentage of fuel flow present, at any RPM and load. This makes tuning a very simple and accurate process. All components are designed to be compatible with water/methanol mix of up to 50% methanol. The Water/Meth solenoids are run by an injector driver output. If an extra output is not available (as would be the case on a HP ECU driving 8 injectors), PN 554-115 can be purchased that can be driven by a low side PWM output.

140 PSI Pump

HO557-100

300 PSI UHO PUMP

Snow Performance 300 PSI UHO methanol injection pumps offer unsurpassed pressure, tech-nology, and reliability. All 300 PSI pumps are U.S.A made and come individually tested to ensure quality and reliability. Although similar looking pumps exist, they do not come with the handful of propriety features that set the Snow Performance

- Dual EPDM Seals Offer Greater PSI Ratings to Be Achieved Safer and Longer
- Proprietary Internal Wiring Offers Lower Amperage Draw than Similar Looking Pumps
- Built in Thermal Breaker Allows Pump to Run Constantly Without Damaging Pump Inter-nals
- 3/8" NPT Inlet / Outlet
- (2) 3/8" NPT to quick connect Fittings Included

300 PSI Pump **RPSP40900**

SOLENOID UPGRADE

- NYLON LINE

The new and improved Snow Performance Solenoid Upgrade offers 100% safety for all injection systems utilizing a rear mounted reservoir, injection points under vacuum, or installs where injection nozzle is lower than water-methanol reservoir. The solenoid fits in line between the pump and injection point and locks fluid in place when not in use adding safety and peace of mind to any injection system. Can also be used to control a second stage of injection with any VC-50, Stage 3, or MPG-MAX water-meth controller.

- Robust Methanol Resistant Stainless Steel/Zinc Design
- High PSI Solenoid Designed to Be Used Between Pump & Injection Point
- Two Brackets Mounted To Solenoid For Easy Install
- Pigtail Harnessed Wiring Connections
- Easy to Read "Flow" Indication
- 2 Quick Connect Fittings To 1/4" High Temp Nylon Tubing
- Large 3/16" Orifice For Maximum Flow Through System

Solenoid Upgrade Suit Nylon Line **RPSP40060**

SOLENOID UPGRADE - BRAIDED LINE

The Snow Performance High Flow Water Methanol Solenoid gives 100% safety for trunk mounted water methanol tanks, injection points under vacuum, and the ability to run different stages of water methanol. New for 2019 the solenoid is constructed out of 100% stainless steel for zero corrosion even when using 100% methanol.

- 100% Methanol Resistant Stainless Steel Construction
- Comes with (2) 1/8" NPT to 4AN Fittings & Mounting Hardware
- Can Be Used With All Snow Performance Water Methanol Injection Kits & Upgrades
- Highest Flowing Water Methanol Solenoid On The Market
- U.S.A Made

Solenoid Upgrade Suit Nylon Line **RPSP40060-BRD**

CARBURETOR SPACER PLATE

1" thick adapter plates allow for a clean and easy install with any Snow Performance Nozzles (one or two) on carbureted applications using a Holley, Edelbrock, or Carter 4150 or 4500 (Dominator) carburetors.

Includes:

- 4150/4500 style Carb Plate
- Gaskets Needed for Installation
- Hardware Needed for Installation

4150 Style **RPSP40050**
4500 Style **RPSP40055**

2.5 Gallon Reservoir

The new 2.5 Gallon Reservoir gives much more range than the included 3 qt tanks, and is fairly small in size - 13" L x 9.5" H x 7.5" W (similar to a very small car battery) and includes an additional 10 feet of tubing.

2.5 Gallon Reservoir
2.5 Gallon Reservoir with Nylon Line
2.5 Gallon Reservoir with Braided Line

RPSP40014
RPSP40014
RPSP40014-BRD

Low Level Indicator

This is a float switch and indicator light that lets you know when your reservoir is running low on fluid. Simple to install and wire in any reservoir.

Level Switch (Unmounted)

RPSP40035

3 QUART RESERVOIR TANK

The 3 quart water-methanol tank upgrade is designed to clean up your engine bay and move your supply of methanol into the trunk of any vehicle. Small in size (10in x 6.5in x 4in), this wa-ter-meth tank will give longer range to your Snow Performance water-meth system in a com-pact package.

3 Quart Reservoir Tank - Black
RPSP40012

WATER/METHANOL FILTER

- Snow 50 Mesh Water/Methanol Filter.
- Vacuum side only.
- Cleanable inner mesh filter.
- 3/8" Inlet/Outlet
- NOT rated for Water/Methanol mixtures above 50%

RPSP82204

Nozzles

Unique design provides the best atomisation possible. Nozzles have integrated 100-micron filters. Support 150-1500 HP.

Nozzle 100ml/min **RPSP40100**
Nozzle 175ml/min **RPSP40175**
Nozzle 225ml/min **RPSP40225**
Nozzle 375ml/min **RPSP40375**
Nozzle 600ml/min **RPSP40600**
Nozzle 625ml/min **RPSP40625**

Nozzle Mounting Adapter

Snow Performance offers a Nozzle Mounting Adapter for those without metal intake tubes. Made from Delrin, the adapter is methanol resistant and highly durable. Installation is easy: simply drill a 3/4" hole using a spade bit, insert the inner adapter piece, and thread on the outer adapter nut.

Nozzle Mounting Adapter

RPSP40110

Nozzle Mounting Bung

Weldable threaded bungs make installing your injector nozzle easier when using thin-walled intake tubing. Simply drill a hole in your intake tube and weld in the bung. Your nozzle then has a strong threaded connection that can be used with confidence. Available in steel or aluminium. 1" diameter, 1/4" thick, 1/8" NPT threads for Snow Performance Boost Cooler nozzle. Can also be used with nitrous nozzles, boost port fittings, etc.

Nozzle Mounting Bung - Aluminium **RPSP40120**

Nozzle Mounting Bung - Steel **RPSP40130**

Dual Nozzle Upgrade

This allows an additional nozzle to be mounted in any of our Boost Cooler kits. It includes a Tee, or splitter, junction piece with our quick-connect fittings, a nozzle holder and a section of hose. Note - injector nozzle is not included. Mounting additional nozzles are required when you need a quantity greater than one nozzle can provide, or if you have a dual plenum/throttle body/carburetor set-up to get even distribution.

Dual Nozzle Upgrade

RPSP40040

WATER/METHANOL CHECK VALVE

New Snow Performance high flow inline water methanol check valves offer superior safety and flow compared to other water methanol check valves on the market. Custom made with 100% methanol resistant stainless steel spring and EPDM seals ensuring zero corrosion even with high concentrations of methanol.

- Hard Anodized Black
- Engraved Snow Performance Running "S" Logo
- 7 PSI Crack Pressure
- 1/8" NPT Ports
- Suit Nylon Hose
- 100% Methanol Resistant

RPSP8CV-QC

Boost Juice

Boost Juice is Snow Performance's proprietary mix of 49% methanol and 51% water. It is made in a controlled environment with special care to make sure the ratios are accurate to result in a high performance water-methanol fluid formulated for use in the Boost Cooler injection system.

Boost Juice 1 Gallon

RPSP40008

FLEXIBLE

TURBO DRAINS

Aeroflow's universal flexible turbo drains are designed to help you quickly and easily plumb up your turbo drain. Featuring -10 or -12 female swivel nuts at both ends they are easily mated to our turbo drains and block and sump fittings. Made from 304 stainless steel to protect them from turbo manifold heat.

SINGLE LAYER TURBO GASKETS

Introducing the new range of turbo gaskets from Aeroflow Performance. These single layer gaskets are designed to suit T28 inlet turbo flange single entry and T3, T4, T5 turbo twin entry inlet flanges.

AF9557-0001 GT25, GT28, inlet flange (T28)
AF9557-0005 GT30, GT35, inlet flange (T3) single entry
AF9557-0002 GT30, GT35, inlet flange (T3) twin entry
AF9557-0006 T04Z, GT42, GT45, inlet flange (T4) single entry
AF9557-0003 T04Z, GT42, GT45, inlet flange (T4) twin entry
AF9557-0004 GT42, GT45, GT51 inlet flange (T6) twin entry

MULTI-LAYER TURBO GASKETS

The Aeroflow Performance multi-layer turbine inlet flange are designed to provide the best quality seal at the most competitive price. With each individual layer designed to be thinner this delivers increased rigidity and durability. A uniform heat distribution which improves thermal transfer between the turbocharger and manifold. All whilst providing an even distribution of clamping loads across the entire sealing surface. They are available in all sizes from T25/T28 all the way up to T6 for the turbine inlet flanges & the Nissan 5 bolt and Ford 5 bolt turbine outlet flange gaskets.

AF9557-1001 GT25 GT28 turbine inlet flange T25 / T28
AF9557-1002 GT30 GT35 turbine inlet flange T3 single entry

AF9557-1008 GT30 GT35 turbine outlet 4-bolt flange
AF9557-1010 Ford XR6 5 bolt turbine outlet flange
AF9557-1011 GT25 GT28 turbine outlet flange T25 / T28

TURBO CHARGERS

BOOSTED TURBOCHARGERS by AEROFLOW

Aeroflow Performance Boosted turbochargers are designed specifically for the enthusiast who wants optimal performance at a competitive price. Boosted Turbochargers have a range of specific turbo models to meet your power goals, driving style and budget. Boosted turbochargers utilize billet compressor wheels and feature the latest aerodynamic design that maximises horsepower and boost response throughout the rev range. The turbine wheel is constructed from Inconel, a Super Alloy that maintains strength during prolonged exposure to extremely high exhaust gas temperatures. Boosted Turbochargers are available in 360deg journal bearing, dual and triple ceramic ball bearing cartridges designed to prolong the turbo lifespan and improve shaft balance. Boosted Turbochargers are also available in oil/water or oil cooled versions to help keep temperatures to a minimum. The boosted range of turbos are available with a ported shroud compressor cover housing which increases surge resistance and provides reliable, continuous power throughout the engine's RPM. Boosted turbochargers are available for a direct bolt-on for some Ford's and Nissan's with further models in development. Boosted turbos are available in natural aluminium or high temp black compressor cover options.

TURBO V-BAND CLAMPS

TURBO SPECIFIC V-BAND CLAMPS

These V-band clamps are designed especially for use with Boosted turbochargers. They are made in 304 stainless steel or aluminium.
Note: Moly grease all threads before installation and removal.

TURBO DRAIN KITS

TURBO DRAIN KITS

This selection of turbo drain options available from Aeroflow Performance will allow a large range custom plumbing applications. For sufficient drainage of oil for both bearing styles of turbochargers a -10AN or 5/8" hose is ideal. The oil outlet should follow the direction of gravity +/-45° when installed in the vehicle on level ground. It is recommended to avoid kinks or beyond 90 degree bends in the oil drain line and draining into the sump below. With heat surrounding the manifold and turbocharger a heat shield or sleeve is a great idea to prolong the life of the hose.

AF463-01	-80RB female 38mm to 44mm hole centres suits Boosted turbos with 38mm bolt centres on turbo drain
AF463-02	-100RB female 50.80mm hole centres suits Boosted turbos with 50.80mm bolt centres on turbo drain

AF59-4633	Replacement O-ring to suit 52mm bolt centre turbo drain

TURBO DRAIN GASKETS

Aeroflow Performance turbo drain gaskets to properly seal your turbo system to help prevent unnecessary surprises at the track. This is normally only removed if the turbo is removed, but it is highly recommended that this gasket be replaced if the drain plate is removed, or even just loosened.

- AF8059-0001** suits boosted turbos with 38mm bolt centres on turbo drain
- AF8059-0002** suits turbos with 51mm bolt centres on turbo drain
- AF8059-0003** suits Boosted turbos 6766 and 7875

TURBO DRAIN BULKHEAD

These Aeroflow Performance universal bulkhead turbo drains are a convenient must have fitting for DIY enthusiasts. When turbocharging a N/A engine there isn't much option for a turbo drain back into oil pan. This screw together bulkhead fitting allows for easy installation with no welding required. Just remove the sump and drill a hole to suit and screw the fittings together with an O-ring on each side to seal it.

- AF463-30** 45 degree with 5/8 barb
- AF463-31** 90 degree with 5/8 barb
- AF463-32** 45 degree with -10an male
- AF463-33** 90 degree with -10an male

TURBO DRAIN HOSE

This fluorosilicone lined 3 ply silicone hose has been designed for the connection between the turbocharger and the engine. It is the next best alternative to using steel braided hose but it allows better flexibility in line length. The fluorosilicone lining in this product allows this to be used as an oil resistant hose. It resists hardening, cracking, steam, and coolant. Most commonly used in high heat turbo oil-drain applications rated up to 257°C (495°F). Available in both 5/8" (15.90mm) and 3/4" (19.10mm) with only one length of 500mm.

- AF9260-062-1** 5/8" (15.90mm) BLACK
- AF9260-075-1** 3/4" (19.10mm) BLACK

- AF463-23** Nissan RB / SR turbo drain kit

TURBO ACCESSORIES

TURBO STUDS

The Aeroflow Performance turbo studs are made for mounting turbochargers to manifolds, mounting exhaust systems and exhaust manifolds. These studs can fail during removal and reinstallation due to the extreme heat and stress. Manufactured from steel with copper locking nuts to provide a constant clamp load.

- AF8059-1000** M8 x 1.25mm 5 x studs / nuts
- AF8059-1001** M10 x 1.5mm 4 x studs / nuts
- AF8059-1002** M8 x 1.25mm 5 x copper nuts ONLY
- AF8059-1003** M8 x 1.25mm 5 x S/S studs ONLY
- AF8059-1004** M10 x 1.25mm 5 x S/S studs and 5 x copper nuts

COMPRESSOR HOUSING

O-RING

Replacement compressor housing O-ring to suit boosted turbo 5455, 5855, 5862, 6662, 6762.

AF8080-5001

TURBO BREAK IN LUBRICANT

The Aeroflow Performance turbo break in lubricant is specifically designed to provide sufficient lubrication to a newly installed turbo whether new, rebuilt or second hand turbo. The initial start can be a killer there is always a delay in oil supply reaching the bearings on the turbocharger. This can be as long as 30 seconds which is enough time to cause premature wear or even seizure. The Aeroflow Performance lubricant provides a high load-bearing film that clings to all moving parts, preventing wear until a continual oil supply reaches the turbo.

AF8080-2000

AF8055-1000

AF8055-1002

AF8055-1011

AF8055-1010

TURBO ADAPTERS

These Aeroflow Performance turbo adapters save the cost and headache of manufacturing a brand new exhaust manifold or exhaust system. Made from cast 304 stainless steel. Featuring an uninterrupted gas flow transition to ensure optimum turbocharger response.

- AF8055-1000** T3 to V-Band
- AF8055-1001** T4 to V-Band
- AF8055-1002** T3 to T4
- AF8055-1003** T25/T28 to T3
- AF8055-1010** Ford XR6 5 bolt turbine outlet flange to V-band
- AF8055-1011** T25/T28 5 bolt turbine outlet flange to V-band

FORD XR6 TURBO LINE SUPPORT

The Aeroflow Performance turbo and water line support bracket is designed for the turbocharged Ford Barra motor to secure the turbo oil and water feed lines from falling onto the drive belt. A quick and easy bolt on design that utilises the 2 front timing case bolts on the front of the engine. This kit comes with two sets of different sized billet separators to suit most custom applications. One set is stepped with I.D.'s of 11.1mm (7/16") and 14.2mm (9/16") and the second set has an I.D. of 14.2mm (9/16") on both sides.

- Overall Length = 270mm (10-5/8")
- Overall Width = 44mm (1-47/64")
- Thickness = 4mm (5/32")

AF64-4369

1mm (3/64") TURBO RESTRICTOR

Ideal for use with bearing turbos. These great little restrictors restrict the oil flow/pressure to the core of the turbo to ensure long life of your seals. They suit Aeroflow's -3AN and -4AN 200 series fittings. Recommended for use in all Boosted ball bearing turbo chargers.

- AF399-03** Suits -3AN teflon hose 10 Pack
- AF399-04** Suits -4AN teflon hose 10 Pack

TURBO OIL / WATER FEED LINE KITS

- Includes -3AN 200 series stainless steel teflon oil feed lines
- AF30-1001** Nissan SR20 S13
- AF30-1002** Nissan SR20 S14 / S15
- AF30-1003** Nissan RB20, RB25, RB26, RB30. (Note RB20 & RB30 require additional oil feed banjo)
- AF30-1006** MITSUBISHI EVO 4-9 (4G63)

LOCKING TABS

The Aeroflow Performance stainless steel turbo locking tabs are critical in keeping your turbo nuts in their place and stopping them from coming loose. The factory items are typically damaged from the heat of the turbo after a number of years so it's a good idea when you've got the turbo off, to replace these at the same time. To install simply bend up the ends of the tabs against the turbo nuts to keep them in their place.

- Sold in pairs
- AF8059-1050** Suits T25 / T28 turbine flanges
- AF8059-1051** Suits T3 turbine flanges

TURBINE FLANGES

Aeroflow's machines a variety of exhaust-turbo flanges all manufactured from 3/8" (9.5mm) high quality 304 Stainless Steel.

INLET

- AF9551-0001 GT25, GT28, Turbine inlet flange (T28)
- AF9551-0002 GT30, GT35, Turbine inlet flange (T3)
- AF9551-0003 T04Z, GT42, GT45, Turbine inlet flange (T4)
- AF9551-0004 GT42, GT45, GT51 turbine inlet flange (T5)

OUTLET

- AF9551-0005 GT25, GT28, turbine outlet flange (T28)
- AF9551-0006 GT30, GT35, turbine outlet flange (T3)
- AF9551-0007 GT42, GT45, GT51 turbine outlet flange (T4)

BOOSTED SPEED SENSOR PLUG

When setting up the Boosted by Aeroflow compressor wheel speed sensor (AF8050-1010) in an aftermarket application such as wiring into an aftermarket ecu. This plug and pin set becomes a crucial part so you can wire this sensor directly into your aftermarket ECU. This plug will work with our compressor wheel speed sensor as well as other aftermarket brands and comes with seals and terminals ready to wire up your sensor.

AF49-2020 SOLD INDIVIDUAL PLUG AND PINS

BOOSTED COMPRESSOR WHEEL SPEED SENSOR

The Aeroflow Performance speed sensor detects the rotational speed of compressor wheel of the turbocharger. Sensing is done by the Eddy Current Principle to detect the blades as they pass by. By doing so, it provides a key input parameter for the efficient management of the turbocharging system. This is critical in accurately identifying how fast the turbo is spinning and where your engine is operating on the compressor map. By comparing boost levels and shaft speed on a compressor map, you can determine the ideal operating conditions to insure peak power over a wider operating range. Traditionally, installing these sensors was difficult for the end user – requiring complex machining at a compound angle to carefully hit the contour area of the wheel bore at the right angle. The Boosted by Aeroflow turbochargers all have this precision machining already done to every compressor cover. Maximum speed of measurement is 400,000 RPM.
AF8050-1010 compressor speed sensor ONLY
AF8059-0020 speed sensor locking nut & plug

TURBO PROTECTOR SCREENS

Protect your turbocharger and engine internals from debris at the track or on the road. These stainless honeycomb turbo guards cover your turbo's inlet to stop rocks and rubber damaging your impeller and engine.
AF64-4078 76mm (3") I.D. Suits turbos with 3" front covers
AF64-4074 1101.6mm (4") I.D. Suits turbos with 4" front covers
AF64-4075 1278mm (5") I.D. Suits turbos with 5" front covers
AF64-4077 1397mm (5.5") I.D. Suits turbos with 5.5" front covers
AF64-4076 152.4mm (6") I.D. Suits turbos with 6" front covers

CAST ELBOWS

The Aeroflow Performance tight radius cast aluminium 90 degree elbow is perfect for those who wish to weld an extension on to their compressor housings. The compact design is great for tight bend turns in the pipe work application. The extra lip helps to keep your silicone secured. All Cast elbows have a 3mm (1/8") wall thickness
AF8803-200 2" (50.8mm)
AF8803-225 2-1/4" (57mm)
AF8803-250 2-1/2" (63mm)
AF8803-275 2-3/4" (70mm)
AF8803-300 3" (76 mm)

CARBON BELLMOUTHS

Aeroflow Performance Bellmouth-style velocity stacks are ideal for achieving maximum air velocity. Manufactured out of carbon fibre, these lightweight bellmouth velocity stacks increase the volume of air at your compressor inlet. 101mm (4") bellmouth has a 152.4 mm (6") O.D. so you can run an Aeroflow pod filter or turbo protector screen.
AF64-4971

BELLMOUTHS

Aeroflow Performance's Bellmouth-style velocity stacks are ideal for achieving maximum air velocity. Manufactured out of spun aluminium, these lightweight Bellmouth velocity stacks increase the volume of air at your compressor inlet. They come in polished and black anodized so they look awesome under the bonnet and you can chose between three sizes to meet your application needs. 76mm (3") bellmouth has a 152.4 mm (6") O.D. so you can run an Aeroflow pod filter.

Part No	Colour	Description

AF64-4072	Polished	152mm (6") inlet
AF64-4072BLK	Black	152mm (6") inlet

COMPRESSOR WHEEL SPEED SENSOR KIT

The Boosted speed sensor kit offers the ability to monitor the inner workings of your turbocharger to insure longer life and maximum performance. By constantly monitoring your turbochargers shaft speed through either a data logger or the speed sensor gauge, you acquire a more complete picture of your turbochargers performance. The data gained from this kit can be used to closely determining if the turbocharger is reaching its maximum performance. Whether that can be used for selecting the right turbocharger for your engine combination and/or insuring that it is not over speeding, allowing you to avoid potentially damaging operating conditions. The Boosted speed sensor gauge displays turbo speed data in real time with a 128x64 pixel graphical display with warning outputs at over speed. It provides maximum speed recall function which will retain the highest wheel speed for five minutes for easy mapping. It is a compact 52mm (2-1/16") circular gauge that can be easily attached to your A-pillar, dash, or any universal gauge pod. The Boosted speed sensor kit includes the Aeroflow Performance speed sensor (AF8050-1010), wiring harnesses, installation instructions and turbo speed gauge.
AF8050-1050

TURBO HEAT BAGS

Turbo Insulating Kit

The Turbo Kit was designed to protect and improve performance of the turbo. This universal kit will keep the turbo spooled up and it virtually eliminates turbo lag. The custom cut-to-fit kit comes with a substantial amount of material to cover turbos from the smallest automotive application to heavy-duty truck applications. Two Turbo Kits are available, a 4 cylinder kit and one for 6 & 8 cylinders.
4 Cyl. Turbo Insulating Kit TT15001
6 & 8 Cyl. Turbo Insulating Kit TT15002

TURBO BAGS / BLANKETS

The Aeroflow Performance turbo bag / blanket range provides high quality material selection, design, and construction, whilst at an affordable price. The turbo bag isolates the heat produced by your turbocharger. This will prevent that heat from damaging components surrounding the turbocharger within your engine compartment such as wiring, hoses and plastics. When the heat is isolated in the turbocharger it improves turbocharger efficiency by keeping the exhaust gases hot. Resulting in faster spool up of the turbocharger and thus less turbo lag and a more linear power curve. Available in three different options black, titanium and carbon Universal replacement turbo bag springs available AF59-2100

STANDARD SERIES

High temp silica material rated to 1370°C/2500°F internal & 600°C/1100°F external
AF91-1006 Suit GT25/GT28 Internal gate (T28)
AF91-1002 Suit GT30-35/GT40 External gate (T3)
AF91-1004 Suit T04 & GT42 External gate (T4)
AF91-1005 Suit GT45/GT47 External gate (T6)

CARBON SERIES

High Temp Carbon material Rated to 1370°C/2500°F internal and 1000°C/1832°F external
AF91-8806 Suit GT25/GT28 Internal gate (T28)
AF91-8802 Suit GT30-35/GT40 External gate (T3)
AF91-8804 Suit T04 & GT42 External gate (T4)
AF91-8805 Suit GT45/GT47 External gate (T6)

TITANIUM SERIES

High temp titanium material rated to 1370°C/2500°F internal & 1370°C/2500°F external
AF91-8006 Suit XR6 BA/BF/FG or GT30/GT35 with internal gate (T28)
AF91-8002 Suit GT30-35/GT40 External gate (T3)

WASTEGATES

BOOSTED EXTERNAL WASTEGATE

Aeroflow Performance wastegates are designed to control the turbochargers boost by bypassing turbine inlet exhaust gas via a spring loaded valve diaphragm assembly. Spring rate, in conjunction with boost pressure signal and back pressure, control the opening point of the wastegate valve. Once the spring rate has been overcome, the valve will open. This causes exhaust flow to be diverted away from the turbine side of the turbocharger, effectively slowing and/or stabilizing the turbines wheel speed. This stabilization results in a smooth and steady boost pressure level, created by the compressor wheel of the turbocharger. Open pressure of the valve can be controlled via spring rate and or a boost controller, such as a manual boost controller or an electronic boost controller.

The Aeroflow Performance external wastegate features an internal valve constructed from high temp NiCrFe based alloy. Other features include a high temperature silicone nomex reinforced actuator diaphragm and stainless steel actuator springs that delivers consistent boost pressure at high temperatures. Nitronic stainless steel is used for the valve seat and valve bushing which all offer longer product life at extreme temperatures.

Aeroflow Performance wastegates (38mm, 44mm only) feature water cooling ports (2 x M8x1.0mm) for those heavy duty applications. These are optional and can be disregarded if not required. There are also three lower O2 pressure ports and two top O2 pressure ports (5 x M10x1.00mm) for easy installation this eliminates the need to rotate the actuator top hat, two stainless steel plugs and gaskets are included for unused lower air ports. Included in the kit for the water cooling ports are two stainless steel fittings and gaskets to a -4AN, for the O2 ports two fittings and gaskets to -4AN both are stainless steel. Two banjo bolts in stainless steel and alloy banjo's with gaskets are included for a barb option to use a rubber/silicone 6mm vacuum hose.

Aeroflow Performance wastegates come pre-set to 1 bar (14.7 PSI). This can easily be altered by purchasing and installing springs from Aeroflow's accessory spring range. The wastegate also includes required stainless steel hardware for installation which includes: valve seat, inlet V-band clamp/flange and outlet V-band clamp/flange.

AF9552-1605	60mm	Inlet seat valve seat

WASTEGATE SPRINGS

The Aeroflow Performance wastegate has a variety of springs to suit different boost levels. Pre-installed with 1 Bar (14psi).

Different spring combinations may be required to suit different boost requirements and tuning which are sold separately please refer to chart for more information on these springs. The tuner can use combinations of up to 3 springs to achieve the base boost pressures required. To aid in the identification of these springs they are colour coded. When selecting your spring rate, the total boost psi pressure is determined by adding the spring rates together. Wastegate spring selection will determine the minimum and maximum boost pressure that you want to run, and your control method. Care should be taken when selecting boost pressures until the engine can be run on a dyno to ensure safety. Always consult an expert when making boost changes, and it is recommended that the car be checked on a dyno, as high boost and/or lean air/fuel mixtures can cause engine damage or worse, total failure.

Replacement Inner Springs

BILLET INTERNAL WASTEGATE ACTUATORS

The Aeroflow Performance billet internal wastegate actuator is designed to provide better turbo response, stable boost control and better management of boost pressures. This billet actuator is constructed from high grade aluminium with stainless steel adjustable rod and connecting clevis for corrosion resistance which makes it a much stronger and more reliable replacement for any OEM application. The ability to interchange for various spring pressures are great for any application to suit a range of boost pressures.

Dimensions:
Body length = 75mm (2-61/64")
body diameter = 67mm (2-5/8")
rod actuator adjust length = 138mm (5-7/16" to 6-19/64")
5mm (13/64") barb

EXTERNAL WASTEGATE MERGE

Aeroflow external wastegate merge is designed to allow an external wastegate to be welded onto a turbo manifold collector or turbo manifold runner pipes. When this is done with just a single pipe it creates a weak point prone to cracking and/or breaking especially with extreme heat cycles. This unique curved design is intended to be strong which extends past the weld joint to allow for a strong and robust lap joint. This allows you to position the merge anywhere on the outside radius of the 90 degree bend of a 2.5" OD piece of tubing. Made from cast 316 weldable stainless steel (compatible with 304 stainless). The wastegate flange side allows use of any brand wastegate by welding your flange of choice on, whether it be a 44mm, 50mm or 60mm.

AF9552-1010 Cast Stainless

Electronic StraightGate eSG50 External Wastegate

The StraightGate50 eSG50 from Turbosmart is a 50mm (1.97in) butterfly valve style external wastegate for turbocharged engines. The StraightGate50 provides more flow than any conventional 60mm poppet style valve while also providing more control and almost linear response for unparalleled boost control throughout the entire operating range. This is Boost Control re-imagined!
Features: 50mm (1.97in) Butterfly Valve. Full Electronic Control Liquid Actuator Cooling Provision. Strap Type V-Band Clamps User Adjustable Actuator Position. Endless Boost Control Strategies Onboard (0-5v) Actuator Temperature Sensor. Onboard (0-5v) Valve Position Sensor. 7 Wire Unterminated Flying Lead loom
TS-0565-1002

GenV Electronic External Wastegate

Turbosmart's Patent Pending, eWG wastegates are a fully electronic actuated wastegate - Built on the successful, class leading GenV wastegate architecture, now with the kind of control never seen before. Starting with a Turbosmart's GenV wastegate body, you can be confident the mounting orientation will match your existing manifold & outlet hardware. The GenV wastegate already had class leading flow capacity & heat handling characteristics. Now featuring the Turbosmart Patent Pending eWG actuator system, you can be sure of unparalleled control as well.

There are no springs, no hoses and no boost reference signal, nor any of the limitations associated with any of them. Gone are 'Minimum' boost levels associated with base spring pressure or the heat related issues with hoses. If your manifold priority is good enough, you can set your boost anywhere from zero up to 'All of it' - All from your laptop or tuning interface
Features: Class Leading, CFD & Bench Validated Flow Performance Nitronic 40 Valve Guide & High Temp 347 SS Body Liquid Cooled, Electronic Actuator. GenV HyperGate45 External Wastegate

The GenV WG45 HyperGate45 External Wastegate is a Motorsport proven, cost effective external wastegate - The highest flowing gate of its kind. The GenV provides extensive user configuration, world leading extended thermal performance, fatigue resistance and best in class flow performance for optimum control and longevity. The GenV External Wastegate from Turbosmart was a ground up rework of a classic and the only feature that rolled over from the Gen4 range was the mounting orientation. CFD optimized and validated in-house for maximum flow and thermal management, the GenV range has more features, options and performance than any other gate like it.

A direct fit upgrade to all Gen4 Turbosmart wastegates and feature our unique collar-locking system, variable actuator cap and base for easy, 360 degree optional routing of reference hoses, strap-type V-band clamps, optional liquid-cooling provision, 1/8" NPT reference ports and are provided with the full range of available springs.

TS-0555-1012 Black 14PSI spring

UNIVERSAL TWIN PORT INTERNAL WASTEGATE

The Twin Port IWG-75 uses the air-pressure differential between two sealed chambers to create a dynamic force which overcomes the mechanical spring force in the actuator. Creating a boost curve that is much more precise, and allows for a much wider boost range between minimum boost and maximum boost, than the single tier control offered by conventional actuators. This makes the Twin Port IWG-75 ideal for traction limited applications, such as front-wheel drive or drag racing vehicles. The IWG-75 is released to suit Borg Warner's EFR range of high performance internally wastegated turbochargers, along with a universal fit model which can be used with our range of clevis rod ends, with more applications coming in the future. The Turbosmart wastegate actuator range has been designed as a stronger, more reliable replacement for OEM parts. Like all Turbosmart parts, billet construction means they are stronger and more durable than a stock actuator, while Turbosmart's focus on performance means boost comes on faster and holds on longer. Supplied With: Fitting Hardware, Brown/Purple 7psi Spring and Brown/Pink 7psi Outer Spring (installed)

- Stable boost control
- Improved boost response
- Flatter boost curve in the top end
- Interchangeable springs for a great range of boost levels

UNIVERSAL INTERNAL WASTEGATE

Turbosmart Internal Wastegate

Actuator provides better turbo response and greater sensitivity when managing boost pressures. Supplied With: Fitting Hardware, Brown/Purple 7psi Spring and Brown/Pink 7psi Outer Spring (installed)

- Silicone diaphragm with Nomex reinforcement to withstand high temperatures.
- High grade, billet aluminium construction.
- Stainless steel rods and connecting clevis for corrosion resistance.
- Locking Collar design cap allows for quick spring changes.
- Ideal for use with any Turbosmart boost controller.

IWG75 Universal 150mm rod 14 PSI Black **TS-0681-5142**

EX50 50mm External Wastegate

Designed to cope with the brutal conditions of extreme exhaust temperatures, the EX50 features not only a huge flow capacity, but also a compact size that is unmatched by competitors for a 50mm wastegate. The main goal for the EX50 was to create a wastegate that had a very large flow capacity in a package that is physically as small as possible. Good flow around a poppet-style valve depends on a smooth and generous bowl area into which the valve lifts. Many brands do not allow enough room around the valve head for good flow, instead relying on increasing the valve travel as a band-aid solution.

- Supplied with 3 springs that can be ganged together in various combinations to allow boost pressures of 7, 9, 13, 16, 20, 22 and 29psi. This is the largest range of boost pressures off-the-shelf.
- Body, valve and seat are made from high-temp stainless steel.
- Actuator housing machined from billet 7075 aluminium – much stronger & harder than 6061.
- Flow tests show that for the same valve lift, the EX50 outflows its nearest competitor by 18%.
- Internal valve shroud protects valve stem from excessive heat and prevents carbon-related sticking.
- Top-hat style Nomex-reinforced silicone rolling diaphragm for longer valve travel.
- 90° banjo-style boost hose connectors.
- V-band clamp mounting system, supplied with 304 stainless weld-on adaptors (base flange is compatible with TIAI 44 flange when used with GFB adaptor).

EX50 50mm External Wastegate **GFB7001**

WASTEGATE BLANKETS

WASTEGATE TURBO BAG / BLANKET

The Aeroflow Performance external wastegate bag / blanket range provides high quality material selection, design, and construction, whilst at an affordable price. These wastegate bags are designed to help minimize the heat soak transfer between the main body and actuator body of the wastegate. This will allow a more stable operation of the wastegate valve allowing consistent performance of the turbocharger. The added benefit from these bags will prevent the heat from damaging components surrounding the external wastegates such as wiring and hoses. Will suit Aeroflow External Wastegates. May also suit other brands. Available in two different options titanium and carbon.

TITANIUM SERIES

AF91-8038	38mm wastegate bag titanium
AF91-8044	44mm wastegate bag titanium
AF91-8060	60mm wastegate bag titanium

AF91-8844	44mm wastegate bag carbon
AF91-8860	60mm wastegate bag carbon

BLOW OFF VALVES & ADAPTORS

50MM BILLET ALUMINIUM BLOW OFF VALVE WITH V-BAND

Aeroflow's new 50mm (1-31/32") billet aluminium universal high flow blow off valve is for use on turbo-charged and supercharged applications. The body and all internal components are CNC-machined from 6061-T6 aluminium. 1.98" (50.5mm) valve. 1/4" (7mm) vacuum / boost hose barb size. The flange is v-band design and comes with a 2" (50.8mm) weld on pipe.

Part No	Colour	Description
AF64-5050	Polished	50mm billet alloy high flow BOV
AF64-5050S	Silver	50mm billet alloy high flow BOV
AF64-5050BLK	Black	50mm billet alloy high flow BOV
AF59-5052	Aluminium	50mm weld on flange aluminium
AF59-5053	S/Steel	50mm weld on flange stainless steel
AF59-5050		Replacement diaphragm & O-Rings
AF59-5051		Replacement billet V-band clamp

AF59-2153	Yellow	11 psi Turbo spring (-18 to -20 in/Hg)
AF59-5054		Replacement O-Ring

PLUMB BACK BLOW OFF VALVE WITH V-BAND

This 50mm universal plumb-back blow off valve is one of the highest flowing on the market. For use on turbo-charged and supercharged applications. The body and all internal components are CNC-machined from 6061 aluminium alloy. 1.98 in (50.5mm) valve. Oversized 7mm hose barb. 34mm plumb back option included with other sizes sold separately. Flange is v band, and comes with a 2" weld on pipe. Available in both black and polished options.

AF59-2153	Yellow	11 psi (-18 to -20 in/Hg)
AF59-5054		Replacement O-Ring

COMPACT BLOW OFF VALVE

The AeroFlow Performance universal compact vent to atmosphere blow off valve is designed to relieve compressor pressure surge caused by changing gears or backing off the throttle. For use on turbocharged and supercharged applications.

The body and all internal components are CNC-machined from 6061 aluminium alloy. 000mm valve. Oversized 7mm hose barb. Flange is v band, and comes with an aluminium and mild steel weld on adapter.

AF64-5049 Silver Anodized Finish
AF64-5049BLK Black Anodized Finish

GFB has the largest range of blow-off valves on the market, from the silent plumb back type to ear shattering dump valves.

Base Adaptors

Screw-on replacement base adaptors to suit various hose and pipe sizes. For use on blow-off valves part 1001-1005.

20mm Hose Adaptor	GFB5020
25mm Hose Adaptor	GFB5025
30mm Hose Adaptor	GFB5030
35mm Hose / 25mm (1") Pipe Adaptor	GFB5035
38mm (1.5") Pipe Mount Adaptor	GFB5038

Screw-on replacement base adaptors to suit various hose and pipe sizes. For use on Stealth FX and Deceptor Pro.

20mm Hose Adaptor	GFB5320
25mm Hose Adaptor	GFB5325
30mm Hose Adaptor	GFB5330
33mm Hose Adaptor	GFB5333
35mm Hose / 25mm (1") Pipe Adaptor	GFB5335

Hose Plugs

Various sized hose plugs to block plumb back hoses in full atmosphere-venting applications.

20mm Hose Plug	GFB5520
30mm Hose Plug	GFB5530

Whistling Trumpet

Just in case you want to sound different, here's the answer. During normal driving conditions, this trumpet gives a typical BOV "whoosh" sound, but once the revs and boost level rise, a loud, high pitch whistle noise takes over. Note that there are a few conditions that must be fulfilled to get the most out of this product. Your blow-off valve should be set to full atmosphere venting, and boost must be at least 10psi (0.68 bar). The whistle noise is dependent on air velocity through the trumpet, and low-boost set-ups will not be effective.

Whistling Trumpet GFB5701

For all Stealth FX, Deceptor Pro and WRX Hybrid BOVs. Note that 200SX's require at least 17psi to make this trumpet whistle. Use 5702 on this car if boost is lower.

Whistling Trumpet GFB5702

For all other GFB valves with trumpet outlets.

Weld-on Pipes

Weld-on pipes for custom blow-off valve installations. For use with 5035, 5038, 5335 and 5338 base adaptors.

1" Mild Steel Weld-on Adaptor	GFB5601
1" Aluminium Weld-on Adaptor	GFB5602
1" Stainless Steel Weld-on Adaptor	GFB5603
1-1/2" Aluminium Weld-on Adaptor	GFB5604
1-1/2" Stainless Steel Weld-on Adaptor	GFB5605

BLOW OFF VALVE ADAPTERS

AeroFlow Performance has designed these blow off valve bolt on adapters for various direct fit applications. They will allow our AF64-5050 and AF64-5051 to be a bolt on item for these suited applications. All in Black anodised finish. New silicon O-ring seal included.

AF64-5060BLK	25.4mm (1") clamp on
AF64-5058BLK	38.1mm (1.5") clamp on
AF64-5059BLK	HKS to AeroFlow conversion adapter
AF64-5057BLK	BMW 135, 335, 535 and X5
AF64-5054BLK	Mazda 3, Mazda 6 and CX-7
AF64-5052BLK	Mitsubishi Evolution all models
AF64-5055BLK	Nissan R35 GTR (2 included)
AF64-5053BLK	Subaru WRX 2002 to 2007 and STI 2004 to 2013
AF64-5056BLK	Subaru WRX 2008 to 2013, Liberty 2005 to 2009

GFB Respos TMS

As the name suggests, the GFB Respos is designed specifically with the aim of improving throttle response and reducing turbo lag. What's TMS? GFB's Turbo Management System is the term we apply to our diverter valves that have features designed specifically for the purpose of turbo lag reduction. Tests show that TMS features can return the engine to peak boost up to 30% faster than a factory diverter valve when shifting gears.

On top of the TMS benefits, the Respos also packs GFB's patented adjustable venting bias system found on the Stealth FX. tms-respos-image-2 This unique system allows the amount of air vented to either recirc or atmosphere to be infinitely varied to change the venting sound like a stereo volume dial! So if you want noise with your performance, the Respos can deliver! By fine-tuning the venting ratio, you CAN achieve a blow-off sound WITHOUT throwing a CEL, running rich, stalling, using more fuel or causing any other problems commonly associated with aftermarket valves on cars with MAF sensors.

DECEPTOR PRO II

- Remote proportional venting bias/volume control- from silent to loud or anywhere in between
- Sleek, compact in-car BOV volume controller with backlit dial
- End point adjustment to control maximum vent to atmosphere bias setting
- Volume adjustment mechanism driven by a high-torque geared electric motor
- Durable, low-friction gear train supported by precision sealed ball-bearing
- Supplied with all parts and wiring required to have it up and running quickly and easily

Plumb Back Adaptors

Screw-in replacement plumb-back adaptors to suit various hose sizes. Fits all GFB BOVs except Basic (1004), WRX Hybrid (1006) and SV45 (1020).

20mm Plumb Back Adaptor	GFB5220
25mm Plumb Back Adaptor	GFB5225
30mm Plumb Back Adaptor	GFB5230
33mm Plumb Back Adaptor	GFB5233

Screw-in Plug & Thread Adaptor

If you have a GFB blow-off valve with two outlets and want to plug one of them, this is the plug to use. It replaces either a trumpet or recirc outlet to effectively disable the venting port. On Hybrid valves for example, it is used to change from 50/50 to full atmosphere or full recirc venting, by plugging the appropriate outlet.

Screw-in Plug	GFB6107
Thread Adaptor	GFB6309

Hose Adaptors

Hose adaptors allow the standard V-band clamp universal BOVs to be fitted to a clamp-on hose.

BOV V-Band to 34mm Hose Adaptor	TS-0205-2009

Universal Blow-Off Valves

All Turbosmart BOVs are made out of tough and durable billet aluminium and offer a host of features designed to give them superior flow and performance. Turbosmart's Universal Fit BOVs have been developed to fit most popular makes and models and come supplied with pictorial fitting instructions. The Turbosmart line has been updated and improved. The new style BOVs have been made lighter and more compact without sacrificing flow and the universal models now feature quick release billet V-band clamps to attach them to the adapters.

Race Port

With an oversize 52mm inlet, the Race Port is Turbosmart's largest and highest-flowing blow-off valve, outflowing all competitors in its class. Lightweight and compact, this product is ideal for high horsepower, turbo or supercharged racing applications. Supplied with quick release V-band clamp, aluminium weld flange and swivel nipple.

Race Port Blow-off Valve (Blue)
Race Port Blow-off Valve (Black)

TS-0204-1001
TS-0204-1002

Race Port

Completely redesigned the new Race Port blow-off valve is a fraction of the size of the superseded model and provides an ideal combination of maximum flow and minimal weight. The new Race Port is perfect for hard core racing and street applications where big power and fast response is crucial.

Blue TS-0204-1101 **Black** TS-0204-1102

Vee Port Pro

Redesigned from the ground up, the new Vee Port PRO is 20% smaller and 33% lighter than its predecessor. Featuring a hard anodized aluminium piston, the new Vee Port PRO offers high flow capabilities in a lighter, more compact package.

Blue Vee Port Pro
Black Vee Port Pro

TS-0205-1130
TS-0205-1131

Vee-Port

Features a variable exhaust port system, providing superior venting of excess pressure. Simple and effective. Small footprint makes it an ideal choice for larger capacity, space-restricted engines. Preferred choice of drifting and circuit enthusiasts. Supplied with quick release V-band clamp, aluminium weld flange and swivel nipple.

Vee-Port Blow-off Valve (Blue)
Vee-Port Blow-off Valve (Black)

TS-0205-1100
TS-0205-1101

Supersonic

A BOV for racers and serious enthusiasts who want to be noticed. Supersonic provides a superior flow performance with a unique "supersonic" sound. Suitable for all turbocharged vehicles.

Extremely popular with racers and show-car builders world-wide. Supplied with quick release V-band clamp, aluminium weld flange and swivel nipple.

Supersonic Blow-off Valve (Blue) TS-0205-1300
Supersonic Blow-off Valve (Black) TS-0205-1301

Plumb Back

Fully recirculating valve. A quiet alternative to the atmospheric BOV, the Plumb Back systems vents all excess pressure back into the intake system. Ideal for cars with sensitive Air-Flow systems and off-road applications as the fully-sealed design of the Plumb Back prevents any foreign matter entering the system. Supplied with quick release V-band clamp, aluminium weld flange and swivel nipple.

Model-Specific Universal Blow-Off Valves

Some engine bays have space or design constraints that make fitting a Multi-Fit BOV difficult or even impossible. The Model-Specific BOV range has been designed to cater for those cars. Model-Specific BOVs are supplied as "Bolt-On" kits, complete with all the accessories needed for fitting. Most require no special tools and can be installed in under an hour.

Mitsubishi Dual Port

Three BOVs in one. The Dual Port can be configured to vent to the atmosphere, back into the air intake or both! Plumb Back system for quiet, road-compliant operation, Supersonic for the race track, or Dual Port for the best of both worlds. Fits Mitsubishi EVO VII to X & Ralliart Colt

Mitsubishi Dual Port Blow-off Valve (Red Only) TS-0205-1020

Nissan Dual Port

Features both atmospheric and bypass ports. Easily converts to a fully atm or fully bypass valve. Sequential ports provide a quiet operation on mild boost and full performance at full boost. Simple installation and set up. Suits Nissan Skyline GT-S and GT-R, R32, R33, R34 and R35 (excluding R32 GTS-t)

Nissan Dual Port Blow-off Valve (Black Only) TS-0205-1026

Subaru WRX Vee-Port

Atmospheric BOV. Features a variable exhaust port system, providing superior venting of excess pressure. Easy to install and set up. Fits all 2001-2007 Subaru WRX models.

Subaru WRX Vee-Port Blow-off Valve (Blue) TS-0205-1115
Subaru WRX Vee-Port Blow-off Valve (Black) TS-0205-1116

Subaru Dual Port

A fully recirculating BOV, quiet operation, ideal, high-flow replacement for the factory unit for enthusiasts who don't want to be noticed. Easy to install and set up. Fits all 2001-2007 Subaru WRX models.

Subaru Dual Port Blow-off Valve (Blue) TS-0205-1015
Subaru Dual Port Blow-off Valve (Black) TS-0205-1016

WRX Supersonic

Preferred venting solution for serious street tuners and racers. Ideal for enthusiasts who want big flow and even bigger sound. Fits all 2001-2007 Subaru WRX models.

WRX Supersonic Blow-off Valve (Blue) TS-0205-1315
WRX Supersonic Blow-off Valve (Black) TS-0205-1316

The New Vee Port Pro (Subaru Vehicles)

Re-designed from the ground up, the new Vee-Port PRO Subaru is 20% smaller and 33% lighter than its predecessor. Featuring a hard anodised aluminium piston, the new Vee Port PRO offers high flow capabilities in a lighter, more compact package. The best news however is that the new Subaru Vee Port PRO actually costs LESS than the product it replaces! There has never been a better time to upgrade to Turbosmart.

Application
Suits all Subaru WRX 2001-2007 models and Forester 05-07.

Features

Unique high flow ports and new piston design provides quicker response and better sealing capabilities. Easy to install via a bolt-on flange, optimized spring for greater adjustability and a 360 degree swivel vacuum fitting. Available with a blue or black cap.

Blue Vee Port PRO Subaru WRX 2001-2007 TS-0205-1135
Black Vee Port PRO Subaru WRX 2001-2007 TS-0205-1136

BIG BUBBA PLUMB BACK SLEEPER

Big Bubba has been designed for big horsepower, high performance and high boost turbo and supercharger applications. Big Bubba is, as its name suggests, big, bold and in-your-face. It is by far the largest valve in the Turbosmart range. But it's not all about the size and looks, Big Bubba packs a lot of punch too! With a heavy duty, CNC billet aluminium body and components and a 52mm (2.05") hard anodised aluminium two-piece piston, Big Bubba gives a new meaning to the term hardcore. A -4AN threaded vacuum port offers a wide variety of connection methods. Outlet fitting size: 50mm (2.0"). To make things easy we've ensured all Big Bubba valves use the same inlet flange and V-Band clamp as the Turbosmart Race Port. All that in a package that weighs only 790 grams (1.7lbs)!
Big Bubba Plumb Back Sleeper Universal TS-0204-1203

Compact Series Blow-Off Valves

The Compact Series BOVs have been designed as a bolt-on replacement for plastic factory Bosch or Denso BOVs, the Compact Series products offer superior flow, full adjustability and greater structural integrity under boost. Ideal for cars with constrained engine bay access like VWs, Audis, Porsches, Seats, SAABs, Mazda MX5 and Ford XR6 Turbo. Very popular with motorcycle drag racers

Compact Series - Plumb Back

Fully recirculating BOV. The Plumb Back systems vents all excess pressure back into the intake system. Great for enthusiast not wanting to be noticed. Fits most cars using the factory BOSCH or DENSO bypass valves. Available in 20mm and 25mm outlet diameters.

Plumb Back Blow-off Valve 20mm Outlet TS-0203-1201
Plumb Back Blow-off Valve 25mm Outlet TS-0203-1202

Compact Series - Dual Port

Hybrid-type BOV. Dual Port vents both to the atmosphere and back into the air intake. Dual ports with sequential timing allow quieter operation during normal driving, while getting all the benefits of a Supersonic BOV under race conditions. Easily converted to a fully atm or fully bypass unit. Fits most cars using the factory BOSCH or DENSO bypass valves. Available in 20mm and 25mm outlet diameters.

Dual Port Blow-off Valve 20mm Outlet TS-0203-1011
Dual Port Blow-off Valve 25mm Outlet TS-0203-1012

Compact Series - Supersonic

Fully atmospheric BOV for racers and serious enthusiasts who want to be noticed. Supersonic provides a superior flow performance with a unique "supersonic" sound. Extremely popular with racers and show-car builders world-wide. Fits most cars using the factory BOSCH or DENSO bypass valves. Available in 20mm and 25mm outlet diameters.

Supersonic Blow-off Valve 20mm Outlet TS-0203-1306
Supersonic Blow-off Valve 25mm Outlet TS-0203-1307

Compact Plumb Back - Universal

Full recirculating BOV. The Plumb Back system recirculates all excess pressure back into the intake system. Great for enthusiasts not wanting to be noticed but wanting the performance and reliability benefits of a quality BOV. Fits most cars using the factory BOSCH or DENSO bypass valves.

Compact Plumb Back - 20mm TS-0203-1221
Compact Plumb Back - 25mm TS-0203-1222
Compact Plumb Back - 34mm TS-0203-1223

POWER PORT

The Power Port is Turbosmart's largest and highest flowing blow-off valve ever, resetting the flow benchmark set by our popular and highly regarded Race Port BOV. Designed to be as light as possible, to keep vehicle weight down. Its cutting edge dual-chamber design means it can be held open with the use of a solenoid to aid turbo response and control during staging to give the best possible launch.

Power Port Blow-off Valve (Blue) TS-0207-1001
Power Port Blow-off Valve (Black) TS-0207-1002

TURBOSMART BOV Adapters

These adapters suit the new style Turbosmart BOVs with V-band attachment. The Race Port BOV uses a special 50mm V-band and all other universal BOVs use the standard 38mm V-band clamp. If you are replacing an older style Turbosmart BOV you can use the V-band to grub screw adapters to attach the V-band style BOV to the older style weld on adapter.

FUEL CUT DEFENDERS

TurboSmart Fuel Cut Defenders

Most late model cars have in-built defence mechanisms to guard against increases in boost pressure. Such systems are important, but can be an obstacle when increasing boost pressure. A TurboSmart FCD will allow boost pressure to be increased above the factory level and prevent momentary shutdown of the fuel injection system.

FCD-1 (Pneumatic)

Allows for an accurate increase in the factory fuel cut-out level without the need for cutting/splicing wires or affecting off-boost conditions. Can be locked to prevent tampering. Suits most turbo cars using a MAP sensor. To be used in conjunction with a TurboSmart Boost Controller.

Pneumatic Fuel Cut Defender TS-0303-1001

FCD-2 (Electronic)

The FCD2 alters the output of a factory 5V MAP or AFM at an adjustable level to accurately raise the factory fuel cut point. Features LED indicators for easy setup. Adjustable release feature ensures you retain the safety of having a fuel cut to protect your engine from over boosting. Adjustment feature enables the sensor signal to be clamped flat or at another gradient to suit your application. Suits most turbo cars. To be used in conjunction with a TurboSmart boost controller.

Electronic Fuel Cut Defender TS-0303-1002

G-Force III Electronic Boost Controller

The latest iteration of GFB's feature-packed electronic boost controller now has the ability to monitor and display your engine's air/fuel ratio in either Lambda or AFR. By connecting the analogue output of most wideband O2 controllers (i.e. Innovate LC-2, AEM UEGO etc, sold separately) to the G-Force III's auxiliary input, you can toggle between boost pressure and air/fuel ratio display. Not only does this save you from having to install a separate AFR gauge in your car, it can also save your engine! A lean mixture at high boost can destroy an engine in seconds, and a stand-alone AFR gauge is next to useless when accelerating hard as your concentration is likely to be (and should be!) on the road in front of you. The G-Force III safeguards your engine against a lean mixture by lowering boost to the minimum setting, and visibly warning you by flashing the display lighting. Whether your car is a daily driver or an all-out track weapon, the G-Force III has the features to tailor boost to suit your needs. Set up to 6 boost presets and select on the fly, use the scramble feature for overtaking, launching, towing, or protecting the engine, and you can even customize the lighting colour to suit your interior! No other EBC on the market offers the features, control, ease of use, and value for money like the G-Force III!

- For Boost Pressures Up To 50psi (3.45bar, 345kpa)
- Adjust Peak Boost, Rise Rate, And Closed-Loop Correction
- Display Boost Pressure In Psi, Bar, Or Kpa
- 6 Boost Presets, Individually Programmable
- Unique "Scramble" Feature With Remote Switching
- Peak Boost Recall • Air/Fuel Ratio Display In AFR Or Lambda (When Connected To A Wideband O2 Controller)
- Separately Adjustable Overboost And Lean Mixture Warning/Boost Cut • Touch Buttons With User Selectable Illumination Colours
- Auxiliary Input To Switch Boost Presets Or Activate Scramble
- 1/2" Size Casing, Fits Standard Stereo Slot
- Supplied With Mac 3-Port Solenoid

GFB3005

3 PORT SOLENOID

Aeroflow's replacement 3 port solenoid kit is supplied complete with fittings, mounting and wiring loom. This handy complete kit is also perfect for use with aftermarket installation to your vehicle to control your boost and set it precisely. This can be custom wired into many late model vehicles by your tune shop. Suits AF49-1030 & AF49-1039

AF49-1036

DIGITAL BOOST CONTROLLER

- Three stages of boost pressure, create your personal setting and save them. • Rapid switching, allows you to switch between settings immediately.
- Over boost alert to prevent turbo and engine damage.
- Scramble function allows burst of power.

AF49-1039 Electronic boost controller.

AF49-1036 Replacement electronic boost controller solenoid kit

TURBO TIMERS

PENCIL TURBO TIMER

- Designed for 12 volt application to protect engine's efficiency and extend turbo life.
- Easily adjust timer from 10 seconds – 19 minutes.
- Also features a built in voltage gauge.
- Slim pencil design for easy mounting.
- 100mm (3-15/16") long 19mm (3/4") diameter

AF49-1026

MINI TURBO TIMER

- Designed for 12 volt application to protect engines efficiency and extend turbo life
- Easily adjust timer from 15 seconds – 3 minutes.
- Mini design for easy mounting

AF49-1025

G-Force II Electronic Boost Controller

The GFB G-Force II boost controller is designed to bring on boost as fast and accurately as possible on a turbocharged vehicle. It incorporates an advanced and unique boost control strategy that allows the user fine control over the peak boost, rise rate, and closed-loop correction. The G-Force II also features a new user interface, making menu navigation and setup as fast and simple as possible. • 6 individually programmable boost preset memories, selectable on-the-fly • Closed-loop correction - helps prevent boost variations • New scramble boost strategy - increase or decrease boost for a certain amount of time at the push of a button • Overboost protection - shuts down the solenoid and flashes a warning if boost goes too high • Peak hold display • Real-time boost/vacuum gauge display - in BAR, kPa, or PSI • External input - can be used to activate scramble or select boost memories remotely • Adjustable button colours - tie in with the car's existing lighting

GFB3004

BOOST CONTROLLER TEE

Easily adjustable from under the bonnet, simple fitment with included mounting bracket. 5mm barbs. Fast boost gated system.

Description
Manual boost controller.
Manual boost controller.

DIESEL BOOST CONTROLLER

The Aeroflow Performance diesel specific manual boost controller is a dedicated unit for diesel turbocharged engines running variable vane turbochargers, providing accurate boost control from the turn of the knob. This manual boost controller allows users to adjust boost control and spool rate; therefore increasing engine power, reduce turbo lag and create a linear boost curve. This great for all types of driving conditions from adjusting boost for towing, or changing it if the EGT gets too high and to bring boost on earlier or hold it longer. When the factory boost curve is erratic this can lead to engine or turbo premature failure.

AF64-2190BLK

ELECTRONIC BOOST CONTROLLER

- Two stages of boost pressure, create your personal setting and save them.
- Rapid switching, press only one button and switch the setting immediately.
- Over boost alert to prevent turbo and engine damage.
- Pressure limited to 43 PSI (2.9 BAR).

AF49-1030 Electronic boost controller.

AF49-1036 Replacement electronic boost controller solenoid kit

BOOST CONTROLLERS

Reactor Boost Controller

The GFB Reactor is a dual-stage boost controller, which allows one of two independently adjustable boost levels to be selected from the driver's seat. The Reactor comes with a complete wiring harness, along with a fuse, "Rocket Launcher" style switch and all necessary plugs to make installation a breeze. All you need to do is find a 12v power source and plug it all together – no soldering. Another unique feature of the Reactor is its air-bleed return outlet, which gives you the option to feed the bleed-off air back to the inlet to ensure the entire system stays closed to the atmosphere, in the same way that most modern factory systems do. Available in Black/Silver Only.

- Features:**
- Made from solid Aluminium 6061 T6 billet. • Lightweight rugged construction - looks great too • Allows two levels of boost to be selected from inside the cabin. • Unlike other brands on the market, both boost stage adjustments are completely independent of each other. • Allows bleed-off air to be plumbed back to the inlet, just like the factory system. • "Rocket Launcher" style in-cabin switch.
 - "Plug together" wiring harness, no solder joints or additional wires needed.

Reactor Dual Stage Boost Controller GFB3002

Electronic Boost Controllers

More than just a boost controller, e-Boost2 puts you in total control of your turbocharger. With a host of features and state-of-the-art software, e-Boost2 is the one accessory all owners of turbocharged cars should have! Easy to use, yet technologically advanced, e-Boost2 is equally at home in a street-going vehicle as it is in a top-level race car.

- Factory Preset Mode provides beginners with an easy start-up option. • Advanced User Mode unlocks up to 6 alternate boost mapping functions. Presets for FWD, RWD, AWD, Bike and Drag racing needs. • Gear-based Boost Mapping lets you set a different boost for each gear • Adjustable Boost Levels can also be mapped against TIME or RPM. • Fully programmable auxiliary output controls water spray, methanol or nitrous injection
- RPM Compensation Feature eliminates boost drop-off at high RPM
- Peak Hold/Max Boost Recall function monitors boost and RPM.
- Programmable Display can be configured to KPA, Bar or PSI
- Gate Pressure function eliminates wastegate creep
- Accurate Display to within +/-0.5% of full scale making it an ideal Boost Gauge
- Programmable, audible warning alarm
- Integrated input for optional shift/warning lights

Sport Compact e-Boost2 60mm (Sleeper)

Suits most turbocharged street and race cars. Ideal for Sport Compact pillar/dash mounts. Back-lit, auto-dimming display, Black Face/Black Bezel combination. Available in 40 and 60psi models.

e-Boost 60mm 60psi TS-0301-1003

Sport Compact e-Boost2 60mm (White)

Suits most turbocharged street and race cars. Ideal for Sport Compact pillar/dash mounts. Back-lit, auto-dimming display, White Face/Silver Bezel combination. Available in 40 and 60psi models.

e-Boost 60mm 60psi TS-0301-1001

Sport Compact e-Boost2 60mm (Black)

Suits most turbocharged street and race cars. Ideal for Sport Compact pillar/dash mounts. Back-lit, auto-dimming display, Black Face/Silver Bezel combination. Available in 40 and 60psi models.

e-Boost 60mm 60psi TS-0301-1002

Traditional e-Boost2 66mm (Silver)

Suits most turbocharged street and race cars. Ideal for Traditional 2.5/8" pillar/dash mounts. Back-lit, auto-dimming display, Silver Face/Silver Bezel combination. Available in 40 and 60psi models.

e-Boost 66mm 60psi TS-0301-1004

Traditional e-Boost2 66mm (White)

Suits most turbocharged street and race cars. Ideal for Traditional 2.5/8" pillar/dash mounts. Back-lit, auto-dimming display, White Face/Black Bezel combination. Available in 40 and 60psi models.

e-Boost 66mm 60psi TS-0301-1005

Traditional e-Boost2

Now standard with 60psi max boost operating pressure, e-Boost2 is a second generation complete Boost Management System. With market-leading features and end state-of-the-art software, e-Boost2 is the one accessory all owners of turbocharged cars should have! Easy to use, yet sophisticated and technologically advanced, the e-Boost2 is equally at home in a street-going vehicle as it is in a top-level racecar. e-Boost2 allows the user to control, monitor, map and compensate boost. But e-Boost2 is a lot more than just a boost controller – it can also control water spray, methanol or nitrous injection, manage shift/warning lights and read/monitor RPM. While e-Boost2 is fitted with a state-of-the-art software, it has been designed to be easy and logical to use.

e-Boost 66mm (2-5/8") 60psi Black TS-0301-1011

e-Boost 66mm (2-5/8") 60psi Black/Silver TS-0301-1013

Turbosmart 30PSI Boost Gauge

Boost Gauge

The Turbosmart boost gauge is the perfect accessory for any of our Gated Boost Control Valves.

Featuring precision mechanical operation, a black face with silver bezel, bright backlighting and a 30psi boost range. All hook-up and panel mounting hardware included. Aluminium dash mounting cup also available.

GBCV Boost Gauge 0-30psi 52mm – 2 1/16" TS-0101-2023

GBCV Boost Gauge Mount Cup 52mm – 2 1/16" TS-0101-2024

e-Boost Accessories

All Turbosmart Boost Controllers are supported by a wide range of accessories to aid and complement the boost controllers.

Twin LED Ring for e-Boost2

Houses two Shift/Warning lights (not included). Available in silver and black for both Sport Compact and Traditional models. Fits all e-Boost2 models. Optional LED lights available in four colours: Red, Green, Blue and Orange.

Twin LED Ring 60mm (Silver) TS-0301-2006

Twin LED Ring 60mm (Black) TS-0301-2007

Green LED TS-0301-2009

Blue LED TS-0301-2010

Orange LED TS-0301-2011

Dashboard/Windshield Mounting Kit for e-Boost2

Made from billet aluminium, generous range of vertical and horizontal adjustment. Suitable for all types of vehicles. Mounts to dashboards, A-pillars and windscreens using screws or adhesive supplied.

Mounting Kit 60mm TS-0301-2001

Mounting Kit 66mm TS-0301-2013

Roll Cage Mount for e-Boost2

Made from billet aluminium, generous range of vertical and horizontal adjustment. Fits diameters from 1,1/2" to 1,5/8". Ideal for all race applications.

Roll Cage Mount 60mm TS-0301-2002

Roll Cage Mount 66mm TS-0301-2014

Solenoid Kits

Replacement Solenoid Kit for e-Boost2. Suits all e-Boost2 models.

40 psi Solenoid Kit TS-0301-3003

60 psi Solenoid Kit TS-0301-3004

4-Port Solenoid TS-0301-2003

BOV Controller Kit

The BOV controller is an electronic device which controls the pressure signal to the BOV. It works by detecting a negative voltage change in throttle position. It then energises a solenoid to vent all of the air out of the BOV cap, causing a pressure differential between the piston of the BOV and the cap which will vent pressure from the intake system. Large diesel engines with larger turbochargers can experience compressor surge when coming off the throttle. The deceleration of the engine can be a restriction on the outlet of the turbocharger causing compressor surge. This can be disastrous on a turbo system which is producing high amounts of boost. The BOV controller can vent this build up of pressure, protecting the turbocharger. This can reduce the amount of rebuilds on your turbocharger as well as improve acceleration between gears. The kit consists of a BOV Controller, Specific Race Port BOV, Wiring Loom, Solenoid, Reinforced pressure tubing, Hose clamps and mounting hardware

BLUE RACEPORT TS-0304-1001

BLACK RACEPORT TS-0304-1002

e-Boost STREET

The e-Boost STREET is a brand new electronic boost controller aimed at the street performance market. It features many boost control capabilities found on its big brother – the e-Boost2, continuing the e-Boost tradition of providing class leading boost control, value for money and no nonsense features.

• **Boost Settings:** There are two boost settings – easily selected via the "turn-and-push" button. An external switch can also be used to change between boost groups if required.

• **Boost correction factor:** Many street cars with standard turbo systems suffer from boost drop off at high RPM. The Boost Correction Factor eliminates this problem and is exclusive to the e-Boost family.

• **Display:** An easy-to-read 3-segment display with adjustable brightness can be configured for PSI, KPa, or BAR and will flash when warning of over boost shutdown or rev limit, allowing the unit to be used as a boost gauge, tachometre, or a shift light.

• **Housing:** The unit is housed in a black anodized aluminium case 80mm wide x 25mm high x 95mm deep allowing the unit to be mounted within a DIN size opening.

• **Maximum boost level:** 30PSI / 2.05BAR.

• **Display mode:** Live display of Boost or RPM

e-boost street includes: • EBS Control unit • Wiring loom + installation kit

• Solenoid with mounting bracket and vacuum nipples

• Vacuum hose and hose clamps

INTERCOOLERS

Aeroflow Intercoolers

Aeroflow intercoolers are designed with a tube and fin core which has the highest thermodynamic dissipative process. Aeroflow tube and fin style intercoolers are available in both polished and black powder coated finishes. These universal intercoolers feature 76mm (3") inlet and outlets. (Intercooler mounts are female M8x1.25 thread) Max Pressure 50 PSI

Part No	Finish	Core Size WxHxT	CFM

V MOUNT STREET SERIES INTERCOOLER

The Aeroflow Performance Street series intercoolers have become quite a popular choice amongst the automotive scene as they are known for their great value and top quality proving to exceed expectations at just a fraction of the price. These V-mount intercoolers are specifically designed for v mount applications or can be used in any universal applications where the intercooler can be mounted horizontal with the inlet and outlets on the top of the intercooler. Made from a durable alloy which is TIG welded. All intercoolers are pressure tested with a recommended maximum of 50psi (3.44 Bar). Aeroflow street series intercoolers are designed with a tube and fin core which offer a low pressure drop which helps with stability on turbo applications. They are available in one universal core size with 63mm (2-1/2") inlets and outlets that have a raised lip for securing silicone hose. Each intercooler features two female M8x1.25mm mounting bosses and are available in silver or black powder coated finishes.

AF90-1015 Silver Finish

AF90-1015BLK Black Finish

RACE SERIES INTERCOOLERS

The Aeroflow Performance race series intercoolers provide the best cooling capacity, while safely increasing horsepower to provide street and race proven performance no matter the application. The tube and fin core is a straight through low restriction design for less pressure drop, resulting in higher flow and reduced lag time. With end tanks constructed from 5052 sheet aluminium for extreme durability which improves heat transfer. It has the highest thermodynamic dissipative process which will efficiently reduce intake air temperatures, while significantly improving engine output. They are available in universal core sizes with 76mm (3") inlets and outlets that have a raised lip for securing silicone hose. Each intercooler features two female M8x1.25mm mounting bosses and are available in polished and black powder coated finishes.

Part No	Finish	Core size WxHxT
AF90-1008	Polished	600mm (23") x 300mm (11-13/16") x 76mm (3")
AF90-1008BLK	Black	600mm (23") x 300mm (11-13/16") x 76mm (3")
AF90-1009	Polished	600mm (23") x 300mm (11-13/16") x 100mm (4")
AF90-1009BLK	Black	600mm (23") x 300mm (11-13/16") x 100mm (4")

RACE SERIES INTERCOOLER CORES

The Aeroflow Performance race series intercooler cores are designed for fabricators who wish to custom make their own intercooler. This makes it great for custom applications where conventional size and shape intercoolers do not work. This race series core provides the best cooling capacity, while safely increasing horsepower to provide street and race proven performance no matter the application. The tube and fin core are a straight through low restriction design for less pressure drop, resulting in higher flow and reduced lag time. They are available in universal core sizes and raw alloy to allow anything to be welded to it.

Part No	Core size Width x Height x Thick
AF90-1101	450mm x 330mm x 100mm
AF90-1102	260mm x 230mm x 100mm
AF90-1103	500mm x 300mm x 100mm
AF90-1108	600mm x 300mm x 76mm
AF90-1109	600mm x 300mm x 100mm

WATER TO AIR INTERCOOLERS

A water to air intercooler is one where the exchange of heat occurs between water and air. Water is passed through the core of the intercooler instead of air which is responsible for drawing the heat out of the intake air through the intercooler so that the heat from your charge pipes is transferred to the water. These water to air intercoolers can be mounted anywhere, and just needs to have water plumbed to it.

