

## Low Pressure Return Style Fuel Pressure Regulator

AF49-4500, AF49-4500BLK, AF49-4500P, AF49-4500R, AF49-4501, AF49-4501BLK, AF49-4501P and AF49-4501R

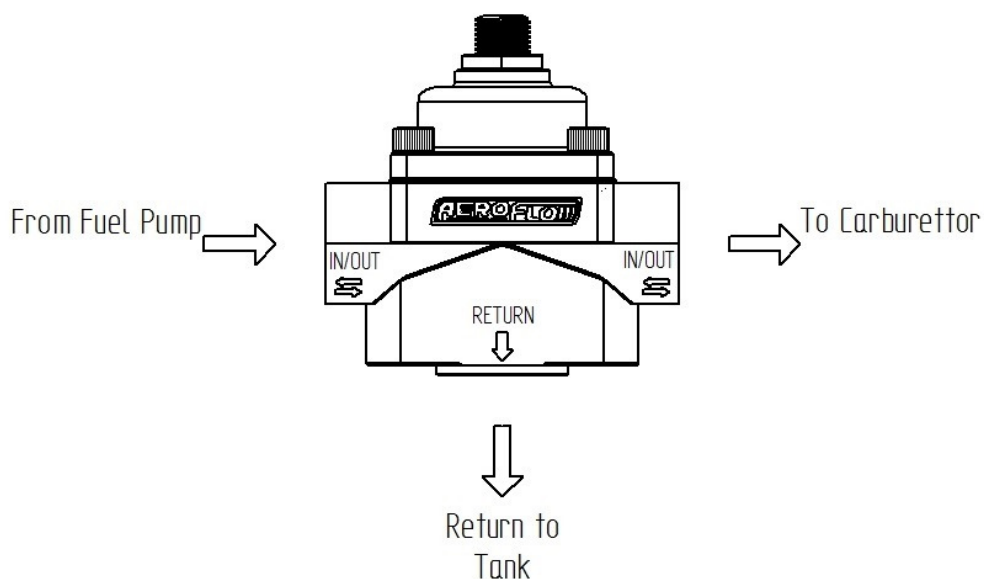

Aeroflow's Bypass 4.5-9 PSI regulator is available with either 3/8" NPT or -8ORB female threads and are the perfect choice for fuel systems running a return line to the tank with added benefit of less load on the fuel pump resulting in quieter fuel pump operation, cooler fuel and improved fuel pump life. Available in blue, black and red anodised or polished finishes.

**This fuel pressure regulator is designed for use with a return line, for non-return (dead head) applications use AF49-3000, AF49-3001, AF49-4000 or AF49-4001 style fuel pressure regulators**

*Fuel is extremely flammable and extreme care is needed when working on fuel systems. Ensure the fuel system is de-pressurised and that all ignition sources are removed prior to disconnecting any fuel system components.*

### Typical Installation
