**INTRODUCTION**

Congratulations on your purchase of Aeroflow Performance electrical bulkhead connector. Aeroflow Performance products cannot and will not be responsible for any damage, or other conditions resulting from misapplication of the parts described herein. However, it is our intention to provide the best possible products for our customer, products that perform properly and satisfy your expectations. Should you have any questions? Please call technical support at +61 2 8825 1900 and have the product part number on hand when calling.

The Aeroflow Performance electrical bulkhead 6 pin connector is a quality component to wire your fuel pump/s in your fuel cell project in a safe way to ensure no leaks or fumes escape. The connector kit is rated up to 40a to supply enough juice to power all aftermarket fuel pumps. The terminals are intended for use with 14-10AWG wires. The terminals are easily installed or de-pinned with ease using basic hand tools and each connector is separate making installation a breeze. This kit includes a weld-in steel bung for the bulkhead connector, two Viton O-rings to seal the bulkhead to the bung, and a snap-ring to secure the bulkhead safely in place. Internal and external connectors are included, along with 12 crimp terminals.

-Max diameter of bung 56mm (2-13/64")

-Minimum Panel hole 49.9mm (1-61/64")