The Aeroflow Performance water to air intercoolers are great alternative to your conventional air to air intercoolers as you have a constant flow of cool water circulating through the intercooler core at all times. This is especially useful during drag racing, when the core temperature raises significantly during a pass, and then the cars sits still for several minutes. Another bonus is the incredible low pressure drop these water to air intercoolers provide with as low as 0.05PSI recorded on most of our range. Along with a great design in the core and end tanks allow it to operate at continuous pressure of up to 150 PSI (10.34BAR).

These water to air intercoolers can be installed to almost any application from drag car to street car. They are all a universal fitment, featuring -12ORB female ports for custom plumbing. These water to air intercoolers flow water, they require a water pump, a reservoir, and a heat exchanger mounted somewhere that will receive good airflow to cool the water. See page 265 for universal brushless water pumps and page 267 for universal heat exchanger.

AF90-3000

Total Size is 431mm (17") x 311mm (12.25") x 228mm (9")
Core Size is 241mm (9.5") x 228mm (9") x 228mm (9")
Recommended for up to 2500 CFM / 2000 HP
Maximum water/air pressure: 70PSI (4.82BAR)
Air Inlet/Outlet: 4" (4")

AF90-3001

Total Size is 381mm (15") x 165mm (6.5") x 152mm (6")
Core Size is 266mm (10.5") x 152mm (6") x 127mm (5")
Recommended for up to 1200 CFM / 1200 HP
Maximum water/air pressure: 70PSI (4.82BAR)
Air Inlet/Outlet: 88.9mm (3.5")

AF90-3002

Total Size is 341mm (13.43") x 376mm (14.8") x 228mm (9")
Core Size is 270mm (10.6") x 225mm (8.8") x 228mm (9")
Recommended for up to 1500 CFM / 1200 HP
Maximum water/air pressure: 70PSI (4.82BAR)
Inlet / Outlet: 88.9mm (3.5")

AF90-3003

Total Size is 395mm (15.55") x 510mm (20.08") x 305mm (12")
Core Size is 305mm (12") x 234mm (9.25") x 250mm (9.8")
Recommended for up to 3800 CFM / 3000 HP
Maximum water/air pressure: 70PSI (4.82BAR)
Air Inlet/Outlet: 114.3mm (4.5")

BY SPECIAL ORDER ONLY

Air to Air Intercoolers

PWR Performance Products are making full use of the laws of physics,

developing several of the most efficient intercoolers in the world. PWR use a revolutionary seamless rounded leading edge tube design throughout the manufacturing process. These tubes have an integrated internal fin with a straight through design, which improves heat transfer for less pressure drop, resulting in higher flow and reduced lag time. PWR intercoolers are individually hand manufactured using 12 FPI (fins per square inch) and can be custom designed by in house "Auto CAD" design division or simply just replace your current OEM system for better flow and performance.

PWR Intercoolers features and benefits

- Low restriction internal turbulators
- Leading edge tube wall thickness is efficient for strength
- Light weight • Tube dimension (PWR use 55,68 and 81mm)
- Core Thickness configuration up to 159mm thick
- Flexibility of custom designs exactly to your needs
- World class TIG welding • 10 working days for manufacturing
- State of the art controlled atmosphere brazing process
- Race and street proven performance
- Hi-tech "Auto CAD" design division • 100% Australian made
- 1 year manufactured warranty • Pressured tested and guaranteed

AERO 2 Intercoolers

The PWR Aero 2 Intercooler uses revolutionary seamless rounded leading edge tube design with unique internal fin, which incorporates a straight through design improving heat transfer for less pressure drop. The Aero 2 also has PWR's unique fin angle configuration with a high grade polished cast tanks. The cooler is also fitted with m8 mounting bosses top and bottom for easy installation. The Aero 2 is a PWR Australian Manufactured universal Intercooler option with all of the PWR performance features we are known for. All cast tanks are available in 2.5" or 3" outlets.

Liquid to Air Barrel Kits

The PWR Liquid to Air Barrel Intercooler is a world first exclusive in its design for the industry. The Radical cylindrical shape was designed for drag and street applications, providing maximum cooling, airflow and performance efficiencies. The 12-volt pump circulates water throughout the barrel providing a stable outlet temperature and the unique internal baffle system ensures an even amount of cooling is provided within the barrel itself. The system requires no ambient (external) airflow, which enables the unit to be mounted as close to the manifold as possible, reducing turbo lag and providing maximum performance. The PWR Liquid to Air Barrel Intercoolers is available as an individual unit or in Kit Form and are suited to machines producing horse power between 270-1200+ HP. The PWR Barrel intercooler comes in different sizes and are finished in a near chrome finish.

PWR Liquid to Air Barrel Intercooler benefits

- Unique cylindrical design • Improves turbo response
- More rapid effective cooling than air to air
- Promotes more dense air pressure for more boost application
- More consistent intake temperatures then air to air
- Available in different sizes (universal fit)
- Allows shorter intercooler pipe for less turbo lag
- Easy fitment • Comes in kit form • World class TIG welding

HELMETS

SIMPSON Helmets

Simpson Helmets have been the choice of champions for 48 years. All Simpson helmets feature ultra light technology which means that the materials chosen and the manufacturing process ensure helmets that are lightweight and balanced. The way every helmet should be. To find your size, measure around your head, directly above the brow line and refer to the helmet sizing chart. Simpson helmets ship with a clear shield unless otherwise noted and some Simpson Helmets are made to order and may require additional lead times.

Replacement F/C Air System Fire Rated Hose 6FT x .250"	SIFCC004 SIFCH256

EJECT HELEMT BLADDER

Helmet Air Bladder for Eject Systems

SI890-01-30

EJECT BULB INFLATOR

Eject inflator powered by small rubber bulb. Simpson's Eject Helmet Removal System is a small air bladder that fits easily into any helmet, without changing its fit or feel. In the event of a crash First Responders can help reduce the risk of secondary neck or spine injuries by inflating the Eject System which gently lifts the helmet off the head.

EJECT CO2 INFLATOR

Eject Inflator powered by small carbon dioxide cartridge. Includes one cartridge. Additional cartridges sold separately. Simpson's Eject Helmet Removal System is a small air bladder that fits easily into any helmet, without changing its fit or feel. In the event of a crash First Responders can help reduce the risk of secondary neck or spine injuries by inflating the Eject System which gently lifts the helmet off the head.

EJECT EMT AMBULANCE/TRACK KIT

Complete Eject Kit for track or ambulance contains:

- 3 EMT helmet bladders
- 1 Bulb Inflator
- 1 CO2 Inflator
- 4 CO2 Cartridges (16 grams each)
- 1 Track bag

Simpson's Eject EMT Ambulance/Track Kit contains three EMT Bladder Systems which consist of a small air bladder connected to a flexible insertion tool. In the event of a crash, a trained EMT/First Responder can insert the device into a helmet and then inflate it using either a Bulb or CO2 Inflator to gently lift the helmet off the wearer's head. The bladder applies a force to the top of the head helping to reduce the risk of secondary neck or spine injuries during helmet removal. NOTES: This product should only be used by a TRAINED EMT/FIRST RESPONDER PROFESSIONAL.

COMMUNICATIONS

Raceceiver Fusion 1600

Fusion 1600 Driver Scanner Only It is preprogrammed with 1,600 channels for frequencies between 450-470 MHz, and will allow you to manually scan through the channels, 1 or 100 at a time, to the channel that you want to monitor. Or you have the option of finding a driver's channel by simply following the easy to read channel chart. Channel charts are updated weekly and are available on our website or at trackside locations. It is designed to listen to one driver at a time. You can scan your favorite driver to the default channel. It utilizes the industry std 3.5 mm jack, allowing the use of a headset. Each RACEceiver Fusion 1600 package contains a RACEceiver, holster, one AAA battery. It is a must for drivers since it allows race officials to broadcast directly to drivers for safety and efficiency purposes without having the drivers talk back.

Raceceiver Only No Ear Piece **RS-RCVY1600**

RACEceiver Element Rechargeable

Radio Element Rechargeable Water Resistant Includes USB Charge Cord & Holster.

RS-RCVYEL16R

MOLDABLE Earphones

The best earphones you could ever wear, follow the simple DIY steps provided and these will deliver perfect sound without shifting under you balaclava or helmet.

HEAD & NECK SUPPORT

HANS POST COLLAR ANCHOR

FIA standard 8858-2010 only approves helmets with the nut washer built in the helmet. If you purchase post anchors with nut washers from Simpson, you accept that these anchors do not comply with the FIA regulation. If you purchase post anchors without nut washers for use with helmets having a built in M6 terminal, these are fully FIA approved. Both types of anchors (with or without nut washers) are fully SFI approved.

Description Post Collar Anchor with Nutwasher for SA Helmets, Silver

SIMPSON HYBRID SPORT

The evolution of the Hybrid Pro Rage technology and design has led the way for 2014's introduction of the high performance Hybrid Sport which promises the racer an improved product, at the same price range as the Pro Rage. The Hybrid Sport is lighter, weighing in at 20% less for the large, including hardware; and the DuPont carbon/polymer construction is sleek, modern and appealing with defined wings for seatbelt containment. The sliding tethers and patent pending multi-tether system enhances side to side range of movement and field of vision.

GLOVES

SIMPSON VORTEX GLOVE

The Vortex is an SFI 3.3/5 rated professional racing glove with Nomex® construction. Strategically placed wrist bone padding provides additional protection in this stressed area. External seams and pre-curved palms provide comfort. Tapered and pre-curved fingers and fourchettes give the driver excellent control. Silicone palm gripper design and striking embroidered knuckle logo add to the Vortex gloves' appeal.

Holeshot-22 SFI-20 Racing Glove, Black

Due to the great success of the Simpson Racing Holeshot-20 Drag Glove, Simpson is proud to introduce the next iteration, the Holeshot-22 Drag Glove. Like its predecessor, the Holeshot-22 is designed with two main goals in mind: driver safety and driver comfort. Simpson's utilizes its unique 4-way stretch material to provide exceptional TPP performance as well as ensure proper fit and excellent driver hand mobility. Flexible, high performance Pittards FR leather made in the UK incorporates a textured surface and is ergonomically positioned on the palm and entire inner fingers to provide optimum grip and comfort. An adjustable speed strap has been added allowing the driver to tighten the glove's wrist as desired. Made in the USA. SFI-20 drag racing glove. Available in black.

SIMPSON Racing Suits

Simpson racing suits are used worldwide in all forms of motorsport where no safety compromise is acceptable. Simpson fire suits are available in 1, 2 or 3 layers as well as a variety of fabrics such as filament woven Nomex, Gabardine or Sateen and Carbon X. The SFI 5 suits listed below are available "off the shelf" but Simpson's higher spec suits are made to order. We can arrange a custom suit in any colour with many custom options to meet any current SFI or FIA specification.

SIMPSON HOLESHOT DRAG BOOT, SFI-20

Simpson Drag Boots are intended primarily for use with their MTO.SS Super Suit, but could be worn with other driving suits as an added safeguard. They're knee-high, made completely from Nomex (including the sole areas), and have side zippers for easy-on/easy-off use. Because you wear them over your shoes, they are available in six loose fitting sizes, ranging from small to extra-large. They're SFI 20-approved, come in black only, and feature the Simpson logo on the front.

PYROTECT HELMET BAG

Pyrotec durable fleece lined nylon helmet bag, protects your helmet by keeping it clean and safe when not in use.

Description
Fleece Lined Helmet Bag

Part No.
PYB2100011

PYROTECT GEAR BAG

Pyrotec's innovative mid-size six-compartment equipment bags are comprised of high-quality tenacious Nylon material that provides tear, puncture, and moderate water-resistance. The large center compartment has the capability to hold one full set of Pyrotec's safety equipment and one full face helmet; additionally, the inclusion of a unique "Hygenic-Style" concealed pocket on one end utilizes space in the large center pocket and is specifically designed to keep odors from socks, innerwear or shoes after a race completely isolated. Furthermore, we increased holding capacity another 50% with the addition of a large pocket on one side to accommodate clothing, while the other side features a multi-size pocket configuration, one pocket with the capacity to hold a set of clean innerwear, and the other pocket to hold a backup set of socks or gloves. Additionally, the bags are equipped with two convenient options for various carrying styles, which includes the standard dual strap handle that can be combined with a velcro wrap for improved single-hand grip and an over-the-shoulder carrying strap for ease of transporting further distances.

- Innovative and tenacious nylon construction
- Increased capacity from compartment design and positioning
- 6 strategically designed compartments & pockets
- Unique Hygenic-Style compartment to isolate odors
- Specifically designed to accommodate a full set of Pyrotec safety equipment
- Dual-Strap handle, shoulder strap
- Bag Dimensions are: 21" L x 16" W x 13" H

SIMPSON

Simpson Harnesses

Simpson harnesses are designed to protect drivers better by using 6-point restraints, improved webbing and proper mounting to load, restrain and control the driver earlier in the event of a crash. We create a delicate balance between strength and elongation of the webbing to provide better resistance to abrasion, moisture and chemical deterioration over time, making our restraints the top choice compared to the competition.

LEVER CAMLOCK HARNESS

The Simpson Lever Camlock/Clip system is redesigned to be 15% lighter. A unique internal release mechanism is engineered to eject belts clips quickly. Our belts clips are interchangeable with rotary camlock. SFI 16.1 certified Sleek matte black finish Made in the USA Can be made with 2" upper shoulder harness for Head Restraints 55" - Bolt-In V-Harness SI29108BK

Camlock

The camlock buckle is fully CNC machined for precision quality from aircraft billet aluminium alloy. Hardened steel tumblers lock the stainless steel belt and harness tabs into the buckle with a quick snap.

DRAG CHUTES & ACCESSORIES

Simpson Drag Chutes

A drag chute is required on all drag cars over 140mph and cars with two wheel brakes over 130mph. Simpson chutes are supplied complete with chute, pilot and chute pack.

HOW TO ORDER CHUTE TO CAR APPLICATION

1. Select your car application

If you select numbers below as is, chute will be a standard pilot chute application.

Application	Chute Style.
Super Comp	#400
Super Gas	#410
Comp Eliminator	#420
Pro Stock	#430
Fuel/Alcohol Dragster	#450
Fuel/Alcohol Funny	#470

2. Select Your Chute Launch Style

4803 = Spring Launcher
4804 = Air Launcher

3. Select Your Colour

- 1 = Black
- 2 = Red
- 3 = Blue
- 4 = Yellow
- 5 = Pink
- 6 = Orange
- 7 = White

4. For Pro Stock / Pro Mod Chute Size For Over 200 MPH

- 1 = Size 24, 200-215 MPH (Dual Chute)
- 2 = Size 26, 250-270 MPH (Dual Chute)
- 3 = Size 28, 230-250 MPH (Dual Chute)
- 4 = Size 30, 215-230 MPH (Dual Chute)
- 5 = Size STD, 180-200 MPH (Single Chute)

EXAMPLES of Part Numbers put together from above lists

400 (car application) -1 (colour of chute) = Part No, SS400-1
Super Comp Black standard pilot chute

420 (car application) 4803 (Launcher Type) -1 (colour of chute)
Comp Eliminator Spring Launcher Black
Part No = SS4204803-1

450 (car application) 4804 (Launcher Type) -1 (colour of chute) =
Top Fuel/Alcohol Air Launcher Black
Part No =SS4504804-1

Pro stock / Pro Mod With Chute Size
430 (car application) -4 (colour of chute) -3 (Chute Size) =
Pro Stock/Mod Yellow #28
Part No = SS430-4-3 standard pilot chute

430 (car application) 4804 (Launcher Type) -3 (colour of chute)
Pro Stock/Mod Air Launcher Blue
-4 (Chute Size) = Part No, SS4304804-3-4
#30

STROUD

LAUNCHER SYSTEM - MECHANICAL & PNEUMATIC

Stroud parachute launchers are the most advanced parachute deployment system on the market. Available in either mechanical or pneumatic styles, the chute launcher completely does away with pilot chutes and their inherent problems. Patented by Stroud Safety, the chute launcher was over 8 years in development. The chute launcher can be used from the slowest bracket car to Top Fuel cars. It is especially effective on 1/8 mile courses, as it is not speed dependent like a pilot chute system.

The mechanical system is spring deployed using a regular pull handle. It is ideal for cars that do not have an onboard air system. For those cars that have onboard air, or wish to, then the Stroud pneumatic chute launcher is ideal! It is lighter and easier to use than the spring launcher. Both systems work equally well and the parachute does not know the difference.

If weight is a problem, then the new carbon fiber air launcher is for you. It weighs LESS than a standard Stroud chute with a pilot chute! All Stroud chute launchers come complete with all required mounting and operational equipment. The Stroud parachute launchers work ONLY with Stroud chutes. Using other type chutes is VERY dangerous! Call Stroud Safety for your specific needs. Replacement Stroud Chutes are also available, specify type of chute system setup in your car i.e standard pilot chute, spring launcher small/large or air launcher small/large.

Stroud chutes come in various colors - Black, Red, Blue, yellow, Pink, Orange, White, Purple & Lime Green. Common colored chutes Black, Red & Blue Will be stocked, all other colors are special order.

STROUD DRAG CHUTES

Stroud Safety is the leader in the non-rigid aerodynamic decelerator field (i.e. drag chutes). These chutes were designed from the start to be user friendly. Stroud Safety has nearly 50 years experience in parachute design and manufacture. After much exhaustive testing and refinement, the Stroud system was developed.

The Stroud Drag Chute is designed to open very reliably and softly, pull straight, stop sooner and pack very easily by one person in 4 or 5 minutes. The Stroud system does not pull the car off the ground. It pulls low and straight back. With its special deployment system, this chute will open much softer and much more reliably, stopping your car in much less distance than conventional chutes. Stroud Safety has a chute for every need, with over 50 styles available.

Replacement Stroud Chutes are also available, specify type of chute system setup in your car i.e standard pilot chute, spring launcher small/large or air launcher small/large.

Stroud chutes come in various colors - Black, Red, Blue, yellow, Pink, Orange, White, Purple & Lime Green. Common colored chutes Black, Red & Blue Will be stocked, all other colors are special order.

ROLL BAR PADS

AEROFLOW

ROLL BAR PADDING

Aeroflow roll bar padding is made from high density core cell foam and is its perfect for wrapping roll cages and bars. The inside diameter is off-set by 11mm (7/16") to provide extra thickness and absorption. When rotated toward the passengers it provides extra protection. This padding is NOT SFI approved. Suits bar sizes 41.3mm (1-5/8") and 47.6mm (1-7/8"). Comes in 914mm (3ft) lengths.

AF93-1000BLK

MOROSO

Moroso Offset Roll Bar Padding

Our popular Roll Bar Padding is now packaged in single 3-foot lengths for improved convenience and pricing. This special flame-retardant, 3" o.d. padding is extruded from high-density foam for maximum safety and protection. Inside diameter of 1-5/8" is offset by 7/16" to position extra cushioning towards the driver where it's needed the most.

Offset Roll Bar Padding, Black M080939
Offset Roll Bar Padding, Blue M080940
Offset Roll Bar Padding, Red M080941
Offset Roll Bar Padding, Orange M080942

Roll Bar Padding SFI 45.1 Approved

- SFI 45.1 Specified approved padding, approval marked on padding
- Comes in 36" lengths; 7/8" thickness, fits 1-5/8"-2" bar diameter
- Padding backed with pressure-sensitive adhesive and can be cut to size to make installation easy
- Padding exceeds SFI 45.1 rating for dripping or melting in a fire, and is self-extinguishing
- SFI 45.1 approved Roll Bar Padding is more dense than traditional padding, and is designed to absorb the impact energy

SFI Roll Bar Padding, Black M080944

SFI ROLL CAGE PADDING

Comes in 3' sticks & fits 1-5/8" tubing.

Description

FIRE EXTINGUISHER SYSTEMS

Fire Suppression Systems

Stroud Fire Suppression Systems are the most dependable Halon 1301 and FE-36 systems available with a versatile range of fire suppression delivery systems for all motorsports applications. One pound of Halon 1301 & FE-36 discharged for every 50 cubic feet of enclosed volume will achieve a 5% concentration in the air. This is sufficient to extinguish most fires with a substantial margin of safety. Stroud Safety systems are designed to achieve the concentration within ten seconds, where upon combustion cannot occur. All systems include: Bottle, head, mount, clamps, 3 foot or 6 foot push cable, 2 x 3-port (or 180°) nozzles, 1 x 6-port (or 360°) nozzle, fittings, and 25 feet of tubing.

FIRE SUPPRESSION INJECTOR HEAD

Fire Suppression Injector Head (suits Stroud Bottles AF64-6000) AeroFlow's Billet Fire Suppression Injector Head are machined from 6061 T6 aluminium and suits bottles that use 1"-14 thread. These are a direct fit to Stroud and similar bottles. This injector head features a stainless steel injector nozzle for longevity and precise accuracy. Has 1/8" NPT ports for ease of plumbing and can be used with a cable or lever activation system. Anodized black and perfect for use with the AF66-5000 line kits.

AF64-6000 Fire system line kit. Black anodised finish

FIRE SUPPRESSION LINE KIT

AeroFlow's Fire System line kit features 25 foot (7.5m) of hard line, 6 x 180° Spray Pattern Injector Nozzles, 5 x T-pieces, 21 x Tube Nuts, 21 x Tube Sleeves and 2 x 1/8" to -4AN adapters. This whole kit is anodized black for that stealth look working seamlessly with the AF64-6000 Billet Fire Suppression Injector Nozzle Head.

Intermediate 10° to 20° Layback Seats

Our Standard Layback seat is uniquely designed to be mounted in multiple layback angles. Designed for street stocks, IMCA Modifieds, limited late models, mini Modifieds, dwarf cars, legends or any entry level division. The Standard seat is a great value for the amateur racer who demands the best in safety and comfort at this level.

- TIG welded .125" thick 5052 grade aluminium. • MIG welded inside for added strength.
- Offset aluminium extrusion around perimeter of seat adds extra strength and safety.
- Progressive rib bead adds extra strength.
- Multi-position, lap belt openings for easy mounting.
- Submarine belt opening is standard. Machined edges eliminate rubber moulding. • Upholstery is double stitched around belt openings and all stress point areas.
- Contoured high density foam bottom provides complete leg and inner thigh support. • Extra thick, high density foam on rib supports for comfort and safety.

Economy Drag Seat

Our most inexpensive drag seat has the same KIRKEY quality as our most expensive. You can be sure that regardless of price and features, we never scrimp on safety or materials.

- Constructed from MIG welded .125" thick 5052 grade aluminium.
- Seat sides are lowered for lap belts.
- Water resistant nylon cover, black only.
- Seat cover clips eliminate snaps.
- Rubber moulding around perimeter of seat.
- Upholstery is double stitched around belt openings and all stress points.
- Headrest reinforced with an offset aluminium extrusion.
- Shoulder and Submarine belt opening is standard.
- Seat bottom is contoured to support lower back and hips.
- Extra thick, high density foam padding on bottom to support thighs.

Pro-Street Drag Seat

A professional racing seat is just as important in a drag car as it is in an oval track car or road racer. The increased feel for the car through the seat will help you with chassis set-up and give you more consistent times. You will be able to concentrate on the lights better if you are comfortable and relaxed.

- Constructed from MIG welded .100" thick 5052 grade aluminium.
- MIG welded on the inside for added strength.
- Offset aluminium extrusion around perimeter of seat for added strength and safety.
- Contoured high density foam bottom provides complete leg and inner thigh support.
- Upholstery is double stitched around belt openings and all stress points.
- Extra thick, high density foam on rib support for added comfort and safety.

65 SERIES

Road Race Containment Seat

Our new Intermediate Road Race Layback seat is designed especially for entry level road course cars. This seat is very comfortable making it ideal for endurance events.

- A true road race design with built in shoulder support.
- Machined aluminium panels for maximum durability, strength and weight reduction.
- Aluminium extrusion around perimeter for strength and safety.
- Extended front and bottom for additional comfort and support.
- Contoured high density foam bottom for maximum leg and thigh support.
- Contoured head rest is designed to cup helmet.
- The entire seat cover is fully padded for extra comfort and safety.

ENGINE TOOLS

OIL PUMP PRIMERS

BILLET OIL PUMP PRIMER TOOL

The first seconds an engine starts prior to building oil pressure are when damage can easily occur. AeroFlow's Oil Pump Primer lets you spin the oil pump with a 9.52mm (3/8") drill and bring oil pressure prior to firing the engine. AeroFlow's Oil Pump Primer offers a fantastic design. It includes a special billet aluminium sleeve that precisely positions the shaft and keeps it from wobbling.

AF98-2046 Oil Pump Primer for Chevrolet SBC, BBC and V6 90 degree engines

Oil Pump Primer Kit

Those first moments an engine runs prior to building oil pressure are when damage can easily occur. ARP's Oil Pump Primer Kit lets you spin the oil pump with a drill motor and bring up the oil pressure prior to starting the engine. This prevents any unnecessary wear or damage to rotating, reciprocating and valve train components. ARP's rugged primer shaft is rated at 170,000 psi to ensure extended service life of this valuable tool and features a special billet aluminium sleeve that prevents it from wobbling.

Chev Small & Big Block Engines AR130-8802
Ford 289-302 Windsor 1/4" Hex Drive AR150-8801
Ford 302-351C, 351W, 429-460, 5/16" Hex Drive AR150-8802

Oil Pump Primer

- Engine Pre-lube Primer Ford SBF 1/4"
- Allows the oil pump to be primed and the engine prelubed prior to initial start-up
 - Eliminates the chance of a "dry start" and premature engine damage
 - Primers drop in place of distributor and, with the use of a drill, spin the oil pump to supply oil to critical engine components
 - Features a top alignment collar and Chevrolet model includes a bushing to pressurize the upper valve train
- CO4922**

Chev Oil Pump Primer

Inserts into distributor hole to prime the engine with oil prior to initial start up. Fits Chev Small Block and Big Block engines.

Chevrolet Oil Pump Primer RPCR9534

Oil Pump Primers: Pro-Ford 302-351C&M & 400-460 (5/16" Hex Drive)

- Features a non-slip, triangular drive tip for attaching a drill
 - Black oxide coating for extra durability
 - Pro-models have a top alignment collar
 - Chevy tool also includes bushing to pressurize the upper valve train
 - Allows oil pump to be primed & engine pre-lubed prior to install start-up
 - Eliminates chance of "dry start" & premature engine damage
- POW101160**

OIL PUMP PRIMER

Before starting a new motor, proper priming of the system is absolutely critical. These oil pump primers prohibit needless engine wear from improper lubrication upon initial start-up. These primers allow you to drive the oil pump with a 3/8" drill once the distributor is removed. Primer shaft are black oxide finished.

SB & BB Chrysler Oil Pump Primer MI23015

Oil Pressure Test Kit

An inexpensive way of testing bypass pressure on most GM, Ford and Chrysler V8 oil pumps.

Oil Pressure Test Kit CVRPT01

Oil Pump Primers

The only correct way to build up oil pressure in a new engine before initial starting. Remove the distributor and insert the primer to engage the end of the oil pump drive. The other end of the primer fits a 3/8" chuck in a hand drill to drive the oil pump. Black oxide finish resists corrosion.

Chevrolet Small & Big Block	M062200
Ford 289, 302, 390, 428 (1/4" Hex)	M062210
Ford 351W, 351C, 400, 429, 460 (5/16" Hex)	M062220
Chrysler Small & Big Block	M062250

FORD OIL PUMP PRIMER

This engine oil pump primer comes complete with the aluminium guide. Designed to fit Ford V8 engines. The tool primes the oil pump directly through the distributor hole, for use with a 3/8 inch chuck drill, a must have product for all engine builders. Sold individually.

Chevy B/B Oil Pump Pick-Up

Driver Tool

No more banged up oil pickups and punctured tubes. Easily installs oil pickup tube. For Chevy big block engines.

Chevy B/B Oil Pump Pick-Up Driver Tool PR66480

TDC TOOLS & MIKES

TOP DEAD CENTRE TOOL

This top dead centre tool provides a positive stop for the piston when locating top dead centre. It screws into the spark plug hole and has a smooth radiused ball end to prevent piston damage.

AF98-2036

Top Dead Centre Locator

This tool provides a positive stop for the piston when locating top dead centre. It screws into the spark plug hole.

Chrysler TDC Locator PR67581

Top Dead Centre Stop

You need to have one of these when degreasing in any camshaft. They're designed to positively stop the piston in order to find top dead centre. The universal plate type bolts across any cylinder bore when the heads are off.

Top Dead Centre Stop POW101335

COMP Cams Top Dead Centre Tools

These COMP Cams tools are designed to stop the piston in order to find top dead centre. They mount on to the top of the engine block and thread into the existing head bolt holes.

CO4933

Deck Bridge

Easily checks top dead centre by bolting down across cylinder bore. (Used w/ heads off)

Deck Bridge PR66799

MAGNETIC DECK BRIDGE

This bridge will fit over bores up to 114.3mm (4-1/2"). This is used to check piston-to-deck clearance, and it is magnetic so it holds firmly into place. NOT supplied with dial indicator.

AF98-2040

Deck Bridges

We offer two versions of our popular Deck Bridge to check piston dome height and deck clearance while assembling an engine.

Both have a 4 3/4" span and three holes for dial indicator position. The standard model is held in place by good old gravity and the pro model has super strong magnets in each leg to attach it firmly to the deck surface. As an added feature, the pro model holds dial calipers in an upright position to measure crankshaft stroke..

Standard Deck Bridge POW101310

Pro Deck Bridge - Magnetic POW101315

Dial Indicator Stand

Rugged fixture is a "must have" for the serious engine builder. The versatile stand will span cylinder bores up to 4-7/16", and makes it easy to check piston dome and deck heights. Block and head surface problems can be found by the racer who checks everything. Other uses include checking for flatness, runout, warping, etc.

Dial Indicator Stand **MO62050**

Magnetic Deck Bridge

This will go over cylinder bores up to 4-1/2". This is used to check piston-to-deck clearance, and it is magnetic so it holds firmly in place. Dial Indicator PR66962 is sold separately.

Magnetic Deck Bridge **PR66797**

Micrometre Sets

PROFORM heavy-duty micrometre sets for all the popular applications and finally affordable for the weekend racer. PROFORM micrometres feature quick-lock levers, ratchet stops, carbide measuring tips, calibration accessories, adjuster wrenches, and each PROFORM micrometre comes in a handy and durable carrying case.

Piston Ring Squaring Tool

Get your piston rings aligned the first time. Just simply press piston rings down for perfect depth every time.

Piston Ring Squaring Tool **PR67652**

Tapered Ring Compressors

ARP's new ring compressors are CNC machined from 6061-T6 billet tube material and feature a true radius for each different bore diameter. What's more, they are relieved for wire O-rings on bottom. Type 3 anodizing is used for long life, and the bore size is prominently engraved in 3/4" high numbers for easy identification. Standard stocking sizes from 4" to 4.65" (SAE) and 75mm to 95.5mm (metric). The true radius design is far superior to conventional "tapered" devices, and widely acclaimed by professional engine builders! This is truly the very best piston ring compressor on the market today.

Heavy-Duty Multiple Angle Piston Vise

Finally an affordable piston vise with all the best features including; quick set-up, repeatability, billet aluminium, corrosion resistant anodizing, universal, and easy to use. Up to 4.6" diameter pistons.

Heavy-Duty Adjustable Piston Vise **PR66772**

Heavy-Duty Piston Installation Tool

The PROFORM piston installation tool features nylon-composite construction so you can knock away all night without any damage to your expensive pistons! This affordable tool weighs just under 2 pounds, features steel-shot filled chamber, and an easy-grip handle.

Piston Installation Tool **PR67571**

Isky Groov-O-Matic

Cylinder Block O-Ring Tool

You will discover this tool to be both an exceptional time-saver and money-maker. The amazing versatility of the "ISKY" Groov-O-Matic permits Block O-Ring grooving to be done anywhere, in the shop or in the field, in only a matter of minutes. The tool pilots in the cylinder bore & is easily adjustable for bore diameter. Also adjustable for both diameter and depth of cut for the copper O-ring groove. This tool will undoubtedly become standard equipment for every efficiently run speed shop. (Copper wire and complete instructions furnished with tool).

- Groov-O-Matic is the fast and profitable way to "O-Ring" the cylinder block face.
- Groov-O-Matic alleviates blown head gaskets on supercharged, turbocharged or hi-compression engines.

Mini Groov-O-Matic for 3-1/8" to 3-3/4" Cylinder Bores **ISK-100-GRM**
 Maxi Groov-O-Matic for 3-3/4" to 4-3/8" Cylinder Bores **ISK-200-GRM**
 Replacement Cobalt Cutting Blade (each) **ISK-GRM-CUTTER**

Piston Rack

Holds a full set of 8 pistons with rods.

Piston Rack **RCD45307-01**

Heavy-Duty Ring Groove Cleaner

Remove carbon from ring grooves on pistons from 2" to 5" diameter with our heavy-duty Ring Groove Cleaner. We like this tool because the hardened cutter wheel includes all twelve of the most popular ring sizes; 3/16", 5/32", 1/8", 3/32", 5/64", 1/16", 1/4", 4.5mm, 4.0mm, 3.0mm, 2.5mm and 2.0mm.

POW105065

Piston Ring Expander Pliers

Here's a universal tool that handles piston rings of all sizes, from lawn mowers to 5.00" bore mountain motors. Rings can be removed or installed on the piston without fear of breakage from the unnatural twisting that occurs when using just your hands. Our Piston Ring Expander Pliers are even heat-treated for long life and durability.

Piston Ring Expander Pliers **POW105060**

MANUAL PISTON RING FILER
To assure proper piston ring end-gap, the AeroFlow Performance manual piston ring filer enables the operator to file piston rings quickly and accurately. Position the piston ring firmly against the dowel pins, crank the handle to turn the abrasive wheel. Using a feeler gauge, file the piston ring to meet the manufacturer's specification. It features a 120 grit grinding wheel which can be purchased separately (AF59-2099). This piston ring filer can be bench or vice mounted whichever is suited for the operator.

CONNECTING ROD TOOLS

Rod Bolt Stretch Gauge
We highly recommend using a stretch gauge when installing rod bolts and other fasteners where it is possible to measure the length of the bolt after tightening. It is the most accurate way to determine the correct pre-load in the rod bolt. Measure the fastener prior to starting, and monitor overall length during installation. When the bolt has stretched the specified amount, the correct preload, or torque, has been applied.
We recommend you maintain a chart of all rod bolts, and copy down the length of the fastener prior to and after installation. If there is a permanent increase of .001" in length or more, or if there is deformation, the bolt should be replaced immediately. Don't chance it! ARP offers a highly accurate stretch gauge with a dial indicator that reads in increments of .0005". Features extra heavy springs for consistent repetition. Comes with a heavy-duty, insulated plastic carrying case for protection. A "must" for any serious engine builder.
Product Stretch Gauge, billet-style
Part # AR100-9942

Connecting Rod Bolt Boots
These bolt boots protect journal surfaces during engine assembly, preventing Crankshaft damage. Shipped with 2 per bag.
Conrod Bolt Boots CL2800B1

PLASTIGAGE
Made from a special extruded plastic thread with accurately controlled crush properties, Sealed Power Plastigage provides a fast and accurate way to check bearing clearances. Plastigage is packaged in a calibrated envelope that not only protects the plastic threads, but also serves as a scale to measure the bearing clearance. One package contains enough Plastigage to check both main and connecting rod clearance for one engine.
Description Green Strip Plastigage, .001 to .003
Red Strip Plastigage, .002 to .006
Part No SPG-1
SPR-1

Connecting Rod Balancer
This fixture holds each end of the connecting rod on the scale separately, for weighing the big and small ends. It comes with two mandrels to cover most popular engines, and it is ordinarily used with a digital or mechanical weighing scale.
Rod Balancer PR66844

Rod Bolt Stretch Gauge
0.001 Dial indicator. Check rod bolts the proper way, because sometimes torque readings may vary. Using the stretch factors supplied by rod bolt manufacturers, this stretch gauge offers a highly accurate way to measure torque pre-load. With a special, high-tension spring, this gauge remains conveniently positioned on the bolt during tightening, with adjustability for bolts up to 2.75" long. Simply position the stretch gauge over the length of the rod bolt before applying torque, take a reading, and record it. Then torque down to the proper torque setting, and take another reading with the stretch gauge. Calculate the difference and check the manufacturer's specification.
Rod Bolt Stretch Gauge PR66788

Connecting Rod Vise
Holding connecting rods securely without damaging them is necessary for removing or installing rod bolts, beam polishing or machining. This aluminium vise is designed for all sizes of aluminium or steel rods, and can hold several at once. It will mount in a bench vise or can be permanently mounted.
PR66769

DOUBLE-WIDE STACKER ROD VISE
Can handle one, two, or four rods at a time - that is half a V8! This is the right tool for torquing rods prior to checking them for sizing and roundness. Great for holding rods as you measure them or even when you lighten or balance them.
• A must have for engine builders!
• Quality built from 6061 aluminium, and will not mar your rods.
• Perfect tool for removing or installing rod bolts, beam polishing, or machining.
• Just stick it in your vise and get it done! Can mount in a bench vise or can be permanently mounted on the bench top.
• Speed Handle from top can be used with LSM on head valve spring compressors.
• Size of opening: 7.680" wide x 2.250" tall
LSMRV-100

Heavy-Duty Rod Splitting Fixture
Let's face it, connecting rods rarely come apart easily. That is until now. Quickly separate the cap from the rod without damage using PROFORM's new Heavy-Duty Rod Splitting Tool. Simply loosen the rod nuts a couple of turns, place the rod onto the splitting fixture, and pull the handle. Portable, for use with your bench top vise. **Rod Splitting Fixture PR66773**

Handheld Rod Splitting Tool
Easily separate your connecting rod caps with this non-marring hand-held splitter. Just turn the handle and the unit opens up so the 4 non-marring ends push the cap apart.
Handheld Rod Splitting Tool PR67905

BALANCER & CRANK TOOLS

CRANK GEAR INSTALLATION TOOL
The only way to ensure proper installation of the lower timing gear without fear of damage is to press it on with equal distribution of force over the entire surface of the gear. By using the COMP Cams Crank Gear Installation Tool used in conjunction with the COMP Part #C04920 Harmonic Balancer Installer, equal and constant pressure is applied, and the chance of gear damage is minimized.
Description Crank Gear Installation Tool
Part No. C04789

GM LS SERIES HARMONIC BALANCER INSTALLATION TOOL
This AeroFlow Performance harmonic balancer installation tool is designed for use with GM LS crankshafts. Made from high quality steel material. This tool makes installing the harmonic balancer simple and easy on your LS series engines. Just thread the correct end into the crankshaft and rotate the nut pressing the bearing against the harmonic balancer.
AF98-2107

GM LS SERIES HARMONIC BALANCER INSTALLATION TOOL
This tool makes installing the harmonic balancer simple; just thread the proper end into the crankshaft, and then rotate the elongate nut which presses the bearing against the balancer which will slide onto the crankshaft smoothly.
PR66519

Harmonic Balancer Installer/Puller
Works with all Ford, GM, and Chrysler engines. This heavy-duty, professional tool, equipped with roller thrust bearings, can also be used as a universal puller! Includes 7/16" - 20, 5/8" x 18, and 3/4" x 16 adapters and various removal hardware. May also be used for steering wheel and pulley installation and removal. Maximum recommended torque is 150 ft. lbs.
Harmonic Balancer Installer/Puller PR66514

UNIVERSAL HARMONIC BALANCER INSTALLATION TOOL
• Kit fits all domestic and most foreign engine applications
• Utilizes thrust bearing to gently ease the harmonic balancer onto the crank snout
• Eight interchangeable adapters include: 7/16", 1/2", 9/16", 5/8", 3/4", 12mm, 14mm and 16mm
Description Universal Harmonic Balancer Installation Kit
Part No. C04920

Harmonic Balancer Puller/Installer
This tool features a hardened, threaded shaft and alloy nut, combined with a roller thrust bearing puller plate. The kit fits GM, Ford and Chrysler and includes various size puller bolts. A plastic storage box is included.
Harmonic Balancer Puller/Installer POW300000

Harmonic Balancer Installation Tool
This tool uses a pilot stud, which keeps the harmonic balancer perpendicular to the crankshaft's centreline for a bind-free installation. Thrust bearing and protective washer allows the drive nut to rotate freely so the balancer is pressed on smoothly and evenly. Includes 7/16", 1/2", 5/8" and 3/4" adapters to fit most popular engines including Chevrolet, Ford, Holden, Mopar, KB Hemi, Pontiac, Oldsmobile and Buick.
Harmonic Balancer Installation Tool M061744

Engine Rotation Adapter

For Chevy or Ford V8 engines. Easily attaches to the balancer. Useful when assembling an engine or degreasing the cam. Then the crankshaft can be rotated with a 1/2" breaker bar or a 1" socket and breaker bar.

Rotation Adapter

PR66782

Crank Shaft Turning Socket

Engine work requires repeated crankshaft rotation. This non marring, aluminum tool rotates the crankshaft the proper way, when the balancer is off. Making sure to have the proper size, position this socket over the end of the crankshaft, so it can be turned using a 1/2" breaker bar or drive ratchet.

Chevy B/B (1.610" ID)

Chevy S/B & V6 (1.255" ID)

PR66899
PR66900
PR66901

Crankshaft Turning Nuts

These heavy-duty PROFORM Crankshaft Turning Nuts are a MUST HAVE for the engine builders' tool box. Rotating the crankshaft during assembly is now an easy task with these steel crankshaft nuts for Chevy Small Block and Holden V8s. **Chevy SB & Holden Crankshaft Nut**

COMP Cams Crankshaft Sockets

COMP Cams crankshaft sockets are the perfect addition to your engine-building toolbox. They accept 1/2 in. drive ratchets for versatility and easy engine rotation. They're precision-machined for an accurate fit over the crank snout, and their knurled retaining nut threads-on to sandwich a degree wheel in place. The nut can be loosened, while on the crank snout, so that the wheel can be turned independently of the engine when finding top dead centre.

Fits Engines with a 1.255 in. I.D. Crankshaft Snout C04793

Fits Engines with a 1.610 in. I.D. Crankshaft Snout C04797

Fits a 1.385 in. I.D. Crankshaft Snout with 3/16 in. & 1/4 in. Keyways C04798

Fits a 1.542 in. I.D. Crankshaft Snout with 3/16 in. & 2X 1/4 in. Keyways C04799

LS1/LS6 Crank Socket, 1/2 in. Steel C04914

MISC ENGINE TOOLS

LS MAIN CAP REMOVER TOOL

Slowly put down the rubber mallet and do the job the right way. LS main caps have very tight tolerances, and cannot be removed by simply grabbing and pulling on them. Uniform pressure from both sides is the only way to do this correctly. This handy tool seats itself on the engine block, and by using a mechanical advantage easily pulls the main caps upward evenly...making a challenging job easy. Heavy-duty construction, and beautifully engineered for years of use. Sold individually.

• Pro Series Model • Fits GM LS Engines • Made of Billet Aluminium • Black Anodized Finished • Evenly Pulls Upward on Main Cap
PR67485

Flywheel/Flexplate Turning Tool

The new PROFORM spring-loaded universal flywheel tool makes manually turning your flywheel a snap. **Flywheel Turning Tool**

PR67462

MOROSO

Engine Storage Bag

• Manufactured from heavy 4 mil thick plastic
• Extra-large size covers a complete engine including most headers
• Dimensions M099400: 40" wide x 19-1/2" deep x 47" tall
• Dimensions M099401: 42" wide x 32" deep x 54" tall, even covers Roots Blown Hemi and other super displacement engines
• One per package

Engine

Cleaning Brushes

It's important to have a clean block - especially in critical hard-to-get-at areas of the oiling system. Each brush is designed for a specific purpose; there are two each of the oil gallery brushes since they get the most wear. Can also be used on crankshaft oil holes, cylinder heads, etc; bristles are made of nylon which cleans as well as wire but does not scratch. Full engine set of 12 brushes from 1/4" to 5" diameter.

Engine Cleaning Brushes

MO61820

Engine Cleaning Brush Kits

Serious engine builders and backyard mechanics alike need these special length brushes to properly clean all the holes and passages found in most automotive engines. Available in a wide variety of diameters and lengths, each brush is made from pure stiff bristle nylon that won't soften or melt when used in conjunction with most engine cleaning solvents. The short brush kit includes one each of 5/16", 1/2" and 5/8" O.D. x 9" overall length brushes and the complete set contains nine (9) assorted brushes ranging from 1/4" to 5" diameter.

Short Brush Kit

Engine Port Polishing Kit

Mr. Gasket's Port Polishing Kit is designed for use on cast iron and aluminium components. This kit allows you to do your own detailed porting, polishing, and removal of flashing on all engine parts with the use of an electric drill. The kit contains:

- (1) Tapered Cutting Stone
- (1) 1" Diameter Mini Grind-flex Flat Wheel
- (29) Grind-Polishing Rolls (Assorted Sizes)
- (3) Various Length Mandrels.

Engine Port Polishing Kit

MG4362

CAMSHAFT TOOLS

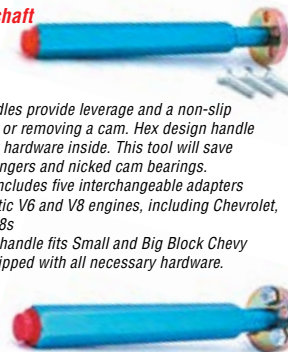

UNIVERSAL CAMSHAFT BEARING INSTALLATION TOOL

Drive camshaft bearings out easily and install new ones like a professional with the Aeroflow Performance universal camshaft bearing installation tool. This tool is designed to remove or insert camshaft bearings accurately installing them into any engine block from compact cars to heavy trucks. The expanding sleeves feature a neoprene finish to protect the inner surface of the bearings and to drive the camshaft bearings smoothly into the engine block. The kit includes: 5 neoprene expander sleeves, 5 split driving plates, driving collars, nylon centering cone, driving shaft and extension packed into its own storage case. Range of cam bearings this tool suits is 1.125 inch to 2.69 inch (28.85mm - 68.3mm).

AF98-2118 Camshaft Bearing installation tool
AF59-2118 Replacement Rubber sleeve kit

Chevrolet Camshaft Installation Handle w/ Hardware

These effective handles provide leverage and a non-slip grip when installing or removing a cam. Hex design handle stores all necessary hardware inside. This tool will save you time, pinched fingers and nicked cam bearings.
• Universal handle includes five interchangeable adapters that fit most domestic V6 and V8 engines, including Chevrolet, Ford and Chrysler V8s
• Chevrolet specific handle fits Small and Big Block Chevy V8s and comes equipped with all necessary hardware.
POW101035

Chevy Camshaft Installation Tool with Hardware

These COMP Cams Chevrolet camshaft installation handles will make installing your new camshaft simple. They have a bolt-on handle that provides good leverage as well as a non-slip grip. These handles have an opening in the end for convenient storage of installation hardware.
C04919

Camshaft Installation Handle

For Chevy V6 and V8 engines (except hydraulic roller camshafts). Providing a solid grip, this hex design handle makes it easy to install or remove your camshaft. Installation bolts included in handle.
Camshaft Installation Handle

PR66897

Cam Bearing Installation Tool

For Chevy small block engines. This kit contains everything a professional needs to remove old cam bearings and to install new ones. This task is easily accomplished by following our step-by-step instructions. Contains an arbor with drive mount, 2 drive spools, 2 spool stabilizers, and a drive cap.
Cam Bearing Installation Tool

PR66794

Cam Checking Tool: GM & Ford

These Cam Checking Tools slide down into the lifter bore and ride on top of the camshaft in order to measure lobe lift and base circle run-out.
• Comes complete with two followers: one for flat tappet or hydraulic cams and one for roller cams
• Two different versions are available and each one is double ended
• An O-ring on each end holds the tool securely in the lifter bore
• For use with any standard dial indicator (not included)
POW101400

Universal Cam Checker Tool

This easy-to-use tool simply slides down into the lifter bore and is adjusted until expanded securely. Supplied with two followers: one for flat tappet cams and one for roller cams. Fits lifter bores from .750" to 1.050".
Universal Cam Checker Tool
PR68902

Cam Checker Tool

Includes 0-1.000" Dial Indicator 66962 (0.001")! With O-rings on each end to assure securing positioning, this unit slides down into the lifter bore and sits atop the camshaft for accurate measurement of lobe lift and base circle runout. Supplied with two followers, one for flat tappet or hydraulic cams, and the other for roller cams. Designed for GM (.842" dia.) and Ford (.875" dia.) applications.
GM/Ford Cam Checker Tool

PR66838

Cam Checking Fixture (with Cylinder Head Off)

Includes 0-1.000" Dial Indicator 66962 (0.001")! No more fumbling with a magnetic base and a dial indicator to measure cam lift. This fixture maintains and holds the dial indicator and 5" extension (included) in the precisely correct position over the lifters, assuring proper geometry. Supplied with 1/2" and 7/16" adapters for use with any engine block.
Cam Checking Fixture

PR66830

GM LS TIMING/REAR COVER ALIGNMENT TOOL

The timing cover and rear cover on GM LS series engines don't have any dowel pins to ensure correct alignment to the centerline of the crankshaft & this often leads to annoying leaks at the front damper seal and rear main seal. These special alignment tools center the front or rear cover when it is installed, and allow an easy way to install the seal (by lightly tapping on the tool with rubber mallet). Choose from (3) styles of these alignment tools. Plastic construction with O-rings. Made in the USA

Application	Part No.
GM LS Rear Cover Alignment Tool – Use without Rear Seal in Cover	MGLSRC1
GM LS Timing Cover Alignment Tool – Use without Front Seal in Cover	MGLSTC1
GM LS Timing Cover Alignment Tool – Use with Front Seal in Cover	MGLSTC2

GM LS ALIGNMENT TOOLS

The timing cover and rear cover on GM LS series engines don't have any dowel pins to ensure correct alignment to the centre line of the crankshaft. This can lead to annoying leaks at the front seal and rear main seal or may even cause the front or rear cover to crack. These special alignment tools from Aeroflow Performance will allow you to centre the front or rear cover when it is installed. It also provides an easy way to install the seal by lightly tapping on the tool with rubber mallet with its plastic construction so it doesn't damage your engine or seal.

AF98-2111	Alignment tool NO seal installed
AF98-2112	Alignment tool WITH seal installed

CAMSHAFT DEGREE WHEEL KIT

For use with heads off engine. This kit contains all the tools needed to degree cams in the most popular engines, assuring proper cam timing and lobe lift. Features deluxe components including 9"-degree wheel, dial indicator, adjustable blue billet aluminium dial indicator mount, black top dead center locator, wire degree wheel pointer, detailed instructions, and a durable foam padded carrying case.

- Universal Model
- 9-in. Wheel with Dial Indicator
- Made from High-Quality Steel and Billet Aluminium
- Adjustable Blue Billet Aluminium Indicator Mount, TDC Locator and Wire Pointer
- Carrying Case Included
- Complete with Band Clamp for Accurate Adjustment

Description	Part No
Cam Degree Wheel Kit with Heads Off	PR68787

Pro Degree Wheel

These degree wheels are mandatory for the professional engine builder. Accurately measures several timing functions of an engine: camshaft centreline, valve timing, TDC, BDC, etc. Marked in easy-to-read one degree increments. Made from heavy gauge metal with a silk screen finish for long-lasting use. For mounting use Crankshaft Socket No. M061755 for Small Block Chevys.

Pro Degree Wheel, 18" Diameter	M062191
18" Dual Degree "Pro Wheel", for Precise Adjustments	M062192

Crankshaft Socket Tool for Degree Wheel

By removing the crank hub or balancer and using a Moroso Crankshaft Socket Tool, engine builders have a positive way to turn over the engine. Broached keyway allows the socket (which fits 1/2" drive) to slide over the crankshaft snout and key. A knurled jam nut is then used to position a degree wheel. Use with Moroso Degree Wheel No. M062191

SB Chev, Super Duty Pontiac & GM 4 Cyl	M061755
---	----------------

Universal Degree Wheel

The seven-inch diameter Degree Wheel is designed to insure maximum accuracy in camshaft installations. All necessary instructions are etched into the easy-to-read, anodized face, and it comes with two adapters for a universal fit on all engines.

Universal 7" Degree Wheel MG1570

Pro Degree Wheel

This 11-inch diameter Degree Wheel has color-coded scales for instant read-outs. Made of sturdy aluminium and designed to read the same as the camshaft spec card reads, it is precision degreed for accurate readings. The exhaust and intake centreline areas are also indicated and color coded. Claimed to be the best wheel on the market, it also fits many blowers. Universal design fits 7/16", 12", 5/8" and 3/4" crankshaft bolts.

Universal 11" Degree Wheel MG6120

CAM DEGREE WHEEL

The Aeroflow Performance degree wheels are a mandatory tool for the professional engine builder to keep in the workshop. It accurately measures several timing functions of an engine such as valve timing, top dead centre, bottom dead centre etc. Made from heavy gauge metal with a silk screen finish for long-lasting use in shop or track environments. Available in the smaller 9" diameter or the larger 18" diameter.

AF98-2120	228.6mm (9") diameter degree wheel
AF98-2121	457.2mm (18") diameter degree wheel

Universal Degree Wheel Kit

For use with heads on engine. This kit contains all the tools needed to degree cams in the most popular engines, assuring proper cam timing and lobe lift. Features deluxe components including 9" degree wheel, dial indicator, dial indicator mount, 2 valve check springs, clamp kit, 14mm top dead centre locator, wire degree wheel pointer, detailed instructions, and a durable foam padded carrying case.

Degree Wheel Kit

16" Billet

Aluminium Degree Wheel
Oversized wheel with large numbers makes reading this billet aluminium degree wheel easy!

PR66787

COMP Cams Sportsman Degree Wheels

These COMP Cams Sportsman degree wheels provide exceptional precision and accuracy. Their size allows you to use them on the engine stand, or with the engine still in the vehicle. They can be bolted onto most harmonic balancers or used with a crankshaft socket.

CO4790

COMP Cams 16" Professional Degree Wheels

These COMP Cams giant degree wheels are machined from a 1/4 in. thick aluminium plate. They have an open design that allows degree bushing changes while the wheel is still on the engine. These degree wheels feature a 1 in. centre hole to fit with a crank socket, or you can use the included reducer bushing to fit your harmonic balancer bolt.

CO4791-1

COMP Cams Cam Degree Kits

With these cam degree kits, you can dial-in your cam the right way. You can check things like cam lift, base circle runout, piston-to-valve clearance, top dead centre, valve lift, valvetrain flex, and rocker arm ratio.

HEAD & VALVE TRAIN TOOLS

Peg Style Head Holders

Our Peg-Style Head Holders are a great, low-cost way to suspend your cylinder heads above your workbench when performing port and polish work. The tapered pins slide into the cylinder head bolt holes so you can hold the head right-side up or upside down.

Peg Style Head Holders POW351410

Heavy-Duty Aluminium Head Holders, V-Style

Modify and maintain your cylinder heads with ease with the heavy-duty aluminium head holders. Sold in pairs.

Heavy-Duty Aluminium Head Holders PR66481

Cylinder Head Work Stands, Adjustable

Our heavy-duty cylinder head work stand is great way to hold your cylinder heads above your workbench while working on them. The adjustable arms allow you to set the proper height and maintain stability.

Cylinder Head Work Stand PR66483

Cylinder Head CC Kit

This is the kit you need to accurately cc most cylinder head combustion chambers. Includes a precision glass 100cc burette with easy-to-read 0.2cc division lines, an integral petcock for precise measurement and easy flow-control, a burette clamp, a stand with a firm base, a flat acrylic plate to cover the combustion chamber, and detailed instructions explaining how easy it is to professionally cc cylinder heads.

Cylinder Head CC Kits

Our kits provide everything you need to properly cc cylinder head combustion chambers, intake and exhaust runners, intake manifolds, or cylinders. Our precision glass burets are compatible with alcohol, parts washer fluid or anything else you would want to put in them. Our easy-to-read scales are clearly marked and actually read out the amount you've poured, so there's no math involved. Kits contain a precision glass buret with integral petcock, a stand and clamp assembly, a flat plexiglass plate to cover the combustion chamber and instructions on how to properly cc cylinder heads.

Description	Part No.
Cylinder Head CC Kit – 100cc x 0.2cc	POW351150
Cylinder Head CC Kit – 250cc x 1.0cc	POW351160

Head Off Checking Fixture

If you've ever had to wrestle with a magnetic base and a dial indicator to measure cam lift, you will really appreciate this tool. We designed this fixture to maintain proper geometry while holding a dial indicator (not included) and 5" extension (included) precisely over the lifters. Since it comes with both 1/2" and 7/16" adapters, you can easily attach it to any engine block.

Head Off Checking Fixture POW101520

Valve Train & Rocker Arm Trays

- Lightweight with built-in carrying handles
- Valve tray holds valves springs, valve locks, and the largest of valves
- Rocker tray holds pushrods, lifters, poly locks, spark plugs and rocker arms
- Designed for the home mechanic as well as the professional

Valve & Spring Tray Rocker Arm & Lifter Tray

JAZZ735-001-06 JAZZ735-002-06

GM LS LIFTER RETAINING TOOL

Swapping camshafts in LS engines is made easier with this tool that prevents the lifters from falling through the bores and into the engine. The tool slides through holes in the front of the engine and holds the lifters securely in their bores. The extra-long design with integrated handle provide plenty of leverage, while the rounded pushrod-style tip eases installation. Smooth construction of high-quality materials and the proper outer diameter prevents internal engine damage and won't leave debris behind.

POW101046

GM LS SERIES LIFTER RETAINING TOOLS

This handy tool set helps prevent the lifters from falling through the bores and into the engine when changing the cam shaft.

AF98-2078

Push Rod Length Checker

For Chevy small block and big block engines. Proper push rod length is absolutely critical for peak performance – minimizing bent or broken valve stems, guide wear, and energy-wasting valve side-loading friction.

Chev Small Block with 3/8" studs
Chev Small Block with 7/16" studs
Chev Big Block with 7/16" studs

Universal Push Rod Straightness Checker

Easily check concentricity to discard any power-robbing, bent push rods; insert pushrod between spring-loaded holders, spin the pushrod, and read the re-positionable dial indicator (.001"). Dial indicator 66962 included.

Universal Straightness Checker

PR66979

GM LS Series Valve Spring Compressor

Built from an exclusive design valve spring removal tools are engineered specifically to work with all GM Gen III/IV LS-type or Small Block Chevy and Small Block Ford engines. The easy-to-use custom design enables the removal of one or two valve springs at a time without the hassle of removing the rocker stand or any of the other installed rockers. The tool works both with cylinder heads installed on an engine in a vehicle or with the cylinder heads off. The simple design facilitates easy use in vehicles where other tools are incapable of reaching the tight spaces. GM LS Series Valve Spring Compressor

C05462

Pushrod Cleaning Brush

COMP Cams® is pleased to introduce our New Pushrod Cleaning Brush. This new brush is perfect for cleaning the inside of pushrods that oil through the centre. This brush is the answer for thoroughly cleaning push rods. The brush is 12 inches long and features nylon bristles and steel shaft

C07700

Heavy Duty Valve Spring Compressor

Our super-duty spring compressor is constructed of a welded steel, box-tubing frame and an over-centre type clamping device that can compress any valve spring. The compressor arm slides up and down for adjustment and utilizes a locking pin for speed and ease of use.

Heavy Duty Valve Spring Compressor

POW351015

Valve Spring Compressor Tool LS1/LS2/LS6 & Vortec

This LS valve spring compressor is compact, is activated with normal hand tools, and takes up almost no space in your toolbox. It will cut valve spring removal and replacement time to around 1-hour. And, it's guaranteed to get the job done as easy, if not easier, than expensive compression tools.

SUIT CHEV/HOLDEN, LS1/LS2/LS6 & VORTEC

PR67605

Bench Top Valve Spring Tester

Use it in the shop and take it in the trailer. This is a fast and easy-to-use precision bench-top valve spring tester. Just bring the spring to installed height, lock down the precision stop and check a box of springs quickly, easily and with precision accuracy. The innovative horizontal design and footprint gives it stability on the bench top. It is rugged enough for ever day use in the shop yet designed for portability on the road.

LSMSM-1000

Valve Seat Pressure Tester

Adjustable on-head valve spring pressure tester for various shaft style and stud mount roller rocker systems. It features a 0-600 lbs liquid filled gauge and is available in standard or low profile configurations. Comes with adjustment shim kit which enables adjustment to within .050" of rocker arm pivot length. Includes set-up and adjustment guide. (Low profile unit handle length is 2.4" shorter than standard.)

Standard Short Handle

LSMPC-100
LSMPC-100S

Slant Handle Pressure Tester

The most versatile spring tester available! Can be used in either the slant or straight handle positions and includes a spin-off convertible handle extension. Has the complete adjustability of the PC-100 with the benefit of multiple handle configurations for engine compartment constraints.

On Head Spring Tester - Slant Handle

LSMPC-100SLC

LSM Spring Changers

We developed the standard for changing valve springs with our innovative designs. The LSM Spring Removal Tools are simply the best quality, and easiest to use. It makes changing valve springs a fast and simple one-man job.

Stud Mount Spring Changer

• Stud mount spring changer for all 7/16 stud mount rocker systems.
• 3/8" stud adapter available separately

Part Number 3/8" Stud Adapter

LSMSC-800
LSMSC-801

LS Series Spring Changer

• Suits LS1/6 LS2/3 & LS 7 engines
• Up to 1.5" Diameter Springs
• Uses Factory 8mm Holes

Part Number

LSMSC-125

SC-100 Spring Changer

Applications:
• Small Block Chevy w/ Jesel, T&D.
• Buick w/ Jesel
• Dodge W-8 w/ Jesel
• FE Ford Jesel only
• Chrysler Indy 440-1 head w/ Jesel.
• Barton Hemi exh. only w/ slight mod.

Part Number

LSMSC-100

SC-150 Spring Changer

• Small Block Pontiac w/ T&D.
• Windsor Ford w/ Jesel, T&D
• Allan Johnson SBC w/ T&D
• FE Ford w/ T&D
• Chrysler B-1 w/ T&D 5/8 shaft system
• Fred Brewer AMC w/ T&D

Part Number

LSMSC-150

SC-200 Spring Changer

• Big Block Chevy w/ Jesel, T&D.
• Small Block Chevy canted/splayed valve
• SB2 w/ T&D, SB2 w/ Jesel (Straight Rocker).
• Ford C-460 exhaust only w/ T&D, Jesel (SC-500 int.)
• Chevy V6 w/ Jesel, T&D
• Yates Ford w/ Jesel, T&D
• P-5 Dodge w/ Jesel

Part Number

LSMSC-200

SC-400 Spring Changer

Applications:
• Jesel J2K changer
• SB2 w/ Jesel J2K Rockers
• SC1 w/ Jesel J2K Rockers
• P-7 Dodge w/ Jesel J2K

Part Number

LSMSC-400

SC-500 Spring Changer

Applications:
• Big Chief / 14 degree Olds Intake Spring Changer w/ T&D, Jesel
• Ford C460 intake w/ T&D, Jesel.
• C-200 for exhaust.)

Part Number

LSMSC-500

SC-320 Spring Changer

• Big Block Chrysler w/ B1 Heads

Part Number

LSMSC-320

SC-501 Spring Changer

Application:
• Big Chief / 14 degree Olds Exhaust Spring Changer w/ T&D, Jesel

Part Number

LSMSC-501

Big Chief Set

Includes 2 complete tools:
1 x SC-500 and 1 x SC-501

Part Number

LSMSC-515

GM LS SPRING CHANGER

Mounts directly to factory stands on LS1 - LS6 using specially engineered adapter that will not damage the stands. Mounts directly to LS7 heads without the adapter. Made from billet steel and built to last!

• "Floating valve angle axis" automatically adjusts for the variance in valve angles to do all LS heads.
• Slotted steel base to accommodate all centrelines.
• No assembly required. Complete and ready to use.
• Compress two springs at a time!
• LS1, LS2, LS3, LS4, LS6, AND LS7 plus Chrysler V10

LSMSC-200

Big Chief Kit

Includes:
• Intake (SC-500) base and beam
• Exhaust (SC-501) base and beam
• One shared head assembly

Part Number

LSMSC-520

Universal Head Off Spring Compressor

The LSM Head Off Valve Spring Compressor features a proprietary Wave-Beam design that gives it ultra-rigidity in a lightweight package. With a dual adjustable design that allows for the perfect positioning and easy access to valve and spring and a spring cage with a small 1" I.D. diameter flange it works perfectly with most popular valve springs.

Universal Head Off Spring Compressor

LSMSC-2000

LSM Speed Handle

Fits most LSM Spring Compressors and Bench Top Testers
6" long with two 7/16" hex positions, Rotating handle is contoured for optimum thumb and finger positioning
Center location for quick spin on/spin off. Outer location provides increased leverage
LSMSH-60

Valve Seat Pressure Tester

The ultimate tool for checking valve seat pressure on an assembled engine. Built-in 300 lb. reading scale is accurate to within + or - 3% with no need for math conversions. Fits roller rockers on Small Block, Big Block and 90° V6 Chevy; Ford 221-302, 351-400 SVO and Ford Windsor engines, and most other wedge-type engines. Use with Moroso Stud Mount Valve Spring Compressor No. MO62370 for the most accurate method of maintaining the valvetrain on a fully assembled engine.

Valve Seat Pressure Tester MO62390

Stud Mount Valve Spring Compressor, Heavy Duty

Heavy Duty version of Moroso Stud Mount Valve Spring Compressor features thick, laser-cut steel and billet aluminium components.

Stud Mount Valve Spring Compressor, Heavy Duty

Adaptor To Fit Jesel Shaft Rocker Assembly

MO62371
MO62373

Low-Profile Valve Seat Pressure Tester

Similar to No. MO62390 shown above with low-profile design to fit under windshield and cowl of tube-chassis cars. Designed by Jerry Haas, the tool features a rocker arm "gripper" machined from billet aluminium. Scale reading from 160 to 400 lbs. allows testing of springs with higher spring pressures. Use in conjunction with Moroso Stud Mount Valve Spring Compressor No. MO62370 to maintain valvetrain

Low-Profile Valve Seat Pressure Tester MO62391

Stud Mount Valve Spring Compressors

Between-rounds valve spring changing is greatly simplified with this tool. Unlike models offered by other manufacturers, Moroso's stud mount tool fits both 3/8" and 7/16" rocker studs and is much stronger in the handle area to withstand the pressures of today's "extreme high pressure" valve springs. The 12" handle gives all the leverage needed to compress the strongest springs.

Stud Mount Valve Spring Compressor Adapter to fit Jesel Rocker Shaft Setup MO62370
MO62372

Stud Mount Valve Spring Compressor

For all 3/8" and 7/16" Rocker Studs. Remove valve spring from an assembled engine for checking or replacing quickly and easily. Press down to compress coil spring, then remove valve keepers. Release slowly.

Spring Compressor PR66784

Economy Valve Spring Compressor, Stud Style

Here's your affordable yet durable way to change out the springs with heads on the engine. This heavy-duty, stud-style compressor will easily compress any spring. Works with Chevy SB & BB, Ford, and Pontiac engines.

Economy Valve Spring Comp., Stud-Style PR66848

Heavy-Duty Valve Spring Compressor

This heavy-duty, simple-to-use, manual valve spring compressor makes short work of even monstrous springs. The compressor arm slides for adjustment, employing a locking pin for rapid, easy operation.

Valve Spring Compressor PR66832

Chrysler Spring Compressor, Shaft Mounted

Heavy-duty shaft mounted spring compressor makes removing valve springs a snap while the cylinder heads are still on the engine. Bolt the tool shaft in lieu of the rocker shaft, place the feet over retainer, put the handle on and pull down. Affordable and easy to use!

Small Block Chrysler Spring Compressor PR67460
Big Block Chrysler Spring Compressor PR67461

HEAVY-DUTY MANUAL VALVE SPRING COMPRESSOR

Our easy-to-use Manual Valve Spring Compressor can handle even the biggest valve springs being used today.
• Constructed of a welded steel, box-tubing frame and an over-centre type clamping device that can compress any valve spring
• Compressor arm slides up-and-down for adjustment and utilizes a locking pin for speed and ease of use
• NOTE: Maximum usage of 750 psi.
POW351015

Valve Check Spring

These light-pressure springs make the assembly of components much easier. They provide enough pressure to hold the valve assembly together when checking camshaft figures, installed height, etc. 2 Pcs.

Valve Check Spring

ISK100-LSK

Calibrated Spring

Each spring is calibrated at two points. 1.75" & 1.375". The 1.75" reading falls in the range of 70 lbs. and the 1.375" reading is in the range of 170 lbs. These springs are a useful aid for determining proper spring tester performance.

Calibrated Spring C05316

Valve Spring Compressor

Designed for removing overhead valve springs without removing the cylinder head. Hex head on centre screw permits use of a socket wrench. Sliding T-handle provided. Offset jaws are long enough for use on high performance engines.

Valve Spring Compressor POW351015

Valve Check Spring

These light-pressure springs make the assembly of components much easier. They provide enough pressure to hold the valve assembly together when checking camshaft figures, installed height, etc. 2 Pcs.

