

**AF72-3001 / AF72-3001BLK**

Included you will find a 5/16"-18 x 20mm UHL button headed cap screw bolt, this is to replace the standard hex bolt found in the rear of the transmission that fastens the guide plate for the parking mechanism. It is essential that the standard hex bolt is replaced for clearance when fitting this Aeroflow fabricated transmission pan.

Thank you for choosing Aeroflow Performance Products.