Valve Check Spring PR66793

VALVE CHECKING SPRINGS

• Low tension checking springs can be installed by hand in place of valve springs • Simplify measuring piston-to-valve clearance, rocker ratio, cam degreasing, etc. • Set of two springs is enough for one cylinder

Low Tension Checking Springs

1000 LBS. DIGITAL VALVE SPRING TESTER

PROFORM's new billet aluminium 1000 lb digital bench top spring tester is the most accurate way to check spring pressure. Check springs up to 1.9in diameter and 3 7/8in height. Digital display reads in 1 lb (0.5 kg) increments, and has a back lighting feature. Peak hold and automatic shutoff are other included features. Tech Specs: RAM Travel: 3 7/8in. Upper Anvil: 2 1/4in dia. Lower Anvil: 1.9in dia. Scale in inches and mm, pressure in pounds and kilograms. Resolution 1 lbs or .5 kgs.
PR66776

Heavy-Duty Bench Top Spring Testers

Accurately check spring height versus spring pressure with our new heavy-duty bench top spring tester. Check springs up to 2" in diameter and 4" in height. Separate part numbers for up to 300 lbs and 700 lbs spring pressures. Can be bench or vise mounted.
Spring Tester, 300 lbs spring pressure PR66774
Spring Tester, 700 lbs spring pressure PR66775

ON-HEAD DIGITAL VALVE SPRING PRESSURE TESTER

PROFORM's new on-head valve spring tester features a digital gauge and an adjustable base to fit all common aluminium rocker lengths and offsets. The digital gauge includes 5 lb (or 2 kg) increments with peak hold and backlighting features. The housing is made of black anodized billet aluminium with knurled grip area for ease of use. Capacity ranges from 0-600 lbs (or 273 kgs).
• On-Head Model • Features Adjustable Base to Fit Most Aluminium Rocker Lengths and Offsets • 0-600LB Range • 5LB Increments • Includes Peak-Hold Read-Out and L.C.D. Display has Backlighting
PR67601

MINI SPRING TESTER AND MEASURING COMBO

With this all-in-one tool, you'll no longer need to use a ruler or micrometer to measure spring height. Simply set the spring height with the highly refined measurement tube (0.01" increments), put it in the vise and start testing. Max spring diameter is 1.7".
0-600 x 10 lbs Mini Spring Tester & Measuring Combo PR66841

DIGITAL MINI SPRING TESTER AND MEASURING COMBO

With this all-in-one tool, you'll no longer need to use a ruler or micrometer to measure spring height. The back lit digital display provides accuracy in 2 lbs. increments. Simply set the spring height with the highly refined height micrometer tube (0.01" increments), put it in the vise and start testing. Max spring diameter is 1.7".
0-700 x 2 lbs Digital Mini Spring Tester & Measuring Combo PR66842

Mini Spring Testers

Here's the affordable, portable way to test springs. The hex design body is very versatile: use it in a vise or an arbor press. These hydraulic models are supplied complete with a recalibration feature and a rubber gauge protector.
0-600 x 10lb Spring Tester PR66834
0-300 x 10lb Spring Tester PR66835

Valve Spring Pressure Tester

Need to check spring pressure at the track? No problem with the PROFORM stud style valve spring compressor. This fully adjustable tool fits easily onto your rocker arm for pressure checks and will measure pressure up to 600 lbs.

Valve Spring Pressure Tester

Replacement gauge to suit 67597 only.

PR67597
PR67597-GAUGE

Mini Valve Spring Tester

• Hydraulic mini tester is designed to be portable and low cost alternative to bench top style spring testing
• 0-1000 lb. tester scaled in 20 lb. increments

• Includes rubber gauge protector and recalibration feature

• Hex-design body can be placed in a vise, used with an arbor press or used in a drill press (w/ flange)

1-1000 lbs. Mini Valve Spring Tester Calibrated Test Spring

C05316

Professional Rocker Arm Stud Remover

Make stud removal easier with our professional rocker arm stud remover tool. With ball bearing action and fittings for 5/16" and 3/8", this tool is a must have for all engine builders.

Rocker Arm Stud Remover

PR66484

Valve Seal Installer

Our new CNC machined aluminium Valve Seal Installer makes installing PC seals a breeze. This tool works with .500" and .531" PC seals and prevents seal distortion or gouging during installation. Anodized for durability.

Valve Seal Installer

POW351395

Valve Seal installer

Another gouging PC seal? No longer will you have worry about gouging and twisting your seals with the PROFORM valve seal installer. Works with .500" and .531 PC seals and comes with handy knurled end for better grip.

Valve Seal Installer

PR67444

VALVE SEAL INSTALLATION TOOL

- CNC-machined aluminium valve sealer makes installing PTFE seals on valve stems easy
- Works with .500" and .530" PTFE seals
- Prevents seal distortion or gouging during installation
- Anodized for durability

CO5334

SEAL SETTERS

If you're tired of sacrificing your time, your tools and your knuckles by trying to install PTFE seals on valve stems, then you need these COMP Cams® Seal Setters. This is a two-part tool comprised of bullet-nose sleeve (.100" wall) and hand piece.

Description Part No.
11/32" Seal Setter CO5630

Tall Valve Spring Height Micrometre

Measure installed valve spring height conveniently and accurately. Simply install the height micrometre instead of a valve spring, and the rotate the clearly engraved dial to expand the tool to seat the valve, locks and retainer.

For 1.600" - 2.100" Installed Height
For 1.600" - 2.100" Beehive Springs
For 1.400" - 1.800" Installed Height

PR66902
PR67390
PR66903

Valve Spring Height Micrometres

This is by far the quickest, easiest and most accurate way to measure valve spring installed height. Our height mics install just like a valve spring, then the tool is expanded until it has fully seated the valve, locks and retainer. This simulated installation is what allows ultra precise readings. The tool is then read like a micrometre and is accurate to .001".

Description Part No.
For 1.600" to 2.200" Height Springs CO4929
1.600"-2.200" Height for Beehive Springs CO4930

Spring Seat & Guide Cutters/Arbours

Most high performance engines today require the use of larger than stock diameter valve springs. These tools from COMP Cams will allow the engine builder to machine the cylinder head to the proper size for your spring. Each cutter requires the use of an arbour/pilot, which is available in three different sizes. These arbour/pilots also will work with the valve guide cutters used for shortening the guide for a high lift cam or installing a COMP Cams Teflon seal for oil control.

GUIDE CUTTERS

Description	Cuts Guide	Part No

Valve Lash Wrench Set

T-Handles. This simple T-handle and wrench set makes adjustment very easy, cutting the adjusting time in half. Simply position the adjusting handle wrench over the rocker arm lockdown (make sure you have purchased the set with the proper sized wrench), and drop the appropriate T-handle down through the hole in the wrench - with one hand doing the job of two! Then make the lash adjustment with a feeler gauge according to the camshaft manufacturer's specifications.

1/2" with 3/16" & 1/8" PR66778
7/16" with 1/8" PR66779
9/16" with 3/16" & 7/32" PR66780
5/8" with 3/16" & 7/32" PR66781

Valve Lash Adjusting Torque Wrench

This is a combination precision torque wrench and valve adjustment tool that simplifies making precision valve lash settings by properly torquing the adjuster nuts every time. One tool does all "shaft" style rocker arms. It accepts any standard 3/8" drive socket (not included). Comes with 1/8", 5/32" and 3/16" hex keys. POW351048

E-Z Valve Lash Wrench

Our E-Z Valve Lash Wrenches make things simple when adjusting valves. We offer wrench/T-handle sets for most polylock and set screw combinations.

- High-quality wrenches constructed of 17-4 stainless steel
- Heat-treated & electro-polished to a satin finish
- T-handles are fitted for smooth operation

9/16" (with 3/16" & 7/32" T-Handles)	POW301550
5/8" (with 3/16" & 7/32" T-Handles)	POW301555

1/2" (with 1/8" T-Handle)	POW301580

Lash Adjusting Torque Wrench

The LSM TQ-100 is a precision torque wrench and valve lash adjusting tool. The TQ-100 makes it easy to set your valve lash precisely and torque the adjuster nut to the proper setting helping to eliminate potential valve train failures. Preset at 20ft/lbs, this tool is designed for Jesel and T&D-style rockers where the set screw changes the lash and the locking nut locks it in place. It adapts to any 3/8" drive socket and includes 1/8", 3/16", and 5/32" Allen wrenches.

Lash Adjusting Torque Wrench

LSM-TQ100-3

VALVE LASH ADJUSTING WRENCH

The TQ-200 is similar to the TQ-100, but with a 1" longer handle and the ability to increase the torque setting up to 45 ft/lbs. It also features a welded-on socket for a long service life in a high torque environment. Ideal for steel rockers and used on blown alky and fuel engines.

LSM-TQ-200

One Tool Valve Lash Adjuster (T-Handle Not Included)

The LSM "One-Tool" is like having 16 valve lash adjusting tools in one. "One-Tool" configures to adjust ALL shaft and stud mount rocker systems on the market today. Now you don't have to buy a new valve lash adjusting wrench for each different rocker system. Buy "One-Tool" and you will always have the right tool to adjust your valves no matter what rocker system you have. Just snap on the appropriate standard 1/2" drive socket, insert the correct hex key and you are good to go.

One Tool Valve Lash Adjuster LSM1T-100

Dual Feeler Gauge Handle

This handy tool is commonly used with 2 feeler gauge strips, one for intake and one for exhaust lash settings. This makes trackside lash settings quick and easy with no more fumbling for the correct size. The LSM dual feeler gauge handle accepts any 1/2" wide feeler gauge and can hold up to .110" of feeler gauge stock so it can be configured differently depending on the user's requirements. Feeler gauge not included.

Dual Feeler Gauge Handle - Blue LSMFH-200B
Dual Feeler Gauge Handle - Black LSMFH-200BK
Dual Feeler Gauge Handle - Red LSMFH-200R

Dual Feeler Gauge Handle

Dual Feeler Gauge Handle holds two sets of feeler gauges on the same handle and is ideal for intake and exhaust or go, no-go gauges. This gauge handle will accept various styles of 1/2" wide feeler gauges (gauges not included) depending on your application

Dual Feeler gauge Handle CO5602

LEAKDOWN TESTERS

Cylinder Leakage Tester

Quickly diagnoses failed or leaking valves, pistons, rings, and head gaskets. Large-diameter 3-1/2" gauge face indicates percentage of leakage rather than psi, eliminating need for math calculations. Includes 4-foot hose with quick-disconnect fitting and two zinc-plated adapters for 14mm and 18mm plug sizes

Cylinder Leakage Tester MO89600
OHC ADAPTER, 7.43" LONG MO89602
Replacement Gauge Only (SUIT MO89600) MO97500

Dual Gauge Leakdown Tester

Racers prefer the dual gauge design of our Leakdown Tester to check for problems with piston rings, valves, head gaskets, etc. The left hand gauge shows incoming air pressure, while the right hand gauge (once plugged into the cylinder being checked) shows how much air the cylinder is holding. The difference between the two gauges is your leakdown. A universal 14mm spark plug adapter, rubber gauge protectors, high-quality regulator and complete instructions are all standard with our precision Leakdown Tester

POW301018

Dual-Gauge Leakdown Tester

This dual-gauge leakdown tester measures the condition of your head gaskets, piston rings, and valves. The gauge records incoming air pressure, and the right gauge records individual cylinder pressure - and the difference is your leakdown.

Dual-Gauge Leakdown Tester

PR66839

FUEL SYSTEM TOOLS

EFI DISCONNECT TOOL

This handy tool allows you to disconnect your factory EFI fitting without damaging the plastic clips. They will work for both 5/16" and 3/8" fuel line fittings.

AF98-2106

Carb Caps

Keeps dust and other foreign material out of carburetors during transportation and storage. Manufactured from durable, high-impact plastic. Thumbscrew included. Fits 4 Barrel carbs with 5-1/8" dia. neck

Fits Dominator & King Demon carbs

MO65802
MO65803

Carburettor Drain Cup

Now you don't have to spill fuel all over the engine when removing fuel-bowl screws to service Holley carburetors. The Moroso Carburetor Drain Cup uses a channel handle to catch dripping fuel and direct it to a holding cup. Made from fuel resistant polyethylene.

Carburetor Drain Cup

MO65805

Carburettor Work Stand

Designed to hold Quadrajet and both standard and spread-bore Holley carbs, this tool greatly simplifies carburetor work

Manufactured of cast aluminium with open centre and mounting pegs.

Carburetor Work Stand

MO62070

Carb Float Adjustment Tool

Easily adjust your carburetor float level with this hand float adjustment tool. 5/8" socket and built-in screwdriver blade protects your engine and hands from fuel spray.

Carb Float Adjustment Tool

PR67443

Aluminium Power Valve Remover Tool

Never damage your metering blocks again! PROFORM's new aluminium power valve remover tool makes power valve removal a snap. Simply place the tool over the power valve and give it an easy turn.

Aluminium Power Valve Remover Tool

PR67454

CARBURETOR JET INSTALLATION TOOL

Don't damage your jets with a clumsy screwdriver. This handy tool makes installation and removal of jets a cinch!
PR67469

Fogger Nozzle Tap

This tap will be required to install all NOS Fogger nozzles into a manifold. Its somewhat unique size may make it difficult to find locally, but we've got you covered.

1/16 NPT Pipe Tap

NOS15990

Carb Stand

Aluminium stand simplifies carb maintenance and will hold carb off of work bench surface. Works with Edelbrock, Quadrajet, and Holley 2- and 4-barrel carbs.
Carburetor Rebuild Stand

RS-ALL26200

Racer's Nitrous & Fuel Pressure Gauges

Designed with the professional in mind, these gauge kits are engineered with greater accuracy and convenience. Each gauge includes a Schrader valve fitting for quick and accurate pressure checks to help maximize your performance run after run. Also features a 1' steel braided hose extension for extra convenience. Fuel pressure gauge measures from 0-30 PSI while the nitrous gauge measures from 0-1500 PSI.

2-1/4" - Racer's Fuel Pressure Gauge
2-1/4" - Racer's Nitrous Pressure Gauge

NOS15930

NOS15931

Nitrous Jet Drills

A complete set of numbered drills from .0135 to .098, comes packaged in a durable carrying case for precision drilling of brass flare and funnel jets. A must for the toolbox of every serious tuner. Not for use with precision SS jets.

Jet Drills .0135 to .098

NOS15992

Nitrous Bottle Nut Wrench

Special wrench designed for quick removal of bottle nut adapters on NOS Hi-Flo & Super Hi-Flo valves without damage. Short handled design prevents overtorquing.

PRESSURE TEST KITS

These pressure test kits from AeroFlow Performance is just what you need to ensure the job is done right before installing it onto your application. After building you're AN fitting line terminated with our stainless steel adaptor and test valve on the other end. Install the plug on one end of the line then use an air compressor to pressurize the line to the desired test pressure. The valve is a standard Schrader valve which allows a tyre pressure gauge to be used. Unlike some other, more costly and complex solutions for testing braided lines, these pressure testers are small and versatile and allow the user to test all lines both on and off the vehicle. Available in all AN sizes from -3AN all the way to -20AN.

- AF98-2080 -3AN pressure test kit
- AF98-2081 -4AN pressure test kit
- AF98-2082 -6AN pressure test kit

- AF98-2087 -20AN pressure test kit

FUEL HYDROMETER

- EN7013 50%-100% Nitro Hydrometer Kit
- EN7014 50%-100% Nitro Hydrometer Only
- EN7015 Beaker for EN7014 Hydrometer

E85 CHECKER - FOR E85 FUEL ONLY

Calibrating the right air/fuel mixture is important to gain proper power and efficiency from your carburetor and engine. But for vehicles running E85 fuel, proper calibration is difficult if you don't know the exact percentage of ethanol-to-gasoline in the fuel. Because E85 fuel can vary in the amount of ethanol and gasoline mixture, Holley's E85 Checker is an essential tool that can instantly determine the ratio in the E85 fuel you're using. Holley's E85 Checker fits in your pocket or tool box, and is easy to use. Simply add water to the first line on the E-Checker and then pour in the E85 sample to the second line. Once the water is absorbed, the Holley E85 Checker will indicate the amount of ethanol in the fuel. With the added benefits of 105 octane, cooler engine temperatures and improved emissions, Holley's E85 Checker can make a winning combination with any of Holley's E85 calibrated carburetors and fuel-pumps for your vehicle.
HO26-147

E85 CONTENT TESTER

This simple instrument will allow you to determine the Ethanol content of the fuel you are sampling. Knowing the content of the fuel you are using allows you to make more informed decisions when it comes to the tune up of your car. Consistent fuel leads to consistent performance.

IGNITION TOOLS

Spark Plug Thread Chaser

A stripped spark plug hole is not a fun thing to fix. Avoid this trouble by using our Spark Plug Hole Thread Chaser to renew damaged threads and allow firm seating of plugs. Our long 13/16" hex design prevents wobble, while the neoprene ring holds the heat-treated chaser snugly in your socket. Our tool is double ended to fit both 14mm and 18mm threads.
Spark Plug Thread Chaser

Spark Plug Viewer w/ LED Light

- 6.4X Fire Polished, B1-Convex Optic Lens
- Powerful white light LED floods the insulator cavity with light for accurate inspections
- Longer life LED lamp
- Lower voltage for longer battery life
- Easy one-handed on/off switch
- Black anodized billet aluminium flashlight housing
- 2 AA batteries included

Magnifying Spark Plug Viewer, LED Light

MO62348

Moroso Spark Plug Indexer

Moroso's "Indexer," is designed for both flat- and taper-seat 14mm spark plugs. Once a given plug is selected (placed in a cylinder head and found to have the correct ground wire position), it is placed in the Moroso Plug Indexer and the position of the ground electrode marked on the black anodized surface. This marking provides a reference for checking other plugs to be used in the same cylinder.

Terminal Tools

Weatherpack style terminals offer many significant benefits over conventional terminals, including superior resistance to the elements and a mechanically secure connection. But without the correct tools, they can prove very difficult to assemble and service. This series of terminal service tools from FAST is the ideal solution for the removal and installation of many types of Weatherpack connectors and will provide years of dependable service.

Pro-Crimp II

If you make numbers of plug wires or do a lot of custom wiring, the Pro-Crimp Tool is a must for your toolbox. The Pro-Crimp features interchangeable jaws allowing for a variety of different style crimps with one heavy duty tool. The Pro-Crimp features a hardened steel frame with comfortable molded hand grips. The slick ratchet action provides secure, factory quality crimps every time. The Tool is supplied with precision crimping/ stripping jaws for MSD's spark plug wire terminals.
Pro-Crimp Tool
MSD35051

Pro-Crimp Tool

MSD35051

Mini Stripper Crimper

This special tool is an inexpensive way to make a set of custom plug wires. It provides a "die" to strip either 8mm Heli-Core or 8.5mm Super Conductor Wire, then can be used in a vise to provide a solid terminal crimp to the wire.

Mini-Stripper-Crimper

MSD3503

Pro Crimp Dies

These interchangeable dies are for use with the MSD35051 Pro-Crimp Tool.

LEAD CRIMP TOOL

The Aeroflow ignition lead crimp tool is perfect for helping you make professional quality crimps when assembling your ignition leads. Standard jaws suit 8.5mm (11/32") leads. Optional jaws are available to suit insulated and non insulated electrical terminals for auto electrical applications.

- AF98-2070 Crimp tool with 8.5mm (11/32") lead jaws
- AF59-2070 Replacement lead crimp jaws
- AF98-2071 Crimp jaws suit insulated electrical terminals
- AF98-2072 Crimp jaws suit NON-insulated electrical terminals

Self-Powered Timing Light

An accurate timing light is extremely important to the performance of your engine. MSD's new Self-Powered Timing Light is a tool every performance tuner should have. A great feature of the Self-Powered Timing Light is that it does not require 12 volts. This means less wires are hanging over the engine compartment and makes for quick, easy checks. For power, the Light uses six AAA batteries. The lightweight assembly is injection molded for great durability and produces an intense strobe that is easy to view through 5,000 rpm. The inductive pickup is detachable for easy storage.

Self-Powered Timing Light

MSD8991

MSD Timing Light

Pro Timing Light

This MSD Timing Pro is constructed with solid state circuitry and uses a Silicon Controlled Rectifier (SCR) that provides accurate and stable timing signals from 0 to 8,000 rpm. This rugged timing light is built to work in rough environments such as racing pits or professional mechanic shops. The MSD Timing Light's lightweight assembly is injection molded for great durability and produces an intense strobe that is easy to view even in daylight. The inductive pickup is detachable for easy storage and for safety measures while the battery clamps provide a strong grip to the terminals. The battery clamps are color-coded and insulated for tight, safe connections.

MSD Timing Light

MSD8992

Replacement Cable for MSD8992

MSD89921

MSD Ignition Testers

If a race engine hesitates or bumbles on the track, the first thing that is suspected is the ignition system. MSD offers three ignition testers to assist racers when troubleshooting in the pits. These Testers allow you to check the operation of the ignition control and coil without removing them from the car! You can also confirm rev limits, shift points, tachometer accuracy and more by varying the rpm with the two control knobs. Every racer's toolbox should have an MSD Ignition Tester.

- Single Channel Ignition Tester MSD8998
- Multi-Channel DIS Ignition Tester MSD8996
- Midget Ignition Tester MSD8994

SPARK PLUG INDEXING TOOL

High compression engines run better with the spark plugs indexed. This way spark plugs can be properly set so there is no piston dome interference. Fits 14mm and 18mm Spark Plug Threads.

PR66795

Timing Tab with Built in L.E.D Timing Light

This billet aluminium timing tab has a built-in self-powered L.E.D. timing light which dispenses with the need for a separate timing light or car battery hook-up. Permanently mounted so there's no need for additional timing lights. The hands free design allows one person to set timing.

HIGH-INTENSITY LED TIMING LIGHT & FLASH LIGHT

Checking the spark in relation to the piston ensures that your engine is firing as efficiently as possible. The Tac-Style Shift Light from PROFORM allows you to check timing, help diagnose a no-spark condition and check for electronic advance/retard! Use with 2, 4, 6- and 8-cylinder applications. Featuring 1-wire inductive lead design and a high-intensity LED that's visible in sunny conditions, which makes using this tool simple and easy to use. Running on a Li-ion rechargeable battery, via mini-USB cable which is included, this light can also be used as an all-purpose flashlight for use at home, car, or in the garage. The sleek machined aluminium body has a tactical inspired design that fits comfortably in hand for prolonged use. The head of the light features an O-ring sealed tempered glass lens, designed for a tighter light beam to better aim at the timing mark. Weighing in at just under 10 oz., with a black anodized finish, this light has a sturdy construction that can stand up to the rigors of heavy use.

200 LUMENS LED WORK LIGHT

- High quality 1500mAh Lithium-Ion battery f or longer life, no memory effect and a much slower discharge than traditional Ni-MH batteries.
- Unique and innovative 360° swivel and tilt function enable the light source to be positioned in any direction.
- 5 Super-bright SMD LEDs: each lamp houses 5 super-bright SMD LEDs, providing up to 200 lumens output with 120° spread of light, illuminating the whole work area.
- Features a swivel hook and one rubber-covered magnet on the end, allowing hands-free operation.
- Soft touch rubberized casing
- Multifunction button for work light and torch
- End-mounted, super-strong magnet
- Swivel hook
- Unique ball joint enables 360° swivel and tilt
- Rechargeable Lithium-Ion battery
- 1 Watt torch function
- Patent pending
- USB/Micro USB Charging Cable
- Charging Time: 2.5hrs.
- Operating Time: 3hrs. (Main lights) 6hrs. (Torch)

Description

Swivel 200 Lumens Work Light - Green

Part No. SESL26GU

100 LUMENS LED EXTENDABLE RED FUEL WORK LIGHT

- 8 SMD 100 Lumens | 1 LED 15 Lumens
- Illuminates work area in emergency situations
- Adjustable head with 0.5W LED for use as a directional torch
- Alternatively extends out, revealing 8 SMD LEDs for use as an inspection lamp
- Features a magnet in the end, for hands-free use
- Powered by 3 long-lasting Lithium AAA batteries (supplied)

SESL25

Vice Jaws

These vice jaws will securely hold the AN fittings without a hint of scratching the anodizing while you assemble the fitting. The back of the jaws have magnets which holds the jaw firmly in place. They come in two styles - billet aluminium and nylon.

Part No

Description

- AF98-2001 Billet anodised Aluminium Vice Jaws Magnetic Back
- AF98-2041 Billet anodised Aluminium Vice Jaws Magnetic Back Recommended for large AN fittings
- AF98-2002 Nylon Soft Vice Jaws Magnetic Back

UNIVERSAL OIL FILTER CUTTER

Want to see the contaminants that your oil filter has prevented from destroying your engine? That's now easier than before with the Aeroflow oil filter cutters to cut your filter so you can scrutinize the particles confined inside. Much like a hand held tubing cutter, they use a cutting wheel and a pair of opposing ball bearings to easily rotate the filters as they cut. Made from aluminium to guarantee ease of use and durability.

Part No

Description

- AF98-2047 Universal Oil Filter Cutter
- AF59-2047 Replacement cutting blades (2 pack)

FLUSH CUTTERS

This flush cutter tool is great for cutting wires or cable ties leaving a clean and smooth finish. It's also perfect for cutting close to the solder joints on circuit boards and other delicate and intricate cutting jobs. These compact cutters are lightweight and feature easy grip rubber handles.

AF98-2104

ELECTRICAL

WIRE STRIPPERS

Aeroflow's automatic electrical wire strippers allow you to strip wires from 1.0mm to 3.2mm gauge smoothly with ease. It features sturdy die cast alloy body with polyvinyl grips. The spring sets the stripper back to the starting position and the length stop can be set for constant stripping length during repetitive work. This tool leaves wires undamaged thanks to precision-ground blade shapes.

AF98-2105

KEVLAR, TEFLON COVOLUTIONED

TEFLON AND 400 SERIES HOSE CUTTER

No more wasting time and hose with nasty unclean cuts, simply line up hose at 90 degrees to get a clean cut every time. Can be used with Aeroflow's Kevlar braided 7000 series, Nylon braided 7050 series and 400 series hoses.

The advantage of our cutter is the blade is dual functioning simply rotate the blade when blunt, cutter also supplied with spare blade.

Part No	Description
AF98-2052	Kevlar, Nylon, 400 Series Hose Cutter
AF98-2053	Hand held cutter replacement 5 pack of blades that works out to be 10 when you include the rotation.

200 Series Hose Cutter

This ultra-sharp hand held cutter has been designed to use on our 200 series hose. These cutters will not leave residue as other methods of cutting does.

Part No	Description
AF98-2016	Cuts -3 and -4 200 series teflon hose

Hose Cutting Shears

Great for cutting all styles of Aeroflow hose including braided and rubber.

Part No	Description
AF98-2015	Cuts -3 up to -20 Hose

Non-Stick Cutting Film

Aeroflow's non-stick cutting film is an easy and cost effective way for a neat cut every time of Kevlar or Nylon braided hose. No more struggling with sliding the socket nut over the frayed cloth braid, simply slide the nut over before removing the tape.

This handy kit comes with 50m (164ft 1/2") of clear non-stick cutting film and 2m (6ft 6-3/4") of white PE film that can also be used on stainless braided hose.

AF98-2049

AEROFLOW THREAD PASTE

Aeroflow's Aero Seal thread sealing paste contains PTFE to assist in sealing and avoid binding of threads. Recommended for use with all threaded fasteners and adapters in aluminium, steel, stainless steel and plastic. Aero Seal is an anaerobic paste that remains liquefied until installation to provide a positive seal and can be used in temperature ranges from -58° to 400°F / -50° to 204°C. Sold individually or in 12 piece bulk packs.

PRO SPANNER BAG

Store your alloy AN wrench's away safely and neatly with this Aeroflow spanner bag. This tough and flexible polyester roll-up storage roll can hold the complete set of AN spanners ranging from -3AN to -20AN. Once you've inserted your tools into the appropriately sized stitched mesh slots, just roll the bag up, close it securely with the strap and store within your garage or workspace. Suits the Pro Spanner range of Aeroflow wrenches.

AF59-2244 Grey roll up bag

Hardline

Pipe Cutter

Cut plastic, aluminium, copper or steel tubing without distorting or crushing. Cutter works with tubing from 3.17mm (1/8") up to 28.5mm (1-1/8") and has wide rollers for even tracking of cutter wheel, built in reamer for cleaning inside of tubing and an extra cutting wheel.

Part No Description
AF98-2022 Hardline pipe cutting tool

Pipe Beading Tool (Large Bore)

Great for beading 5/8" pipe and larger for intercoolers and more.

Part No Description
AF98-2017 5/8" and larger pipe beader

Pipe Beading Tool (Small Bore)

Great for beading 7.94mm (5/16"), 9.52mm (3/8") and 12.7mm (1/2") pipe. Note: Tool is designed for beading pipe gradually. Do Not over tighten on first stage, tighten gradually to increase bead in multiple stages. Must use lubricant.

Part No Description
AF98-2019 5/16" pipe beader
AF98-2020 3/8" pipe beader
AF98-2021 1/2" pipe beader

Light Weight Tube Bender

A hand tool for precisely bending pipe, especially a little tweak during installation in that hard to get position. For pipe size 1/16 to 1/4. The tool is able to bend tube with tube nut installed

Part No Description
AF98-2009BLK Tube Bender

TUBE BENDER

The Aeroflow Performance 5 in 1 pipe bender hand tool is designed for creating ripple-free and clean bends in pipes with precision in a range of materials such as copper, steel and aluminium. This 180 degree bender tool is capable of bending 1/4", 5/16", 3/8", 1/2" and 5/8" tubes with ease. It features a calibration scale for easy accurate bending of right and left bends providing you with a reliable guide to work with.

AF98-2117

HAND HELD TUBE

STRAIGHTENER

The Aeroflow Performance hand held tube straightener is designed for use with brake line, fuel line, and any other small hollow tubing. The hand-held compact design allows it to be used when the tube or pipe already installed into the car and minor adjustments are required. It has 9 small stainless-steel rollers (installed inside the case four on top and five on the bottom) that will not scratch or damage tubing if used correctly. This tool will work best with tubing sized 3/16" (4.76mm) and 1/4" (6.35mm) in outer diameter. NOTE: This tool is not intended to repair kinked or damaged tubing.

AF98-2218

Tube Straightener

Great for straightening out coiled aluminium, mild steel and stainless steel pipe for that professional finish.

AF98-2018 from 3/16" to 1/2"

DEBURRING TOOL

The Aeroflow Performance swivel deburring tool provides easy deburring of metals or plastic. The blade is made from high quality high-speed steel with (Tungsten) Carbide Tipped (HSS). Providing a very clean cut with extreme wear resistant for durability. The blades are easily replaceable and one spare blade is included.

AF98-2116

PROFESSIONAL SINGLE & DOUBLE FLARE TOOL KIT

The new Aeroflow Brake Flaring tool is the fastest way to get a professional single or double flare everytime! This easy to use flare tool comes with 6 assorted metric and imperial dies, including the popular 3/16" brake line which requires a double flare to meet ADR standards. This flaring tool produces convex and double flares to SAE and DIN standards in seconds while the smooth die does not mark the tubing. Comes with an easy carry case.

Features: • Easy to use • Perfect for brake or transmission lines • Create single or double flares • 6 assorted dies included • Carry case. Want to see how easy this tool is to use? Check out the video www.youtube.com/aeroflowperformance

AF98-2048 Pro flaring kit. 4.76mm (3/16") to 9.52mm (3/8") tube single & double flare. Comes with 45o flare head & dies for brake lines.

AF59-2448 37o AN flare head and dies for flaring hardline to suit AN adapters. 4.76mm (3/16") to 12.7mm (1/2")

Race car 16' retractable tow strap up to 2600lbs, SS7201

Retractable Tow Strap

A 16' retractable tow strap. We've designed the main frame using 4130 moly for maximum strength. The hooks have clearance to slip over 1" tubing. The retractor end has provisions to be mounted vertical or horizontal by changing the bolt-on hook location or can be permanently mounted to the tow vehicle. The retractor spring is made of high strength carbon steel. All exposed metal parts have a nickel plate finish and the housing is made of moulded poly material for durability. The heavy duty nylon strap actually cushions the towing strain.

Oil Change Drain Tray

The Drain Tray makes it simple, with a filter drain tray, and pour spout. Features an easy carry handle on the lightweight aluminium frame.

Tray has 6 quart (5.6L) capacity.

Dimensions: 15" x 2.5" x 15" (381mm x 64mm x 381mm).

Oil Change Drain Tray

PIT-129-0

Engine Lift Plate

Bolts on to carby mounts for easy engine lifting.

HRP-6001

ENGINE LIFT PLATE

Aeroflow's Engine Lift plates allow you to lift your engine up by its intake manifold for easier manoeuvring. You can also use them as a manifold cover when you store your engine. These Aeroflow zinc plated carburetted engine lift plates fit standard Holley 4150/4160 and Dominator, Rochester Quadraj, Carter, Demon, Quick Fuel, Motorcraft, Edelbrock, Edelbrock Q-Jet and Carter AFB carburettors.

AF98-2045

GM LS ENGINE LIFT PLATE

PROFORM's steel multiple attachment point, LS engine lift plate makes getting the engine out a cinch. Simply remove the intake manifold and valley tray cover, then replace it with this robust lift plate using the existing valley tray bolts. It also acts as a valley cover for storage purposes.

- Made from Quality Steel
- Bolts To Engine Block with Valley Tray Bolts
- Three Hoist Points for Optimal Tilt
- Bolts Not Included
- Fits GM LS Gen IV, 2006-2016

PR67459

AEROFLOW GM LS ENGINE LIFT PLATE

Perfect way to simplify installation and removal of any LS engine. Remove intake manifold and valley plate and bolt down in place using existing valley plate bolts. There are 4 holes for various chain placements for proper engine weight balance offset. Suits all GM LS engines.

AF98-2077

QTP LSX Engine Lift Plate

You will never have to drop your LSX motor out the bottom of your car again. The QTP LSX Engine Lifting Plate will allow you to lift your engine up by its valley cover for easier maneuvering. This compact, precision tool allow for various weights to keep the engine balanced. Just remove the valley cover tray and bolt the lifting plate in place.

Construction: 304L Polished Stainless Steel, 1/4" Thick Plate, Grade 8 Nut and Bolts.

Works With All LSX Gen 3 and Gen 4 Motors

LSX Lift Plate QTP10100

Engine Sling

Our engine sling makes engine changing a breeze. Simply hook it to your engine puller and attach the 4 straps to your engine using your header studs or exhaust bolt holes and pull. Plated for long lasting finish. Each royal blue polyester strap is 22" long. Great for cars with blowers or tunnel ram intakes. Dimensions: 27.5"H x 28"W x 3"D (699 x 711 x 76mm).

QWIK LIFT VEHICLE JACKS & STAND

Aeroflow quiklift vehicle positioning jacks or Go Jacks make manoeuvring vehicles around the workshop or home quick, safe and easy! The ratchet design is superior to other hydraulic systems as it is more durable, does not require servicing, there are no seals to blow out under pressure causing leaking fluid and can be stored on their side without the risk of air-lock. Aeroflow rate each go jack to handle up to 680kg per wheel making them suitable for use with most car. They will fit under tyres up to 305mm (12") in width and have a foot-operated ratcheting mechanism that squeezes the roller-equipped support legs together to lift the tyre off the ground. With four 360° swivel heavy duty castors they allow you to move your vehicle in any direction in the workshop or home with ease. Note: Qwik-Lift jacks and holder are sold individually.

AF98-2129 Qwik-Lift vehicle jack 304.8mm (12") wide rollers 1500lbs (680kg) each.

Note: Sold individually

AF98-2130 Qwik-lift vehicle jack stand/holder (holds 4 rollers)

CHASSIS STAND

Aeroflow's Black Chassis-Frame stand is robust and strong to get your race car in perfect position to work on. Heavy duty caster wheels make moving your race car around the workshop easy. Robust fabrication won't buckle under high load capacity. The chassis-frame stand is collapsible to lay flat for easy storage, has a brake on each stand to prevent rolling when working on the car and is lightweight.

AF98-2054 Chassis stand will fit standard & raised rails

AF59-2072 Chassis stand wheel WITH lock sold individually

Replica Plastic Engines & Accessories

The question is often asked of us, "Who would want a plastic replica engine when you can get the real thing?" We are only too glad to list the many advantages of our lightweight replicas to those who inquire, and remind them that it's not always easy to get "the real thing". We are pleased that many street rod and race car fabricators, performance retailers, and even major auto manufacturers themselves have found a myriad of uses for our products. Massive range available with over 150 part numbers please check online for full range and contact Rocket for more information.

A little twist to one of our best sellers. The difference from our Original Helmet Shelf is that we added full storage shelf. We also added a removable front tube for hanging items, such as clothing, tie-downs, gloves and more.

1 bay dimensions: 14"H x 14.25"W x 15"D (356 x 362 x 381mm).
2 bay dimensions: 28.5"W x 12"H x 15"D (724 x 305 x 381mm).

Deluxe 1 Bay Helmet Shelf PIT-330D
Deluxe 2 Bay Helmet Shelf PIT-331D

Helmet Shelves

Keep your equipment protected and in one handy spot. Shelf stores helmet, neck brace, gloves and crew ear protectors. Underside garment rack for hanging up to eight uniforms.

1 bay dimensions: 14.25"W x 12"H x 15"D (362 x 305 x 381mm).

2 bay dimensions: 28.5"W x 12"H x 15"D (724 x 305 x 381mm).

1 Bay Helmet Shelf PIT-330
2 Bay Helmet Shelf PIT-331

3 Bay Helmet Shelf

Keep your equipment protected, and all in the same spot. Shelf will store helmets, neck braces, gloves and ear protectors. Underside garment rack, capable of hanging up to eight items. Dimensions: 42-3/4"W x 12"H x 15"D
PIT-332

Shelf & 5 Gallon Cooler

This shelf securely holds a round 5 gallon (19L) cooler. Mount to a wall or door surface to save work space. Includes cooler.

Shelf & 5 Gallon Cooler
PIT-342

Can & Cup Holder

No more searching around for that can of soft drink, beer, or coffee. Keep drinks handy and safe from spills in these can or cup holders. Made to fit cans or large drink cups

Can & Cup Holder PIT-338

PIT PAL 6 Quart Oil Shelf

These organise and store 6 quart size oil bottles, for shop or trailer. Dimensions: 15" x 5-1/2"
PIT-309

PIT PAL 12 Quart Oil Shelf

These organise and store 12 quart size oil bottles, for shop or trailer. Dimensions: 30" x 5-1/2"
PIT-311

10lb Nitrous Bottle Racks

These racks keep 10lb nitrous bottles vertical and out of the way. They easily mount to the floor or wall.

2 bay dimensions:

14.75"W x 13"H x 7.25"D (375 x 330 x 184mm).

3 bay dimensions: 22.25"W x 13"H x 7.25"D (565 x 330 x 184mm).

4 bay dimensions: 29.5"W x 13"H x 7.25"D (749 x 330 x 184mm).

3 Bay 10lb Nitrous Bottle Rack PIT-250

4 Bay 10lb Nitrous Bottle Rack PIT-251

Trailer Fuel Jug Rack

Heli-arc welded .090 aluminium rack mounts easily on trailer floor or wall. Holds one round or square fuel jug safely inside your trailer.

Dimensions: 11.5"L x 13"H x 12"W (292 x 330 x 305mm).

Trailer Fuel Jug Rack PIT-180

Fuel Jug Racks

Heli-arc welded .090" aluminium racks mount easily on trailer wall. Holds round or square fuel jugs safely inside your trailer.

2 jug dimensions: 23"L x 13"H x 12"W (584 x 330 x 305mm).

3 jug dimensions: 34.5"L x 13"H x 12"W (876 x 330 x 305mm).

4 jug dimensions: 46"L x 13"H x 12"W (1168 x 330 x 305mm).

2 Fuel Jug Rack PIT-181

3 Fuel Jug Rack PIT-182

4 Fuel Jug Rack PIT-183

Canopy/Shelter Storage System

Store your pop-up tent secure to trailer or garage wall with Pit Pal Products fully adjustable storage system. Brackets are designed to fit 10' x 10' or 10' x 20' tents. System comes with 2 brackets and 1-1/2" wide heavy duty nylon safety belts. Dimensions: 5.75"H x 17"W x 4.25"D (146 x 432 x 108mm).

Canopy/Shelter Storage System PIT-195

Collapsible Chair Holder

Great solution for storing collapsible chairs. Stores up to 3 chairs.

Dimensions: 4.125"H x 23.125"W x 7.125"D (105 x 587 x 180mm)

Collapsible Chair Holder PIT-303

Door Grabbers

These latches work automatically. Keep trailer doors from swinging shut. They feature aluminium male plunger and solid rubber socket.

Small Door Grabber - 1 1/2" Long PIT-DH42S

Large Door Grabber - 2 1/2" Long PIT-DH42L

X-Lge Door Grabber - 3 1/2" Long PIT-DH42XL

Universal Key Punch Brackets

Universal design bracket that makes anything clip on or off easily. Holds a variety of hard to store trailer and shop equipment.

Universal Key Punch Brackets
PIT-241

Wheel Chock

Moulded, ribbed, rubber wedge chock with 2 1/2" opening for cable or rope. These chocks are used to help keep your vehicle or trailer from rolling when parked.

Wheel Chock PIT-DR800

Door Horse

Finally a door horse with no assembly required at the track. Just fold out & your ready to go. Features locking side bars for added stability. Lightweight and portable. Dimensions: 39"H x 36"W x 42"D (991 x 914 x 1067mm).

Door Horse PIT-610

Pit Ramp Storage Rack

Easy storage for Pit Pal Pit Ramps while in transit. Fasten to wall.

Dimensions: 20.75"W x 8.5"H x 3"D (527 x 216 x 76mm).

Pit Ramp Storage Rack

PIT-279

LOW PROFILE CAR RAMPS

People running lowered cars, with body kits don't have the room to get a jack under their car to access a jacking point, even to simply look under their car to inspect something. Aeroflow Performance low profile car ramps which are designed to not slide forward when driven onto, have a lip on the edge so you don't drive off the ramp and very lightweight.

Length: 685mm (26-31/32")

Width: 192mm (7-35/64")

Lift height: 65mm (2-35/64")

Weight per ramp 1.8kg (3.96lbs)

Rated Load Capacity: 1000kg (2204lbs) each ramp

AF98-2109 Low profile car ramps (Sold as pair)

AF59-2109 Replacement mesh bag

Trailer Aid

A fast, safe, and easy way to change a flat. No other jack is needed, simply ride onto the jack and change your tyre. Designed for double axle trailers up to 15,000lbs. (6800kg). 2 colours to choose from: black or yellow.

Trailer Aid - Yellow PIT-604

Trailer Aid - Black PIT-604BLACK

Pit Ramps

Allows floor jack to slide under chassis. Keeps front tyres secure while raising rear of car. Helps maintain oil pressure by keeping car level while rear is elevated when warming motor and drive line. Great when pitted in grass or uneven ground. Dimensions: 24"W x 2.75"H x 8"D (610 x 70 x 203mm). Sold as pairs. **Pit Ramps (Pair)** PIT-280

Folding Aluminium Loading Ramp

Features heavy duty design 1,000 lbs. (455kg) distributed load capacity per ramp.

Features include built in handle, "Sure Grip" positive traction loading surface, "Wheel-guider" edges, and rubberised tailgate protector.

Sold as a single ramp.

DULL FINISH

GAFFERS TAPE

The preferred choice of the pros! Dull Finish Gaffers tape is a MATTE Finish, vinyl-coated cloth with a synthetic rubber resin adhesive. Anybody who has ever used Gaffers Tape in place of Duct Tape never looks back. The matte cloth finish does not reflect light or leave residue on wires. Widely used in the entertainment industry and a very popular tape in the racing market. Supplied as 2" wide x 20-foot (50mm x 25m) rolls that tear straight and easy.

Aluminium Foil Heat Tape

Dead soft aluminium foil tape has a high performance acrylic adhesive system. 3.25 mil thickness with a removable paper liner. Temperature ranges from -37°C to 150°C. Extremely conformable to irregular surfaces. Great for plastic protection from aftermarket pipe installations or anywhere heat is affecting your plastic. MX bikes, ATV's, Street Bikes, UTV's, Snowmobiles etc. Will not work on direct contact of exhaust.

Aluminium Foil Tape 3" Wide x 25 Foot Roll RTA325
Aluminium Foil Tape 3" Wide x 150 Foot Roll RTA3150

ISC Racers Tape

For more than 20 years, ISC Racers Tape has supplied a full range of tapes to the racing industry. From Daytona to Indianapolis everyone uses Racers Tape. With research and testing done on our own race cars, we proudly design and manufacture useful tape products that really work.

Extreme Duty Tape

This highly aggressive and premium heavy-duty duct tape will succeed where other tapes fail. It's Superior tensile strength, clean release, and non-delaminating features make this tape a must have. Supplied as 2" wide x 20 foot (50mm x 27m) rolls.

- Extreme Duty Racers Tape - Red** RT4001
- Extreme Duty Racers Tape - Black** RT4004
- Extreme Duty Racers Tape - Silver** RT4005

Checkerboard Tape

Checkerboard tape is a great item for all racers and their fans. Mostly used for decoration and to gain attention to all areas. It is a vinyl tape laminated with mylar and comes with a liner. 2" wide x 45 foot (50mm x 13m) rolls.

- Black & White Checkerboard Tape** RT5001
- Black & White Angled Checkerboard Tape** RT5011

Non-Skid Tape

Non-Skid is the easy way to prevent slipping and falling with it's instant, self adhesive, and anti-slip safety surface.

This heavy-duty long lasting material is defiant to all weather conditions and will endure temperature extremes of -40° to 105° C. Use on trailer ramps, stairs or walkways, dock areas, brake and clutch pedals, entrances, and of course steps. Non-Skid is sparkle black or clear and is available in rolls of 2"x10', 3"x10' and 4"x10'

- Non Skid Tape 2" Wide x 10 Foot Roll - Black** RT8014
- Non Skid Tape 3" Wide x 10 Foot Roll - Black** RT8015
- Non Skid Tape 4" Wide x 10 Foot Roll - Black** RT8016

Surface Guard Tape

Formerly referred to as helicopter/leading edge tape. Surface Guard Tape is an extremely tough, clear, conformable polyurethane tape. This tape provides excellent paint protection from punctures, tearing, abrasion, erosion, ultra violet light, temperature extremes and automotive solvents and will not yellow over time. Be sure to take note that our Surface Guard Tape is made of Polyurethane Material not PVC or Vinyl. These other types cannot, and will not, take the abuse that polyurethane will. Applications for surface protection tape are endless. From race cars to passenger cars and trailers, motorcycles, karting, streetrods, boats, semis, tractors, RV's and all in between. Anywhere a surface, unpainted or painted, that is prone to scratching, chipping or weathering, ISC's Surface Guard Tape can do the job.

- Surface Guard Tape 4" x 60 foot Roll** RTH4614
- Surface Guard Tape 8" x 60 foot Roll** RTH8614

TCI TH400 STREETFIGHTER TRANSMISSION

The TCI StreetFighter Transmission for Chevy engine applications is tough enough to withstand the rigors of the toughest street machines – up to 725 horsepower with a non-supercharged system using pump gasoline. Equipped with a TCI manual/automatic valve body, most units al-low you to manually shift the vehicle into each gear change or, by placing it in the drive post-tion, remain fully automatic. This gives you racetrack shifts and shaves time off your ETs.

- Special clutches & bands increase durability; new sprags/roller clutches increase holding capacity
- Improved lubrication system increases fluid sent to planetaries and internals
- Includes a chrome-plated transmission pan with embossed TCI logo
- Higher line pressure for extra firm shifts & greater torque capacity with less slippage

TH400 StreetFighter Transmission, 4" Tailshaft
TCI211000

TCI TH400 SUPER STREETFIGHTER TRANSMISSION

The Super StreetFighter Transmissions bridge the gap between the StreetFighter series and full competition transmissions. This version (Part# 211005) is intended for normally aspirated vehi-cles powered by engines producing up to 875 horsepower. Featuring some of the same benefits as our StreetFighter Transmissions but with certain upgrades, the Super StreetFighter offers both manual and automatic shift options to give you the power and shifts you want for the strip or easy driving for the street.

- Extreme performance clutches and nitrided steel plates for enhanced performance
- Extra-wide powerbands, where available, provide greater torque capacity, and more positive shifts & band apply
- Larger diameter servos increase band pressure which means more force on flex bands
- New sprags/roller clutches, enhanced hard parts and improved lubrication system
- Includes a chrome-plated transmission pan with embossed TCI logo
- Increased thrust capacity and higher line pressure for extra firm shifts & greater torque capacity with less slippage.

TH400 Super StreetFighter Transmission, 4" Tailshaft
TCI211005

TCI TH400 DRAG RACE TRANSMISSION

Designed for the extreme high-performance street or all out race car, our Full Manual Competi-tion Transmissions will give you consistent shifts as well as complete control over shift points. This version (Part# 212000) has a reverse shift pattern and requires no vacuum hookups or kick-down linkage. This means there are no external linkages to be purchased, which saves some expense. The increased line pressure provides a harder, quicker shift and eliminates the lag time between shifts produced by automatic shift transmissions.

- Extreme performance clutches and nitrided steel plates for enhanced performance
- High-performance power bands provide greater torque capacity and more positive shifts and band apply
- Hardened sprag race increases durability & strength
- Improved lubrication system increases fluid sent to planetaries and internals
- Able to handle up to 750 HP, depending on application

TH400 Drag Race Transmission, 4" Tailshaft
Full Manual, Reverse Shift, Non-Lock Up

AUTOMATIC TRANSMISSIONS

The TCI® Super StreetFighter™

Transmission bridges the gap between the StreetFighter® series and our full competition transmissions. It is intended for normally aspirated vehicles powered by engines producing up to 600 horsepower (most applications). Featuring the same benefits as our StreetFighter® Transmissions but with some upgrades, the Super StreetFighter™ offers both manual and automatic shift options to give you the power and shifts you want for the strip or easy driving for the street. TCI® 700R4, 2004R and AOD Super StreetFighter™ Transmissions also feature a TCI® Constant Pressure Valve Body™ to ensure that clutches and bands are firmly applied to help eliminate slippage.

- Super Streetfighte Transmission, 6" Tailshaft** TCI311005
- Ford C4 1970-82 Large Bellhousing, 26 Spline Input, Dipstick In Pan** TCI511605

B&M Street/Strip Transmissions

B&M's Street/Strip Transmission is a complete ready to run unit (less converter) for high performance street and mild strip use. The transmission provides firm shifts and features a standard shift pattern. The B&M Street Turbo 700 transmissions are suitable for use behind engines producing up to 450 lb/ft of torque which covers most small blocks and mild big blocks. A low first gear ratio and overdrive 4th make these very desirable units. Won't replace 4L60E applications (post '93"

GM Turbo 400

The B&M Street/Strip Turbo 400 features a 2:48 1st gear & 1:48 2nd gear. Rebuilt front pump utilizes B&M pressure regulator spring & shims. All new B&M hi-performance friction plates, thrust bearings & races. New intermediate roller clutch & kickdown band with welded anchors. Machined center support with new case saver ring. New adjustable modulator & silencer ring; external electric connector & kickdown solenoid. Recalibrated valve body

Turbo 400 Street/Strip Automatic Transmission for use with 1-7/8" diameter yoke BM112002

B&M Ford AOD

The B&M Street/Strip AOD features a 2:40 1st gear, 1:47 2nd gear, .67 OD Rebuilt front pump. Rebuilt governor. New overdrive band. Recalibrated valve body

New B&M Hi-performance friction plates. Comes with B&M shift lever or stock Mustang lever for use in late model Mustang applications

Street/Strip Automatic Transmission
'80-'93 (Mustang only) 289, 302, 351C & 351W BM114501

B&M Ford C-6

The B&M Street/Strip C6 Transmission features a 2:46 1st gear, 1:46 2nd gear Rebuilt front pump & governor Comes with B&M shift lever. New B&M hi-performance friction plates New intermediate flex band. New low roller clutch with lube hole in inner race. New adjustable modulator, bellville spring & filter. Fully recalibrated valve body.

Street/Strip Automatic Transmission
'70-'89 289, 302, 351C, 351W 13-1/2" tailshaft BM114202

HUGHES TRANSMISSION GM TRANSMISSION

This particular transmission fits many GM rear wheel drive O.D. transmission models, including the popular C/K Pick-ups. It was originally used in non-electronic form in the early 1980's by General Motors. Hughes Performance has continued to improve this unit both in durability and technology. All internal parts are carefully inspected and many of the original equipment pieces are replaced with Hughes High Performance components. We replace OEM clutch plates with our special high-coefficient one-sided frictions* for longer life and greater reliability. Kevlar bands have been installed in our transmissions for over 15 years in shifting applications. We co-developed with Borg Warner our "High-Static Hold" material for increased holding power, especially in racing applications, for all brake band applications. All lubrication and valve body circuits are carefully inspected and modified for cooler and quicker operation. We have manufactured countless numbers of these transmissions for a wide variance of vehicles and have earned an enviable reputation from racing to towing and all types of street performance, hot rods, and custom applications.

MOPAR

TRANSMISSIONS

The A727 Torqueflite: the respected workhorse of Chrysler automatic transmissions. Once Chrysler engineers added an overdrive assembly and updated the unit, it became a 4 speed overdrive known as the A518. Since its introduction in 1990, it has undergone multiple updates. Our inhouse modifications, along with the popularity of the fresh design of the new Dodge pickup, make this unit a must-have. Before beginning the rebuild, each unit is closely inspected for abnormal wear. Many components are automatically replaced, even if normally passed over by other manufacturers; all friction material is upgraded, lube circuits are modified, and the valve body is re-worked to achieve more positive shifts and better durability. This is the most outstanding version of the A518 available today.

GM POWERGLIDE

Hughes Performance competition transmissions deliver unsurpassed strength and reliability under the most severe conditions. Only the finest state-of-the-art performance parts are used in Hughes competition units. All internal and external components are inspected and then assembled to exact tolerances, thus ensuring top quality and performance. These transmissions are equipped with reverse-pattern, or, in some cases, forward-pattern valve bodies for sure, solid, quick shifts. They are also equipped with Hughes "Pro III" trans-brake valve bodies. These transmissions are designed with the capacity to withstand pass after pass.

TRANSMISSION PACKAGES

Our newly redesigned transmission packages are built to give our auto & truck customers the option to choose a transmission & converter package best suited to his / her vehicle combination. These kits come complete with everything you need, transmission, converter, transmission cooler, dipstick, trans mount, kick down cable, transmission controller even the transmission fluid! (contents of kits vary based on transmission type and vehicle, please call for details). So, whether you have a radical cam in your big block Chevelle or are towing 20,000 lbs. with your Dodge Ram; Hughes Performance has the transmission package to handle your needs!

TH350 TRANS PACKAGE

Muscle Car Trans. Package, designed for modified engines, camshaft and/or compression change, numerically higher differential gearing. Call for further details. Incl: 35-1, GM25, HP8238 Trans Cooler, Deep Alum Pan, HP8720 Trans Mount, Flex Trans Dipstick, Kick down cable and mount (when required) (2) cases HP501 Lucas Sure-Shift.
HTMC35-1

TH400 TRANS PACKAGE

Muscle Car Trans. Package, designed for modified engines, camshaft and/or compression ratio increase, numerically higher differential gearing. Call for further details. Incl: 34-1, GM25, HP8238 Oil Cooler, Deep Alum oil pan, Locking Dipstick, trans mount, (2) cases HP501 Lucas Sure Shift
HTMC34-1

GM 4L80E TRANS PACKAGE

Muscle Car Trans. Package, Designed For Modified Engines, Camshaft And Or Compression Ratio Increase, Numerically Higher Differential Gearing. Includes: 25-1, 25-30L HP8238 Trans Cooler, Trans, Controller, Flexible Dipstick, Deep Alum Oil Pan Trans Mount. (3) Cases HP501 Lucas Sure-shift
HTMC25-1

TRANSMISSION CASES

SUPERGLIDE 1-PIECE TRANSMISSION CASE

Reid Racing 1-piece Superglide cases come with the inner safety liner which meets SFI 4.1 rating without bulky heavy external shields or blankets. Reid Racing cases do not require pan straps or special SFI rated transmission pans.

- Provision for top bellhousing bolt. • Smaller diameter bellhousing increases floorboard clearance. • Narrow design fits all dragsters. • Double rear wall thickness prevents cracking in reverse-piston area. • Tail shaft bolt bosses are tied to back wall, stiffening case. • Beefier boss for transbrake solenoid.
 - Enlarged, 1/4 inch NPT bosses for oil cooler lines.
 - Redesigned oil passages improve transbrake release time.
 - Patented, adjustable transbrake release. • Larger oil pump thread bosses prevent cracking. • SFI 30.1 certified bellhousing requires no flywheel shield. • Wall thickness increased by at least 30 percent in all critical areas. • Pressure tap for reverse piston.
 - Thicker oil pan rails correct the flexing and leaking of stock cases. • Massive front-rail area prevents oil pump distortion.
- Case with Liner REPG1500
Case with Liner and Roller Bearing Hub REPG1500R

SUPERGLIDE 2-PIECE TRANSMISSION CASE

Starting with the time proven 1-piece Superglide, Reid Racing engineers decided against the "cut it in half" approach and specifically designed this case to be used as a 2-piece unit. The full 360 degree reinforced mounting flange provides the needed rigidity and stiffness, while extra thickness in critical areas adds strength to the rear of the case and eliminates the need for an internal liner. Adapter bellhousings and flexplates are available for most popular engine combinations; See below.

- No internal or external shields required; case is SFI 4.1 Certified*
- Uses all stock and aftermarket internals; no oddball parts.
- Bellhousings available for Chevrolet, Pontiac, Ford, and Mopar
- Front pump can be installed with or without the bellhousing attached.
- Made by a permanent mold from heat treated aircraft aluminium.
- Oil pan flanges are thickened to stiffen case.
- Beefed up oil pump area prevents front case distortion
- Patented adjustable transbrake release.
- Redesigned oil passages improve transbrake release time.
- No need for external shields or bottom straps.

2-Piece Case	REPG2000
2-Piece Case with Roller Bearing Hub	REPG2000R
2-Piece Case with Turbo 400 Bushing	REPG2000-400B
2-Piece Case with Turbo 400 Roller Bearing	REPG2000-400R

TAILSHAFT HOUSINGS

These new tailhousing are designed to fit both the Reid Racing Superglide and stock GM Powerglide transmissions. They are 5 times stronger than stock, yet only weighs 4-1/2 lbs. The length and crossmember mounting flange is exactly the same as stock for a bolt-in replacement. The tailhousings come completely pre-assembled and includes a complete hardware kit with everything needed to bolt it on. Note: No speedometer cable provision is supplied. Roller bearing models requires Strange Yoke, part number STU11667N or STU11664N.

- Relocated vent ends problem of trans fluid spraying out of breather
- Optional needle roller bearing transfers maximum horsepower
- Accepts stock crossmember mounting flange

Housing with Roller Bearing	REPGH1R
Housing with Teflon Bushing	REPGH1B
Housing with Roller Bearing for TH400 Yoke	REPGH2B
Housing with Teflon Bushing for TH400 Yoke	REPGH2R

SUPERGLIDE BELLHOUSINGS

Cast from high-strength 6061 T6 aluminium and heat treated for additional toughness, these bellhousings pass the stringent SFI 30.1 certification and are approved with no external shields required. They feature an open bottom for easy converter access, a reduced diameter for better floorboard clearance, and a contoured mounting flange to properly match the rear of the engine block. When used with a Reid Racing flexplate available below, these bellhousings allow for direct fit to Ford and Mopar engines with no spacers or adapters needed. Stock style starters are used in the factory location.

Chev V8, LS & 4.3L V6	RE-BH001
Chev V8, LS & 4.3L V6, 1" Longer	RE-BH005
Suit Lock-Up Converter	RE-BH005
Chrysler SB 318-340-360	RE-BH060
Chev V8 & 4.3L V6	RE-BH001
Ford 289-351 Windsor & Cleveland	RE-BH010
Ford 429-460 Big Block	RE-BH020
Mopar Big Block 361-440 Incl. Hemi	RE-BH040

REID TH400 TAILSHAFT HOUSING

The Reid Racing Tailshaft Housings are designed to fit both the REID Superglide Cases and the stock GM transmissions. They are now available for both Powerglide and TH400 transmissions and are a great for high horsepower applications yet offer a solution to the shortage of weak OEM replacements. They are lighter weight yet five times stronger than stock and the roller bearing option frees up horsepower by reducing parasitic drag!

- Bolt-in replacement - fits Reid SH400 or OEM TH400
 - Your choice of length - Powerglide or standard TH400 to match existing driveline components
 - Pre-assembled with rear seal and either bushing or optional roller bearing
 - Reworked oil passage for improved lubrication
 - Cast from high strength aircraft grade aluminium alloy with thicker walls and additional gusseting
 - Precision machined for perfectly aligned bores
- | Description | Part No. |
|---|------------|
| TH400 Extension Housing With Bush | RESH400HB |
| TH400 Extension Housing With Roller Bearing | RESH400HR |
| TH400 Extension Housing With Roller Bearing - Short (Powerglide Length) | RESH400HRS |

REID SUPER HYDRA TH400 DRAG/STREET

TRANSMISSION CASE

The Turbo 400 is the favored 3-speed transmission today for high horsepower applications because of its light weight, minimal drag, and its tolerance of abuse. As rugged as it is, there is one glaring weakness; the internal case "lugs" that retain the center support and pressure plate do not go completely around the inside of the case. At high horsepower levels, the "lugs" closest to the gap become overloaded and they fail. This sets off a chain reaction and all of the remaining "lugs" fall in a zipper-like fashion ending up in a ruined transmission. Reid Racing, Inc. has redesigned the Turbo 400 to correct this problem and has added dozens of features that improve every aspect of the case.

- Standard bellhousing flange fits Reid Racing's full line of SFI 30.1 bellhousings, as well as SFI 6.x "cans" from Browell, Trick Titanium, Quicktime, and others. Indexing ring on the oversized flange properly centers bellhousing.
- Full 360° lugs
- Speedometer and Governor provisions
- Improved billet pressure plate
- Oversize snap ring
- Longer band anchor pins captured by oversize bosses
- Numerous strengthening features address problem areas in the GM case
- Additional dipstick hole on driver's side
- Multiple external pressure taps allow monitoring of circuit pressures
- Accepts all style oil pumps including 8 bolt and vari-pitch designs
- Bellhousing and oil pump threads are heli-coiled
- Machined for standard NPT fittings
- Pre-machined to fit larger custom planetary gear carriers

Description TH400 Drag/Street Transmission Case
Part No. RESH400DRAG

PRO-X TH350 6" CAST EXTENSION HOUSING

TCI now offers a new six-inch extension housing to replace hard-to-find OEM parts for TH350 transmissions. The cast aluminum extension housing features a low-profile, lightweight modern design with improved strength for drag racing applications.
TCI323500

AUTO TRANS KITS & PARTS

REVERSE PISTON INSTALLATION KIT

- Billet reverse gear clutch piston
 - Extra thick reverse spring retainer
 - Reverse gear pressure plate
 - Reverse spring retainer snap ring
 - Reverse clutch pack snap ring
- Reverse Piston Installation Kit DE-PGKITRP**

SPRAG AND SPRAG ASSEMBLIES

Hughes offers a wide variety of aftermarket heavy duty sprag and sprag assemblies for the racing enthusiast. These items are essential in higher horse power and transbrake applications. Added elements, forged and heat treated races greatly increase the strength of these assemblies.

Part No TH400 Direct Drum with 34 Element Sprag
HTHP2234

HEAVY DUTY CLUTCH HUBS

The Hughes Heavy Duty hubs are recommended for all Powerglides and TH400s and will increase the strength and reliability of your transmission

Part No	Description
HTHP2226	TH400 HD Forward clutch hub.
HTHP7483	Aluminium Powerglide-Steel Clutch Hub for 5&6 clutch count
HTHP7483P	Aluminium Powerglide-Custom sized Hub for 10&10 clutch count with .061" frictions and .060" steels.

HUGHES POWERGLIDE

FRONT PUMP

Each oil pump is carefully machined to our exact tolerances and in some cases, incorporates our own pump bearing assembly for less drag and horsepower loss, but still yields more mile per hour than the more commonly used thrust washer types. All units come with gasket, o-ring sealing rings, new Hughes pressure regulator springs, gear set, and some also use a new Torrington Bearing.

Billet Ringless Powerglide Pump HTHP7433X

FRONT PUMP SEAL

GM TH350 & TH400 HT44526

HARDEND INPUT SHAFTS

Install a Hughes hardened input shaft in your Powerglide transmission and feel confident you will not have any twisting or breakage. For the high horsepower and transbrake application Hughes hardened input shafts made from 4340 steel billet, will exceed the need! Turbo shafts are also available and manufactured from special forged alloy steel for even higher horsepower applications.

Part No	Description
General Motors	
HTHP3214	TH350 Input Drum and Shaft Assembly (300M) With Custom Front Drum
HTHP2236	TH400 Input Drum and Shaft Assembly
HTHP7496C	Aluminium Powerglide With Turbo Spline, All Ratios
HTHP7496M	Aluminium Powerglide W/Turbo Spline-High HP appl.
HTHP7496MX	Aluminium Powerglide W/Turbo Spline w/o rings can be used with special top sportsman style oil pump ONLY!

Ford
HTHP5214 C4 All with 26 Spline Input

POWERGLIDE

RACING OIL PUMP

This is not a rebuild or just a partial replacement - it's 100% brand new and complete! The Powerglide racing oil pump has been designed from scratch to strengthen and update the Powerglide pump for your racing applications.

- Larger pump gears for more low RPM volume and pressure.
- Extra volume prevents rocking or backing up when transbrake is on
- Stiffer castings with ribs to prevent flexing and pressure loss
- High strength cast iron for maximum rigidity and minimum distortion
- Custom, high strength stator support shaft handles high horse power
- Extra clamping bolts to hold pump halves together at high pressure
- Redesigned oil pathways to increase flow to converter and cooler
- High clutch drum bushing pressure feed
- Factory machined for roller thrust bearing

Powerglide racing Oil Pump DE-PGP1

RACING OIL PUMP INSTALLATION KIT

Install your REID Racing pump easily with a complete installation kit. Comes with all needed gaskets, seals, roller thrust bearing, shims and Teflon high gear sealing rings. Includes: Needle thrust bearing, shim assortment, pump gasket, seals and high gear rings.
Racing Oil Pump Installation Kit DE-PGP1K

TCI Trans Brakes

Our Trans-Brake Series allows you to achieve maximum torque converter stall and provides for quicker and more consistent reaction times and 60 foot times. Once the Trans-Brake is released, the power is transmitted immediately to the rear tyres in much the same manner as a manual clutch but with the parts saving advantage of the torque converter's shock absorbing action.

GM TH-350, Reverse Pattern TC1321500
GM Powerglide Forward Pattern, Cast Iron TC1748200

Trans-Brake Solenoids

TCI trans-brake solenoids feature a precision-ground steel shaft with bronze bushing, a shaft-pinned nut for secure placement and unique lip seal to prevent fluid leakage while minimizing mechanical drag. The TCI solenoid motor is only 1.025-inches long, the most compact solenoid available and the two-wire setup assures a good quality ground can be established.

Powerglide Solenoid with 0.200" stroke TC1749800
Ford C4 Trans-Brake Solenoid TC1521300

TCI High Performance Input Shafts

TCI® Hardened Input Shafts are constructed from hardened, aircraft quality Vacu Melt 300 billet steel or Vasco 300 high strength steel for maximum durability. They feature increased lubrication flow and strength with a resized diameter that provides optimum stress distribution along the entire length of the shaft and along the extended high gear splines to the oil ring.

- Constructed from aircraft quality 300 billet steel or Vasco 300 high strength steel
- Increased lubrication flow & strength
- Resized diameter provides optimum stress distribution along the entire length of shaft
- Allows for optimum stress distribution along the extended high gear splines to the oil ring

GM Powerglide 1.82

Powerglide Pro-X Input Shafts

These two input shafts, one for the standard Powerglide pump or TCI Gerotor pump and one for the TCI ringless Gerotor pump, eliminate input shaft breakage by incorporating unique proprietary construction material and a special heat-treated process. The Pro-X standard configuration input shaft TC1749602 is a direct replacement component able to handle up to 2000 hp applications. The Pro-X Ringless design input shaft TC1749603 replaces the load-limiting internal rings with a special bushing and enlarges the diameter of the shaft for increased strength. Able to handle up to 2500+ hp applications, use of the TCI Ringless input shaft requires installation of a TCI Gerotor pump TC1743510 for proper operation. These shafts suit the 1.76 carrier with Turbo converter splines and are 12 7/8" long.

Pro-X Standard Style Input Shaft TC1749602

Pro-X Ringless Style Input Shaft* TC1749603

* Can only be used with TC1743510 style front pump

C4 Hardened Input Shaft

This hardened Input shaft suits all 26 spline C4 transmissions and will increase torque capacity over the stock shaft.

C4 26 Spline Hardened Input Shaft TC1549700

Powerglide High Capacity Drum

This new Powerglide drum is configured to use ten Alto Red Eagle frictions and Alto steels. This is a significant increase in lock-up surface area and allows the drum to hold significantly more torque. The drum is made from a high strength cast steel and has excess material removed to reduce rotating mass. Oil holes have been added to allow fluid to escape the drum and permit the piston to engage quicker. A standard needle bearing stepped into the front side reduces friction and drag. High strength, forged-steel clutch hub is built extra tall to accommodate the additional clutch plates.

Steel Drum for 10-Clutches TC1743910

Steel Clutch Hub for 10-Clutch Drum TC1748310

TCI Full Manual Valve Bodies

Our competition valve body for maximum performance and quick elapsed times in a racing application. By controlling the valve body only through manual means we can produce quicker shift timing and are able to run higher line pressures than possible with an automatic shift transmission. Higher line pressure makes it harder for clutches to slip under high loads. Remember, with a full manual you will have to make every shift, for these units do not shift on their own. A great choice for bracket cars, monster trucks, and virtually any off-road competition.

1964-91 GM TH350 TCI322200

Powerglide Rear Governor Support

Boost the efficiency of your transmission by reducing power-robbing friction with this special low drag governor support with roller bearing installed. Billet Aluminium Support with Roller Bearing TCI720005

POWERGLIDE DUAL RING SERVO

For greater durability and consistent performance in the Powerglide, TCI introduces the Dual Ring Servo Kit. This kit uses two Teflon® sealing rings in place of the original single design or dual rubber ring designs offered elsewhere. This doubles sealing effectiveness and prevents excessive leakage which can reduce band apply force. This feature also reduces vehicle rocking when the Trans-Brake is applied and provides additional stability in low gear. Perfect for the Super Class racer seeking positive Trans-Brake engagement when staging.

Powerglide Dual Ring Servo TCI743210

Powerglide Aluminium Servo Cover

TCI automatic transmission servo covers are manufactured from billet aluminium and feature high-quality rubber O-rings for maximum sealing protection. Keep your transmission operating effectively with one of these TCI automatic transmission servo covers. Powerglide Aluminium Servo Cover TCI743300

TH-700/4L60 Jumbo Servo Kits

TCI's newest addition to our extensive line of high performance components, these two servo kits will enhance shift quality and extend durability of any 700R4/4L60E/4L65E.

Since the servo applies the 2-4 band in 2nd gear, releases it in 3rd and reapplies it in 4th, the servo plays a vital role in the operation of your transmission. The TCI376005 kit includes two CNC-machined, 6061-T6 billet aluminium pistons, seals and hardware necessary to give your servo 35% more 2nd gear apply area than the commonly used, stock Corvette-style servo. The TCI376006 kit contains a large diameter 4th apply piston and matching cover, also machined from 6061-T6 billet aluminium. The piston utilizes a lip seal to improve fluid retention and the increased surface area will assure that the band is held tight under the most severe conditions. Easy to install with transmission in the vehicle. Kits may be used individually or combined to create the ultimate servo for your 700R4/4L60E/4L65E transmission.

TH-700/4L60E 2nd Gear Jumbo Servo Kit TCI376005
TH-700/4L60E 4th Gear Jumbo Servo Kit TCI376006

Powerglide Cast Aluminium Gerotor Front Pump

Our new Cast Aluminium Gerotor front pump offers several design advantages over OEM, involute-style pumps, plus improved low rpm flow and reduced horsepower consumption. The Gerotor pump features: simple design, no expensive crescents to machine or wear out, longer life; low velocity between inner and outer gears for less wear, low noise; smooth, uniform flow of fluid, reduced cavitation; design that slows fluid velocity, positive trans-brake apply, reduction of slipping reverse clutches when backing at or near idle speed, gears created with latest in powder metal technology; dry-film lubricant coated for wear resistance, redesigned, bolt-in style stator support tube that eliminates the possibility of spinning like interference fit, OEM-style tubes, hardened steel sleeve in stator support tube that yields greater wear resistance from input shaft sealing rings, Turbo 350/400 style input shaft bushing which makes selection and swaps easy, and they are made in the USA.

Powerglide Front Pump TCI743520
Powerglide Ringless Shaft Front Pump* TCI743525
* Can only be used with TCI749603 style input shaft

TCI TH700 Trans Lock Up

This easy-to-install lockup wiring kit for 700R4 and 2004R transmissions from TCI® allows hands-free, automatic activation of the torque converter clutch in 4th gear under stable engine operation, and disengages the clutch when accelerating or down shifting. This universal lockup wiring kit is needed when installing a GM 700R4 or 2004R transmission in a non-computer controlled application such as a street rod, muscle car, or when removing the factory computer in pre-1993 applications that utilize a 700R4 or 2004R transmission. The fully adjustable vacuum switch automatically locks and unlocks the torque converter with engine vacuum and can be configured for various vacuum levels. While this vacuum operation makes the lock-up fully automatic, there is also a manual override option that allows complete control over lock-up if wanted or needed. Constructed from OEM connectors and oil resistant wire, this durable lockup wiring kit includes everything required for installation, including gasket, wiring harness, vacuum switch, 4th gear pressure switch, splice connectors and mounting screw. 2004R / 700R4 LOCKUP WIRING KIT TCI376600

TCI TH700 Boost valve

Operating line pressure is the lifeblood of any automatic transmission by providing the clamping force on the clutches and bands. Oftentimes, increasing line pressure is a requirement when increasing driveline output. The new TCI® 4L60E boost valve assembly provides you the means of elevating your line pressure while also addressing wear issues that may actually have your transmission running at a lower level of pressure than GM intended. Boost valve features: larger diameter over stock that yields 10-15% higher line pressure, o-rings on boost sleeve which prevents loss of boost signal pressure, sleeve constructed from Alcoa Deltaalloy 4032 & hard-coat anodized which prevents wear between the mating parts. 4L60E/4L65E .490-Inch Diameter Boost Valve TCI374420 With O-Ring

Powerglide Powerband

This totally retooled Alto Powerband has been made 15% wider than the OEM design band. The added width better utilizes the available surface area of the high-gear drum while the Kevlar lining provides superior heat and wear resistance over common linings. The TCI Powerband is perfect for high torque applications that can benefit from the ultimate in trans-brake and low gear holding capacity. Powerglide Powerband TCI625102

Torqueflite 727 Bolt in Sprag

The only way to go when building a Torqueflite for heavy-duty or performance use. Prevents the outer race from stripping out the delicate splines in the case. Kit comes complete with new fasteners, springs and rollers. Bolt In Sprag For TF-727 TCI127000

Powerglide Case Savers

The TCI case saver clips are designed to fit into all six reverse seal pockets located in the bottom of the case. They will restore smooth reverse clutch operation and Trans-Brake consistency to a worn case. Suits OEM, Deadenbear and JW cases. Powerglide Case Savers TCI720011

TCI Rear Case Thrust Bearing

Reduce drag and increase torque capacity by replacing the factory thrust washer with this needle bearing assembly. Packaged with selective shims to aid in achieving proper rear end play. Standard in all TCI® TH400 transmissions. TH-400 Rear Case Bearing TCI224400

TCI TH400 Sprag

TH400 (1964-1972) special intermediate sprag, this 34-element sprag replaces the stock 16-element, increasing torque capacity 110%. TH400 Sprag With 34 Elements TCI227900

TCI HD Steel Forward Clutch Hub

The new TCI® forged steel clutch hub is CNC machined from a 4140 steel forging. The all-new construction is much stronger than the cast OE unit and will resist fracturing, clutch tooth wear and spline failures. Designed for 500+ HP TH400/4L80E transmission applications, the TCI® forged steel clutch hub is the perfect remedy to avoid clutch hub failure. TH400/4L80E HD Steel Forward Clutch Hub TCI228300

Powerglide High Impact Gear Set

Based on the OEM 1.76 type cast iron planetary cage the ATI heavy duty gear set features: Straight cut 9310 Gears, a heavy duty output shaft and precision balanced carrier.

ATI204989 1.74" Straight Cut, 28" Long
ATI204996 1.80" Straight Cut, 28" Long

SUN GEAR THRUST SET

Suit GM Powerglide 1.80 TCI747465

TCI Trans shift Lever

This is a bolt-in replacement for the wimpy lever found on most run-of-the-mill Torqueflites. Gain greater shift feel and apply force with this Hemi-style 5.0 ratio lever. 727/904 5.0 RATIO HEMI BAND APPLY LEVER TCI146900

BOLT-TOGETHER TRANSMISSION PLANETARIES

TCI Bolt-Together Powerglide Planetaries are built with the racer in mind as they optimize both strength and ease of use. The cleverly engineered bolt-together design, in conjunction with several available gear ratios, makes this the most versatile planetary unit for every racing con-figuration. It allows for easy rebuilds and gear ratio or output shaft changes without sending the unit back to TCI. Plus there are a variety of gear ratios for standard (long) Powerglide spline output shafts.

- Straight-cut gears are precisely manufactured from heat-treated 9310 steel
- Strongest & lowest-friction gear set on the market, capable of withstanding any racing environment
- Feature roller thrust bearings rather than washers for sun gear and input shaft to avoid failures
- Steel-backed, bit-metal washers with wear-resistant PTFE layer to reduce friction & heat

Powerglide 1.80 Bolt-Together Planetaries TCI747600

TRANS-BRAKE VALVE

GM Powerglide trans-brake valve with spring TCI749500

SUPER HYDRA OIL FITTING

Oil Inlet/Outlet fitting suit REID Super Hydra 400 Cases, -6AN RESH400-6

C4 Six-Pinion Planetary

The strength of the C4 forward planetary has become an issue with the ever increasing loads that racers are subjecting this transmission to. With this new six-pinion planetary, the load capacity is doubled. C4 Six Pinion Forward Planetary TCI527600

TCI Drum & Sprag Assembly

TH350 iron direct drum w/ HD 36-element sprag assembly. TCI327900

GM Trans Seal Up Kit

This kit includes plastic plugs and caps to seal your spare transmission against dirt and the elements. Suits GM Powerglide, Turbo 350 and Turbo 400 Transmissions. Powerglide, Turbo 350/400 Seal Up Kit TCI890900

Powerglide Twin Seal Servo

ATI's twin seal servo features 2 metal sealing rings (as opposed to the single seal stock design), which greatly improves shifting performance in high horsepower applications and extends clutch and band life. The servo is precision CNC-machined from billet aluminium. Powerglide AT1205322
Gasket, Servo Cover To Case AT1205330
O-ring, Servo Cover To Case AT1205340

Servo Rings

ATI's new servo rings have zero gap to totally seal the servo to the bore for exceptional band pressure and easier installation. Standard equipment on ATI's Superglides. An excellent addition to ATI's Twin Seal Servo. Servo Rings AT1205319

Red Eagle Friction Plates

Clutches fail in Hi-Performance applications due to excessive heat. Original Red Eagle clutches are specially designed to reduce slipping which generates heat and can withstand higher thermochemical diffusion process, whereby ferrous parts are processed in molten salt with a specific nitrogen potential. It provides a surface treatment that enhances wear and fatigue resistance from 200% to 500% while imparting higher heat resistance & increased lubricity.

Description	Part No.
Powerglide, Front, 0.098"	ALTO-019740
Powerglide, Front, 0.061"	ALTO-019740A
Powerglide, Reverse, 0.098"	ALTO-032744

Kolene Steel Plates

Kolene is a salt bath nitriding process. In technical terms, it is a thermo chemical diffusion process, whereby ferrous parts are processed in molten salt with a specific nitrogen potential. It provides a surface treatment that enhances wear and fatigue resistance from 200% to 500% while imparting higher heat resistance and increased lubricity.

Description	Part No.

Powerglide, Front, 0.060"	ALTO-019701AK
Powerglide, Reverse, 0.070"	ALTO-019703K
Powerglide, Reverse Pressure Plate, 0.317"	ALTO-019761A800

VALVE BODY

PERFORMANCE IMPROVEMENT KIT

This value priced kit allows you to upgrade your transmission for added performance in street, off-road or towing applications. The Valve Body Performance Improvement Kit is designed to change the shift action to a more positive shift. Reduced shift time can add life to the clutches and bands and remove the lag time between shifts. Kit is easy to install and comes with parts and gaskets necessary to install the valve body

GM Powerglide Valve Body Improver Kit TC1626300

GM POWERGLIDE RACING OVERHAUL KIT

TCI Racing Overhaul Kits include all of the "soft" parts necessary for an automatic transmission rebuild, including oil seals, sealing rings, gaskets, front and rear seals, and a set of valve body gaskets. All components are top-of-the-line and engineered from the most durable and rugged materials available. Don't let worn-out gaskets or seals keep you from winning.

- Top-of-the-Line Components That Are Engineered from the Most Durable and Rugged Materials Available
- Includes All of the "Soft" Parts Necessary for an Automatic Transmission Rebuild
- Oil Seals, Sealing Rings, Gaskets, Fr & Re Seals, & Valve Body Gaskets

GM Powerglide Racing Overhaul Kit TC1628800

Shift Improver Kit

- Improves the shift feel and crispness on any stock automatic transmission
- Elimination of soft sluggish shifts, shift overlap and excess wear on clutches and bands due to slippage
- Improves transmission life

The shift improver kit is B&M's least expensive and simplest to install transmission performance kit. The transmission pan is removed and the valve body is taken out. The stock separator plate is replaced with the special B&M plate, reinstall the valve body, filter and pan and you're done! In some cases other minor modifications may also be made. The B&M Shift Improver Kit can be installed in one of two modes. You can select which mode you want at the time of installation. Two kits in one.

STAGE 1. RV/HEAVY DUTY

Firm positive shifts without loss of driver comfort for improved performance in all street vehicles. Recommended for regular passenger vehicles and RVs.

STAGE 2. STREET / STRIP

Provides very positive shifts for high performance street use or for competitive events. This model is for the enthusiast who wants the hardest, quickest possible shift.

COMMODORE TRANSMISSION APPLICATIONS:

NOTE: B&M Transmission Shift Kits for Commodores with TH700-R4 Trans, there are two types of TH700-R4 depending on the year model. They are as follows:

4L60 Model TH700-R4 has a kickdown cable and an iron valve body. This trans appeared in VN-VP Commodores up to 1993.
4L60E Model TH700-R4 has an electronic kickdown and an alloy valve body. This trans appeared in Commodores from VR 1993 on to current VZ.

The easiest way for you to determine what trans type is in the car is: Does it have a Cable kick-down or not?

- **BM70235 - suits 4L60 Only Shift Improver**
- **BM70239 - suits 4L60 Only Trans Pack Manual shift option**
- **BM70360 - suits 4L60E Only Shift Improver**
- **BM70365 - suits 4L60E Only Trans Pack Manual shift option**

Governor Recalibration Kit

This kit will allow you to change the shift points of your transmission after it is installed in your vehicle. It is very useful if you have a vehicle that is very light or if it has low rear end gear ratio or if it is a conversion.

Governor BM20248
(recalibration kit for GM TH-700, 400 & 350)

TransKit

- Same quality and components used in B&M Street/Strip transmission in a do-it-yourself kit
- Includes all the necessary parts required to convert your valve body to a full B&M Manual/Automatic valve body
- Improved shift feel, retains full automatic features
- B&M high performance friction materials
- Complete overhaul gasket set
- B&M Transpak modification components including special replacement valves and springs
- Drain plug kit

The TransKit comes complete with full instructions on how to assemble your transmission to B&M specifications. Includes special directions on modifying your case, pump, and other components to provide you with all the science and engineering that B&M has put into every transmission they build.

Racing Overhaul kit

- Includes all gaskets, seals, bushings and famous B&M red high performance friction materials for a complete high performance or racing transmission overhaul
- Doesn't include valve body components other than OEM valve body gaskets or instructions

Powerglide Master Racing Overhaul kit	BM21040
TH-400 Racing Overhaul kit	BM21041
TH-350 Racing Overhaul kit	BM21042

Vacuum Modulator

The same high quality modulators supplied with all B&M complete transmission. This modulator is adjustable, allowing you to tailor shift points within a range of 2-4 mph. Supplied adjusted for normal shift points.

GM All TH-350 & All TH-400 BM20234

Note: If your engine does not make adequate vacuum (big cam, diesel engines, etc) you will not be able to make the stock (or B&M) modulator work properly usually resulting in late, hard shifts.

TRANSMISSION KITS & ACCESSORIES

Transpak

Recalibrate your automatic transmission for better performance

- Select the mode that best suits your application at installation
- Improves transmission life

The next step beyond the Shift Improver Kit. The Transpak has all the features in the Shift Improver Kit plus it provides additional driver manual control. Most conventional automatic transmissions won't downshift into low gear above 15mph, and automatically upshift at a predetermined speed no matter what gear you are in. With a Transpak you can downshift at any speed (except C4, AOE, TH 200-4R and TH-700-R4), you can also hold the transmission in first gear to any speed that you want. Downshifting at any speed is an asset when towing a trailer or driving heavy loads down hill.

STAGE 1. RV/HEAVY DUTY

For towing, street rods, off road vehicles, campers, motorhomes, trailers, police, taxi, normal passenger vehicles or other heavy duty use. Firmer shift feel but not harsh. Improves transmission performance and life dramatically without loss of comfort. Full manual downshifts when desired, normal automatic operation when in Drive.

STAGE 2. HIGH PERFORMANCE STREET

For full performance street use. Essentially the same as RV/Heavy Duty mode except shift is much snappier. A real instant shift. Retain full automatic features and standard shift points with selector in Drive.

STAGE 3. FULL COMPETITION

For racing applications. Features a full competition shift and higher shift points. Extremely hard shifts and higher shift points make this mode unsuitable for street use. Maintains automatic shift feature. For full manual control, use a Manual Pak.

TCI ADJUSTABLE VACUUM MODULATOR

The vacuum modulator is a vital component of automatic transmissions. It tells the transmission what kind of load is being put on it, allowing the transmission to react with the proper line pressures and shift points. Over time, modulators can develop leaks, suffer ruptured diaphragms, become bent, etc. Not only can this cause annoying drivability issues, it can lead to premature transmission failure.

TCI comes to the rescue with this line of adjustable modulators. Renew performance, and gain the ability to slightly raise/lower part throttle shift points and line pressures. Simply adjust the screw inside the vacuum nipple for more or less diaphragm pre-load.

ELECTRONIC TO MECHANICAL

ADAPTER SPEEDO DRIVE

The missing link between your cable-driven speedometer and late model electronic transmission! Measuring 5 1/2" x 3 1/2" x 2", the ECD-200BT allows the use of a mechanical-cable speedometer to be used in conjunction with a modern drivetrain which provides only an electronic output.

- 36" cable available for GM thread-on, GM clip-on and Ford clip-on style speedometers. • Powerful motor is quiet enough to mount the module inside the cabin. • Waterproofed case can also be mounted under the hood, or even inside a fenderwell. • Bluetooth-enabled to sync with available mobile app for stone-simple set up.
- Supplied programming switch and LED readout make setup easy.
- For OBD-II equipped vehicles the supplied pigtail will easily plug into the DLC, simplifying the wiring connections.

The ECD-200 uses PID control of the cable speed to provide quick, smooth operation as well as preventing overdriving or damaging the speedometer needle. Consider this the most precise and easiest to use cable-drive unit on the market!

Application	Part No.

GM clip-on	DAKECD-200BT-2
Ford clip-on	DAKECD-200BT-5

GM BULLET SPEEDO HOUSING

Steel Turbo 350 speedo driven gear housing bullet Steel Speedometer Housing. A steel upgrade to the original aluminum speedometer gear sleeves or "bullets" on GM transmissions. This upgrade will help ensure proper engagement with the gear and help prevent fluid leakage.

GM SPEEDO GEAR

18 tooth speedo driven gear for Turbo 350 Transmissions

CISN19G18

SPEEDO SENSOR

DELETE PLUGS

Aeroflow Performance brings you these billet aluminum speedometers delete plugs that fit a variety of automatic and manual transmissions. This plug is used to block the mechanical speedometer gear port when upgrading to an electronic speedometer. By using this delete plug, the transmission will be sealed correctly and not allow dirt or debris to contaminate the transmission internals.

Z-TCU GM OVERDRIVE TRANSMISSION CONTROLLER

For computer-controlled transmissions, nothing beats the TC1® EZ-TCU™ Transmission Controller. The EZ-TCU™ allows for maximum electronic control over shift points, shift firmness and shift speed. No software, laptop or tuning experience is required, and power data logging and self-diagnostics allow users of every skill level to fully utilize the unit. Simply install it according to the enclosed instructions, and then start the system by answering the simple Setup Wizard questions on the included hand-held unit. It's that easy; the EZ-TCU™ does all the work for you! The EZ-TCU™ is fully configured and ready to run right out of the box – no tuning necessary. But for those who demand customization, the unit is also optionally fully programmable based on load, speed and RPM. The EZ-TCU™ programming interface is completely intuitive. There is no real expertise needed if you want to custom program your calibration. The EZ-TCU™ is capable of real-time switchable calibrations, which allows for multiple setups. Run one calibration on the way to the track, and then, with the push of a button, have a more aggressive setup ready for the race. The multiple shift modes include full manual mode for using bump switch or paddle shifters.

- Maximum control over shift points, shift firmness and shift speed
- No software, laptop or experience needed
- Completely intuitive programming interface or optional fully programmable based on load, speed and RPM
- Multiple shift modes include full manual mode
- Compatible with popular GM transmissions, including 4L60E, 4L65E, 4L70E, 4L80E, and 4L85E, as well as the TC1 6x Six-Speed
- Included hand-held can operate as electronic dash
- Includes transmission control unit, hand-held and wiring harness

Description	Part No.
EZ-TCU Transmission Controller	FAST30282-KIT
EZ-TCU Transmission Controller 2009 & 4L65E/70E	FAST30299-KIT

SHIFT PLUS 2 TRANS CONTROLLER

The Shift Plus 2 electronic overdrive transmission control for GM 1993-2007 4L60E and 1993-2013 4L80E is fully configured right out of the box. There is no tuning necessary but for those who demand customization the unit is also optionally fully programmable based on load, speed and RPM. Works with GM automatic transmission models 1993-2007 4L60E and 1993-2013 4L80E. Gives users complete control over most popular electronic overdrive transmissions and no laptop, hand-held tuning device, or software of any kind is required. Shift firmness, shift points, and torque converter lockup are simply adjusted with easy to use dials found on the end of the unit. Comes with a calibration for your transmission so all you have to do is drive it like it is or adjust it to suit your individual taste. Complete transmission diagnostics built in with bright LEDs right on the unit. Includes the Simple Shift control unit and wiring harness, specific to your application with clearly labelled connectors and easy to follow instructions. Available for most popular GM and Ford electronic overdrive transmissions

- Control over electronic overdrive
- Diagnostic built in
- Fully configured
- No laptop required

BM120001	GM 1993-2007 4L60E & 1993-2013 4L80E
BM120002	TPS Use with BM120001 (For carburetted engines)

ShiftPlus Electronic Shift Improver

ShiftPlus electronically recalibrates your transmission's hydraulic system. Shift firmness not only makes driving more pleasurable, but slippage and heat are reduced extending transmission life. This design allows you to improve shifting performance without removing the transmission pan or valve body. A simple flip of the switch allows the transmission to operate in the performance or stock mode.

- Recalibrate your automatic transmission for optimum performance & extended life. • Reduces slippage and heat.
- Installs in minutes & is 50 state emissions legal.

B&M Shift Plus shift improver suits 4L60E VR-on BM70380

MSD

MSD ATOMIC TCM

The all-new MSD Transmission Controller was developed completely in-house – evolving from the engineering expertise and proven performance of our Atomic EFI technology. In fact, the Atomic TCM is designed to integrate directly with the Atomic EFI when using Brainwave so you can modify transmission operation parameters from the same handheld monitor! Doing away with the need for sensor duplication, and an extra programmer, means less wiring for easy installation and a clean appearance.

Don't worry if you haven't stepped up to an Atomic EFI system yet; the Trans Controller is also offered as a stand-alone system to work with most OEM or aftermarket fuel injection systems, as well as carburetted applications equipped with a stand-alone Throttle Position Sensor (TPS). This allows you to take advantage of modern 4-speed overdrive transmissions and the inherent flexibility associated with electronic controls.

- Available as a standalone controller or Brainwave ready
 - Adjust the operating parameters of later model electronically controlled 4-speed overdrive transmissions
 - Simple to configure with the supplied Handheld Monitor – no PC required*
 - OEM style connectors allow direct plugin to popular GM and Ford transmissions
 - Adjust shift points, shift firmness, torque converter clutch behavior, and more
 - Monitor the operation of your transmission in real-time
 - The Brainwave ready TCM allows for seamless integration with the Atomic EFI controller to reduce wiring and simplify setup
- Easily modify the operating parameters of your GM or Ford 4-speed automatic transmission:
- Adjust shift points
 - Adjust torque converter clutch behavior
 - Select different levels of shift firmness
 - Select between auto-shift mode and manual-shift mode
 - Activate Dyno Mode to deliver repeatable chassis dyno results

STAND ALONE SYSTEM

Includes the Controller, Handheld Monitor and Auxiliary Harness. Designed to control Late Model GM/Ford 4 speed transmissions. Transmission Harness sold separately. Requires a Throttle Position Sensors that output a 0 to +5 VDC signal (not supplied).

MSD2760

BRAIN WAVE COMPATIBLE

Designed for vehicles using Atomic EFI. Includes the Controller and Auxiliary Harness. Transmission Harness must be purchased separately.

BUMP STAGER TRANSBRAKE CONTROLLER

The FAST Bump Stager provides improved staging accuracy by allowing users to access the patented "transcreep" function found in FAST XFI without the added expense of converting the vehicle to a full XFI system. Available as a complete kit, the Bump Stager lets drag racers carefully pulse the transbrake. This enables the vehicle to move forward slowly during staging, creating a higher degree of repeatability than racers are able to achieve manually. The complete kit comes with everything needed for use, and a built-in 20-amp driver removes the hassle of wiring an external relay for most applications. It can be used in carburetted applications or with any aftermarket EFI system.

- Improves staging accuracy; allows access to patented "transcreep" function found in FAST XFI
- Lets drag racers carefully pulse the transbrake; enabling the vehicle to move forward slowly during staging, creating a higher degree of repeatability than racers are able to achieve manually
- Works w/ any trans-brake application; Carb or EFI

FAST30322

TH400 Kickdown Switch

When swapping the TH-400 into any vehicle, this kit makes installation of the transmission kickdown feature a snap. Mounts to either a TH-700 or TH-350 throttle cable bracket.

TH-400 Kickdown Switch BM20297

Throttle Valve / Kickdown Cable

Universal fit adjustable TV/Kickdown cables will work in 95% of all listed transmission applications yet are less expensive than OEM. Use as straight replacement cable or ease the installation of transmission swaps.

Universal TH350 TV Kickdown Cable **BM30287**
Universal TH-700-R4 Throttle Valve Cable **BM70242**

Launch Control

- The choice for performance & dependability
- Can control the front and rear brakes
- Can be used as a brake locking device for drag racing or as a hill holding device for street use
- Can be used with button & switches found earlier in catalogue

The B&M Launch Control is a sophisticated device which installs into your existing brake system. This easily installed solenoid provides the brake holding capacity you are looking for. It can be used for racing or for street applications if you need a hill holder while stopped on an uphill grade. This high quality solenoid can be used on either the front or rear brakes of your vehicle and can handle pressure spikes up to 1500 psi or maintain constant pressure of up to 400 psi.

Launch Control solenoid **BM46075**
Launch Control solenoid & Install Kit **BM46076**

AF49-4076

LAUNCH CONTROL KIT

Aeroflow's Launch Control (also known as: Roll/Stage/Brake Control, Line Lock, Roll Stop and Anti-Roll). Aeroflow's 12 Volt 2-Port Launch Control is designed to be installed into the vehicles existing brake system and can be used on either the front or rear brakes (Not for split or diagonal brakes). In & out ports are 1/8" NPT. They are intended primarily as brake-locking devices for Drag Racing and Off Road use.

Part No	Description
AF49-4076	Launch control line lock KIT (Includes Solenoid)
AF49-4075	Launch control line lock solenoid ONLY
AF49-4077	Button assembly momentary button style RED button
AF49-4078	Button assembly on/off style switch GREEN button

TRANSBRAKE SWITCHES

DE-PBSRTD

The most consistent, most reliable switch on the market. This is a heavy duty quick acting, precision release transbrake switch with an adjustable mount and locking nut. Screw terminals on bottom connect to any wire. Adjustable button height sets with a custom lock nut.

DE-PBS-XL

This uses the same quick switch as the PBSRTD but has an extra large red button (1 inch). Fits gloved thumbs very comfortably. Great for delay boxes that allow multiple "hits". Adjustable button height.

Econo Performance Converters

These Converters are budget priced and are intended for mild street engines up to 350 horsepower. They should not be used with nitrous, superchargers or transbrake but are perfect for street cars and hotrods. **Stall speeds are based on an engine producing 230lb/ft of torque at 2500 RPM. Engines with more torque will stall higher and less torque will stall lower than indicated.**

TORQUE CONVERTERS

CUSTOM STALL CONVERTERS FOR RACE APPLICATIONS MADE TO ORDER. CALL ROCKET FOR ALL PART NUMBERS AND PRICES

Tork Master Converters

Recommended for Mild Performance

Applications • New alloy pump drive tube • Needle thrust bearing when factory equipped • New thrust washer between turbine and cover when required • The best "value priced" street performance converters available • Pressure tested and fully balanced • Tork Master converters are not recommended for big blocks or supercharged engines. Similar in performance characteristics to the Hole Shot series, the Tork Master is B&M's lowest cost performance torque converter.

The Tork Master is a good, all-round performance street converter.

TORK MASTER 2000

• 1900-2100 RPM • Small Blocks (Not for Big Blocks)

Application	Part No.

Chrysler '67-'81 Torqueflite A-727	BM10418
Ford '70-'82 C4 with 10.5" bolt circle, 26 spline	BM50442

HoleShot Converters

Recommended for Street Rod, Pro Street & Street Machines

Applications • Furnace brazed impeller • New precision steel alloy pump drive tube • Heavy duty needle bearings between stator and impeller (not a thrust washer) • Needle bearing between stator & turbine • Furnace brazed turbine • Dual pattern drive lugs on some GM HoleShots • New turbine hub • New springs and rollers in stator A great choice for Street machines and Hot Rods looking for better launch capabilities and more strength. Engines smaller than 350cid may not produce the torque at 2,500rpm to achieve stall speed indicated. HoleShot Series converters are not to be used in transbrake applications.

HOLESHOT 2000

• 1900-2100 RPM • Small and Big Blocks • Mild Performance Applications • Furnace Brazed, Fully Balanced

Application	Part No.
GM '84-'93 TH-700-R4 30 spline, Lockup (V8 Only)	BM70417
GM '97-'03 4L60E Com LS-1, Lockup 2000RPM	BM70440
GM '4L80E Holden 2000RPM	BM70431

HOLESHOT 2400

• 2300-2500 RPM • Small and Big Blocks • Mild to Serious Performance Applications • Furnace Brazed, Fully Balanced • Great for crate motors

Application	Part No.
GM '65-'91 TH400 with 10.75" bolt circle	BM20412

Ford '70-'82 C4 with 10.5" bolt circle, 26 spline	BM50436

HOLESHOT 3600

• 3400-3800 RPM • Small and Big Blocks Serious Performance Applications • Furnace Brazed, Fully Balanced

Application	Part No.
GM '68-'81 TH350, TH375B (not TH-350C)	BM20425
GM '65-'91 TH400, TH425, TH375	BM20425

Nitrous HoleShot

Converters

Recommended for Street Rod, Pro Street & Street Machines with nitrous systems

Applications • Furnace brazed impeller • New precision steel alloy pump drive tube • Heavy duty needle bearings between stator and impeller (not a thrust washer) • Needle bearing between stator & turbine • Furnace brazed turbine • Dual pattern drive lugs on some GM HoleShots • New turbine hub • New springs and rollers in stator • Anti-balloon plate. Built to take the instant horsepower of nitrous engines with anti-balloon plate and heavy duty internals.

NITROUS HOLESHOT 2400

• 2300-2500 RPM • Small and Big Blocks • Mild to Serious Performance Applications • Furnace Brazed, Fully Balanced • Great for big cube crate motors

Application	Part No.
GM '65-'91 TH400, TH425, TH375	BM20480
GM '68-'81 TH350, TH375B (not TH-350C)	BM20480
Ford '70-'82 C4 with 10.5" bolt circle, 26 spline	BM50449

NITROUS HOLESHOT 3000

• 2800-3200 RPM • Small and Big Blocks • Serious Performance • Furnace Brazed, Fully Balanced

Application	Part No.
GM '65-'91 TH400, TH425, TH375	BM20481
GM '68-'81 TH350, TH375B (not TH-350C)	BM20481
Ford '70-'82 C4 with 10.5" bolt circle, 26 spline	BM50450

NITROUS HOLESHOT 3600

• 3400-3800 RPM • Small and Big Blocks • Serious Performance Applications • Furnace Brazed, Fully Balanced

GM '65-'91 TH400, TH425, TH375	BM20482
Ford '70-'82 C4 with 10.5" bolt circle, 26 spline	BM50447

Quick 60 Racing Torque Converter - 9"

The 9" Quick 60 converter is designed for the Super Class racer with a big engine combination (540 CID +) or supercharged application. When an 8" is too loose and a 10" is too tight you will find this is the ideal converter for quick reaction and great top end MPH. The 9" will provide the type of stall you are looking for and still provide excellent MPH for the top end charge, while keeping your engine RPM in a range the engine can handle. All 9" Quick 60 converters feature small bolt circle and include motor plate spacer kits for 1/8" and 1/4" motor plates. Same construction characteristics as the 8" Quick 60 converters including anti-balloon plates, steel billet turbine hub, furnace brazed impeller and turbine, super duty thrust bearings, super duty drive lugs, new precision pump drive tube and 22 element sprag. Fully balanced and pressure tested.

BM20670	TH-400 Spline 10.75" bolt circle 5600-6000 Stall
BM20671	TH-400 Spline 10.75" bolt circle 5900-6100 Stall
BM20672	TH-400 Spline 10.75" bolt circle 6200-6400 Stall

GM CONVERTER LOCK-UP CONTROL

For GM TH-700, 4L60, 200, 200-4R & 350 with lockup converter. Provides dash mounted control to govern converter lockup at speeds between 30 & 90 mph (48 & 144 kph). LED indicates converter as locked or unlocked. Provides control of converter lockup through vehicle speed. Can be used for lockup operation when converting a non-lockup equipped vehicle to a lock-up style transmission and converter.

Application	Part No.
GM with Mechanical Speedo Cable (8ppm pulse rate)	BM70244
GM with Electronic Speedo (40ppm pulse rate only)	BM70248

Torque Converter Lock Up Kit

Control the lockup converter on your GM Turbo 700R4 overdrive transmission with your carburetted engine. With our easy to install Lock-Up Kit you don't need the computer or speed sensor. A vacuum controlled switch and a 4th gear pressure switch/lock up solenoid combination controls the lockup. Brake switch for disengaging also included. Comes with everything to complete the job including a pan gasket.

Turbo 700R4 Torque Converter Lock Up Kit **PW60109**

HUGHES PERFORMANCE PRO-STREET / COMPETITION CONVERTERS

Pro-Street 30 Series

All Pro-Street converters are brazed to increase strength and have full needle bearing design, front and rear to insure reliability. All stall speeds are approximate and will depend upon application.

Street/Strip 35 Series

Excellent for weekend racing and high performance street use. All converters are brazed and feature a strengthened sprag, special cut stator, and full needle bearings front and rear.

Competition Converter 40 Series

This Hughes Street and Strip converter is exclusively designed for the serious racer. The replacement of the fiber thrust washers with heavy duty needle bearings packages enables this converter to be run on the street, but is recommended for the strip.

Pro Competition 45 Series

All Pro Competition series converters have full needle bearing replacement of fiber washers. Special silicon spot brazing on top and bottom add to strength and reliability. Hughes performance installs

HUGHES PERFORMANCE STREET/ STRIP CONVERTER

FULL MISER 1000-1200

This is our gas mileage converter. By reducing the amount of slippage in our Fuel Miser converter by 25-30% we can effectively increase gas mileage by 2-4 miles per gallon, with a closer 1 to 1 lock-up. Your transmission will run cooler with less friction, reducing heat build-up. Actual mileage gains may vary according to your type of driving and installation. Recommended for 400-cubic inch and larger gas engines as well as all diesel applications.

STREET ROD 2000-2200

This converter was designed and manufactured for the street rod enthusiast needing that slight edge of the O.E.M stock converter. This unit has silicon brazing for strength, needle bearings for reliability, and stator modifications for more torque multiplication.

STREET MASTER 2200-2500

The "Street" converter was design for the driver who is looking for that competitive advantage. By raising the stall RPM you can eliminate that slow, sluggish start. Recommended for stock to slightly modified engines to achieve performance, along with a smooth idle when the car is in gear.

GM LSA Flexplate

When retrofitting the 2012 Chevy Camaro ZL1 for racing with an automatic transmission, the TCI® GM LSA Flexplate is a must. Engineered to prevent runout, ring gear bounce and other damaging problems, these flexplates offer unmatched strength and protection. Thicker than factory flexplates, the SFI 29.1 approved TCI® plates are precision ground from ultra-durable A36 steel. They are dynamically balanced for performance and electro-coated for protection against the elements. This is the perfect upgrade for any increased horsepower 2012 Camaro ZL1 that has been converted to an automatic transmission. The flexplate is also a valuable tool for vehicles other than Camaros with LSA engine transplants and automatic transmissions.

Chev LSA-Series, LS Bolt Pattern (11.1) & TC1399756

GM Small Bolt Pattern 10 3/4", 168 Tooth (A TCI Special Build Converter Must Be Used In Order To Fit 4L60E Transmission)

PRO SERIES RACE CONVERTERS

These custom units are the finest available and offer a number of upgrades from our performance converter line. All units feature silicon spot brazed fins. A forged aluminium stator is also used because of its ability to multiply torque better than a steel stator. Other features include a 4130 Chrome-Moly Turbine Hub, a redesigned Internal Sprag, with New Springs and Rollers, Torrington Bearings, a Process-90 Hardened Hub and Dual Anti-Ballooning plates. Each unit is hand crafted from these parts to build a specialty unit for your application only. Using a variety of fin angles and stators, as well as different types of turbine clearances and sprags, Hughes puts together a winning combination for your vehicle every time.

PRO-III Series This series is available in 8", 9", and 10" configurations and is among the best known full competition unit. Literally thousands of these units have been produced, and when repeatability is important, this is the converter most people insist on. The prime characteristic of PRO III SERIES torque converters is the hard launch, but soft transition down track, allowing more consistency and ability to repeat. In many cases, variance of 60' times will only be a few thousandths from the first to the last round.

PRO-IV SERIES PRO IV

Series are more aggressive by design. The units are normally good for slightly higher m.p.h. Units are designed with more furnace brazing which produces less efficiency loss and less slippage, therefore producing higher miles per hour. This unit will still produce excellent repeatability, a must for bracket-type race situations. Units are available in 8", 9", and 10" configurations.

PRO-V Series This full race converter is available from an entirely new casing and built differently than our other full race torque converters. The trend towards bigger and more powerful engines is what spawned this particular bad boy series of converters. The unit is our most aggressive race converter delivering a hard hit off the line and soft transition down track with no loss in top end efficiency and m.p.h. It runs faster than any other race series we've ever produced, yet gives consistency at 60' you won't believe, and still lets you kill the tree. If more m.p.h. is what you're looking for, order our 95 Series today.

All Pro Series are Special Order units Only.
Call Rocket Today To Order You Custom Converter

TCI FORD Conversion Flexplate

For Ford applications, TCI OEM-style small block flexplates are constructed to precise standards and are SFI 29.1 approved. Built extra-thick with welds on both sides of the ring gear, these flexplates are precision-balanced and checked for runout. Dual GM Pattern. Conversion Use Only.

- SFI-Approved Flexplate • 164 Tooth • Internal Balance
- 1.375" Pilot Crankshaft • GM Dual Bolt Pattern
- Suit Small Block Ford 289-351W, 302-351C, 351-400M

Meziere "True Start" Starter Motors

Well known among today's racers is the pain of starter failure. Because we are involved in the high performance automotive industry as manufacturers as well as competitors, we know the trouble that enthusiasts are having and we try extremely hard produce products that are needed but unavailable. Our starters are tested to the extreme and are not sold until everything is right. Standard testing includes amp draw, power and rotational speed under load as well as free rev testing to ensure proper balance of internal rotating parts. We are raising the industry standard to bring to you truly trouble-free parts for your vehicle.

SFI APPROVED HEAVY DUTY FLEXPLATES

Introducing the new range of Aeroflow Performance SFI approved flexplates. These heavy duty flexplates are manufactured with extra thick material and double welded. These flexplates will withstand the extreme power and RPM of today's engines safely under the SFI accreditation label. They are available to suit Chev, LS, Ford and Holden.

Description	Part No.
LS Chev 168 Tooth - with TH350-400 & Powerglide Conversion, Includes Crank Adapter, Neutral/Internal Bal	AF89-350-THSFI

SB Chev 153 Tooth - Neutral / Internal Balance	AF89-305SFI

BILLET SFI FLEXPLATES

The Aeroflow Performance billet flexplates are the superior choice for quality and precision. The lightweight 1 piece design is stronger and more durable than any 2-piece style of flex plate. Machined from 4340 round bar with precise tolerances. With a chamfered gear teeth for better engagement with the least amount of runout to provide the best longevity on the market. All of our billet flexplates are certified to SFI 29.2 and available for many different models. CNC machined from 4340 round bar and heat treated to HRC45-55.

MANUAL TRANSMISSIONS

MCLEOD MUSCLE CAR 5 TRANSMISSION

The revolutionary Muscle Car 5 Transmission with a 2.95 1st gear and .63 5th gear. Its innovative design gives muscle car owners the ability to use an overdrive transmission without having to make expensive or annoying modifications. The McLeod Muscle Car 5 is designed with an exclusive case design that allows for fitment into tight tunnels. Gone are the days of cutting your floorboards to be able to get the benefits of improved fuel economy and lower RPMs that an overdrive transmission provides. With 8620 forged steel gears and a 32-spline output shaft with 26 spline 1-1/8 input shaft, the Muscle Car 5 can handle up to 500 ft lbs of torque. We made sure the gears were fully synchronized for smooth shifting and quiet operation. The internal rail shifter aides in quick and smooth shifts. The front cover is designed so it will bolt up to your factory bellhousing.

Part No	1st	2nd	3rd	4th	Rev.	Torque

TREMEC

TREMEC T-56 MAGNUM

6-SPEED TRANSMISSIONS

The kingpin of TREMEC's high performance line-up, the all-new T-56 Magnum takes the very best from our current OEM technologies and pairs it with the most popular features of our TKO 5-speed. Able to withstand a massive 700 lb-ft. of torque while providing unbelievably crisp shifts, no other manual transmission on the planet offers as much combined strength, versatility, and general ease of use as the T-56 Magnum. A world-class transmission in every respect, it's the best transmission on the market for those who will accept nothing less.

- 700ft/lbs Torque Capacity
- 26-Spline Input & 31-Spline Output Shaft
- Electronic and Mechanical Speedo Outputs
- GM LS Series & Ford Modular Applications
- Other applications TBA • Billet Short Throw Shifter
- Bellhousing Not Included

 Note 1: Some of these engines are external balance. Call for information.
 Note 2: Last year of series was a split year - customer must verify block configuration.
 Note 3: Two different block and crankshaft configurations - customer must verify block configuration.
 Note 4: Prior to 1962 the 318 Poly used the same crank and block pattern as the early hemi.
 Note 5: Prior to 1962 the "B" motor used the 8 bolt "early hemi" crank configuration.
 Note 6: Other Transmission may be interchangeable. Customer must verify this.
 Note 7: "Mopar" includes Dodge, Desoto, Chrysler, Plymouth.
 Note 8: Mercury continued to use the 1932-1948 Ford style transmission after 1949.
 Note 9: LS1 type Transmissions require additional hardware. Call for information.
 Note 10: Some adapters are available with the Buick Olds, Pontiac Cadillac late model pattern in addition to the Chevrolet.

TREMEC TKX 5-SPEED TRANSMISSION

TREMEC is pleased to announce the release of the new TKX, a 5-speed RWD manual transmission developed solely for the aftermarket. For the development of the new transmission, TREMEC engineers took a forward-looking approach to finding the best and most efficient solution. This included universal packaging, excellent shifting performance, and extreme durability. The end result is superior shift-ability with smooth shifts at high RPMs through the use of multi-cone synchronizers and hybrid synchronizer rings. At the same time, noise, vibration and harshness (NVH) performance is optimized with a gear layout to best control stress levels, while providing structural stiffness with a ribbed, 3-piece aluminum housing. Durability is further optimized with oversized gear widths, gaskets at all flanges and caged needle bearings in all gear positions. Whether restoring or upgrading a classic muscle car or a 1930s-era roadster coupe, the new TREMEC TKX 5-speed RWD manual transmission delivers a top-quality drivetrain solution.

- 600 lb.-ft. of torque capacity; capable of engine speeds of 8,000 RPMs with shifts at 7,500 RPMs.
- Available in multiple gear ratio configurations (See specifications).
- Designed for multiple applications with three shifter locations.
- Compact, end-loaded design provides clearance in most transmission tunnels without floor modifications.
- Increased case strength with three-piece aluminum housing provides outstanding structural stiffness.
- Gaskets at all flanges simplifies installation and eliminates fluid leaks.
- Superior shift-ability through use of multi-cone synchronizers and hybrid synchronizer rings made of sintered bronze and carbon
- All gears and shafts made from special grade steel (ASTM 4615), providing increased torque carrying capacity.
- Equipped with a high-performance short-throw billet aluminum shifter that isolates road noise, while providing clean, crisp shifts.
- Robust design with internal three-rail shift system and a combination of aluminum and steel shift forks.
- Wide gear width increases gear life and torque capacity.
- Separate GM and Ford case patterns and input configurations. Integrated GM and Ford transmission mount patterns

QuickTime Bellhousings

These QuickTime bellhousings are designed for Circle Track, strip, and street applications. Built from high-grade steel, the cone is spun, not rolled or stamped, allowing these QuickTime bellhousings to be the most dimensionally stable and accurate for today's high performance vehicles. They offer proven performance and are built right here in the USA.

STEEL FLYWHEELS

Cast iron flywheels are prone to explosion. For safety reasons billet flywheels are now required equipment in most motorsport applications. All Yella Terra flywheels are precision CNC machined from a solid steel billet and fitted with an OEM quality ring gear. They are available in a choice of standard and lightweight models. Some popular applications are also available in the new ultra lightweight reduced peripheral mass (RPM) designs that are effectively as light as alloy with the strength of steel, providing an engine is balanced within commercial or performance tolerance, these flywheels can be fitted with confidence.

CHEV COUNTERBALANCE PLATE

The Chev counterbalance plate bolts between the crank and flywheel and allows the use of a neutrally balanced flywheel on externally balanced 400 & 454 engines.

Counterbalance Plate for Chev 400 & 454

YT9920

MCLEOD Steel Flywheels

McLeod steel flywheels are CNC machined from billet steel and meet SFI specs for competition use.

Application

Application	Ring Gear	Part No.
Chev Small Block, Internal Balance	153 Tooth	MC460300
Chev Small & Big Block, Internal Balance	168 Tooth	MC460130
Chev LS Series, Internal Balance	168 Tooth	MC460530
Ford 260-302W Internal Balance	157 Tooth	MC463100
Ford Clew & Windsor Internal Balance	164 Tooth	MC463200
Ford 5.0L Coyote, 11" Mustang Clutch	164 Tooth	MC463458
Ford 428 FE Int/Ext Bal Incl. Bolt On C/W	184 Tooth	MC463215
BB Ford 429-460, Internal Balance	176 Tooth	MC463222

Ford Flathead 1949-53, Internal Balance	112 Tooth	MC563300

Bolt On Counterweight Kits

Bolt on counterweight kits to convert McLeod Flywheels to external balance.

Kits include bolts and multiple weights to suit all applications.

Application

Application	Part Number
Chev Small & Big Block	MC560222
Ford Small Block, 28oz & 50oz	MC563333

Xtreme Clutch

Xtreme are a nationally recognised leader in the production and supply of high-performance clutch systems and components. With over 2200 performance clutch kits in both single and multi-plate formats, Xtreme can cater for the needs of high horsepower street, drag, drift and race applications.

HEAVY DUTY ORGANIC - HD

This is the most driveable Xtreme clutch. Using premium organic type clutch facings and upgraded pressure plate clamp-load for significant torque capacity increases with virtually no loss in driveability.

DAMPENED CUSHIONED BUTTON HEAVY DUTY - DCBHD

The Cushioned Button clutch plate features a sprung centre and cushioned Marcel segment between the two sides of the disc, and this gives more progressive clutch engagement, and minimises shudder.

DAMPENED SOLID BUTTON HEAVY DUTY - DSBHD

This system features a sprung centred clutch plate and a solid "paddle style" clutch outer for virtually instant clutch engagement. It can be quite aggressive for street driving and will cope with mild levels of motorsport use.

DAMPENED SOLID BUTTON MOTORSPORT - DSBMS

Using the same solid button clutch plate as the DSBHD kits, Xtreme modifies the pressure plate in this system for massive clamp-load, and fits an SFI approved chromoly casting. Designed to hold massive horsepower on the street, while being equally at home on the track.

Application Guide

Below is a small selection of popular applications. To order, choose which type of kit you require from the descriptions above and add the code to the end of the part number below eg: XCKBU26001HD is a Heavy Duty Organic for a Chev Small Block. Many more applications are available, please contact Rocket Sales if your model is not listed.

SUPER STREET PRO CLUTCH KIT - MAX 500HP

The Super Street Pro clutch kits are great street strip performance clutches for increased street performance. This is a great application to use with moderate engine modifications and with street tires. Engine modifications can typically include upgraded intake and exhaust, camshaft and cylinder head work and engine management programming (Up to 500 HP). The Super Street

Pro provides a slightly heavier pedal effort than stock along with good holding capability makes this an excellent factory replacement clutch kit. Kit Includes: Pressure Plate, Dual Friction Disc, Throw Out Bearing (Where Applicable) & Pilot Tool.

STREET PRO CLUTCH KIT - MAX 400HP

The Street Pro clutch kit is an excellent OEM clutch replacement for street enthusiasts. This is an ideal application for use with basic performance modifications with street tires. Performance modifications usually consist of cold air intake, performance exhaust and engine management programming. The Street Pro provides a slightly heavier pedal effort than stock along with good holding capability makes this an excellent factory replacement clutch.

Kits Include: Pressure Plate, Organic Style Disc, Throw out Bearing (Where applicable) & Pilot Tool.

RST & RXT STREET TWIN CLUTCH KITS

McLeod RST & RSX series street twin plate clutch kits are engineered to bolt to the stock flywheel making them far more economical than other twin plate clutch kits. They RST series holds 800 plus horsepower and the RXT holds 1000 plus horsepower yet they feature softer than stock pedal effort and drive like a stock clutch. Kits include twin 9-11/16" clutch plates with organic facings in RST kits or metallic facings in RXT kits, a strap style floater plate for quiet operation, diaphragm pressure plate and a billet aluminium adapter ring which bolts to the stock flywheel.

RST Series

RST series twin plate clutch kits feature organic facings on both sides and are suitable for 800+ horsepower.

RXT SERIES - 1200 HP

The RXT 1200 Street Twin Clutch Assembly is the solution to extreme street-able horsepower. The RXT 1200 can handle up to 1200 HP while still maintaining light pedal effort and excellent street characteristics. Since this assembly adapts to most applications, there is no need to purchase a new flywheel, which considerably lowers the overall cost of the unit.

SOFT-LOK DRAG RACING CLUTCH KITS

McLeod Soft-Lok kits are NHRA and IHRA record holders and meet the demands of the most powerful engines, while offering superb holding power and complete adjustability. The secret behind the McLeod Soft-Lok clutch assemblies is their low static pressure, which results in light pedal effort with soft clutch engagement. This allows a vehicle with up to 1,200 hp to leave the starting line harder without excessive tyre spin, while maintaining enough holding power for the rest of the run. Soft-Lok kits feature a Borg & Beck long style pressure plate with adjustable pressure and counterweights.

THROWOUT BEARINGS & PARTS

WILWOOD CLUTCH SLAVE CYLINDER

This "Pull Type" slave cylinder is made from billet aluminium for high strength and plated with a tough anti-corrosion finish. The stainless steel push rod has a longer stroke than most cylinders assuring a full release of the clutch. Ideal for Drag Racing, Late Model Stock, Pro Series and Off Road applications. Recommended master cylinder sizing is 3/4".

CLUTCH SLAVE CYLINDER	WB260-1333
Rebuild Kit for WB260-1333	WB260-5524

Adjustable Ball Studs

Adjustable ball studs allow you to tailor the clutch fork height to suit different clutch assemblies.

Adjustable Ball Stud for GM - 13/16" Thread	MC16908
Adjustable Ball Stud for Ford Cable Linkage	MC16909

Steel 3-4 Shift Fork for T56

The steel 3-4 shift fork is an upgrade from the weak factory aluminium fork in the T56 transmission. Fits all T56 transmissions except for the T56 Magnum.

Steel 3-4 Shift Fork for T56 Transmissions	MC8-400
--	---------

GM Clutch Fork

Heavy duty clutch fork for most GM vehicles with mechanical clutch linkage.

Heavy Duty GM Clutch Fork	MC16931
---------------------------	---------

Clutch Pilot Bearings

Self lubricating Oilite Bronze pilot bearings for high load capacity and long life. Available with different internal diameters to suit a variety of transmission conversions.

MCLEOD HYDRAULIC THROWOUT BEARINGS

Hydraulic throwout bearings are excellent for transmission swaps or any application where you want to eliminate the slave cylinder and clutch fork. With the entire assembly contained inside the bell housing, they provide extra clearance and neater appearance than a traditional set up. These units are recommended for use with a 3/4" bore master cylinder with 1" stroke and a pedal ratio of 6:1.

Bolt On Hydraulic Throw Out Bearings

Bolt on hydraulic throw out bearings are used with bell housings less than 6.5" deep or where the measurement from the outside rear of the bell housing to the clutch fingers is less than 3". Bell housings deeper than 6.5" should use the slip on style bearing.

Application	Spline	Part No

ADJUSTABLE PISTON FOR 1300 SERIES HYDRAULIC THROWOUT

Description	Part No.
Adjustable 1300 series piston, 1.375" Length Short Stack Height	MC139077
Adjustable 1300 series piston, 2.220" Length Tall Stack Height	MC139079

HYDRAULIC THROWOUT REPAIR KIT

This kit will only work with hydraulic bearings that were produced after 2005 model year, that were factory equipped with a roll pin style hydraulic fitting. Applications prior to 2005 with the Banjo Style Fitting we no longer support. Note: Will not work with DOT 5 Fluid. Catastrophic failure will occur.

1300 & 1400 Series McLeod Hydraulic Bearing	MC139115
---	----------

GM V8 Heavy Duty Bronze

Spigot Bush

Clutch pilot bearings for Chev and Holden V8 crankshafts. Available in the low friction roller type or the heavy duty solid bronze bush.

PI873001

PIONEER HEAVY DUTY GM

V8 ROLLER SPIGOT BUSH SUIT

Pioneer roller pilot bearings are designed as direct replacements in all Chevrolet V8s, 90 degree V6s. They don't require any modification to either the crank or input shafts. They also eliminate premature bearing failure and ensure clean clutch release by maintaining the true alignment of the clutch disc to the flywheel. They're packed with high temperature grease for proper lubrication under extreme high heat conditions, and are suitable for all high performance applications.

PI873008

AF362-04

CLUTCH ADAPTERS

This adapter is used on the clutch master cylinder, clutch slave cylinder, or hydraulic clutch release bearing, and adapts to a standard -4AN. This adapter allows the use of a PTFE lined stainless steel clutch hose to be used instead of the factory OEM plastic clutch hose. Great for engine swaps, and the high pressure PTFE lined hose holds up better in high heat.

AF362-04	Suits late model Ford, GM & Chrysler
AF363-04	Suits early GM, Jeep, Mopar & Chrysler

FORD MUSTANG 2005-17 HYDRAULIC THROWOUT BEARING

- Heavy Duty
- Direct Fit OE Replacement
- Reliable Operation
- Ford Motor Company Equivalent Part# 4R3Z-7A508-AA
- Fits 2005-2017 GT, 2008-2009 Bullitt, 2005-2012 V6 and 2007-2009 GT500

MC1200

TRANSMISSION SHIELDS

TRANSMISSION BLANKET

Stroud Safety builds SFI approved transmission blankets that fit every type of transmission. These blankets fit the standard Powerglide transmission, or the Turbo 350, 400, etc. transmission. They bolt to the belt housing, ensuring that they stay in position.

Description	Part No
Powerglide Blanket	SS515

TCI TRANSMISSION SHIELDS

The TCI Transmission Shield is attractive, lightweight and offers excellent protection in the event of a drum explosion. All TCI transmission shields are SFI 4.1 certified and accepted by all major sanctioning bodies. SFI certification is good for five years from date of manufacture. Units can be returned to TCI for re-certification. Manufactured from 6061-T6 aluminum alloy, these units come with all mounting hardware for quick installation. All applications are powder coated for fluid and fade resistance.

Trans Shield for Ford C4 - Blue	TCI977005
Replacement Hardware Kit	TCI977100
Trans Shield For Chrysler 727/904 - Blue	TCI910005

Trans Shield For TH400 - Blue	TCI980005

RCI UNIVERSAL TRANSMISSION BLANKET

The RCI universal transmission blanket is SFI 4.1 certified and fits easily to most automatic transmissions. The blanket wraps around the transmission and the straps attach to the bellhousing bolts.

RCI Universal Trans Blanket (SFI 4.1)	RCI7808A
---------------------------------------	----------

TRANS EXPANSION TANK

POWERGLIDE PRO-X OVERFLOW PREMIUM CANISTER

New lightweight aluminum overflow canister for Powerglide transmissions safely contains high-rpm fluid blow-by. Transmission fluid should always stay in the transmission; while it seems like a simple principle, it can be difficult to achieve. At high rpm, it is not uncommon for fluid to escape through the transmission vent - spreading oil on the undercarriage of your racecar. To eliminate the result-ing safety concerns and messy clean-up, TCI offers the new PRO-X™ Overflow Canister, which weighs less than two pounds, holds approximately one quart of fluid and attaches to the trans-mission pan in three easy steps. The Powerglide PRO-X Canister measures only 12 x 2-inches and is not any wider than the transmission pan, so ground and header clearance are not a problem. A 1/8-inch petcock valve is designed into the canister for quick draining and maintenance. Canisters feature lightweight aluminum construction, powder-coated black exterior with etched PRO-X logo, welded bungs and include braided steel lines and fittings to connect the canister to the vent tube

Powerglide PRO-X Overflow Premium Canister
TCI528206

TRANSMISSION EXPANSION TANK, BILLET ALUMINIUM

Billet Aluminium finish can be left as is, polished, powder coated or painted

- Both good looking and heavy duty
- Meets requirements of 1-1/2 Pint Transmission NHRA Overflow Rule
- Prevents fluid mist from spraying on the race surface, back of your car and tires
- Pressurized fluid is captured in the Expansion tank and will drain back into the transmission as the trans cools
- Excess fluid may also be drained between rounds, by using included ball valve
- Includes breather and billet aluminium mounting bracket • Designed with an integral baffle
- Dimensions: 2.750" O.D. , 2.715" I.D., 7.050" long

Transmission Expansion Tank, Billet Aluminium M041221

AUTOMATIC TRANSMISSION EXPANSION TANK

Universal fit expansion tank prevents fluid mist from spraying on the race surface, behind your car (and tyres). Pressurized fluid is captured in the expansion tank and will drain back into the transmission as it cools (if mounted as instructed). Excess fluid may also be drained between rounds, by using the ball valve included. Includes tank mounting bracket.

Dimensions: 9-1/4" high x 2-1/4" wide.

Automatic Transmission Expansion Tank M041220

TRANSMISSION FILTER KITS

Derales Auxiliary Trans Filter Kit

Derales' Automatic Transmission Filter Kits are engineered to work in conjunction with the OEM transmission filter. The filter system prevents any foreign particles from entering the valve body or other internal components, while maintaining the fluid and removing any varnish, sludge or contaminants. Available with or without an electronic temperature gauge and under dash mount is included in the premium kit. The Derales spin-on transmission filter should be changed whenever the fluid is changed or the transmission is serviced.

- Doubles Transmission Life • Extends Time Between Fluid Changes • For All Automatic Transmissions

Part No: DP13090

REMOTE TRANSMISSION FILTER KIT

This universal remote transmission filter kits enable quick and efficient filter changes and filter out contaminants that pass through OE-screen type filters. The premium version also includes our temperature gauge package with sending unit, mounting brackets and hardware. The increased fluid capacity also cools fluid temperatures helping to extend the life of the transmission.

Specifications:

- Filter Dimensions: 3-1/2" OD x 3-1/8" • Filter thread size: 3/4"-16
- Filter landing: 2-1/2" to 3-1/2" • Inlet size: 3/8" NPT
- Barb size: 3/8" • Gauge temperature range: 140-300°F
- Gauge size: 2-1/16" • Sending unit thread size: 1/8" NPT

Features:

- 21 micron rating • Extends life of transmission
- Filters out contaminants more efficiently than OE screen type filters • Universal - fits all automatic transmissions
- Increases fluid capacity
- Premium kit includes all remote filter mount, premium gauge kit, hose, filter and mounting hardware.

Description

Single Mount 3/8" NPT Ports Up
Remote Transmission Filter Kit

Part No.
DP13091

TRANSFILTER

This replacement filter removes contaminants that can get past OE screen-type filters.

- Filter Dimensions: 3-1/2" OD x 3-1/8"
- Filter thread size: 3/4"-16"

Part No. DP13092

Remote Transmission Filter Kit

Many transmission failures are caused by contamination. A remote transmission oil filter increases filtration efficiency 2 to 5 fold. Includes permanent remote-adaptor, spin-on filter and hardware.

Remote Transmission Oil Filter Kit BM80277

AF386-06 9/16"-18 NPSM SHORT to -6AN designed to suit 4L80E transmissions without tail on fitting (remove original fittings to check what style you require)

AF386-06L 9/16"-18 NPSM LONG to -6AN designed to suit 4L80E transmissions with long tail on fitting (remove original fittings to check what style you require)

FLOW CONTROL VALVE

Aeroflow Performance flow control valve plays a vital role in clutch tuning by adjusting the clutch to slip slightly during quick engagements, the flow control valve reduces shock loads to the driveline, lowers the chance of losing traction or the chance of damaging driveline components. Includes three orifice sizes (0.021", 0.028" and 0.040") that enable clutch disengagement to be tuned. The flow control valve features -3AN male nipples.

AF64-4362

TRANSMISSION COOLERS

DUO-COOLER

High-Performance Dual-Chamber Fluid Cooler
The most effective hydraulic fluid & oil cooler available for cars, trucks, RV's and boats.
Transmission fluid, engine oil and power steering fluid all have one major enemy - heat. The DUO-COOLER protects and prolongs life for all automatic transmissions, engines and power steering systems. Designed for automotive, industrial and marine applications.

Installation Requires two 1/4" NPT hose connect fittings.

BDHR-9800-12 (12" long) Recommended for smaller engines, small-medium automatic transmissions & all power steering systems.

BDHR-9800-18 (18" long) Recommended for larger engines & large automatic transmissions.

Inline Transmission Cooler

Features all aluminium construction and easy mounting with two 3/4" bolts (included), 1-3/4" Diameter.
Inline Transmission Cooler **AFC37750**

Finned Satin Aluminium Trans Coolers

Single pass design.
 Includes two 3/8" npt fittings
RPCR5050 12"
RPCR5051 15"
RPCR5052 18"

Dual pass design.
 Includes two 1/4" npt fittings
RPCR5050X 12"
RPCR5051X 15"
RPCR5052X 18"

HEAVY DUTY AUTO TRANS OIL COOLER/FILTER

Dual combination cooler/filters use "heat sink design" to dissipate the excessive heat build up in racing transmissions, not recommended for street use. Filter with magnet removes all particles over 10 microns in size. Comes complete with filter cartridge, includes two 1/4" NPT to -6AN fittings and all necessary installation instructions. Dimensions: 3-1/2" High x 6-1/4" Wide x 18" Long.
Description **Part No.**
Transmission Oil Cooler, Heavy-Duty **MO41205**
Replacement Filter Cartridge **MO97291**

AUTO TRANS OIL COOLER/FILTER

Combination cooler/filter uses heat sink design to dissipate the excessive heat build up in racing transmissions. Can be used on the street as an auxiliary cooler in conjunction with a stock cooler. Filter with magnet removes all wear particles over 5 microns in size. Comes complete with filter cartridge, includes two 1/4" NPT to 3/8" line fittings and all necessary installation instructions. Dimensions: 3" diameter x 12" length.
Description **Part No.**
Automatic Transmission Oil Cooler/Filter **MO41200**
Replacement Filter Cartridge **MO97290**

B&M HI-TEK ENGINE OR TRANSMISSION COOLING SYSTEM

The newest addition to B&M's line of SuperCooler transmission and engine oil coolers is the Hi-Tek cooling system. Fitted with a high quality 12 volt electric fan and built-in mounting brackets, these coolers handle tough cooling jobs. They include a thermal switch to activate the fan when the fluid temperature reaches 71°C (160°F). Can be used for racing, RV and street performance vehicles.
 • Fin and plate cooler construction • Includes 12 volt high flow fan
 • Pressure tested to 200psi • Black finish
 • Units include 1/2 NPT fittings and thermal switch
13-1/2" x 9" x 3-1/2" with 9-1/2" Diameter Fan **BM70297**
10" x 7-1/2" x 4" with 7" Diameter Fan **BM70298**

B&M SUPERCOOLER UNIVERSAL COOLERS

B&M universal SuperCoolers are suitable for all fluid cooling needs including: automatic transmission fluid, engine oil, differential fluid, power steering and turbocharger oil in street, off road and race applications. B&M Universal SuperCoolers feature 1/2" NPT fittings which are easily adaptable to steel braided lines and AN fittings. These coolers have strong, durable and lightweight cooler cores, and the stacked plate design cools fluid better than ordinary tube & fin coolers.
 • Suitable for cooling auto trans, engine, differential or power steering • Ideal for racing and heavy-duty applications
 • Oven-brazed, all aluminium construction
 • Efficient "Stacked Plate" design
 • 1/2" NPT fittings are easily adaptable to AN fittings
SuperCooler 11" x 5-3/4" x 1-1/2" **BM70273**
SuperCooler 11" x 8" x 1-1/2" **BM70266**
Polished SuperCooler 11" x 2-3/4" x 1-1/2" **BM70265**
Polished SuperCooler 11" x 8" x 1-1/2" **BM70272**

B&M SUPERCOOLER TRANSMISSION COOLERS

B&M SuperCoolers are 100% aluminium construction and use stamped plates sandwiched together to create one of the most efficient oil cooling devices available. Not only does this unique design provide for maximized cooling through more efficient heat dissipation but it also provides a much sturdier cooler which is practically impervious to flying rocks or debris. These coolers also offer an additional feature known as "Low Pressure Drop", a unique bypass feature allowing a controlled amount of ATF to bypass the core when the fluid is cold. Controlled by viscosity, fluid is returned directly to the lube circuit through bypass openings in the core. As the temperature increases, more ATF is directed through the core. This highly efficient design combines improved protection against lube system failure with the required levels of optimal heat transfer.
 • Stacked Plate design • All aluminium oven brazed construction
 • Small & efficient design • Includes installation kit
 • 3/8" extended nipple fittings
SuperCooler 11" x 5-3/4" x 3/4" **BM70255**
SuperCooler 11" x 7-1/4" x 3/4" **BM70268**
SuperCooler 11" x 5-3/4" x 1-1/2" **BM70264**

10" x 7-1/2" COMPETITION OIL COOLER

Aeroflow's engine and transmission oil coolers feature 1/2" NPT or -10 ORB female fittings for a perfect O-ring seal, thermostat wiring, plug kit and a high quality electric fan. It accepts engine oil, transmission and power steering applications and has been pressure tested to over 200psi (13.79 BAR). The thermal switch included activates the fan at 79.5°C (175°F). The cooler also features a fin and plate construction. 350CFM 7" fan draws 6 amps. The dimensions are 254mm (10") x 190.5mm (7.5").
AF72-6002 **Comp oil cooler with fan & thermostat 1/2" NPT**

13.5" x 9" COMPETITION OIL COOLER

Aeroflow's new engine and transmission oil coolers feature -10 ORB female fittings for a perfect O-ring seal, thermostat wiring, plug kit and a high quality electric fan. It accepts engine oil, transmission and power steering applications and has been pressure tested to over 200psi. The thermal switch included activates the fan at 175°F/79.5°C. The cooler also features a fin and plate construction. The dimensions are 13.5" (34cm) x 9" (23cm).
AF72-6000 **Competition oil cooler with fan & thermostat**

COMPETITION OIL COOLER VIBRATION MOUNTS

In many performance applications such as off-road, drag racing and street, strong vibration forces can be transmitted through the chassis to our oil cooler unit. To protect the oil cooler from damage due to excessive vibration, we recommend the use of these rubber vibration mounts. Designed specifically to fit into our competition oil coolers ONLY.
AF72-4001 Sold in a pack of 4 with a 6.5mm I.D.

MODULAR OIL COOLERS

Aeroflow offers a tremendous selection of the industry's highest quality coolers in a wide range of applications and profiles. These stack plate (modular style) coolers are fully brazed on all contact surfaces inside and out, further more they have a brazed seam that withstands vibrations and pulsations in the toughest environment. Any performance vehicle can benefit from an Aeroflow Cooler. Motor homes, tow vehicles, passenger cars and even motorcycles can realize extended engine and/or transmission efficiency and life.
Technical Specifications:
 • Connections: -10 Female ORB thread, Adapters to suit any applications
 • For use in engines, transmissions, hydraulic systems, etc.
 • Max working pressure is 10 Bar (1 MPa or 145 PSI)
 • Burst pressure is 25 Bar (2.5 MPa or 362 PSI)
 • Must use mounting kit in all performance applications

MODULAR OIL COOLER MOUNTING KIT

Properly mount your Aeroflow Oil Cooler with this Universal Aeroflow oil cooler mounting bracket (Simply cut on the line of how many row cooler you have). It is made from quality materials for strength and durability. This bracket securely holds the oil cooler preventing vibration damage. The bracket is pre-drilled for ease of mounting to any surface and comes complete with all necessary hardware to mount the cooler.
Part No **Description**
AF72-4000 Oil cooler mounting kit suits all sizes.

Aluminium Mounting Brackets

DP50020 Bracket kit - 4 mounting brackets & fasteners

FRAME RAIL COOLERS

With the same 1/2" copper tubing expanded into aluminium cooling fins and embossed turbulators as our larger transmission coolers, this cooler uses a slim design to enable frame mounting in limited space applications. It includes -6AN inlets and can be used as a transmission cooler, power steering or fuel cooler with equal efficiency. Includes mounting hardware only. • -6AN inlets
 • Embossed turbulators inserted in each tube agitate fluid for maximum heat transfer • Extruded plastic cooling fin guards
 • 2 pass cooler design • transmissions, power steering & fuel
 • 1/2" copper tubing expanded into aluminium cooling fins
Part No **Width** **Height** **Depth**

STACKED PLATE COOLERS

Our most efficient heat exchanger, the all aluminium Stacked Plate cooler features sturdy furnace brazed construction, full 2" deep turbulator-equipped plates and a black powdercoat finish. With minimal pressure drop it can be used for engine, transmission or fuel cooling. Includes bright aluminium anodized finished -8AN male adapter fittings.

- Designed for engine, transmission, power steering, Differential & fuel cooling
- Most efficient heat exchangers available
- Furnace brazed aluminium construction with 4 integrated mounting brackets
- 10 row cooler design
- Male -8AN aluminium O-ring inlet fittings

DUAL CIRCUIT

ELECTRA-COOL

REPLACEMENT

COOLER

Featuring a free-flowing 8 & 8 pass cooler in one compact package and fabricated of 1/2" copper tubing and aluminium cooling fins, this Made in the USA Dual-circuit cooler includes 4 each -8AN inlets. It provides heat transfer capabilities for two independent systems such as engine and transmission or transmission and power steering that competitive units just can't match at anywhere near the price.

- 1/2" copper tubing expanded into aluminium cooling fins
- Cools two systems in one compact package
- 8 & 8 pass cooler design
- Black Powder coat finish
- (4) -8AN inlets

DYNO-COOL SERIES 6000 TUBE & FIN COOL

This universal all-aluminium transmission cooler is perfect for todays smaller, highly-stressed sub-compact and compact car automatic transmissions. Featuring embossed turbulators inserted into full 1/2" tubing to agitate fluid and lowered cooling fins, it extends transmission life by helping to prevent heat-related transmission failures while improving shift performance. This kit comes with a complete transmission cooler hardware kit to easily install onto vehicles with 5/16" transmission cooler lines.

- Prevents heat related transmission failures
- Extends life of transmission
- Improves transmission performance
- Embossed turbulators inserted in each tube agitate fluid for maximum heat transfer
- 4 pass cooler design
- 1/2" aluminium tubing expanded into aluminium cooling fins
- 11/32" hose barb inlets
- Complete hardware kit included

ATOMIC-COOLER WITH FAN SUIT ENGINE OR TRANS

A step up from Tube & Fin type coolers, this popular remote cooler can literally be mounted almost anywhere, making it a popular addition for performance cars, hot rods, muscle cars and trucks. A heavy duty plate and fin cooler coupled with a Tornado fan and aluminium brackets, it comes with 2 -6AN or -8AN male fittings and 2 -6AN x 3/8" barb adapters. The Atomic-Cool is perfect for heavy duty towing and hauling, a durable, trouble-free way to add years to the life of your transmission. Also recommended for power steering and fuel cooling.

- Mounts anywhere space permits
- Electric fan supplies optimum airflow
- Dramatically extends engine and transmission life
- High efficiency OEM style Plate & Fin cooler
- Clear anodized aluminium shroud
- 500 CFM reversible Tornado electric fan
- 6AN inlet size
- Cooler assembly includes fan mounted cooler, two aluminium -6AN fittings and two brass -6AN x 3/8" hose barb fittings

ELECTRA-COOL

REMOTE TRANSMISSION COOLER KIT

With it's own air supply, the Electra-Cool Remote Transcooler can literally be mounted wherever space permits, making it a popular addition for performance compacts, hot rods, muscle cars and trucks. An efficient 16 pass tube and fin cooler coupled with a Tornado fan and aluminium brackets, this kit comes with a complete installation kit to install easily on all vehicles with 5/16" or 3/8" transmission cooler lines. Also included is an 180°F in-line thermostat for activating the electric fan. This is a durable, trouble-free way to add years to the life of your transmission, and perfect for medium to heavy-duty towing and hauling.

- Cooler style: 16 pass Tube & Fin
- Inlet size: -6AN • Fan size: 10" • CFM: 650 • Amp draw: 5.3
- Width: 15-3/4" • Height: 11-1/2" • Depth: 5" • Inlet dim: 8-3/4"
- Hose size: 3/8" • Hose length: 10" • Mounting: 14-3/4" x 5-1/4"
- Cooler Fluid Capacity: 19.6 oz • Airflow: Puller (reversible)
- Mounts anywhere space permits • Electric fan supplies optimum airflow • Dramatically extends engine and transmission life
- 16 pass Tube & Fin cooler • Clear anodized aluminium shroud
- 650 CFM reversible Tornado electric fan • -6AN inlet size
- Transmission cooler kit includes fan mounted cooler, two -8AN fittings and four -6AN x 3/8" hose barb fittings, 180°F In-line thermostat, 10 ft. of OEM spec hose, 5/16" Insta-dart radiator fitting, 5/16" and 3/8" compression fittings, and hardware

HYPER-COOL

EXTREME

REMOTE COOLER

Our most efficient remote cooler, the Hyper-Cool Extreme is designed to outperform the competition. Combining our largest and most efficient 40- Row stacked plate cooler with an 800 CFM wa-terproof/dustproof electric fan makes this remote cooler the absolute King of remote coolers. Per-fect for all applications, the Hyper-Cool Extreme excels at temperature control in extreme duty, high performance or off-road applications. Its -6AN fittings allows for simple and clean connection to your transmission, power steering, or fuel lines.

- High efficiency Stacked Plate cooler
- Dramatically extends engine or transmission life
- Clear anodized aluminium shroud
- Mounts anywhere space permits
- Electric fan supplies optimum airflow
- 10" - 150-watt waterproof/dustproof electric fan
- Ideal for severe duty conditions
- 67,000 BTU's Per Hour
- Cooler is rated at 250psi working pressure and 300psi burst strength
- 26oz additional fluid capacity

Part No	Width	Height	Depth

DYNO-COOL REMOTE COOLERS

The Dyno-Cool Universal Remote Cooler can be mounted anywhere space permits, using a highly efficient copper tube/aluminium fin cooled and a curved blade fan to provide airflow and extend transmission life. Perfect for medium duty use. Mounting kit not included.

- Efficient copper/aluminium tube & fin 6 pass cooler -6AN inlets
- 450 CFM reversible Dyno-Cool Straight Blade electric fan
- Cooler style: Tube & Fin •Inlet size: -6AN male •Fan size: 8
- CFM: 450 •Amp draw: 5.3
- Offered in 4 sizes with 11/32" barb or -6 AN inlet

Part no. DC691

Transmission Oil Coolers

Because of the tremendous heat generated in an automatic transmission, an auxiliary transmission cooler is an economical way to help protect against costly transmission repairs. Automatic transmission fluid (ATF) cools, lubricates and cleans internal transmission components. When temperatures exceed 93degC (200degF), the ability of ATF to perform is greatly diminished. Subsequently, the life span of the fluid, seals and moving parts are greatly reduced. Higher internal temperatures also increase the wear rate of the friction and clutch plates.

- Excessive transmission heat is caused by the following driving conditions:
- Towing • Climbing • Stop and go traffic
 - Carrying loads • Hot driving conditions • Driving in sand or snow.

Davies, Craig Transmission Oil Coolers can reduce the AFT's temperatures by as much as 33degC (60degF). A reduction of just 11degC (20degF) can double the life of the automatic transmission, the fluid and all the internal parts.

Ultra-Cool Transmission Cooler

The Ultra-Cool transmission cooler is available to suit a wide range of applications from small sedans to light commercial vehicles.

- Features:
- Ultra sonically soldered for reliability.
 - 100% pressure tested at 300PSI for quality assurance
 - High efficiency turbulators in every tube for maximum heat dissipation.
 - 3/8" push-on fittings for quick and easy installations.
 - Hose clamps and nylon mounting ties.

Recommended for vehicle manufactured PRIOR to 1990.

Hydra-Cool Transmission Cooler

Hydra-Cool's unique plate and fin design offers excellent cooling efficiency in a compact space efficient design.

- 33% more efficient than comparable tube and fin designs.
 - Pre-drilled mounting plates for easy installation
 - Available to fit a wide variety of applications.
 - Internal turbulence for efficient heat transfer.
 - 3/8" or 5-1/16" push-on fittings for quick and easy installation.
 - Hose clamps and nylon mounting ties.
- Hydra Cool is suitable for ALL vehicles.

ADJUSTABLE FAN CONTROLLERS

This newly redesigned adjustable electric fan thermostat kit is designed to activate up to 2 fans with a maximum draw of 25 amps. Two kits to chose from, water jacket 3/8" NPT thread-in probe or push-in radiator probe, kit includes relay wire harness and electrical connectors for an easy installation. A/C override circuit included.

- Adjustable fan controller turn-on range from 150°F - 240°F, and turn-off preset at 10°F lower than turn-on.
- Adjustable turn-on temperature from 150-240°F
 - Turn-off temperature is preset at 10°F below turn-on temperature
 - Thread in 3/8" NPT probe or Push-in radiator probe
 - Heavy duty 40/60 amp relay *rated at maximum 25 amp continuous draw
 - AC override circuit included •Ground circuit relay
 - Note - Operates up to a 25 amp fan or two fans with a combined draw of 25 amps or less

TH400 TRANSMISSION PAN FILTER EXTENSION
These genuine AC Delco automatic transmission filter pickup extension tube from AeroFlow come standard in our TH400 fabricated transmission oil pans. This extended intake tube is the same fit, form, and function as the original, making your install easier and your repairs successful. It measures 5.75" on the short side and 6" on the long side, so it will only work with OEM and some aftermarket oil filters.

AF59-3001 AC Delco/GM 8629526

TRANS PAN GASKETS

AEROFLOW TRANSMISSION PAN GASKETS

AeroFlow pan gaskets are manufactured from durable rubber that is vulcanized to a rigid steel frame. These gaskets are reusable and require no sealant so you can remove and install the transmission pan with ease. The extra-strength design will not leak, blow out or get sucked in like stock or inferior-quality aftermarket gaskets. 4.76mm (3/16") thick.

 - Adapter kit installs high flow filter to ensure proper fluid supply
 - Must be used in conjunction with TCI cast aluminium deep pan
 - Kit includes: filter, filter gasket, oil pan gasket and filter adapter with mounting hard-ware
- Powerglide High Flow Filter TC1528505

TRANS PAN DRAIN PLUGS

Universal Drain Plug Kit

This is one of the quickest and most efficient modifications you can make to your automatic transmission. Only a few automatic transmissions are equipped with drain plugs from the factory.

Removing the pan to drain the fluid can be a mess. Simply remove the pan once, drill a hole, bolt the B&M Drain Plug Kit in, and eliminate messy oil splash forever.

Non-magnetic.

All transmission pans **BM80250**

FORD C4 PAN FILL

CONVERSION ADAPTER

Aeroflow now offer a simple and easy conversion kit to allow you to use our steel trans pans (AF1825-3000 & AF1826-3000) with Aeroflow pan fill dip-sticks (AF72-2503) or retain your factory pan fill dip-sticks and allow you to screw the dip-stick tube directly into the pan and retains an accurate full mark.

STAINLESS STEEL

TRANSMISSION DIPSTICKS

• Dipstick assemblies have the same sleek design as Milodon engine dipsticks.

• All dipstick components are CNC machined from billet stainless steel.

• Inside diameter of the 10AN tube is 39% larger than other designs allowing speedy filling.

• Fittings, stick and hose are all stainless steel so they will stay bright & rust free.

• O-ring sealed handle and double o-ringed bottom to positively seal against water and dirt.

• Dipstick is pre-calibrated with the OEM style Add and Full levels.

• Made in the USA, unlike others

LOCKING TRANS FILL TUBES

Hughes Performance unique locking transmission filler tubes for 700R4s and Powerglides were so well-received that the company has expanded the line significantly. Hughes now offers these dipstick and filler tube assemblies for most popular domestic rear-wheel-drive applications. Why install a locking dipstick? Many transmissions build up pressure. This pressure can blow out the dipstick, allowing trans fluid to spew everywhere. With Hughes locking tubes, you keep the fluid in the trans - which means greater reliability and a sanitary engine compartment. All of Hughes filler tubes are gold irridated. And all assemblies are manufactured to exacting tolerances with tab mounts.

Hi-Tech Flexible Braided Stainless Trans Dipstick

You can have unlimited flexibility with our Teflon-lined Flexible Braided Stainless Transmission Dipstick. Kit comes complete with braided stainless outer housing and heat resistant E-Z to Read Teflon inner rod. Inner rod is stamped with appropriate trans fluid levels. Machined aluminium handle and aluminium fittings compliment Lokar's flexible engine dipsticks. Kit includes dipstick funnel adapter to assist in filling. Designed for "push in" style transmissions. Dipstick seals with O-rings. Applications available for GM, Ford and Chrysler in both firewall mount and transmount. Firewall mount measures 24" in length. Transmount mounts to the bell housing and the length varies according to the transmission application. Kit comes complete with installation instructions. Call for information on custom orders for "screw-in" style transmission

HOLLEY SNIPER & FITCH THROTTLE & KICKDOWN BRACKETS

Lokar's Holley Sniper and FiTech Brackets allow for a clean and simple integration between Lokar's Throttle and Kickdown Cables and FiTech or Holley Sniper EFI systems. The FiTech brackets are available in polished or black stainless steel and come with all mounting hardware and return springs. The Sniper brackets are available in polished or black stainless steel, and also black anodized or Brite billet finish.

- LK-TCB-40FIT Stainless FiTech Bracket
- LK-TCB-40HS1 Brite Billet Holley Sniper Bracket

HI-TECH KICKDOWN KITS

To add more shine to your engine compartment, try Lokar's Polished U-Cut-to-Fit braided stainless cable. It is designed with a specially extruded liner for extended life of the cable - not to be confused with ordinary brake hose. Kickdown features polished aluminium fittings with polished ferrule to eliminate frayed cable ends. Kickdowns are adaptable for all types of manifolds including tunnel ram, blower manifolds and Weber induction systems. Mount our kickdown with our stainless steel carburettor bracket and return springs (sold separately). All units are available in black housing upon special request. Complete instructions included in kit.

LOKAR AUTO SHIFTERS

Nostalgia Automatic Shifters

Shifters

Lokar's Nostalgia Shifter is designed with 2 bends in the lever, for that nostalgic hot rod look. The Nostalgia Shifter comes complete with all the same functional features and safety features as our standard Shifter, including our exclusive Safety-Lock-Out Button, main plate and side brackets. The Nostalgia Shifter is available in 23" or 16" lengths and is accompanied by a Black Mushroom knob, which features Teflon lined button for smooth operation. Boots sold separately.

Lokar Automatic Shifters

These shifters mount directly to the transmission and are designed to help prevent accidentally shifting from the park position, into reverse, drive and low gears with Lokar's exclusive Safety Lock-Out Button. Its convenient, too - this shifter is completely adjustable so that you can mount it in any number of positions front to rear with our exclusive main plate and side brackets. Mount the shifter in an existing floor opening or put it exactly where you want it.

Other Features Include:

- Neutral Safety Switch
- Positive Lock-Out in Park and Neutral
- 360-degree lever rotation for extra leg room
- Out-from-under-the-dash and away-from-the-seat lever adjustments
- Easy-to-remove shifter knobs for simple boot installation
- Teflon lined button in shifter knobs for smooth operation
- Chrome-plated lever in 32", 23", 16", 12", 10", 8", and 6" lengths
- Gold iridized bracketry
- All hardware included for installation
- Available for GM, Ford and Chrysler Automatic Transmissions
- Boots sold separately

Floor Mount Automatic Shifters

The Floor Mount Automatic Transmission Shifter follows in the footsteps of its parent transmission mount and tailmount shifters, having been designed with the same superior craftsmanship. The exclusive floor mount brackets allow for installation above or below the floor on the transmission tunnel. Kit includes splined shift arm with three optional offset arms for mounting to right or left. Removal of the transmission is not necessary. Floor Mount Shifter is equipped with the expected safety features of a Lokar Shifter.

Features

- Operates with solid adjustable linkage
- Neutral Safety Switch
- Positive Safety-Lock-Out in Park and Neutral
- 360-degree lever rotation for extra leg room
- Out from under-the-dash and away-from-the-seat-lever adjustments
- Easy-to-remove shifter knobs for simple boot installation
- Teflon lined button in shifter knobs for smooth operation
- Chrome-plated lever available in 23", 16", 12", 10", 8" and 6" lengths
- Gold iridized bracketry • All hardware included for installation
- Available for GM, Ford and Chrysler automatic transmissions
- Rectangular boot rings sold separately

Cable Operated Automatic Shifters

Lokar's versatile Floor Mount Shifter is paired with a high quality push/pull cable, offering mounting in virtually any location. Use of a superior 1/4" inner cable and spherical rod ends bring this shifter to the next level of quality when compared to other 10-32 cables often used. User friendly mounting brackets and hardware yields a truly universal, safe and quality product.

Features include:

- Versatile Floor Mount Design
- High quality push/pull cable with durable 1/4" inner cable
- Spherical rod ends
- Many mounting options
- Shifter locks in Park & Neutral with Lokar's exclusive Lock-Out Button
- Neutral safety switch
- Shifter lever lengths available in 23", 16", 12", 10", 8", and 6"

Ford AOD Selector Shaft & Arm

Lokar's Ford AOD Selector Shaft and Arm is the solution to hunting for the right part. By standardizing the shift linkage for aftermarket applications, Lokar has eliminated the guess work and saves you time and money. This fully adjustable shaft and arm finally allows for installation on numerous applications.

- Replaces factory selector shaft and arm
- Adjustable for proper ratio between shifter and transmission
- Arm designed to be installed in any 360° position for versatility
- Kickdown seal installed in selector shaft
- Zinc plated with stainless steel hardware
- Can be used with many aftermarket shifters
- Detailed instructions

SEE GAUGES SECTION

Column Cable Shift Linkage

Lokar's Column Cable Shift Linkage is the ultimate answer to interference issues, when you are unable to use the factory hard column linkage. The cable allows you to route the cable around the transmission, exhaust, cross-members and brake pedals. Our Exclusive Billet Aluminium Mounting Arm can be used on either side of the column. Lokar's Column Cable Shift Kit allows you to use our shift indicator kits. It can also be used in conjunction with our Back-Up Light/Neutral Safety Switch Kit (LK-BL-1400U). Available in black housing, designed with specially extruded liner for extended life of the cable, and stainless inner wire measuring 6 feet in length. Ready-to-install hardware and brackets included in kit - no cutting or measuring - simply bolts on.

- For all GM Transmissions except Powerglide
- Does not fit Ford or Chrysler Transmissions

Lokar Shifter Knob Adapter

Your personal style is important to Lokar, so now you can display that style on all of Lokar's Automatic Transmission Shifters with most aftermarket shifter knobs of your choice. How, you ask? Lokar's Shifter Knob Adapter is designed to adapt to most aftermarket shifter knobs for use with any of our shifters - continuing with the same shift pattern and safety features you possess with Lokar's Automatic Shifter Knobs. This includes the positive lock-out in Park and Neutral. The Shifter Knob Adapter is designed with the common 3/8-16 and 3/8-24 threads found in most aftermarket shifter knobs. Designed with hidden jam nuts for a flush mount against the shifter knob. Chromed finish blends with the Lokar chromed shifter lever to give you the desired clean look with a custom knob. Comes with complete installation instructions.

Also available in black finish for the Lokar Midnight Series Shifters.

LOKAR MUSCLE CAR SHIFTER KNOBS

To fill the void between personal preference and personal safety, Lokar developed a Shifter Knob Adapter which allows you to express yourself with highly custom knobs, yet still retain all of the safety features and benefits of a Lokar Shifter, including the positive lockout in Park and Neutral. After thoughtful consideration and careful planning, Lokar invented a Shifter Knob Adapter with hidden functional parts and a sleek design which will install on ANY Lokar Shifter without modification and allow the use of virtually anything as a knob. The Adapter is offered with common 3/8"-16 or 3/8"-24 thread sizes and is available in either a chrome or black finish. We also offer a muscle car shifter knob adapter to replicate the feel of an original muscle car shifter.

AUTO SHIFTER HANDLES

2015-2017 MUSTANG PISTOL GRIP HANDLE

Hurst introduces their new Billet/Plus Pistol-Grip Shift handle for the 2015-2017 Mustangs with the automatic transmission. This is a great way to add a contemporary performance look to your modern day muscle car. Billet Aluminium construction is precision CNC machined for a modern look and feel. The body features a polished finish, while the replaceable grip plates have a black anodized finish and display the iconic Hurst name. The grip features a comfortable shape that just feels "right" in your hand, along with a finger operated trigger mechanism for the lockout function. Easy installation with simple hand tools and includes installation instructions. HU5380435

BANG SHIFT ATTACK OEM SHIFTER HANDLES

The Bang Shift Attack OEM replacement billet shifter handles are perfect for those that want the race orientated look while still retaining your factory OEM automatic shifter assembly. This quick and easy to install handle will enhance any interior of the modern-day car without the hassle of a new shifter assembly. The pistol grip handle is a handy two-piece bolt together design that allows interchangeable billet side plates to be purchased separately. Detent activation is controlled by a trigger lever mechanism that is pulled in towards the gear shifter handle to activate and control the lockout. Available to fit a variety of OEM automatic transmission shifter handles with choice of either black or silver colour options.

BARE AUTO SHIFTERS

BARE BANG SHIFT NITRO RATCHET SHIFTER

The Nitro shifter by AeroFlow Performance is a full ratchet shifter that not only performs great on the street but also on the drag strip. This positive ratchet design self-centers the handle in the middle of the shifter so all the user has to do is click once up or click once down for each gear, it's just that simple! No reason to ever miss a gear either up or down by over shifting. With this self-centered design it allows maximum clearance for tight fitting consoles in all vehicle applications.

The Nitro shifter includes a reverse lockout feature that only requires one hand to operate, two micro-switches for reverse lights and a neutral safety switch preventing accidental starts when in gear all to keep the engineer happy and your vehicle safe. A billet gear knob with interchangeable inserts sits on top of the shifter stick.

This bare Nitro shifter assembly is specifically sold with no billet outer casing to fit into late model consoles or tight-fitting areas. This means it will not include the LED globe and indicator windows, these however are sold separately if you wish to purchase them. Included with this kit is an AeroFlow Performance 5-foot-long race shifter cable, all necessary hardware, detailed instructions for an easy installation you can do at home, cable brackets and transmission shifter levers to suit the following three and four-speed automatic transmissions:

- GM TH350, TH400, 700R4, 200R4, 4L60, 4L60e - 4L80e without PRNDL switch (4L60E, 4L65E, 4L80E, 4L85E with PRNDL switch brackets sold separately AF72-9052) .
- Ford C4, C5, C6 (AOD brackets sold separately AF72-9055)
- Chrysler 1966 and later Torqueflite A727 and A904.

BARE BANG SHIFT PISTOL RATCHET SHIFTER

The Pistol shifter by AeroFlow Performance is a full ratchet shifter that not only performs great on the street but also on the drag strip. This positive ratchet design self-centers the handle in the middle of the shifter so all the user has to do is click once up or click once down for each gear, it's just that simple! No reason to ever miss a gear either up or down by over shifting. With this self-centered design it allows maximum clearance for tight fitting consoles in all vehicle applications.

The Pistol shifter includes a reverse lockout feature that only requires one hand to operate, two micro-switches for reverse lights and a neutral safety switch preventing accidental starts when in gear all to keep the engineer happy and your vehicle safe. The Pro Grip handle attached to the shifter stick is a handy two-piece bolt together design that allows interchangeable billet side plates.

This bare Pistol shifter assembly is specifically sold with no billet outer casing to fit into late model consoles or tight-fitting areas. This means it will not include the LED globe and indicator windows, these however are sold separately if you wish to purchase them. Included with this kit is an AeroFlow Performance 5-foot long race shifter cable, all necessary hardware, detailed instructions for an easy installation you can do at home, cable brackets and transmission shifter levers to suit the following three and four-speed automatic transmissions:

AUTOMATIC SHIFTERS

BULLET RATCHET

BANG SHIFT BULLET RATCHET SHIFTERS

The Bang Shift by AeroFlow Bullet Ratchet Shifter allows for a triggerless ratchet shift. To access your park, neutral and reverse gears you simply lift the gear shifter straight up and pull forward to let the handle drop into the desired gear. This reverse lockout safety feature means you won't be accidentally over-shifting into reverse while making a pass at the strip. To use the ratcheting function of the Bullet shifter, shift into low gear, launch the vehicle and hit the shifter forward when it's time to shift.

The unique flat billet top plate allows the Bullet shifter to be used in both right and left hand drive configurations! Left hand drive conversion sold separately. The top plate, shifter stick and billet gear knob with interchangeable inserts mounts on top of the black plastic console base which can be trimmed to fit your transmission tunnel. The black plastic slide cover built into the top plate finishes off the Bullet shifter to give your interior the OEM look while retaining that classic tough muscle car look.

The Bullet shifter includes a LED lit gear position indicator in the top plate, a micro-switch for reverse lights and a neutral safety switch preventing accidental starts when in gear all to keep the engineer happy and your vehicle safe.

Included with this kit is an AeroFlow Performance 5-foot long performance shifter cable, all necessary hardware , detailed instructions for an easy installation you can do at home, cable brackets and transmission shifter levers to suit the following :

- GM TH350, TH400, 700R4, 200R4, 4L60, 4L60e - 4L80e without PRNDL switch (4L60E, 4L65E, 4L80E, 4L85E with PRNDL switch brackets sold separately AF72-9052) .
- Ford C4, C5, C6 (AOD brackets sold separately AF72-9055)
- Chrysler 1966 and later Torqueflite A727 and A904.
- Overall dimensions – Length 311mm (12-1/4"), Width 157mm (6-13/16"), Total Height 311mm (12-1/4")

ATTACK SHIFTER

BANG SHIFT ATTACK GATE SHIFTER

The Bang Shift by Aeroflow Attack gate shifter has every feature you need for race orientated competition use and all street applications.

The rugged construction of a heavy-duty steel base with a hardened steel gate plate ensures consistent, precise spring-loaded gate action. Detent activation is controlled by a trigger lever that is pulled in towards the gear shift handle to activate. The Attack shifter is compatible with forward or reverse pattern valve bodies with individual models available for 2, 3 and 4-speed automatic transmissions. Attack shifter has the required gate plate pre-installed and ready to go. Replacement hardened steel gate plates are available separately if you want to use it on a different transmission later on. The Attack shifter is specifically designed for right hand drive vehicles. The pistol grip handle attached to the shifter stick is a handy two-piece bolt together design that allows interchangeable billet side plates to be purchased separately. Along with a matching reverse lockout handle that only requires one hand to operate and complies with NHRA/IHRA safety rules. The Attack shifter includes a LED lit gear position indicator in the top plate, two micro-switches for reverse lights and a neutral safety switch preventing accidental starts when in gear all to keep the engineer happy and your vehicle safe.

Included with this kit is an Aeroflow Performance 5-foot-long race shifter cable, all necessary hardware, detailed instructions for an easy installation you can do at home, cable brackets and transmission shifter levers to suit the following automatic transmissions:

- GM Powerglide (Only included with AF72-9020 shifter or sold separately AF72-9051), TH350, TH400, 700R4, 200R4, 4L60, 4L60E - 4L80E without PRNDL switch (4L60E, 4L65E, 4L80E, 4L85E with PRNDL switch brackets sold separately, AF72-9052)
- Ford C4, C5, C6 (AOD brackets sold separately, AF72-9055)
- Chrysler 1966 and later Torqueflite A727 and A904

Overall dimensions: 240mm (9.44") Length x 70mm (2.75") Width x 275mm (10.82") Total Height.

BANG SHIFT GATE PLATES

Bang Shift replacement shifter gate plates are specifically designed to suit the range of Attack gate shifters that will help you move into gear. These hardened steel gate plates are precision-cut from heavy-duty steel and finished in dichromate for added durability. They are a replacement bolt on option to replace your old worn gate plates, convert your standard-pattern shifters, or use reverse-style transmission valve bodies when upgrading or swapping out to a new transmission.

AF72-9960	2 Speed Forward and Reverse Pattern Gate Plate
AF72-9961	3 Speed Forward Pattern Gate Plate
AF72-9962	3 Speed Reverse Pattern Gate Plate
AF72-9963	4 Speed Forward Pattern Gate Plate

BANG SHIFT EXTENDED LOCKOUT COVER

LOCKOUT COVER

Billet reverse extended lockout cover with two new screws to suit Bang Shift Ratchet Shifters including Pistol, Nitro and Attack gated shifter. Great if using our bare shifters in a factory console. This extended lever will allow it to stick above the factory boot. This will extend over the original lockout cover by 30mm.

Dimensions:
Height From Top Bolt - 35mm Overall Height - 63mm
Overall Width - 15mm Height from Base of Shifter - 169mm

AF72-9921	Silver Finish
AF72-9921BLK	Black Finish

BANG SHIFT PISTOL GRIP DUAL BUTTON HANDLE

BUTTON HANDLE

These pistol grip side plates from Aeroflow Performance are constructed from CNC billet aluminium. They are designed to suit either the Pistol or the Attack Bang Shift shifters. Both left and right-side plates are available in both Silver and Black to mix and match your shifter. Another functional right hand drive side grip plate that is sold separately features two bare button bosses. This will allow you to choose either a 12v momentary button (AF72-9906BLK) or a 12v ON/Off button (AF72-9907BLK). These can be used for activating a trans brake, two step ignition, line lock, NOS or other accessories requiring 12-volt power.

Quicksilver

Ratchet 3 and 4 Speed

- Floor mount application. Base can be trimmed to custom fit any floor
- Cable operated for quick installation and accurate shifting
- Reverse lockout feature
- Includes neutral safety switch, back-up light switch, lighted gear indicator, chrome knob and cable
- Can be used with a reverse pattern valve body
- You can't miss a gear

Ratchet action shifter provides performance shifting without a trigger. To get into park or reverse from drive lift knob/stick assembly, move forward to position.

GM TH400, 350, 250, 200, FORD C4, C6 & AOD (AODreq. 40496 inst kit), CHRYS '66 & Later Torqueflite 727 & 904 BM80683

Quicksilver Console Shifter

The B&M console Quicksilver shifter has been designed for a perfect fit in the factory automatic centre console for 1973 to 1981 Chevrolet Camaros and 1970 to 1981 Pontiac Firebirds. The smooth ratcheting action and good looks of the Quicksilver shifter puts everyone on notice that you're serious about performance and style. Installation is quick, clean and easy with detailed installation instructions.

- Factory Cable Operated
 - Chrome Plated Cover
 - High Performance Ratchet Action
 - Reverse Lockout Feature meets NHRA and IHRA Requirements
- Fits: 1973 to 1981 Chevrolet Camaro and 1970 to 1981 Pontiac Firebird. Compatible with GMTH350/400/700R4/4L60/4L60E/4L65E/4L80E/4L85E
BM80688 Quicksilver Console Shifter

Sport Shifter

Detent 3 and 4 Speed

• Base can be trimmed to custom fit any floor
• Neutral safety switch, back-up light switch, lighted gear indicator, and T-Handle and cable. The Sport Shifter may be a low cost alternative to B&M's top of the line MegaShifter - but it performs as if it was twice the price! The Sport Shifter is not a ratchet shifter and not intended for racing applications, but it makes a perfect addition to any street machine making daily driving something to look forward to.

Featuring a simple detent action between First, Second, High and Neutral, a lit gear indicator, black plastic T-handle, neutral safety switch, backup light switch and flat aluminium stick.

Hard Core Bandit Shifter

• Narrow styled billet aluminium housing
• Includes polished blade style stick assembly

• Includes neutral safety switch & backup light switch

All you have to do is look.

The new Hard Core Bandit is

one sweet piece of shifter technology. It's got the look

and feel of our Pro Bandit race shifter.

If you want to give your vehicle that race 'vibe', but want to retain all the driveability of a street shifter - this is the shifter for you!

Like the Hi-Tek Bandit, this features a polished billet aluminium housing and narrow styling. It's cable operated and easy to install with a unique hidden mounting system. Includes neutral safety switch, backup light switch and blade type stick.

STEALTH PRO BANDIT RACE - BLACK

The ultimate narrow profile black anodized racing shifter, with a rear exiting cable, featuring a gate type mechanism. Narrow, lightweight, easy to operate and fully polished. The CNC machined housing provides a mounting location for CO2 ram cylinder or electric solenoid. Includes 8' Super Duty Race cable, Powerglide Pro Lever, quick disconnect and cable extension.

• Narrow Design with No Knobs • Lightweight Mechanism

• Simple Operation • Reverse Exit Cable Design

GM Powerglide **BM81112**

Magnum Grip Pro Bandit

The cutting-edge Magnum Grip design, coupled with the race tested performance of the Pro Bandit shifter, is an unbeatable combination. Complete kit includes the features of the standard Pro Bandit plus the billet aluminium Magnum Grip handle. Includes 8' super duty race cable, B&M P/G pro lever, Quick Disconnect and cable extension (CO2 or electric solenoid may be used on this shifter for a P/G transmission). All Bandit shifters use the same gate plates as found in the Pro Stick shifters

Hammer Shifter

- Unique multi-position trigger for user comfort in various shifter positions
 - Universal floor mount application. Base can be trimmed to custom fit any floor
 - Cable operated for quick installation and accurate shifting
 - Reverse lockout feature
 - Includes neutral safety switch, back-up light switch, lighted gear indicator and polished aluminium T-Handle and cable
 - Can be used with a reverse pattern valve body
- B&M introduces the Hammer, a revolution in shifter design. The ergonomics of this shifter were created by a world-renowned consulting firm specialising in human motion studies. The ergonomically designed Hammer-Head handle comfortably fits small to large hands and provides the appropriate wrist angle. The unique multi-position trigger is spoon-shaped for easier finger operation in a multitude of T-handle positions. This has resulted in a shifter which is perfect for all new generation vehicles and street rods where style is not just form, but function.

Mega Shifter

- Ratchet 3 and 4 Speed
 - Universal floor mount application. Base can be trimmed to custom fit any floor
 - Cable operated for quick installation and accurate shifting
 - Reverse lockout feature
 - Includes neutral safety switch, back-up light switch, lighted gear indicator and polished aluminium T-Handle and cable
 - Can be used with a reverse pattern valve body
- The Mega Shifter is one of B&M's most popular shifters due to its manual 4-speed look and ratchet action. Ideally suited for most applications.

Console Megashifter for General Motors - 1982-1992 Camaro and Firebirds

- Same great features as the Megashifter, but designed to fit factory console applications! Got a Camaro or Firebird with a console shifter? You can have B&M shifter performance with the Console MegaShifter! This shifter features full ratchet action performance, a lighted gear position indicator, chrome tick and trigger assembly, as well as a satin aluminium B&M T-handle. The Console MegaShifter has all the features of the classic universal model that made it the most popular aftermarket automatic shifter around!
- Application
 General Motors - '82-'92 Camaro and Firebirds (will not fit '88-'92 Firebird Formula) TH400, 350, 200 & 700-R4, 4L60, 4L60E, 4L65E.

Truck Mega Shifter

- Universal floor mount application. Base can be trimmed to custom fit any floor
 - Cable operated for quick installation and accurate shifting
 - Reverse lockout feature
 - Includes neutral safety switch, back-up light switch, lighted gear indicator and polished aluminium T-Handle and cable. The classic MegaShifter in a configuration that will fit your light truck.
- All the things you expect in a B&M shifter are right here and ready to install in your truck. The truck MegaShifter includes a taller base and an adjustable floor mount bracket for proper installation.

V-MATIC 3 SHIFTER 3 & 4 SPEED

The V-Matic 3 shifter is a front exit cable actuating shifter designed for most 3 and 4 speed automatic transmission. It is designed with a park and reverse lock trigger actuating system that allows smooth and flawless ratcheting through the forward gears. The universal base design allows for floor mount and can be trimmed to custom fit any floor. The forward exit cable is designed for quick installation and accurate shifting. And the reverse lockout trigger feature meets NHRA and IHRA requirements. The shifter also includes neutral safety switch, backup light switch, a lighted gear indicator, and brushed aluminum Hurst T-handle. Can be used with reverse pattern valve body.

PISTOL-GRIP QUARTER STICK

The Hurst Pistol-Grip Quarter Stick Shifter is designed for a firm comfortable natural grip, providing a positive feel when shifting. This shifter has all of the same award winning features and qualities of our existing Quarter Stick automatic shifter, including controlled detent activation, one-hand operated spring loaded reverse Loc/Out mechanism, and neutral safety switch. The pistol-grip handle is CNC-machined from billet aluminum for exceptional strength, and features a precision snap-action switch that is ideal for operating a Hurst Roll/Control, nitrous system or trans brake.

TCI RHD FAST-GATE SHIFTER

The TCI Right Hand Drive FAST-GATE Shifter features a universal design that can be mounted in virtually any 3- or 4-speed right hand drive application. The shifter's sturdy construction is capable of withstanding the demands of racing, yet its stylish and durable injection molded cover looks classy in street applications. Stamped components ensure smooth, accurate movements when shifting, and a reverse lockout mechanism eliminates the chance of transmission damage from accidentally shifting into reverse. The shifter comes with a black cover, shifter cable and all required hardware for a simple installation, so there is no need to buy extra accessory pieces. Economically priced but designed with the high quality and engineering of an expensive shifter, the TCI Right Hand Drive FAST-GATE Shifter is the perfect shifter for U.S. import tuners or anyone in the U.K., Australia and other left lane driving countries.

TCI DIABLO BLACKOUT SHIFTER

The patent-pending TCI Diablo Shifter is the most versatile on the market and includes all components needed for installation in nearly any GM, Ford or Chrysler. The design allows set up for either a front- or rear-cable exit and can be configured for two-, three-, four- or six-speed transmissions in both forward and reverse shift patterns. Upgrade to a two-button design for controlling nitrous, transbrake or shift points. The shifter housing is made from an aluminium extrusion for light weight and durability for street and race-duty applications. Units are also available without a cover for console-mounting, and in a Blackout version.

- Utilize front- or rear-cable exit
- Configure for 2-, 3- 4- or 6-speed transmissions w/ forward or reverse shift pattern
- Upgraded to a 2-button design for controlling nitrous, transbrake or shift points
- Everything needed for installation on common Ford, GM & Chrysler transmissions

SHIFTER SOLENOID KITS

Pro Stick / Quarter Stick Solenoid Shifter

The SS5 fits B&M Pro Stick front & rear exit cable, Hurst Quarter Stick 1 front exit cable and Hurst Pistol Grip front exit cable shifters with 2 speed, forward pattern transmissions. Comes complete with black anodized mounting bracket and all hardware.

- DE-SS5 Solenoid shifter,**
2 speed for B&M Pro Stick,
Hurst quarter stick and Hurst pistol grip
- DE-SS5RPM Solenoid shifter,** 2 speed for B&M Pro Stick,
Hurst quarter stick and Hurst pistol grip with RPM switch

Electric Shifter Solenoids

Our solenoid shifters automatically shift the transmission at your preset rpm or preset time, improving the E.T. consistency of any automatic transmission race car. You're able to keep both hands on the steering wheel and concentrate on winning instead of shifting. **SHIFTERS ARE NOT INCLUDED**

B&M Pro Bandit solenoid shifter

The Dedenbear SS4 fits the popular B&M Pro Bandit 2 speed shifter. Comes complete with black anodized mounting bracket and all hardware.

- DE-SS4 Solenoid Shifter,** 2 speed for B&M ProBandit
- DE-SS4RPM Solenoid Shifter,**
2 speed for B&M ProBandit with RPM switch

Universal Solenoid Shifter

The universal bracket mounts to the floor behind any forward pattern powerglide shifter. The slotted bracket allows for solenoid adjustment to tailor to any shifter.

- DE-SS2 Solenoid Shifter,**
2 speed without RPM switch
- DE-SS2RPM Solenoid Shifter,**
2 speed with RPM switch

AB10K

CO2 Bottles & Components

The Dedenbear CO2 bottles are for air operated shifters and other air operated accessories such as magneto kill switches. The CO2 bottle kit includes a 10 oz bottle, bottle valve, regulator with gauges and tubing.

Description	Part No.
Complete 10 oz Bottle Kit	DE-AB10K
Bottle & Valve Only - 2.5 lb	DE-AB25V
Regulator with Gauges	DE-ABR
Safety Burst Valve (Female Thread)	DE-ABVS
Safety Burst Valve (male Thread)	DE-ABVSM

0-3000 psi	
Low Pressure Gauge for CO2 Regulator	DE-GLP
0-160 psi	
Quad Ring Seal for CO2 Regulator	DE-QRABR
Regulator Repair Kit for ABR	DE-RKABR

SOLENOID SHIFTING KIT

The Hurst Electric Solenoid Shifting Kit is designed to automatically complete the 1st to 2nd gear change, increasing shifting reliability and improving E.T. consistency.

- Engineered for forward pattern Hurst Quarter Stick and Pistol-Grip shifters.
- Shifting is controlled when used with an rpm activated switch or manually activated push button.
- The solenoid features a spring activated plunger.
- Kit includes solenoid, aluminium mounting bracket, hardware, fuse and electrical connectors.

Solenoid Shifting Kit

HU2260020

SHIFTER MOUNTING PLATES

SHIFTER MOUNTING ACCESSORIES

These Aeroflow Performance shifter mounting options are the ideal way for getting your Aeroflow shifter or other similar branded shifters down below console level to run either a factory console or just for that cleaner look. The user can get their new shifter mounting in that perfect spot on top of your transmission tunnel or even under your factory console for that OEM look. They come powder coated black for extra durability and made from the quality steel construction that won't twist or flex under hard shifting. Available for Holden Commodore models VB-VK, VL-VS and VT/VX/VY/VZ

NOTE: These drop boxes are a universal design and may require modifications to be made to your console surround for best fitment depending on shifter choice.

NOTE: Best suited for ratchet style shifters as some shifters may not work due to the throw of the handle.

- AF72-9800** Shifter drop box to suit VB-VK commodore
- AF72-9801** Shifter drop box to suit VL-VS commodore
- AF72-9804** Shifter DROP BOX to suit VE-VF commodore
- AF72-9802** Mounting plate to suit VT-VX-VY-VZ commodore
- AF72-9803** Shifter mounting plate to suit VE-VF commodore

AUTO SHIFTER & TRANS PARTS

TH400 Kickdown Switch

Designed to activate the electric kickdown on the Turbo 400, this kit is required when converting from a Turbo 350 or Turbo 700 with a cable operated kickdown. Uses stock OEM bracketry and includes a heavy duty switch, actuator rod and spring.

TH400 Kickdown Switch

HU2488605

Adjustable Vacuum Modulator

This modulator is adjustable, allowing you to tailor shift points within a range of 2-4 mph. Comes adjusted for normal shift points. Fits GM TH350 & TH400 transmissions.

Adjustable Vacuum Modulator

HU6500001

NEUTRAL/PARK SAFETY SWITCH

Kit includes switch and mounting hardware. Easy installation for all existing Quarter Sticks. (Newer Quarter Sticks and Pistol Grip shifters feature the switch installed from the factory.) Fits front and rear exit cable shifters.

Neutral/Park Safety Switch

HU2488600

REVERSE LIGHT SWITCH

Kit includes reverse light switch and hardware. Easy installation for all Quarter Stick and Pistol Grip shifters having front cable exit.

Reverse Light Switch

HU2488601

NEUTRAL SAFETY/BACKUP SWITCH

This kit is engineered to perform as a neutral safety switch or backup-light switch by using one of two triggers; levers included. Fits GM Turbo 350 and 400 transmissions as well as the 700 R4

PW80174

SHIFTER BRACKET

CABLE END KIT

The Aeroflow swivel & pin kit is designed to thread onto the end of your shifter cable and push through your transmission shift bracket. They will allow your shifter to keep operating correctly when the original swivel is worn out and makes shifting difficult.

AF72-5054

NEUTRAL /

REVERSE SAFETY

SWITCH

This safety switch fits into your shifter to stop you being able to start the vehicle while you're in gear. When installed correctly the switch only allows the vehicle to start in park or neutral. Also activates reverse lights. Suits B&M shifters.

Indy Shifter Universal 4-Speed Shifter

Hurst/Indy 4-Speed Shifter Kits are designed to be used on most popular 4-Speed transmissions and a wide variety of cars. Applications are determined by transmissions and an exclusive engineered mounting design, making them adaptable to many popular passenger car floor pans.

FEATURES AND BENEFITS

- Fits most popular passenger car floor pans.
- Narrow spring loaded gate for ease of operation.
- Heat treated, plated parts for strength and durability.
- 7-1/2" tall chrome plated stick provides short precise throws.
- Complete with all hardware, linkage and easy to follow installation guide. NOTE: The high mounting location of these kits more than often eliminates their use with factory consoles. Trim modifications to floor pans is often necessary.

2015-2017 MUSTANG INDY SHIFTER

Hurst introduces their new manual Indy shifter for 2015-2017 Ford Mustang models with MT-82 6-Speed transmission. This includes models with the 5.0L, 2.3L and 3.7L engines. As an Indy model, this shifter provides a noticeable amount of throw reduction and a firmer, crisper feel, all while retaining the factory reverse lockout collar and function. This shifter includes a replacement stick, reverse lockout slider, urethane rear mount and a classic black Hurst round ball knob. This Indy shifter is backed by a Lifetime Limited Warranty.

- 18% Throw Reduction
- Accommodates Factory Reverse Lockout
- Classic Hurst Black Shift Knob
- CNC Machined Billet Steel Parts

2015-2017 Mustang Indy 6-Speed Shifter HU3916036

2015-2017 MUSTANG

COMPETITION PLUS SHIFTER

The 2015-2017 Mustang Hurst Competition Plus Shifter utilizes a multi-link-type mechanism to achieve the perfect combination for a short throw shifter, reducing shift throw by 38% from front to back, while maintaining a smooth silky side-to-side shift that is barely reduced resulting in close to full side-to-side resolution. A billet steel, chrome plated upper stick and a classic white knob helps accentuate the already fresh looking interior. Positioned in-line with the classic Hurst chrome plated flat blade stick is a chrome plated trigger rod. This trigger rod not only functions as part of the reverse lockout feature, but truly adds style points to the interior. Don't settle for a plain shifter, life is just too short!

- Trigger Operated Reverse Lockout
- 38% Throw Reduction
- Classic Hurst Styling
- CNC Machined Billet Steel
- New Multi-Link Shifter Design

2015-2017 Mustang Comp Plus 6-Speed Shifter HU3916037

SHIFTER CABLES

STANDARD SHIFTER CABLES

These 5 Foot standard replacement shifter cables for Aeroflow Performance Bullet shifters, most B&M shifters and Hurst shifters are a great alternative from Aeroflow Performance. They are designed with enough clearance to reduce backlash with a 6.35mm (.250") "long-lay" outer jacket for durability which is less-likely to kink during operation. The cable features an eyelet at one end to connect to the shifter, a 10-32 threaded end at the transmission side of the cable. This is the standard cable supplied with the Aeroflow Bullet shifter, most B&M shifters and Hurst Pro-Matic.

AF72-1000	Grey	Suits Hurst Pro-matic and V-matic Shifters
AF72-1001	Black	Suits Aeroflow Bullet and B&M shifters

RACE SHIFTER CABLES

This Aeroflow Performance hard-core heavy duty Race 5 Foot shifter cable is the must have cable weather it's a street car or a race car. With a large 9.52mm (3/8") outer diameter cable housing that is pre-lubed with HPRE oil for smooth operation. They are designed with enough clearance to reduce backlash with a 9.52mm (.375") "long-lay" outer jacket for durability which is less-likely to kink during operation. The cable features an eyelet at one end to connect to the shifter, a 10-32 threaded end at the transmission side of the cable with rotary swaged ends. This is the standard cable supplied with the Aeroflow Nitro and Pistol and some B&M shifters.

GFB SHORT SHIFT KITS
Less time changing gears means more time on the throttle. Working on a different principle to other products on the market, the GFB Short Shifter can be adjusted to reduce the throw by up to 40% over standard (more for early models), significantly shorter than even an STI! Like all GFB components, the Short Shifter is well engineered and manufactured from the highest grade materials. Don't be fooled by similar (or even greater) claims of such dramatic throw reduction, GFB's Short Shifter IS the shortest kit you can bolt to your car! In fact, the LONGEST setting on our shifter is STILL SHORTER than everyone else's.

Subaru WRX 5-Speed MY97 onwards **GFB4001**
Subaru WRX STi 6 speed (up to 40% reduction) **GFB4002**
Subaru WRX STi 6 speed (up to 20% reduction) **GFB4003**

SHIFTER STICKS & LEVERS

Hurst Shift Levers

These shifter sticks fit all manual shifters with the 7/8" center to center bolt pattern which includes Hurst manual shifters and most OEM and aftermarket shifters for Tremec and Borg Warner transmissions. These levers have a 3/8"-16 knob thread except for the black alloy lever which has 7/16"-20 thread.

McLeod Shifter Levers

These shifter levers fit all manual shifters with the 7/8" center to center bolt pattern which includes Hurst manual shifters and most OEM and aftermarket shifters for Tremec and Borg Warner transmissions. These levers have a 3/8"-24 knob thread and extra lower bolt holes that allow the angle of the lever to be adjusted.

S-Shaped Shift Lever - 6" Tall **MC88-001**
1/2 Moon Shaped Shift Lever - 9" Tall **MC88-002**
Straight Shift Lever - 6" Tall **MC88-003**

MANUAL SHIFTER PARTS

ADJUSTABLE CLUTCH FORK PIVOT BALL

The adjustable clutch fork pivot ball is made high strength steel and allows adjustment of clutch fork height for different types of clutch assemblies. Suits all GM bellhousings and is recommended for use with Lakewood Bellhousings.
Adjustable Clutch Fork Pivot Ball - All GM MG3855G

Reverse Light Switch

This switch is designed to be used in conjunction with the OEM back-up lights and the Competition/Plus 4-Speed, Super/Shifter 3 and the Master Shift 3-Speed shifters.
Reverse Light Switch HU2480003

HURST SHIFTER BUSHING KIT

Designed to replace the original shifter bushings and clips for most Hurst 3 and 4-Speed manual shifters except V-Gate. Made from heat treated steel for strength and durability, includes 6 bushings and 6 clips.
Hurst Shifter Bushing Kit MG11

Linkage Bushing Kits

Available in either steel or nylon. Steel bushings are designed to take the punishment of racing applications and provide for longer service. Nylon bushings are designed for street applications and eliminate most of the stick vibrations. These pit packs can be used on the Master Shift 3-Speed and Competition Plus 4-Speed. Kit includes either 7 steel or nylon bushings and spring clips.
Nylon bushings for 3, 4, & 5-speed manuals HU3320001
Steel bushings for 3, 4, & 5-speed manuals HU3327302
Steel bushings for V-Gate 2 only HU3321657
Shift Rod Button HU1193783

SHIFTER BOOTS

Universal Shifter Boot

The B&M universal shifter boot is made from quality black rubber to endure the test of time. Complete with chrome trim ring and mounting hardware.
Base Measures 4-1/8" x 5-1/8"
Universal Shifter Boot BM46102

Universal Shifter Boots

Rubber shifter boots in two sizes for universal applications. Complete with chrome trim ring and mounting hardware.
Small Shifter Boot, 5-5/8" x 6-3/4" RPCR9630
Large Shifter Boot, 7-3/4" x 8-3/4" RPCR9631

Polished Boot Sets

Lokar shifter boots are black Naugahyde and all sets include a boot, polished stainless base ring, or billet aluminium ring with ball-milled edge and stainless screws. Classic Shifter Boots include rubber bezel to eliminate airflow from the floor through the boot and a polished stainless bezel on top of the boot, which fits over the shifter lever. No unsightly pull ties or laces; boot hugs the shifter lever.

SHIFTER BOOTS

B-4 Boot & Plate
Our most popular boot is adaptable to most shifter installations. Complete with chrome trim plate and mounting hardware.
Measures 3-1/2" x 4-1/2"

B-4 Boot & Plate HU1144580

B-1 Boot & Plate
Designed for use with round stick shifters. Complete with chrome ID plate and mounting hardware.
Measures 4-3/8" x 5-1/2"

B-1 Boot & Plate HU1147336

Super/Shifter 3 Boot & Plate
Specially designed for use with Super/Shifter 3 utilizing separate reverse Loc/Out lever. Complete with chrome trim plate and mounting hardware.
Measures 7-3/4" x 8-3/4"

Super/Shifter 3 Boot & Plate HU1140010

Shifter Boot Ring

Billet Specialties Shifter Boot Ring takes style to the next level. Machined from Billet aluminium with neo-mechanical cog styling our Shifter Boot Ring will bring all the interior details together. Includes stainless hardware and is available in two finish options Black Anodized or Polished finish. Fits leather or rubber shift boots.
BS279310 - Polished
BSBLK279310 - Black

Indy Boot & Plate

A popular economy boot. Complete with chrome trim plate and mounting hardware.
Measures 3-1/2" x 4-1/2"

Indy Boot & Plate HU1148429

Super Boot & Plate

Designed for large hole shifter installations. Complete with chrome ID plate and mounting hardware.
Measures 7-3/4" x 8-3/4"

Super Boot & Plate HU114 7494

Linkage Bushing Kits

Available in either steel or nylon. Steel bushings are designed to take the punishment of racing applications and provide for longer service. Nylon bushings are designed for street applications and eliminate most of the stick vibrations. These pit packs can be used on the Master Shift 3-Speed and Competition Plus 4-Speed. Kit includes either 7 steel or nylon bushings and spring clips.
Nylon bushings for 3, 4, & 5-speed manuals HU3320001
Steel bushings for 3, 4, & 5-speed manuals HU3327302

SHIFTER KNOBS

Hurst Equipped Emblem

Based on original HURST blueprints, this Hurst Equipped emblem is an authentic reproduction of the one used on the late '60's muscle cars equipped with a factory Hurst shifter. Made of durable ABS plastic with 3M adhesive tape backing for permanent mounting.
Nominal size is 1-1/4" high by 5-1/4" long. Individually packaged.
Hurst Equipped Emblem HU1361000

Indy Shifter Replacement Knob

High gloss black, high strength plastic. 1-3/4" diameter with a 3/8-16 thread size.
Plain Black Shift Knob, 3/8-16 Thread HU1637200

Classic Shifter Knobs

The Original Hurst Classic design shifter knobs are solid high gloss, high strength plastic with engraved inlaid shift pattern and are 1-3/4" diameter with a molded-in brass thread insert and jam nut.
4-Speed Pattern, 3/8-24 Thread - White HU1630002
4-Speed Pattern, 3/8-24 Thread - Black HU1630102
4-Speed Pattern, 3/8-16 Thread - White HU1630003

6-Speed Pattern, 3/8-16 Thread - White HU1630040
6-Speed Pattern, 3/8-16 Thread - Black HU1630140

MUSTANGS 6 SPEED SHIFT KNOB - WHITE

Hurst's new classic shift knob for the 2015-2017 Mustangs, 2013-2017 Focus ST, 2016-2017 Focus RS, and 2014-2017 Fiesta ST with the manual transmission is a great way to add the classic car look to your modern day car. This 2.25" white-ball knob features the 6 speed shift pattern and the Hurst logo engraved on the sides. The bottom side of the knob features a large pocket recess to accommodate the factory reverse lockout button. **Mustang White 6 Speed M12x1.25 Thread** **HU1630225**

Replacement Shifter Knob

Solid high gloss plastic knob with logo & Molded-in metal thread insert, complete with jam nut. **5 Speed Shifter Knob (3/8-16) Black** **HU1630125**

Hurst Shift Knob, White With Hurst H-Logo

Universal Hurst shift knob ball, white glossy finish with Hurst "H" logo on the top of the ball. **3/8-16, 1/2-20, M10-1.25, M10-1.50, M12-1.25, M12-1.75, M16-1.50** **White Hurst Shifter Knob** **HU1631401**

Shifter Knobs with Switch

Ideal for use with Hurst Roll/Control, trans brake, nitrous oxide systems or other 12 volt accessories. Available in black only. **3/8-16 Thread** **HU1630049**
7/16-20 Thread **HU1630050**

Sidewinder Knob

The Sidewinder shift knob is equipped with a side button switch conveniently located for driver hand comfort in LHD vehicles, which can be used for Roll/Control or nitrous operation. Can also be used in RHD vehicles but the logo will be upside down. **Black with Hurst Logo, 3/8-16" Thread** **HU1630069**

Direct Fit T-Handles

Quality die cast aluminium T-handles. Available in polished or brushed finish with bold HURST identification. Complete with jam nuts. **T-Handle, 7/16-20 Thread - Polished** **HU1538500**

Pistol Grip Shifter Handles

CNC machined from solid billet aluminium, the Hurst Pistol-Grip Shifter Handle is designed to provide a firm comfortable natural grip when shifting, allowing less chance of your hand slipping and missing a shift. Available in natural aluminium finish or an attractive black anodized finish with the Hurst name engraved in contrasting letters. **3/8"-16 & 1/2"-20 Thread - Natural** **HU1536030**
3/8"-16 & 1/2"-20 Thread - Black **HU1536130**
12mm x 1.75 & 16mm x 1.50 Thread - Natural **HU1536000**
12mm x 1.75 & 16mm x 1.50 Thread - Black **HU1536010**

Pistol Grip Shifter Handle with Switch

CNC machined from solid billet aluminium with a natural finish, the Hurst Pistol-Grip Shifter Handle is designed to provide a firm comfortable natural grip when shifting. Equipped with a 12-volt 10 amp capacity normally open snap action switch which can be used for activating a Roll/Control, nitrous or other accessories. One part number fits stock factory shifters in both Mustang w/ 12mm x 1.75 thread and Camaro/Firebird w/ 16mm x 1.50 thread as well as the Hurst Billet/Plus shifters for these applications. **Pistol Grip Handle with Switch** **HU1536200**
3/8-16, 1/2-20, M10-1.25, M10-1.50, M12-1.25, M12-1.75, M16-1.50 Satin Finish **HU1531000**

Hammer Head T-Handle

The same ergonomically designed handle featured on B&M's Hammer Shifter. Fits your hand comfortably while up & down shifting. Chrome aluminium finish with thread adapters fit 1/2-20, 3/8-24, 3/8-16 & 5/16-18 thread shifters. **Hammer Head T-Handle** **BM80741**

T-Handles with Button

Button T-Handle activates B&M Launch Control, any line lock, transbrake or nitrous system. Works with 12 or 16 volt systems. Includes thread inserts to fit 1/2-20, 3/8-24, 3/8-16 and 5/16-18 thread shifters. **T-Handle with Button - Satin** **BM80658**
T-Handle with Button - Chrome **BM80659**

Universal T-Handles

Available in three finishes, B&M Universal T-Handle packages include thread inserts to fit 1/2-20, 3/8-24, 3/8-16 and 5/16-18 thread shifters. B&M also offers a satin T-Handle designed for use in right hand drive vehicles. **Universal T-Handle - Chrome** **BM80643**
Universal T-Handle - Satin **BM80641**
Universal T-Handle - Black Plastic **BM80642**

Universal White Shifter Knob

This high impact stain resistant white knob includes a clear lens and inserts (standard 4 speed pattern, 4 speed pattern with Reverse left and down, 3 speed pattern, Pro Ratchet and Pro Stick). Thread adapters fit 1/2-20, 3/8-24, 3/8-16 and 5/16-18 threads. Fits all B&M and most other shifters with inch threads. **Universal White Shift Knob** **BM46110**

Button Knob

The B&M button knob activates B&M Launch Control, any line lock, transbrake, or nitrous system and works with 12 or 16 volt systems. It includes thread adapters to fit 1/2-20, 3/8-24, 3/8-16 and 5/16-18 threads. Fits all B&M and most other shifters. **Universal Shift Knob with button** **BM46112**

Quicksilver Billet Knob

This CNC machined billet aluminium knob includes an engraved insert featuring the B&M logo. BM80534 includes adapters to fit 3/8-24, 3/8-16, 5/16-18 threads. **Billet Knob (Universal)** **BM80534**
Billet Knob (M12 x1.25 only) **BM80542**

Quicksilver Replacement Knob

Replacement knob for B&M Quicksilver shifters. Knob and insert are sold separately. **Quicksilver Replacement Knob (no insert)** **BM80670**
Quicksilver Knob Insert **BM80669**

Piston Style Shift Knob

Chrome steel piston style shift knob. Includes set screw and allen key. **Chrome Piston Style Shift Knob** **RPCR9312**

Lokar Manual Shift Knobs

2" shifter knobs for 5-speed and 6-speed manual transmissions. Supplied with 3/8-16 and 3/8-24 thread inserts. Engraved with appropriate shift pattern, they are available in Ivory, Black and White. Perfect addition to the Lokar Manual Transmission Shifter Levers. **5-Speed Shift Pattern - Ivory** **LK-SK-6872**
5-Speed Shift Pattern - White **LK-SK-6874**
5-Speed Shift Pattern - Black **LK-SK-6876**
6-Speed Shift Pattern - Ivory **LK-SK-6873**
6-Speed Shift Pattern - White **LK-SK-6875**
6-Speed Shift Pattern - Black **LK-SK-6877**

CHROME BALL SHIFT KNOB

This attractive chrome plated shift knob with Moon logo is 1-3/4" diameter and comes with Nylon bushings and set screws for a universal fit. **Moon Logo Chrome Shift Knob** **MNAA004MN**

MOON ORIGINAL SHIFT KNOBS

Moon original shift knobs measure 2-1/4" diameter and come with 3 NPT bushings 1/4", 3/8" & 1/2". **Black Knob with Black Logo** **MNMP021BBL**
Black Knob with Yellow Logo **MNMP021BYL**
Yellow Knob with Black Logo **MNMP021YBL**
Yellow Knob with Yellow Logo **MNMP021YYL**

AXLES

SOLD AS ONE AXLE ONLY
with fitting kit

FORD 9" CUT TO FIT AXLE KIT

The Aeroflow Performance Ford 9" cut to fit axles are perfect for entry level users and will allow you to build your own custom width rear end easily. They are an induction heat treated forged 4140 steel construction axle with a natural finish and are SOLD AS ONE AXLE only. Axle length is measured from the flange to the end of the splines. The 28 Spline option axles are drilled for 5 studs with a 4.5" wheel bolt pattern. While the 31 Spline options are drilled for 5 studs with 4.5" and 4.75" wheel bolt patterns. All axles use a 0.685" knurl diameter for wheel studs which are included in this kit. The 28 Spline axles require the use of a Ford small bearing end on it which measures 3.375" with a 2.5" offset. The Larger 31 Spline requires the use of the big Ford New Style bearings which measures 3.562" with a 2.5" offset. The center of the axle flange (hub pilot) measures 3.055". The O.D. of axle flange measures 6.158". They are available in 28 Spline with lengths of 28" (711.20mm) and 32" (812.80mm) with a spline length of 4" (101.6mm). The 31 Spline comes in lengths of 26" (660.40mm), 29" (736.90mm), 32" (812.80mm) and 35" (889mm) with a spline length of 4" (101.6mm). It is recommended to have at least 1" (25.4mm) of spline engagement on all axles.

Each axle kit contains the following :

1 x Cut to Fit Axle

5 x 7/16" wheel studs

5 x 1/2" wheel studs

1 x Axle retaining plate

1 x Axle bearing kit

1 x Axle bearing collar.

AF5079-1000 28 spline, 28" total length, 4" spline length

AF5079-1001 28 spline, 32" total length, 4" spline length

AF5079-1006 31 spline, 23" total length, 4" spline length

AF5079-1002 31 spline, 26" total length, 4" spline length

AF5079-1003 31 spline, 29" total length, 4" spline length

AF5079-1004 31 spline, 32" total length, 4" spline length

AF5079-1005 31 spline, 35" total length, 4" spline length

FORD 9" CUT TO FIT 35 SPLINE AXLE KIT

The Aeroflow Performance Ford 9" cut to fit axles are perfect for entry level users and will allow you to build your own custom width rear end easily. They are an induction heat treated forged 4140 steel construction axle with a natural finish and are SOLD AS ONE AXLE only. Axle length is measured from the flange to the end of the splines. Drilled for 5 on 4-1/2", 5 on 4-3/4" and 5 on 5" wheel bolt patterns using 0.685" (17.39mm) knurl diameter for wheel studs which are included.

These axles use the new style big bearing ends on it which measures 3.150" (80mm) with a 2.5" (63.50mm) offset. The hub pilot (centre of the axle flange) measures 2.78" (70.6mm). The O.D. of the axle flange measures 5.93" (150.62mm). The 35 spline is available in one length 31.75" (806.45mm) with the extended spline length of 8" (203.20mm).

Each axle kit contains the following:

1 x Cut to Fit Axle

5 x 7/16" wheel studs

5 x 1/2" wheel studs

1 x Axle retaining plate

1 x Axle bearing kit

1 x Axle bearing collar.

AF5079-1010 35 spline, 31.75" total length, 8" spline length

STRANGE Pro Race Axles

Strange Pro Race axles are forged from Hy-Tuf alloy steel that was originally developed for highly stressed landing gear in military aircraft. The Hy-Tuf forging is a low carbon, high manganese, high-nickel and high molybdenum steel. Strange Pro racing axles are thru-hardened, which allows for a drag racing shaft with an exceptionally high tensile strength (240,000 PSI) while retaining ductility. Strange Pro Race axles are the best value on the market- that's why more drag racing competitors rely on Strange axles than all other brands combined! Strange axles are custom made to order in the USA. Please contact Rocket sales to discuss your specific application.

• Designed for your custom drag racing application

• Involute splines for increased strength

• Forged from Hy-Tuf for optimal grain structure

• Thru-hardened for superior torsional strength

• Five year replacement guarantee for 33, 35 and 40-spline axles

Pro Race (Hy-Tuf) Axles, up to 35-Spline **STA1000**

Pro Race (Hy-Tuf) 40-Spline **STA2000**

Gun-Drilled Lightweight Axles **STA2100**

Pro Race (Hy-Tuf) 40-Spline Solid Axles **STA2100**

Pro Race Hi-Tuf axles any length, splined up to 35,

choice of bolt circle, axle bearings and 2" or 3"

with 1/2-20 stud kit **STP1007**

with 5/8 Stud kit **STP100758**

Strange S/S & S/T Axles

Strange S/S axles are designed to meet the demanding bending loads of street use. Strange S/S axles are manufactured by Strange from modified 1550 steel. Each S/S street axle is induction hardened to its optimal hardness with Strange designed tooling. We manufacture Ford 9" 28-spline axles for low horsepower and lightweight "street-rod" applications. Although our 28-spline S/S axle is stronger than OEM 28-spline shafts -28-spline S/S axle shafts are 38% torsionally weaker in comparison to 31-spline S/S axles. We strongly recommend to upgrade to 31-spline axle shafts for street applications. Strange S/T Series 35-spline axles are designed to meet the rigorous loads of street and strip use. S/T Series axles are identical to S/S axles in everyway except for the massive 1.500" (35-spline) shaft diameter. S/T axles have a three year replacement guarantee against spline breakage. Strange axles are custom made to order in the USA.

- Please contact Rocket sales to discuss your specific application.**
- Designed for your custom street configuration
 - CNC machined from premium forged steel
 - Induction hardened to resist bending loads encountered with street use
 - S/T 35-spline (1.500" shaft diameter) axles are designed for street/strip
 - Radius rings to minimize stress concentrations
- Strange S/S Street Axles, 28, 30, 31 & 33-Spline** STA3100

AXLE FLOATER KITS

Floater Kits

Strange floater kits coupled with a Strange 9"9.50" Ultra Case assembly have become a standard for Pro Mod classes, Blown classes and other abusive drag racing applications. The Strange floater kit provides excellent safety and durability for sportsman and professional drag racers. Each Strange floater axle kit includes; 8.50" or 13.50" long 4130 spindles, steel drive plates, aluminium hubs, forged slotted rotors, Timken bearings, seals, chrome-moly studs and steel lug nuts. Caliper kit and axles are available separately. Strange strongly advises the use of 40-spline axles, due to the tremendous increase of torsional strength, in comparison to 35-spline shafts; therefore, Strange only offers 40-spline floater kits.

- Floater Kit with 8.50" Spindles & 5 x 5.50" PCD** STF2200
Floater Kit with 8.50" Spindles & 5 x 4.75" PCD STF2209

Chrome-Moly Floater Stud STF1278
40-Spline Hy-Tuf Gun Drilled Axle Shaft for Floater Kit (up to 36") STA2040

STRANGE Pro Street Floater Kit

The Strange Pro Touring full floating kit design dramatically increases safety in comparison to a traditional flanged axle assembly. The floater spindle supports vehicle weight and resists cornering, braking, and accelerating loads, leaving the floater axle solely responsible for transmitting torque. A preload spacer between the tapered bearings bolsters maximum spindle nut torque eliminating bearing end play. Zero end play in the bearings eliminates piston knock-back encountered during hard cornering. Compact brake gap (3.50") clears most suspension components located near original housing ends. The Strange Pro Touring floater kit features 2" O.D. chrome moly spindles, 35 spline drive plates, multiple patterns for 4 1/2", 4 3/4", and 5" bolt circles, and 1/2" x 20 press in wheel studs. The floater axles and brake kit are sold separately. The axles are 35 spline to mate to the drive plate, and the inboard splines are made to match your specific carrier. The option for 5/8" x 18 press-in wheel studs also includes stud sleeves, lug nuts and washers.

- Pro Street Floater Kit, 1/2" Wheel Studs** STF5010
Pro Street Floater Kit, 5/8" Wheel Studs STF501058
Custom 35-Spline Floater Axle (each) STA1040

DRAG RACE FLOATER KITS

Strange Drag Race floaterkits coupled with a Strange 9"9.50" Ultra Case assembly have become standard for Pro Mod classes, Blown classes and other abusive drag racing applications. The floater kit provides excellent safety and durability for sportsman and professional drag racers. Each kit includes 4130 chrome moly spindles, steel drive plates, aluminium hubs, rotors, Timken bearings, seals, chrome-moly studs and steel lug nuts. Strange Drag Race floater kits are available with carbon or steel brakes. Floater axles are not included with floater kits, but are available in either solid or gun drilled. Vehicles requiring a floater kit are under extreme forces. Due to the tremendous increase in torsional strength of a 40-spline axle in comparison to 35, Strange only offers 40 spline floater kits. Custom axles can be made with a smaller spline on the spool end if required, but axle torsional strength will be compromised.

4-3/4" Bolt circle floater kit with stainless steel brake kit STF22064

WILWOOD BRAKE KITS FOR STRANGE PRO STREET FLOATER

Wilwood disc brake kits for the Strange Pro Street floater kit feature an internal shoe parking brake system and a range of rotor and calliper options including dust boot callipers and a low profile kit for clearance with 14" wheels or 15" double bead lock wheels.

AXLE TUBES & HOUSINGS

Housing Ends

Strange housing ends are machined from forged steel. These premium grade housing ends are ideal for new or narrowed housings, permitting an optimal mounting surface. Strange ends are designed to be easily butt welded and are supplied as pairs.

Small Ford (Early Mustang), 2.835" ID, 1.00" Wide STH1134
Big Ford (Early) w/1/2" Holes, 3.150" ID, 1.300" Wide STH1135
Big Ford (Late) w/3/8" Holes, 3.150" ID, 1.300" Wide STH1137

Rear Axle Housing Ends

Whether narrowing a rear axle housing for bigger tires or just building a new housing for your street car, you will need housing ends to complete the project. You could re-use the old housing ends but most of the time they are either too rusty or damaged from the removal process

- Extra Thick Flange • Sold in pairs • Forged • Welding required
- Fully CNC machined

Big Ford with .515" Bolt Holes, 3.150" Bore MOC9505
Dana 60 Mopar 8-3/4", 3/8"-24, 2.875" Bore MOC9510

FORD 9" BILLET AXLE TUBE ENDS

Aeroflow offers a range of billet steel Ford 9" axle tube ends to configure your diff housing to one of three bearing options. Stepped to seat into the end of Aeroflow's axle tubes, they weld on to finish off your heavy duty diff housing.

Sold as pairs.
AF5078-1002 Late big Ford bearings
AF5078-1003 Early big Ford bearings
AF5078-1004 Small Ford bearings

FORD 9" UNIVERSAL AXLE TUBES

These Aeroflow Ford 9" axle tubes are 76mm (3") in diameter with a thick 4.77mm (0.188") wall. They have a total length of 53.5cm (21"). They are sold as a pair.

AF5078-1001 Ford 9" universal axle tubes

REAR AXLE SPRING PERCHES

Aeroflow's rear housing mounts are ideal for installing a new rear-end housing or relocating rear springs. Precision stamped for easy weld-on installation. They provide a strong spring mount, made from 5mm (3/16") thick mild steel, they fit 76mm (3") diameter axle tubes and are 63mm (2-1/2") wide. Sold as pairs.

AF72-1500 Rear axle spring perches.

FORD 9 INCH DIFF BRACE

9" Ford diff housings are very popular in drag racing because of their weight as well as the strength they provide. The only disadvantage to these standard housings is the tendency to flex and bow under hard acceleration. This force tends to flex the rear housing out of shape. To combat this flex, Aeroflow Performance have designed this 9" Ford diff housing brace to suit the factory housing or our own coemption diff housing. This two-piece brace welds directly to the rear housing, triangulating the main housing with the axle tubes to eliminate any flex. These are made from 1/8" thick mild steel and will require welding to your diff housing.

AF5078-1010 Weld on Diff Housing Brace

Back Braces

Rugged 1/8" thick construction adds extra strength to rear axle housing to increase rigidity and eliminate flexing when using large racing slicks in high horsepower, high torque vehicles. Eliminating flex increases the amount of power directed to the tyres for improved ET's Computer punched and contoured to provide a precise fit for cleaner welds and reduced fabrication time. Available in chrome moly and mild steel, 25" wide. Welding required.

- Mild Steel, Fits Ford & Strange 9" Housings **MOC3405**
- Chrome Moly, Fits MOC9100 Housing **MOC9105**
- Mild Steel, Fits MOC9200 Housing **MOC9205**

Fabricated Rear Axle Housings

For the ultimate in strength, weight savings and a professional look, nothing beats our Fabricated Rear Axle Housings. The triangulated design provides the structural integrity required for today's race cars. And the 9" Ford configuration allows the use of a variety of popular centre sections. Each housing is CAD designed and CNC manufactured in-house with a 1/8" thick, one piece outer shell and a 1/4" face plate to ensure maximum strength. It is then fixture welded inside and out to ensure that proper weld penetration has been accomplished.

- Increased strength over three-piece stock housings
- Offered in 4130 Chrome Moly or Mild Steel versions
- Exterior welds ground smooth to eliminate stress risers
- 1/4" face plate for added strength
- Face plate tapped for 3/8" press-in studs
- Includes drain plug, filler plug and breather bung
- Carrier Stud Kit No. MOC9006 available separately

- Chrome Moly, 60.75" Width, No Housing Ends **MOC9100**
- Mild Steel, 60.75" Width, No Housing Ends **MOC9200**
- Mild Steel, 27.60" Width, Forged Housing Ends **MOC9001**

DRAGSTER Rear Axle Housings

Competition Engineering has designed and built a rear end housing far stronger and more accurately produced than any other housing on the market. The .125" thick sheet metal shell is designed with over lapping joints that provides two weld seams. This greatly improves the strength as compared to butt-welded housing shells. These housings come in 26.00" flange to flange widths. Built to withstand Advanced E.T. applications, internal bulkheads stiffen the shell to the face plates to prevent any movement and add strength around the housing mounting brackets.

- CNC machined 3/8" thick face plate
- Comes with a -6 AN drain plug and 1/8" NPT vent fitting
- Comes with aluminium o-ring filler cap
- All housings have machined symmetrical housing ends
- Carrier Stud Kit No. MOC9006 available separately

- Chrome Moly Dragster Housing, 26.00" Width **MOC9003**
- Mild Steel Dragster Housing, 26.00" Width **MOC9004**

Steel Housings

Strange fully welded steel housings are available in several configurations. We recommend 3.250" tubing for its increased (23%) strength, in comparison to 3" tubing; however, certain ladder bar and 4-link configurations may require 3" tubing. Back brace housings are ideal for drag racing applications. In general, we recommend a back brace for vehicles that are quicker than 9 seconds (1/4 mile); although, a stiffer housing is usually advantageous for most drag racing applications. Housing ends are not included and must be purchased separately.

- Features:
- Slotted Housing for Full Tube Engagement- More Rigid Foundation
 - Reinforced Face Plate • Greater Weld Contact Area
 - Reduces Tube and Centre Section Flex

- Description
- 9" Housing for 3.00" Tube - Tubes Not Included **Part No. STH1110**
 - 9" Housing for 3.25" Tube - Tubes Not Included **STH1112**
 - 9" Housing with 3.25" Tubes, Filler & Drain Assembly **STH1115**
 - 9" Housing with 3.25" Tubes, Filler, Drain Assembly And Back Brace **STH1117**
 - 9" Housing With 3" Tubes No Ends, Filler, Drain **STHF9**

ULTRA FAB HOUSINGS

Ultra Fab housing centres are constructed from .125" alloy steel with a heavy duty .375" faceplate. Triangulated design provides rigid housing tube support for more consistent and straighter launches. Internal radial gusset plates brace the end of the housing tube and increase overall housing stiffness. Tube insertion locations are slotted for 5" to allow complete and secure welding of the tubes to the housing. The housing is designed to provide the clearance necessary for cases with heavy duty main caps and also allowing the use of 9", 9 1/2", and 10" gear sets. All housing centres come equipped with centre section studs installed. Black powder coated finish is optional.

- Description
- Housing Centre for use with 3" OD Tubes **Part Number STH1110UF**
 - Housing Centre for use with 3-1/4" OD Tubes **STH1112UF**
 - Housing with Fill, Drain & Tubes, No Ends **STHF9UF**
 - Housing with Fill, Drain & Ends **STHF9EUF**
 - Housing with Fill, Drain, Ends & Leaf Spring Mounts **STHF9LEUF**

FORD 9" DIFF HOUSING

Aeroflow's Ford 9" housing is designed to be the ultimate in versatility for car builders. It's low-profile design is 11 1/4" (285.75mm) tall, 23" (584.2mm) wide, and weighs 21.6 lbs. / (11.81kg) and features a traditional style back cover. Additional features included a CNC machined housing flange for added strength that is notched for large diameter ring gears. The housing accommodates 3" axle tubes with over 4" of tube engagement, and rosette weld holes for strength. Centre studs are included and installed ready to go.

- AF5078-1000**

FORD 9" COMPETITION DIFF HOUSING

Aeroflow competition Ford 9" diff housings allow you to add all of the necessary components for a high-strength rear-end. These housings are made from a thicker gauge of steel than a stock housing, providing more strength and a better base for welding brackets without housing distortion. With a traditional style notch back cover and reinforced with a CNC machined housing flange that will allow you to weld the axle tubes on the inside and outside for additional strength to reduce axle tube flex. The housings accepts either a 76.3mm (3") or 82.55mm (3-1/4") axle tubes with over 101.6mm (4") of tube engagement. Centre studs are included and installed ready to go.

- Dimensions :
- Tall - 287mm (11-19/64")
 - Width - 584mm (23")
 - Weight - 11.52kg (25.4lbs)
 - AF5078-1005 Suits 76.2mm (3") Tubes**
 - AF5078-1006 Suits 83mm (3-1/4") Tubes**

DIFF HOUSINGS ACCESSORIES

WELD ON DIFF FILLER

1-1/2" O.D. steel bung with black anodised aluminium cap easy to weld to axle housing for use as diff oil filler.

Part No Description

- AF461-20** 1.5" O.D. Weld-on diff breather

FILL PLUG ASSEMBLY

Weld-On aluminium 1.620" O.D x .625" tall bung with 1.800" O.D knurled cap **STH1116B**

Rear End/Water Fill Cap Kits

Universal Kits, available with steel or 6061-T6 aluminium bung, can be used on power steering tanks, radiators, overflow tanks, rear ends, filler neck plates, and other locations to replenish fluid or serve as an inspection port. Bung with 1-1/4"-12 UNF threads and 1-1/2" o.d. can be welded to any suitable tank or plate. The cap, manufactured from 6061-T6 aluminium, is knurled for easy-grip removal and replacement. Includes two O-Ring washers (one spare) for leak free sealing.

Rear End/Water Fill Cap Kit, Aluminium Bung **MO85282**

MOROSO Weld-In Fill Cap

Universal kits can be used on power steering tanks, radiator overflow tanks, valve covers, rear ends, filler neck plates, and other locations to replenish fluid, or serve as an inspection port. Bungs can be welded to any suitable tank or plate 1-3/8"-12UNF threads, 2.6" O.D. Includes O-rings for a leak free seal.

Moroso Weld-In Fill Cap **MO85283**

DIFF BREATHER

Breathers are finished in zinc with sintered bronze aeration. Perfect for use as diff breather, atmosphere vent and other applications.

- AF462-02** 1/8" NPT
- AF462-04** 7/16" UNF

Stainless Steel Rear End Breather

This CNC machined and fully polished S/S component is a direct replacement for the 9" Ford rear end breather. It has a 7/16-20 mounting thread. **AHRP62705**

DIFF BREATHER

Perfect for use as diff breather, atmosphere vent and other applications where it is required to release pressure.
AF5075-1005 1/8" NPT diff Breather

DIFF CENTRES & COMPONENTS

Complete 9" Centre Sections

Each Strange centre section is meticulously assembled by a set-up department unsurpassed in the rear end market- the same department that fastidiously assembles \$20,000 Top Fuel rear ends. The pride instilled into a Strange set-up is evident with the set-up technician's signature and date engraved into each ring gear. Each assembly is relentlessly scrutinized by our experienced set-up department- including massaging the ring and pinion in order to optimize tooth contact. Complete centre section assemblies are shipped in a protective Transport case.

Performance Street - 28 Spline

Fully assembled centre sections including Strange S-series case, 28-Spline Detroit Truetrac, Forged Black pinion support and S-series yoke. Available with 3.50-6.50 gear ratios.
S-Series Centre with 28-Spline LSD, 3.50:1 STPRF130-350
S-Series Centre with 28-Spline LSD, 3.70:1 STPRF130-370
S-Series Centre with 28-Spline LSD, 4.11:1 STPRF130-411

Performance Street - 31 Spline

Fully assembled centre sections including Strange Pro-Iron case, 31-Spline Detroit Truetrac, Forged Black pinion support and chrome-moly yoke. Available with 3.50-6.50 gear ratios.
Pro-Iron Centre with 31-Spline Truetrac, 3.50:1 STPRF120T 350
Pro-Iron Centre with 31-Spline Truetrac, 3.70:1 STPRF120T 370

Drag Racing Applications

Fully assembled centre sections including Strange Pro-Iron or lightweight aluminium carrier, lightweight 31 or 35 spline spool, forged aluminium pinion support and chrome-moly yoke. Available with 3.50-6.50 standard or small stem PRO gear sets.
Pro-Iron Centre with 3.50-6.50 STD Gear Set STPRF105
Pro-Iron Centre with 4.86-6.50 PRO Gear Set STPRF115
Aluminium Centre with 3.50-6.50 STD Gear Set STPRF55
Aluminium Centre with 4.86-6.50 PRO Gear Set STPRF165

COMPLETE HD PRO ALUMINIUM CASE

The HD Pro Aluminium case equipped with an Upgraded 35-Spline Truetrac unit can be used where weight savings or cosmetic appearance is important without sacrificing any gear life. In fact, gear life is increased over OEM cast and nodular iron units due to the rigidity of this case and pinion support design. This allows use of an aluminium case in applications that would normally be considered too heavy or abusive.

This package includes the HD Pro case and support, Truetrac unit, Standard gear, and upgraded Chrome Moly 1350 yoke with U-bolts.

Description	Part No.
HD Pro Aluminium Centre with 35-Spline Truetrac, 3.50:1	STPRF180T35 350

HD Pro Aluminium Centre with 35-Spline Truetrac, 4.11:1	STPRF180T35 411

STRANGE Ultra Case

The heavy duty aluminium 9" Ultra Case is engineered to provide better lubrication to the pinion bearings and easily accept 9.00" or stronger 9.50" gear sets. The Ultra Case incorporates a uniquely designed pinion support that coalesces with the case to provide superior ring and pinion life. Four chrome-moly studs are encapsulated by billet caps, allowing for shorter and stronger studs. The tail bearing is larger than factory, which can withstand greater rpm speeds and is secured by a special retainer plate. Strange also offers a lightweight Ultra Case, featuring a taper/ball bearing pinion support. This unique 3.812" bore case incorporates a billet aluminium pinion support that has been pocket milled for reduced weight and embodies a low friction angular contact pinion ball bearing. The case and caps have been modified to further reduce static weight. The lightweight Ultra case/pinion support is 1.75lbs. lighter than our standard Heavy duty Ultra Case/pinion support package. Both Ultra 9" Cases provide superior strength through encapsulated cap studs, a larger than stock tail bearing, 12 pinion support bolts and a unique casting design, which provides strength and optimizes bearing lubrication.

- Strong enough to endure Pro-Mod, Alcohol & heavy door car applications
- Premium grade aluminium
- Chrome-Moly and encapsulated studs
- Accepts 9" & 9.50" gear sets
- Enhanced lubrication
- Extra wide tail bearing
- Tail bearing retainer plate
- Wide billet caps
- Fully machined adjuster nuts

The Ultra case requires larger than OEM components and is therefore offered with a unique package. Packages include: Ultra Case, pinion support body, pinion bearings & cups, pinion bolts, pinion depth shims, pinion seal, pinion nut, side bearings & cups, premium ring gear bolts, tail bearing and tail bearing retainer plate.

Ultra Case Package, 3.250" Bore, fits Large Stem Pinion	STP3250LT
Ultra Case Package, 3.250" Bore, fits Small Stem Pinion	STP3250ST
Ultra Case Package, 3.812" Bore, fits Large Stem Pinion	STP3812LT
Ultra Case Package, 3.812" Bore, fits Small Stem Pinion	STP3812ST
Ultra Case Package, 3.250" Bore, fits Large Stem Pinion With Coupler	ST3250LTC
Ultra Case Package, 4.000" Bore, fits Large Stem Pinion With Coupler	ST400LTC

FORD 9" S-Series Iron Case

The Strange S-Series case is the answer for street and street/strip performance vehicles. This newly designed radial ribbed Strange case provides an unsurpassed combination of strength and value. The S-Series case is suitable for all 28, 31 & 33-spline axle combinations as well as 35-spline locker and spool applications. • Exceptional grade Nodular Iron Case and Caps • Radial rib design for increased strength • Manufactured in the USA- by Strange Engineering • Same adjuster nuts as the Strange Pro Iron Case

- Cleared for ease of installation of post-units
- Far superior to OEM units

Strange 9" S-Series Nodular 3.0625" Bore Case	STN2205
Strange 9" S-Series Nodular 3.250" Bore Case	STN2206

STRANGE BILLET 9" CASE PACKAGES

The Strange Billet Case and billet pinion support offer an unmatched strength to weight combination to withstand the most brutal Drag Racing applications. The case is manufactured from 7075-T73 aerospace aluminum that offers superior strength and is highly resistant to stress corrosion. The .650" thick mounting flange coupled with the raised cross rib design provides a solid structure to maintain proper alignment of the ring and pinion. Unique wrap around style main caps enhance strength and stiffness. The tail bearing area has massive wall sections to firmly retain the oversized tail bearing that can withstand greater loads, and is secured by a custom steel retainer plate. A large oil scavenging channel directs additional lubrication to the billet pinion support. The billet case will accept 9", 9 1/2", and 10" development gear sets.

Package Includes:	Part Number
• 3.812" Bore Billet Aluminum Case • Tapered or Ball Bearing Pinion Support • Timken Front and Rear Pinion Bearings	STP5381LT
• Rear Bearing Spacer • One Piece Solid Preload Spacer	STP5381LT-10
• Pinion Depth Shim Kit • ARP Support Bolts and O-ring	STP5381LB
• Pinion Seal and Flanged Nut • Oversize Tail Bearing with Retainer Plate and Screws • Timken Side Bearings and Races	STP5381LB-10
• ARP 7/16" & 1/2" Ring Gear Bolts	
PACKAGE FOR Description	Part Number
9" & 9.5" Gears, Tapered Pinion Bearings	STP5381LT
10" Gears, Tapered Pinion Bearings	STP5381LB
9" & 9.5" Gears, Ball Pinion Bearings	STP5381LB-10
10" Gears, Ball Pinion Bearings	STP5381LB-10

STRANGE HD PRO ALUMINIUM CASE

The HD Pro aluminium case is designed for Drag Race applications and for the most abusive Hi-Performance street/strip applications. As with all Strange aluminium cases, it is crafted from 206-T4 heat treated aluminium. This premium aluminium has a 12% higher yield strength and a 32% higher tensile strength, compared to commonly used 356-T6 aluminium. The billet aluminium pinion support has a unique oil channel that is machined 360° into the support to maximize oil flow to the pinion bearings as well as a large slot in the front to further boost oil circulation. The support is in contact with the bore of the case in two locations as opposed to one as found in normal cases. This additional contact area holds the pinion shaft much more securely resulting in better bearing and gear life. The tail bearing is oversized to handle more load and greater RPM than a stock tail bearing. Billet aluminium main caps encapsulate chrome-moly studs, provides the utmost support for the carrier bearings and significantly reduces ring gear deflection. This case is most commonly purchased in kit form due to some of the unique components. The kit contains the case, pinion support with races, support bolts and o-ring, depth shims, tail bearing and retainer plate. The remainder of the parts necessary for a complete unit are readily available. The kits are available in 3.062", 3.250", and 3.812" bore sizes, and for tapered or ball bearing pinion support. Bearings are not included in these kits other than the tail bearing. 9" HD Pro cases will accept 9" and 9 1/2" gear sets.

9" HD Pro Aluminium Case ONLY 3.812" Bore Case STN2307

Lightweight Aluminium Case

Strange Lightweight Aluminium Case is designed for applications where weight is crucial and gear set life is not an issue. Strange offers a lightweight, high tensile, aluminium alloy Ford 9" case. This case, with forged aluminium bearing caps, is a full 20 pounds lighter than the Strange Pro nodular iron unit, yet it has a greater tensile strength than an OEM 9" Ford case. While not suited for heavier or blown drag race cars, the lightweight aluminium case is ideal for most lighter E.T. sensitive cars and non-blown dragsters.

Strange 9" Lightweight Aluminium 3.0625" Bore Case	STN1901
Strange 9" Lightweight Aluminium 3.250" Bore Case	STN1904

FORD 9" Pro Iron Case

Has your stock 9" case or aftermarket "big cap" case with 5/8" cap bolts failed? The Strange 9" nodular iron case is the solution- hopefully before the failure costs you a lot of money. Strange nodular cases are machined from D-4512 nodular iron which is 8% stronger than the nodular which is found in OEM cases. The material strength is only a small portion of the total strength increase a Strange case offers. Strange nodular cases are virtually indestructible; therefore, the iron case is recommended for any vehicle which accepts a 9" housing and a 9" gear set. For additional strength the case features:

- Chrome-moly bearing caps & steel adjuster nuts
- Reinforced pinion pilot bearing
- Bearing bores, reinforcing ribs and bolt holes are all cast with additional material
- Ribs were carefully designed to further enhance rigidity
- Spot faced stud holes prevent lubricant leaks and damaged mounting surfaces.

Strange 9" Nodular 3.0625" Bore Case	STN1905
Strange 9" Nodular 3.250" Bore Case	STN1906

FORD 9" NODULAR IRON CASES

Aeroflow Performance brand new, cast iron case is built to take the abuse of the street, strip or track without the fear of breaking. Case has forged caps and extra reinforcement where it's needed most. Most stock differentials use the 3.062" O.D. bearings with 1.781" I.D. AF5076-1000 has forged 3.062" diameter bearing caps. Accepts OEM and aftermarket Ford 9" pinion supports and fits a 28 or 31 spline.

AF5076-1001 has forged 3.250" diameter steel bearing caps. Upgraded 1/2" Heavy Duty Cap Bolts which are a grade 8 material. This case ONLY works with 35 and 40 spline spools and will not fit a 28 or 31 spline pool.

AF5076-1000 3.062" diameter caps, 28 or 31 spline ONLY
AF5076-1001 3.250" diameter caps, 35 and 40 spline ONLY

ALLSTAR 9" FULL SPOOL

Replace a troublesome positive traction unit with a high quality Allstar spool. Substantially lighter than conventional carriers, spools deliver equal power to both rear wheels. Ultra-lite steel spools have more lightening holes and a narrower ring gear flange than standard units.

Ford 9", 35 Spline with 2.891 & 3.062" Case RS-ALL68072

FORD 9" FULL SPOOLS

The Aeroflow Performance Ford 9" full spool is available in the light weight steel with 28 or 31 splines. These lightweight steel spool weighs 6.2 lbs. (2.81kg) (28 Spline) & 6.1 lbs. (2.76kg) (31 Spline). NOTE All Ford 9" full spools use overhaul kit AF5076-1003, even if they are a 28-spline spool. This contains the larger I.D. standard O.D. carrier bearings and pinion bearings needed for use with the full spools.

AF5076-1007 28 spline Ford 9" full spool
AF5076-1008 31 spline Ford 9" full spool
AF5076-1009 35 spline Ford 9" full spool

FORD 9" POWERTRAX

The Aeroflow Powertrax assembly is the latest design in traction control. Utilising 3 x 2 spiral gear technology for smooth, dependable operation that combines limited-slip characteristics from gears contained in a machined, forged steel centre housing. The Powertrax delivers progressive & variable traction releasing tension on the centre to turn corners while locking up to put the power down through both wheels in a straight line.

AF5076-1005 28 spline Ford 9" powertrax 1.781" side carrier bearings
AF5076-100631 spline Ford 9" powertrax

Strange Spools

Strange spools are used in a wide variety of race cars to replace heavier and weaker cast-iron differential carriers. Spools permanently lock both axle shafts together so that both rear tires will always turn at the same speed. Many Strange spools allow the use of larger axle splines that tremendously increases axle strength. The lighter and stronger steel spool also improves ring and pinion life by providing a more rigid gear mounting. Strange Pro Race Spools are forged with Strange designed tooling from premium steel. The forgings are machined on all critical surfaces by computer controlled machining centres and are fully heat-treated. Pro Race steel spools have a lifetime replacement policy.

Standard Series Spools

Ford 9" 28-spline (9.80lbs) STD1515
Ford 9" 31-spline (9.30lbs) STD1516

 * Requires 3.250" Bore Aftermarket Case
 ** Requires 3.812" Bore Ultra Case

Mini Spools

Mini-spools are designed for oval track applications only. Drag racing applications should use Standard Series or Pro Race Spools. The strength of a quality mini-spool is limited to the cross pin and cast carrier that houses the mini-spool; unlike a full spool that eliminates the aforementioned weaknesses.

Ford 9" 28 Spline STD1610
Ford 9" 31 Spline STD1620
Ford 9" Cross Pin STD1615

STRANGE

35-Spline 9" S-Trac

The strange 9" 35-spline S-Trac is a helical gear Differential that offers smooth and progressive power Transfer. If one tyre begins to slip relative to the other Tire, a separating force is created between the pinion Gears and side gears. This separating force generates an internal frictional force, which slows the spinning wheel and sends power to the wheel with the most traction. The 35-Spline S-Trac's superior design and quality makes it ideal for the most abusive street/track applications.

The 35-Spline S-Trac is Recommended For full bodied street/track cars that have 1/4 mile E.T.'s in the low 9 second or slower. Also ideal for road racing & off road.

Description
Strange 9" 35-Spline S-Trac
(Requires 3.250" Bore Case)

Part No.
STN1980

LSD Hemispheres

Manufactured by US Gear, the Trac-Loc LSD can be used as a direct replacement for factory LSD units or to upgrade an open centre to LSD. Trac-Loc LSD units are made in the USA and are totally rebuildable. They feature nodular steel housings, nickel steel side and pinion gears, multi-plate 360 degree steel clutches and a billet hat.

Ford 9" 28-Spline Trac Loc LSD with Billet Hat STN1974
Ford 9" 31-Spline Trac Loc LSD with Billet Hat STN1970B

DETROIT Locker

The Detroit Locker maximizes traction by delivering 100 percent of the torque to both drive wheels. It is engineered to keep both wheels in a constant drive mode, and has the ability to automatically allow wheel speed differentiation when required. Enthusiasts and professionals use the Detroit Locker in many offroad applications and it is the only differential used in NASCAR.

Application

Toyota Landcruiser 8.78" 30 Spline DL225SL124A

DETROIT TRUETRAC

Detroit Truetrac was the first unit available to the aftermarket featuring a fully automatic gear-type limited-slip design (no clutch or friction plates). The helical gear design provides quiet and smooth operation while transferring the most torque to the wheel with the best traction. This product is very universal. It will provide traction in off-road, drag racing and street performance vehicles without affecting the handling for everyday street use.

US GEAR

For the selective car enthusiast, US Gear have the right stuff to keep you going day after day and mile after mile! This is the highest quality aftermarket replacement available. Ideal for the weekend warrior, US Gear Strange Pro Street line will handle anything you can throw at it! Made from high quality American materials, this gear set provides the strength and tenacity to compete and win! Perfect for drag racing, US Gear Strange Competition gears offer high strength and light weight with the necessary muscle to tame huge amounts of torque on the starting line. Run after run, they take a beating and come back for more!

When you buy US Gear product, you can expect:
 • High quality gears • Quiet operation • Consistent installation and setup • Detailed instruction sheets • Durability & longevity

FORD 9" CAST IRON PINION SUPPORT

The Aeroflow Performance Ford 9" cast iron Daytona style pinion support is far superior to the original Ford design. It features a larger inner bearing and race with improvements in oil flow. This allows for use in higher torque or horsepower applications, while also increasing bearing life. All bearings and races are sold separately (AF5075-1002). *Recommend to use Pinion Nut AF5075-1003

AF5075-1000

FORD 9" ALLOY PINION SUPPORT

The Aeroflow Performance Ford 9" CNC forged aluminium Daytona style pinion support is a great upgrade from the cast iron models. This pinion support uses a standard Ford 9" front pinion bearing and the Daytona style pinion bearing on the rear. All bearings and races are sold separately (AF5075-1002).

*Recommend to use Pinion Nut AF5075-1003.

AF5075-1001

Pinion Supports

Taper/ball Bearing Pinion Support (Drag Racing) Strange taper/ball bearing pinion supports are designed to reduce friction. This unique pinion support kit features a billet aluminium body, angular contact rear ball bearing, Timken front pinion bearing, pinion seal and both a solid and an adjustable preload spacer. The taper/ball design is ideal for drag racing applications seeking the least amount of resistance in the drive train. Available for 28-spline and 35-spline pinion applications. Includes: adapter sleeve, rear angular contact ball bearing, front Timken bearing, pinion spacer and both an adjustable and solid preload spacer.

Aluminium Taper/Ball Support for 28-Spline Pinion (4.15lbs)

STN1920

Aluminium Taper/Ball Support for 35-Spline Pinion (4.15lbs)

STN1921

Iron DAYTONA Style Taper Bearing Support (Street/Strip and Oval Track)

The Daytona Style pinion support features a larger than stock rear tapered pinion bearing. Due to the oil porting this support provides the best solution for oval track and street/strip users who are seeking an increase in strength over stock pinion supports. Each STN1914 pinion support is shipped with both front and rear Timken races installed into the iron body. The optional support assembly kit (N1916) includes Timken pinion bearings, pinion seal and our 2 pc. preload spacer.

Daytona Iron Pinion Support (6.45lbs)

STN1914

Forged Aluminium Taper Bearing Support (Street/Track)

The Strange aluminium taper bearing pinion support is completely CNC machined from Strange designed forgings. The Strange forging offers optimal grain structure and provides superior strength to random grain flow billet pinion supports. This support accepts a larger than stock rear pinion bearing - allowing for a significant increase in thrust capacity and improved rigidity for the pinion shaft. This support offers an optimal solution for street/track enthusiasts seeking to replace failure prone stock supports and is machined to enhance and increase oil lubrication to the pinion bearings. The pinion support body is designed to accept a small stem pinion shaft. Pinion support installation kit (STN1916) is sold separately.

Forged Aluminium Pinion Support (4.00lbs)

STN1917

Forged Aluminium Taper Bearing Pinion Support (Drag Racing)

The Strange aluminium taper bearing pinion support (STN1922) is completely CNC machined from Strange designed forgings. The Strange forging offers optimal grain structure and provides superior strength to random grain flow billet pinion supports. This support accepts larger than stock front and rear pinion bearings - allowing for a tremendous increase in thrust capacity and improved rigidity for the pinion shaft. This support offers an optimal solution for drag racers seeking to replace failure prone stock supports and is designed to survive the most abusive drag racing conditions; however it is not designed for continuous use. The pinion support body is designed to accept a large or small stem pinion shaft. Pinion support installation kit STN1923 fits a 28-spline pinion shaft and kit STN1924 fits a 35-spline pinion shaft. When changing from a 28 or 35-spline pinion shaft, all that is needed is a new pinion support installation kit.

Forged Aluminium Pinion Support (3.95lbs)

STN1922

STRANGE HD PRO TAPERED BEARING PINION SUPPORT

Designed for the HD Pro aluminium case, and will not fit any other cases. The fresh design of this support make it ideal for use in street, track, and Drag Race applications. It utilizes that same oversized bearings as the N1922, but the oil flow is increased for continuous use. Constructed from heat treated aluminium, ultimate strength is achieved while weight is kept to a minimum. The pinion bearings are moved further into the case to provide additional support. This support, can accept either 28 or 35 spline pinion gears, and comes in a clear anodized finish. It can also be ordered in polished aluminium. The support is supplied with front and rear Timken races installed, bolts, washers, and an o-ring. Bearing & seal kit is available separately.

HD Pro Tapered Bearing Pinion Support

STN2322

STRANGE HD PRO BALL BEARING PINION SUPPORT

Support designed for the HD Pro aluminium case. Machined from heat treated heat treated T6061 aluminium ensuring maximum strength and reduced weight. This support can accept 28 or 35 spline pinion gears with the proper bearing & seal kit. It is supplied with a Timken front race installed, pinion support bolts & washers, and o-ring. Bearing & seal kit is available separately.

HD Pro Ball Bearing Pinion Support

STN2323

FORD 9" DIFF YOKES

Ford 9" diff yoke with dust cover to suit 1310 universal joints. Fits standard 28 spline pinion gear. Overall length is 4" (101.60mm). Centre to centre of U-bolt holes is 1.415" (35.94mm). Thickness of ear where U-bolts go through is 0.818" (20.77mm). Space between ears where u-joint caps fit is 3.211" (81.55mm). Outside diameter at seal area is 1.813" (46.05mm).

AF5074-1000

PINION YOKES

S-Series Steel Yokes

This 1350-series steel yoke is an ideal upgrade from smaller 1330 & 1310-series, OEM steel yokes. The S-Series yoke is made to fit OEM pinion supports as well as Daytona style pinion supports, without modification to the yoke. The inclusion of a stamped steel dust shield makes this yoke the choice of street enthusiasts.

STU1607

Mopar 8.75", 29 Spline 1350 Series

STU1608

Chrome-moly Steel Yokes

Each Strange chrome-moly yoke is CNC machined to exacting tolerances. The chrome-moly yokes are designed to incorporate 1350 series u-joints a must for drag racing and abusive street use. Not every 1350 series yoke is the same. A lot of yoke manufacturers offer a Spicer yoke which is re-machined to 9" specifications and fit a 1350 series u-joint; although the Spicer blank offers a decent foundation, it does not approach the strength and fit of a Strange precision machined chrome-moly yoke.

9" FORD Pinion Yokes

Forged steel Allstar Pinion Yokes are available for Ford 9" and accept 1350 series (3-5/8") Uni-joints. U-bolts sold separately.

Description

28-Spline Steel Pinion Yoke, 1350 Series
35-Spline Steel Pinion Yoke, 1350 Series

Part No.

RS-ALL68380

RS-ALL68382

FORD 9" PINION PILOT BEARING

RETAINER CLIP RING

Retains the small pinion gear snout bearing.

AF5075-1007

FORD 9" PINION NUT

This Ford 9" pinion nut is specifically designed to be used with Daytona pinion supports due to its thinner design. It should be used in conjunction with AF5075-1001 and AF5075-1000 Daytona style pinion supports.

AF5075-1003

FORD 9" PINION SEAL

This Aeroflow Performance viton 9" Ford pinion seal are good to over 200°C (392°F). The stock rubber seal starts to deteriorate at about 120°C (248°F) making this a great upgrade when building a diff. Outside Diameter is 3" (76.20mm). Inside Diameter is 1.813" (46.05mm). Overall Thickness is 0.5" (12.70 mm).

AF5075-1008

FORD 9" PINION BEARING KIT

The Aeroflow Performance Ford 9" Daytona pinion bearing install kit is designed to be used in conjunction with the Daytona Pinion Support AF5075-1000 or AF5075-1001. The kit includes the following components Front Pinion Bearing Race, Pinion Tapper Roller Bearing, Daytona Rear Pinion Race, Daytona Rear Pinion Bearing, Viton Pinion Seal, Solid Pinion Long Spacer and Pinion Nut.

FORD 9" PINION SHIM KIT

The AeroFlow Performance Ford 9" pinion shim kit consists of seven pinion retainer shims including one of each .004", .005", .006", .013", .016" and two .010". Eight pinion pre-load shims consisting of one each .003", .004", .005", .012", .020", .020", and three .010". One inner and one outer pinion spacer and one 3/4"-20 Ford pinion nut.

FORD 9" CRUSH SLEEVE

This stock replacement crush collar/sleeve for Ford 9" rear axles from AeroFlow Performance is a collapsible spacer that installs on the pinion and preloads the pinion bearings. This crush sleeves is not reusable and must be replaced if the pinion nut is loosened or removed. Overall Diameter is 1.630" (41.40mm). Inside Diameter is 1.350" (34.30mm). Overall Thickness is 0.500" (12.70mm).

FORD 9" OVERHAUL KITS

The AeroFlow Performance Ford 9" overhaul kit is the only kit required to completely overhaul your Ford 9" differential. It includes pinion pilot, pinion shaft, pinion nut, pinion seal, gasket, shims, crush collar, sealant, and gear marking grease, brush and Loctite. Ring gear bolts not included. Both the 28 spline and the 31 spline come with the carrier bearing. The 35 spline kit comes with Carrier bearing, Outer pinion bearing and Large "Daytona" inner pinion bearing

NOTE : AeroFlow 9" full spools use overhaul kit AF5076-1003, even if they are a 28-spline spool. This contains the larger I.D. standard O.D. carrier bearings and pinion bearings needed for use with the full spools.

AF5076-1002 suits 2.891" case with 28 or 31 spline axles
 AF5076-1003 suits 3.062" case with 28 or 31 spline axles
 AF5076-1004 suits 3.250" case with 35 spline axles

9" FORD REAR END AXLE HOUSING GASKET

HOUSING GASKET

This reusable rear differential gasket has a non-stick coating. Fits 9" Ford rear axle housings.

AF5075-1009 9" Ford rear axle housing gasket SINGLE
 AF5075-1009-10 9" Ford rear axle housing gasket PACK OF 10

TAIL BEARING RETAINER

Supplied with screw for Strange HD Pro, Ultra, & Billet Cases

STN1943R

FORD 9" Differential Shim & Replacement Parts Kits

Kits include hard-to-find items needed to assemble Ford 9" centre sections. The Drag Race Kit contains: housing gasket, pinion shaft seal, pinion support shims, pinion pre-load shims for use with aftermarket aluminium pinion supports, pinion housing O-ring; and one 3/4" Ford pinion nut and the Oval Track Kit Contains: pinion retainer shims, pinion pre-load shims, pinion spacer and one 3/4" Ford pinion nut.

Ford 9" Drag Race Parts Kit M084750
 Ford 9" Oval Track Parts Kit M084751

STRANGE HD PRO PINION SUPPORT BEARINGS

Ball bearing supports use an angular contact ball bearing to replace the rear pinion bearing. This bearing offers reduced rolling resistance and requires less preload than a tapered bearing, decreasing the forces necessary to rotate the pinion gear. Pinion supports must be specifically designed for ball bearing use since tapered bearing supports are not adaptable.

HD Pro support with 28 Spline Pinion STN2323S
 HD Pro support with 35 Spline Pinion STN2323L

Pinion Support Bearing Kits

These bearing kits are required to install a Strange pinion support. All kits include pinion bearings, 2-pc. preload spacer, shims and seal. STN1923 also includes a pinion adapter sleeve and STN1924 includes a solid preload spacer.

Kit for STN1914, STN1915 & STN1917 STN1916
 Kit for STN1922 using 28-Spline Pinion Shaft STN1923

DRIVESHAFT CLAMPS

1.375" Driveshaft Clamp STU3616
 1.500" Driveshaft Clamp STU3617

Carrier Stud Kit, FORD 9"

Competition Engineering's Carrier Stud Kit is designed for our Fabricated Rear Axle Housings, similar sheet metal housings, or stock-style Ford 9" housings. The heat treated Grade 8 steel studs provide solid mounting points for the centre section differential. Manufactured with splined ends, the press-in studs are pulled through from inside the housing. Includes nuts and copper sealing washers, which are far superior than steel to prevent seepage and leakage. Packaged in sets of 10 studs, nuts, and washers.

Carrier Stud Kit, Ford 9" MOC9006

AXLE HOUSING T-BOLTS

Ford 9" T-bolt rear end bolt kit has everything you need to mount brake backing plates to your Ford 9" housing. They are made from high strength steel with a thread size of 3/8"-24 and overall length of 1.50" (38.10mm). Included is 8 T-bolts and matching lock nuts to suit.

AF5072-1000 Axle Housing T bolts (Pack of 8 T-bolts & nuts)

DIFF CENTRE HOUSING STUDS

Ford 9" rear end centre carrier studs are manufactured from high strength steel with a thread size of 3/8"-24 and overall length of 1.75" (44.45mm). A knurl size of 0.403" (10.32 mm) studs. This set includes 10 studs only, no nuts/washers are included.

AF5073-1000 Carrier Studs (Pack of 10 studs ONLY)

FORD 9" RING GEAR BOLTS

The AeroFlow Performance Ford 9" ring gear bolt sets are constructed from durable steel and featured in a black oxide finish. Hex wrench type with a thread pitch of 7/16"-20. We recommend to torque these to 70ft/lb (94 Nm).

They come in three different lengths as listed below.

AF5075-1011 25.4mm (1") UHL pack of 10
 AF5075-1010 30.7mm (1-7/32") UHL pack of 10
 AF5075-1012 31.5mm (1-1/4") UHL pack of 10

COMPLETE DIFFERENTIALS

FULLY ASSEMBLED REAR END ASSEMBLIES AVAILABLE BY SPECIAL ORDER

Strange centre sections and rear end assemblies are custom assembled and set up in the USA by the industry's top professionals to your exacting specifications. Please contact Rocket Sales on (02) 8825-1900 to discuss your requirements. Our sales team can advise you on the best combination to suit your application and arrange shipping from the

9" Steel Rear End Assemblies

Strange Engineering offers a multitude of 9" rear end assemblies. We can custom tailor a rear end to meet your specifications. Strange Engineering will completely install your chosen packages- including installing axle studs, axle bearings and brake kit. Strange provides a hardware kit with each complete rear end assembly that consists of a gasket, jet nuts for the centre section and a housing end stud package (only with brake kit). In addition, Strange will completely crate your rear end assembly for an uneventful delivery- at no additional cost!

Drop Out Live Axle

The Strange Drop-Out Live Axle is designed for certified chassis 6.00 seconds (1/4 mile) and slower. The drop-out live axle is an extremely lightweight and rigid rear end. The rear end features our one piece aluminium housing, Ultra Centre Section, thru-hardened live axle and 11" carbon or steel brakes. The thru hardened live axle is used to assist in reducing rear end distortion and aid in eliminating ring deflection. In addition, the live axle provides the safety of a floater rear end at less weight. Complete rear ends with carbon brakes weigh as little as 145 pounds and are supplied fully assembled with carbon brake kit, choice of chassis mounts and Ultra Centre Section with 9" or optional 9.5" pro gears.

Strange Drop-Out Live Axle Assembly

STL6000

Top Loader Live Axle

The Strange Top Loader live axle has long been a standard among competitive race cars. The 9"9.50" was originally created for the demands of Top Fuel/Funny Car over a decade ago and has since been replaced by 10.5" and 12" units for current Top-Fuel/Funny Car. Today's unit has been refined for alcohol racers demanding the least amount of rear end maintenance. The current model features a newly designed heavy duty aluminium centre piece, which accepts 9" or 9.50" gear sets and a second generation aluminium spool. Supplied as a fully assembled unit complete with steel brake kit, 9" or optional 9.5" pro gear set, and aluminium spool. Mounting plates are not included

Strange Top Loader Live Axle Assembly

STL4101

10.50" Live Axle

The 10.50" live axle rear end is designed to withstand loads that can destroy many drag racing rear ends. The top loading design provides convenient inspection, but more importantly, the Strange designed case does not provide an opening (front or rear load type) that is in line with the drive wheel- dramatically reducing wheel imposed distortion and increasing gear life. The Strange Live axle provides superior resistance to bending loads- far superior to full floater axle assemblies that have floating axles or a single floating axle. The massive 2.750" OD Strange live axle shaft is designed to absorb the brunt of abuse, allowing the housing to better support the ring and pinion- extending gear life. Supplied as a fully assembled live axle unit with 10.50" gear set (choice of 2.91, 3.20, 4.11 or 4.29 ratio), carbon cover, magnesium tubes, lightweight aluminium spool, internal oil pump and 11.50" carbon or optional steel brake kit (chassis mounts are not included)

Strange 10.50" Live Axle Assembly

STL7000

12" Live Axle

The Strange 12" Live Axle is the finest rear end available for Top Fuel and Funny Car. The main housing is unique in both design and material. The top load design coupled with the live axle provides an excellent structural base that maximizes gear life and significantly reduces rear end distortion. The unit features magnesium tubes, magnesium cover, steel or titanium axle, steel spool, 11.50" carbon brake kit and internal oil pump. The standard 12" live axle assembly weighs 205 pounds- complete less oil. The Strange lightweight 12" rear end features a titanium axle and an aluminium spool. The lightweight 12" has a special pump provision that reduces the required oil capacity by four quarts. The lightweight 12" weighs only 193 pounds - complete less oil and is supplied fully assembled unit with 12" gear set (3.20 ratio), magnesium cover, magnesium tubes, lightweight steel or optional alloy spool, internal oil pump and 11.50" carbon brake kit (chassis mounts are not included).

Strange 12" Live Axle Assembly

STL7200

Street Rod Quick Change Rears

Winters Performance Products manufactures the best quick change rear ends ever made. Mostly used in circle track racing, quick change rear ends work very well in street applications. In most cases the Championship 10" Quick Change is more rear end than you'll ever need (800+hp). Our V8 Quick Change is rated at 550 hp while the 3.08 and the Heavy Duty Championship Quick Change can be used in more severe applications (1000+hp). Keep in mind severe shock loading (drag racing) will shorten the life of all drive line components. All Winters Quick Change Rears use spiral bevel ring & pinions, the most efficient ring & pinion available. Pinion placement of a spiral bevel ring & pinion uses less power, is more efficient, and runs cooler than hypoid ring & pinions. Hypoid style ring & pinions create more sliding action, increasing heat and power loss.

Quick Change Gear Charts

HIGH LOW

IMPORTANT:
Install quick change gears with shoulder facing toward gear cover bearings

Remember to refill gear cavity with good quality gear lube after quick change gear changes.

To Determine Gear RPM Change:
(RPM) ÷ (Gear Ratio) x (New Ratio) = (New RPM)
Example 3000 ÷ 3.93 x 3.43 = 2618

To Determine Final Drive:
(# Teeth Top Gear) ÷ (# Teeth Bottom Gear)
x R&P Ratio = Final Drive

Helical Gear Spacer Kit

P/N WINSR3551 (for 6 spline)
P/N WINSR3552 (for 10 spline)
All Winters helical quick change gears have REM® process enhanced surface finish.

Winters Recommends the use of their Semi-Synthetic Hypoid Lube with Moly 80-90-140 WINSR1730

SCS GEARBOX

Sportsman Series 10 Spline Gear Sets

The Sportsman Series gears are CNC Crown Hobbed to produce a quality that meets the exacting standards accepted by SCS. The gears are not lightened and are made of 8620 material. They are Heat Treated as are the Professional Series, but will have a REM finish rather than the Black Oxide. The Sportsman gears are engineered the same as the professional series and have the exact same Gear Ratios Available.

Professional Series 10 Spline Gear Sets

SCS 10-Spline Quick Change Gears, Sets #1 thru #28 are Max Lightened, where possible, without sacrificing the strength! Average weight savings 1 1/2 lbs.! Since 1987, SCS Gears have been the proven leader in Ultra High Performance Quick Change Gearing. SCS Gears are made of 9310 Aircraft Alloy for maximum strength. Each gear is Crown Shaved (Ground before Heat Treat) to minimize backlash and run out, broached for proper 10-spline shaft fit and Black Oxide finished. The SCS Extra 5 step heat treating process yields maximum gear life for high stress applications.

CHAMPIONSHIP ADAPTER SERIES

Champ Tube & Bell Adapters hark back to when hot rodders made adapter plates to mate banjo axle housings with quick change center sections. Our adapters are designed for either Winters Steel Tubes & Bells or OE '35-'48 Ford tubes & bells

Horsepower: Up to 1,000*
Ring & Pinion: 10" / 4.12
Differential: Winters Track, Heat-treated lower shaft, Includes axle seals and one set of 10-spline straight-cut gears

WINSR2525STB-A Big Bearing Flanged Axle (Torino)

CHAMPIONSHIP QUICK CHANGE WITH STEEL TUBES & BELLS

Our beefy Champ Quick Change with Steel Tubes & Bells is tailor-made for higher horsepower hot rods and racecars built in a traditional, period style. Based on our Sprint center, Champ rears utilize a larger 10-inch ring & pinion and our rugged Winters Track Differential for positive traction and smooth, consistent performance on the street or strip. Stock-appearing flanged 31-spline axles will accommodate aftermarket drum or disc brakes.

RIBBED BELL 8-3/8 V8 QUICK CHANGE

Since the early days, hot rodders have incorporated finned aluminum details on their cars not just because they help disperse heat, but because they just plain look cool. Our Ribbed Bell V8 Quick Change captures that finned aesthetic in a cast aluminum bell that's as strong as it is good looking.

Horsepower: Up to 600* Ring & Pinion: 8-3/8" / 4.12

TAILSHAFT LOOPS

RPC Tailshaft Loop

A tailshaft loop is required for most drag vehicles and is highly recommended even in classes where it is not required. The tailshaft loop is designed to catch the front of the driveshaft in the event of a universal joint failure to prevent the driveshaft from digging into the ground and possibly flipping the vehicle.

Universal Tailshaft Loop

RPCR7120

Heavy Duty Tail Shaft Loop

Safety loop helps contain the driveshaft and prevents flipping of the vehicle in the event of a front U-joint failure.

• Bolt together design allows for easy installation

• Meets both ANDRA and CAMS requirements

• Thickness 6.35mm/ 1/4" Width 50.8mm/ 2"

STRANGE 1/2" Stud Kits

These Strange 1/2" stud kits suit Strange and other brands of axle that use a 1/2" bolt threaded through the flange. The stud length refers to the threaded portion of the stud; therefore, when determining the usable thread protruding through the axle, subtract a .125" (washer) and the thickness of the axle flange. Strange 1/2" studs are designed to accept 1/2"-20 lug nuts (not included with kit).

2" Long, 1/2"-20 Screw-In Axle Stud Kit.

STU1025

Includes Bolts and Washers

3" Long, 1/2"-20 Screw-In Axle Stud Kit.

STU1026

Includes Bolts and Washers

STRANGE Chrome-Moly 5/8" Stud Kits

In addition to the traditional 5/8" stud kit we offer five lengths of chrome-moly stud kits. Ensure measurement "A" is able to fully engage into your wheel. The "A" dimension of the drive stud needs to be slightly greater than the combined thickness of the brake hat or drum and the thickness of the wheel. Every 5/8" stud kit includes studs, lug nuts, .4375" aluminium wheel washers, and locking nuts.

Wheel Studs

Moroso Wheel Studs are manufactured from high-grade SAE 8740 steel to withstand shear loads of 190,000 psi and are designed expressly for use with thick-hub racing wheels for both drag and oval track racing. All Moroso Press-In Type Wheel Studs now feature a quick start dog end for easier starting of wheel nuts. Packed in sets of five. Not for use with wheel spacers.

WHEEL STUDS

Aeroflow Performance wheel studs are made from a high strength steel. Its press-in design makes it stronger than stock. They are available in both 7/16" thread and 1/2" thread. They are come in packs of 5 per package. The knurl size is 15.49mm (39/64") to suit 15.06mm (19/32") stud holes. The thread length is 25.4mm (1"), UHL is 38mm (1.5").

- AF5071-1000 7/16" wheel studs (Pack of 5 studs)
- AF5071-1001 1/2" wheel studs (Pack of 5 studs)

RACE TYRE ACCESSORIES

Moroso Tyre Screw Kit

Manufactured from rugged Grade 8 steel to withstand the extreme loading placed on today's racing tyres. Self-tapping screws feature a built-in washer face for maximum holding strength. Wheel Rim Screws-1/4" dia. x 3/4" long. 35 per package

Tyre Screw Kit

This handy kit was specifically designed to help prevent the tyre from spinning on the rim with low tyre pressure. Each kit contains 35 extra long Grade 8, case-hardened hex head screws and a 3/16" drill bit to complete two wheels. Cadmium plated to prevent rust, it's a must for the serious competitor. Hex head self-tapping screws, 35 per set

- Ford, (all Long-style), 5/16"-18 x 1" MG4318
- MG911

AF99-3002

AF99-3000

AEROFLOW TYRE COVERS

Aeroflow has the answer to maintaining even pressure between rear tyres on race cars as uneven pressure can cause inconsistent launches and dangerous instability down the track throwing off your chassis settings. Whether your car is in the pits or in the staging lanes, there's a good chance a rear tyre will be exposed to direct sunlight unless you shield it with an Aeroflow tyre cover. Made from durable vinyl these yellow covers can attach either over the tyre for altered and dragsters or with suction cups to the body panels for full bodied cars. Sold individually.

Part No	Description
AF99-3000	Universal tyre cover, 5 suction /clip
AF99-3001	Tyre cover up to 876mm (34-1/2") tyre.
AF99-3002	Tyre cover up to 915mm (36") tyre.
AF99-3003	5pk replacement suction cup for AF99-3000

Front Runners

- Tubeless construction and 2-ply nylon cord helps to reduce unsprung weight
- High cord angle and unique tread design reduce rolling resistance for increased speeds
- Shallow tread depth increases stability at high speeds
- Stronger mounting bead withstands higher pressures when adjusting for roll-out

Part #	Size	Weight	Diameter	Tread Width	Rim	Op/Pressure	Circ
MO17050	15 x 5.5	10lbs	25.25	3.5	3.5-4.0	30-35 psi	78

							78-1/4"

Moruso DS-2 Front Tyre

- Aircraft inspired tread design offers reduced weight, minimal rolling resistance and high-speed stability
- Asymmetrical tread pattern improves high-speed stability by reducing the tyre tendency to "walk" at the top end
- 4-ply nylon construction with high-strength bead provides added durability, especially during mounting and dismounting
- Ozone-resistant tyre compound withstands the harmful effects of the sun and other environmental conditions

Part #	Size	Weight	Diameter	Tread Width	Rim	Op/Pressure	Circ
MO17026	26.0/4.50R15	12lbs	26.0	4.5"	3.5-5.0"	30 psi	81

³ Lightweight Acceptable practice for rim width is tread width plus or minus 1".

All dimensions @ 10 psi cold on measuring rim.

Important: All drag drive tires must be matched to be within 1/2" roll out

Mickey Thompson Pro Bracket Radial

Pro Bracket Radial from Mickey Thompson is a fast, consistent, reliable, affordable radial for the weekend Sportsman racer; five 15-inch fitments. • Low rolling resistance allowing them to be quicker and faster than the bias ply counterparts.

- The rollouts are always the same - no need to "match" tires.
- consistent performance designed for bracket racing.
- No tubes required.

Part# Size Equivalent AppX. Compound Approved Measuring Section Tread Overall Circ.
 Size Weight Rims Rim Width Width Diameter M/T®
 Pro Drag Radials are the fastest Drag tires on the strip!

The radial design allows for less rolling resistance for better ET's. Radial slicks will give you the edge over the competition!

- Radial Construction for Less Rolling Resistance
- Zero Growth for Predictable Gear Ratios
- Compounded For MaXimum Traction
- Works best with Auto Trans Applications

Mickey Thompson ET Street S/S

T Street S/S from Mickey Thompson is a high performance street to strip tire with radial construction, R2 compound and more; 15- to 20-inch fitments.

- Equivalent Tread Void as the ET Street Radial II, redistributed for improved hydroplane resistance while providing plenty of tread contact for excellent dry traction.
- Proven R2 compound, the same proven compound used on the quickest "drag radials" on the planet provides superior traction at the strip while little or no burnout required.
- Tubeless construction provides lead-free seal without the expense and hassle of tubes.

RUBBER TUBES

M/T Natural Rubber Tubes

100% Natural rubber tubes with an aircraft style removable valve stem that clamps to the wheel. Extremely light weight and durable these tubes are a must for racing applications. Natural rubber is far superior to other materials because of its ability to conform to sidewall distortion and its resistance to deterioration due to many heat cycles.

Part Number	Size	Approx Weight	Application
MT9553	9.00-15	3.6	24.5" to 28" Dia Tyres with 8.0" to 10.5" Tread Width

STREET COMP - ULTRA HIGH PERFORMANCE

The Mickey Thompson Street Comp radial is an ultra-high performance tire designed for street. Engineered for high-speed handling and cornering ability. Compounded for traction and responsiveness in both wet and dry conditions. Street Comp is the perfect tire for late model American muscle cars and Pro Touring type applications.

- Asymmetric tread design • Superior wet and dry performance
- Aggressive steering response • Lightweight construction

Alumastar Pro Series Bead-Loc & Liner App. - Knurled Rims

The Alumastar PRO Series is the next evolution in the Alumastar 2.0 product line. The Alumastar PRO is designed to give the Pro Modified racer a wheel that has the Magnum PRO strength without the added weight while still exceeding the SFI 15.3 standards. This wheel is constructed with a polished aluminium rim shell and forged 6061-T6 centre. It is available with the black anodized or gold anodized Ultra Lite bead-loc system or in a non-bead-loc configuration to be used with a "liner" tyre.

- Exceeds SFI 15.3 specifications for Pro Modified, Top Dragster, and Top Sportsman
- 16" Ultra Lite Double Bead-Loc applications are available in black or gold anodized finishes
- Liner applications also available
- Centres are available in polished or black anodized finishes
- Designed for use with a 5/8" drive stud or short shank mag style lug
- Drag Strip Use Only

Rims Available

Diameter:	16" Only
Rim Width:	15" To 16"
Bolt Circle:	5X5.00" & 5X5.500"
Back Space:	From 4" To 6"
Centre Finish:	Black or Polished

Bead-Loc Available:

- Black 18-Bolt Ultra-Lite DBL
- Gold Ultra-Lite DBL
- Polish 18-Bolt Ultra-Lite DBL
- Liner App. - Knurle

Aluma Star 2.0

- Forged Aluminium Centre
 - Cold Drawn Aluminium Rim Shells
 - Fully Polished Centre and Inner and Outer Halves
 - Double Rolled Lips for Ultimate Strength
 - Forged 18-Bolt Aero Design Bead-Loc
 - Centre Caps Not Included
- FOR DRAG RACING ONLY (Not For Street Use)

Aluma Star - Non Bead-Loc

Alumastar 2.0

Series Bead-Loc Rims

This five-spoke wheel is the most recognized racing wheel by which the industry sets its standards. The Alumastar 2.0 version is arguably the most popular wheel in drag racing due to its style, strength, and lightweight status. The wheels are constructed with polished aluminium rim shells and forged 6061-T6 centres.

- Exceeds SFI 15.1 specifications • Drag Strip Use Only
- 15" and 16" Double Bead-loc applications available with polished, gold anodized, or black anodized bead-loc rings. Ultra Lite bead-loc configuration is available on 16" diameter wheels
- Centres are available in polished or black anodized finishes
- Designed for use with a 5/8" drive stud or short shank mag style lug

Call Rocket for Sizes & Pricing

NOTE: If You Are Running M/T Bead-Loc Tyres,

Advise Salesmen For Correct Application.

Rims Available

- Diameter: 15" & 16"
- Rim Width: 10" To 16"
- Bolt Circle: 5X4.5", 5X4.750", 5X5.00" & 5X5.500"
- Back Space: From 3" To 6"
(Backspace Varies From Rim Size)

Centre Finish: Black or Polished

Bead-Loc Available:

- Gold Standard 20-Bolt DBL
- Black Standard 20-Bolt DBL
- Gold Mickey Thompson 20-Bolt DBL
- Black Mickey Thompson 20-Bolt DBL
- Polished Mickey Thompson 20-Bolt DBL
- Polished Standard 20-Bolt DBL

V Series

- Forged Alloy Construction • Front Runners in Fully Polished or Black Finish • Rear Wheels in Black Only • Spindle Mount Includes Centre Cap • Stud Mount Does Not Include Centre Cap
- FOR DRAG RACING ONLY (Not For Street Use)

MAGNUM IMPORT

DRAG BEADLOC

WELD Racing's Import Drag Wheels just got even better with 13" beadlocks now available. The Magnum Import Drag wheel picks up where the domestic drag race applications leave off. The Magnum Import Drag wheel is designed for front-wheel drive drag race applications in 4x100mm and 5x100mm bolt patterns in a durable yet lightweight design. It carries the same features as the other WELD Racing Pro Drag wheels which include forged aluminum rim shells combined with 6061-T6 forged wheel centers. The lip of the rim is double rolled for added strength. Size Range: 13" x 7" - 13" x 10" Bolt Circle: 4 x 100 - 5 x 100 Style Finish: Polished Rim With Black Center & Beadloc

Magnum Import Drag

- Forged Aluminium Gold Anodized Centre
 - Cold Drawn Aluminium Polished Rim Shells
 - Double Rolled Lips for Ultimate Strength
 - 767 Series - 5 Stud, Tapered Nuts
 - 768 Series - Dual 4 Stud, Tapered or Flat Nuts
 - Centre Caps Not Included
- FOR DRAG RACING ONLY (Not For Street Use)

Delta-1 Forged 1 Piece Bead-Loc Rim

This newly released production line provides four purpose-driven models for SFI 15.4 Top Fuel/Funny Car (TF1), SFI 15.3 for TAD/TAF/C (TA1), SFI 15.3 Pro Modified (PM1), and SFI 15.1 for Pro Stock (PS1). Each model is the lightest, stiffest, and offers the lowest rotational inertia of a 16x16 double bead-loc rim, wheel built anywhere, yet does not sacrifice safety for speed!

- 100% CNC machined one-piece forged
- Twice as stiff to resist bending load from axle
- Tyre bead seats are 50% stronger to stay more round under extreme loading
- True to less than 0.005" total indicated run out at the tyre bead seat
- Rotational moment of inertia is 9.82 lb-ft² versus 18.47 lb-ft² for competitive SFI 15.4 wheels (47% reduction!)
- Accurate torque distribution and uniform tyre bead clamping assured by spherical ball seat design (patent pending) utilizing
- Titanium spherical washers and titanium bead-loc studs.
- Bead-loc fasteners are closer to the tyre bead maximizing tyre bead clamping force and uniform clamping
- Made in Kansas City, USA

Rims Available

Diameter: 16" Only
Rim Width: 16" Only
Bolt Circle: 5x4.75" & 5x5.00"
Back Space: From 4" To 5" (Check Application)
Wheel Finish: Black & Polished

Bead-Loc Available:

- TF/FC Polished & Black 24-Bolt DbI
- Pro Stock, TAD/TAF/C, & Pro Mod Polished & Black 18-Bolt

Magnum Pro Series

Bead-Loc & Liner App. – Knurle Rims

Top Fuel and Funny Car contenders have relied on the Magnum PRO wheel for many years. This wheel has been so successful and durable in the Nitro classes that the world's first SFI 15.3 wheel has become a fundamental requirement in Pro Modified competition. Magnum PRO features an exclusive 18-bolt over-design Bead-Loc™ system for superior clamping force over other designs. A non-bead-loc alternative of the Magnum PRO is also available exclusively for use with a "liner" tyre. The "Fuel" centres are forged 6061-T6 to handle the stress and sheer awesomeness of the 8,000 horsepower machines. The wheels are available in 16-inch diameters, various widths, and offer a no-compromise approach to drag racing wheels.

- Exceeds SFI 15.3 specifications
- 16" Double Bead-loc applications available with polished, gold anodized, or black anodized bead-loc rings. Ultra Lite bead-loc configuration is available for ProMod applications.
- Centres are available in polished, gold anodized, or black anodized finishes • Designed for use with a 5/8" drive stud
- Drag Strip Use Only • Made in Kansas City, USA
- For Pro Mod, Alcohol, & Nitro Class

Rims Available

Diameter: 16" Only
Rim Width: 15" To 16"
Bolt Circle: 5X5.00" & 5X5.500"
Back Space: From 4" To 6"

Bead-Loc Available:

- Black 18-Bolt DBL
- Black 18-Bolt Ultra-Lite DBL
- Gold 18-Bolt Ultra-Lite DBL
- Polished 18-Bolt DBL
- Polish 18-Bolt Ultra-Lite DBL
- Liner App. – Knurle

Centre Finish:
Black, Polished & Gold

WEP650-5179MT	15" Bead-Loc Ring, 20-Hole for M/T Tyres

S-71 RT-Series

WELD S-71 & S-74 Series Rims

Weld Racing brings its application flexible racing technology to the street with a budget friendly 3-pc modular wheel using a unique welded assembly process. This wheel has the classic Weld Racing 5-spoke star look and continues the Weld Racing tradition utilizing a forged billet centre and cold forged rim shells. This unique wheel offers 3 mounting pad heights to clear specific drum and multi-piston opposed calipers. Target applications for this wheel include cars from the 1950's through today's challenging modern applications such as the 4th generation Camaro/Firebird, C4 to C6 Corvette, 2010 Camaro, and the Cobra Mustang.

- Surpasses SFI 15.1 Drag Race Drive Wheel Specifications (15" diameter only) & SAE J2530 Aftermarket Wheel (Street) Standards
- Centre is available in polished or black anodized
- Wheel widths from 4" to 18" with a wide variety of back spacing's
- Load rating of 1580 lbs per wheel (3160 lbs per axle)
- 15" diameter bolt patterns: 5x4.5(114.3mm), 5x4.75(120.65mm), 5x5(127mm), & limited 5x120mm
- 15" diameter wheel is designed for a 5/8" drive stud or a short shank mag style lug (except 5x5 bolt pattern)
- Centre cap and valve stem included
- Made in Kansas City, USA
- Special Order

S-71 RT-Series

- Muscular 5 Spoke Style
- 4" to 18" Widths
- 100% Forged Alloy
- Polished or Black Anodized Centre
- 15" Exceeds SFI 15.1 Requirements
- Made in USA
- Special Order

Rims Available

Diameter: 15", 17", 18 & 20"
Rim Width: 4.0" To 18"
Bolt Circle: 5X4.5 (114.3mm), 5X4.75 (120.65mm), 5X5 (127mm), & Limited 5X120mm

Back Space:

From 0.63" To 8.5"
(Backspace Varies From Rim Size & Pad Height)

Centre Finish:

Black Or Polished
Pad Height:
Low, Medium Or High

WELD RT-S SERIES

Weld Racing brings its application flexible racing technology to the street with a budget friendly 3-pc modular wheel using a unique welded assembly process. Continuing the success of the S71, utilizing a forged billet centre and cold forged rim shells, Weld Racing expands the RT-S product line with 3 new styles for 2014. This unique product line offers 3 mounting pad heights to clear specific drum and multi-piston opposed calipers. Target applications for this wheel include cars from the 1950's through today's challenging modern applications such as the 4th generation Camaro/Firebird, C6 Z06 Corvette, 2010+ Camaro (and ZL1), and the Cobra Mustang.

- SAE J2530 Aftermarket Wheel (Street) Standards
- Centre is available in black anodized
- Wheel widths from 4.5" to 18" with a wide variety of back spacings
- Load rating of 1580 lbs per wheel (3160 lbs per axle)
- Requires conical lugs. Will NOT accept 5/8" drive studs
- Centre cap and valve stem included >Made in Kansas City, USA
- NOTE: ALL RT-S RIMS ARE SPECIAL ORDER & MADE TO ORDER

15" S75-S76-S77

Size Range: 15 X 3.5" – 15 X 18.3"
Bolt Circle: 5 X 4.5", 5 X 4.75", 5 X 5", 5 X 115mm & 5 X 120mm
Style Finish: Polished Rim With Black Center

17" S75-S76-S77

Size Range: 17 X 4.5" – 17 X 18"
Bolt Circle: 5 X 4.5", 5 X 4.75", 5 X 115mm & 5 X 120mm
Style Finish: Polished Rim With Black Center

17" S71B Beadlock

Size Range: 17 X 9" – 17 X 12"
Bolt Circle: 5 X 4.5", 5 X 4.75", 5 X 115mm & 5 X 120mm
Style Finish: Polished Rim With Black Center & Bedloc

18" S75-S76-S77

Size Range: 18 X 4.5" – 18 X 18"
Bolt Circle: 5 X 4.5", 5 X 4.75", 5 X 115mm & 5 X 120mm
Style Finish: Polished Rim With Black Center

20" S75-S76-S77

Size Range: 20 X 4.5" – 20 X 17.5"
Bolt Circle: 5 X 4.5", 5 X 4.75", 5 X 115mm & 5 X 120mm
Style Finish: Polished Rim With Black Center

Weld Black Draglite for Street and Strip

The new Draglite wheels are available in a black finish with a polished edge to complement more aggressive styling. The WELD Street & Strip Black Draglite wheel is available in 15-inch diameters and in widths from 3.5" to 15". Engineered to offer the best strength to weight ratio, the Black Draglite is classic styling coupled with maximum performance. All WELD wheels are engineered, produced, and tested at WELD's facilities in Kansas City using only aircraft grade aluminum alloys and state-of-the-art manufacturing. Part Numbers and sizes are same as Polished Draglites with a "B" alert the prefix number.

Example WE90-58040 is polished
WE90B-58040 is the black wheel

Draglite

- Forged Alloy Construction
- Fully Polished Finish
- Push In Centre Cap Included
- Optional Centre Caps Available

PARTS FOR WELD DRAGLITE, PRO STAR & RODLITE WHEELS

Valve Stems

Supplied as packs of 4, these valve stems fit all Weld racing wheels.

Chrome Sleeve Pull Thru Valve Stems	WE604-5413
Chrome Bolt In Valve Stems	WE604-5463
Flush Mount Valve Stems	WE604-5004
Valve Stems for Spindle mount front wheels	WEP613-0350

DRAGLITE & Rodlite Centre Kits

These kits replace the standard centre caps on Draglite and Rodlite wheels. The wheel nuts are concealed by the base, giving the appearance of a knock off wheel or a large single hex nut.

For Draglite and Rodlite wheels only.	
Complete Hex Nut Kit	WE605-7006
Complete Knock Off Kit	WE605-7008
Replacement Hex Nut Only	WE605-7002
Replacement Knock Off Only	WE605-7004

Chrome Hole Plugs

Designed to cover the unused holes on wheels with dual bolt circles, these plastic plugs simply snap into the extra lug nut holes. Supplied in packs of 5.

Chrome Plugs, 11/16" Diameter	WE604-5100
-------------------------------	------------

Chrome Wheel Plugs

Made to cover the unused bolt holes in dual bolt pattern wheels, these chrome plated plastic plugs snap into the standard 11/16" lug nut opening. Sold in sets of 5.

Wheel Nuts

Genuine Weld chrome plated wheel nuts for Weld wheels and other brands. Open end nuts are required for most race cars, closed end nuts are for neater appearance on the street. All are supplied with washers.

BILLET SPECIALTIES WHEELS

Billet Specialties alloy wheels are available as a special order from the USA. Delivery time will vary depending on your selection as less popular sizes are custom made to order. **Specially ordered wheels are not returnable so please measure carefully to ensure you get a wheel that fits correctly.**

For assistance please contact Rocket sales on (02) 8825-1900 or email sales@rocketind.com.

COMP SERIES

Comp 5 - 1pc. Spindle Mount

- 1-piece forged design
- Available in BLACK or Polished
- Includes bearings and seals
- Includes screw-on centre cap
- Allows for direct mounting of brake rotor
- SFI 15.2 certified - Drag Race Front Wheels

STREET LITE

Designed for the street or strip the new Street Lite wheel is SFI 15-1 approved, light weight, and features an outstanding strength-to-weight ratio.

Street Lite Wheels:

- Accept mag shank lug nuts
- Combine polished & machined finishes for an aggressive look
- Use bolt-on centre caps w/ counter sunk allen screws
- Feature rotary forged aluminium centres
- Feature a 360° welded 2-piece construction
- Are super light weight (15x4 = 10.5 lbs.)
- Use spun aluminium rims for high strength & superior run-out

Rally Series

Featuring a light weight forged billet centre and spun aluminium outer rim the Rally brings all the looks and flexibility of a custom wheel at a truly affordable price. The Rally is CNC machined for light weight performance and classic styling. With the included centre cap and conventional lip rim the Rally is a complete custom wheel ready for your hot rod or muscle car. Available in 15" & 17".

Profile Collection

Each wheel is the product of state-of-the-art multi-axis machining technology. Intricate machine code scripts each spoke to perfect form and balance with thousands of tool paths. Each of these wheel styles spend approximately 4 to 5 times the amount of cycle time compared to typical billet wheels. Available in 17, 18 & 20"

VINTAGE SERIES

The latest additions to the Billet Specialties Vintage range. Available by special order made to your specs.

Vintage Series

Traditional styling meets flawless finish in the impressive collection of hot rod wheels. Each of these styles is precision 3D-machined and hand finished to the smooth, mirror-like finish you expect from a Billet Specialties wheel. Vintage Series wheels are the ultimate statement of quality, tradition, & style chosen by the nation's premier car builders. Available in 17, 18, 20 & 22

SLG Series

Looking for a little more out of your wheels? The SLG Series features select styles from the GTX Series and fuses them into a soft lip rim giving them the appearance of a larger wheel and the popular "rolled edge" outer rim. With oversized centres your 22s with look like 23s! Available for most rear wheel drive applications. Available in 17, 18, 20 & 22"

ET Gasser 10 Spoke

Yesterday's Look For Tomorrow
Designed for T-Buckets, Willys, Anglias, Hi Boys, Pro Streets or any Rod that wants that nostalgia "wheels up" look of yesteryear. The really special part about this wheel is that it's a bolt on! (You didn't notice the lug nuts did you?) That allows the ET Gasser to be used with brakes. Bolt pattern is 5 to 4-1/2" or 5 to 4-3/4" and is designed to fit straight axle or independent front ends. Construction is all aluminium. Available with a polished rim and as cast center or full polished with the spokes polished on front and backside. Spokes are 3" apart at centre. Available Finishes: Full Polished, As Cast Centre

ET Gasser (10 Spoke)

Bolt-in Chrome Valve Stems

Bolt-in valve stems allow for a better seal and no leaks. Chrome finish matches our wheels perfectly. Sold in packs of 4.
BS999900 Chrome Bolt In Valve Stems (4)

Bolt-On Spinner Cap

Dress up your Mag, Rival, Rally, Dyno or Street Lite wheels with these Bolt-On Spinner caps. 100% machined from 6061-T6 aluminium each spinner is a work of machined art and is sure to add some extra vintage style to your wheels. Sold individually.
BS999260 Bolt-On Spinner Cap - Flat
BS999265 Bolt-On Spinner Cap - Deep

TEAM III WHEELS

E-T Dragmaster

Designed for Willys, Anglias, High Boys, Pro Streets or any Rod that wants that nostalgic gasser look of yesteryear. It is made in spindle mount and direct mount, using your hub, for early ford spindle. It uses standard willwood brakes. But the really special part about this wheel is that it's also made as a bolt on! (You didn't notice the lug nuts did you?) That allows the E/T Dragmaster to be used with brakes and is easy to change. Bolt pattern is 5 on 4-1/2" or 5 on 4-3/4" and is designed to fit straight axle or independent front ends. Construction is all aluminium. Available with a machined rim and as cast center or full polished face. The wheel is also made as a 2 piece construction for sizes from 6" to 15" wide, in 15" diameter. Call Rocket for more sizes and information

AC-III Cast Finish Lug Nut Cover, 4-Pack

Part No.
ETACKO-KIT
ETACLC-KIT-C

E-T FIVE

WINDOW LOW ANGLE

The Low Angle center is 2 inches deep through the windows (front to back). This is necessary for narrow or shallow wheels when putting the center as far forward as possible. This gives maximum fender clearance and is usually used for front wheels.

The front side setting will be minimum. The all-aluminum wheel is available fully polished or with a cast center and polished rim. It can be had smooth spoke or with E-T's trademark allen bolt in the spoke, this will allow it to match the Fueler.

Full Polished

ET Fueller

Street or strip this wheel has the appearance to do it all! Cast Finish spokes for that competition look or Fully polished for the modern street rod style. The highly curved spokes flow out to join the rim with no steps or corners. A reminder when these wheels had no drop center to prevent the tire from coming off at high speeds on Top Fuel Dragsters. The 40 year old design has the biggest windows you'll see, making it the most aggressive looking on the market. The 16" is ideal for highboys where the backside can be ordered to create the perfect tire-to-body gap. The spokes start a full 3 1/2 inches back from the front edge on the 16" models giving a very deep appearance. Note rear wheels are only made with bolts in the spoke, and the front 15x6 one piece wheel can be had with out the bolt in the spoke.

Available Finishes: As Cast, Full Polish
Knock Off kit (set of 4) also available.

Sizes from 14" x 4.5" up to 16" x 12"

ET Five Window High Angle

The High Angle center is 3 1/2" deep through the windows (front to back). The wide thicker center curves much further out giving a deeper bowl appearance. Because of its width, it can only be made in 8" or wider widths. The wider the rim the more offset variation is available. High Angle wheels come full polished to an almost chrome like finish or with a cast center and machined rim.

TLC42705C	12mm x 1.50" R.H.	Set of 4 plus Key

SST Mag Wheel Lock Sets 2.3" Tall

Sets contain 4 wheel locks and 1 key socket.

Part#	Thread Size	Description
TLC42205XLC	7/16" R.H.	Set of 4 plus Key
TLC42405XLC	1/2" R.H.	Set of 4 plus Key
TLC42705XLC	12mm x 1.50" R.H.	Set of 4 plus Key

Adapter Sockets

Part#	Description
TLC405	13/16" Deep Well Socket (Lug Nut size) 3/8" Drive with 3/4" & 13/16" Hex
TLC406	3/4" Deep Well Socket (Lug Nut size) 3/8" Drive with 3/4" & 13/16" Hex
TLC408	7/8" Deep Well Socket (Lug Nut size) 3/8" Drive with 13/16" & 7/8" Hex
TLC408	17mm Deep Well Socket (Lug Nut size) 3/8" Drive with 17mm & 19mm Hex

1/2" Drive Thin Wall Sockets

Part#	Description
TLC410-3	3/4"
TLC410-4	13/16"
TLC410-5	7/8"

3/8" Drive Specialty Socket With plastic Steel Insert

This specialty socket includes a plastic steel insert, which is designed to prevent the stripping and/or chipping of your lug nuts.

Part#	Description
TLC411	3/4" with Plastic Insert
TLC412	13/16" with Plastic Insert

Lug Nut Wrenches Chrome Plated T-Bars

Part#	Description
TLC403	Folding 21mm, 13/16", 7/8" Hex
TLC410	Extension Wrench 1/2" Drive with 3/4" & 13/16" Deep Thin Wall Sockets

MOROSO WHEEL LUG NUTS

- Manufactured from high grade steel for resistance to fatigue and stress
- Meets NHRA 5.2 rule of hex being length of diameter of stud
- 60° Seat
- Black Oxide finish
- 5 per package
- Made in the U.S.A.

Description	Part No.
7/16"-20 60° Tapered Seat, Black Oxide (5-Pack)	MO46320
1/2"-20 60° Tapered Seat, Black Oxide (5-Pack)	MO46330
5/8"-18 60° Tapered Seat, Black Oxide (5-Pack)	MO46340
12mm x 1.5 60° Tapered Seat, Black Oxide (5-Pack)	MO46345

WHEEL NUTS SOLD IN PACKS OF 5

Aeroflow Performance range of wheel nuts are designed to keep your wheels on your car, but they will also add some class at the same time. These wheel nuts are designed and constructed to strict engineering quality standards. Made from Grade 6 steel for structural integrity, then hardened and tempered, reaching the depth of hardness needed for their unsurpassed level of safety. They are treated with high corrosion resistance to combat rust in any environment then nickel plated in chrome or black for lasting beauty. The range of Aeroflow Performance wheel nuts are available in a variety of thread sizes, shank lengths, seat or conical styles in both open and closed to suit all wheels available in today's market.

MNAA111RDIC	Red Iron Cross Valve Caps (Pair)
MNRAF280GR	Rat Fink Valve Caps (Pair)

BACKSPACE & FITTMENT GUIDE

How to Measure Bolt Circles.

Bolt Circle (Pattern) The diameter of an imaginary circle drawn through the center of each lug hole or stud. See illustration below.

4 Lug
Middle of two holes directly across from one another

5 Lug
Back of hole to center of the second hole.

(Note: this is the easiest way we know to estimate the 5-Lug bolt circle.)

6 Lug
Same as 4-Lug

8 Lug
Same as 4-Lug

Recommended Lug Nut Foot/lbs. Torque Specs.

Always refer to the Owner's Manual for proper factory specifications that take precedence over the listed recommendations.

12mm=80, 7/16"=75, 1/2"=90, 14mm/x1.5=95, 14x2.0=140, 9/16"=115, 5/8"=145

IMPORTANT NOTICE: As with all types of wheels retorque Lug Nuts after first 25 miles & at 100 mile intervals until torque is maintained.

Tighten Lug Nuts in a Criss-Cross Pattern for Best Equal Torque Distribution

LUG TORQUING PATTERNS

LUG

LUG

LUG

LUG

Note: 7-lug torque sequence similar to 5 lug.

HOW TO: BACKSPACE & FITTMENT GUIDE

NOTE: Remove all brake retention circlips from wheel studs before mounting Weld Wheels

It is extremely important to accurately measure a wheel to determine what Weld Racing wheel combinations will or will not work on your vehicle!

The most important considerations are the bolt pattern, hub diameter, rim width, rear or back spacing, lug nut type and wheel-load capacity. It is also good advice to double check the mounting surface to ensure that there is a flat, clean mounting surface.

- The **Bolt Pattern** (or lug pattern) is determined by the number of bolt holes and the bolt circle diameter.
- The **Hub Diameter** or center bore is the hole at the center of the wheel.
- The **Rear Spacing** is the distance from the backside of the wheel mounting pad to the outside of the rim flange.
- **Offset:** The distance from the centerline of the wheel to the mounting surface of the wheel.
- **Negative Offset:** When the back of the bolt pad is closer to the inside of the wheel; when mounting surface is inboard of the rim centerline.
- **Positive Offset:** When the back of the bolt pad is closer to the street side of the wheel; when the mounting surface is outboard of the rim centerline.
- **To Convert Millimeters to Inches:** Divide by 25.4. **EXAMPLE:** 100mm divided by 25.4 = 3.937"
- **To Convert Inches to Millimeters:** Multiply by 25.4. **EXAMPLE:** 4.750" X 25.4 = 120.65mm.

Vehicle Fitment

When determining that the selected Weld Racing wheel meets the requirements of a particular vehicle, make sure it is compatible with the physical aspects, such as suspension clearance. Tie rod ends, A-arms, brake calipers, shocks and shock mounts may be potential trouble spots. Another area of concern is both the inside and outside of fender area. This should be checked with wheels turned lock to lock from left to right with car static and with suspension fully collapsed.

"Plus One" and "Plus Two" Concept: Explained.

The "Plus One" and "Plus Two" Concept allows a larger diameter wheel combined with a low aspect tire to effectively reduce tire sidewall flex. This concept allows vastly improved cornering ability, steering response and handling stability without having to make modifications to body or suspension systems. "Plus One" increases rim size (i.e. 15" to 16") which allows for a lower aspect tire to be used without changing the overall tire height from the original tire specs (i.e. 235/60R15 to 255/50R16).

The "Plus Two" increases the rim diameter by two sizes (i.e. 15" to 17") allowing for a tire of even lower aspect (i.e. 235/60R15 to 245/45ZR17) again without changing the overall original tire height. Because overall tire height has not changed, there usually is no interference with fenders or inner panels, and speedometer/odometer accuracy is maintained.

NPT & AN SIZE CHART

Male NPT Identification Chart

The line drawings below depict the actual sizes of the various common NPT thread sizes. If you are unsure as to what thread size you are using lay your fitting over the appropriate drawing to determine its size.

Male AN/ORB Adapter Identification Chart

The line drawings below depict the actual sizes of the various common AN/ORB thread sizes. If you are unsure as to what size fitting you have lay your fitting over the appropriate drawing to determine its size.

NOTE: - AN and ORB thread are the same diameter. AN seals with the flare, ORB seals with an O-ring.

AN Hex OD Identification Chart

The line drawings below depict the actual sizes of the various common types of fittings, hose ends and adapters. The number is SAE spanner size equivalent.

Recommendations

For water and coolant you can use any of the hose ranges. Must use clamps on the 400 Series rubber hose. Replace hoses if engine temp rises over 100°C (212°F)

For engine oil minimum 100 or 450 series hose is recommended, 200 & 250 series are recommended for racing applications.

For Transmissions and power steering 200 or 250 series teflon hose must be used.

5000	34474	344.7
6000	41369	413.7

CONVERSION FORMULAS

These are the basic conversion formulas. To convert the other way simply divide instead of multiplying. For example, to convert inches to millimetres multiply by 25.4 and to convert millimetres to inches divide by 25.4.

- INCHES TO MILLIMETRES: $MM = Inches \times 25.4$
- FEET TO METRES: $Feet = Metres \times .3048$
- MILES TO KILOMETRES: $KM = Miles \times 1.609$
- CUBIC INCHES TO CUBIC CENTIMETRES: $CC = In^3 \times 16.387$
- LITRES TO US GALLONS: $L = Gal \times 3.7854$
- HORSEPOWER TO KILOWATTS: $HP = KW \times 1.34$
- FOOT POUNDS TO NEWTON METRES: $NM = Lb/Ft \times 1.356$
- POUNDS PER HOUR TO HORSEPOWER: $HP = Lb/Hr \times 2$
- GALLONS PER HOUR TO HORSEPOWER: $HP = GPH \times 12.5$
- LITRES PER HOUR TO HORSEPOWER: $HP = L/Hr \times 3.273$
- GALLONS PER HOUR TO POUNDS PER HOUR: $Lb/Hr = GPH \times 6.25$
- POUNDS PER HOUR TO CC PER MINUTE: $CC/Min = Lb/Hr \times 10.5$
- GRAMS PER MINUTE TO CC PER MINUTE: $CC = Grams/Min \times 1.297$

RPM TO SPEED

Use this formula to calculate your speed at a given RPM or your RPM at a given speed. The tyre diameter should be entered in inches and the gear ratio is the diff ratio multiplied by the gear ratio or just the diff ratio for a 1:1 top gear. To calculate in MPH use 336 instead of 209.

$$KPH = \frac{(RPM \times Tyre Diam.)}{(Gear Ratio \times 209)} \quad RPM = \frac{(KPH \times Gear Ratio \times 209)}{Tyre Diam.} \quad Tyre Diam = \frac{(KPH \times Gear Ratio \times 209)}{RPM}$$

ENGINE CAPACITY

This formula works in metric or imperial. If you enter the bore and stroke in Inches you will get the capacity of one cylinder in cubic inches (swept volume) and if you enter the bore and stroke in Centimetres you will get the capacity in CC. Then multiply by the number of cylinders.

$$Swept Vol. = Bore \times Bore \times Stroke \times .7854$$

ENGINE CAPACITY CC (Bore & Stroke in Inches)

This formula gives you the volume of the one cylinder in CC (swept volume) when you enter the bore and stroke in inches. You can use the volume of one cylinder to calculate compression ratio or multiply by the number of cylinders to find the engine capacity.

$$Swept Vol. = Bore \times Bore \times Stroke \times 12.8703$$

COMPRESSION RATIO

To calculate the compression ratio, divide the volume at BDC by the volume at TDC. The volume at TDC is the volume of the combustion chamber plus the head gasket and piston dish (or minus piston dome). The volume at BDC is the TDC volume plus the volume of the cylinder (swept volume). To find the swept volume in CC, use the formula above for engine capacity but this time do not multiply by the number of cylinders. In the example below we will calculate the compression ratio for a 383 stroker (4.030" bore x 3.750" stroke) with 64cc combustion chambers, a 9cc head gasket and a 12cc dish piston.

$$Swept Vol. = Bore \times Bore \times Stroke \times 12.8703$$

$$Compression Ratio = \frac{TDC Vol + Swept Vol}{TDC Vol}$$

Example: 4.030 Bore x 3.750" Stroke with 64cc Chamber, 12cc Dish & 9cc Head Gasket

1. Swept Volume: $4.030 \times 4.030 \times 3.750 \times 12.8703 = 783.8447cc$
2. TDC Volume: $64 + 9 + 12 = 85cc$
3. BDC Volume: $783.8447 + 85 = 868.8447cc$
4. Compression Ratio: $\frac{783.8447 + 85}{85} = 10.221$

INJECTOR SIZING

To calculate injector size you need to know how much horsepower your engine makes and divide by the number of injectors to find horsepower per injector. The formula below assumes a brake specific horsepower of 0.5 and injector duty cycle of 80%. Use the reverse formula to calculate the horsepower rating of an injector from its flow rate.

To calculate injector size:

$$Lb/Hr = \frac{HP}{1.6} \quad CC = \frac{HP}{0.1523}$$

$$To calculate Horsepower: \quad HP = Lb/Hr \times 1.6 \quad HP = CC \times 0.1523$$

HORSEPOWER TO TORQUE

This formula shows the relationship between power, torque and RPM. If you know how much torque you are making at a given RPM you can calculate horsepower and if you know the horsepower you can calculate torque.

$$HP = \frac{RPM \times Lb/Ft}{5252} \quad Lb/Ft = \frac{HP \times 5252}{RPM}$$

Application (Street, Street/Strip, Drag, Oval) _____ Rear End (12-Bolt, 9", etc.) _____
Type & Brand of Center Section _____ No. of Splines _____
Flange O.D. (Std. is 6.245) _____ Type of Brakes _____ Vehicle Brakes are from _____
Driver Side "C" _____ Passenger Side "C" _____ "A" _____ "B" _____ "H" _____ "F" _____
Bolt Circle _____ Wheel Stud Diameter (1/2, 5/8) _____ Wheel Stud Length (2", 3") _____
What Type of Housing End? _____ (Circle Correct Type)

Below is a list of related parts available to correctly install your axles. Check any that may apply. A salesperson will contact you with pricing and package deals where applicable.

- Axle Bearings
- C-Clip Eliminator
- Ring & Pinion
- Bearing Retaining Plates
- Spool
- R&P Install Kit
- Wheel Studs
- Spool Bearings
- Other _____

To order a custom housing OR if you want us to calculate axle lengths, please provide the following information:

- Passenger Side Housing End to C.P. (L) _____
- Driver Side Housing End to C.P. (O) _____
- Housing End to Housing End (L) + (O) _____
- Passenger Side Axle Flange to C.P. (M) _____
- Driver Side Axle Flange to C.P. (J) _____
- Axle Flange to Axle Flange (Wheel to Wheel) equals (M) + (J) _____

NOTES: (1) Axle Flange to Axle Flange is measured from the OUTSIDE (Wheel Side) of the axle's flange to OUTSIDE (Wheel Side) of the opposite axle's flange.

(2) If you have listed only housing end to housing end or axle flange to axle flange - you must specify pinion offset.

NOTES: (3) (B) dimension should be measured with the axle bearing removed. If you cannot remove the axle bearing, insure that you supply a proper (F) dimension.

(4) (H) Dimension is not necessary if receiving bearings from Strange.

CHARTS, FORMS & RESOURCES

Cutaway showing our unique proprietary compression design.

KRYPTALON® ASSEMBLY INSTRUCTIONS

1. Measure desired hose length and wrap tightly with Aeroflow's non-stick cutting film, (part # AF98-2049), allowing at least 3 full rotations of the non-stick film.

2. Cut through the center of non-stick film while ensuring that you cut the hose at a 90 degree angle using Aeroflow cutters, (part # AF98-2052), or alternatively you can use a box cutting knife being careful not to fray the Kevlar braid.

3. Carefully slide the socket nut over the hose while keeping the non-stick film on the end of the hose.

4. Carefully slide the olive onto the end of the hose ensuring that the slots in the olive face towards the socket nut.

5. Carefully slide olive past non-stick film then remove the non-stick film and slide olive back up to end of hose. Apply a small amount of Aero-Seal (part # AF98-2023), onto the male thread of the kryptalon® hose end and screw the socket nut onto the Kryptalon® hose end.

6. Secure the hose end socket using Aeroflow vice jaws (part # AF98-2001 or AF98-2002) or by using an Aeroflow aluminium wrench (part # AF98-2003 or AF98-2039). Tighten the Kryptalon® hose end clockwise until the socket nut is tight, ensuring the correct crush of the olive onto the hose. You should notice that the male thread of the fitting is not showing, covered by the socket nut.

100 SERIES ASSEMBLY INSTRUCTIONS

Wrap masking or electrical tape tightly around the hose to prevent fraying and cut with hose cutters for best results.

Mark the hose with a felt pen to detect any movement while the assembly process is completed.

Place the socket in a vice, remove the tape from the hose and push it into the nut while twisting the hose. Aeroflow's soft jaw vice adapters (inset) are recommended to prevent damage to fittings.

Lubricate the threads on the hose and nipple with a aeroseal and place the nipple in a vice.

Holding the hose, push the socket nut onto the nipple thread.

Tighten the fitting until the socket has a gap of approximately 1.5mm. Check that the mark on the hose has not moved from the end of the socket nut.

© Rocket Pty Ltd 2023

Committed to the future of Australian Speedway

Welcome to the Speedway section of the 2023 Rocket Industries Products and Accessories Catalogue. These pages represent the level of commitment we have to supply you with the very best in Speedway parts and accessories. We are a genuine warehouse distributor, stocking products from over 150 leading manufacturers and suppliers. With over 40,000 different part numbers in stock we are able to ship most orders on the same day. We are serious about supplying you with the right parts. If we do not have a particular item you need, we will be happy to place a special order directly with our suppliers. We have established supply chains from overseas which enable fast and reliable service and parts sourcing without all the headaches and hidden charges.

Each and everyone at Rocket has a genuine passion for motorsport, many staff members have their own street machine, hot rod or race vehicle or are associated with a team. This depth of knowledge and understanding of the demands placed on a car under extreme conditions reflects in the pride and winning attitude of our team at Rocket.

At Rocket we are always looking forward and have allocated special sections of our business to key markets such as Speedway, Drag Racing & Hot Rods and Customs. We have employed dedicated professionals who are committed to supplying these markets with the best the aftermarket has to offer. Along with this is a dedicated warranty and support section which has the ability to offer our customers product testing and repairs on all our products with full factory support.

No matter how large or small your racing needs are Rocket's mission is to supply you with the right products at competitive prices - when you need them. Enjoy...

Quick Index

Chassis & Accessories

Chassis, Motor Plates, Rock Screens, Bumpers, Nerfs

S1 – S3

Body Panels & Accessories

Body Panels, Guards, Deflectors, Pans

S3 – S5

Front End Components

Front Axle Assemblies, Steering Arms, Combo Arms, Spindles, Direct Mount Front Hubs, King Pins, Front Arms & Bars

S5 – S6

Steering Components

Steering Boxes, Pumps, Hose Kits, Pit Man Arms, Steering Mounts, Steering Wheels, Fluids, Tie Rods & Drag Links, Radius Rods

S7 – S9

Sprint Car Engine Accessories

Front Cover Assemblies, Water Pumps, Radiators, Gauges, Ignition Components, Air Filters, Outerwears, Oil Pumps, Dry Sump Tanks, Exhaust

CHASSIS

XXX Raked Cage Sprint Car Chassis

Race proven quality and craftsmanship has shot the XXX product to numerous 410/360, winged and non-winged championships and race wins across the world. The 87/40 and 88/40 raised rail chassis has been designed with the most common dimensions available on the market today. Entirely constructed of certified and tested TIG welded 4130 Chrome moly tubing.

Technical Specifications

- 100% Chromoly Tubing • Weight: 195lbs. • Torsion Bar Split: 1 3/4"
- 1" Raised Rail • Torsion Bar Length: 30"

Features

- 90° Shock towers to save shock absorbers in accidents • Long rear radius rod provision
- Gnarled torsion tubes for a slip free surface when mounting front wing post clamps
- Centre mount 1" nose wing post spuds • Half and full box steering mount provision
- Dual top wing post/tree mounts • Rake cage, suitable for tall or short drivers
- Right side intrusion bar • Torque tube hoop

Options

- 87" or 88" wheelbase

- XXX 87/40 Sprint Chassis TXRCS1000872S
- XXX 88/40 Sprint Chassis TXRCS1000882S

XXX Sprint Car Chassis Replacement Front Clip

Full chassis from the Engine plate forward including down tubes. Constructed of the same 100% certified and tested Chromoly as the XXX chassis.

Available for Standard or Tall Chassis. Call for details.

CHASSIS ACCESSORIES

XXX Sprint Car Halo

4130 chromoly, compatible with XXX and many other chassis. Encloses the top of the roll cage for greater driver safety. Built 24-5/8" wide and 7-7/8" from front to back. TXRC-SC-CH-0020

Bolt On Head Protection Bars

Fit most chassis – call for compatibility. BHR091

XXX Torque Tube Hoop

4130 chromoly, 6-1/2" centre – centre. TXRC-SC-CH-0007

HRP Torque Tube Hoop

7" centre-centre HRP-8065

HRP Wing Valve Tab HRP-0009T.125

HRP Master Cylinder Tab HRP-0137T

HRP Brake Pedal Tab .200" hole O.D HRP-0096T

HRP Half Box Steering Tab

Accepts half box style mounting brackets. Sold individually. HRP-0125T

HRP Down Tube Wing Spud 1.250" x .120" HRP-3081W

HRP Brake Line Tab Suitable for #3 Bulkheads. HRP-0093F

HRP Nerf Bar Spud Front & Side Nerfs HRP-3050W Rear Nerf HRP-3060W

HRP SureLoc Shifter Tab Weld on tab – suit DMI and Winters shifters. HRP-0127T

HRP Radiator Mount Tab 4130 Chromoly, 7 1/2" long. HRP-0090F

XXX Wing Tree Tab Designed to replace rear wing tree tab on almost any sprintcar. TXRC-CJ-14

XXX Wing Ram Tab Chassis tab for hydraulic wing ram. Able to be fitted to any chassis. TXRC-CJ-13

XXX Front Shock Towers 90 degree shock towers will suit any chassis. Left Front TXRC-SPUD-0031 Right Front TXRC-SPUD-0032

XXX Top Wing Spud

Spud and gusset available separately. Wing Post Spud TXRC-SPUD-0023 Wing Post Gusset TXRC-SPUD-0017

XXX Fuel Cell Tabs

Suitable to replace the fuel cell mounts on any chassis using an outlaw style tank. Upper Cell Mounts TXRC-SPUD-0016 Lower Cell Mounts TXRC-SPUD-0024

XXX Chassis Steering Box Clamp Left Side

Supplied complete with two bolts this kit will weld onto any chassis. TXRC-SPUD-837

Transponder Pouch

RS-JOE17510

SCI Billet Transponder Bracket

RS-SCI-1104

MOTOR PLATES

XXX Aluminium Rear Motor Plate

Black anodised. Lightened on inside so dirt can't get trapped in lightening pockets. All holes are drilled and tapped, with multiple pump mounting holes for standard or raised cam engines. Suit XXX, Maxim, and Eagle. TXRC-SC-EG0006 Natural TXRC-SC-EG0006B Black

SCI Long Raised Rail Black Motor Plate

RS-SCI-1197

LRB 3° Motor Plate Wedge

Designed to create more forward drive, the pair fit between the chassis and the engine plate to create a 3° inclination. RS-LRBWDGE-E/M

SCI Motor Plates

Designed to allow the chassis to flex at the front. CNC machined 2024 aluminium is black anodised and bushes are replaceable. Bushed Front Motor Plate RS-SCI-1165 Replacement Bushes RS-SCI-1164

DMI Light Weight Aluminium Front Motor Plate

Pre drilled and tapped for oil tank bracket. DMI-SRC2830

MOOSE Motor Plate with Oil Tank Mount
MOO-2220

MOOSE Replacement Motor Plate Bushes
Supplied as a pair. Suits all Moose motor plates.
MOO-2045

SPP Chassis to Top of Block
3/8-16 x 2-1/2"
SPPHH375-16-2500

SPP Motor Plate to Chassis Bolt
3/8-24 x 2-3/8"
SPPHH375-24-2375

SPP Front & Rear Motor Plates to Block
3/8-16 x 1-1/8"
SPPHH375-16-1125

PEDALS

XXX Gas Pedal
Black powdercoated
4130 Chromoly tube 12" Long and 4" wide.
Weight: 0.6 lbs
TXRC-SC-CH-0006

HRP 12" Gas Pedal
4130 Throttle Pedal
Titanium Throttle Pedal

HRP-8105
HRP-8106

XXX Carbon Throttle Pedal
TXRC-SC-CH-0006C

HRP 9" Short Gas Pedal
4130 Chromoly steel coated black or titanium.
Chromoly HRP-8107
Titanium HRP-8108

HRP Brake Pedal
4130 Std Rail HRP-8100
Titanium STD Rail HRP-8101
Raised Rail HRP-8100RR
Titanium Raised Rail HRP-8101RR

XXX Brake Pedal Raised Rail
Black powdercoated 4130 Chromoly pedal to suit raised rail cars. 13" Long from chassis pivot to bottom. 2-3/8" centre - centre from chassis pivot to master cylinder spud. 5" wide.
Weight: 0.4 lbs
TXRC-SC-CH-0005

XXX Carbon Fibre Raised Rail Brake Pedal
TXRC-SC-CH0005CF

SALDANA Floor Mount Gas Pedal
SAL-TP

HRP Heel Riser Foot Retainer
HRP-8056

HRP Heel Riser

Fabricated aluminium.
Pre drilled for pop-riveting to floor pan, and designed not to trap dirt.
1/2" Heel Riser HRP-8064
1 1/8" Heel Riser HRP-8062
1 1/2" Heel Riser HRP-8063

SALDANA Heel Riser

1" Height SAL-HR-1
2" Height SAL-HR-2

XXX 1" Carbon Heel Riser
TXRC-SC-CF7297CF

XXX 1 1/2" Carbon Heel Riser
TXRC-SC-CF6335CF

ROCK SCREENS

Rock Screen Clamp
TXRC-SC-CH-0158

XXX SPRINT CAR ROCK SCREEN
XX Sprint Car Rock Screen. Black powder coated. Mandrel bent steel screen easily attaches to the roll cage uprights of most all Sprint Car chassis and adds protection for the driver from debris entering the cockpit. Slots are 2" apart. Width: 25", Height: 7 1/2". Color: Black, Slots: 2" wide.
TXRC-SC-CH-0157

XXX Titanium Rock Screen
TXRC-SC-CH-0157T

HRP Titanium Rock Screen
HRP-8068-S

BUMPERS & NERFS

Front Bumpers
Designed to fit all major chassis manufacturers specifications.
Stainless Front Bumper BHR076

Stainless Double Row Bumper
BHR077

Double Row Nerf Bars

The most protection for your headers, mufflers and car from being damaged. Double row nerfs also help to prevent jumping wheels in tight racing situations.

Left Hand Nerf BHR080
Right Hand Nerf BHR081

Nerf Bars

Jig Fabricated for Standard or up rail sprint car's. Designed to fit all major chassis manufacturers specifications. Stainless steel.

Shorty R/H Stainless BHR083
Shorty L/H Stainless BHR082
Long R/H Stainless BHR085
Long L/H Stainless BHR084

Double Row Front Bumper
TXRC-SC-BN-9276B

Front Bumper
TXRC-SC-BN-0019B

XXX Black Bumpers & Nerfs
Shorty R/H Shorty Nerf
TXRC-SC-BN-0002B

Shorty L/H Shorty Nerf
TXRC-SC-BN-0004B

XXX Polished S/S Long R/H Shorty Nerf
TXRC-SC-BN-0013

XXX Polished S/S Long L/H Shorty Nerf
TXRC-SC-BN-0014

Rear Bumper w/ Post & Braces
TXRC-SC-BN-0006B

Rear Bumpers

Available in different styles and designed to fit all major chassis manufacturers specifications and dimensions.
Basket Rear Bumper BHR078
Rear Bumper w/ Post & Braces TXRC-SC-BN-0012

SPP Titanium Nerf Bar Bolts
10/32 X 1-1/2"
SPPHL-10-32-1500

Bumper And Nerf Hardware Kit

Includes all nuts and bolts for front and rear bumpers, and left and right nerfs.
TXRC-SC-BN-3472

Titanium Nerf Bar Bolt Kit

Super light titanium nerf bolt kit with jet nuts. Includes all nuts and bolts for front bumper, rear bumper, left and right nerfs. Fits all cars. Bolt Material:
Titanium Bolt Size: 10-32 x 1.50"
Hex Socket Cap Nuts: 10-32 Jet Nut
TXRC-SC-BN-3500

HOODS & SCOOPS

XXX Clean Air Scoop
Suited to the XXX "Clean Air" hood.
Gel Coat White
TXRC-SC-BW-0022

Available by special order in Black and Carbon Fibre

XXX Clean Air Hood

Takes only cool, clean air from the airbox and directs it to the injection. All dirty air is pushed over and around the hood away from the motor, keeping engine and air filter free of dirt and debris.
White Gel Coat
TXRC-SC-BW-0023

Available by special order in Black and Carbon Fibre

XXX Dual Duct Scoop

Suits Dual Duct Hood.
Standard Cage - White Gel Coat TXRC-SC-BW-0050
Rake Cage - White Gel Coat TXRC-SC-BW-0075
Tall Chassis - White Gel Coat TXRC-SC-BW-0082

Available by special order in Black and Carbon Fibre

HRP-8350

XXX Dual Duct Hood

Two outer inlets let engine breathe cool, clean air evenly into the injectors. Middle and side vents remove warm air from behind the radiator, and sweep it away from the engine bay and injection.
Standard Cage - White Gel Coat TXRC-SC-BW-0051
Tall Chassis - White Gel Coat TXRC-SC-BW-0068

Available by special order in Black and Carbon Fibre

XXX Sprint Car Dual Duct Inside The Rail Nose

Fiberglass nose for the "Dual Duct Inside The Rail" hood. Gel-Coated white. Two outer outlets (on the hood) lets engine breathe cool, clean air evenly into the injectors from underneath the nose. Style: Inside the rail dual duct. For use with hood TXRC-SC-BW-6837. Fits: Standard and Wedge Style 87" or 88" Chassis.
TXRC-SC-BW-6119 White gel coat
TXRC-SC-BW-6119B Black gel coat

Available by special order in Black and Carbon Fibre

XXX Inside the Rails Dual Duct Hood

Two outer inlets let engine breathe cool, clean air evenly into the injectors. Middle and side vents remove warm air from behind the radiator, and sweep it away from the engine bay and injection.
Gel Coat White TXRC-SC-BW-6837
Black gel coat TXRC-SC-BW-6837B

XXX Hood Plate

Hood Plates are sold separately for down tube style hoods. Aluminium. Pre drilled. Rivets to the outer side of the hood, and allows top flag to dzus in place.
TXRC-SC-BW-0100

Hood Blanket

Great for keeping the heat in engine and engine bay between races.
RS-KRP015

HRP HOOD PLATES

Description	Part No
Left Hand Hood plate	HRP-8350
Right Hand Hood Plate	HRP-8351
Top Hood Plate	HRP-8353

ARM GUARDS

XXX Left Hand Wedge Full Arm Guard

Full Enclosure Left Arm Guard. 2" Taller and Wedge Chassis. Fiberglass. Gel-Coated white. Completely encloses the left side of the cockpit leaving a small opening for driver entry/exit. Deflects air around the driver and rear of the car. Light and strong. Only fits cars with no left side safety bar.

Material: Fiberglass

Color: White

Finish: Gel-Coated

Style: For use on cars with no left side safety bar.

Fits: 2" Taller and Wedge Style Chassis. 87" or 88".

Weight: 3.8 lbs

TXRC-SC-BW-1928 White gel coat

TXRC-SC-BW-1928B Black gel coat

XXX Left Hand Arm Guard

Designed to shape around the left side safety cage and enclose the left side of the cockpit, deflecting air around the driver and the rear of the car.

Standard Chassis - Gel Coat White

TXRC-SC-BW-0003

Tall Chassis - Gel Coat White

TXRC-SC-BW-0057

FLOOR PANS

XXX Aluminium Wrap Around Floor Pan

Will suit XXX/Maxim style raised rail cars that use wrap around style floors. Measurement is obtained from centres of tube below motor plate, to rear K – brace.
15-1/2" Floor Pan TXRC-SC-BW-0013
17-1/2" Floor Pan TXRC-SC-BW-0007

XXX Aluminium Drop In Floor Pan

Radius bends for perfect drop in fit. Suits 15 1/2" centres from bar below motor plate to rear K – brace.
TXRC-SC-BW-0015

XXX Extended Side Floor

Aluminum floor Pan with extended sides come up above the muffler. Radius bends for perfect fit. Not drilled for dzus buttons. For chassis with 15 1/2" spread (center to center) from bar below motor plate to rear K-Brace. Super strong 0.080" thick to protect your feet. For use with fiberglass upper kick panels.
TXRC-SC-BW-0016

Quick Access Aluminum Extended Side Floor Pan

Aluminum Extended Side Floor Pan is built to give your sprint car completely flat sides while still allowing for complete access to the cockpit without removing radius rods. For use with Quick Access Aluminum Right and Left Kick Panels for a clean fit into recessed area with no raised edges. Not drilled for dzus buttons. For chassis with 15 1/2" spread (center to center) from bar below motor plate to rear K-Brace
TXRC-SC-BW-5684

L/H Upper Black TXRC-SC-BW-0033B

XXX "Horizontal Split Design" Lower Kick Panel

Aluminium lower kick panel to be paired with upper horizontal split kick panel. Radius bends for perfect fitment, not drilled for dzus buttons.
R/H Lower Panel TXRC-SC-BW-0030
L/H Lower Panel TXRC-SC-BW-0032

Sprint Car Tall Engine Enclosure

Left Side Tall Engine Enclosure **TXRC-SC-BW-9840**
 Right Side Tall Engine Enclosure **TXRC-SC-BW-9842**

Left Side Engine Enclosure

Engine packages are only getting more expensive, which is why it's paramount to protect the most expensive part of your car. The Triple X Engine Enclosure panels do just that - keeping heavy debris and clay away from your engine, ensuring that plug wires will always remain on and that your engine will look as good as it runs for years to come. Panels are two piece, split at the radius rod support.
 Pair with right side panel (SC-BW-9832)
TXRC-SC-BW-9830

Right Side Engine Enclosure

Engine packages are only getting more expensive, which is why it's paramount to protect the most expensive part of your car. The Triple X Engine Enclosure panels do just that - keeping heavy debris and clay away from your engine, ensuring that plug wires will always remain on and that your engine will look as good as it runs for years to come. Panels are two piece, split at the radius rod support.
 Pair with left side panel (SC-BW-9830).
TXRC-SC-BW-9832
Right - TXRC-SC-BW-8338, Suit 90° Ladder Mount

Sprint Car Right Engine Full Enclosure

The Triple X Engine Full Enclosure panel will keep almost everything out of your engine compartment, ensuring that everything behind it is protected and clean. The panel follows the hood line and is relieved only around the headers, enclosing the entire engine compartment.
TXRC-SC-BW-9952

QUICK ACCESS PANELS

Sprint Car Quick Access Aluminum Left Kick Panel 2-Piece design allows complete access to pedals and fuel system without removal of radius rods. Panels fit 2015 and newer model Triple X Sprint Cars with the straight rear cage upright.
TXRC-SC-BW-5685

Sprint Car Quick Access Alum Right Kick Panel

2-piece design allows complete access to pedals and fuel system without removal of radius rods. Panels fit 2015 and newer model Triple X Sprint Cars with the 90° right rear upright (3 3/4" long ladder pin).
TXRC-SC-BW-5693

Rear Enclosure Panel

Sprint Car Left Rear Enclosure Panel. Used to further enclose the rear of the cockpit keeping mud and debris off of rear end and components. Fits behind kick panels and compatible with fiberglass or aluminium kick panels on 2015 and newer model Triple X Sprint Cars with the straight rear cage upright.
Left - TXRC-SC-BW-8330
Right - TXRC-SC-BW-8331

Right - TXRC-SC-BW-8331

RADIATOR SCOOPS & SUPPORTS

XXX Aluminium Radiator Scoop
Must be drilled for dzues buttons, suits raised rail chassis.
TXRC-SC-CH-0003

HRP Aluminium Radiator Scoop
Designed to be used with standard rail chassis.
HRP-8327A

HRP Steel Radiator Scoop
Black powdercoated and designed to be used with standard rail chassis.
HRP-8327-MS

XXX Aluminium Radiator Support
Pre drilled dzues holes and cut out for radiator hose. Made to dzus at an angle to clear certain style hoods.
TXRC-SC-CH-0004

HRP Aluminium Airbox Front Panel
Protects bottom half of radiator, and serves as a mount for the radiator rock screen.
HRP-8301

HRP Sprint Car Radiator Support
Pre drilled dzues holes and cut out for radiator hose. Mounts in chassis at 90°.
2.125" Wide HRP-8300
2.625" Wide HRP-8300-4
3" Wide HRP-8300-5

Flat Radiator Deflector
Aluminium Flat Front Air Box. Built with the 1" raised rail angle. Dzues holes not drilled.

Quick Fastener Wrench

This zinc plated spring steel tool reduces damage to fasteners and body panels, with three different sized radii to match the slots in various 1/4-turn fasteners. Includes non-slip, hand grip.
MO71600

Easy Grip Quick Fastener Wrench
Featuring an easy grip handle and redesigned zinc coated steel shank, the blade is contoured to fit inside the 1/4-turn fastener without stripping the slot.
MO71606

Quick Fastener Washers
Quick fastener washers protect your car's finish from scratches. A must for the conscientious car owner.
Pack of 25.
MO71610

Panel Spring Adjuster Tool
The hassle of adjusting panel fastener springs is over. No more adjusting with a screwdriver or gripping with a pair of pliers. PANELfast's Panel Spring Adjuster is the right tool for the job. The panel spring adjuster is quick and easy to use, light weight and durable. It pulls the spring evenly like a panel button fastener would so you do not create any kinks or breaks in the spring. Has the ability of pushing or pulling the spring with an even amount of pressure and tension applied.
PAN7602

FRONT AXLES

XXX 50" x 2-1/4" Front Axle
Jig fabricated chromoly axles, suitable for Triple X or Maxim style cars. Features threaded panhard bar stud and threaded shock mounts.

Technical Specs
• Material: 4130 Chromoly
• Wall Thickness: .120"
• Right Front King Pin: 12°/10°
• Left Front King Pin: 10°/9°
• Offset: 1" Left

SCI Oil Fill Dust Cap

Save yourself some time on your sprint car and midget program with this Oil Fill Dust Cap. The oil filled dust covers are designed for performance and time savings on maintenance. This kit comes with everything you need to convert your standard Weld and MPD front hubs from grease to oil. The specially designed dust cover works with an O-ring to create a great sealing surface in the hub to prevent oil leaking out of the front side of the hub.

Bearing Kit

Exact Shim/Thrust Bearing Kit Needed for an XXX Front Axle and Winters Spindles. Includes 2 Shims and 1 Bearing (to complete one side of a front axle).
 TXRC-SC-FE-0006

FRONT END SET UP TIPS

Note: These instructions are specific to a 87/40 car.

Put Front Axle in the Car

1. Put the front end in the car; using a 3" block on the left side, and a 4" block on the right side.
2. Make the two right front radius rods the same length. Make the (single) left front radius rod (approx) 1/2" shorter than the right side rods. Leave the jamb nuts loose.
3. Hook up all three radius rods, and the panhard bar (tightening all nuts/bolts enough so none of them are loose).

Offset Front Axle 1" To The Left

4. Offset the axle 1" to the left by:
 - a) Pick a side, and measure from the king pin (center) to a straight edge that runs vertically from the top rail to the bottom rail.
 - b) With the other side, measure from the king pin (center) to a straight edge that runs vertically from the top rail to the bottom rail.
 - c) Increase/Decrease the length of the panhard bar until the measurement on the left side is 1" more than the measurement on the right side.

Square The Front Axle

5. Determine the amount of desired right side lead. A good starting point for most tracks is 1/4". This will vary depending on driver preference and track shape/size.
6. With the right side of the car, measure from the leading edge of the motor plate to the back edge of the front axle. This measurement will vary depending on front axle diameter as follows:
 - 2 1/4" Front Axle = 45 7/8"
 - 2 1/2" Front Axle = 45 3/4"

Adjust the right side radius rods evenly (each rod turned the same amount) until the above measurement is achieved.

Note: Another method to accomplish the same result is measure 14" from the center of the right front torsion tube, to the center of the front axle.

7. With the left side of the car, measure from the leading edge of the motor plate to the back edge of the front axle. This measurement will vary depending on front axle diameter and amount of desired lead as follows:
 - 2 1/4" Front Axle = 45 7/8" - (amount of desired lead)
 - 2 1/2" Front Axle = 45 3/4" - (amount of desired lead)

As an example, for 1/4" lead, the measurements would be (depending on the size of the front axle):

- 2 1/4" Front Axle = 45 7/8" - 1/4" = 45 5/8"
- 2 1/2" Front Axle = 45 3/4" - 1/4" = 45 1/2"

Adjust the left side radius rod until the correct measurement is achieved. Note: Another method to accomplish the same result is measure 14" from the center of the right front torsion tube, to the center of the front axle.

8. Repeat steps 6 and 7 until both measurements are correct. It's important to note this will take multiple attempts, as the opposite side measurement will change each time an adjustment is made.

Set the Caster

9. Measure the (current) angle of the car front and back by putting a angle finder on the bottom rail.
10. Mark the top of the right front radius rods with a sharpie (and any other pencil, pen, etc).

11. Place the angle finder on the right front steering arm.
12. Adjust the radius rods until the angle finder reads between 6 and 10 degrees, compensating for the (current) angle of the car.

The exact amount of caster will vary depending on driver preference. A good starting point is 8 degrees.

To adjust the caster, turn the right front radius rods exactly opposite amounts. This can be accomplished by keeping track of the number of turns done to the top rod, and doing the opposite on the bottom rod. Use the marks on the radius rods done in step 10 as a guide.

By turning the top and bottom right side radius rods equal and opposite amounts, you will not alter the squaring of the front axle, just the caster.

Set the Toe

13. Determine the amount of toe required. This is a driver preference, usually between 1/8" and 1/4". A good starting point is 3/16".

14. Loosen the jamb nuts on the tie rod.
15. Putting a tape measure through the frame (close to the radiator air box), measure the distance between the left side and right side wheel beads at the inside bead at the back of the wheel (the portion of the wheel "most" towards the back of the car).
16. Putting a tape measure through the frame (close to the torsion tubes), measure the distance between the left side and right side wheel beads at the inside bead at the front of the wheel (the portion of the wheel "most" towards the front of the car).

17. Adjust these measurements by turning the tie rod in/out until the front measurement is 3/16" (or the desired amount of toe) larger than the back measurement.
18. Repeat steps 15 to 17 until the desired amount of toe is reached.
19. Tighten the tie rod jamb nuts.

Recheck and Tighten

20. Recheck all the of the measurements above to ensure nothing moved during squaring. If any measurement is not accurate, undo all the steps, and restart the entire process at step 4.

21. Once all measurements are correct, tighten all jamb nuts (being careful not to move anything until all jamb nuts are tight).

STEERING BOXES

Gen 2 Power Steering Box

The GEN 2 was track tested for two years before it was released for production. KSE thanks a team of premier drivers including Craig Dollansky, Greg Hodnett, Brent Kaeding, Chad Kemenah, Mark Kinser, Steve Kinser, Jason Meyers, Daryn Pittman, Fred Rahmer, and Donny Schatz.

- Built in reservoir is the live tube of the gear. This cuts turbulence, aeration and provides the most cooling of any tank KSE has tested.
- Wing slider ports are O-ring sealed, utilising high flow #3 O-ring boss to 37 degree JIC #4 fittings.
- Positive feel, new four degree valve and 20% faster lead ball screw transfers quicker front wheel feedback to the hydraulic assist to improve front wheel stability. Inboard mount improves top steering gear mount rigidity, which reduces the rotation of the gear in the chassis.
- The new valve contours the pressure load over a greater range than the previous two-degree valve. This provides a more uniform feel in the steering wheel regardless of the steering load on the front wheels.
- Improved Durability through design and structural analysis were utilized to design a casting that is considerably stronger. The cross shaft tooth form is 40% stronger. Inboard mount eliminates the steering gear as a structural member of the chassis.
- The GEN 2 is comparable to the weight of the KSE Pro Lite gear. It is 25% lighter than the previous 1st generation KSE gear.
- Simplified Plumbing featuring a #10 line from the built-in reservoir to the pump inlet, and a #6 pressure line from the pump to the pressure port is all that is needed. The return to the reservoir is internally ported. The GEN 2 eliminates all external tubes and fittings of the standard gear.
- The inboard mount makes installation and removal quicker and easier. It also improves leg-room and minimizes throttle linkage issues. The built-in reservoir and internal plumbing eliminate hoses, fittings and a remote-mounted reservoir. The built in wing slide ports eliminate fittings and hoses, simplifying installation.
- Tight spots are caused by the steering load being greater than the pressure the pump can deliver. Output torque has been increased by 15% relative to pressure. The inboard mount also eliminates binding of the steering gear due to chassis flex.
- The industry leading GEN 2 is priced comparable to a standard KSE gear with a dead-tube reservoir. In addition, all the GEN 2 improvements and extras add up to an amazing value.

SCI Power Steering Pump Adaptors - Slotted

Here are two more great products from SCI. These power steering pump adaptors each offer their own unique quality. Both adaptors have a solid backing, to help keep dirt out of your pumps, and to reduce wear and tear. The slotted pump works on a standard engine or a raised cam. Both products come black anodized.
RS-SCI-1130

Adjustable to work on standard raised cam motors. Designed to work with KSE HPD and standard pumps
RS-LRBSPM-DS

Adjustable Knee Gaurds

These mounts are designed for full boxes and are coated in rubber with fully adjustable telescopic tubes.
RS-KR3000ULA

Half Box Carbon Fibre Knee Gaurds

Made from Carbon Fibre for strength and minimal weight addition. Slides straight over the right hand side of the half box housing, and can be hose clamped or cable tied on the opposite side.
RS-KRP193

Suits Gen2 steering gear

Half Box Aluminium Knee Gaurds

Padded aluminium knee guard mounts directly to the steering box in the same fashion as the carbon model.
RS-KRP487

POWER STEER FLUID SYSTEM

Drive Socket SWE321-41044
-10AN Banjo Fitting SWE321-41053
Internal Rotating Kit SWE321-81000
Seal Kit SWE321-81010
Pump Adapter SWE325-30040

KSE Power Steering Pumps

The most efficient, lightest and in the smallest package! Weighing in at 2.5 lbs, it is the lightest pump on the market. Fits all makes of Sprint and Midget chassis. It has the same bolt pattern and mounting as all KSE power steering pumps.

- Tear drop timed porting and large #10 inlet eliminates cavitation up to 10,000 engine RPM.
- 3000 PSI pressure capability with non-sticking poppet type relief valve set at 1400 PSI. Made possible by rigid construction and zero tolerance clearances with thermal expansion of only 0.0001 @ 200°F
- Every KSE pump is flow and pressure tested to strict specifications.
- Carbureted 8620 shaft with 3/8" hex drive male input and female output.
- Accepts all popular fuel pumps.

SPP Steer Pump to Motor Plate Bolts 3/8"-16 x .700"
SPP018

POWER STEER FLUID SYSTEM

Light Weight High Pressure Line

High pressure lines are designed to fit most applications. 90 degree fittings at each end allow a trouble free fit. Tested to 2600PSI.
17-1/2" L/W High Pressure Line RS-KRP017
22" L/W High Pressure Line RS-KP022
13-1/2" L/W High Pressure Line RS-KAE-PS02

Light Weight Supply Line

BMRS low pressure supply line - 10 fittings. Fits directly to GEN 2 steer box and then a 90 into the pump.
RS-KP018

KSE ELIXER Racing Power Steer Fluid

With the frequency and pressure of racing power assist being twice that of stock systems, stock power steering fluid is just not adequate. The Elixer has a higher viscosity index, antifoaming, anti-wear, and antioxidation capabilities that minimize power assist fade, low corner speed assist loss, and decrease heat generation.
1 Quart KSM1086
1 Gallon KSM1091

KNEE GUARDS

Sprint Leg Protector

Light weight aluminium formed to surround centre steering unit. Bead rolled for extra strength.

K&N Fuel Injection Style Air Box for Sprint Cars

Light weight yet durable, K&N's Sprint Car Style air box is a must for any racer. Constructed from ultra light carbon fiber, weighing in at just under 3-1/2 lbs, if maximum airflow is what you are looking for, this airbox is your ticket, flowing up to 2700 CFM. The base is designed to fit Hilborn, Kinster and Engler stacks. This airbox will allow your vehicle's engine to breathe all the clean air it needs to make you a winner. As with all K&N filters, it is washable and reusable. Simply use K&N oil and cleaner to service your filter.

HOT HEAD PRO

Hot Head PRO Engine Heaters new racy appearance continues to be the lightest, most compact and powerful engine heater available for V8s, 6s and 4s. This rugged 10 year anniversary addition relies on our time tested internals integrated into a lightweight and impact resistant polymer case. The PRO is built specifically for water cooled engines above 1200cc. and is available in North America and "world power" models.

- Updated F1 quality JiffyTite quick connect fittings
- Flexible, generator friendly circuitry can handle 220V or dual 110V outlets and only requires a 3500 watt generator
- Two heating cycles, one for fast initial warm up that uses full power, the second to maintain your temperature, limiting generator demand to only 1650 watts
- Comes with correct twist lock plug to put on your 220V power cord
- Measuring only 18" x 12" x 10" (45 x 30 x 25cm) and weighs less than 20lbs (8.5kg.)
- Robust manufacturer's warranty
- This is the only racing product you can buy that will save you money

HPE-1515-50P (220v Compatible)

HOT HEAD JR PRO

The Hot Head Jr Pro Engine Heater is designed for small engine applications. At 1500 watts it is sized perfectly for engines smaller than 1200cc. As expected the Hot Head Jr uses our European Flow-thru, On-demand technology. Fast heating is a result of combining low-mass internals and low-volume coolant storage (1.4 liter). This unit's control circuit offers a cooling mode. Used in conjunction with our Integrating Check Valve, circulating the entire coolant pah reduces the "cool down" rate by about 1/3. Our vast array of accessories makes it possible to outfit most any racing machine imaginable. Having well over 10 years of experience with Jr series applications, we've probably done it...

- Unique European, on-demand heating technology
- Tank-less design will not lose system pressure when connecting
- Cooling mode reduces rate by 1/3, eliminating latent heat build-up
- Quality quick disconnect fittings found among the top racing series
- Generator friendly, rapid heat and low-draw, maintain mode circuitry
- Seal-less magnetic drive, ceramic bearing, computer protected pump

HPE-1505

HOT HEAD

Check Valve Package

Available for 1-1/2" or 1-3/4" bottom radiator hoses. Required to plumb the engine heater into the engine's cooling system. This kit provides a check valve with male inlet and return dry brake fittings, dust caps and hose clamps.

KIN-3556

KINSLER Nozzle's

1/2"-20 Thread. Set of 8 nozzles flow matched at the Kinsler Factory.

KINSLER NOZZELS available by special order only.

Replacement O-Ring

KIN-2397

More available by special order.
Call ROCKET for details.

KINSLER

Aluminium Nozzle Plug

Designed to plug existing fuel injection nozzle ports. 1/2" - 20 thread with an O-ring for a perfect seal. Sold individually.

KIN-6160

MOOSE Down Nozzle Banjo
MOO-2055

AF66-2100
Injector nozzle banjo with breather

Replacement
Sintered
Bronze Filter.
KIN-2394

AEROFLOW Low Profile Down Nozzle Filter
AF462-02

KINSLER Quick Release Main Bypass

Quick release for quick and simple main jet changes. Hard anodised aluminium, with #6 ends.
#6 Ends KIN-3112
Replacement O-Ring Kit KIN-3117

KINSLER IRL High Speed

Used by all the top teams. IRL high speeds are accurate, consistent and allow for easy adjustment. #6 inlet and outlet.
49-106 PSI KIN-3970
57-123 PSI KIN-3971
88-230 PSI KIN-3972
Replacement Filter KIN-3989
Replacement Diaphragm & Pintle KIN-12090

IRL Valve Mount

Allows for sturdy mounting for the IRL valve. Will mount to any 1-3/8" tube, generally on the rear radius rod tube.
RS-IRLMNT

KINSLER Restrictor Jet Holder

Hard anodised aluminium #6 female to #6 male.
KIN-3161

KINSLER Diaphragm Bypass

Can be used as High or Low speed bypass, available with or without restrictor jet holder.
#6 inlet and outlet.

H Model Bypass KIN-3903
HR Model Bypass Includes Restrictor KIN-3904
Replacement Adjustment Screw & Nut KIN-3929
Diaphragm Bypass Rebuild Kit KIN-H/HR-KIT

KINSLER HIGH SPEED BYPASS VALVE

This valve has the highest flow capacity with the lowest pressure rise of any valve on the market. For most applications the rise is under 1-PSI, since the total bypass flow for most systems is 600 lbs/hr or less. Extremely smooth operation, the closing flow curve is within 0.3 (/10) PSI at any slow point on the opening curve. This is achieved by hard coating, the micro lapping all of the moving parts. This means the pressure in the fuel system will stay close to the set point on both rising and falling engine RPM
-6AN, 57-123 PSI KIN-3981

KINSLER SCREW TOGETHER VALVES

Main bypass valve, 6 AN male flare, hard-anodized aluminum for gasoline and methanol.
KIN-3006

Replacement High Speed Bypass

Outlet Fitting
Suit K-140, -6AN with Stainless Insert
KIN-3987

HIGH SPEED K-140 MOUNTING BRACKET

Billet aluminum, black anodized, four mounting holes at 1.90" centers
KIN-12085

KINSLER TORQUE VALVE ASSEMBLY
The primary purpose for the Torque Valve is to bypass fuel and lower the system pressure when the engine is at Wide Open Throttle and the engine RPM is lower than the point where Peak Torque occurs. When the RPM is below the peak torque region, the engines volumetric efficiency is lower and the required fuel is reduced. Excess fuel can cause a loss in lower RPM torque output and cause the engine to falter during hard acceleration.
KIN-3210

KINSLER Aluminium High Speed Bypass

High flow, hard anodised poppet valve.
KIN-3157

KINSLER Aluminium Secondary Bypass

High flow, hard anodised poppet valve.
KIN-3030

KINSLER Brass Bypass Valves

High flow, poppet valve.
High Speed KIN-3081
Low Speed KIN-3076

KINSLER Brass Secondary Bypass

High flow, poppet valve.

KINSLER K-Jets

Kinsler K-Jets are available in .002" increments from .050" - .110".
KIN-3715-

Add jet size to prefix for part number.

KINSLER Jets .050" thru .120"

KINSLER Jet Holder Case

Jets not included.
KIN-3720

KINSLER Shim Kit

Set of 1 x 0.183" and 6 x 0.030" Shim's.
KIN-3034

KINSLER H & HR Model Bypass Rebuild Kit

KIN-H/HR-KIT
Replacement Adjustment Screw & Nut KIN-3929

SCI Hi-Speed Tester Wrench

This Hi-speed wrench has 2 set screws so you can fasten it to the female -6 fitting on your Hi-Speed tester
RS-SCI-1220

SCI Fuel Line Bulkhead Dash Plate

These fittings help make sure you don't get your low-speed and main fuel lines crossed. The dash plate is clearly marked. The quick disconnects help reduce your engine changing time without the chance switching the lines.
RS-SCI-BH

SCI Fuel Return Manifold Mount

This SCI fuel manifold mounts directly to your master cylinder bracket. It cleans up your cockpit while making your jet cans easy to get to.
RS-SCI1102

KINSLER IRL Diaphragm Kit
KIN-12091

KINSLER Diaphragm Only

Suitable for Diaphragm H & HR Bypass.
KIN-3944

KINSLER Bypass Spring Kits

Both kits include 5 springs to be used for either Kinsler or Hilborne #6AN Jetcan type bypass. The light spring kit includes a 0.016", 0.018", 0.019", 0.021" and 0.024" Spring. The heavy kit includes a 0.028", 0.032", 0.036", 0.039" and 0.042" spring.
Light Spring Kit KIN-3303
Heavy Spring Kit KIN-3304

BMRS Complete Fuel System Hose Kit

13 Piece kit fits most sprint cars and is constructed with BMRS crimped hose ends and light weight cloth hose, does not include fuel system.
RS-ICOKAE2010CPK

BMRS Fuel Supply Line Kit

2 Piece kit has a break in the centre for ball valve / fuel filter. BMRS crimped hose ends and light weight cloth hose, does not include ball valve or filter.
RS-ICOKAE2011FLK

MOOSE Injector Wash Plugs

Keep contaminants from entering your engine while washing and doing maintenance. Available for all injector sizes. Supplied as a set of 4.
2-11/16" MOO-2430
2-13/16" Plugs MOO-2440
2.9" MOO-2450
3" Plugs MOO-2460

SCI High Speed Gauge Assembly

Designed for high accuracy and easy reading, the gauge is broken down in 1psi increments. Ball valve controls air flow easier than standard type regulators.
RS-SCI-1152

KINSLER Leak Down Tester

- (3) 10/32 x 7/8 SHCS
- (3) 10/32 steel jet nuts
- (3) 10/32 aluminum washers

SPP-TL-KIT

FUEL PUMPS & FILTERS

KINSLER Tough Pump II

Tough because it combines one piece gear shafts with larger diameter roller bearings. All parts are high alloy steel case hardened and precision ground, whilst the housing is hard coated for consistent flow over a very long life. The Tough Pump can ingest dirt and debris that would cause other pumps to fail. Inlet port directs fuel straight to gears, rather than making a 90° turn like most pumps, this allowing excellent top end performance up to 14,000 engine RPM. Stronger housing controls clearances when heat builds into pump. Industry standard size.

Available in all popular gear sizes.
Contact Rocket for details.

WATERMAN Sprint Pump

Available with or without a bolt on three port manifold for simplified fuel line routing (as pictured). Machined from forged aluminium, featuring machined steel shafts and precision lapped gears. Each fuel pump is equipped with a swivel flange. The pump can be built in either clockwise or counter clockwise rotation. Each pump is flow tested to ensure optimum performance and shipped race ready.

Micro-Bertha Steel Sprint Pump

3 or 4 Port Manifold
Waterman Racing keeps raising the standard in sprint car racing with their new steel fuel pump. The steel fuel pump is designed to allow the body and gears to expand at the same rate creating a more consistent fuel flow. The pump isn't just better in performance - it weighs close to the standard aluminum pump.

MSD Self Powered Timing Light

An accurate timing light is extremely important to the performance of your engine. MSD's Self-Powered Timing Light is a tool every team should have. A great feature of the Self-Powered Timing Light is that it does not require 12 Volts. This means less wires hanging over the engine compartment and makes for quick, easy checks. The light uses 6 x AAA batteries. The light weight assembly is injection molded for great durability and produces an intense strobe that is easy to view through 5,000 rpm. The inductive pickup is detachable for easy storage.

MSD8991

OUTERWEARS Mag Scrub Bag

Manufactured from water repellent denier nylon. Great for keeping dirt and water out of the magneto during washing or transportation.

RS-OUT-MAG

PRO MAG & ACCESSORIES

Getting Started

The following parts are required to get started with an MSD System.

- 12 LT Generator (Chevy) MSD7908
- 8.5mm Super Conductor Plug Wires MSD31549
- Electronic Points Box MSD8106

PRO MAG 12LT

The 12LT was designed specifically for Sprint Car racing where every ounce counts. MSD engineers were able to reduce the weight by almost 30%, and size of the 12 Amp Pro Mag for a better fit behind the injector. The 12LT is available for Chevy, Ford and Chrysler engines. Each application uses a billet aluminium housing that the generator assembly mounts to. With the lower housing clamped into position, any timing changes can be made by simply loosening the band clamp and rotating the generator. This saves time and is much easier than having to rotate the entire unit. Each generator is supplied with a special cap and rotor, bronze gear and connectors.

An MSD8106 must be used.
Chevy MSD7908

Chrysler & Ford PRO-MAG available by Special Order

12LT Replacement Cap & Rotor

4" Cap and Rotor, sporting stainless terminals for resistance to corrosion caused by ozone in the cap. Molded out of Rynite and a brass / stainless steel rotor tip, plus lock screw for secure mounting to the mag shaft.
MSD7919

MSD Bronze Gear

Chevy - .500" ID
MSD8471

Bronze Oversize & Chrysler / Ford Gears available by Special Order.

MSD Hold Down Clamp
Chevy MSD8110

MSD Band Clamp
MSD8148

MOOSE Billet MSD Degree Mount

Provides accurate, quick and easy timing adjustments at the track to suit varying conditions.
MOO-2085

MSD Ignition Switch

This heavy duty single pole, single throw switch will stand up to the abuse of the racing world. Rated at 15 amps so it can handle the power of the Pro Mag 12. The housing is designed to survive high impacts and features a molded in elastomer seal between the toggle lever and bushing.

MSD8111

SCI Kill Switch Assembly

SCI has designed this new kill switch assembly to fit most race cars out there. This kit comes completely wired from your switch to your MSD box as well as your TEL-TAC making installation easy.

RS-SCI-1181-W

MSD Deutsch Connectors

These connectors provide a sealed and locked connection and do not require special tools for disassembly.

2-Pin Connector MSD8181
4-Pin Connector MSD8183

HRP Aluminium MSD, Tach & Switch Mount

Groups the electronics together so they are easily and quickly removed. Bend allows it to follow the shape of the dash.

HRP-8120

MSD Electronic Points Box

With a built in Soft Touch Rev Control that will save your engine in the event of driveline failure or wreck. The rpm limit is adjusted with plug in modules and will produce a smooth, accurate limit.

- Includes Kill Switch (MSD 8111)
- Extra Endurance
- Requires 200-250 cranking rpm
- 8.4" Long x 4" Wide x 2.9" High - 3.7lbs.

Points Box RED MSD8106
Points Box BLACK MSD81063

Replacement Vibration Mounts MSD8822

MSD Points Box Mounting Plate

Our new aluminum MSD tach plate streamlines swapping your electronics out for trouble shooting and the car wash. A quick and easy way to remove and replace your tach, MSD box and MSD switch with two connections and two dzus buttons. Lightweight and durable. Available in black and bare metal.

RS-SCI-1181

MSD Mounting Plate Black
RS-SCI-1181-B

MSD Quick Release Panel

Sheet metal mounting panel makes removing and installing your MSD box quick and simple. It is designed to mount on the engine side of the dash panel. A ground terminal and dzus fasteners are supplied.

12 Amp Electronic Points Box MSD8102

SCI MSD Mounting Plate (Black)

Our new aluminum MSD tach plate streamlines swapping your electronics out for trouble shooting and the car wash. A quick and easy way to remove and replace your tach, MSD box and MSD switch with two connections and two dzus buttons. Light-weight and durable.

RS-SCI-1181

KENNY'S Carbon Fibre Quick Release Panel

This light weight carbon fibre panel is perfect for mounting your points box and Tel Tac II & Pro for easy removal as one unit.

RS-KC321PS-1

MSD Tach & Kill Switch Mount

MSD, Tach and Kill Switch Mount. Aluminium. All three on a custom aluminium plate that Dzus to your dash for easy removal when washing and doing maintenance. Utilizes the stock mounting holes on each component. Tach face and switch mount flush to back of dash, and small holes in the dash facilitates reading the tach and allowing the switch to poke through. Clean and simple one piece design. Designed for a bent dash (see SC-BW-0700 for the same mount for a dash that is flat). Comes complete with dzus springs

Material: Aluminium
Length: 13.75"
Width: 4.5"
Weight: 5.9 Oz
TXRC-SC-BW-0701

AF4530-31239

XPRO 8.5mm IGNITION LEAD SETS

Aeroflow's 8.5mm(21/64") Universal spark plug wire sets come with the spark plug terminal and boots fitted with the other end open.

Distributor cap boots and terminals for both late model type (HEI male terminals style) and early style (female terminals) are included so you can cut to the preferred length. The kit is supplied with a mini crimper. It is an 8 cylinder kit supplied with three 812.80 mm (32"), two 1219.20mm (48"), two 1270mm (50") and two 1422mm (56").

- Spiral Wound 8.5mm(21/64") lead wire
- Low Resistance (40-50 ohms per foot)
- High EMI Suppression
- Durable Silicon Sleeve with EPDM outer cover
- Available in Red or Black

Universal Plug Wire Kits

AF4030-31193 Black Multi-angle, standard & HEI cap ends

AF4030-31193

MSD 8.5mm Super Conductor Plug Wires

Featuring a copper alloy conductor that is tightly wrapped around a special centre core to create a highly effective EMI choke. With this design, the wire has less than 50 ohms resistance per foot, but does not interfere with any other electronics! Each wire is numbered for its cylinder and all terminals, and boots are factory installed with 90° boots each end to suit Chevy Sprint Car engines.

MSD31549

TACHOMETERS

TEL TAC Oval Track Pro Digital Tachometer

Now also available in Black. The OTP is designed strictly for oval track use, dirt or pavement, 1/8 mile to full mile tracks. While on the track, the OTP will choose the two consecutive laps that had the highest RPM's, and after engine is switched off will display the four lowest and four highest RPM's from the laps it chose, in the order they were taken on the track. It will also show the highest RPM attained for the whole session.

OTP - Black
Replacement Wiring Harness

RS-TELOTP-BK
RS-TELO1235

TEL TAC II

The Tel Tac II displays the peak RPM once the engine is switched off.

TEL TAC II RS-TAC2

SCI TEL TAC Quick Release Mounting Brackets

Two piece bracket enables simple quick release mounting of Tel Tac tachometers. Brackets bolt on using existing hardware, and tach then dzues fastens to your car. Kit includes dzus springs.

AUTO METER Ultra

Light Liquid Filled Gauges

The toughest gauge in racing, Liquid Filled Gauges are designed to withstand the harshest race environments. They provide the strength and durability you have come to expect from Auto Meter.

Oil Pressure

Gauges include 1/8" & 1/4" NPT fittings and 6 ft. nylon tubing.

Oil Pressure 0-100PSI AU4621

Oil Pressure 0-200PSI AU4622

Water Temperature

140-280 Degree F 6ft. Capillary AU4631

120-240 Degree F 6ft. Capillary AU4632

140-280 Degree F 4ft. Capillary AU4631-SP4

2-1/8" Ultra Light Gauges also available - non liquid filled

**AUTO METER Ultra Nite
Glow In The Dark Gauges**

Easily identified by their anodised blue exterior, Ultra-Nite gauges offer unique features required in certain forms of racing. The luminescent dial glows at night for dimly lit tracks when no electrical power is available. A sealed, water resistant case keeps moisture and debris out. Made for harsh environments where light weight is desired.

- Oil Pressure**
 Oil Pressure 0-100PSI AU4521
 Oil Pressure 0-150PSI AU4523
- Water Temperature**
 Light weight anodised aluminium fittings on the temperature gauges are ideal for sprint car racing.
 140-280 Degree F 6ft Capillary AU4531
 120-240 Degree F 6ft Capillary AU4532
 140-280 Degree F 3ft Capillary AU4535

**LONGACRE Oil Pressure
Warning Light Kit**

This kit could save completely detonating an engine. The light switches on when pressure falls below 20psi. Includes switch, light, battery mount, pressure sender, 1/8 NPT fitting and instructions.
 RS-LON4562

Quickcar Digital Gauge Panel with Gauges

- Quickcar lightweight Digital Gauge
- Panels are fitted with reliable, precision, 2-1/16"
- diameter gauges and feature built in warning lights, quickly alerting the driver in the event of a problem.
- Panels are sold completely wired, with senders, for easy installation.
- Battery pack and charger included.

3.5" Stainless Exhaust Band Clamp

SPIN-SBC35

V-BAND CLAMPS

Aeroflow V-Band kits comprise of mild steel weld flanges and a stainless steel clamp. New self-aligning V design. The weld flanges have been designed with a male to female connection which not only helps align the bands but also provides multiple sealing surfaces which prevent leaks and warping. Mild steel weld flanges are plated in high lustre weld through coating to help prevent rust and corrosion. Aeroflow V-band clamps utilised a special designed stainless locking nut which does not melt or loosen with the high exhaust temperature like the inferior Nyloc nut.

Part No	ID	Weld Rings	Description
AF92-3500	3.5" (88.9mm)	Steel	AF59-3500-1
AF92-3500SS	3.5" (88.9mm)	Stainless Steel	AF59-3500-1

V-Band Clamps & Machined Steel Rings

A great way to fasten your mufflers to your headers. Removes quickly and easily for muffler replacement or storage. Clamp and Ring sets complete one header, so two kits service one car.

DMI-SRC2393B

DMI Big Unit Torque Tube

DMI-SRC2387

DMI Body Armour Torque Ball Housing

The strongest steel housing on the market. Ball is perfectly aligned with uni centreline. Alloy inserts are replaceable. So you do not have to throw the whole assembly away. Also protects the driver from driveline explosions. Also interchangeable with Winters driveline parts.

Body Armour Housing
Replacement Insert

DMI-SRC2305
DMI-SRC2309

SCI Torque Tube

Newly designed torque tube aims to reduce flex, taking the whip out of the driveline, creating less vibration and strain on the u-joint and car. Available in 2.990" or 3.0"
RS-SCI-1128 3.000"
RS-SCI-1128-2.9 2.990

SEALS-IT Drive Line Seal

Great for keeping the dirt and grit out of the inside of your ball and torque tube. Suits many different housing designs, with SBC or Mopar Crank flanges.
DMI-SRC2301

Kevlar Torque Housing Blanket

Made from Kevlar for ultimate protection around your feet and legs. Also, fast and easy to get in and around the housing for maintenance.
RS-KRP326

DMI Torque Ball Housing Nut - Tall

DMI-SRC2304

BUTLER Torque Tube Pad

RS-BUT-BBP-4810

XXX CH-X Drive Line Restraint System

Complete Driveline Restraint System designed to restrain and tether torque tube and driveline. It's clean design makes it light, inexpensive, easily installed, does not interfere with routine maintenance and does not affect chassis flex/performance while protecting your legs and feet from the torque tube.
TXRC-SC-CH-3000

DMI Torque Ball Housing Stud Kit

Suitable for most housings, supplied with 4 x steel studs, and 4 x alloy high nuts.

WINTERS Pro Eliminator Rear Ends

The most common rear end used in all sprintcar racing. Magnesium centre section, with black thermal coating, 10-10 internal coupler, and a 52" long spline axle as standard. Available with 4.12 or 4.86 ring and pinion. **More options available call for more info.**

- Pro Eliminator with 4.12 R&P RS-WINTK837S
- Pro Eliminator with 4.86 R&P RS-WINTK837S-1
- Swivel Coupler 4.86 R&P RS-WINTK837S-1SW
- Swivel Coupler 4.12 R&P RS-WINTK837S-SW
- Swivel Coupler 4.12 Polished R&P Titanium Lower Shaft RS-WINTK837S-SWT
- Swivel Coupler 4.12 R&P, Polished RS-WINTK837S-SWP

WINTERS Pro Sprint Rear Ends

1/2" lighter in 11 lbs lighter than the Pro Eliminator rear and offers extra fuel tank clearance. Features new spiral bevel ring and pinion that is much stronger, magnesium centre section with a billet rear cover, and special cast aluminium side bell for more strength. All standard options available.

- Swivel Coupler 4.12 Polished R&P Ultra Light Axle S-WINTK848S-PS
- S-WINTK848S-PST With T122 Swivel Coupler

REDLINE SHOCK PROOF DIFFERENTIAL & TRANSMISSION OIL

- Film thickness greater than an SAE 75W250, yet low fluid friction like 75W90
- For heavily-loaded racing differentials and transmissions, problem gearboxes
- Many performance racing applications like Sprint/Midget/Dirt Late Model Differentials, Detroit Lockers and spools, NHRA Top Fuel and Funny Car rear ends
- Not recommended for most synchro applications due to the product's extreme slipperiness
- Fully-synthetic formulas created from polyol ester base stocks, offer excellent lubrication under extreme conditions
- High viscosity-index (VI) to provide relatively constant viscosity and film thickness with varying temperature change
- Ester base stocks and friction modifiers provide additional slipperiness to lower operating temperatures by reducing the sliding friction in hypoid gears
- Superior shear stability and reduced oxidation compared to other synthetics and conventional gear oils
- Exceed API GL-5 specifications
- Engineered to provide the highest degree of protection and improvement of differential efficiency for better mileage, longer drain intervals, and less wear

Description

Heavy Load Shock Proof Gear Oil 1 Quart (946 ml)
Heavy Load Shock Proof Gear Oil 1 Gallon (3.785 Liters)

Rear Axle Spacer 19pc Kit

Sprint Car rear axle spacer kit. Kit contains a total of 19 CNC-machined billet aluminum spacers. Includes all the spacers needed to do both sides of the axle with infinite adjustments to within 1/4". Each spacer is machined to the correct ID to not rattle around on the axle.

Kit Includes:

- (2) Bearing Shoulders (anodized silver for easy identification)
- (2) Inner Cones
- (2) Outer Cones
- (4) 1/4" Spacers
- (4) 1/2" Spacers
- (2) 3/4" Lightened Spacers
- (2) 1" Lightened Spacers
- (1) 2" Lightened Spacer

GEAR TRAYS

Plastic Gear Case

Hard plastic case to store your Quick Change gears

RS-POP001

PIT PAL Quick Change Gear Tray

Slotted tray provides for gear drainage. And a funnel holder on the side helps to make cleanup easier.

PIT-128-S

QUICKCHANGE GEAR SETS

SCS Pro Series Gears

10-Spline gears are max lightened, where possible without sacrificing strength. Average weight savings are 1-1/2lbs! Since 1987 SCS have been the proven leader in ultra high performance gears, building gears that last from 9310 aircraft alloy for maximum strength. Crown shaved (ground before heat treated) to minimize backlash and run out, broached for exact 10-spline shaft fit and black oxide finished. SCS extra 5 step heat treating process, yields maximum gear life for high stress applications such as World of Outlaw Sprint Cars.

SCS-PRO _____ (Add Gear Set Number to end)

SCS Sportsman Series Gears

SCS now makes A Quality Gear, priced for the Sportsman Racers. The SPORTSMAN SERIES gears are CNC Crown Hobbed to produce a quality that meets the exacting standards accepted by SCS. The gears are not lightened and are made of 8620 material. They are Heat Treated as are the PROFESSIONAL SERIES, but will have a REM finish rather than the Black Oxide. Please note that the SPORTSMAN GEARS are engineered the same as the PROFESSIONAL SERIES and have the exact same Gear Ratios Available.

SCS-SP _____ (Add Gear Set Number to end)

TORSION BARS

Strange Oval torsion bars

Strange Oval torsion bars have been winning races since 2008. We're one of racings best kept secrets. Repeatable ride height without adjustment Holds rate for extended period of time - we've run them for 30+ races Unparalleled consistency, even after wrecks Seamless and smooth spline fit - leave your mallet at home Our manufacturing method differs from anything on the market Critical hardness and yield numbers are better than anything on the market Aircraft quality chrome vanadium steel offers superior yield strength, fatigue properties, and impact toughness Vertical rack heat treating controls distortion CNC hobbled serration splines for precise and consistent fit Generous transition fillet radii essential to reduction of stress risers Lightweight gun-drilled design Additional attention directed to non-aggressive machining to impart a minimum amount of residual tensile stress Shot peening provides increased torsional and bending fatigue life with the application of residual compressive stress Laser etched part number on torsion bar O.D. gives the relationship to a common solid bar's equivalent rate Common solid bar number of equivalent rate also engraved onto the end of strange torsion bar for easy identification

MOO-1205 Black

PRO A2 Series Shock

Keeping the drive to stay on top of the shock world, the engineers at PRO Shocks have designed a double rebound adjustable shock. The new A2/ACF2 Series offers independent high and low speed adjustability. By having a low speed adjuster through the rod end, the user is given the ability to make easier and faster valve changes. By separating the high and low speed in the system, the A2/ACF2 shock gives multiple rebound valving options while maintaining little to no hysteresis. With the adjustment range in the shock, the racer is able to fine-tune their car to maximum speed. Each shock will come serial numbered and dyno tested to ensure optimum performance and driver feel. Call Rocket for details.

- Independent high and low speed rebound adjustability.
 - Large range of rebound options with little to no hysteresis.
 - 32 clicks of low speed adjustment and 40 clicks of high speed adjustment for ultimate tuning.
 - New steel billet piston design for internal sealing and endurance.
 - Fluid recirculation system to balance internal pressures and give the ultimate in driver feel.
- A2 SERIES DOUBLE ADJUSTABLE SHOCK**

8" PRO-A2846-11

PRO A3 Series Shock

Incorporating the newest technology developed in our A2/ACF2 Series Double Rebound Adjustable Shock, the engineers at PRO Shocks created a triple adjustable racing shock. The new A3/ACF3 Series is a single compression double rebound adjustable shock. This shock gives you one more level on the competition to fine-tune your car for maximum speed. Using fluid recirculation, this shock has the ability to allow a wide range of adjustment while keeping hysteresis low, giving the ultimate in driver feel. Call Rocket for details.

- Single compression adjustable and double rebound adjustable.
 - 32 clicks of low speed adjustment and 40 clicks of high speed adjustment for ultimate tuning.
 - Fluid recirculation system to balance internal pressures and give the ultimate in driver feel.
 - Extremely low hysteresis with a wide adjustment range.

BRAKE KITS & PARTS

SMITH TITANIUM BRAKES

SMITH TITANIUM Inboard Rotor
12" diameter .375" thick 6AL4V plate
SPPIBR-375-12

SMITH TITANIUM 4 Piston Inboard Caliper

Made from very stiff 7075-T6 billet alloy providing the stiffest pedal feel. The first brake caliper to ever come with ALL titanium hardware including: pistons, fittings, bleed screw, bolts (with super strong shoulder design). The titanium pistons block heat transfer into the brake fluid - making it the best piston material. Located at the exact centre line of the pad friction material provides for the best pad wear. Specially designed piston seals provide minimum piston retraction - drivers LOVE this feel! Large titanium pistons that boost the clamping force by 600 lbs over other calipers Calipers are black hard coat anodized and beautifully machined by MOOSE BLOCKS, INC. Suits rotor diameters from 12" - 12.200" & thickness from .250" - .400"

7/16" Lug Mount - 3-1/2" Hole Spacing

SPPBC-R-SM

SMITH Titanium Inboard Brake Rotor Hub

We feel this is the best brake hub on the market. Supplied COMPLETE with all Titanium bolts and hard coat black anodized 7075-T6 billet alloy precision machined by Moose Blocks Inc. Featuring the only "run true" hub tolerance of .002" run out. Floating system allows rotor to expand during heat cycles and helps rotor stay flat. Easy on and off rod cap design with 3/8" bolts eliminates the hub from moving and pulls straight down to evenly clamp the full spline width. Splines are precision fit to Winters or DMI axles. These are two different size splines.

Inboard Rotor Hub suit DMI axle

SPPSIBH-D

Inboard Rotor Hub suit Winters axle

SPPSIBH-W

SMITH TITANIUM #15 Inboard Brake Pad Set

The best pads to break in a new rotor. They give maximum friction and are good for abuse. The temperature range on these pads is from cold to hot (dull red) - providing the highest stopping power cold or hot.

SPPBP-R-15

SMITH TITANIUM #12 Inboard Brake Pad Set

These pads have a slower bond to the rotor taking up to an entire night of racing to reach maximum grip. Once maximum grip is achieved, they provide maximum friction for extreme abuse. The temperature range for these pads is from cold to extreme hot (bright red) - providing the highest stopping power cold or hot.

SPPBP-R-12

SMITH TITANIUM Inboard Pad Shim Spacer

3.960" wide x 2.210" tall x .100" thick fits Smith Titanium and Wilwood calipers. Two required per caliper.

BRAKE ROTORS

Wilwood Super Alloy

Scalloped Rotor

Super Alloy Steel 10.50" x .780" Vented Rotors are one of Sprint racing's lightest .750" to .810" thickness class rotor at a weight of only 3.20 pounds. A Drilled, slotted, and scalloped design with 24 cooling vanes provides excellent high temperature stability, rapid heat dissipation, and consistent performance from the brake pads.

WB160-11217

WILWOOD Scalloped Ventilated Iron Rotor

Excellent balance between lowest weight and ability to effectively manage heat. Rotor is 12" O.D and .810" thick, 8 bolt on 7" mount.

WB160-8136

WILWOOD

Ventilated Iron Rotor

High value performance, and rugged durability. Quality at an affordable price. Uses 8 x 5/16 bolts on 7" mounting and is 12" O.D and .810" thick.

WB160-0277

WILWOOD 3 Lug Aluminium Rotors

Precision CNC machined from high strength billet plate. Symmetrical machining provides perfect balance, perfect flatness and the truest rotation. Black anodise prevents corrosion, best results are obtained with Q compound pads.

10-1/8" 3 Lug Rotor

WB160-3411

10-7/8" 3 Lug Rotor

WB160-3327

WILWOOD Scalloped Cross Drilled Floating Rotor

Eliminates all thermal stress and distortion. The rotor will run truer, longer and all stress on rotor mounts, and fasteners is gone, under high temperature operation.

Floating Rotor WB160-5555

Nut & Bolt Kit WB230-5567

WILWOOD Aluminium Sprint Rotor-42T

Wilwoods 3" x 42 splined axle mount rotors are manufactured from high strength billets with the same precision as our 3 hole mount front rotors. Full symmetrical machining provides perfect balance, perfect flatness and the truest rotation of any aluminium rotor being built.

WB160-3275

DMI Light Weight Steel Left Front Rotor

Heavily scalloped and lightened to bring throwing mass down. 10-3/4" O.D rotor is built to last and have superior braking ability over aluminium.

L/W Steel 10-3/4" Rotor

WILWOOD Forged Narrow Mount DynaLite Caliper

Wilwood's new Forged Narrow Mount Dynalite (FNDL) calipers are ideal for and widely used in many competition applications including late models, modifieds, sprints, off road and road racing. FNDL calipers are a direct replacement for all previous Wilwood NDLs and similar competitive brands with 3.50" centered mounting tabs. A total of five bolts provide superior bridge strength and positive retention of the top loaded 7816 or 7216 type brake pads. The full range of PolyMatrix pad compounds is available to match the brake response and heat range requirements of any competition application.

Other standard Wilwood features include high temperature seals and stainless steel pistons to eliminate corrosion and retard heat transfer from the pads. Internal fluid passages eliminate the need for external tubes. Four corner bleed screws assure simple and effective air evacuation from the system and allow one caliper to be mounted in any front, rear, right, or left position. To round out the package, Legacy FNDL calipers are finished in Wilwood's exclusive Black Anodize, newer production units feature Type III Gray Anodize coating. Polished units are also available in select piston sizes and rotor widths.

FNDL Caliper 1.75" Pistons

- WB120-11571 Suits .38" Disc

WILWOOD Dynalite Single Caliper

Billet caliper for left front or outboard brakes. Suited to 1/4" or 3/8" rotors. Weighs 2.1lbs. Anodised Black O-Ring Kit for 1.75" Bore

WB120-4062
WB130-2655

Inboard Pads

Pad type 7216 is used on inboard sprintcar applications in conjunction with Wilwood 4 pot Dynalite calipers utilising a bridge bolt pad retainer.

Composition Metallic - Titanium / Steel

Medium to high friction compound with a steadily increasing torque curve as operating temperatures rise. Intended for specialty alloy racing rotors such as titanium. Good wear and friction properties with high fade resistance. • WB150-1436K

E Compound - Steel

Medium friction compound, with smooth engagement and consistent response from a flat torque curve. Provides a fast response without excessive abrasion on iron or steel rotors and very good wear properties. • WB15E-7266K

A Compound - Steel

Immediate cold response with highest friction values at all temperatures. Severe duty use on oval tracks, road courses, and other applications that require immediate high torque response. Long wear rate for sustained high heat braking. Compatible with all iron and steel rotors.. • WB15A-7263K

RED DEVIL Brake Pads & Heat Shields

Suited to ceramic coated titanium rotors, available individually to suit each Red Devil caliper variation, as are the matching heat shields.

LRB Red Devil 200 Series Caliper Mount

Utilises the regular two bosses on the side hat plus two side bell studs, eliminating caliper failures due to mount or stud failure. The studs on are girdled to increase reliability, and supplied with all hardware.

- RS-LRBMRD10BLK Ears required to mount to Winters V8 Rear.
- RS-LRB-BMRD10-S

LRB Single Piston Caliper Bracket
RS-LRB-WWFCM-BLK

LRB Left Front Caliper Mount

CNC Machined and black anodised, mounts single piston left front caliper with 11" diameter Rotors. RS-LRBWFCMBLK

DMI Outboard Caliper Mount

For bolting Wilwood single piston calipers to either left or right rear birdcages. DMI-SRC2581

HRP Red Devil Outboard Caliper Bracket
HRP-8073-RD

RED DEVIL New Inboard Mount Bracket

The new inboard caliper mount eliminates a possible weak point, it now utilises four pick up points on the rear end for greater strength, against twisting and failure under heavy braking loads.

- XR1 & Standard Winters Rears RED-ULB935-0541
- Winters V8 Rear RED-ULB980-1200

BRAKE ACCESSORIES

WILWOOD Split Pin

Fits all DynaLite calipers WB180-0055

Brake Pad Retaining Clip

Suit Dyna Pro Single Piston Caliper WB300-9786

DMI Left Front Brake Line Rock Guard

Aluminium plate stops rocks and debris from tearing off the brake line from the caliper. Secures under caliper to caliper mount bolt. DMI-SRC2820

WILWOOD Carbon Fibre Left Front Brake Guard

Brake guard protects caliper and brake line from being damaged by rocks and debris under racing conditions. RS-KRP507-WIL

HRP Stainless Steel LF Brake Line Guard - suit Wilwood

HRP-8011.SS

WILWOOD Bleed Screw Kit

4 piece kit suitable for all Wilwood, and some alternate brand calipers. WB220-0627

RED DEVIL Caliper Bleeder Nipples

RED-ULB9001400

WILWOOD Single Pin Retainer

Fits DynaLite caliper, 4 pack. WB180-3862

CARBON FIBRE Red Devil Left Front Brake Guard

Offers protection by wrapping around the caliper, allowing no room for rocks and debris to damage the brake line or caliper. RS-KRP507-ULB

DMI Inboard Brake Spacer

Floats between the rear end housing and the inboard rotor mount, preventing wearing out pads unevenly. DMI-SRC2931

WELD 3 Lug Rotor Bolt Kit

Supplied with three 1/2" countersunk bolts and three nyloc nuts. WEC0327

DMI Left Front Rotor Bolt Kit

Three piece countersunk bolt kit. DMI-SRC1993

WILWOOD Residual Pressure Valves

Retain a minimum brake line pressure to help eliminate excessive pedal travel. Residual pressure prevents fluid from flowing back without causing the brakes to drag. Made from billet aluminium. **2lbs. Residual Valve w/Fittings WB260-3278**

Master Cylinder Return Spring & Washer Kit

Riding the brake pedal and heating the fluid can lead to brake fade. This kit will eliminate most of those problems by adding enough return pressure to release the brakes fully. **RS-KRP352**

SPP Master Cylinder to Brake Pedal Bolt
5/16-24 x 2-1/4" **SPPPH312-24-2250**

QUICK RELEASE BULKHEAD FITTINGS

Quick Release EPDM seal with bulkhead. For use with brake* or clutch
*(NOT for road use Off-road and race use only)
AFQR103-03BH -3 Aluminium
AFQR104-03BH -3 Titanium
NOT suitable for fuel or oil.

HRP BRAKE LINE TAB SUIT -3 BULKHEAD
HRP-0023F

MASTER CYLINDERS

Compact Combination Master Cylinder Kit (1.2 Stroke)

Wilwood's compact combination master cylinders have been designed for limited space applications requiring the output capacity of a full size master cylinder. The ultra short 3.37" compact body provides 2.16" of additional clearance between the mounting flange and the fluid outlet compared to previous remote reservoir master cylinders. A full 1.12" of piston stroke meets or exceeds the stroke capacity of most full size cylinders. With 1/8" NPT fluid outlet port located at the top radius of the cylinder bore, reduces the chances for trapped air. The black E-Coated aluminium body resists corrosion and maintains a durable long lasting finish.

- WB260-10371 5/8" Bore**
- WB260-10372 3/4" Bore**
- WB260-10373 13/16" Bore**

- WB260-10375 1" Bore**
- WB260-10376 1-1/8" Bore**

BRAKE LINES & FITTINGS

#2AN Brake Line Kits

Universal length makes them suitable for most chassis. These hoses allow you to create improvements on caliper piston pressure, improving braking power. Assembled with braided stainless hose and crimped style aluminium hose ends. Kits available to suit cars utilising 2 or 3 calipers. **2 Caliper Kit RS-KAE002**
3 Caliper Kit RS-KAE002-3

#2AN Brake Lines with #3AN Fittings

These hoses allow you to create improvements on caliper piston pressure, improving braking power. Assembled with braided stainless hose and crimped style aluminium hose ends.
18" Long Straight/90° RS-KAE0218
20" Long Straight/Straight RS-KAE020
24" Long Straight/Straight RS-KAE-B0224
30" Long Straight/90° RS-KAE07

#2AN Cross Over Kit

Suitable for dual inlet calipers, when you are using #2 brake hoses through the car. **RS-KRP-514-2**

KEVLAR Brake Lines

Super Light, flexible and strong Kevlar Brake hoses with aluminium fittings available in an assortment of lengths and styles.
-3AN 18" Long Straight/Straight RED-GOD03-006
-3AN 18" Long Straight/90° RED-GOD04-002
-3AN 22" Long Straight/Straight RED-GOD03-007

-3AN 24" Long Straight/90° RED-GOD04-016

Cross Over Brake Line
For dual inlet calipers. **RS-KPC0014**

Pressurized Brake Bleeder

New simple and effective pressure brake bleeder. Add brake fluid to the canister, pump up the pressure and crack each bleeder until all the air is purged. Fits most master cylinders. **RS-KRP105**

BRAKE FLUID

RED DEVIL Brake Fluid

This fluid is designed for extreme service, and has a boiling point over 600°. A non-silicone based fluid that will not turn black through severe heat like most competitive brake fluids. Red Devil Fluid also contains special additives to aid in lubricating and galling. **RED-ULB9001032**

WILWOOD EXP 600 Plus Brake Fluid

Highly refined blend developed for high performance under hardcore heat and pressure. A dry boiling point of 626°F, exceeding any DOT or SAE spec. EXP 600 Plus has a low moisture absorption rate. It also resists aeration and compressibility after numerous heat and pressure cycles. **WB290-6209**

WILWOOD Hi-Temp 570 Brake Fluid

Specially formulated racing fluid with a dry boiling point of 570°F. This fluid can withstand the severe environments of racing. Low viscosity allows for easy bleeding, eliminating fluid aeration which is caused by foaming due to excessive pedal pumping. **WB290-0632**

WILWOOD Combination Remote Master Cylinder Kit

Precision machined from high strength aluminium, includes both small and large reservoirs which can be mounted on the master cylinder or remotely for easier access. Standard mounting configurations provide easy applications for racing.
7/8" Combination M/C Kit WB260-3376
15/16" Combination M/C Kit WB260-3376

SEATS & ACCESSORIES

89 SERIES

CONTAINMENT SEAT

KIRKEY RACING ALUMINIUM SPRINT CAR SEAT KIT

Designed for Sprint Cars and Modifieds. Four (4) sizes available, (14", 15", 16", 17"). Smaller sizes fit Midgets and 600 Micros. Kit comes with black cloth cover. Easily removable cover has additional 1/2" energy absorbing padding for extra lumbar support. 10 degree layback. Designed to accommodate all head and neck restraints. Constructed from TIG welded .100" 5052 grade aluminum. Additional MIG welding adds strength. Contoured elongated bottom reinforced for added thigh and hip support. Energy absorbing padding on seat bottom. Rib and reinforced shoulder supports have extra 1/2" energy absorbing padding directly on seat. Head restraint is adjustable both vertically and laterally and uses molded high density energy absorbing impact pads that eliminates upholstery. Head restraint can also rotate down for additional peripheral vision. Fabricated aluminum connector brackets for easy head adjustment. Left side of head restraint angled and shortened to allow easy entry, exit. Right side leg extension built in, left side cut back for easy entry, exit. Lap and sub belt openings have molded rubber grommets to eliminate belt wear. Designed to accommodate all seat belt systems. Mounts direct to chassis or with use Kirkey mounts.

HRP Titanium Seat Washer

Extra large 1" Diameter, to ensure the bolt can not pull through the seat under heavy loads or impacts.
HRP-5000

Example of finished foam insert

KIRKEY Molded Seat Foam Insert Kit

Our new molded foam seat insert kit is designed to add form fitting high-density padding to the bottom and lower lumbar of your current seat. Everything you need is included in the kit. Please note that this kit is designed to be used with a seat that fits the driver properly as is. If your seat is too large for you already you will need to purchase a second kit. Check out KIRKEY on YouTube as the video explains Step by step procedures to use the molded seat foam insert kit Kit includes all necessary materials:

- 2 containers of foam (Part A & B) • 1/4" Foam Sheet
- 1 Roll Double-Sided Adhesive Gaffers Tape
- Foam Mixer • Electric Knife • Plastic Bag • Seat Cover Material
- Checklist

MICRO CHASSIS & ACCESSORIES

XXX 600/Micro Sprint Chassis

Designed with the most common dimensions available on the market, making components compatible with most other brands. In it's first attempt, the XXX 600 chassis claimed the Tulsa Shootout. As with all XXX products, along with speed and versatility the XXX 600 chassis is designed and manufactured with quality and safety in mind.

Technical Specifications:

- 100% Chromoly Tubing. • Weight: 115lbs.
- Chassis Geometry: Same dimensions as most chassis on todays market, pick up points, motor plate location, torsion tube location, etc. • Wheel Base: 61"
- Suspension: Torsion Front and Rear.
- Torsion Bar Length: 26" • Torsion Bar Diameter: 7/8"
- Torsion Bar Split: 1-1/2"

Features:

- 1-3/8" x 0.083" tubing used for main cage and uprights, exceeding every sanctioning body's specification requirements.
- 90° Shock towers to save shock absorbers in accidents.
- Threaded shock and radius rod mounts.
- Adjustable pedal system.
- Stand up radiator for excellent engine cooling.

TXRC-600-CH1000

XXX 600 Mini

Bare Sprint Chassis

You've asked for it, and once again, Triple X has delivered. From the company that has brought you value across the board in Sprint Car, Midgets and 600 Mini Sprints, we're proud to debut our brand new 2014 600 Watts Link/Panhard Fusion Chassis!

Not just a race proven winner, the XXX 600 chassis is already the #1 chassis in all of Australia for 2014. On March 15th, Australia had a new national champion in their Formula 500 (600 Mini Sprint) division, and that man was Brock Hallett, driver of the Cates Motorsport A1 XXX 600.

The 2014 model 600 chassis comes with mounts for both a panhard style rear axle assembly and a watts link style rear axle assembly.

The panhard style assembly has been track tested and approved in the most grueling conditions, and offers cockpit adjustability of your roll center during the race. Drivers and teams looking to upgrade from previous year model cars with watts link rear axle assemblies will only need to add our brand new zero deflection right rear torsion arm to their existing components and add the panhard conversion package if they want to have the option to switch.

Chassis and components for the 2014 600 Watts Link/Panhard Fusion Chassis are in stock and ready for immediate shipping! The call for a chassis that incorporates mounts for both Panhard Rear Ends and Watts Link Rear Ends has been loud in both North America and Australia, and we're proud to be able to introduce the car that answers that call.

TXRC-600-CH2000

BODY PANELS

XXX 600/Micro Aluminium Panel Kit

Includes all aluminium panels to suit Triple X 600 Chassis.
TXRC-600-ALKIT

XXX 600/Micro Sprint "Dual Duct" Hood

The dual ducts allow air to pass through to the engine on the left hand side, and to the driver or radiator on the right hand side. The outlet placed on the right hand side also allows engine heat to escape the cockpit.

XXX 600/Micro Sprint Thrust Bearing
TXRC-600-FE0653

XXX 600/Micro Sprint King Pin Bushing
Sold individually.
TXRC-600-FA-0895

XXX 600/Micro Sprint Spindle Nyloc Nut
Sold individually.
TXRC-600-FA-0012

XXX 600/Micro Sprint Steering Box
Rack and Pinion steering box mounts directly to frame. 6" Long, 5/8" - 12 spline input shaft.
TXRC-600-ST0004

XXX 600/Micro Sprint Upper Steering Support

Upper steering support bracket, includes fitted brass bushings. Bracket supports 5/8" shafts, and utilizes 5/16" mounting holes.
TXRC-600-ST0005

XXX 600/Micro Sprint Drag Link

Runs from the steering box to the left front steering arm. The drag link is 14-1/2" Long x 3/4" O.D. and has 3/8" threads.
TXRC-600-SU0021

XXX 600/Micro Sprint Tie Rod

Joins the left hand combo steering arm to the right hand steering arm. The tie rod is 36-1/2" long x 3/4" O.D. and has 3/8" threads.
TXRC-600-SU0022

JOES Ultra Light Steering Wheel

13" Joes Ultra Light black anodised, aluminium steering wheel. 1" grip.
RS-13513-B

WILWOOD Quick Release Steering Hub

Lightweight billet aluminium hub features a spring loaded button that is non-removable and easy to use. The steel steering shaft adapter fits into a precision machined hex bore for a close tolerance fit. It is available to fit either a 5/8" or 3/4" shaft and accepts standard three bolt steering wheel pattern.
3/4" Shaft
5/8" Shaft

FRONT END

XXX 600/Micro Sprint Torsion Bar Front Axle

4130 1-1/2" x 0.120 wall thickness chromoly construction. Jig fabricated for exacting quality and fit. Chrome plated or black powdercoat.
• Axle Width: 40" (king pin boss centre's)
• Boss Length: 1-3/4" - Reamed & Honed for perfect fit from factory
• King Pin Inclination: 10° Right Front, 10° Left Front
• Panhard Mount: Threaded 3/8 Stud
• Shock Mounts: Female Threaded
• Torsion Bar Roller: Bracket on right side only, roller not included.
• Weight: 7.6lbs
Chrome TXRC-600-FA0002

XXX 600/Micro Sprint Coil Over Front Axle

4130 1-1/2" x 0.120 wall thickness chromoly construction. Jig fabricated for exacting quality and fit. Chrome plated or black powdercoat.
• Axle Width: 40" (king pin boss centre's)
• Boss Length: 1-3/4" - Reamed & honed for perfect fit from factory
• King Pin Inclination: 10° Right Front, 10° Left Front
• Panhard Mount: Threaded 3/8 Stud
• Shock Mounts: Female Threaded
• Torsion Bar Roller: Bracket on right side only, roller not included.
• Weight: 7.6lbs
Chrome TXRC-600-FA0003

XXX 600/Micro Front Torsion Arms

CNC machined polished aluminium.
Left Front Arm (Long) TXRC-600-SU0171
Right Front Arm (Short) TXRC-600-SU0172

XXX 600/Micro 36-1/2" Moly Tie Rod

Plated 4130 chromoly, 36-1/2" long suitable for XXX front ends.
TXRC-600-SU0182

STEERING

XXX 600 Power Steering Kit

600 Mini Sprint Power Assist Steering Package. All components needed to add power steering to your 600. Connect this unit to your existing frame mounted steering box (600-ST-0004) for a power assisted steering system in your 600 mini sprint. Driver receives necessary power assist based on load. Excellent feedback for superior control throughout the race even on the roughest of tracks. Great for younger or smaller drivers.
Note: This unit is a power assist steering system. The unit only adds power/assistance to the steering when there is load on the steering. Complete Kit includes everything needed to mount and run:
-Power Steering Unit and Electrical Control Box
-Upper and lower u-joint
-Steering shaft
-Wiring kit with battery terminal connections and 1 simple connection for switch.
-Upper Steering Bracket (for mounting to chassis)
-Splined quick release hub and upper shaft
-All fasteners needed to install kit
TXRC-600-STK5000

XXX 600/Micro Sprint Steering Universal Joint

Billet steering joint is half the weight yet stronger than steel assemblies.
TXRC-600-ST0001

XXX 600/Micro Sprint Lower Steering Shaft

20-3/4" Long, 5/8" - 12 spline at each end.
TXRC-600-ST0002

XXX 600/Micro Sprint Upper Steering Shaft

6" Long, 5/8" - 12 spline at one end and hex hub for quick release steering hub.
TXRC-600-ST0003

ENGINE

XXX 600/Micro Sprint Shift Lever

Lightweight 4130 Chrome moly construction, powder coated black. Lever suits Left hand shifting, and includes pin and washer.
TXRC-600-EG0007

Triple X Race Co

XXX 600/Micro Sprint Shift Lever to Motor Linkage Rod

Adjustable aluminium rod comes complete with rod ends and jam nuts, and connects shifter to Yamaha R6.

XXX 600/Micro Sprint Clutch Cable - Suit Yamaha R6

TXRC-600-EG-0045

XXX 600/Micro Sprint Throttle Cable - Suit Yamaha R6

TXRC-600-EG-0044

XXX 600/Micro Sprint Battery Box

Aluminium construction is light weight and dzusus directly to the floor pan. Dimensions: 6.5" L x 4" H x 4" W
TXRC-600-EG0039

XXX 600/Micro Sprint Motor Mount Kit

Full aluminium motor mount kit, including hardware. Suitable for Yamaha R6 engine.
TXRC-JOE-25880

XXX 600/Micro Sprint Motor Adjuster

Aluminium rod comes complete with steel rod ends, and aluminium jam nuts. Fits XXX and PMP Chassis.
TXRC-600-EG0043

HARDWARE

600 Mini Sprint Steel Bolt Kit

TXRC-600-CH2846

XXX 600/Micro Sprint Steel Bolt Kit

This kit include bolts to accommodate for:

- Rear Radius Rod To Frame
 - Brake Rod Bird Cage
 - Shock To Frame
 - Left Rear Shock To Arm
 - Radius Rod To Front Axle
 - Nerf Bolt
 - Wing Slider To Tree
 - Wing Tree Pinch Clamps
 - Steering Gear To Frame
 - Motor Adjuster To Frame
 - Drag Link, Tie Rod, Left Front
 - Watts Link To Birdcage
 - Brake Rod To Frame
 - Front Radius Rod To Frame
 - Shock To Front Axle
 - Right Rear Shock To Arm
 - Panhard Rod To Frame
 - Wing Tree/Slider To Frame
 - Wing To Tree
 - Upper Steering Clamp To Frame
 - Watts Link To Frame
 - Tie Rod, Right Front
 - Drag Link To Steering Box
 - Tank bolts
- TXRC-600-SU2846

TXRC 600/Micro Sprint Left Front Steering Arm - Drag Link Spacer

This spacer sits between the left front steering arm, and the drag link.
TXRC-600-FE0837

XXX 600/Micro Sprint Left & Right Front Steering Arm Spacer

This spacer sits between the steering arm and tie rod for clearance, needed on the left and right front.
TXRC-600-FE0889

FUEL TANK

SALDANA Retro 8 600/Micro Sprint Tank

Keeping the fuel low and forward in your tank, the Retro 8 design is preferred by most major chassis builders because of the extra forward bite the fuel cell provides.
SAL-MS216-TR

WINGS

XXX 600/Micro Sprint Wing Tree

Complete chrome plated 'H' design top wing tree supplied with internal sliders. Six adjustment holes spaced 1" apart.

- Top Width: 25"
- Height: Minimum 11"
- Upright Diameter: 5/8"
- Wing Slider Mount: 3/8"
- Bottom Width: 25"
- Height: Maximum 15"
- Upright Wall Thickness: 0.050"
- Wing Mounts (bosses): 3/8"

TXRC-600-TW0002

XXX 600/Micro Sprint Wing Post

Plated 4130 Chromoly. Built strong so they don't bend.

- Length: 8" • Wall Thickness: 0.065"
- T" Diameter (top of post): 3/16" TXRC-600-TW0004

XXX 600/Micro Sprint Manual Wing Adjuster

Plated chromoly manual wing adjuster, with a total of 7" adjustment.

- Length: Minimum 14" • Length: Maximum 21" • Bosses: 3/8"
- Wall Thickness: 0.050"

TXRC-600-TW0007

XXX 600/Micro Sprint Bent Nose Wing Posts

Bent sideways to mount to centre chassis spuds, and then to nose wing sideboards. Chrome plated 4130 Chrome moly.

- O.D: 3/4" • Wall Thickness: 0.0625"

TXRC-600-TW0025

XXX 600/Micro Sprint Straight Nose Wing Posts

Plated 4130 chromoly, designed to mount from centre chassis spuds to centre mounts on nose wing.

- O.D: 3/4" • Wall Thickness: 0.0625"

TXRC-600-TW0030

XXX 600/Micro Sprint Rear Nose Wing Strap

Stainless steel aero rear nose wing strap, channelled for strength.

Five adjustment holes at 3/4" spacing

- Length: 11-1/2" • Width: 1-1/8" • Height: Minimum: 7-3/4"

TXRC-600-TW0031

DRIVELINE

XXX 600/Micro Sprint Chain Guide Kit - Disc Style

Two 12" aluminium discs bolt either side of the rear drive sprocket, guiding the chain onto the sprocket. Kit includes discs, spacers, and 5/16" mounting nuts and bolts. **TXRC-600-SU0195**

XXX 600/Micro Sprint Chain Tensioner Kit

Designed to float with natural chain motion to allow the chain to move freely. Each roller rotates on bearings causing minimal drag on the engine. Supplied complete with bearings, springs and spring clips. **TXRC-600-DC0002**

XXX 600/Micro Sprint Chain Tensioner Wheel

Sold individually, and includes bearings. **TXRC-600-DL0003**

XXX 600/Micro Sprint Chain Guide Kit - Block Style

Nylon chain block guides chain onto sprocket, kit includes aluminium bracket, block and mounting bolts. **TXRC-600-SU0196**

XXX 600/Micro Sprint Chain Guide Replacement Block

Replacement nylon chain block guide only, sold individually. **TXRC-600-SU0198**

XXX 600/Micro Sprint Rear

Axle Nuts

Anodised aluminium axle nuts suit the XXX rear axle.

Right Hand **TXRC-600-SU0102**

Left Hand **TXRC-600-SU0103**

XXX 600 Axle Spacer Kit Black

600 Mini Sprint Black Rear Axle Spacer kit. For use with 1 7/8" Axles. 11 Spacers total in the set; 6 Standard and 5 Tapered. All the spacers you should need to get the offsets you want.

See kit details below for a list of each spacer in the kit.

Standard

- (2) 1/4" Standard Spacer
- (2) 1/2" Standard Spacer
- 3/4" Standard Spacer
- 1" Standard Spacer

Tapered

- (2) 3/4" Tapered Spacer
- (2) 1" Tapered Spacer
- 2" Tapered Spacer

TXRC-600-SU0453B

XXX 600/Micro Sprint Bird Cages

CNC machined bearing carriers feature double heavy duty double roller bearings, and include snap rings. XXX bird cages suit 1-7/8" axles and have a measured distance of 6" between the radius rod and torsion arm pick ups.

Left Side Bird Cage **TXRC-600-SU-0192**

Right Side Bird Cage **TXRC-600-SU-0193**

XXX 600/Micro Sprint Rear Torsion Arms

CNC machined polished aluminium.

Left Rear Torsion Arm

TXRC-600-SU0173

Right Rear Torsion Arm

TXRC-600-SU0174

XXX 600/Micro Sprint Jacobs Ladder

Chrome plated, 10-1/4" jacob's ladder includes aluminium straps. Jig fabricated out of 1/2" x 0.065" wall chrome moly tubing **TXRC-600-SU0002**

BRAKES

XXX 600/Micro Sprint Rear Brake Rod

Heavy duty 4130 chrome moly rod, 20" long with 7/16". **TXRC-600-SU0025**

XXX 600 Micro Sprint Rear Brake Carrier

600 Micro Sprint Rear Brake Carrier. Black. The aluminium single row bearing design saves weight over bulkier, more awkward designs. Comes complete with snap ring and bolts, so you don't have to spend time searching for hardware to assemble your brake system. 3.25" Spread Caliper Mounts Directly to Carrier. **TXRC-600-BK0002B**

600 Mini Sprint Bearing Carrier

(Birdcage). 5" Spread

LEFT - Double bearing. Includes bearing(s) and snap ring. Distance between torsion bar mount and radius rod mount (center to center) is 5". New design features a straight top bolt to allow the radius rod to mount a move freely when cage is close to chassis. Complete with zerk fitting and greaseable bearing.

RIGHT - Double bearing. Includes bearing(s) and snap ring. Distance between torsion bar mount and radius rod mount (center to center) is 5". Complete with zerk fitting and greaseable bearing. Note: (Image is of Left Side)

600 Mini Sprint Bearing Carrier, Left Black **TXRC-600-SU0205B**

600 Mini Sprint Bearing Carrier, Right Black **TXRC-600-SU0206B**

XXX 600/Micro

Inboard Brake Rotor

Steel rotor is 9.5" O.D and 3/16" thick. It utilises 6 on 5-1/4" bolt pattern with 1/4" bolts. **TXRC-600-BK0001**

XXX 600/Micro Sprint Drive Sprocket/Brake Rotor Hubs

CNC Machined aluminium hubs come in two styles to suit different mounting bolt centres.

1/4"-28 Threaded Bolt Holes

TXRC-600-SU0180

5/16"-20 Threaded Bolt Holes

TXRC-600-SU0181

XXX 600 Left Front Brake Rotor

Keizer 600 Micro Sprint Front Brake Rotor. Bolts directly to the Keizer left front hub with use of the Triple X left front brake bracket. A great tool for helping turn your car at corner entry, a quick stab or roll on to the brake entering the corner at high speed will begin your car's rotation, allowing you to maintain your high RPMs and blow by your fellow drivers at corner exit. Durable steel will last you many races before you have to replace it. **TXRC-600-BK0003**

XXX 600 Left Front Brake

Caliper Mount

XXX 600 Micro Sprint Left Front Brake Bracket. This steel bracket attaches the MCP front caliper and Keizer front rotor to the Triple X spindle. Mounting bolts sold separately. **TXRC-600-BK0004**

MCP Left Front Brake

Caliper

TXRC-MCP-1375

SUSPENSION

XXX 600/Micro Sprint Plastic Torsion Bar Bush

Made from heavy duty nylon material, suitable for 7/8" torsion bars. **TXRC-600-CH3001**

XXX 600/Micro Sprint Aluminium Torsion Stop

Aluminium torsion stops come complete with pinch bolt, adjuster bolt and jam nut. **TXRC-600-SU0170**

XXX 600/Micro Sprint Aluminium Radius Rod's

XXX 600/Micro Sprint use a 3/4" panhard bar and radius rods on the front, while the rear radius rods are 7/16".

Panhard/Front Radius Rod 15-1/2" **TXRC-600-SU0019**

Left Rear Radius Rod 20" **TXRC-600-SU0023**

Right Rear Radius Rod 21" **TXRC-600-SU0024**

REAR END

XXX 600/Micro Sprint Complete Rear End

Complete 52" x 1-7/8" rear axle assembly.

Complete Rear Axle Includes:

- 52" Rear Axle Tube
- Splined Rear Axle Nuts • Sprocket/Rotor Hub • 1/4"-28 mounts
- Ultralight Rear Brake Rotor • Sprocket/Rotor Hub
- 5/16"-20 mounts • Complete Rear Brake Carrier • Bird Cages
- 2" Tapered Axle Spacer • 1" Tapered Axle Spacer
- 1/4" Axle Spacer • 1/2" Axle Spacers • 3 x 3/4" Axle Spacer
- 2 x 1" Axle Spacers • 2" Axle Spacer • 3-1/4" Axle Spacer
- 4-5/8" Axle Spacer • 7-3/4" Rear Axle Spacer

TXRC-600-SU9000

XXX 600/Micro Sprint Rear Axle Tube

Aluminium 52" axle tube only. 1-7/8 Diameter, with 1-3/4" splines and threads. 14-1/8" centre spacing and 0.45" Wall Thickness. **TXRC-600-SU0101**

XXX 600/Micro Sprint Bearing Retainer Snap Ring

Suited to the brake carrier bearing and bird cage bearings. **TXRC-600-SU-0201**

XXX 600/Micro Sprint Splined Bearing Spacers

To be used with 1-78" axles, and come in two sizes for single or double bearing bird cages.

1-1/4" Double Bearing Birdcage Splined Spacer **TXRC-600-SU0017**

Single Bearing Birdcage Splined Spacer 5/8" **TXRC-600-SU0018**

MIDGET CHASSIS & ACCESSORIES

Triple X Race Co

XXX Midget Chassis (Bare Frame)

One of the highest quality chassis on the market, race proven by some of the best racers in the business. As with previous products, XXX has succeeded at bringing the midget chassis, and it's componentry to the racer cost effectively. From the drawing board to construction, the XXX midget has been designed with the most common dimensions available on the market, making it as compatible as possible with other brands.

Technical Specifications:

- Material: 100% Chrome moly Tubing.
- Weight: 115lbs.
- Chassis Geometry: Same common dimensions as most chassis on todays market, pick up points, motor plate location, torsion tube location, etc.
- Wheel Base/Motor Setback: 71" Wheel Base / 33" Motor Setback
- Suspension: Coil Over Front Torsion Bar Rear.
- Torsion Bar Length: 28"
- Torsion Bar Diameter: 1"
- Torsion Bar Split: 1-3/4"

Features: • 53" Tall Chassis
• 100% Chrome moly Chassis
• Threaded Shock and Radius Rod Pick Ups
TXRC-MID-CH1000

HRP Midget Rock Screen

Lightweight 4130 chrome moly, powder coated black, 8-1/2" x 23".
HRP-8069M

KIRKEY Midget Leg Protector

Light weight aluminium formed to surround centre steering unit. Bead rolled for extra strength.
K199502

BODY PANELS

XXX Midget Hood

Gel-coated white fibreglass. Dual scoop design hood takes cool air into the under bonnet area. Hood is also designed to let hot air escape from behind radiator and from rear of engine.
TXRC-MID-BW0036

XXX Midget Hood Nose
Gel coated white fibreglass nose panel.
TXRC-MID-BW0035

XXX Midget Sail Panels
Left Side Sail Panel **TXRC-MID-BW-0049**
Right Side Sail Panel **TXRC-MID-BW-0054**

XXX Midget Left Hand Arm Guard

For use with left side safety bar, fibreglass construction encloses the left side of the cockpit and deflects air around the driver. Finished in gel-coat white
TXRCMID-BW0037

XXX Midget Right Hand Arm Guard

Designed with wedge style bubble for extra driver arm room. Fibreglass gel-coated white panel is suitable for right side straight safety bar.
TXRC-MID-BW0038

Triple X Race Co

XXX Midget Left Hand Front Panel

Gel-coated white fibreglass. Pre fit for nerf bars and radius rods.
TXRC-MID-BW0042

XXX Midget Dash Panel

Aluminium dash panel is not pre drilled for dzus buttons.
TXRC-MID-BW0040

XXX Midget Floor Pan

Aluminium floor pan has radiused bends for a perfect fit.
TXRC-MID-BW0039

XXX Midget Left Hand Kick Panel

Notched for nerf bars, long radius rod and standard radius rod mounts.
TXRC-MID-BW0041

XXX Midget 4pc Right Hand Kick Panel Kit

Encloses left hand side of the car. Pre notched for standard and long radius rods, nerf bars and front radius rods. All panels are aluminium.
TXRC-MID-BW0043

XXX Midget Radiused Airbox

Pre fit for chassis, directs air into radiator.
TXRC-MID-BW0044

XXX Midget Radiator Tray

Aluminium tray with radiused bends for perfect fit. Not pre drilled for dzus buttons.
TXRC-MID-BW0045

XXX Midget Hood Plate

Midget hood plate for down tube style hoods. Pre drilled for riveting onto hood.
TXRC-MID-BW0046

XXX Midget Sun Visors

Available in fibreglass gel-coated white or aluminium.

Fibreglass Sun Visor • **TXRC-MID-BW-0047**

Aluminium Sun Visor • **TXRC-MID-BW-0048**

DRIVELINE

Rear Midget Torsion Arms

These rear arms fit all the popular cars with 1-3/4" split. Machined with full radius edges comes with hardware and a black finish.

Left **RS-SCI-1140-M**

Right **RS-SCI-1141-M**

Billet Aluminium Firewall Housing

This is the latest product from the SCI product line. Machined from billet aluminium, making it light weight and strong as well adding more protection from broken u-joints.
RS-SCI-1178

SCI Heavy Duty 3" Midget Torque Tube

This SCI aluminium heavy duty torque tube with collar has an overall length of 27-1/2" and 3" diameter on the tube. This tube has become popular because of its strength. The new torque tube and torque ball assemblies are proven to be the best on the market.

RS-SCI-1128M

ENGINE

Medium Sprintcar

Airbox

Universal

K&N has constructed the filter assembly (100-8570) from carbon fiber to fit from 2" to 2 5/8" Hillborn, Kinsler and Engler stacks. This allows racers to eliminate clamping a filter on to each individual ram tube. Once the base is in place, simply slip the main filter assembly over the stacks.

Medium Sprint box w/ Filter Top NO Holes in Base, Fits Four Injectors. KN100-8570
Pre-Cleaner Suit KN100-8570 KN100-8570PK

PETERSON Inline Temperature Port Assembly

Peterson's inline temperature sender fitting assembly has a standard 5/8-18 threaded port for a mechanical temperature probe. #10AN x #10AN Hose. PFS09-1940

PETERSON Vacuum Regulator

Proven to regulate crankcase vacuum and hold a steady level through extensive testing. Vacuum can be regulated from as high as 29.7 in/hg down to 2 in/hg. Machined from Billet aluminium and features the same great quality as all of Peterson's products. Vacuum Regulator w/-12AN Bung PFS08-0455

SCRUB BAG Midget Airbox

Water proof bag with draw string to keep water and dirt out of the K&N midget airbox while washing or transporting. RS-OUT30116201

MSD Programmable

Midget Ignition

A complete electronic distributorless system consisting of a powerful capacitive discharge Ignition Control, a four tower high output coil pack and uses two non-magnetic pickups with a trigger wheel as a crank trigger source. This takes all of the mechanical variables out of the picture to produce exact ignition timing. Adding to the accuracy and high output of this ignition system, is the advantage of being able to precisely program the timing throughout the engine's entire rpm range. By using the optional Hand Held Programmer, PN 7550, or MSD's Pro-Data+ software package on a Windows based PC, racers can program two different timing curves down to .1° per 100 rpm increments. Other features include a rev limiter, a start retard and a circuit that monitors battery supply voltage. It produces full power capacitive discharge sparks at any rpm so you can be assured of complete combustion. To control this power and the programs, a 15 MHz microcontroller analyzes the various inputs and is capable of extremely quick compensations to maintain exact timing and rpm. Supplied with the Ignition Control, two Non-Magnetic Pickups, Trigger Magnet, On/Off Switch and Software.

MSD Programmable Midget Ignition Midget Coil Pack MSD6214 MSD8240

Coil Pack, PN 8240, must be purchased separately & Crank Trigger Wheel must be fabricated for each application.

MSD Midget Lead Set 8.5mm Universal

The only wires recommended for use with any MSD ignition system. Featuring a copper alloy conductor that is tightly wrapped around a special center core to create a highly effective EMI choke. The wire has less than 50 ohms resistance per foot, but does not interfere with any other electronics. Each wire is numbered for its desired cylinder and all terminals and boots are factory installed. MSD31689

WINGLESS

XXX Wingless 52" X 2 1/4" Coil Over Front Axle

Jig fabricated for exacting quality and fit. A great looking and finished piece. Features threaded panhard bar stud and threaded shock mounts.

Technical Specs

- Material: 4130 Chromoly.
- Left Front King Pin Inclination: 8°/12°
- Weight: 16.5 lbs
- Wall Thickness: .120"
- Offset: 3" Right
- Right Front King Pin: 10°/10°
- Width: 52"

Chrome TXRC-SC-FA-0200

Complete race style steel sump. WINGLESS-014

PIT & TRAILER ACCESSORIES

HRP Double Row Wall Shock Rack
Can be mounted internally or externally to cabinets, this rack can hold a total of 12 shocks, six wide, and two deep. Two complete a set.
HRP-6522D-15

PIT PAL Shock Racks
Two piece metal shock racks designed for either 8 x coil over shocks or, 12 standard shocks. Carries all shocks side by side. Powdercoated, with pins. Dimensions: 33"W x 4.675"H x 3"D (838 x 119 x 76mm).
8 Coil Over Shock Rack
PIT-136
12 Shock Rack
PIT-1037

Wall Mount Double Row Shock Rack
Aluminium mount with pins holds up to 16 shocks in your trailer or at the shop. Bare Aluminium finish.
HRP-6522D-20

HRP SPRINT CAR TORSION BAR RACK
Single row, holds twelve bars, rubbergrommets protect bars while in rack, Includes both upper and lower racks.
White Torsion Bar Rack
HRP-6350

HRP In Cabinet Torsion Bar Rack
Holds 15 torsion bars vertically inside cabinet without taking up much room.
HRP-6959

PIT PAL Torsion Bar Rack

The best way to store bars while in transit. Grommets protect against damage. Designed to line up with trailer wall studs, and hold 12 bars. Dimensions: 33.75"W x 24.75"H x 3.125"D (857 x 629 x 79mm).
PIT-134

HRP DRIVE LINE RACK
You asked for it, you got it! This wall mount rack is made specifically for torque tube and ball housing assemblies and driveshaft. Rubber grommets and our exclusive rubber u-channel protects driveshaft and torque tube assembly while the serrated bottom pad keeps everything in its place.
White or black powder coat.
Description
White Drive Line Rack
Part No HRP-6330
Black Drive Line Rack
Part No HRP-6630-BLK

HRP Double Row Radius Rod & Tie Rod Rack
Carries a pair or drag links, tie rods, panhard bars and five radius rods - a complete car! Top and bottom are sold separately, one of each completes a set.
Pin Top HRP-6521D-20
Tray Set HRP-6521D-D20

Radius Rod Clips
1-1/4 plastic clips are great for holding rods in the trailer or mule.
RS-KRP261

HRP Tie Rod Rack

The HRP Tie Rod / Head Rack fits all series of Mules, and is a great option for carrying additional tie rods and other parts or tools. Comes in a bare aluminium finish.
HRP-6972

HRP Full Box Wall Mount

Powder coated white with rubber edging where gear sits. Made from 3/16" aluminium and mounts one gear.
HRP-6780-1

HRP Half Box Wall Mount

Powder coated white with rubber edging where gear sits. Made from 3/16" aluminium and mounts one gear.
HRP-6780-3

HRP Axle Racks

Powder coated white, with rubber edging for axle protection.
2 Front Beams, 2 Front Ends & 2 Rear End Assemblies HRP-6773
1 Rear End Assembly HRP-6774
1 Front & 1 Rear End Assemblies HRP-6775

Nerf & Bumper Rack (White)

It seems they've always been in the way and rattling around. They could be under the bench, thrashed together in a clunky box or sitting right there on the floor as the perfect tripping hazard. Well no more of that! It's time to put them in their place where they belong. We've come up with the perfect solution to store nerf bars and bumpers in your trailer and at your shop. Powder coated in white and with our exclusive rubber "U" channels, it looks great and will safely and securely hold your nerfs and bumpers on the wall, right where they belong when needed.

HRP-6135-WHT

PIT PAL Torsion Tool Tray

Finally, a tool tray designed to mount on the rear bumper, no more torsion bars rolling in the dirt. Tray holds 2 x bars, grease, tools, etc. Dimensions: 3.375"H x 12.5"W x 11"D (86 x 318 x 279mm).
PIT-133

HRP Torsion Tool Tray

Takes the mess and fuss out of changing or servicing torsion bars. Mounts to the front or rear bumper and incorporates notches to keep torsion bars from rolling or falling, plus room for grease, aerosols and tools.
HRP-6384

Drill Holder

Adjustable 2.12" to 2.92", Great Holder/Cradle for cordless drills/screw drivers. fits most popular sized cordless drills. Opening on bottom makes it possible to keep bits attached to drill for quick use and safe transport. Mounts horizontal or vertical.
HRP-6396

HRP Top Wing Cinch Strap
HRP-6772

HRP Fuel Stick Rack

HRP-6265

Sprintcar Tear Down Cart

This rolling lower base unit is perfect for safely storing your rear axle, front axle assembly, torsion arms, stops and bars, birdcages, Jacobs ladders shocks, driveshaft, torque tube, yoke, radius rods and steering gear. Heavy duty casters allow easily manoeuvrability to roll the cart where you want it. Great looking durable white powder coat finish.

Customize yours with available options which include an Add-On Base and Upper Unit (HRP6139-100) which provide even more storage and accessibility. Makes tear down and assembly of your car/s efficient and organized. Designed with ONE thing in mind.... to offer YOU the BEST in storage solutions and efficient work space.
HRP-6139

PIT PAL Gear Change Tray

Quick, easy and tidier gear changes, featuring a gear drain rack and funnel holder. Dimensions: 13.25"W x 2.5"H x 11"D (337 x 63.50 x 279mm).

SPEEDWAY TOOLS

LRB Rear End Snout Helicoil Kit

This tool allows you to repair stripped threads, and can be used with the rear end still in the car. Comes with drill jig, steel inserts, drill bushings, drill bit and tap.

RS-LRB-T0002

LRB Rear End Refacing Tool

Reface the snout of your rear end. Resurfaces 90 degrees to your shaft so the car squares up.

RS-LRB-T0001P

DMI Rear End Snout Shims

.015 Torque Tube Shim DMI-RRC1490
.030 Torque Tube Shim DMI-RRC1491
.060 Torque Tube Shim DMI-RRC1492

PBS Torsion Bar Reamer

Line boring tool that provides optimum alignment of the torsion bar and bushings.

RS-PBS01

King Pin Reamer Kit

Reams any king pin boss to fit your king pins.

RS-REM860K

DMI Spindle Nut Wrench

For removing dust cap from DMI GoldStar front hubs, and adjusting DMI Spindle Nuts.

DMI-SRC1998

HRP Winters Style Spindle Wrench

Suitable for winters spindles nuts only.

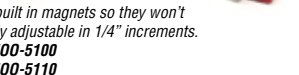

HRP-6100

MOOSE Adjustable Set Up Block

These blocks have built in magnets so they won't fall over and are fully adjustable in 1/4" increments.

1-3/4" - 4" MOO-5100
3" - 6" MOO-5110

MOOSE Adjustable Set Up Block

These blocks have built in magnets so they won't fall over and are fully adjustable in 1/8" increments.

3" - 4" MOO-5130
3" - 4.75" MOO-5140

MOOSE Cradle Rollers

Bolt onto your existing moose blocks and allow the axle to be rotated without scratching the axle, or sliding off the block. Great when running the valves. Supplied as a pair.

MOO-5125

DMI Engine Rotator Tool

Awesome for doing maintenance and especially setting valve lash, enabling you to do it without moving the car an inch.

DMI-SRC3000

KINSLER Leak Down Tester

0-100 psi gauges, with #6 AN swivel hose assembly included. High quality product, that read's accurately and consistently.

KIN-5980

SCI High Speed Gauge Assembly

Designed for high accuracy and easy reading, the gauge is broken down in 1psi increments. Ball valve controls air flow easier than standard type regulators.

RS-SCI-1152

Sprint Car Engine Sling

HRP-ES

SCI Engine Handles

Supplied in a pack of four and can be fitted to a coarse or fine threaded stud. A great tool for speeding up engine changes, or just moving a motor around at the shop. Black anodised, and a knurled non slip surface.

RS-SCI-1177

Safety Wire Drill Jig

Easy to use, making drilling bolts a breeze. Screw the bolt in, tighten down the mandrill pilot and drill away.

RS-KPC200100

SCI Run Out Tool

A must for serious racers, with two fully adjustable towers this tool allows you to check drive lines, torque tubes and torsion bars etc.

Includes magnetic indicator.

RS-SCI-1112

SCI Torsion Tube Bullets

Used to punch through a bent or dented tube, to aid straightening. They can turn a head ache into a quick and easy job.

0.095" Torsion Tube Bullet RS-KRP478
0.120" Torsion Tube Bullet RS-KRP479

BRUNNHÖELZL Pit Jack

RS-KPC-01225 BLK
Replacement Jack Seal Kit RS-BRUBRI-036
BRUNNHÖELZL JACK DIRT WINGS RS-DIRTWINGS

BRUNNHÖELZL JACK DIRT WINGS

RS-DIRTWINGS

SCI Radius Rod & Rear Arm Gauge

This tool makes building radius rod & rear arms easy. Our adjustable gauge makes for perfect duplication of your arms and radius rods, ensuring that you are ready to bolt your spares directly up to your race car.

RS-SCI-1121

OVAL TOE PLATES

The new oval toe plates make setting the toe on your front end easy. With it's oval design it helps get your tape measure away from your brake rotor and steering components. Designed to fit wide five front hubs.

RS-KRP-583

JOES RACING STOP WATCH

Finally, a simple stop watch designed for racing. Rubberized coating and ergonomic shape, that feels great in your hand. Recall your fastest, slowest and average times at the touch of a button. So easy even the average JOE can use it!

Raised screen bezel protects the watch face. Quick one button recall, backlight with auto shut off and a low battery indicator.

80 lap memory.

RS-JOE28338

COMPETITION ENGINEERING Professional Angle Finder

Perfect for setting wing angle, determining level on a race car or rear end installation. ABS plastic with a convenient grooved base to sit flat on round surfaces. Angle and grade chart on back of gauge.

MOC5020

Grease Needle Suit Low Profile Grease Nipple

Needle fits onto grease gun and allows you to pump grease into low profile grease nipples for tight spaces.

RS-GN

SCI Belt Puller Tool

Be sure to have your belts tight, this will allow you to get that extra pull on the belts.

RS-SCI-HOOK

Power Brake Bleeder

New simple and effective pressure brake bleeder. Add brake fluid to the canister, pump up the pressure and crack each bleeder until all the air is purged. Fits most master cylinders.

RS-KRP105

SCI Deluxe Engine Sling

The SCI engine sling was designed to go around your valve covers without jamming up on them. Its unique design will also allow you to keep your air cleaner on your spare motor if you desire.

RS-SCI-1167

SCI Engine Handles

SCI has designed these engine handles to fit on a coarse or fine threaded stud. Engine handles are a great tool to have to speed up a motor changing process at the track or even around the shop. These handles come in black with a knurled non-slip surface.

RS-SCI1177

Fuel Tank Cover

Reflects heat away from fuel tank, keeping fuel temperature down.

RS-KRP063

Engine Bag

Outervare engine bag, keeps dust water and debris off you spare engine, back at the race shop or in the trailer.

RS-OUT-ENGBAG

WASH CAPS & BLOCKOFFS

Plastic Bung & Cap Kit

Comes with various size plastic caps and plugs to block off lines to prevent dirt getting in and contamination.

AF98-2025

SCI Injector Wash Plugs

Available in many sizes, SCI wash plugs are o-ring sealed to stop water getting down into the motor. Holes in the top will hold spark plugs and nozzles. Please specify size when ordering.

RS-SCI1133

MUD OFF & SCRAPERS

DIRT SOLUTION Mud

Repellant

Dirt Solution's proprietary blend is specially formulated to repel mud from sticking to any surface. Dirt Solution has been tested throughout many different forms of dirt track racing. Dirt Solution has been used on Sprint Cars, Dirt Late Models, Off Road Trucks, Motor Cross, RC Cars and at the Bonneville Salt Flats. Dirt Solution has been compared to Mudd-Off, Mud-X, and Baby Oil and has out performed everyone!

RS-DS

SURE SHOT

High Pressure Sprayer

Great for oiling or spraying on MudX. Air valve in top for pumping big pressure into the can.

RS-KRP505

DELUXE Aluminium Mud Scraper

Lightweight mud scraper 32" aluminium handle with foam grip. Great for cleaning top wings.

RS-KRP098

BLANKETS & COVERS

Hood Blanket

Great for keeping the hear in engine bay between races.

RS-KRP015

Rear End Set Up Tips

Squaring The Rear Axle ...

1. Put the rear end in the car; using a 5" block on the left side, and a 6" block on the right side.
2. Bolt the torque tube in place.
3. Put on the left and right bird cages. At this point, do not attach any of the radius rods or torsion bars.
4. Using spacers, put on the axle nuts, and secure the bird cages on the axle.
5. Lightly insert (just) the torsion bar bolts into the bird cages. Do not tighten, just get bolts started two or three round.
6. Put the (greased) torsion bars in the car. At this point, leave the stops and arms off.
7. Roughly center the rear end in the car. This can quickly be accomplished by:
 - a) Measuring from a (centered) bolt on the read end cover plate to the frame rails.
 - b) Measuring from the machined back of the torque tube to the frame rails. Approximate measurement should be 10 1/8".
 - c) Line up a (centered) bolt on the read end cover to the torsion bar gusset in the middle of the rear torsion tubes.
8. Pick a side, and measure from the leading edge of the rear axle, to the front edge of the motor plate. Move the axle forward/back and side to side until this measurement is 38 5/8".
9. With the opposite side, measure from the leading edge of the rear axle, to the front edge of the motor plate. Move the axle forward/back and side to side until this measurement is 38 5/8".
10. Repeats steps 6 and 7 until both sides of the race car measure 38 5/8" from the leading edge of the rear axle to the front of the motor plate. Note: this will take numerous attempts to accomplish.

Important Note: Every step after this assumes the rear end remains completely stationary in the car. If the rear end moves in the least, undo each step completed, and start back at step 7.

Leveling the Bird Cages ...

11. Attach the (rear) radius rods on each side of the car to the bird cages.
12. Pick a side, and measure from the leading edge of the torsion bar bolt (in the bird cage) to the front of the motor plate. Wind the radius rod in/out until the measurement is 39 3/4".
13. With the opposite side, measure from the leading edge of the torsion bar bolt (in the bird cage) to the front of the motor plate. Wind the radius rod in/out until the measurement is 39 3/4".

Attaching the Torsion Arms ...

14. Remove the torsion bar bolts from the bird cages.
15. Attach the left and right torsion bars to the torsion bars (and tighten).
16. Pick a side, and without moving the birdcage, adjust the rod end so the (lower) birdcage bolt slides freely through the rod end and into the birdcage.
17. With the opposite side, and without moving the birdcage, adjust the rod end so the (lower) birdcage bolt slides freely through the rod end and into the birdcage.

Recheck and Tighten ...

18. Recheck all the of the measurements above to ensure nothing moved during squaring. If any measurement is not accurate, undo all the steps, and restart the entire process at step 7.
19. Once all measurements are correct, tighten all jamb nuts (being careful not to move anything until all jamb nuts are tight).
